DICTIONARY
OF
MUSIC AND MUSICIANS
VOL. II
D—J

D

D, the name of the second degree of the natural scale of C in both English and German, the French and Italian name being *Re*. Further nomenclature is as follows:

ENGLISH.	FRENCH.	GERMAN.	ITALIAN.
D flat.	Ré bémol.	Des.	Re bemolle.
D double flat.	Ré double bémol.	Deses.	Re doppio bemolle.
D sharp.	Ré dièse.	Dis.	Re diesis.
D double sharp.	Ré double dièse.	Disis.	Re doppio diesis.

In the modal system D is the final of Modes I. and II., Dorian and Hypo-dorian, and the dominant of Mode VII. Mixo-lydian.

A 'D' clef, indicating the note a third below the bass clef, was once used. (See CLEF.)

DA ANNUNCIACÃO, see ANNUNCIACÃO.

DA CAPO, or D.C.—'from the beginning'—is placed at the end of the second part of a piece of music to show that the first portion is to be played over again as a conclusion. The direction is often *Dal Segno*—'from the sign'—the sign being a *S* at or near the beginning of the first portion. In scherzos and minuets, with trios, the direction at the end of the trio is usually 'Scherzo, or Minuetto, D.C. senza ripetizione.' Among the earliest instances of its use are those in Cavalli's opera of 'Giasone' (1655), and in Tenaglia's opera of 'Clearco' (1661).

DACHSTEIN, WOLFGANG (d. 1561), a Catholic priest of Strassburg, where he was organist at the Minster about 1520, adopted the Reformed principles in 1524, married, and became vicar and organist of St. Thomas's Church there. He is known chiefly as a composer of chorales, especially 'An Wasserflüssen Babylon.' M. C. C.

DA COSTA E FARIA, see COSTA.

DACTYL, a metrical 'foot' (— ∪ ∪), exactly expressed by the original word δάκτυλος, a finger—one long joint and two short ones. (See METRE.)

DADDI, JOÃO GUILHERME (b. Oporto, Jan. 4, 1814; d. 1887), a Portuguese composer, author of various comic operas (e.g. 'O Salteador') and church music. He was a distinguished pianist, and played with Liszt in compositions for 4 hands at a concert in Lisbon in 1845.

J. B. T.

DAGINCOURT, J. A. F., see AGINCOURT, D'.

DALAYRAC (D'ALAYRAC), NICOLAS (b. Muret, Languedoc,¹ June 13, 1753; d. Fontenay-aux-Roses, Nov. 27, 1809), a celebrated French composer. His father occupied a high civil appointment in his province, and in spite of his son's early passion for music, destined him for the Bar. He was sent in 1774 to Versailles, where a commission in the guards of the Comte d'Artois, as sub-lieutenant, had been obtained for him. But the love of his art was proof against the

attraction of a military career. He used to walk from Versailles to Paris to hear the works of Philidor, Monsigny, Grétry, and to take harmony lessons with Langelé. He composed string quartets, and soon made his début with 'Le Petit Souper' and 'Le Chevalier à la mode,' performed at the house of Baron de Benseval (1781). Through the protection of Marie Antoinette, 'L'Eclipse totale,' a 'comédie mêlée d'ariettes,' was performed at the Comédie Italienne, Mar. 7, 1782. This work opens the series of his opéra-comiques (more than 56; see *Fétis* and *Q.-L.*), which secured Dalayrac's position amongst the most fertile composers of his time.

Not even the Reign of Terror interrupted the inexhaustible productiveness of his pen. 'Ambroise, ou Voilà ma journée' bears the terrible date of 1793. Devoted to the democratic ideas brought in by the Revolution, he suppressed the aristocratic form of his name. Though he lost his fortune by the bankruptcy of his friend, the financier Salvalette de Lange, he refused to avail himself of his father's will, which had diminished in his favour the shares of others. Having reached fame and become Chevalier of the Legion of Honour in 1808, he died at his house at Fontenay-aux-Roses.

Of the numerous works of Dalayrac, none have remained in the repertory, although 'Nina' (1786), 'Camille ou le souterrain' (1791), 'Adolphe et Clara' (1799) and 'Maison à vendre' (1800) may be considered as his most successful productions.

Dalayrac, in his career, met with very few failures. Of the greater part of his pieces there remained fragments that were popular for a very long time. He excelled in the composition of duos, and specially in that of 'romances,' as early as 1782. Grétry says of him that he was born with wit and grace (*Essais sur la musique, III.*); but he was not only a tender and charming musician, he was gifted with a very sure histrionic instinct—a rare quality to which unanimous testimonies have been rendered.

BIBL.—R. C. G. DE FIXÉRECOURT, *Vie de Dalayrac* (1810); *Encyclopédie de la Musique et Dictionnaire du Conservatoire*; HENRI RADIGNER, *France XVIIIe et XIXe siècles*.

F. H.; addns. and corr. M. L. F.

DALBERG, JOHANN FRIEDRICH HUGO, FREIHERR VON (b. Aschaffenburg, May 17, 1752; d. there, July 26, 1812), composer and writer, studied theology at Göttingen, and held various high ecclesiastical appointments at Trèves, Worms and Coblenz.

Although technically an amateur, he composed a great deal of music, and played the pianoforte excellently; his piano works were regarded as remarkably difficult. His most important works were cantatas, such as 'Jesus

¹ Now Haute-Garonne.

auf Golgotha,' 'Evas Klagen,' a German version of Pope's 'Dying Christian to his Soul,' and Schiller's ode 'An die Freude.' A quartet for piano and wind instruments is op. 25. A number of sonatas for piano, with and without violin, and several books of songs, some in English words, published in London, are mentioned in *Q.-L.* Among his literary works are the anonymous *Blick eines Tonkünstlers in die Musik der Geister* (1787), *Fantasien aus dem Reiche der Töne* (1806), *Vom Erfinden und Bilden* (1791), *Untersuchungen über den Ursprung der Harmonie* (1800), *Die Äolsharfe* (1801), and a translation of Sir William Jones's treatise on Indian Music, *Über die Musik der Indier* (1802). (*Q.-L.* and *Riemann.*) M.

D'ALBERT, see ALBERT.

DALCROZE, see JACQUES-DALCROZE.

DALE, BENJAMIN JAMES (b. London, July 17, 1885), composer, is the son of the late C. J. Dale, a talented amateur musician who was at one time the conductor of the Finsbury Choral Association. He studied at the R.A.M. under Frederick Corder and made his début with an overture inspired by Macaulay's *Horatius*, which was performed May 10, 1900, in his fifteenth year. Other early works since discarded comprise an overture to *The Tempest* (1902), a fantasia for organ and orchestra (1903), and a concert overture in G minor (1904). His first published and still best known work is the piano sonata¹ in D minor, which was composed in 1902 when Dale was still a student, and performed for the first time in 1905. It was followed in 1907 by a suite for viola and piano; the two last movements (romance and finale) were afterwards orchestrated, in which form they were first played at a Philharmonic concert in 1911. The romance in particular is one of the most popular pieces in the repertory of Lionel Tertis. The fantasia for viola and piano (1911), like so many others, owes its existence to the initiative of W. W. COBBETT (q.v.), whilst the fantasia for six violas (1913) was written for Tertis's pupils. The outbreak of war caught Dale in Germany. He was interned at Ruhleben until Mar. 1918, when he was exchanged and removed to Holland, returning home just before the Armistice with his health impaired by his experiences. Whilst interned he wrote 'Prunella' as incidental music to a performance of that play, which, however, did not take place. Since his return he has written little, but a journey round the world in 1919-20, occasioned by an examining visit to Australia and New Zealand, seems to have had a stimulating effect, for in 1921-22 he composed a violin sonata which was first played by Rowsby Woof and York Bowen at the Wigmore Hall in Oct. 1922. A pianoforte quartet sketched soon after the

war, remains, however, unfinished. In 1921 the cantata 'Before the Paling of the Stars,' first performed at Queen's Hall in Feb. 1913, was included in the Hereford Festival. The most important of his recent works is a 'Song of Praise' for chorus and orchestra. Dale's style is romantic, characterised by vigour in the piano sonata, by suavity and polish in that for violin and piano. A certain fastidiousness prevents his output from becoming considerable, but also ensures the maintenance of a high standard, which caused Corder once to claim that Dale had then written 'fewer and better works than any English composer of his generation.' E. E.

Op.

1. Sonata in D minor for piano. 1905.
2. Suite for viola and piano. 1907.
3. 'Night Fancies,' for piano. 1907.
4. Fantasia for viola and piano. 1911.
5. Introduction and Andante for six violas. 1913.
6. Three Carols.
7. Cantata, 'Before the Paling of the Stars,' for choir and orchestra. 1912.
8. Part songs.
9. Two Shakespeare Songs: (1) Oh Mistress Mine; (2) Come away Death (viola obbligato). 1918.
10. Pieces for violin and piano, 1916, 1920; also for piano and for small orchestra, 1917.
11. Sonata for violin and piano. 1921-22.
12. Six Country pieces arranged for violin and piano (with K. Dale).
13. 'Song of Praise,' for choir and orchestra. 1923.

DALE, (1) JOSEPH, a very prominent music publisher, who founded a business which extended from before 1778 to nearly the middle of the 19th century. In 1778 he was established at a private house, 19 Chancery Lane, from whence he issued many musical publications, including a number of operas, as 'Rosina,' 'Flich of Bacon,' 'Maid of the Mill' and others, the copyright of which he had purchased from Napier and Welcker. Between 1783 and 1786 he had opened extensive premises at 132 Oxford Street (at the corner of Holles Street), having taken over the business of S. Babb. In 1791 he had, in addition, another shop at 19 Cornhill, and in 1803 a third at 151 New Bond Street. Before 1806 his son, (2) WILLIAM, was in partnership, and the business was one of the best in the trade in London.

In 1812, however, there are appearances of a break-up. (3) JOSEPH, possibly a son of the original, remained at 19 Cornhill, and William was, in the Poultry, succeeded in 1828 by (4) E. DALE, who remained until after 1835. The original Joseph Dale was to some extent a musician. He composed sonatas, and arranged vocal airs with variations for the harpsichord or pianoforte. Another contemporary with him (perhaps his brother), (5) JAMES DALE, did the same.

The Dale firm in its best days issued so many and such various publications as to defy classification. The standard operas of the day, collections of English and Scottish songs, country dance music, and sheet music of all kinds, bear their imprint. F. E.

¹ A detailed analysis of it was contributed by F. Corder to the *Mus. T.*, Apr. 1918.

DALLAM (**DALHAM**, **DALLUM**, **DALLANS**), the name of a family of English organ-builders in the 17th century. The eldest was employed in 1605-06 to build an organ for King's College, Cambridge, for which purpose he closed his workshop in London and removed his whole establishment to Cambridge. He and his men were lodged in the town, but boarded in the College Hall. Rimbault (*History of the Organ*) gives a very curious account of every item paid for building this organ. It was destroyed in the time of the Long Parliament, but the case, with some alterations, remains to this day. This Dallam's Christian name does not appear in the college books, but he is most probably identical with (1) **THOMAS DALLAM**, who built an organ for Worcester Cathedral in 1613 (see **GREAT ORGAN**). He came to London from Dallam in Lancashire, and was apprenticed to a member of the Blacksmiths' Company, of which he afterwards became a liveryman. The organs which he built for King's College, Cambridge, and for Worcester Cathedral were taken down at the time of the Civil War; parts of the former are said to be contained in the existing instrument. He was in all probability the same Dallam who in 1615, 1632 and 1637 was employed to repair the organ of Magdalen College, Oxford. In 1599-1600 he made a journey to Constantinople with a mechanical clock-organ for the Grand Turk. His diary was printed by the Hakluyt Society in 1893. For a facsimile from the same see *Mus. T.*, 1905, pp. 649, 737. The three following were probably his sons:

(2) **ROBERT** (b. 1602; d. 1665), who is buried in the cloisters of New College, Oxford, for which college he built the organ; but his principal work was that of York Minster, since destroyed by fire. He also built a similar organ for St. Paul's Cathedral. He was, like his father, a member of the Blacksmiths' Company. Between 1624 and 1627 he built the organ of Durham Cathedral, which remained till 1687, when Father Smith, after putting in four new stops, sold the choir organ for £100 to St. Michael's-le-Belfry, York. It remained there until 1885, when it was sold for £4 to an organ-builder of York. It is said that Dallam received £1000 for the original organ, but there is no foundation for the statement. In 1634 he built an organ for Jesus College, Cambridge, in the agreement for which he is called 'Robert Dallam of Westminster.' He added pedals in 1635: the organ, after being taken down at the time of the Civil War, was replaced at the Restoration. In 1635 he built an organ for Canterbury Cathedral. The Calendar of State Papers for the same year contains a bill of Robert Dallam's, dated Nov. 12, for work done to Laud's organ at Lambeth. An organ which he built for St. Mary Woolnoth's was so much injured in the fire of London that it was re-

placed by a new instrument built by Father Smith, who, however, used some of Dallam's stops.

BIBL.—*D.N.B.*; *HOPKINS* and *RIMBAULT*, *The Organ*, 3rd ed.

(3) **RALPH** (d. 1673) built the organ for St. George's Chapel, Windsor, at the Restoration, as well as those at Rugby, Hackney and Lynn Regis. The Windsor organ is still preserved at St. Peter's-in-the-East, St. Albans. He died while making the organ at Greenwich Church, begun by him in Feb. 1672. His will, dated Aug. 2, 1673, proved Sept. 19, 1673, gives evidence of his death between those dates, and shows that he had two brothers, **GEORGE** and **THOMAS**, and two sisters, **MAY** and **KATHERINE** (the wife of **THOMAS HARRISON** of London, organ-maker). **JAMES WHITE**, his partner, finished the Greenwich organ in 1673. (4) **GEORGE** lived in Purple Lane in 1672, and in 1686 added a 'chaire organ' to Harris's instrument in Hereford Cathedral.

V. de P.; addns. W. B. S.

DALLERY. The eldest of these organ-builders was (1) **CHARLES** (b. Amiens, c. 1710), and originally a cooper. The organ of the abbey of Auchin, transported later to St. Pierre, Douai, was his work. His nephew and pupil, (2) **PIERRE** (b. Buiro-le-Sec, near Montreuil-sur-Mer, June 6, 1735), after working with his uncle, was, until c. 1780, in partnership with **François Henri CLICQUOT**. To the union of these two clever men are due the organs of St. Nicholas des Champs, Sainte Chapelle and St. Merry in Paris, and many others now destroyed or mutilated by ignorant workmen.

(3) **PIERRE-FRANÇOIS**, son of Pierre (b. Paris, 1764; d. there, 1833), worked with Clicquot and his father from 1801-07, when the latter retired from business, and Pierre-François remained alone. He never had an opportunity of undertaking large work, but was entirely occupied in repairing instruments. He was clever in certain points, but had not studied his art profoundly, and being a needy man, often used inferior materials. He left nothing but his name to his son, (4) **LOUIS PAUL** (b. Paris, Feb. 24, 1797), who worked with him until 1826 and then alone. He repaired various organs (St. Ouen, Rouen; St. Germain L'Auxerrois, St. Nicholas des Champs, Paris).

(5) **THOMAS CHARLES AUGUSTE**, son of Charles (1) (b. Amiens, Sept. 4, 1754; d. Jouy-en-Josas, Seine-et-Oise, June 1, 1835), showed a great aptitude for mechanics, and perfected the harp, the organ and the harpsichord. His best title to fame rests on his practical application of the screw to steam navigation.

V. de P.; addns. M. L. P.

DALLIER, **HENRI** (b. Rheims, Mar. 20, 1849), organist and composer.

He was choir organist of the cathedral from 1865. In 1872, without ever having been a pupil of a music school, he competed for the Concours de Rome. He became afterwards, at the Paris Conservatoire, the pupil of François Bazin for composition and of César Franck for the organ; he obtained, 1878, two first prizes for fugue and the organ, followed by an honorary mention at the Concours de Rome. The following year he became the organist-in-chief of the great organ of the church of St. Eustache, which had been reconstructed and enlarged by Mercklin. He took part in the opening of this magnificent instrument, Mar. 21, 1879, in company with César Franck, Théodore Dubois, Alexander Guilmant, Eugène Gigout. Dallier passed 26 happy years as organist of St. Eustache and left it in 1905 to go to La Madeleine in succession to Gabriel Fauré, when the latter became director of the Conservatoire. The old organist of St. Eustache is a virtuoso both of the organ and the piano. As an improviser on the organ he is very interesting; he possesses in a high degree the gift of imagination and a sense of the picturesque. He has written numerous pieces for the organ (published by Alphonse Leduc and H. Lemoigne). Amongst others must be mentioned a 'Messe nuptiale,' '6 Préludes pour la Toussaint,' '5 Offertoires à la Vierge.' Among the last named is one entitled 'O Clemens! O Pia!' which is full of mystic feeling. Dallier is also the author of a great number of piano pieces and songs. Chamber music is represented in his work by a trio in C minor, a string quartet in G minor, and a quintet for piano and strings. Mention must also be made of four pieces for the Concours de Conservatoire for different instruments, and of a symphony in F (op. 50), played at the Colonne Concerts (published by Jobert). Since 1908 Henri Dallier has been professor of harmony at the Conservatoire.

DALMORÈS, CHARLES (b. Nancy, Dec. 31, 1871), operatic tenor. He studied at the Conservatoires of Nancy, Lyons and Paris; also opera under Prof. Emerich at Berlin. During his vocal training he became an excellent horn-player, and was at first refused admission to the Paris Conservatoire on the ground that he was 'too good a musician to waste his time in becoming a mediocre singer.' In 1894 he was appointed horn professor at the Lyons Conservatoire. His voice, however, gradually developed into a powerful organ of fine quality, and his operatic début at Rouen in 1899 was highly successful. After several seasons at the Brussels Monnaie, he made his first appearance at Covent Garden in 1904, creating an excellent impression in 'Faust' and as Jean in Massenet's 'Salomé.' His

later parts here included Julien in 'Louise,' Don José in 'Carmen,' and Pedro in Laparra's 'La Habanera'; but he found scope for an even larger repertory in America, where he made his début at the Manhattan Opera House in 1908 and subsequently joined the Chicago Opera Company. He was a good singer, a capable actor, and a thoroughly reliable artist.

DAMAN (DAMON), WILLIAM (d. circa 1590/91), one of the musicians to Queen Elizabeth. He was born at Liège, and was brought over to England between 1561 and 1564 by Thomas Sackville, Lord Brockhurst, who throughout his life entertained musicians 'the most curious which anywhere he could have.'¹ He harmonised for the use of a friend the psalm tunes then in common use, to the number of 79. His friend, in 1579, published them under the following title:

'The Psalmes of David in English Meter with Notes of foure partes set unto them by Guillelmo Damon, for John Bull, to the use of the golly Christians for recreating themselves in stede of fond and unseemly Ballades. At London, Printed by John Daye. Cum privilegio.'

John Bull is called in the preface 'Citizen and Goldsmith of London.' This work seems to have been but ill received, and Damon set himself to work to reharmonise the tunes. The new work was published in 1591 with the title of:

'The second Booke of the Musicke of M. William Damon, late one of her maiesties Musicians; containing all the tunes of David's Psalmes, as they are ordinarily sung in the Church; most excellently by him composed into 4 partes. In which sett the Tenor singeth the Church tune. Published for the recreation of such as delight in Musick: By W. Swayne Gent. Printed by T. Este, the assigne of W. Byrd, 1591.'

The work is in two parts, the second being entitled:

'The second Booke of the Musicke of M. William Damon, late one of her maiesties Musicians; containing all the Tunes of David's Psalmes, as they are ordinarily sung in the Church; most excellently by him composed into four parts. In which sett the highest part singeth the Church tune. Published for the recreation of such as delight in Musick: By W. Swayne Gent. Printed by T. Este, the assigne of W. Byrd. 1591.'

Daman was certainly dead before Mar. 23, 1593, as is proved by a document in Rymer's *Fœdera*, vol. iii. p. 117 (quoted in *The Musician*, June 30, 1897). In the British Museum there is an arrangement of a motet, 'Spec in alium' (Add. MSS. 31,992/55b), and also another of a 3-part madrigal, 'Ut remi fa sol la' (Add. MSS. 29,246/31), each with a lute accompaniment by him. The following anthem and motets by Damon are also preserved:

'Confitebor tibi Domine.' Ch. Ch. 879-83.

'Miserere nostri Domine' (a b) (printed in Arkwright's 'Old English Edition'). Add. MSS. 29,572-7; Add. MSS. 5054/20b (score).

'O Heavenly God.' Add. MSS. 29,372-7.

'Omnis caro gramen sit.' Ch. Ch. 879-83.

In the Christ Church partbooks there are two

¹ See certain extracts from the Huguenot Society's publications, and notes thereupon by G. E. P. Arkwright, printed in *The Musical Antiquary*, Jan. 1912, July 1912, Jan. 1913.

other motets by a certain W. Demande, who is possibly the same man. There is also an incomplete copy of a 6-part motet, 'Beati omnes' (B.M. Add. MSS. 32,377/40v), which bears this name.

W. H. H.; addns. by G. E. P. A. and J. M*.

DAMASCENE, ALEXANDER (d. July 14, 1719), an alto singer who was a foreigner, of probably Italian extraction but French birth, and who, on July 22, 1682, obtained letters of denization in England (see Pat. Roll, 34 Chas. II. pt. 6, No. 4, where he is described as a French Protestant).

On July 18, 1689, he was sworn Composer of the Private Music to King William III., and on Dec. 6, 1690, as a Gentleman Extraordinary of the Chapel Royal. On the death of Henry Purcell in 1695 he was advanced to a full place. Damascene was a prolific song-writer, and many of his compositions may be found in the following collections:

'Choice Ayres and Songs,' 1676-84; 'The Theatre of Musick,' 1685-87; 'Vinculum societatis,' 1697-01; 'The Banquet of Musick,' 1688-92; 'Comes Amoris,' 1687-94; 'The Gentleman's Journal,' 1692-94.

DAME BLANCHE, LA, opéra-comique in 3 acts, founded on Scott's *Monastery* and *Guy Mannering*; libretto by Scribe, music by Boieldieu; produced Opéra-Comique, Dec. 10, 1825; in English as 'The White Maid,' Covent Garden, Jan. 2, 1827.

DAMEN (DAHMEN, DAMMEN), JOHANN ANDREAS (b. Hague, c. 1760; d. ? London), was one of the last viola da gambists, violoncellist and composer. Eitner states that he appeared as violinist in London in 1792, but this was another member of that numerous family, possibly a son of Johann Andreas, who was 2nd violin to Salomon at Hanover Square Rooms, where he also played a concerto on May 28, 1792. J. A. Damen was very popular in London both as composer and executant. He was violoncellist at Drury Lane in 1794, and toured in Germany, 1796-97. In 1799 he played a trio for gamba and 2 horns of his own composition at the King's Theatre, Haymarket. He composed sonatas for violoncello, duets for various instruments, string trios and quartets which enjoyed a large amount of popularity in England, France and Germany; also 2 books of canzonets and one of sacred songs.

DAMNATION DE FAUST, see FAUST (4).

DAMOREAU, LAURE CINTIE MONTALANT b. Paris, Feb. 6, 1801; d. there, Feb. 25, 1863), opera singer, was admitted into a vocal class at the Conservatoire, Nov. 28, 1808.

Engaged at the Théâtre Italiens in second parts at the age of 18, Mlle. Cinti, as she now called herself, made her first appearance as Cherubino. She played the part with great

charm and grace, but it was not till 1821 that she attempted principal parts. In 1822 she was engaged by Ebers for the London opera, at a salary of £500. She created little sensation, however, and returned to Paris, where she soon began to take a higher place. The arrival of Rossini was a fortunate event for her. She made her début at the Opéra, Feb. 24, 1826, in 'Fernand Cortez,' and her success was complete. Rossini wrote for her the principal female parts in the 'Siège de Corinthe' and 'Moïse,' which contributed to her reputation. In consequence, however, of some misunderstanding with the management, Cinti quitted the theatre abruptly in 1827, and went to Brussels, where she excited the greatest enthusiasm. Concessions having been made, she returned to Paris; but, before leaving Brussels, was married to Damoreau, an unsuccessful actor. She remained at the Opéra till 1835, when she joined the Opéra-Comique (1836-1842). Auber wrote for her such works as the 'Domino noir,' 'L'Ambassadrice' and 'Zanetta.' Cinti retired from the stage in 1843, sang again in London in that year, and made a tour with the violinist Artôt in the United States, also in 1843, then at The Hague, at Ghent in 1845, at St. Petersburg, and at Brussels in 1846. In 1834 she had been appointed professor of singing at the Conservatoire in Paris; this place she resigned in 1856 and retired to Chantilly.

Mme. Cinti published an 'Album de romances' and a few separate pieces. She wrote also a 'Méthode de chant,' dedicated to her pupils. Her son died at an early age, after distinguishing himself by some vocal compositions; and her daughter, a singer, married M. Weckerlin.

J. M.

DAMPER, see MUTE.

DAMROSCH, (1) LEOPOLD (b. Posen, Prussia, Oct. 22, 1832; d. New York, Feb. 15, 1885), composer, conductor and violinist. After a preliminary education at the gymnasium in his native town, he graduated at Berlin University in 1854 with the degree of Doctor of Medicine.

Having shown marked musical taste in early life, he decided then, against his parents' wishes, to abandon medicine and devote himself to the study of music. He became a pupil of Ries, S. W. Dehn and Böhm, and made such progress that he appeared the next year as solo violinist in Magdeburg. After giving concerts in the principal German cities, he was appointed (1857) leading violinist in the court orchestra at Weimar by Liszt, who was then the director. While here Damrosch became intimate with Liszt and many of his most distinguished pupils, and also won Wagner's lifelong friendship. Here, too, he married the singer Helene von Heimburg. In 1850-60 Damrosch was conductor of the

Breslau Philharmonic Society, where his programmes presented, together with the compositions of the older masters, works by Wagner, Liszt and Berlioz—music not then widely admired or appreciated. In 1860 he made concert tours with Von Bülow and Tausig. In 1862 he organised the Orchester-verein of Breslau, with an orchestra of 80 players, of which he remained director till 1871.

In that year Damrosch was called to New York to become conductor of the Männergesangverein Arion, a leading German male chorus. He made his début there, May 6, as conductor, violinist and composer. Damrosch's active personality and strong musical temperament soon made themselves influential in the musical life of New York. There resulted from them, and his marked ability as an organiser, the foundation in 1874 of the Oratorio Society, a mixed chorus devoted to the performance of oratorios and other works. In 1878 a further result of Damrosch's labours was seen in the foundation of the Symphony Society, for the giving of orchestral concerts. (See CONDUCTING, section on CONDUCTING IN AMERICA; and NEW YORK.) Of both of these Damrosch was elected conductor, and occupied that place until his death. In the season of 1876-77 he officiated as conductor of the Philharmonic Society's concerts.

In 1880 Columbia College conferred upon him the degree of Mus.D. In 1881 he conducted the first great musical festival held in New York, with an orchestra of 250 and a chorus of 1200. In 1883 he made a successful tour through the western States with his orchestra. Damrosch's compositions, published partly in Germany, partly in the United States, were numerous but unimportant. A list was published in the second edition of this Dictionary.

Dr. Damrosch was also mainly instrumental in the establishment of German opera at the Metropolitan Opera House in New York. This opera-house had been opened the previous year with Italian opera, under the management of Henry E. Abbey; the outcome was disastrous failure financially. Damrosch presented to the directors a plan for German opera of which he would assume the management. He gathered a company of German singers, and organised his campaign with a sagacity that led to a brilliant success. The season opened on Nov. 17, 1884, and ended on Feb. 11, 1885. Damrosch conducted all the representations but the last. The previous day he had contracted a cold, and five days later, while all the city was rejoicing at his achievement, he died.

His son, (2) FRANK HEINO (b. Breslau, June 22, 1859), conductor and teacher, came with his father to New York in 1871, having already begun the study of composition and the pianoforte.

Frank Damrosch at first went into business in Denver, Colorado, but soon devoted himself to music, becoming conductor of the Denver Chorus Club and supervisor of music in the public schools. After his father's death he was chorus-master at the Metropolitan Opera House in New York till 1891. In 1892 he organised the People's Singing Classes in New York for the instruction of wage-earners in sight-reading and choral singing, from which he developed the People's Choral Union, with a membership of 1200, chiefly wage-earners. F. Damrosch was also instrumental in founding the Musical Art Society in New York, of which he was conductor till its discontinuance in 1920, a small chorus of professional singers devoted to the performance of a *cappella* choral works and the higher class of modern choral music. In 1897 he was made supervisor of music in the New York public schools, and in 1898 succeeded his brother Walter (3) as conductor of the Oratorio Society, founded by their father, continuing in that post till 1912. At various times he conducted choral societies in towns near New York. He resigned most of these posts in 1904 to become director of the Institute of Musical Art in New York, to the development of which he has devoted his time since then. He has written *Some Essentials in the Teaching of Music* (1916) and *A Popular Method of Sight Singing* (1894). In 1904 he received the degree of Mus.D. from Yale University.

Another son of Leopold Damrosch, (3) WALTER JOHANNES (b. Breslau, Jan. 30, 1862), is an eminent conductor. He was devoted to music from his childhood, and studied composition and the piano in Germany and in New York, whither he was brought by his father in 1871. When Dr. Damrosch began his season of German opera at the Metropolitan Opera House in 1884, Walter became assistant conductor, and after his father's death was continued in that post under Anton Seidl. He succeeded his father as conductor of the Oratorio and New York Symphony Societies. He was active in the former till he resigned in 1898, and in the latter, with a brief interval owing to its temporary discontinuance, till the present time. In 1894 he organised the Damrosch Opera Company with German singers, which gave performances in New York and many cities throughout the country for five years. In 1899 he retired from his work as a conductor to devote himself to composition, resuming it again in the following year, when he became conductor of the German operas at the Metropolitan Opera House for two years. In the season of 1902-03 he was conductor of the New York Philharmonic Society. The following year the New York Symphony Society was reorganised and continued under his direction. With this organ-

isation he made a tour of Europe in the summer of 1920. See NEW YORK.

Walter Damrosch received the degree of Mus. D. from Columbia University, in 1914. During the war he organised a bandmasters' training school in France for the American Expeditionary Force; and after was largely concerned in founding the music school for Americans at Fontainebleau. He published a volume of his reminiscences in 1924. The following is a list of his principal compositions:

OPERAS

- 'The Scarlet Letter,' based on Hawthorne's romance, text by George Parsons Lathrop, (Boston, Feb. 11, 1906.)
- 'Cyrano de Bergerac,' after Rostand's play, text by W. J. Henderson. (Metropolitan Opera House, New York, Feb. 27, 1913.)
- 'The Dove of Peace,' comic opera libretto, by Wallace Irwin. (Philadelphia and New York, 1912.)

OTHER WORKS

Incidental music to 'Iphigenia in Aulis,' 'Medea' and 'Electra,' 'Manila' 'Te Deum.' 1898.
Violin Sonata, Songs, etc.

H. E. K.; REV. R. A.

DANBY, JOHN *b.* 1757; *d.* May 16, 1798, a glee composer, who between 1781 and 1794 obtained ten prizes from the Catch Club for eight glees and two canons. He published three books of his compositions, and a fourth was issued after his death. In 1787 he published an elementary work entitled *La guida alla musica vocale*. He held the appointment of organist at the chapel of the Spanish Embassy, near Manchester Square, for the service of which he composed some masses and motets. He died during the performance of a concert which his friends had got up for his benefit, he having long lost the use of his limbs by sleeping in a damp bed at an inn. He was buried in Old St. Pancras Churchyard.

W. H. H.

DANCE, see BALLETT-DANCING; also COUNTRY DANCE, MORRIS DANCE and ENGLISH FOLK DANCE SOCIETY. The music of special kinds of dance is described in innumerable articles under the names of these dances.

DANCE, WILLIAM *b.* London, 1755; *d.* June 5, 1840, an English musician whose name deserves preservation as one of the founders of the Philharmonic Society. He was a violinist at Drury Lane, 1771-74, in the orchestra of the Opera from 1775-93, and led the band at the Handel Commemoration of 1790 in the absence of Cramer. The circular proposing the meeting which led to the formation of the Philharmonic was issued by 'Messrs. Cramer, Corri & Dance,' from Dance's house, 17 Manchester Street, on Sunday, Jan. 17, 1813. He was afterwards one of the directors, and treasurer. His son, Henry, was secretary to the Society for the first year, 1813.

DANCE RHYTHM and dance gestures have exerted the most powerful influence on music from prehistoric times till the present day. The analogy of a similar state of things among uncivilised races still existing confirms the inherent probability of the view that definiteness

of any kind in music, whether of figure or phrase, was first arrived at through connexion with dancing. The beating of some kind of noisy instrument as an accompaniment to gestures in the excitement of actual war or victory, or other such exciting cause, was the first type of rhythmic music, and the telling of national and tribal stories and deeds of heroes, in the indefinite chant consisting of a monotone slightly varied with occasional cadences, which is met with among so many barbarous peoples, was the first type of vocal music. This vague approach to musical recitation must have received its first rhythmic arrangement when it came to be accompanied by rhythmic gestures, and the two processes were thereby combined, while song and dance went on together, as in mediæval times in Europe.

The process in the development of modern music has been similar. The connexion between popular songs and dancing led to a state of definiteness in the rhythm and periods of secular music, and in course of time the tunes so produced were not only actually used by the serious composers of choral music, as the inner thread of their works, but they also exerted a modifying influence upon their style and led them by degrees to change the unrhythmic vagueness of the early state of things to a regular definite rhythmic system. The fact that serious music was more carefully recorded than secular makes the state of the art in the time of Dunstable, Tinctor, De Muris and the Francos to appear more theoretical than effective. Serious musicians were for the most part very shy of the element of dance rhythm, as if it were not good enough company for their artistic purposes. Consequently the progress of serious art till the 16th century was confined to the development of good part-writing and good progressions of harmony. The result is a finely continuous mass of tone and expressive effects of harmony in the works of these old masters up to the early years of the 16th century, but a conspicuous absence of definiteness in both the rhythms and phrases; as may be observed in the chansons mondaines of Okeghem, Josquin des Prés and Obrecht, as well as in their sacred music. But while these composers were proceeding on their dignified way, others whose names are lost to fame were busy with dance tunes which were both sung and played, and may be studied in the *Orchésographie* of Thoinot Arbeau, and Stafford Smith's *Musica antiqua*, the *Berliner Liederbuch*, the *Walther'sches Liederbuch* and elsewhere. And quite suddenly, within the space of less than a generation, the rhythmic impulse of this choral dance music passed into serious music and transformed the vague old-fashioned chanson mondaine into a lively rhythmic tune; and at the same time gave the development of the art in the direction of modern harmony a lift such as it never could

have got by continuing in its old path. In fact the first change of the *chanson mondaine* into the typical madrigal seems to have been greatly helped by the progress in artistic merit of the forms of the dance tunes, such as were sung in parts by voices, and by the closely allied frottole and villanelle (see MADRIGAL). As early as Arcadelt and Festa rhythmic definition of a dance kind is found in works which are universally recognised as madrigals; and as it is possible that composers did not keep steadily in view the particular class to which after ages would refer their works, they wrote things which they intended to be madrigals, but which were in reality pervaded by a dance impulse almost from beginning to end, inasmuch as the harmonies move often together and form rhythmic groups. But, on the other hand, the most serious masters of the great period of madrigal art evidently resisted the influence of regular dance rhythms, and in the richest and maturest specimens of Marenzio, Palestrina, Vecchi and our greatest English masters it would be difficult to point to the distinct rhythmic grouping which implies a connexion with dance motions. But nevertheless, even these great masters owed something to dance influence. For it was the independence from artistic responsibility of the early dance writers which enabled them to find out the elementary principles of chord management, by modifying the conventional modes as their instincts led them; while their more serious and cautious brethren were being incessantly thwarted in their efforts by their respect for the traditions of these modes. And hence dance music reacted upon serious music in a secondary as well as direct manner, since its composers led the way in finding out the method of balancing and grouping chords in the manner which in later music is familiar in the inevitable treatment of tonic and dominant harmonies, and in the simpler branches of modulation of the modern kind. This secondary influence the great madrigal writers were not directly conscious of, however much they profited by it; and the growth and popularity of the independent forms of frottola, villanella, balletto and so forth helped to keep their art form free from the more obvious features of dance music. When the madrigal art came to an end, it was not through its submitting openly to the seductive simplicity of dance rhythm, but by passing into part-songs with a definite tune, such as were early typified in the best days by Dowland's lovely and finished works; or into the English glee; or through its being corrupted by the introduction of an alien dramatic element, as by Monteverdi.

All such music, however, was deposed from the position it had occupied until the year 1600 by the growth of new influences. Opera, oratorio and many other kinds of accompanied

song, and, above all, instrumental music, began to occupy most of the attention of composers.

In the first beginnings of opera and oratorio the importance of dance rhythm is shown by negative as well as positive evidence. In the parts in which composers aimed at pure declamatory music, the result, though often expressive, is hopelessly and inextricably indefinite in form. But in most cases they submitted either openly or covertly to dance rhythm in some part or other of their works. In Cavaliere's one oratorio the connexion of the chorus 'Fate festa al Signore' with the LAUDI SPIRITUALI (*q.v.*) is as obvious as the connexion of the said Laudi with popular dance songs. For in the Italian movement, fostered by Neri, as in the German movement in favour of the chorale, to which Luther gave the impetus, the dance principle was only two generations off. Both chorales and laudi spirituali and the similar rhythmic attempts of the early French Protestants, were either adaptations of popular songs or avowedly modelled on them; and, as has been already pointed out, the popular songs attained their definite contour through connexion with the dance. But, besides this implication, in Cavaliere's work distinct instructions are given for dancing, and the same is the case with Peri's opera 'Euridice,' which came out in the same year (1600). As a matter of fact, Peri seems to have been less susceptible to the fascination of clear dance rhythm than his fellow composers, but the instructions he gives are clear and positive. The last chorus is headed 'Ballo a 3,' 'Tutto il coro insieme cantano e ballano.' Similarly Gagliano's 'Dafne' (printed at Florence in 1608) ends with a 'ballo.' Monteverdi's 'Orfeo' (1609) contains a chorus headed 'Questo balletto fu cantato al suono di cinque viole,' etc., and the whole ends with a 'Moresca' which is preceded by a chorus that is to the utmost degree rhythmic in a dance sense.

To refer to the works of Lully for examples of the influence is almost superfluous, as they are so full of dances and gesticulation that the sum total of his operas is more terpsichorean than dramatic, and this does not only apply to the actual dances so called, but also to vocal pieces. Handel, Rameau and Gluck used their dance effects with more discretion and refinement, and in the later development of opera the traces of dance and its rhythm fade away in the dramatic portions of the work; though it cannot be said that the influence has ceased even in modern times.

In oratorio the dance influence maintained its place, though of course not so prominently as in opera. Next after Cavaliere, Carissimi submitted to its influence. He was, in fact, one of the first Italians who frequently showed the power of a definite rhythmic figure, derived from the dance, in giving incisiveness to both

choruses and solos. As instances may be quoted the song of Jephthah's daughter when she comes out to meet him — 'Cum tympanis et choris' — after his victory, and the solo and chorus describing the king's feast at the beginning of 'Balthazar' — 'Inter epulas canori, exultantes sonent chori.' In Handel's oratorios the introduction of artistic dance music was common, and the influence of it is to be traced elsewhere as well. But in modern times the traditional connexion of dance and religion has ceased, except in the dances on Corpus Christi day and some other festivals in the cathedral of Seville, and oratorios no longer afford examples of minuets and jigs. But the influence is still apparent. In the first Baal Chorus in 'Elijah' Mendelssohn allowed a rhythm of a solemn dance order to appear, and the same quality is to be discerned in the Pagan Chorus in 'St. Paul,' 'O be gracious, ye immortals'; while he permitted himself to drift into a dancing mood, with less obvious reason, in the middle movement of the symphony to the 'Lobgesang,' and in the chorus 'How lovely are the messengers' in 'St. Paul.'

The obligations of instrumental music to dance rhythm are far greater than that of any respectable form of choral music. Almost all modern instrumental music till the present time may be divided into that in which the *cantabile* or singing element predominates and that in which the rhythmic dance principle is paramount. In fact dance rhythm may be securely asserted to have been the immediate origin of all instrumental music. The earliest definite instrumental pieces to be found are naturally short dances. A step in the direction of artistic effect was made when two or more dances, such as a pavan and a galliard, were played one after another for the sake of the contrast and balance which was thereby obtained. The result of such experiments was the suite form, and in the article on that subject the question of the direct connexion of the form of art with the dance is discussed at length.

When the more mature form of the sonata began to develop, other forms of art were maturing also, and had been imitated in instrumental music. Madrigals having been 'apt for voices or viols,' were imitated for instruments alone. Movements for solo voices with accompaniment were also being imitated in the shape of movements for instruments, and were rapidly developing into a distinct art form; and again the movement, consisting of a succession of chords interspersed with *floriture*, such as singers used, had been developed by organists such as Claudio Merulo, partly by instinct and partly by imitation. Most of these forms were combined with dance forms in the early stages of the SONATA; and in the articles on that subject, and on FORM and SYMPHONY, the question is discussed in detail. Here it is not

necessary to discuss more than the general aspect of the matter. Composers early came to the point of trying to balance movements of a singing order with dance movements. In the early violin sonatas, such as those of Biber and Corelli, dance principles predominated, as was natural, since the type of the movements which were sung was not as yet sufficiently developed. But the special fitness of the violin for singing speedily complicated this order of things, and the later representatives of the great Italian violin school modified the types of dance forms with *cantabile* and highly expressive passages.

The clavier sonata, on the other hand, inclined for a time towards a rhythmic style. The harpsichord was not fitted for *cantabile*, and the best composers for the instrument fell back upon a clear rhythmic principle as their surest means of effect. When the harpsichord was displaced by the pianoforte, a change naturally followed. The first movement came to occupy a midway position, sometimes tending towards dance rhythms and sometimes to *cantabile*, and sometimes combining the two. The central slow movement was developed on the principle of the slow operatic aria, and adopted its form and style. The last movement continued for a long time to be a dance movement, often actually a gigue or a movement based on similarly definite rhythms; and when there were four movements the third was always decisively a dance movement. In the old style of operatic overture, also known as a symphony, there was at least one distinct dance movement. This kind of work developed into the modern orchestral symphony, in which at least one decided dance movement has maintained its position till the present day, first as the familiar minuet and trio, and then in the scherzo, which is its offspring, and always implies a dance rhythm. But the fitness of a dance movement to end with is palpable, and composers have constantly recognised the fact. Haydn has given a strong example in the last movement of the fine symphony in D minor, No. 7 of the Salomon set; and many others of his rondos are absolute dance movements. Among Mozart's the last movement of the E♭ symphony (K. 543) may be pointed to; among Beethoven's the wild frenzy of the last movement of the symphony in A minor, No. 7. In modern times the influence of dance music upon the musical character of composers has become very marked. The dance which has had the greatest influence of all is undoubtedly the waltz, and its ancestor the Ländler. Beethoven, Weber, Schubert, Schumann and Brahms have not only written dance movements of this kind, but show its influence in movements which are not acknowledged as dance movements. Even Wagner has written one dance of this kind in 'Die Meistersinger.'

Many modern composers have introduced *bona fide* national dance tunes into their instrumental works, as Beethoven did with Russian tunes in the Rasoumowsky quartets. Some go farther, as may be seen by the example of Schubert, Brahms and Dvořák and others of note. For they accept, as invaluable accessories to their art, rhythmic and characteristic traits drawn from the dances of Hungarians, Scandinavians, Bohemians, Slavs and Celts of various nationalities; and subjects which appear in movements of sonatas and symphonies by famous composers are sometimes little more than figures taken from national dance tunes slightly disguised to adapt them to the style of the composer.

The connexion of music with gesture is a question too special and intricate to be entered on in detail. But it may be pointed out that a considerable quantity of the expressive material of music is manifestly representative of, or corresponding to, expressive gestures. The branch of dancing which consisted of such expressive gestures was one of the greatest importance, but it has almost entirely ceased to hold place among modern civilised nations. In music the traces of it are still to be met with, both in the finest examples of sarabandes and also, more subtly, in some of the most expressive passages of the greatest masters. C. H. H. P.

DANKERTS, SEE DANKERTS.

DANCLA, JEAN CHARLES (b. Bagnères-de-Bigorre, Dec. 19, 1817; d. Tunis, Nov. 8, 1907), violinist, teacher and composer, was the last representative of the old French school of violin-playing.

He received instruction from Baillot at the Paris Conservatoire (1828), and ultimately became himself a professor at that institution (1857). He was successful as a soloist in the Société des Concerts and elsewhere, and his Quartet Soirées, in which he was assisted by his younger brothers, JEAN PIERRE LEOPOLD (1822-95), violinist, and ARNAUD-PHILIPPE (1819-62), violoncellist, enjoyed considerable vogue. As a composer he was equally successful, gaining many prizes, among them the Prix Chartier, shared with Madame Farrenc, and given for the composition of a piece of chamber music which should be the 'nearest approach to classic masterpieces.' Yet it cannot be said that the more ambitious among the 150 works (*circa*) which he published are of enduring value. His gift was rather that of writing bright and graceful music and of writing it well for his instrument, his minor compositions for violin being very popular. His Études were of considerable value to teachers, especially those bearing the title 'Accentuation et ponctuation de l'archet.' W. W. C.

He was the author of the following literary works: *Les Compositeurs chefs d'orchestre* (1873); *Miscellanées musicales* (1876); *Notes*

et souvenirs (1893, 1898, with catalogue of his works). M. L. P.

DANDO, JOSEPH HAYDON BOURNE (b. Somers Town, May 11, 1806; d. Godalming, May 9, 1894), violinist. At an early age he studied the violin under his uncle, Gaetano Brandi.

In 1819 he became a pupil of Mori, with whom he continued about seven years. In 1831 he was admitted a member of the Philharmonic orchestra. For many years he filled the post of leader of the bands of the Classical Harmonists' and Choral Harmonists' Societies (both long extinct), whose concerts were given in the City. Dando was the first to introduce public performances of instrumental quartets. It is true that in the earlier days of the Philharmonic Society a quartet occasionally formed part of the programme, but no concerts consisting exclusively of quartets had before been given in London. The occasion on which the experiment was first tried was a benefit concert got up by Dando at the Horns Tavern, Doctors' Commons, Sept. 23, 1835. The programme was entirely composed of quartets, trios, etc. Dando then formed a party consisting of Henry Blagrove, Henry Gattie, Charles Lucas and himself, to give regular series of quartet concerts, and they began their enterprise on Mar. 17, 1836, at the Hanover Square Rooms. They continued their performances annually until 1842, when Blagrove seceded from the party, upon which Dando assumed the first violin, the viola being placed in the hands of John Loder. Thus constituted they removed to Crosby Hall, where they continued until the deaths of Gattie and Loder in 1853 broke up the party. Dando occupied a prominent position in all the best orchestras until 1875. He held the post of music-master to the Charterhouse School from 1875 until within a short time of his death. He was buried in Highgate Cemetery. W. H. H.

DANDRIEU, JEAN-FRANÇOIS (b. Paris, c. 1684; d. there, Jan. 16, 1740), priest and organist at St. Merry and at St. Barthélemy; in 1724 a member of the French Chapel Royal. He was a famous clavecinist and apparently a violinist also. He composed 3 books of harpsichord pieces, 1 book of organ pieces, 1 book of violin sonatas, 1 of trios for 2 violins and bass; 1 book of Noël's (2 editions); 'Les caractères de la guerre, ou suite de symphonies,' etc.; also a book of instructions for the harpsichord accompaniment (*Principes de l'accompagnement du clavecin*), which appeared in 3 editions. Many of his harpsichord pieces have appeared in modern editions.

DANIEL, HERMANN ADALBERT (b. Cöthen, near Dessau, 1812), a theologian, professor in the University of Halle. His *Thesaurus Hymnologicus* (5 vols., Löschke, Leipzig) is a valuable work on the history of early church music and collection of hymns. M. C. C.

DANIEL, JEAN (called Maître Mitou, Milton, Mihtou). In 1618 he was organist at Notre-Dame, Nantes; in 1520-30 vicar and organist at St. Maurice, Angers (which is also mentioned as his birthplace). He was famous for his Noëls, of which he wrote both words and music. They are still sung by the people of Brittany. One of the two books of Noëls which he wrote was republished in 1874. He also wrote a book of sacred songs, and some sacred songs in 4 parts are contained in French collective volumes. E. V. D. S.

DANIEL (DANYEL), JOHN (c. 1565-1630), lutenist and song-writer. He was brother of Samuel Daniel the poet, and son of John Daniel, a music-master who, according to Fuller, lived near Taunton and was 'a man of harmonious mind.' Samuel (b. 1562) was apparently the elder of the two brothers. John succeeded Samuel as inspector of the children of the Queen's revels, and in Dec. 1625 he was a member of the royal company of musicians for the lutes. He was sole executor of the poet's will (P.C.C., 12, Soame) in 1619, and brought out an edition of his poetical works in 1623, dedicating them to Prince Charles. John took the B.Mus. degree at Christ Church, Oxford, on July 14, 1604. In 1606 he published a set of 20 songs under the title of 'Songs for the Lute Viol and Voice: Composed by I. Danyel, Batchelar in Musicke.' They were dedicated 'to M^{rs} Anne Grene...daughter of S^r William Grene of Milton, Knight.' The first 18 are for solo voice with accompaniment of lute and bass viol; the next 2 are for 4 voices and treble and bass lutes, and the final number is a lute-piece entitled 'Mrs Anne Grene her leaves bee greene.' Some of the songs are of greater length than was usual at the period; and in some instances two or three consecutive numbers form a single composition, as in the case of Dowland's 'Time's eldest son.' 'Can doleful notes,' Nos. 13 and 14 of the set, is treated with chromatic harmonies of an interesting character, but by this date several composers were treading the new paths which had first been explored some years earlier by Weelkes, Dowland and Farnaby. (See ENGLISH SCHOOL OF LUTENIST SONG-WRITERS.) E. H. F.

DANKERTS (DANKERTS), GHISELIN, a native of Tholen in Zeeland, and a singer in the Papal Chapel from 1538-65, when he was pensioned.

An 8-part motet of his composition, 'Laetamini in Domino,' is included in Uhlard's 'Concentus octo . . . vocum' (Augsburg, 1545), and a 6-part motet, 'Tua est potentia,' in the

'Selectissimæ cantiones ultra centum' (Augsburg, 1540). Also two books of madrigals for 4, 5 and 6 voices are said to have been published by Gardano (Venice, 1559), and two madrigals, 'Fedel quel sempre fui' and 'Scarpella si vedra,' are contained in the collection first published in 1555 by Barrè of Rome (see Vogel, *Bibl. der ged. weltl. Vocalmusik Italiens*). Dankerts was one of those who adhered strictly to the old Netherland school, and remained uninfluenced by the new art that had grown up around them. He gained great celebrity as judge in the dispute between two ecclesiastical musicians, Vicentino and Lusitano, upon the nature of the scales on which the music of their time was constructed. Dankerts was obliged to defend his verdict against Vicentino, in a learned and exhaustive treatise on the matter in dispute, the original MS. of which is preserved in the Vallicellan library at Rome. A full account of this controversy is given by Hawkins. J. R. S. B.

DANNELEY, JOHN FELTHAM (b. Oakingham, Berkshire, 1786; d. London, 1836), was the second son of a lay-clerk of St. George's Chapel, Windsor. He studied under Samuel Webbe, Charles Knyvett, Woelf and Charles Neate.

He established himself at Ipswich as a teacher of music, and became organist of the church of St. Mary of the Tower in that town. In 1816 he visited Paris, and studied under Antoine Reicha. Danneley published in 1820, *Elementary Principles of Thorough-bass*, etc.; in 1825, *An Encyclopædia or Dictionary of Music*; and in 1826, *A Musical Grammar*. W. H. H.

DANNREUTHER, EDWARD GEORGE (b. Strassburg, Nov. 4, 1844; d. Hastings, Feb. 12, 1905). When 5 years old he was taken to Cincinnati, U.S.A., where he learned music from F. L. Ritter. In 1859 he entered the Conservatorium at Leipzig and remained there till 1863, under Moscheles, Hauptmann and Richter.

From Leipzig he removed to London, and became one of the most prominent musicians of the metropolis, well known as a pianoforte player and teacher, littérateur and lecturer, and a strong supporter of progress in music. He was especially known as the friend and champion of Wagner. Perhaps his greatest service to English music was the personal friendship and encouragement, as well as the actual teaching, which he gave to PARRY (q.v.). His first public appearance in England was at the Crystal Palace, Apr. 11, 1863, when he played Chopin's F minor concerto (for the first time in its entirety in England). He founded the Wagner Society in 1872, and conducted its two series of concerts in 1873 and 1874. He was also a warm promoter of the Wagner Festival in 1877, translated his *Music of the Future* (Schott, 1872) and others of the prose works,

such as *On Conducting*, *Beethoven*, etc., and received Wagner in his house during his stay in London. An interesting set of papers on Wagner and the Reform of the Opera in the *Monthly Musical Record* of 1872 was republished in 1904. He was the first to play the concertos of Grieg in A minor, Liszt in A and Tchaikovsky in B flat minor (Crystal Palace, 1874 and 1876). He was appointed professor of the pianoforte in the R.C.M. in 1895.

But while Dannreuther was an earnest apostle of the new school, he was no less zealous for the old, as is proved by the range of the programmes of his well-known chamber concerts, given at his house in Orme Square, Bayswater, from 1874-93, his own able interpretations of Bach and Beethoven, his lectures on Bach, Mozart, Beethoven, Chopin, Schumann and Wagner at the Royal Institution, and his article on Beethoven in *Macmillan's Magazine* (July 1876). His treatise on *Musical Ornamentation* (one of Novello's primers) is the standard work on the subject. He was a valued contributor to the earlier editions of this Dictionary, and the author of vol. vi. of the *Oxford History of Music* (The Romantic Period) published posthumously. Dannreuther's published compositions consist of two sets of songs and one of duets.

DANYEL, see DANIEL.

DANZI, FRANZ (b. Mannheim, May 15, 1763; d. Carlsruhe, Apr. 13, 1826), composer and violoncellist, studied chiefly under his father, first violoncellist to the Elector Palatine, and in composition under the Abbé Vogler.

At 15 he was admitted into the Elector's band. In 1778 the band was transferred to Munich, and there Danzi produced his first opera, 'Die Mitternachtsstunde,' which was followed by 'Der Kuss,' 'Ileopatra,' 'Iphigenia' and others. In 1790 he married Marguerite MARCHAND (d. Munich, 1799), a distinguished singer, and in the following year started with her on a professional tour which lasted six years. At Prague and Leipzig he conducted the performances by Guardassoni's Italian company, and his wife was especially successful in the parts of Susanna in 'Le Nozze di Figaro,' and Caroline and Nina in 'Il matrimonio segreto.' They were also favourably received in Italy, especially at Venice and Florence. In 1797 they returned to Munich, where Mme. Danzi died. Her husband soon after resigned his post of vice-Kapellmeister to the Elector, to which he was appointed in 1798. In 1807 he was appointed Kapellmeister to the King of Württemberg; then Kapellmeister at Carlsruhe, where he remained till his death. He composed eleven operas, besides a

mass of orchestral, chamber and church music. (See Q.-L.) His 'Singing Exercises' were used for long after his death and form his most permanent work. His daughter was Mme. LEBRUN (q.v.).

M. C. C.

DAQUIN (D'AQUIN), (1) LOUIS CLAUDE (b. Paris, July 4, 1694; d. there, June 15, 1772), organist. He was a godson of the composer and harpsichord-player Elisabeth Claude Jacquet de la Guerre, whose husband, the organist Marin de la Guerre, probably gave him lessons. He played before Louis XIV. when only 6, and was a prodigy. He studied composition with N. Bernier and organ with Louis Marchand, of whom he remained all his life a great admirer. He began his career at 12 years, in replacing his godmother's husband at the Sainte-Chapelle and becoming organist at the chapel of the Petit Saint-Antoine (1706). He competed successfully for the position of organist at Saint-Paul with Rameau (1727), who was rejected; he succeeded Marchand at the organ of the convent of the Cordeliers at the latter's death (1732), and became organist of the Chapel Royal on Dandrieu's death (Apr. 13, 1739). He held these two last posts until his death. His first book of harpsichord pieces, which contain the famous 'Coucou,' was published in 1735 (reprint in 'Le Trésor des pianistes,' vol. ix.); his 'Nouveau Livre de noëls pour l'orgue et le clavecin dont la plupart peuvent s'exécuter sur les violons, flûtes, hautbois,' etc., is reprinted in Guilman's *ARCHIVES DES MAÎTRES DE L'ORGUE* (q.v.), vol. 3 (biography by A. Pirro). He also left a printed cantata, 'La Rose,' and a large number of MSS., motets, organ pieces, fugues, trios, etc. It may be gathered from a contemporary opinion that Daquin's playing was remarkable for its unflinching precision and evenness.

His only son, (2) PHILIPPE-LOUIS (1720-97), wrote: *Lettres sur les hommes célèbres dans les sciences, la littérature et l'art sous le règne de Louis XV* (1752), *Siècle littéraire de Louis XV, ou lettres sur les hommes célèbres* (1753).

DARGOMIJSKY, ALEXANDER SERGEVICH (b. Toula, Feb. 14, 1813; d. St. Petersburg, Jan. 17, 1869), composer of considerable importance in the history of the Russian opera, was born on a country property in the government of Toula, whither his parents had fled from their own home, near Smolensk, during the French invasion of 1812. It is a

remarkable fact that this future master of declamation only began to articulate at 5 years of age.

Dargomijsky was educated in St. Petersburg. At 6 he received his first instruction on the piano, and two years later began the violin. At 11 he had already made some attempts at composition. His education completed, he entered, in 1831, the Control Department, but retired altogether from the Government service four years later. Dargomijsky was of good family, and mixed in fashionable society, where he became well known as an amateur pianist and as the composer of pleasing drawing-room songs. In 1833 a chance meeting with Glinka gave a more serious impulse to his musical talents. Dargomijsky was nine years younger than the composer of 'A Life for the Tsar,' yet for a time these two stood side by side, isolated figures on the horizon of the Russian musical world. Taken together they make up the sum total of the national character. Glinka had the versatility and spontaneity we are accustomed to associate with the Slav temperament; Dargomijsky had not less imagination, but was more reflective. Glinka's music is idealistic and lyrical; Dargomijsky's realistic and dramatic. Glinka was not devoid of wit; but Dargomijsky's humour is full-flavoured and racy of the soil. Glinka lent Dargomijsky the famous note-books containing the exercises in harmony which he had worked out with Professor Dehn in Berlin. This was all the theoretical training Dargomijsky ever received, but it so far strengthened his technical knowledge that he set to work on an opera, 'Esmeralda,' the French libretto of which was taken from Victor Hugo's *Notre-Dame de Paris*. Completed and translated into Russian in 1839, this work was not accepted by the directors of the Imperial Opera until 1847. Although these eight years of suspense undoubtedly discouraged Dargomijsky and retarded his development, he still had courage to devote himself entirely to music. 'Esmeralda' is light opera in the style of Auber or Halévy, but in the dramatic scenes there is already some evidence of that 'language of truth and force' which he afterwards developed in his *magnum opus* 'The Stone Guest.' A cantata on Pushkin's dramatic poem 'The Triumph of Bacchus,' began in 1842 and transformed into a ballet-opera in 1848, was never given in its entirety. Dargomijsky's letters, highly interesting and full of thought, written during a short visit to Paris in 1844-45, show that his views of music were greatly in advance of his time, and free from the influence of popular decree. 'The Roussalka' (The Water-sprite), libretto from Pushkin's dramatic national legend, was a far stronger work than 'Esmeralda.' It was first performed at the Maryinsky Theatre, St. Petersburg, in 1856, but proved too novel in form and treatment to

please a public infatuated with Italian opera. Besides adding the element of humour to national opera, Dargomijsky made a special feature in 'The Roussalka' of melodic recitative, in which he altogether surpassed Glinka as regards emotional expression.

The comparative failure of 'The Roussalka' discouraged the composer from undertaking any new operatic work between 1856 and 1860; but this period was devoted chiefly to song-writing, a form of art in which he excelled all his Russian predecessors. His songs are extraordinarily varied in style and contents. He has left a long series of graceful and elegiac songs, and some inimitably humorous ones, in which he satirises the follies and vanities of the *tschinovnik*, or Russian official. In his Oriental songs he is not content with mere local colour and tricks of style, but breathes the very spirit and passion of the East ('An Eastern Song,' 'I think that thou wert born for this' and 'O Maid my Rose'). Wonderful laconic force and stirring emotion characterise his great dramatic ballads ('Knight-Errant' and 'The Old Corporal'), and it is not too much to compare them with the ballads of Schubert and Schumann. In 1864 Dargomijsky went abroad, taking with him the scores of 'The Roussalka' and of three highly original orchestral fantasias: the Little-Russian 'Kazachok,' a 'Russian Legend' and the 'Dance of Mimmers.' In France and Germany he was unable to obtain a hearing; but in Belgium, then—as later—hospitably disposed towards the Russian school, his music was enthusiastically received. During this journey the composer spent a few days in London, and was favourably impressed by the capital.

On his return to Russia, Dargomijsky became closely associated with Balakirev and his disciples, and took a leading part in the formation of a national and progressive school. Under the more liberal regime of Alexander II., the period between 1860 and 1870 was characterised by new ideals, new standards and freer modes of expression, alike in literature and in art. In Russia, at least, the desire for artistic reform was the logical accompaniment of a similar impulse in the political and social world. The programme of the new school, which was its formal protest against an exaggerated respect for tradition, is set forth in detail in Cui's pamphlet 'La Musique en Russie.' A similar dissatisfaction with the accepted forms of opera was also being expressed by Wagner. But the Wagnerian programme was in many respects contrary to the Russian taste and temperament. The new school did not hold with the primary importance which the German master gave to the orchestra. For them, too, there existed a special means of salvation from all that had become jejune and staled by convention:

Glinka, out of the primitive elements of the folk-music, had created a new and polished musical idiom which every Russian could understand. Each member of the new school endeavoured to work out the principle of reformation for himself, guided, however, by the dominant idea that the human voice should remain the interpreter of the composer's intention, while the orchestra should be regarded as a means of supplementing and enhancing the vocal music.

Guided by these principles, Dargomijsky created his last opera 'The Stone Guest' (Don Juan), sometimes called 'The Gospel of the New School.' This work represents the final stage of his development, when he had come to use with great power and facility the realistic language of 'The Roussalka' and of his finest songs. But in following out his own dictum that 'the sound must express, or echo, the word,' he evolved a new operatic form which necessitated the abandonment of the traditional divisions. Lenz described this opera as 'a recitative in three acts.' It would be truer to say that the characters repress themselves in that 'melos' or 'mezzo-recitative' which is neither song nor speech, but the connecting link between the two. Dargomijsky's respect for 'the word,' and his passion for realistic expression, had led him, by completely independent methods, to a reformation as radical as that of Wagner himself. The story of Don Juan, as told by Poushkin, agrees only in its broad outline with Mozart's libretto; but it gains in dramatic force in the hands of a great poet. Dargomijsky has set the text precisely as it originally stood, and although this tends to a lack of scenic variety, there is a compensating intensity of emotional interest, while the psychological delineation is subtle and profound. Dargomijsky on his deathbed entrusted the instrumentation of his opera to Rimsky-Korsakov, who carried it out in strict accordance with his directions.

The composer had fixed 3000 roubles (about £330) as the price of his work, but an obsolete law made it illegal for a native composer to receive more than £160 for an opera. At the suggestion of Vladimir Stassov, the sum was raised by public subscription, and 'The Stone Guest' was performed in 1872. It did not appeal to a public accustomed only to Italian *cantilena*. The ideals which it embodied have exercised considerable influence upon the subsequent development of national opera, but time has not assured the popularity of 'The Stone Guest.' In spite of its sobriquet, this 'Gospel' has never been accepted in its entirety. Borodin and Moussorgsky revered it, but neither conformed strictly to its principles; while Cui, Rimsky-Korsakov, Glazounov and Liadov have gradually drawn

away from this work which once seemed destined to be the rallying-point of the entire Russian school. Yet the faithful adherents of 'The Stone Guest' still believe that the 20th century may witness its vindication and triumph.

The following is a list of Dargomijsky's chief works, to which no opus numbers are attached:

OPERATIC WORKS

- 'Emeralda,' libretto from Victor Hugo's *Notre-Dame de Paris*.
- 'The Triumph of Bacchus,' Text by Poushkin. An opera-ballet in one act and two tableaux.
- 'The Roussalka,' libretto from a dramatic ballad by Poushkin.
- 'Rogulana,' an unfinished fairy opera.
- Duet for Orlík and Kuchubey from the unfinished opera 'Mazeppa.'
- 'Kamennoi Gost' ('The Stone Guest'), in three acts. Libretto by Poushkin.

VOCAL WORKS, SONGS, ETC.

- Fifteen Duets.
- Three Trios.
- Two Quartets.
- Twelve Trios or Choruses (The 'Peterburg Serenades').
- About ninety Songs for voice and pianoforte accompaniment.

FOR PIANOFORTE

- 'Tarantelle Slave,' for four hands.

ORCHESTRAL WORKS

- The Little-Russian 'Kazachok.'
- 'Baba Yaga,' an orchestral fantasia.
- 'The Dance of Mummies.'

BIBL.—OSKAR VON RIESEMANN, *Monographie zur russischen Musik*, 1923; ROSA NEWMARCH, *The Russian Opera*.

R. N.

DARKE, HAROLD EDWIN, Mus.D. (b. High-bury, London, Oct. 29, 1888), organist, composer and conductor, was educated at the R.C.M., where he held a scholarship for organ under Parratt and composition under Stanford, and won the Tagore Gold Medal.

He became organist of Emmanuel Church, W. Hampstead (1906), and subsequently of St. James's, Paddington, while he was assistant to Walford Davies at the Temple Church. He was also piano accompanist to the Bach Choir. In 1916 he became organist of St. Michael's Church, Cornhill, which he made a centre of musical activity, both by his midday organ recitals and by the periodic choral festivals given by the St. Michael's Singers (a mixed choir of some 80 voices). Darke is regarded as one of the finest of the younger English organists. His recitals at St. Michael's have included the whole series of Bach's organ works and a very large repertory of other works in which English masters from the Elizabethans to the present day have been prominent.

The choral festivals have included a wide range of music from the less-known cantatas of Bach to the works of Parry, Vaughan Williams and other modern composers. In the autumn of 1924 a four days' festival was concluded with Bach's Mass in B minor, given in the church of St. Martin-in-the-Fields in order that a larger congregation might be accommodated. The City of London Choral Union (200 voices) was founded under his direction for the purpose of giving choral music by city workers on a larger scale and in secular surroundings. Its first concert was given at the Bishopsgate Institute in Apr. 1925. Darke is a Fellow, member of the council of, and examiner to the Royal College of Organists, and a member of the teaching staff

of the R.C.M. (since 1919) for vocal ensemble, harmony, etc. His compositions, generally serious and reflective in character, exhibit a high type of musical sensitiveness. They include:

'As the leaves fall.' (Female voices and orch.)
'Ye watchers and ye holy ones.' (Female voices and orch.)
'The Kingdom of God.' (Sop. solo, chorus and orch.)
'Ring out ye crystal spheres.' (Chorus, orch. or organ.)
Songs, Part songs, etc.
Rhapsody. (Organ.)
Three Chorale Preludes. (Organ.)
Five Miniatures. (PF.)

Among unpublished works are a symphony, 'Switzerland,' a cantata, 'The Beatitudes,' chamber music and piano music.

DASER, LUDWIG (b. Munich, c. 1525; d. Stuttgart, Mar. 27, 1589), received his education and musical training in the Bavarian vocal chapel (Hofkantorei). In 1552 he became court Kapellmeister, but was pensioned in 1559,¹ probably on account of his Protestant faith, and was succeeded by Orlandus Lassus. On Jan. 8, 1572, he was appointed court Kapellmeister at Stuttgart, which position he held to the time of his death. Most of his compositions, masses, motets, etc., remained in MS. A 4-part Passion music (1578) and a fugue (also motets, *Riemann*) in J. Paix's organ-book (1594) were published in Munich, and 1 organ piece in Woltz, 'Nova Musices,' etc., 1617 (Q.-L.; A. Sandberger, *Bayr. Hofkapelle*, i.; G. Bossert, *Die Hofkantorei*).

DASH, the sign of *staccato*, written thus (·), and placed under or over a note to indicate that the duration of the sound is to be as short as possible, the value of the note being completed by an interval of silence; for example—

A round dot (·) is also used for a similar purpose, but with this difference, that notes marked with dots should be less *staccato* than those with dashes, being shortened about one-half, thus—

This distinction, which is enforced by such teachers as Clementi and Czerny, is often ignored by modern editors of classical compositions, and it is remarkable that in such valuable and conscientious editions of Beethoven's works as those of Von Bülow ('Instructive Ausgabe'; Cotta, Stuttgart), Pauer (Augener & Co., London) and others, only one sign should have been employed for the two effects. That Beethoven himself considered the distinction of importance is proved by

¹ According to Sandberger's researches, both Q.-L. and *Riemann* give this date, as it is certain that he was Kapellmeister for only 7 years.

various corrections by his hand of the orchestral parts of the Seventh Symphony, still extant, and also by a letter written in 1825 to Carl Holz, in which he expressly insists that '♩ ♩ ♩ and ♩ ♩ ♩ is not a matter of indifference.' See Nottebohm's *Beethoveniana*, No. xxv., in which extracts are given from several of Beethoven's works, with the signs of *staccato* as originally marked by himself. (Cf. *INÉGALES*.) F. T.

D'ASTORGA, see ASTORGA, D'.

DAUBE, JOHANN FRIEDRICH (b. ? Cassel, c. 1730; d. Augsburg, Sept. 19, 1797). In his *Generalbass in drey Accorden* (1756) he proves himself a musician of advanced ideas, similar to Rameau. He wrote two other books on composition and some symphonies, sonatas and lute pieces (Q.-L.; *Riemann*).

DAUBLAINE ET CALLINET, organ-builders established in Paris in 1838 as Daublaine et Cie. In 1839 Louis Callinet (b. Rouffach, Alsace, 1797), member of an old Alsatian family of organ-builders and successor to the organ-builder Somer, sold his house to Daublaine, becoming partner for five years. But he brought bad fortune to the house, for in 1844, in a fit of rage excited by some dispute, Callinet destroyed all the work which he and his partners had just added to the organ at St. Sulpice. After this feat he retired to Cavallé's factory as a mere journeyman. Shortly before 1844 the firm was re-established as Girard et Cie, with Barker as foreman from 1842. Under him the St. Eustache organ, destroyed by fire in 1845, was rebuilt, and that of St. Sulpice restored (1844-46). The firm became Ducroquet et Cie in 1845; the new organ built at St. Eustache was exhibited at Hyde Park in 1851, obtaining a Council medal and the decoration of the Legion of Honour. In 1855 Ducroquet (d. Varennes, Somme, July 19, 1877) was succeeded by a limited company, and that again by Merklin, Schütze et Cie from Brussels, who managed their predecessors' branches at Paris and Lyons. The business was subsequently carried on by Merklin alone until his death at Nancy, July 10, 1905, with the principal factory at Lyons and a branch in Paris. It became afterwards the Société Gutschenritter et Decoq (1899), the mark of which was sold to Fortin. The firm has ceased to exist as a factory.

DAUNEY, WILLIAM (b. Aberdeen, Oct. 27, 1800; d. Georgetown, Demerara, July 28, 1843), was the son of William Daune of Falmouth, Jamaica.

He began his education at Dulwich, and completed it at the University of Edinburgh. On June 13, 1823, he was called to the Scottish

Bar. He found in the Advocates' Library at Edinburgh a MS. collection of music, written between 1614 and 1620, and known as the Skene Manuscript. It consists of 114 English and Scottish ballad, song and dance tunes written in tablature. This manuscript Dauneay deciphered and published in 1838 in a 4to vol. under the title of 'Ancient Scottish Melodies from a manuscript of the reign of James VI.' He accompanied it with a long and ably written *Dissertation illustrative of the History of the Music of Scotland*, and some interesting documents. The work is valuable as showing the (probably) earliest versions of such tunes as 'The Flowers of the Forest,' 'John Anderson my jo,' 'Adieu, Dundee,' etc. Shortly after 1838 Dauneay quitted Scotland for Demerara, where he became Solicitor-General for British Guiana. W. H. H.

DAUPRAT, LOUIS FRANÇOIS (b. Paris, May 24, 1781; d. there, July 16, 1868), composer and famous horn-player. He entered the Conservatoire, and studied the horn under Kenn. He then joined the band of the Garde Nationale and later that of the Garde des Consuls, whom he accompanied on their Italian campaign in 1800. On his return to France he studied harmony and composition under Catel and Gossec at the Conservatoire, until, in 1806, he became principal horn-player at the Bordeaux theatre. In 1808 he succeeded his master Kenn at the Paris Opéra, and became chamber musician to Napoleon in 1811 and to Louis XVIII. in 1816. He was also appointed teacher of his instrument at the Conservatoire in this year, and held the post until 1842; he had already retired from the Opéra in 1831.

He published a *Method for the Horn* which was a standard work for some time. He is chiefly remarkable as a composer for his own instrument. Such published compositions include 5 concertos for the horn, pieces for 2, 3, 4 and 6 horns, sonatas for horn and piano, 3 quintets for horn and string quartet, and music for other combinations. His horn trios, quartets and sextets were also published, together with prefatory instructions as to their performance. (See *Fétis*.) J. M^c.

DAUSOIGNE-MÉHUL, LOUIS JOSEPH (b. Givet, Ardennes, June 10, 1790; d. Liège, Mar. 10, 1875), nephew and foster-son of Méhul; gained the Prix de Rome, 1809; produced some operas with moderate success; and was from 1827-62 director of Liège Conservatoire, which he raised to an institution of European fame. E. v. d. s.

DAUVERGNE, ANTOINE (b. Moulins, Bourbonnais, Oct. 3, 1713¹; d. Lyons, Feb. 12, 1797), violinist and composer. He was probably instructed by his father, Jacques Dauvergne, 'player of instruments' and first violinist at the Concert du Moulins. Accord-

ing to La Borde (*Essai sur la musique ancienne et moderne*), Antoine Dauvergne became leader of the band at the Concert of Clermont-Ferrand. This is not absolutely proved, but his stay there is certified. In 1739 he went to Paris, was admitted to the Musique de la Chambre the same year, and to the Opéra orchestra in 1744. From 1739-52 his compositions were only instrumental: 'Divertimenti a tre,' violin sonatas with a bass (opp. 1, 2, 1739), two sets of 'Concerts de symphonies' (opp. 3, 4, 1751). His music is deeply influenced by that of Locatelli and other Italians; it also reflects certain characteristics of the so-called school of Mannheim, then known in Paris. As a dramatic composer he claims our attention with 'Les Amours de Tempé,' a ballet (Opéra, 1752), and a certain number of operas, of which some are arrangements of older works by Colasse, Campora, etc., and others original ones (see *Fétis*, *Q.-L.*). His greatest success was unquestionably the production of 'Les Troqueurs,' interlude in 1 act, words by Vadé (Opéra-Comique, July 30, 1753). The historic importance of this piece lies in the fact that it was one of the first French works conceived in the form of the Italian intermezzo, with musical recitative instead of the usual spoken dialogue. Dauvergne had become one of the directors of the Concert Spirituel (1762), and he composed a series of motets the greater part of which was performed there. Already in charge of two important posts in the royal music, he was composer to the King and master of his chamber music (1755). Dauvergne became Surintendant (Dec. 25, 1764), and finally three times manager of the Opéra, from 1770-90. He was the last director of the Royal Opera, where Gluck's works were revealed to the French public.

D'AUXCOUSTEAUX, see AUXCOUSTEAUX.

DAVAUX, JEAN BAPTISTE (b. St.-André, Isère, c. 1737; d. Paris, Feb. 22, 1822), went to Paris c. 1760, and composed symphonies in the new style of the Mannheim school. His numerous symphonies, concertos, quartets, duets, etc., were published in Paris, London and Amsterdam. Two operas were performed in Paris: 'Théodore' in 1785, 'Cécilia' in 1876. He invented a metronome. (*Q.-L.*; *Fétis*.)

DAVENPORT, FRANCIS WILLIAM (b. Wilderslowe, near Derby, 1847), was educated at University College, Oxford. He studied music under Sir George Macfarren, whose only daughter he married; was appointed a professor at the R.A.M. in 1879, and subsequently examiner for the Local Examinations in connexion therewith. In 1882 he was appointed a professor at the Guildhall School of Music

¹ Date verified by birth certificate.

Lavenport's book on harmony has been widely used. His compositions include :

Symphonies, No. 1 in D minor (1st prize at the Alexandra Palace Competition 1876), No. 2 in C; overture 'Twelfth Night,' Viard-Louis Concerts, 1879; Prelude and Fugue for Orchestra, Crystal Palace, Nov. 1, 1879; six pieces for piano and violoncello, some of which were given at the Popular Concert, Nov. 24, 1879; four pieces for same; a Trio in Bb, Popular Concerts, Jan. 31, 1881, and again in 1882. His books were: *Elements of Music* (1884), *Elements of Harmony and Counterpoint* (1886), and *Guide for Pianoforte Students* (with Percy Baker, 1891).

A. C.

DAVICO, VINCENZO (b. Monaca, Jan. 14, 1889), composer, of Italian parentage. He studied first at Turin, then at Leipzig with Max Reger, obtaining the final diploma at the Conservatorium of that city in 1911. His many compositions include the symphonic series, 'La Principessa Lontana,' chosen by the committee of the Augusteum in the competition of 1911, and 'Impressioni Romane' (performed at Monte Carlo); a 'Poema erotico' (performed at the Augusteum, 1913) and 'Polifemo' (Turin, 1920). A Requiem for four voices and an opera in one act, 'La Dogaresa,' were performed at Monaco. An oratorio on a poem of Gustave Flaubert, 'La Tentation de St. Antoine,' does not appear to have been performed up to the present.

F. R.

DAVID, FÉLICIEN CÉSAR (b. Cadenet, Vaucluse, May 13, 1810; d. St. Germain-en-Laye, Aug. 29, 1876), French composer.

His father was an accomplished musical amateur. When Félicien was 6, Garnier, first oboe at the Paris Opéra, happened to hear the child sing, and strongly advised his mother to cultivate Félicien's talent. Soon afterwards the family removed to Aix, where David attended the Maitrise (school) du Saint Sauveur, and became a chorister at the cathedral. He is said to have composed hymns, motets and other works at this early period, and a quartet for strings, written at the age of 13, is still preserved at the maitrise. In 1825 he went to the Jesuit college at Aix to complete his studies. Here he continued his music, and acquired some skill on the violin. He also developed an astonishing memory for music. When he left the college, at the age of 18, want of means compelled him to enter the office of his sister's husband, a lawyer, but he soon afterwards accepted the appointment of second conductor at the Aix theatre, which he occupied till 1829, when the position of maitre de chapelle at St. Sauveur was offered to him. During the one year he occupied this place he wrote several compositions for the choir of the church; one of these, a 'Beatus Vir,' afterwards excited the admiration of Cherubini.

In 1830 David went to Paris to finish his musical education. Cherubini received him kindly, and under his auspices David entered the Conservatoire, and studied harmony under Millot. He also took private lessons from Réber, and thus accomplished his course of harmony within six months. He then entered the class of Fétis for counterpoint and fugue.

An 'Ave Verum' composed at this time proves his successful advance. On the withdrawal of his allowance David had to support himself by giving lessons.

In 1831 he joined the St. Simonians. When, in 1833, the brotherhood was dissolved, David joined a small group of the dispersed members, who travelled south and were received with enthusiasm by their co-religionists at Lyons and Marseilles. The music fell to the composer's share, and several of his choruses were received with great applause.

At Marseilles David embarked for the East (Mar. 22, 1833), where he remained for several years, at Constantinople, Smyrna, Egypt and the Holy Land. He managed wherever he went to take with him a piano, the gift of an admiring manufacturer at Lyons. Soon after his return, in 1835, he published a collection of 'Mélodies orientales' for piano. In spite of the melodious charm and exquisite workmanship of these pieces they met with total neglect, and the disappointed composer left Paris for several years and lived in the neighbourhood of Igny, rarely visiting the capital. Two symphonies, 'Les Quatre Saisons,' 24 quintets for strings, 2 nonets for wind, and numerous songs (one of which latter, 'Les Hirondelles,' was at one time very popular in England) belong to this period. One of his symphonies, in F, was in 1838 performed at the Valentino concerts, but without success. In 1841 David again settled in Paris, and his name began to become more familiar to the public, owing to the rendering of some of his songs by Walter, the tenor. But his chief fame is founded on a work of very different import and dimensions—his 'ode-symphonie' 'Le Désert' (words by Auguste Colin)—in which he embodied the impressions of his life in the East, and which was produced Dec. 8, 1844. The form of this composition is difficult to define. It consists of three parts subdivided into several vocal and orchestral movements, each introduced by some lines of descriptive recitation. The subject is the mighty desert itself, with all its gloom and grandeur. On this background is depicted a caravan in various situations, singing a hymn of fanatic devotion to Allah, battling with the simoom, and resting in the evening by the fountain of the oasis. Whatever one's abstract opinion of programme music may be, one cannot help recognising in the 'Désert' a highly remarkable work of its kind. The vast monotony of the sandy plain, indicated by the reiterated C in the introduction, the opening prayer to Allah, the 'Danse des Almées,' the chant of the Muezzin, founded on a genuine Arabic melody—are rendered with a vividness of descriptive power rarely equalled by much greater musicians.

The 'Désert' was written in three months. It was the product of spontaneous inspiration.

and to this circumstance its enormous success is mainly due. None of David's subsequent works approached it in popularity. 'Le Désert' was followed (Mar. 28, 1846) by 'Moïse au Sinai,' at the Opéra, an oratorio written in Germany, where David had gone on a concert tour, and where he met with much enthusiasm not unmixed with adverse criticism. 'Moïse,' originally destined for Vienna, was performed in Paris, its success compared with that of its predecessor being a decided anticlimax. The next work is a second descriptive symphony, 'Christophe Colomb' (Mar. 7, 1847), and its success again was anything but brilliant. 'Eden, a Mystery' was first performed at the Opéra Aug. 25, 1848, but failed to attract attention during that stormy political epoch. His opéra-comique 'La Perle du Brésil' was produced with success at the Théâtre Lyrique (Nov. 22, 1851). His remaining dramatic works are: 'La Fin du monde' (in four acts, never performed), 'Herculanum' (serious opera in four acts; Mar. 4, 1859, at the Opéra¹), 'Lalla-Roukh' (two acts; May 12, 1862), perhaps the most genuinely successful, and 'Le Saphir' (in three acts; 1865, both at the Opéra-Comique). Another dramatic work, 'La Captive,' was in rehearsal, but was withdrawn by the composer for reasons unknown.

F. H.; rev. M. L. P.

From a purely musical point of view, David's music shows an irregular and hesitating manner, although full of melodic charm and delicate colouring. Berlioz acknowledged his science and taste, the distinction of his melodies, and above all, his picturesque orchestration. A good estimate of David has been given by a contemporary, the composer Ernest Reyer, who describes him as a poet. In fact he was one by the sweetness, the tenderness and the naïveté of his expression—but a poet of the East. He appears as an initiator; without him no such dramatic works of Oriental characteristics as Reyer's 'La Statue,' Bizet's 'Djamileh,' Gounod's 'Reine de Saba,' Delibes's 'Lakmé,' Verdi's 'Aida,' etc., could have been created.

M. L. P.

BIBL.—RENA BRANCOUR, *Pâlieien David (Collection des Musiciens célèbres)*, Laurens, Paris), containing a full bibliography of works on David.

DAVID, (1) FERDINAND (b. Hamburg, June 19, 1810; d. July 18, 1873), one of the best and most influential violin players and teachers of Germany.

His musical talent showed itself very early, and after two years' study at Cassel in 1823 and 1824 under Spohr and Hauptmann, he made his first appearance at the Gewandhaus at Leipzig (1825), in company with his sister Louise—ultimately famous as Mme. Dulcken. He passed the years 1827 and 1828 as a member

of the band of the Königsstadt Theatre, Berlin, where he first became acquainted with Mendelssohn. In 1829 he accepted an engagement as leader of a quartet in the house of a noble and influential amateur at Dorpat, whose daughter he subsequently married. He remained in Russia till 1835, making frequent and successful tours to St. Petersburg, Moscow, Riga, etc. In 1836 Mendelssohn, on becoming conductor of the Gewandhaus concerts, obtained for him the post of leader of the band (Konzertmeister), which he filled with distinction and success until his death. On the foundation of the Conservatorium in 1843, David was appointed violin professor, also by Mendelssohn's influence. Of the intimate nature of their connexion a good instance is afforded by the history of Mendelssohn's violin concerto. It is first mentioned in a letter from Mendelssohn to David, dated July 30, 1838. Constant letters on the subject of the work passed between them during the process of composition; hardly a passage in it but was referred to David's taste and practical knowledge, and canvassed and altered by the two friends; and he reaped his reward by first performing it in public at the Gewandhaus concert of Mar. 13, 1845. The autograph is now in the possession of David's family. In like manner 'Antigone' (letter of Oct. 21, 1841) was referred to him; and he was one of the three trustees to whom the publication of the MS. works of his illustrious friend was confided after his death.

As a virtuoso David combined the sterling qualities of Spohr's style with the greater facility and piquancy of a later school; as a teacher his influence was probably greater than that of any preceding master. His most eminent pupils were Joachim and Wilhelmj.

It is one of David's special merits that he revived the works of the eminent violin-players of the old Italian, German and French schools, which he edited and published with accompaniments, marks of expression, etc. He also edited nearly the whole classical repertory of the violin for purposes of study, and took a prominent part in the critical editions of the works of Beethoven, Haydn and other great masters. He died very suddenly, while on a mountain excursion with his children, near Klosters in the Grisons. He was buried at Leipzig, where he was highly honoured, and where a street was named after him.

Among his numerous compositions the five violin concertos, a number of variations, and other concert pieces for the violin hold the first rank. He also published for piano and violin 'Bunte Reihe,' 'Kammerstücke,' etc. Besides these, two symphonies, an opera 'Hans Wacht,' a sextet and a quartet for strings, a number of songs and concert pieces for trombone and other wind instruments, deserve to be mentioned.

¹ It is said that in 'Herculanum' a great many pieces from the 'Fin du monde' have been embodied.

His 'Violin School' is certainly one of the best works of the kind, and the publication of the 'Hohe Schule des Violinspiels' (a collection of standard works of old violinists) marks an epoch in the development of modern violin-playing.

F. H^a.

His son, (2) JULIUS PETER PAUL (b. Leipzig, Aug. 4, 1840), was leader of the orchestra at Carlsruhe from 1862-65; he came to England about the latter year, and became master of the music at Uppingham School, where until 1907, when he retired to Oxford, he exerted an important influence in education. Cambridge conferred the degree of Master of Music on him Mar. 1908. He was a valued contributor to the earlier editions of this Dictionary.

C.

DAVIDE, (1) GIACOMO (b. Presezzo, near Bergamo, 1750; d. Dec. 31, 1830), was a very great Italian tenor, better known as 'David le père.' Having studied composition under Sala, he was able to suit his *floriture* to the harmony of the passage he wished to embroider; but he was even more distinguished in serious and pathetic music, and that of the church, than in bravura. In 1785 he went to Paris, sang at the Concert Spirituel, and made a great sensation in the 'Stabat' of Pergolesi. Returning to Italy, he sang during two seasons at La Scala. In 1790 he was at Naples again, and in 1791 he came to London. Lord Mount-Edgcumbe wrote:

'He was undoubtedly the first tenor of his time, possessing a powerful and well-toned voice, great execution as well as knowledge of music, and an excellent style of singing. He learned to pronounce English with tolerable correctness, and one of his last performances was in Westminster Abbey, at the last of the Handel festivals.'

In 1802 he was at Florence, and returned in 1812 to Bergamo, where he was appointed to sing at the church of Santa Maria Maggiore. It is said that he sang at Lodi in 1820. He formed two pupils, one of whom was his son, and the other Nozzari.

His son, (2) GIOVANNI (b. 1789; d. St. Petersburg, c. 1851), long enjoyed the reputation in Italy of a great singer, though his method of producing his voice was defective, and he frequently showed want of taste, abusing his magnificent voice, with its prodigious compass of three octaves comprised within four B flats.

He made his début at Brescia in 1810, and sang with success at Venice, Naples and Milan. He was engaged at La Scala for the whole of 1814. In the autumn of that year he was first employed by Rossini in his 'Turco in Italia.' Rossini then wrote rôles for him in 'Otello' (1816), 'Ricciardo e Zoraide' (1818), 'Erminione' and 'La donna del lago' (1819). In 1818 he sang at Rome, Vienna and London. Ebers had made overtures to him in 1822, and his engagement was on the point of completion when he was engaged for seven years by Barbaja, who at that time directed the operas

of Naples, Milan, Bologna and Vienna. Davide appeared in London in 1829, singing, among other operas, with Mrs. Wood in Pacini's 'L' ultimo giorno di Pompei'; but he was *passé*. He arrived in Paris in the same year. Édouard Bertin, a French critic, said of him:

'It is impossible for another singer to carry away an audience as he does, and when he will only be simple, he is admirable; he is the Rossini of song. He is a great singer; the greatest I ever heard.'

He was singing in Italy from 1831 till he retired in 1841 to Naples, where he founded a school of singing. A few years later he accepted the post of manager at the Opera of St. Petersburg, and is said to have died there about 1851.

J. M.

DAVIDOV, CHARLES (b. Goldingen, Courland, Mar. 17, 1838; d. Moscow, Feb. 15, 1889), eminent violoncellist and composer, took his mathematical degree at the Moscow University in 1858. Shortly afterwards he chose the musical profession, and studied the violoncello under Schmidt in Moscow and Schuberth in St. Petersburg. Composition he studied under Hauptmann in Leipzig.

His first appearance in public was at the Gewandhaus, Dec. 15, 1859, after which he became leading violoncellist in that orchestra and professor at the Conservatorium *vice* Grützmacher. In 1862 he was appointed first violoncello to the St. Petersburg Opera, and shortly afterwards to a professorship at the Conservatoire. From 1876-86 Davidov was director of this institution, and his reign was marked by most benevolent measures in favour of poor students. The number of scholarships was greatly increased, and free quarters found for the impecunious. He made his first appearance in London at the Philharmonic, May 19, 1862, in a concerto of his own. In the first edition of this Dictionary the following criticism of his playing occurs:

'His tone was expressive, his intonation certain, especially in the higher registers, his execution extraordinary, and there is great individuality in his style.'

His works include:

Symphonic Sketch for Orchestra (op. 27) and Orchestral Suite (op. 37). For violoncello: four Concertos (op. 5, 14, 18, 31), the Russian Fantasia (op. 7), and numerous small pieces of which the best known are 'Adieu,' 'Solitude' and 'Am Springbrunnen'; P.P. Quintet (op. 40), String Quartet (op. 38) and Sextet (op. 35). His Songs (op. 26) were exceedingly popular. He also wrote an admirable *School for the Violoncello*.

R. N.

DAVIDSBÜNDLER, see SCHUMANN, ROBT. DAVIDSON, G. H., a name notable in modern days as one of the pioneers of cheap music publishing. His early introduction to the public was his collection of Charles Dibdin's songs, the first attempt towards a complete gathering up to that time. This had the music to the principal songs, and was prefaced by a memoir by George Hogarth. It was issued in an octavo volume by How & Parsons in 1842. Before 1847 Davidson had turned publisher of both literary and musical works, his address being Water Street, Bridge Street, London.

In 1847 he had published his first volume of 'The Universal Melodist,' an interesting work in two volumes, the second bearing the date 1848. This had appeared in parts along with a re-issue of the Dibdin Collection. In 1848 he had changed his pace of business to 19 Peter's Hill, Doctors' Commons, and from here did an immense business in the issue of cheap and popular music. He purchased the copyright of most of Henry Russell's songs, and published sheet music under the title 'The Musical Treasury.' About 1856 his principal publications, including the above and his Russell's songs, appear to be transferred, and are issued with the imprint 'The Musical Bouquet Office, 192 Holborn.' So late as 1859 some few publications bear the name 'Davidson' or the old address 19 Peter's Hill.

F. K.

DAVIES, BENJAMIN GREY, known as Ben Davies (*b.* Pontardawe, near Swansea, Jan. 6, 1858), a tenor singer, was the son of an engineer.

Having learnt the Tonic Sol-fa system, the boy had already become a member of a choir that competed at an Eisteddfod at Carmarthen. He kept his alto voice until he was 15 years old, when he sang in Caradog's choir at the Crystal Palace; soon afterwards his voice broke, and for five years he earned his living in a store at Swansea, until he was 20, when, having won a prize at the Swansea Eisteddfod on Good Friday, 1877, he was enabled to enter the R.A.M., where he remained from 1878-80, studying with Fiori, and getting much valuable advice from Randegger. A performance of the 'Hymn of Praise' by the R.A.M. students in 1879 led to his obtaining an engagement to sing the tenor solos in 'St. Paul' in Dublin; and at another R.A.M. performance, where he enacted the garden scene from 'Faust,' Carl Rosa offered him an engagement to sing regularly in opera. His début on the stage took place at Birmingham in 'The Bohemian Girl' on Oct. 11, 1881, in which opera he appeared for the first time in London at Her Majesty's Theatre, Jan. 25, 1882. On the production of Goring Thomas's 'Esmeralda' and Mackenzie's 'Colomba,' he sang small parts, and filled a more important part in Stanford's 'Canterbury Pilgrims' in 1884, in which he appeared with Miss Clara Perry, who became his wife in 1885, when both artists left the company. In Feb. 1887 he joined the company that was playing Cellier's 'Dorothy' at the Prince of Wales's Theatre, in which he played the part of Geoffrey Wilder for more than two years. In 1891 he appeared at the English Opera House as Ivanhoe in Sullivan's opera, and as Clément Marot in Messager's 'Basoche.' From the time of his first festival engagement (Norwich, 1890) onward, Davies became more

associated with the concert platform, and for many years he was in most constant request for the English festivals. He sang at the Handel Festival in 1926 with all his old vigour. His first visit to the United States in 1893, when he sang at the World's Fair at Chicago, was followed by many others, and his success in America was as great as in England. (See *Mus. T.*, Aug. 1899.) M.

DAVIES, FANNY (*b.* Guernsey, June 27, 1861), one of the most distinguished of English pianists.

Her keen musical instincts were developed in early years by education chiefly at Birmingham under Charles Flavell (piano) and A. R. Gaul (harmony and counterpoint), but a wider course was begun when in 1882 she entered the Leipzig Conservatorium and studied for a year under Reinecke, Oscar Paul and Jadassohn. In 1883 she removed to the Frankfurt Conservatorium, and her study there for two years with Mme. Schumann shaped the course of her career. She had arrived at a favourable time; she imbibed from her great teacher all that was finest in the tradition and ideals which Mme. Schumann represented, and returned to her own country to perpetuate and extend both. She made her first appearance in England on Oct. 17, 1885, playing at the Crystal Palace Beethoven's concerto in G, a work which has always remained one of her finest interpretations. On Nov. 16 following she played for the first time at the Monday Popular Concerts (St. James's Hall) choosing as her solo Bach's Chromatic Fantasia and Fugue, and taking part in Schumann's quartet for piano and strings. In this season (1885-86) she appeared with Joachim and Piatti in six 'Popular' concerts, and henceforward was particularly associated with chamber music of the highest kind. She introduced Brahms's opp. 116 and 117, took part with Mühlfeld in the first performances in England of the clarinet sonatas and trio, and with Joachim in the first performance of the D minor sonata. She made an appearance at the Philharmonic Society on Apr. 15, 1886, when Sterndale Bennett's concerto in C minor was chosen for her. She played in Berlin (Nov. 15, 1887) with Joachim, and after giving a recital in Leipzig at the old Gewandhaus, she made her first appearance at one of the regular Gewandhaus concerts (Jan. 5, 1888), playing the Beethoven concerto in G in the same programme as that in which Tchaikovsky conducted his fourth symphony.

In subsequent years she played much on the Continent: at Rome (1890), at the Beethoven House Festival at Bonn (1893), when she contributed the sonata op. 110 and took part in the clarinet trio (B flat) with Mühlfeld, at Vienna (1894-95), where her understanding of Brahms's music was deepened by personal friendship with the composer, and at Bergamo

(1897), where she took part in the Donizetti Centenary Festival. She made an extensive tour in Germany with the singer Gervase Elwes (1907), and more lately (1920 *et seq.*) played much with the Bohemian String Quartet both in Prague and England, with Casals in chamber concerts (1911-14) and with his orchestra at Barcelona (1923), when she played Beethoven's concerto in G and that of Brahms in B flat. It is also worth noting that Miss Davies has constantly included music of the old English composers in many of her recital programmes, and especially the Virginal Music of William Byrd many years before the modern revival of that music had taken root. She has also sought out and introduced many works by modern composers, especially English, Czech and Spanish. She was the first to give a piano recital in Westminster Abbey (July 1921), and this she was able to follow by other piano recitals in English cathedrals, notably Winchester and York. Indeed, while possessing fine qualities as a pianist, it is as an artist who seeks the best in music wherever it may be found, and who both in her own playing and her teaching puts the ideal of serving the art before the estimation of the artist, that Fanny Davies's distinctive work has been done. c.

DAVIES, SIR HENRY WALFORD, Mus.D. (b. Oswestry, Sept. 6, 1869), professor¹ of music at University College, Aberystwyth, director and chairman of the National Council of Music in the University of Wales, is a composer of distinction.

He entered the choir of St. George's Chapel, Windsor, in 1882, and under Walter PARFITT (*q.v.*), whose pupil assistant he was (1885-90), he received a thorough grounding in the best principles of Anglican church music. During part of this time he held the post of organist at the Park Chapel, Windsor. In 1890 he won a composition scholarship at the R.C.M. and also became organist of St. Anne's, Soho, a church of musical importance in London on account of its annual performances of Bach's 'Passion Music.' Ill-health, however, compelled him to resign the organistship of St. Anne's for the less arduous one of Christ Church, Hampstead (1891-98). At the R.C.M. Davies was the pupil of Parry, Stanford and Rockstro, and in 1895 he succeeded the last named as a teacher of counterpoint in that institution. During these years his compositions in many forms made their mark. A symphony, regarded as a promising piece of student work, was given at the Crystal Palace under Manns. A quartet in E flat for piano and strings was played at one of Dannreuther's private concerts (1893); 'Prosperice,' a setting of Browning's poem for baritone voice and

string quartet, was sung by Bispham (1896), and a cantata, 'Hervé Riel' (Browning), was produced at the R.C.M. (1895).

The year 1898 marked the beginning of Davies's mature career. He had lately taken his doctorate at Cambridge when he was appointed, after competition, to succeed Dr. E. J. HOPKINS (*q.v.*) as organist and director of the choir of the Temple Church, and for the next 20 years the development of church music, in the special conditions which that church offered, occupied him constantly. It was a unique work. He found there a small professional choir singing the morning and evening service according to the cathedral tradition, but singing it on Sundays only. He raised the standard of *ensemble* singing so that the performance of Responses, Psalms, etc., came to be regarded as a model; he was allowed considerable latitude in the actual form of the services and introduced the practice of singing a cantata monthly at the afternoon service. The 'Passion Music' and 'Christmas Oratorio' of Bach became regular events of the year; other church cantatas of Bach, certain works by Parry and other living composers, were periodically given; a certain amount of the older English polyphonic music was introduced and a widely eclectic repertory was established. When Davies came to the Temple he was not regarded as a virtuoso of the organ; long before he left it he had earned a high reputation as a performer whose playing of the classics was of that kind which places the interpretation of the music first and foremost. His individual musicianship showed itself specially in his improvisation and in those accompaniments to cantatas, etc., in which he adapted an orchestral score to the style of the organ. In 1908 the fine organ of the Temple Church (originally Father Smith) was entirely rebuilt by Rothwell under his direction.

Meantime he entered on his most prolific period of composition, and from 1902-12 he contributed important works for solo voices, chorus and orchestra, to a number of the provincial festivals. The first of these was an oratorio, 'The Temple' (Worcester, 1902). It was not a success; it was complained that the oratorio form (the subject was the building of Solomon's temple) was old-fashioned while the musical thought was undoubtedly modern. Its qualities, however, were sufficiently arresting to bring an invitation from the Leeds Festival Committee to compose for their next festival. Davies found a subject thoroughly congenial to his temperament in the mediæval mystery-play 'Everyman,' and his setting for four solo voices, chorus and orchestra was produced at Leeds (1904) with a success which gave him a notable place in public estimation. It was performed by almost every choral society of the first rank in the British Isles and

¹ Resigned the professorship 1926, while retaining the chairmanship of the National Council.

occasionally elsewhere, repeated at subsequent festivals of Worcester (1908), Sheffield (1908) and Norwich (1911), and given in London by the London Choral Society and the Bach Choir. The subject of 'Everyman,' the call of the Soul by Death, its purification through pain and its ultimate justification through Good Deeds, appealed at once to the mystic idealism of Davies's nature and brought from him music having an intimacy and sustained power which none of his other works on a similarly large scale has reached. After this production all doors in England were opened to him. He composed 'Lift up your Hearts,' a sacred symphony, for Hereford (1906), and 'Noble Numbers,' a cycle of choral songs on poems by Herriek and Herbert, for the following Hereford Festival (1909). 'Five Sayings of Jesus' (Worcester, 1911) was followed by 'The Song of St. Francis' (Birmingham, 1912), his most important festival work after 'Everyman.' Various orchestral works were produced at the Promenade Concerts (Queen's Hall), and a symphony in G was given by the New Queen's Hall Orchestra at a symphony concert in June 1911.

Davies had resigned (1903) his position as counterpoint teacher at the R.C.M. in order to devote his time to composition, but other interests proved an increasing distraction from this purpose. He conducted the Bach Choir (London), 1903-07; also the annual festivals of the London Church Choirs' Association at St. Paul's Cathedral. His gifts as a lecturer were shown at the Royal Institution, and his power of getting into sympathetic touch with every kind of audience made him one of the most effective judges at popular competition festivals all over the country. Early in the war he was active in organising music for soldiers; he founded a male-voiced choir and arranged folk-songs for camp concerts. In 1917 he was made Musical Director to the Royal Air Force with the rank of major. In 1919 he accepted the chair of music in the University of Wales, a post which carries with it a wider sphere of influence than an ordinary University professorship, since it entails the organisation of elementary musical education in the schools, the training of teachers, conducting and judging at Eisteddfodau throughout the Principality. He has latterly thrown his whole energies into the problems of popular musical education. He resigned the organistship of the Temple Church finally in 1923, after a period in which he was described as 'Honorary Organist' with G. Thalben Ball, who ultimately succeeded him as 'acting organist.' Davies's acceptance of the organistship of St. George's, Windsor, the appointment to take effect in 1927, gives prospect of his return to the sphere of church music.

In connexion with his educational work

Davies has produced a valuable series of gramophone records of short lectures on melody-making, and has undertaken a regular course of instruction by wireless with the British Broadcasting Company. His services to music in Wales procured him the honour of knighthood on the retirement of Mr. Lloyd George from office in 1922. He succeeded Sir Frederick Bridge as Gresham Professor of Music in 1924.

The measure of Walford Davies's powers as a composer is hardly to be gained from the larger works for chorus and orchestra enumerated above, though each one of these contains fine music based on a lofty conception of art. A sure instinct in setting the English language, and the power of wielding choral voices in contrapuntal and massed effects, are qualities which he inherited from his master, Parry. He never, however, got an equally sure grip on the orchestra, and such works as the sacred symphony 'Lift up your Hearts' (choral and orchestral), and the purely orchestral symphony in G, failed on that account. He has expressed himself with greater ease, however, in the simpler forms, and when relieved of a hampering sense of responsibility, his lyrical genius shines clear. Songs such as the clown's songs in *Twelfth Night*, 'Orpheus with his Lute,' 'Follow your Saint' and 'Never weatherbeaten sail' (Campian) are among the most delightful things of this kind, and the two cycles, 'The Long Journey' (written for Plunket Greene) and 'Songs of a Day' for six voices and small orchestra, as well as the earlier set of 'Six Pastorales' for vocal quartet, strings and piano, have a delicacy and charm all their own. The suite for string quartet, 'Peter Pan,' the 'Nursery Rhymes' for vocal quartet, and the 'Sacred Lullabies' show Davies's mind at its happiest in writing for or about children, and one of his most popular songs, 'When childer plays,' is a little masterpiece of insight into infantile psychology.

His church music, too, is important. The services and such anthems as 'God created man' and 'Grace to you and peace' were written for the church services he was directing, especially those of the Temple Church, but he has never written a note of what may be called merely official church music. He is one of the very few composers of to-day who writes for the church with the conviction and single-minded sincerity of the 16th century, though his technical style is grounded in such masters as S. S. Wesley and Parry. As organist, choir-master and composer he has exerted the strongest influence on the church music of his generation. C.

SOLO VOICES, CHORUS AND ORCHESTRA

- 1894. *Wervé Riel* (op. 2). R.C.M.
- 1902. *The Temple* (op. 14). Worcester Festival.
- 1902. *Jovial Huntsmen* (see *Cantatas with Piano Accompaniment* (op. 11). Windsor and Worcester.
- 1904. *Everyman* (op. 17). Leeds Festival.
- 1906. *Lift up your Hearts* (op. 20). Hereford Festival.
- 1908. *Ode on Time* (op. 27). Milton Celebration, Bow Church

1909. Noble Numbers (op. 28). Hereford Festival.
 1911. Five Sayings of Jesus (op. 35). Worcester Festival.
 1912. Song of St. Francis (op. 36). Birmingham Festival.
 1914. Dante Fantasy (op. 42). Worcester, 1920.
 1916. Heaven's Gate (op. 47). People's Palace.
 1925. Men and Angels. Gloucester Festival.
 1926. High Heaven's King (op. 52). Worcester Festival.

ORCHESTRA

1904. Overture to Everyman.
 1907. Holiday Tunes (op. 21).
 1908. Solemn Melody (Strings, published in various forms).
 1910. Festal Overture (op. 30).
 1911. Parthenia Suite (op. 38).
 1911. Symphony in G (op. 32).
 1912. Suite in C 'after Wordsworth.'
 1914. Conversations for Piano and Orchestra.
 1923. Memorial Suite.

CHURCH MUSIC

SERVICES—

1899. Evening Service in C.
 1900. Festal Evening Service in G (op. 12, No. 1).
 1902. Temple Chant Service in G (op. 12, No. 2, small octavo).
 1902. Festal Te Deum and Jubilate in G (op. 12, No. 1).
 1916. published 1924. Unaccompanied Service in C.
 Serail Service in F (op. 16).
 1911. Evening Service (Merbecke).
 Chants for Certain Psalms.

ANTHEMS—

1892. Out of the deep.
 1898. When Christ was born to earth.
 1899. Walk to Emmaus.
 1899. And Jesus entered into the Temple.
 1901. If any man hath not the Spirit of Christ.
 1908. Whosoever is born of God.
 1908. Grace to you and peace (op. 26).
 1916. Let us now praise famous men.
 1898. God created man (Motet for Double Chorus and Organ; also arranged for Orchestra).
 1914. Short Requiem.
 1918. Fourteen Spiritual Songs.
 1901. As with Gladness (Carol).
 1901. The Blessed Birth (Carol).
 Numerous Hymn tunes.

CHAMBER MUSIC

1904. Prospect (Browning), Quintet for Baritone Voice and Strings.
 1894. Sonata in E minor for Piano and Violin.
 1896. Psalm 23 for Tenor Voice and Harp and String Quartet (op. 8). (Piano version only published.)
 1896. Sonata in D minor for Piano and Violin.
 1897. Six Praeludia for Vocal Quartet, String Quartet and Piano (op. 15).
 1908-09. Songs of Nature, for Voices, Strings, Flute, Horn and P.F. (op. 24).
 1909. Suite, Peter Pan, String Quartet (op. 30).

SONGS

1898. Six Songs (op. 3).
 1905. Six Songs (op. 18).
 Many other single Songs.

CANTATAS WITH PIANO ACCOMPANIMENT

1902. Three Jovial Huntsmen (with Violin Obligato) (op. 11).
 (Also arranged for Orchestra; parts in MS.)
 1907. Humpty Dumpty
 A Merry Heart and other Songs and PartSongs (op. 33).

PARTSONGS

Among numerous works of this kind the following are the most important:

1891. Weep ye no more (op. 1).
 1893. Sturdy Rock (A.T.T.B.B.).
 1898. Four Songs of Innocence (equal voices) (op. 4).
 1898. Hymn before Action (T.T.B.B.).
 1905. Eight Nursery Rhymes (mixed voices) (op. 19a).
 Nursery Rhymes (S.A.A.) (op. 19b).
 1907. England's Pleasant Land (cycle of PartSongs) (op. 22).
 1908. New Nursery Rhymes (mixed voices) (op. 23).
 1913. Dominus Illuminatio Mea (T.T.B.B.B.) (op. 38).
 1914. Thine Sweetest Far (op. 39).
 1914. Four unaccompanied PartSongs (op. 40).
 1914. Three Quartets with Piano accompaniment (op. 41).

COMPILATIONS

1915. Fellowship Song Book.
 1915. Thirty Songs New and Old, arranged for men's voices.
 1915. Fifty-two Hymn Tunes, arranged for men's voices.
 1915. Thirty-eight Songs for Camp Concerts.
 1915. In Hoc Signo (Hymns of War and Peace).
 1919. Laus Deo (Hymns of Peace and Thanksgiving).
 1923. Hymns of the Kingdom.
 1923. A Students' Hymnal.
 1924. Welsh Festival Music.

PUBLISHED LECTURES

Rhythm in Church.
Music in the Christian Church (Church Music Society).

DAVIES, MARIANNE and CECILIA, two musical sisters. (1) MARIANNE (b. 1744; d. 1792) first appeared at Hickford's Rooms on Apr. 30, 1751, when she played a concerto for the German flute, and a concerto by Handel on

the harpsichord, besides singing some songs. About 1762 she achieved much more repute for her skill on the HARMONICA (q.v.), then recently much improved by Franklin.

(2) CECILIA (b. 1738; d. July 3, 1836) won considerable renown as a vocalist. She appeared at the Theatre Royal, Dublin, in Nov. 1763, and in 1764 (*Dublin Journal*, 3811). She seems to have made her first public appearance in London on Aug. 10, 1767, in 'some favourite songs from the operas of "Artaxerxes" and "Caractacus."'

In 1768 the sisters quitted England and went to Paris and Vienna. Whilst there they lodged in the same house as Hasse, and soon became great favourites at court; they taught the Archduchesses, Maria Theresa's daughters, to sing and act. Metastasio wrote and Hasse composed an ode, performed June 27, 1769, which was sung by Cecilia, accompanied by Marianne on the harmonica. Metastasio, in a letter dated Jan. 16, 1772, describes the beautiful tone of the instrument, and the admirable manner in which Cecilia assimilated her voice to it, so as to render it difficult to distinguish the one from the other. From Vienna the sisters went to Milan, where Cecilia appeared in 1771, with great success, in the opera of 'Ruggiero,' written by Metastasio and composed by Hasse, being the first Englishwoman accepted in Italy as *prima donna*. The Italians bestowed on her the sobriquet of 'L' Inglesina,' and confessed her to be superior to any Italian singer but Gabrielli. She afterwards sang at Florence. In 1773 the two ladies returned to London, where Cecilia appeared at the Italian Opera in Oct. with the greatest success. She sang in Sacchini's 'Lucio Vero,' on Nov. 20. In the following year she sang at the Hereford Festival. She subsequently revisited Florence, and performed there until about 1784, when she returned to England in poor circumstances. She sang after her return from Florence at the Professional Concert on Feb. 3, 1787, and made her first appearance in oratorio in 1791 at Drury Lane, soon after which she fell into great poverty. About 1817 she published a collection of six songs by Hasse, Jommelli, Galuppi, etc. During the last years of her life she was assisted by the National Fund, the Royal Society of Musicians, etc. (See *D.N.B.*)

W. H. H.; with addns. and corr. by W. B. S.

DAVIES, MARY (b. London, Feb. 27, 1855), mezzo-soprano singer, of Welsh parentage. She was taught music and singing by her father, an amateur, for over fifty years preceptor at his chapel, where she made her first appearance as a singer at the age of 8. On June 12, 1873, she made her début in public at Brinley Richards's Concert, Hanover Square Rooms. In the same year she gained the Welsh Choral Union Scholarship at the R.A.M., where she studied singing under Randegger, and in 1876 gained the

Parepa-Rosa Gold Medal, and in 1877 the Nilsson prize. While a student, on Apr. 8, 1875, she sang with success in public concerts, notably in 1887 at the Philharmonic, on the production in London of the third part of Schumann's 'Faust.' On Jan. 5, 1878, she made her first appearance at the London Ballad Concerts, at which concerts she afterwards sang for many years as principal soprano vocalist; on Jan. 19, at the Popular Concerts, and in the autumn at the Worcester Festival. On Feb. 5 and Mar. 11, 1880, she sang with the greatest success the part of Margaret on the production in England, in its entirety, under Hallé at Manchester, of Berlioz's 'Faust,' and on May 21 and 22 repeated the part under the same conductor at St. James's Hall, and for many years under him in London, Manchester and elsewhere. In 1881 she sang the part at the Norwich and Huddersfield Festivals, and in 1888 at the Richter Concerts. On Nov. 20, 1886, she sang with success the part of Mary on the production at the Crystal Palace of Berlioz's 'Childhood of Christ.' She was the possessor of a mezzo-soprano voice of two octaves and a note from *b* to *c''*, of limited power but very sweet, always perfectly produced and of great charm. In 1888 she married William Cadwaladr Davies of the Inner Temple and North Wales Circuit. In 1900 Mrs. Davies finally retired from public life. Since the death of her husband in 1905 she has interested herself in higher education in Wales, wherein he had been very active; also in the Welsh Folk Musical Society, of which she is president. In 1916 the University of Wales bestowed upon her the degree of Mus.D. (*honoris causa*). A. C.

DAVIS, JOHN DAVID (b. Edgbaston, Oct. 22, 1869). At the age of 16 he was sent to Frankfort-on-Main to learn German, this being by way of preparation for a commercial career, and incidentally entered the Raff Conservatorium of Music. The following year he went to Brussels to learn French; shortly after this he became a member of the Brussels Conservatoire, studying composition and the piano under Professor Zarembski, and later under Professor Leopold Wallner. He was also under De Greef for pianoforte and F. Kufferath for counterpoint. In 1889 he returned to Birmingham and took up composition and teaching; in 1893 he joined the teaching staff of the Midland Institute, but in 1904 was compelled by ill-health to resign. An opera, 'The Zaporogues,' was given in 1903 at the National Flemish Theatre in Antwerp under the title of 'The Cossacks.' Among his orchestral works, some of which have been widely performed, are:

Symphonic Variations and Finale. Produced at a Charles Williams Orchestral Concert, Queen's Hall, in 1905, also at Promenade Concerts in Birmingham.

'The Cenci,' a symphonic ballade, after Shelley. Produced at Birmingham, and given at Bournemouth and elsewhere.

'The Maid of Antioch,' symphonic poem. Produced at Birmingham; subsequently performed at the Albert Hall under London Ronald, at Bournemouth and Eastbourne, and at Liverpool, under Cowen.

'Germania,' a concert overture. Produced by the Birmingham Festival Choral Society.

'Miniatures,' a suite for small orchestra. Produced by Henry Wood at a Promenade Concert, and given under Dan Godfrey at Bournemouth.

Prelude to Maeterlinck's 'L'Intruse.'

'Elegy' for small orchestra. Antwerp and Birmingham.

'Song of Evening,' for string orchestra.

'Coronation March' for full orchestra in G minor. A composition which received the prize of £100 offered by *The Artist* in 1902.

Among chamber compositions are:

Two Quartets for strings in G minor and D minor.

Variations from Suite on a Londonderry Air, written by five composers, for string quartet.

'Song of Evening,' for string quartet or quintet.

Two Sonatas for piano and violin.

Pianoforte Sonata in G minor.

Six pieces for piano and violin.

'Elegy' for violoncello and piano.

Arioso, Gavotte, and Trio for piano and violin.

Many piano pieces and Songs, and three Partsongs.

(See B. M. S. Ann., 1920.) G. S. K. B.

DAVIS, THOMAS, an English composer of some degree of merit, who about the middle of the 18th century worked for Henry Waylett, a publisher, of Exeter Change. Of his compositions, Waylett issued two sets of 'VI Solos for a German Flute or Violin with Bass for the Harpsichord,' 'Twenty English and Scotch airs,' and some sets of country dance tunes, one being for the year 1751. F. K.

DAVISON, JAMES WILLIAM (b. London, Oct. 5, 1813; d. Margate, Mar. 24, 1885). He was a writer on music, and for 33 years (1846-79) music critic to *The Times*.

He was educated with a view to the Bar, but forsook that career for music, and studied the pianoforte with W. H. Holmes, and composition with G. A. Macfarren. He made the acquaintance of Mendelssohn during one of his early visits to England, and deepened it in 1836, when, in company with Sterndale Bennett, he attended the production of 'St. Paul' at Düsseldorf. He gradually forsook composition for criticism. In 1842 he started the *Musical Examiner*, a weekly magazine which lasted two years; and in 1844 succeeded G. A. Macfarren, sen., as editor of the *Musical World*, which continued in his hands down to his death. Davison contributed to the *Saturday Review* for ten years, and for long to the *Pall Mall Gazette* and *Graphic*. But it was as musical critic of *The Times* that his influence on music, always of the most conservative kind, was most widely exercised. He married (1859) Arabella GONDARD (q.v.), who had been his pupil, and they had two sons, Henry and Charles. The former compiled his father's memoirs, published (1912) under the title *From Mendelssohn to Wagner*.

G.; rev. c.

DAVY, JOHN (b. Upton Helions, near Exeter, Dec. 23, 1763; d. London, Feb. 22, 1824), a composer now remembered chiefly by one famous song, 'The Bay of Biscay.' He was articled to Jackson of Exeter in 1777. Some years afterwards Davy obtained employment in the orchestra of Covent Garden Theatre and as a teacher. After the publication of his vocal quartets, madrigals and sonatas he was engaged to supply music for several dramatic pieces.

1 A fuller notice by Grove appeared in former editions of this Dictionary.

His first essay in this direction was the incidental music to T. Dibdin's burletta 'A Pennyworth of Wit' (1796). Davy composed the music for the following dramatic pieces:

'What a Blunder!' 1800; 'Perouse' (with J. Moorehead), 1801; 'The Brazen Mask' (with Mountain), 1802; 'The Cabinet' (with Braham and others), 1802; 'The Caffres' (with others), 1802; 'Rob Roy', 1803; 'The Miller's Maid', 1804; 'Harlequin Quicksilver', 1805; 'Thirty Thousand' (with Braham and Feeve), 1805; 'Spanish Dollars', 1805; 'Harlequin's Magnet', 1805; 'The Blind Boy', 1808; 'The Farmer's Wife' (with others), 1814; 'Rob Roy Macgregor', 1818; 'Woman's Will a Riddle' 1820. Also an overture and other music for Shakspeare's *Tempest*, performed in conjunction with the songs of Purcell, Arne and Linley.

W. H. H.

DAVY, RICHARD (late 15th and early 16th cent.), English composer, chiefly of church music, entered Magdalen College, Oxford, c. 1483¹ and was organist and master of the choristers there from 1490-92. A 'Libri computi' for 1491-92 at Magdalen contains a reference to a payment of 13s. 4d. to

'Ricardo Davys pro stallo suo, et informacione choristarum, et pro media parte melodie organorum.'²

In 1497 he was ordained priest, and in 1501 became chaplain to Sir William Boleyn, the grandfather of Anne Boleyn. He was chaplain to Sir Thomas Boleyn (the son of Sir William) from 1506-15, after which there is no mention of him.³ An early 16th-century MS. in the Eton College Library contains the following 5-part motets (hymns to the Virgin) by Davy:

'In honore summe matris,' 'O Domine cell terreeque,' *Salve Jezu, Salve Regina, Stabat Mater,* 'Virgo templum Trinitatis.'

The MS. now only contains 43 complete pieces, but the index shows that it originally contained 97. The missing compositions (either wholly or in part) include four by Davy. Of these there is an imperfect 'Gaude flore virginali' and portions of a 4-part Passion for Palm Sunday. The latter is interesting, since it is almost certainly the earliest example of Passion music in England, and is particularly notable in that the utterances of the 'turba' or crowd are given to the chorus, whereas the 15th- and 16th-century tradition was that they should be sung by an alto. Four of these choruses were completed, and three others missing were composed by R. R. Terry when the Passion was performed at Westminster Cathedral during Holy Week, 1921. Sir R. Terry refers to the Passion as displaying 'a high standard of contrapuntal technique' and as being 'expressive, virile and dramatic.' Single parts of a motet by Davy are in the University and St. John's College libraries at Cambridge, and the medius part of another ('Virgo templum'—probably the same as that in the Eton MS.) is in the British Museum (Harl. 1709/35). Two 3-part carols, 'Ah blessed Jhesu' and 'Ah my hart remembris,' are in the Fayrfax MS. (B.M. Add. MSS. 5465). The same MS. also contains some secular partsongs by Davy: the tenor part of 'Nowe the lawe is led' (a 2), and the score of another in 3 parts, 'Jhoone's

sike'—with second section beginning 'She is my litell praty on.'

J. M^r.

DAWSON, FREDERICK (b. Leeds, July 16, 1868), a pianist of ability who studied with Hallé, Dannreuther, Klindworth, Pachmann and Anton Rubinstein. He was 10 years old when his ability to play the whole of 'Das Wohltemperirte Klavier' from memory brought him to the notice of Hallé. He made his mark at the Monday and Saturday Popular Concerts (St. James's Hall), the Crystal Palace, Philharmonic and other leading English concerts, and undertook recital tours in Europe. Having studied the works of Grieg with the composer, he played the concerto at the Grieg concert given by the Philharmonic Society in 1897, and introduced both the Brahms concertos in a programme conducted by Klindworth at St. James's Hall in 1898. His enterprise in the matter of repertory was further exemplified in the fact that he gave Mackenzie's Scottish concerto in Berlin in 1902. A pianist in the large style, his reputation stood high in continental cities, especially Vienna and Berlin, though in later years his appearances at home and abroad have been comparatively few owing to ill-health.

O.

DAY, ALFRED, M.D. (b. London, Jan. 1810; d. there, Feb. 11, 1849), author of an important *Treatise on Harmony*. He followed the medical profession, practising in London, but his pronounced musical sympathies led him to study musical theory with remarkable thoroughness, and he formed the idea of making a complete and consistent theory of harmony. His book was published in 1845.

His analysis of the foundations of classical harmony was very elaborate, and out of the chaos of rules and exceptions, which clouded rather than illuminated the text-books of his day, he evolved a system which was sufficiently convincing to meet with the approval of practising musicians like Macfarren, who made it the basis of his methods of teaching.

Day's most important contributions to the progress of harmonic theory were his division of styles into Strict or Diatonic and Free or Chromatic, and his discussion of the discords which can be used without preparation. By his analysis of harmonies he was able to develop powerful arguments in favour of the classification of many chromatic discords under a single key system, a simplification of method which offered outstanding advantages. This is not the place to discuss his hypotheses in detail, or to weigh the objections that have been taken to some of them. There were few theorists who did not follow him at least some part of the way, and his work had a decided influence on the generation of teachers which succeeded him.

O. D.

DAY, MAJOR CHARLES RUSSELL (b. 1860; d. 1900), an authority on Indian music.

¹ W. H. Grattan Flood, *Mus. T. Ann.* 1921.

² W. Barclay Squire in *Archæologia*, vol. IV.

³ W. H. Grattan Flood.

He was the only son of the Rev. Russell Day, rector of Horstead, Norwich; was educated at Cheam and Eton, and in 1880 joined the 3rd Royal Lancashire Militia. In 1882 he was gazetted to the first battalion of the Oxfordshire Light Infantry, and soon afterwards was ordered to India, where he became profoundly learned in Oriental music, being instructed entirely by native musicians. The result of his studies was *The Music and Musical Instruments of Southern India and the Deccan*, published in 1891. He drew up the very valuable catalogue of the musical instruments exhibited at the Military Exhibition in Chelsea in 1890 (published by Eyre & Spottiswoode). He took an active part in founding and promoting the cause of the short-lived Wind Instrument Chamber Music Society; he served on the English committee of the musical exhibition in Vienna (1892), and was invited to form one of a committee of advice for the Paris Exhibition of 1900. He was gazetted major in 1899. He was mortally wounded in the South African war, in the attack upon Cronje at Paardeberg, Feb. 18, 1900, while helping a wounded man. An interesting obituary notice, by the late A. J. Hipkins, appeared in *Mus. T.* Apr. 1900. His collection of Indian musical instruments (including a fine vina) and his Indian MSS. are now in the South Kensington Museum. M.

DAY, JOHN (b. Dunwich, Suffolk, 1522; d. London, July 23, 1584—Q.-L.), one of the earliest of English musical typographers, began printing about 1547 in Holborn, a little above the Conduit. He afterwards dwelt 'over Aldersgate beneath Saint Martyns' (i.e. in the upper room over the gate itself), and subsequently had a shop in St. Paul's Churchyard. He used the motto 'Arise, for it is Day,' which was probably intended as a reference to the introduction of the reformed religion as well as a punning allusion to his own name. On Mar. 25, 1553, he obtained a licence to print *A Catechism in English with an A B C thereunto annexed*, and also the works of John Poynt, Bishop of Winchester, and Thomas Beacon, Professor of Divinity. He subsequently procured a patent to be granted to him and his son Richard for printing the Psalms, etc. He was the printer of Foxe's *Acts and Monuments*. In 1582 he was Master of the Stationers' Company. He died July 23, 1584. The musical works printed by Day were:

1560. 'Certaines notes set forth in foure and three parts to be song at the morning, Communion and evening praler, very necessary for the Church of Christe to be frequented and used: & unto them added diuers godly psalms & Psalmes in the like forme to the honor & praise of God.' Imprinted at London ouer Aldersgate beneath S. Martyns by John Day, 1560. Cum gratia & privilegio Regie Maiestatis.
A medium partbook of this edition is in the British Museum (E.7.s 7), and a bassus partbook is in the Bodl. Lib., O. (Douce B 248). This was reprinted in 1625, with a fresh title-page containing an engraved portrait of the printer and his initials at the bottom, under the new title 'Morning and Evening prayer and Communion, set forth in foure partes, to be song in Churches, both for men and children, with diuers other godly psalms & Anthems, of sundry mens doynages. Imprinted . . .'

1560. 'Psalmes of David in Englishe Metre by Thomas Sternaholde, and others . . .' (see *PSALTER*).
1562. 'The whole booke of Psalmes collected into Englysh Metre . . .' (see *PSALTER*).
1563. 'The whole psalmes in foure partes . . .' (see *PSALTER*).
1567 (or 8). 'The whole Psalter translated into English metre . . .' (see *PSALTER*).
1579. 'The Psalmes of David . . .' (see *PSALTER*).

W. H. H.; rev. J. M.^E.

DAZA (DAÇA), ESTEBAN (b. Valladolid, mid. 16th cent.), a Spanish lutenist who published in 1576 a book in tablature entitled:

Libro de Musica en cifras para Vihuela, intitulado el Parnasso, en el qual se hallara toda diuersidad de Musica, assi Motets, Sonetos, Villancas, en lengua Castellana, y otras cosas, como Fantasia del Autor, hecho por Esteban Daza, vezino de la muy insigne villa de Valladolid. . . .
Impresso por Diego Fernandez de Cordona, impressor de su Magestad. Año de M.D.LXXVI. . . . en Valladolid. (Bibl. Nac., Madrid.)

The book is of great interest, since it contains transcriptions for the lute of a number of Spanish madrigals and *villancicos*, the original voice-parts being found, in many cases, in other printed works and MSS. The following composers are represented:

RODRIGO COWALLON

5 madrigals (4 v.), original parts in Medinaceli MSS. 12,230, and an alto partbook in the library of Sir Percy Wyndham, Petersfield. The words of one, 'Quan bienaventurado,' are taken from Garcilaso de la Vega (*Ecolage* IV.), one of the greatest of Spanish poets.

FRANCISCO GUERRERO

2 madrigals (4 v.), originals in Medinaceli MS., and Guerrero's 'Cantones y villancas espirituales' (Venice, 1599). The beautiful 'Fredo verde y florido' is attributed to Navarro in the Medinaceli MS.

JUAN NAVARRO

2 madrigals (4 v.), originals in Medinaceli MS.

PEDRO ORDOÑEZ

2 madrigals (4 v.), original parts unknown.

JUAN VASQUEZ

3 villancicos (2 for 4 v. and 1 for 5 v.), original parts in 'Re-copilacion de sonetos y villancicos a quatro y a cinco de Juan Vasquez' (Sevilla, 1560), in Medinaceli Library.

VILLALBA

Madrigal, 'Eclarecida Juana' (4 v.), printed in Guerrero's 'Villancas,' in a parody *a lo divino*: 'Eclarecida Madre.'

The collection also includes transcriptions of a number of anonymous *villancicos* for 3 and 4 voices, besides motets, and an unidentified setting of Garcilaso's well-known sonnet, 'Escrito está en mi alma vuestro gesto,' as a madrigal for 4 voices. There are also several fantasias on the Gregorian tones. Daza shows less feeling for the possibilities of the lute, or of the solo song, than his forerunners Luis Milan and Alonso de Mudarra. His 'Parnasso' is frankly a book of transcriptions of favourite music of his day. Examples are given by Morphy, 'Les Luthistes espagnols.' J. B. T.

DEACON, HENRY COLLINS (b. London, 1822; d. there, Feb. 24, 1890), an eminent teacher of singing, studied the pianoforte under Cipriani Potter and singing under Mazzucato. Many of the most famous singers of the day passed through his hands, notably Sims Reeves, who studied his oratorio repertory with Deacon. A serious student of the art of singing in all its branches, Deacon contributed the majority of the articles thereon to the first edition of this Dictionary. Moreover, he gave much valued help to Sir Morell Mackenzie in the production of his book *The Hygiene of the Vocal Organs*

Deacon was an excellent pianist and often appeared as accompanist at the Monday Popular Concerts (St. James's Hall). c.

DEANE, THOMAS, Mus.D. (b. latter half of 17th cent.), organist at Warwick and Coventry. He composed a service and other church music, and in 1703 the instrumental music for Oldmixon's tragedy 'The Governor of Cyprus.' He is said to have been the first to perform a sonata of Corelli in England in 1709. Compositions by him for the violin are contained in 'The Division Violin.' He graduated as Doctor of Music at Oxford, July 9, 1731.

W. H. H.

DEBAIN, ALEXANDRE FRANÇOIS (b. Paris, 1809; d. there, Nov. 1877), a keyed instrument maker, originally a foreman in a piano-forte factory. In 1834 he established a factory of his own, and distinguished himself by the invention of several musical instruments, amongst others the Harmonium, or 'orgue expressif,' patented 1842, Antiphonel (1846) and Harmonicorde (1851). His death involved the disappearance of the factory, but the mark of his instruments is now in the hands of the firm of Chaperon, Paris. (See HARMONIUM.)

BIBL.—CONSTANT PIERRE, *Les Facteurs d'instruments de musique: les luthiers et la facture instrumentale* (1893).

M. L. P.

DEBORAH, an oratorio by Handel, the words by Humphreys; completed Feb. 21, 1733; first performed at the King's Theatre, Haymarket, Mar. 17, 1733; revived by the Sacred Harmonic Society, Nov. 15, 1843.

DEBRNOV, pseudonym of SRB, Josef (q.v.).

DE BUSNE, see BUSNOIS.

DEBUSSY, CLAUDE ACHILLE (b. St. Germain-en-Laye, Aug. 22, 1862; d. Paris, Mar. 26, 1918), the most influential French composer of his generation and the founder of modern musical impressionism.

Debussy's family circle, of the normal bourgeois type, was in no way specially musical, and he showed no capacity for music until he was 10 years old, when his future interests, uncertain though they still were, found a first recogniser in Mme. Mantet, the mother-in-law of Verlaine, with whose poetry he was afterwards so intimately associated. He entered the Paris Conservatoire in 1873, and remained there for eleven years, studying the piano with Marmontel and theoretical subjects with Guiraud (his chief composition master), Lavignac, Massenet and Durand. For a long while the routine work was distasteful to him, though from time to time he won various prizes and medals for piano, for accompaniment, and for counterpoint and fugue; he finally, in 1884, obtained the highest honour in the Conservatoire's gift, the Grand Prix de Rome (for which he had been *proxime accessit* the previous year), with the cantata 'L'Enfant prodigue.'

Already, in 1879,¹ Debussy had widened his interests by a summer's residence at Moscow with the family of an engineer. A residence of considerable duration in Italy was required of the holders of the Prix de Rome, and Debussy duly undertook it; but, the prescribed course once completed, he returned to Paris and settled down to the composer's career to which (apart from occasional journalistic activities) he confined himself for the remainder of his life. Of a very retiring disposition, he never held any official appointments and rarely appeared in public, whether as conductor or as pianist: he was seen in the London concert world twice, conducting the Queen's Hall Orchestra on Feb. 1, 1908, in his 'L'Après-midi d'un faune' and 'La Mer,' and on Feb. 27, 1909, in the former of these works and the three 'Nocturnes.' Towards the end of his life he suffered much from ill-health, and composed very little.

Roughly speaking, we can distinguish three successive periods in Debussy's compositions: first, the period of immaturity up to about 1890, then some twenty years of mature work, and then a few final years of uncertainty mixed with decline; though, indeed, the early immaturity varies very much. The song 'Nuit d'étoiles,' Debussy's earliest surviving composition, is a vigorous bit of work for a boy of 14, but its commonplaces are of a curiously Teutonic tinge; 'L'Enfant prodigue,' eight years later, is certainly very French, but it cannot rank as more than a dexterous eclectic exploitation of some of the obvious fashions of the moment: but half-way between we find such songs as 'Mandoline,' which says a new thing with great charm, and the still more significant 'L'Ombre des arbres dans la rivière,' which speaks its composer's mature idiom though not indeed yet using it to any specially noteworthy end; while there is an anecdote that, some two years before the Prix de Rome was won, Debussy submitted a score (now apparently lost) based on Banville's *Diane aux bois* to his teacher Guiraud, who, while expressing strong personal interest, discouraged revolutionary ideas as temporarily unwise. Student days being past, Debussy felt freer to follow personal inclinations; but he was still not sure of his paths. Most of the numerous piano pieces up to 1890 are only instrumental versions of the facile graces of the airs of Azael and Lia in 'L'Enfant prodigue,' nor is there any advance as yet in pianistic technique: but there is no trace whatever left of the prize cantata in the two works of 1887 which, as prize-winner, he submitted to the members of the Institute. One, a setting for female voices and orchestra of

¹ This is the date given in the essay on Debussy in Jean-Aubry's *La Musique et les nations* (1922). The authorities differ, some (including Jean-Aubry himself in an essay of 1906) dating the journey to Russia after that to Italy.

portions of Rossetti's *The Blessed Damozel*, was accepted by them, though with serious qualms; but they definitely rejected as unplayable the 'Printemps' symphonic suite, less polished but still more unusual, and forecasting in many technical details the orchestral masterpieces of the succeeding years.

With the five Baudelaire songs (1890) Debussy entered on his mature period. It was not one of fixation—in some fields his development went on, in others it fell back a little: but all through there is the same masterful technique, specialised indeed, but as solidly founded as any composition technique, even of the greatest men, has ever been. The chief landmarks for the first ten years are the string quartet in G minor, the 'L'Après-midi d'un faune' prelude and the three 'Nocturnes' for orchestra, and the 'Chansons de Bilitis'; for the latter ten years, the opera 'Pelléas et Mélisande,' the orchestral suite 'La Mer,' the best of the Verlaine songs and the settings, both solo and choral, of the poems of Villon and Charles duc d'Orléans, and such piano pieces as the 'Estampes' and 'Images' and the first set of Preludes. The dividing-line may perhaps best be drawn between the two sets of Preludes,¹ and then come the few final years of mixed achievement, showing at times some of the old certainty and also some tentative exploration of new fields, but, in the main, evidences of a stiffening mind and failing powers.

Debussy's piano music has probably done most towards the wide extension of his fame among the generality of music-lovers; and it is indeed, in its mature forms, very typical of his genius. Technically he is the inventor (so far as any individual can claim such a title) of a new pianism; he demands from both the fingers and the feet of his interpreters (as well as from their rhythmical sense) all sorts of refinements previously unexploited, and his influence has been amazingly fertile—no composer in musical history has taught the pianist more new and permanently valuable things. The non-technical influence is less steady. Not infrequently, as for example in 'Et la lune descend sur le temple qui fut' or 'Brouillards' or 'Feux d'artifice,' Debussy seems merely to brood on problems of harmony and colour in, so to speak, an intellectual vacuum, and most (though not indeed all) of the Studies—his latest piano works—seem musically overmuch concerned with the narrow matter in hand. But the outstanding things—'La Soirée dans Grenade,' 'Reflets dans l'eau,' 'Poissons d'or,' 'The snow is dancing,' 'The little shepherd,' 'Les fées sont d'exquises danseuses,' 'Bruyères,' and the masterpieces that form a good two-thirds of the first set of Preludes and

reach their climax in the noble 'La Cathédrale engloutie'—show how versatile his imagination, at its best could be. It is not indeed ('Bruyères' and 'La Cathédrale engloutie' apart) large-scale work for the pianist accustomed to deal with the emotional and intellectual tasks set him by the older classics; it is rather, to speak analogously, a gallery of beautiful sketches ready for him to paint with all the subtlest colours at his command. The word atmosphere is now continually on our lips in talking either of performance or of the music performed; it is to Debussy, wellnigh exclusively, that we owe the conception.

Debussy's finest other instrumental work—the orchestral 'L'Après-midi d'un faune,' 'Nuages' and 'Fêtes,' and the string quartet (in its first three movements)—dates from the decade before the outstanding piano pieces and took the lead in establishing his reputation; here again he taught performers a new technique that now serves them every day, and a new outlook on very beautiful and (for the moment) very strange things. Later on he seems to have taken more lively interest in other departments—though 'Iberia' is a notably brilliant amplification of the moods of 'La Soirée dans Grenade': 'La Mer' seems like a rather tired version of ideas more freshly expressed in the 'Nocturnes,' and in the latest chamber music, in spite of the dignity of the first movement of the violoncello sonata and the quiet charm of much of the sonata for flute, viola and harp, it is often, as André Suarès says,² 'la douleur qui parle.' In 1912 the fashion of the moment induced Debussy to write for the Russian Ballet; 'Jeux' is a lengthy work with rather larger structures than he normally employed, but musically it comes to little.

In his songs (always duets for voice and piano on level terms) Debussy is rather less of a definite innovator, conditioned as he is by the particular words and by the general literary culture always very powerful with French composers. We can see three separate stages of what may be called the very high-class sentimental song in 'Romance' (1887), 'Green' (1903 or earlier) and 'Je tremble en voyant ton visage' (1910); only the last of these has, in every bar, the perfectly mature harmonic framework, but all—very beautiful songs in their several ways—have the same kind of emotional outlook, which they share in common with much other French work. The most individual of his 'love songs' are probably the first two of the 'Chansons de Bilitis,' the very sensitive 'La Flûte de Pan' and the passionate 'La Chevelure'; but other types of words generally produce more purely personal moods. From the Baudelaire and

¹ According to Jean-Aubry, the second set dates, like the first, from 1910; but they were not published till 1913.

² Supplement to *La Revue musicale* (Dec. 1920): Suarès's lengthy essay has been separately reprinted.

Verlaine songs there stand out the grave 'Recueillement,' the weirdly tragic 'Colloque sentimental,' and the varying humours of 'Fantoche,' 'Chevaux de bois' or 'Le Faune'; the old-world poems of Charles duc d'Orléans (some set as solo songs and some chorally) evoke the freshest and most open-air music Debussy ever wrote, and he reached his climax as a song composer in the three splendid Villon ballades, which express the most opposite emotions with equal subtlety and power.

Debussy's important works for voices and orchestra are three, one from each of the periods. 'La Damoiselle élue,' though its style is slight and not always quite sure of itself, is a work of singular virginal beauty, perfectly fitting the rather inadequate translation of Rossetti's poem; it seems to forecast developments that never occurred. A quarter of a century later there is the elaborate music to d'Annunzio's *Le Martyre de Saint Sébastien*, aiming at all sorts of things new and old, but, practically always, sounding like the work of a tired man. And in between comes Debussy's largest and, with all its inequalities, most completely self-revealing achievement, the lyrical drama to Maeterlinck's *Pelléas et Mélisande*. Apart from the superbly sure and economical craftsmanship, it is one of the great landmarks in the history of opera; it is the summit of musical impressionism, catching every faint nuance of the words, always suggesting rather than saying, but always tense and direct, and full of throbbing beauty.

Speaking of Debussy's work as a whole, we may say that his harmonic methods were a very individual amalgam of the new and the forgotten old. On the one hand he was greatly attracted by the combinations of the higher overtones, by chords of the ninth and their derivatives treated as primaries, and in particular by chords whose component notes are separated by whole tones; on the other hand he often threw back to the ecclesiastical modes and still further to the diaphony in parallel fourths and fifths of a thousand years before. The resulting idiom had very rich possibilities within its sphere; but, as his inferior pages show only too well, its limitations were rigidly definite. Much of his vocal writing in its technical aspect is essentially the Wagnerian melos in a French dress, and in 'Pelléas' (enormously more reticent though it is) there is much of the technique of 'Tristan' or the 'Ring' in contrapuntal texture and in the subtle use of leading motives. The Russian composers he greatly admired, but they affected his style only very indirectly; more noteworthy is the influence, on his piano music in particular, of the cool, collected, dainty filigree work of the 18th-century French clavecinists. His was a multiple personality, liable to out-

bursts of a sort of posing freakishness¹ and curiously capable now and then² of feeling *le besoin de s'encanailler*, in elegant fashion; but in the main it was quietly voluptuous, sensitive in an altogether exceptional degree to new delicate subtle types of beauty, and caring little for other things. But, at the end, we cannot leave under the name of voluptuary the creator of 'La Cathédrale engloutie' and the scene of Mélisande's death; his world may have been small, but in it he was a great man, and sometimes he saw beyond.

Debussy's journalistic productions, though slight in texture, may be read with considerable interest; they turn phrases very happily, and there is plenty of sober good sense under their wit and irony. The words of his 'Proses lyriques' show also that he could imitate skilfully the symbolist poets of his intellectual circle.

The following list of Debussy's compositions is based, with a few modifications and amplifications, on a list (to which the writer desires cordially to express his indebtedness) printed in the appendix to G. Jean-Aubry's *La Musique et les nations* (J. & W. Chester, 1922). The dates given by Jean-Aubry are not those of publication, which are very often misleading, but, as far as possible, those of composition; he observes, however, that for the early works (particularly, up to 1890 or so, those for piano) they must be regarded as merely approximate. A letter that he prints from the composer to himself (written in 1907) makes it plain that Debussy's own chronological memory was very vague.

LIST OF WORKS

- 1876 Song: 'Nuit d'étoiles' (Th. de Banville).
 1878. Songs: 'Beau soir' (Paul Bourget); 'Fleurs des blés' (Girod).
 1880. Songs: 'Mendoline' (Verlaine); 'L'Ombre des arbres dans la rivière' (Verlaine).
 1884. Cantata ('Poème lyrique') for soli, chorus and orchestra.
 'L'Enfant prodigue' (E. Guiraud).
 1886. Symphonic poem for orchestra, 'Almanzor' (after Heine).
 1887. Symphonic suite for orchestra, 'Printemps'.
 " 'Poème lyrique' for female voices (solo and chorus) and orchestra: 'La Damoiselle élue' (Rossetti).
 " Three songs: 'La Belle au bois dormant', 'Voici que le printemps', 'Paysage sentimentale'; songs: 'Les Cloches' (Bourget), 'Romance' (Bourget).
 1888. Two Andantes for piano.
 " 'Petite suite' for piano duet: 'En bateau', 'Cortège', 'Menuet', 'Ballade'.
 1889. Fantasia for piano and orchestra.
 1890. For piano: 'Suite bergamasque' ('Prélude', 'Menuet', 'Clair de lune', 'Faschiel'), 'Ballade slave', 'Rêverie', 'Valse romantique', 'Nocturne', 'Danse (Tarantelle styrienne)'.
 " Five songs (Baudelaire): 'Le Balcon', 'Harmonie du soir', 'Le Jot d'eau', 'Recueillement', 'La Mort des amants'.
 No. 3 also with orchestra.
 1891. Mazurka for piano.
 " 'Scottish March on a Popular Tune (The Earl of Ross's March)', for orchestra.
 " Songs: 'Dans le jardin' (Paul Gravellet), 'Les Angelus' (G. Le Roy); three songs (Verlaine): 'La Mer est plus belle', 'Le Son du cor s'affaïe', 'L'Éclatement des haies'.
 1892. Songs: 'Fêtes galantes' (Verlaine)—'En sourdine', 'Fantoche', 'Clair de lune'.
 1903. Quartet for strings.

¹ Such as, for example, the use of the English language (not always perfectly expressed, e.g. 'Serenade for the doll') merely as something chic; or the childish nationalism plus 18th-century typography of the title-pages of the late sonatas.

² E.g. 'General Lavine—eccentric'.

³ Written 'vers 1880' (G. Jean-Aubry, *La Musique et les nations*, p. 50).
⁴ Published on Feb. 12, 1889: the date of 1904 given by Jean-Aubry is presumably a misprint.

- 1892-94. *Elogue for orchestra*: 'Prélude à l'Après-midi d'un faune' (after Mallarmé).
- 1894-98. *Songs*: 'Fosses lyriques' (Claude Debussy)—'De rêve,' 'Le givre,' 'De jours,' 'De soir.' Nos. 2 and 4 also with orchestra.
1898. *Songs*: 'Chansons de Bilitis' (Pierre Louys)—'La Flûte de Pan,' 'La Chevalière,' 'Le Tombeau des Nalades.'—'L'Éclair.'
- 1897-99. *Incidental music to* 'Rol Léar.'
1899. *Three 'Nocturnes' for orchestra*: 'Nages,' 'Pêches,' 'Sirènes.'
1901. 'Pour le piano' ('Prélude,' 'Sarabande,' 'Toccata').
- 1892-1904. *Lyrical drama*, 'Pelléas et Mélisande' (Maeterlinck).—'C'est l'exécute,' 'Il pleure dans mon cœur,' 'L'Ombre des arbres dans la rivière' [No. 3 dates from 1890; see above].
- 1888-1903. *Six songs* (Verlaine): Nos. 1-3, 'Ariettes oubliées'—'C'est l'exécute,' 'Il pleure dans mon cœur,' 'L'Ombre des arbres dans la rivière' [No. 3 dates from 1890; see above].
1890. 4, 'Paysages belges—Chevaux de bois'; Nos. 6-9, 'Aquarelles'—Green, 'Spieken.' [Published under the general title of 'Ariettes oubliées'.]
1903. *For piano*: three 'Estampes'—'Pagodes,' 'La Soirée dans Grenade,' 'Jardins sous la pluie'; 'D'un cahier d'esquisses.'
1904. *Songs*: 'Fêtes galantes' (Verlaine), second series—'Les Ingénus,' 'Le Faune,' 'Colloque sentimental'; three 'Chansons de France'—Rondelet, 'Le temps a laissé son manteau' (Charles duc d'Orléans), 'La trêve' (Tristan Lhermitte), 'Rondelet,' 'Pour ce que l'Alceste est morte' (Charles duc d'Orléans).
- " 'Dames' ('dame sacrée,' 'dame profane') for chromatic harp and string orchestra.
- " *For piano*: 'Masques,' 'L'île Joyeuse.'
- 1903-05. 'La Mer,' three symphonic sketches for orchestra: 'De l'aube à midi sur la mer,' 'Jeux de vagues,' 'Dialogue du vent et de la mer.'
1905. Three 'Images' for piano: 'Reflets dans l'eau,' 'Hommage à Rameau,' 'Mouvement.'
1907. Three 'Images' for piano, second set: 'Cloches à travers les feuilles,' 'Et la lune descend sur le temple qui fut,' 'Folies d'été.'
1908. 'Children's Corner' suite for piano: 'Doctor Gradus ad Parnassum,' 'Jinbo's lullaby,' 'Serenade for the doll,' 'The snow is dancing,' 'The little shepherd,' 'Gollwog's cake-walk.'
- " Three songs for chorus of mixed voices, unaccompanied (Charles duc d'Orléans): 'Dien,' 'qu'il la fait bon regarder,' 'Quand j'ay oüy le tabourin,' 'Yver, vous n'êtes qu'un villain' [No. 2 is for contralto solo with choral accompaniment].
1909. Three 'Images' (third set), for orchestra: 'Gigues,' 'Iberia,' 'Rondes de printemps.'
- " 'Hommage à Haydn,' for piano.
1910. *Rhapsody for clarinet and orchestra*: 'Petite pièce' in B flat for clarinet and piano.
- " Three ballads (Francis Villon) for voice and piano, also with orchestra—'Ballade de Villon à sa mère,' 'Ballade que fait Villon à la requête de sa mère pour prier Notre-Dame,' 'Ballade des femmes de Paris,' 'Le Promeneur des deux amants'; three songs (Tristan Lhermitte)—'Après de cette grotte sombre' [identified with 'La grotte' of 1904, see above], 'Cruel ton conseil, chère Clémence,' 'Je tremble en voyant ton visage.'
- " *For piano*: 'La plus que lente,' valse; 'La Boîte à joujoux,' ballet for children; twelve 'Préludes' (first set)—'D'un seigneur de Daphné,' 'Volées,' 'Le Vent dans la plume,' 'Les sons et les parfums tournent dans l'air du soir,' 'Les Collines d'Anacapri,' 'Des pas sur la neige,' 'Ce qu'a vu le vent d'Ouest,' 'La Fille aux cheveux de lin,' 'La Sérénade interrompue,' 'La Cathédrale engloutie,' 'La Danse de Puck,' 'Minstrels'; twelve 'Préludes' (second set)—'Brouillards,' 'Feuilles mortes,' 'La Puerta del Vino,' 'Les fées sont des esquisses d'oiseaux,' 'Bruyères,' 'General Lavine—eccentricité,' 'La Terrasse des audiences du clair de lune,' 'Gondine,' 'Hommage à S. Pickwick Esq., P.P.M.P.C.,' 'Canope,' 'Les Tierces alternées,' 'Feux d'artifice.'
1911. *Incidental music to* 'Le Martyre de Saint Sébastien' (Gabriele d'Annunzio).
1912. 'Jeux,' ballet; 'Khamma,' 'Légende dansée.'
- " *Pieces for solo flute*, as *Incidental music to* 'Psyche' (Gabriel Mourey).
1913. Three songs (Mallarmé): 'Sourire,' 'Placet futile,' 'Eventail.'
1914. 'Berceuse héroïque' for piano, also for orchestra.
1915. *Song*: 'Nuit des enfants qui n'ont plus de maisons' (Claude Debussy).
- " 'En blanc et noir,' three pieces for two pianos.
- " Six 'Épigraphes antiques' for piano duet: 'Pour invoquer Pan, dieu du vent d'été,' 'Pour un tombeau sans nom,' 'Pour que la nuit soit propice,' 'Pour la danseuse aux crotales,' 'Pour l'Égyptienne,' 'Pour remonter la pluie au matin.'
- " Twelve 'Études' for piano solo, dedicated to the memory of Chopin.
- " *Sonata for violoncello and piano*.
1916. *Sonata* for flute, viola and harp.
- 1916-17.² *Sonata* for violin and piano.

Debussy edited for Messrs. Durand the complete piano works of Chopin and also Bach's sonatas for violin and piano: he transcribed Schumann's 'Am Springbrunnen' for piano solo, Saint-Saëns's 'Caprice sur les airs de ballet de l'Alceste de Gluck' for piano duet, Schumann's six 'Studies in canon form, op. 56,'

Saint-Saëns's second symphony in A minor, ballet airs from *Étienne Marcel*, and 'Introduction and rondo capriccioso,' and Wagner's overture to 'Der fliegende Holländer' for two pianos, and Nos. 1 and 3 of Satie's 'Gymnopédies' for orchestra.

His literary works consist of contributions (54 in all) to *La Revue blanche* (Apr.-Dec. 1901), *Gil Blas* (Jan.-June 1903), *Musica* (Oct. 1902, May 1903), *Le Mercure de France* (Jan. 1903), *La Revue bleue* (Mar., Apr. 1904, June 1906), *Le Figaro* (May 1908), *Comœdia* (June 1908, Nov. 1909, Jan. 1910), *Le Paris-Journal* (May 1910), *S.I.M.*³ (Nov. 1912-Mar. 1914); he also wrote a preface to *Pour la musique française* (1917). A considerable number of the articles contributed to *La Revue blanche* and *Gil Blas* were collected with his sanction, and posthumously published under the title of *Monsieur Croche anti-dilettante* (Dorbon, 1921): 'Monsieur Croche' is an imaginary interlocutor invented for dramatic purposes.

The Debussy literature is as yet small in extent, and most of it is slight in quality. Attention may specially be directed to the elaborate Supplement to *La Revue musicale* (Dec. 1920), containing detailed essays on various aspects of the composer's life and music by Jean-Aubry, Cortot (a very interesting discussion of the piano works), de Falla, Godet, Ingelbrecht, Laloy, Peter, Suarès, etc., and to the essay in Jean-Aubry's *La Musique et les nations* (1922): among English publications mention may be made of Ernest Newman's valuable articles in the *Musical Times* (May and Aug. 1918), and of some pages of luminous criticism in J. D. M. Rorke's *A Musician's Pilgrim's Progress* (1921).

DECANI, see CANTORIS.

DECLAMATION, DECLAMATORY. Both these words imply a condition of things in which the words are of primary, the music of secondary, importance. They are used in several special senses.

(1) 'Declamatory' music, whether in opera or not, is always more or less dramatic; in moments of excitement, of anger, or even of rapture it is the custom to allow the voice to approach near the confines of speech as distinguished from song, and to abandon the pure vocalisation which is generally associated with lyrical utterance. Thus the 'declamatory' and 'lyrical' styles are often opposed to each other in ordinary parlance. The contralto part

¹ Harold Bauer told the writer that Debussy, though assured (before publication) of his error, insisted that Jinbo, not Jumbo, was the famous elephant's real name.

² 'Hiver, 1916-17' is the date inscribed on the music: there is nothing dating from the last twelve months of Debussy's life.

³ The journal of the Paris section of the International Music Society.

in 'Elijah,' for example, requires both styles, the former for the air 'Woe unto them' and the scene of Jezebel, the latter for 'O rest in the Lord.'

(2) 'Declamation' is often used as the equivalent of the German 'Melodram' (see MELODRAMA).

(3) For 'Declamation' when used to describe the correct adjustment of musical and literary accent, see ACCENTUATION.

DECRESCENDO, decreasing—the opposite of crescendo—consists in gradually lessening the tone from loud to soft. It is also expressed by *dec.*, *decresc.*, and by the sign \rightrightarrows .

DEDEKIND, (1) CONSTANTIN CHRISTIAN (b. probably Reinsdorf, Anhalt-Cöthen, Apr. 2, 1628; d. Dresden, 1697). His father, Stephan (d. 1636), was pastor of Reinsdorf. Constantin was a pupil of Christoph Bernhard (vice-Kapellmeister in Dresden, appointed cantor in Hamburg, 1664).

From 1654 he was a member of the Dresden Hofcapelle; in a 1663 list of the 'Choralisten' his name appears among the basses. From 1666 to about 1676 he was Konzertmeister, which meant at first that he was to direct the 'kleine deutsche Musik' in the Schlosskirche; but later on the capelle was divided, the Italian singers were placed under the Kapellmeister, the German singers, cantor and organist under the Konzertmeister. He was a member of the Elbischen Schwanen-Orden, and took the pseudonym of *Concord*, usually written 'Con Cor D' or 'Con Cor Den,' as in the volume of poems '1681 Jahres ausgegäben von Con Cor Den.' He held the position of Steuer-Einnehmer (collector of taxes) in Meissen and the Erzgebirge. Judged by the number of his works, he was very popular both as poet and composer at the Dresden court. He was said to be particularly successful in arranging the words for sacred musical dramas, such as: *Neue geistliche Schauspiele, bequemt zur Musik* (Dresden, 1670 and 1676, 8vo); *Freuden- und Trauerspiel über die Geburt Jesu* (Dresden, 1670, 8vo); *Heilige Arbeit über Freud und Leid der alten und neuen Zeit, in Musik bequemen Schauspielen angewendet* (Dresden, 1676, 8vo); *Alles und neues in geistlichen Singspielen vorgestellt* (Dresden, 1681, 8vo). The letters K. G. P. and K. S. C. after his name mean 'Kurfürstlicher gekrönter Poet' and 'Kurf. Sächsischer Concertmeister'; they occur in the title-page:

Des Durchleuchtig Hochgebohrnen Fürsten, Herrn Friedrich Wilhelms, des jüngern Herzogs zu Sachsen elfften Geburtstags 1687, mit einem Singspiele . . . von C. C. Dedekinden, K. g. F. und K. S. C. Dresden, 4to.

LIST OF WORKS

1. J. Katzens Aelteren Spiegel aus desselben Holländischem gehoochdeutscher durch C. C. D., 1664. Dresden, 8vo.—Zustagen nach ihrer eigenen Zustimmung, with the music. In one volume with 'J. Katzens Maanisse u. Sofonias' and 'Holländischer Ehe-Betrug' gehoochdeutscher durch C. C. D. Later editions in 1668 and 1669.

2. C. C. D. Churf. Sächs. Hofmusici Aelbischen Museen-Lust in 160 unterschiedlicher berühmter Poeten auserlesener, mit anmuthigen Melodien besetzten Lust-Ehren-Zucht- und Tugend-Liedern bestehend. Dresden, Wolfgang Seyffert, 1657, obl. 4to. Four parts in one volume, the melodies by C. C. D. At the beginning a

letter was printed from Heinrich Schütz (Kurfürstl. Kapellmeister in Weissenfeld), to C. C. D., 'gekrönter Poet,' stating that he considered both poetry and music well worthy of publication; dated Sept. 2, 1657. Another edition: 'Darinnen 176 der besten Dicht-Meistern anmuthige Zucht- und Tugend-Lieder unter anständige Arten gelegt.' Leipzig, Georg Elsin. Froman, 1665.

3. Geistliche Erdlinge in einstuynigen Concerten gesetzt. Dresden, Seyffert, 1682.

4. Die doppelte Sangzälle worinnen XXIV. Davidische Psalmsprüche in einstuyniger Partitur nach allen Sächtmännischen und heutigen Capell-Meister enthalten. Leipzig, Christian Kirchner, 1665, fol.

5. Davidische geheime Musik-Kammer, darinnen XXX. Psalmsprüche enthalten. Dresden, Seyffert, 1663, fol. Another edition. Frankfurt, Caspar Wachter, 1665, fol.

6. Stüber Mandel-Körnen erstes und zweites Pfund von ausgewählten Salomonischen Liebes-Worten in XV. Gesängen mit Vohr-Zwischen- und Nach-Spielen auf Violinen zubereitet. Dresden, Seyffert, 1664, fol., 2 vols. Another edition: Erstes und anderes Pfund sasser von Jesus Liebe, wie auch erstes und anderes Pfund bitter von Jesus Leiden handelnder Mandel-Körnen, diese mit 3 Violon, jene mit 2 Violinen und einem Fagotto, zu den auserlesenen poetischen Liedern vierstuynig gesetzt, mit vor-zwischen- und nach-Spielen. Frankfurt, Caspar Wachter, 1666, fol. and 4to (Göhler).

7. Aelbischen wertester Hirtenknabe Flureto. Dresden, 1665, fol.

8. Davidischen Harfen-Spiel d. l. der ganze Psalter, in neue Lieder, nach densen evangelischen Kirchenmelodien abgefaßt, und mit ausgewählten wohlklingenden Gesangsweisen versehen. Frankfurt, Caspar Wachter, 1665.

9. Belebte oder ruckbare Myrrhen-Blätter das sind zweistimmig besetzte heilige Leiden-Lieder. Dresden, Seyffert, 1666, fol., pp. 82. C. C. D. described these duets as 'nicht so gahr gemeine, sondern mit Kunst-ehrigem, und Wort-mäßigen Melodien versehenen Lieder' ('not ordinary songs, but provided with artistic melodies suitable to the words').

10. Davidischer Harfenschall mit schönen Melodeien gezieret. Frankfurt, C. C. Wachter, 1670, 12mo.

11. C. C. D.'s Kurfürstl. Sächs. bestallten deutschen Concert-Meisters sonderbahrer Seelen-Freude, oder kleinerer geistlichen Concerten, Erster Theil. Dresden, Seyffert, 1672 4to, 6 partbooks. Published in two parts.

12. C. C. D.'s Musikallicher Jahrgang und Vesper-Gesang von dreien Theilen darinnen CXX. auf Eign-Fest- und Apostel-Tage, geschicklich auserlesene, zur Sänger-Übung, nach rechter Capell-Meister gesetzte Deutsche Concerten durchgehends mit zweien Dissonanten beendlichen. Dresden, Paul August Hamann, 1673, 4to, 6 partbooks. These concertos are so arranged that 'ein Compontist . . . solche mit ein paar Violinen zur mehreren Anmuth, auch mit einem singenden Basso ausschmücken kann' ('a composer can give them much charm by the addition of some violins or a singing Basso'). Later editions 'in zwei Singstimmen und der Orgel' in 1676 and 1694.

13. Königs Davidis Guldnes Kleinod, oder hundert und neunzehn der Psalm, nach eigener Abtheilung, in zwei und zwanzig Stücken, mit dreien Chören dreien Singen, dreien Instrumental- und vier auszuwählenden Capell-Stimmen, compontirt von C. C. D. der Zeit Kurf. Sächs. bestellten deutschen Concertmeister. Dresden, Hamann, 1674-75, 4to, 11 partbooks.

14. C. C. D.'s Singende Rom- und Fest-Tags Ahndachten. Dresden, Michael Günther, 1683, 4to.

15. J. Frentzel, A. et O. Jesus! Zehen andachtige Buss-Gesänge . . . nicht nur wie zuvor mit bekannten sondern auch mit Herrn Const. Christ. Dedekindens . . . neu beigefügten Melodeyen herfür gegeben. Leipzig, 1658, 8vo.

16. Geschwinder und selbiger Abschied, der . . . Frauen Annen Margareth . . . Metzner am 8 Wintermonats, 1670 . . . am 15 beendigt. Dresden, Seyffert. 'Herr Jesu wer dir lebst, 8 Strophen in 4 parts with Basso Continuo, fol.

17. Gottes stäte Liebe . . . wegen der . . . Fru Annen Sibyllen . . . des Herrn Paul Hofmanns . . . Ehe-Liebten . . . 1664. Dresden, Seyffert, fol. 'Was ihr jetzt vertraut der Erden, 8 Strophen in 4 parts, with Basso Continuo.

In the dedication to a book of poems 'wegen allgemeiner Pest-Noht-gepflogen und entworfne Buss- und Dank-Bäht- und Lob-Ahndachten ausgegäben' (Dresden, Christoph Baumann, 1681, 12mo), addressed to Johann Georg III. of Saxony, C. C. Dedekind says 'sie werden nicht verschmähen das graue Alter des Unverdrossensten welcher die hohe Kurfürstl. Gnade nun 35 Jahre genossen' (dated Sept. 7, 1681).

(2) HEINRICH (EURICUS) (b. Neustadt, Bavaria, 1585; d. 1619), a brother of Hennig Dedekind, was a scholar in Lüneburg, and later cantor of the Johanniskirche there (c. 1585-92).

LIST OF WORKS

1. Neue Teutsche Liedlein, aus den zwölf ersten Psalmen Davids und andern Sprüchender Schrift genomen, und mit dreien Stimmen gesetzt durch Euricum Dedekindum Cantor zu Lüneburg zu S. Joh. Diaconum. Gedruckt zu Ulissen bey Michel Kröner, 1585, obl. 4to (B.M.).

2. Antidotio, adversus vitæ hominum Passiones, 4 v. Ulyssae, Michel Kröner, 1589. (*Elisae*.)

3. Evangeliorum, quae dicitur Dominici et Petri praecipua in Eccl. De quoniam uisitata proponi solent, perchoae breves ab

Adventu Dom. usque ad Festum Paschalis 4 et 5 vocibus compositae ab Euriolo Dedekind Neostadino. Scholae Lüneburg ad D. Joannem Cantorē. Ulyssae, 1692, 8vo. (Göhler.) An 'Altera pars Evangeliorum' appeared without date.

(3) HENNING (*b.* probably Neustadt, 1583; *d. circa* 1630), a son of Friedrich Dedekind (author of *Grobianus*; pastor of St. Michael's, Lüneburg), was cantor at the School in Langensalza, Thuringia, in 1588; Prediger there in 1614; and Pfarrer at Gebsee, Thuringia, in 1622.

LIST OF WORKS

1. ΔΔΔΕΚΑΤΟΝ Μουσικὸν Τριώνιον novis Hædemque Ipelestis exemplis illustratum. Neue ausserlesene Tricinia, auf trefflich lustige Texte gesetzt, aus etlichen guten, doch bisher nicht publicierten Autoribus zusammen gelesen und jetzt erstmals den Liebhabern der Music zu gefallen in den Druck verfertigt, von Henning Dedekindo, Musice Studio. Erfurt, Georg Baumann, 1588, obl. 4to. In the dedication to Ernst and August, Fürsten of Braunschweig and Lüneburg, Henning Dedekind expresses gratitude both for the favour shown to him for that shown by their father Wilhelm to his father 'Friedrich Dedekindo, deren ich auch, als ein Erbe, nicht wenig genossen haben . . . datum in der h.urf. Mächts, Stadt Langensalz am Sonntag Palmarum . . . anno 1588. Henningus Dedekindus, Cantor daselbe.' Three partbooks, in the Berlin Königl. Bibl.
2. Eine Kinder-Musik, für die jetzt allererst anfangenden Knaben in richtige Fragen und gründliche Antworten gebracht. Erfurt, Georg Baumann, 1589, 8vo.
3. Praecursor metricus musicae artis . . . non tam in usum discipulorum quam in gratiam praecceptorum, conscriptus . . . ad nundinas Ligeionis vernas anni hujus 1590. Erfurt, Georg Baumann, 1590, 8vo.
4. Studentenleben, darin allerlei akademische Studenten-Händel mit deutsch poetischen Farben entworfen, in fünf Stimmen gesetzt von Musophilus Dedekind. Erfurt, Joh. Birkner (1627).
5. Jägerleben, darin die Jägersgesellschaft beneben allerlei in Wald und Feld gewöhnlichen Wildjaden mit deutsch poetischen Farben entworfen und repräsentirt; mit fünf Stimmen auf allerlei Instrumente zu gebrauchen, componirt von Musophilus Dedekind. Erfurt, Fried. Melchior Dedekind (1628).
6. ΔΔΔΕΚΑΕ μουσικὰν δολιχαῖον Soldaten-Leben darinnen allerlei martialische Kriegshändel und der ganze Soldatenstand auch was in Feldlagern und Kriegszügen vorleuft, mit deutsch poetischen Farben eigentlich abgetrieben und mit fünf Stimmen zum Gebrauch für allerlei Instrumente vorgesetzt von Musophilus Dedekind. Erfurt, bei Fried. Melchior Dedekind, 1628, 4to.

Zahn gives a melody by Musophilus Dede-kind, 'Gott Vater aller Gültigkeit,' from the 'Gothaer Cantional' II., 1648, p. 324; he suggests that Musophilus may be Henning Dedekind. The MS. of a Kyrie and Gloria from a 6-part Mass, 'In excelsis throno,' by Henning Dedekind, is in the Breslau Stadtbibl. (MS. 100. Six folio partbooks). The title-page of a non-musical work by Henning Dede-kind is of interest as it includes the names of father and son :

Metamorphosis truculenta et subita, quae accidit anno 1685, fœnete Apolline descripta et publicata per Henningum Dede-kindum, neostadianum Saxoniæ, accesserunt epigrammata tria M. Friedrici Dedekindi senioris, Pastoris ad D. Michaelum, Lüneburg. C. S.

DEERING, see DERING.

DEFAUW, Désiré (*b.* Ghent, Sept. 5, 1885), violinist, pupil of Johan Smit. After numerous tours on the Continent he gave his first concerts in London in 1910 with the New Symphony Orchestra. During the war (1914-18) he formed the 'Allied Quartet' with Lionel Tertis, Charles Woodhouse and Emile Doehard, and was heard in many concert rooms, excelling in refinement of tone and style. He subsequently became professor at the Royal Conservatoire at Antwerp and director of the concerts given at the Théâtre des Marais, Brussels, classed among the best given in that city. w. w. c.

DEFESCH, WILLIAM (*d. circa* 1758), a Fleming by birth, was organist of the church of Notre-Dame at Antwerp, and in 1725 succeeded

Alfonso D'Eve as maître de chapelle there, but was in 1731 dismissed on account of his ill-treatment of some of the choir-boys under his charge. He then came to England, and established himself in London, where, in 1733, he produced an oratorio entitled 'Judith,' which enjoyed some degree of popularity, and in 1745 another called 'Joseph.' He was an able violinist and led the band in the first performance of Handel's 'Occasional Oratorio,' Feb. 12, 1746. Whilst at Antwerp he composed a Mass for voices and orchestra. His published works comprise several sets of sonatas and concertos for stringed and other instruments, some solos for the violoncello, a collection of canzonets and airs, and some single songs. (See list in *Q.-L.*) An engraved portrait of him was published in London in 1757. w. h. h.

DEGREE. The word 'degree' is used to express the intervals of notes from one another on the stave. When they are on the same line or space they are in the same degree. The interval of a second is one degree, the interval of a third two degrees, and so on, irrespective of the steps being tones or semitones, so long as they represent a further line or space in the stave. Hence also notes are in the same degree when they are natural, flat or sharp of the same note, as C and C♯, E and E♯; and they are in different degrees when, though the same note on an instrument of fixed intonation, they are called by different names, as F♯ and G♭, C and D♭♭. c. h. h. p.

DEGREES IN MUSIC. The ordinary degrees in music in Great Britain and Ireland are those of Bachelor (B.Mus. or Mus.B.) and Doctor (D.Mus. or Mus.D.); but the University of Cambridge, under its 1893 regulations, and also the University of Wales, grant three degrees—Bachelor, Master and Doctor—the 'Mastership in Music' having, it would seem, been unknown since the 13th century, when some Spanish universities granted that degree. The University of Birmingham grants the degrees of Bachelor and Master, but not that of Doctor. The degree of D.Mus. *honoris causa* has been occasionally given to distinguished musicians, both British and foreign, by various universities, the custom dating from 1871 at Cambridge, and from 1878 at Oxford (there were, however, earlier instances at Dublin and Durham). It has also been given, by special Decree of Convocation at Oxford, and by special Grace of the Senate at Cambridge, to distinguished musicians already connected with those universities. Honorary Masterships and Baccalaureates have also been occasionally conferred.

In their ordinary forms, musical degrees are unknown beyond Great Britain and Ireland, certain British colonies, and the United States of America; but there have been a few examples of foreign honorary doctorates in music, Spontini and Franz having re-

ceived that distinction from the University of Halle, and Andreas Romberg from the University of Kiel—one or two other cases are also known. Generally, however, foreign universities, when honouring musicians, have conferred honorary doctorates in Philosophy, as on Mendelssohn, Schumann, Brahms and others; as in this country the honorary D.C.L. and LL.D. are given to persons entirely unconnected with law, among whom have been several musicians, who have thus sometimes received two honorary degrees from the same university, and frequently the same honorary degree from several—a custom apparently unusual abroad, at any rate with respect to musicians.

UNIVERSITY OF OXFORD.—The history of musical degrees at both the old English universities is consistently anomalous and obscure. Their holders never seem to have been recognised as on the same level as the ordinary graduates; they were never required to reside, and the 'disputation' necessary in early times for all other degrees was never, it would appear, exacted from them. Until past the middle of the 19th century no formal examinations were instituted, and very little regularity of procedure existed, though the Laudian statutes of 1636 made certain provisions which are still in force at Oxford. Sometimes the degrees, especially the Doctorate, seem to have been of a vaguely honorary character, as in the cases of Haydn's D.Mus. and the degree declined by Handel; though they never, except perhaps in the earliest times, were honorary in the strict modern sense. Haydn, for example, having, though the degree was offered, to submit some kind of an exercise. And in the more ordinary cases where the candidate had to support his application by some evidence of work, it took the form of a composition or exercise of no very fixed character, which seems not infrequently to have been considered a more or less formal matter, though we hear of some applicants being rejected, and in the absence of much really definite record it is very difficult to dogmatise. The first Oxford B.Mus. of whom we have knowledge was Robert Wydow (? 1499), the first Oxford D.Mus. Robert Fayrfax (1511); but there is little doubt that the degrees were of considerably older standing. It seems on the whole probable that they originated in the custom of giving degrees in the single arts of the Trivium and Quadrivium, and that they were in some respects similar to the long extinct degrees in grammar, though probably of greater dignity, grammar ranking as one of the arts of the Trivium, and music as one of the higher Quadrivium. The B.Mus. degree conferred at Oxford the right of reading and lecturing on the books of Boethius; the holders of the D.Mus. degree do not seem to have been in any way expected, even formally, to be teachers. As

far as can be gathered, the 'exercise' seems, at first at any rate, to have been regarded not so much as a test of the candidates' qualifications as an element in the music that formed part of the ceremonies at the University 'Act,' and on other public occasions. The 'Music Act,' however, existed to some extent independently of degree exercises; the most important one on record took place in 1733, when Handel was specially invited to conduct several of his oratorios, including 'Athalia,' which was written for the occasion. When the 'Acts' fell into disuse, the performances of candidates' exercises continued as a mere matter of form, independently of public ceremonies, till their abolition in recent years. The 'Music Lecture' or 'Speech' was a survival of the mediæval custom which required all newly appointed Masters of Arts to lecture on each portion of the Quadrivium, and had no original connection with the musical degrees. It seems in very early times to have been unsatisfactory, and was very often excused; later on it came to be given once a year, at the time of the Music Act, the lecturer being, as before, a freshly created M.A. The first regular Lectureship in Music was founded in 1626 by William HEYTHYER; but after the tenure of John Allibond, a Master of Arts of Magdalen, no one could be found to take it, and the stipend was given to the deliverer of the music speech at the Act. Heyther, however, also founded weekly practices of music under a Choragus; the practices were soon dropped, and the Choragus (afterwards, it is uncertain when, called Professor) seems, apart perhaps from examining the candidates' exercises, to have had no particular duties to perform till 1856, when lectures were required from him (Croth had, however, previously given some of his own accord). In 1848 the offices of Professor and Choragus were divided (the latter being practically nominal, and still remaining so); and in 1856 a further office of Coryphaeus or Precentor was instituted, but has since been abolished.

In 1862 the faculty was entirely reformed by Ouseley, who instituted formal examinations for both degrees, and regularised the hitherto very vague 'exercise.' In 1870 candidates were required to matriculate, and in 1877 were further required to pass Responsions or a recognised equivalent: in 1890, however, the University took a regrettably backward step in instituting a special 'Preliminary Examination for Students in Music' as a 'soft option' to Responsions. In 1890 the public performance of the Doctorate exercise was abolished (that of the exercise for the lower degree having been long since excused); and at the same time Stainer instituted various lectures and courses of instruction, given by resident graduates as deputies of the professor—a custom continued by subsequent professors. In recent years the

examinations have, by gradual steps, been considerably modified. Musical graduates still, however, remain members of the University only in a limited sense, the degrees being altogether anomalous among Oxford degrees in waiving the requirement of residence: but the percentages of resident candidates, and also of graduates holding an additional arts degree, have greatly increased of late. The present regulations (1926) are as follows: *For the B.Mus. degree.*—Candidates (who must be matriculated members of a college or of the Non-Collegiate Students) must have passed Responsions or the Preliminary Examination for Students in Music or some equivalent: they must also, in order to qualify for the degree, have either (a) taken a B.A. degree, or (b) passed a 'Final Group' examination in Classics, French, German or English Literature, and also pursued a two years' course of musical study at Oxford or elsewhere, as approved for the purpose by the Board of Studies. (1) First examination, including four-part harmony, four-part modern counterpoint and a *viva voce* examination in general elementary musical knowledge. (2) Second examination, including five-part harmony, five-part modal and modern counterpoint, four-part fugue, original composition, instrumentation, musical history, critical knowledge of two specified works and playing at sight from full score. (3) A musical exercise, which shall be a work for chorus and orchestra, small or large, with or without solo voices, containing a substantial proportion of choral writing. *For the D.Mus. degree.*—Apart from one or two qualifications to meet very exceptional cases, candidates must be either Bachelors of Music, or Masters of Arts of thirty terms' standing since matriculation. (1) Musical compositions, viz. (a) extended work for voices and full orchestra; (b) symphony for full orchestra; (c) symphonic poem, concerto, variations or suite, for full orchestra; (d) overture or fantasia for full orchestra; (e) extended chamber-work for not less than three instruments; (f) sonata for not less than two instruments, or song cycle; (g) extended work for unaccompanied voices in not less than five parts. Candidates must submit either one composition from categories (a), (b) or (c); or one composition from categories (e), (f) or (g), together with one from (d). They may also submit more, up to three in all. (2) An examination, including composition, orchestration and allied subjects, General musical history and the detailed analysis of ten compositions selected from prescribed lists. Fees (excluding college fees): for the Preliminary Examination, £1:10s.; for the B.Mus. examinations and degree, £19; for the D.Mus. examinations and degree, £40.

UNIVERSITY OF CAMBRIDGE.—In all essential respects the early history of musical degrees at

Cambridge is similar to that at Oxford, and requires no separate notice: the Music Lecture and Music Act were customs at both universities, and the status of the degrees and the general qualifications for them were the same, though the Bachelors were admitted to lecture on 'scientia musicalis' in general, not specifically on Boethius as at Oxford. The first Cambridge Bachelor of Music of whom we have record was Henry Habyngton (1463), the first Doctor, Thomas Saintwix (1463 or earlier). The professorship dates from 1684, when one Nicholas Staggins, master of the King's band, was appointed, apparently merely by court influence: no salary was, however, attached to the office till 1868. In 1857 Sterndale Bennett instituted formal examinations; and in 1875 the professor was required to lecture, a regulation subsequently expanded by the institution of a university lecturer in harmony and counterpoint, and the formation of a regular board of musical studies. The public performance of the B.Mus. exercise was abolished in 1868, that of the D.Mus. exercise in 1878. In 1878 candidates were requested to pass the University 'Previous Examination,' and in 1881 matriculation was made compulsory—these steps being taken some years later than at Oxford, and in a different order. In 1893 the University adopted the report of a Special Board of Music. The Board's report stated that

'They have had under careful consideration the exceptional position of the B.Mus. degree, involved in the fact that it is conferred upon persons who are not required to reside in the University. The various changes with regard to musical degrees which the Senate has sanctioned during the last fifteen years seem all to have tended in the direction of assimilating the procedure to that which obtains in other faculties. . . . It seems advisable that candidates of degrees in Music should have enjoyed no less advantages of general education than those who graduate in other faculties. The Board are of opinion that the time has now arrived when the degree of B.Mus. should be brought completely into line with the other degrees of the University, and conferred only after residence. . . . As it is important that Bachelors of Music should have a degree to look forward to which should enable them to obtain the membership of the Senate, for which their residence and examinations shall have qualified them, the Board suggest the creation of the degree of Master of Music. . . . The Board are of opinion that the present system of conferring the Doctorate in Music is unsatisfactory, as presenting a test which goes unnecessarily far in the technical direction, and gives insufficient encouragement to originality. They purpose, therefore, to assimilate the procedure of the degree of D.Mus. to that for the degrees of D.Sc. and D.Litt.'

The present regulations are as follows: *For the B.Mus. degree.*—Candidates for the first examinations must be undergraduates in at least the second term of residence, who have passed the University 'Previous Examination,' or a recognised equivalent; nine terms of residence are necessary for the degree itself. The first examination includes: (a) acoustics; (b) three-part counterpoint and double counterpoint in the octave; (c) four-part harmony; (d) subjects for an English essay; (e) A *viva voce* examina-

tion in elementary general knowledge of musical works and their composers. The second examination includes: (a) composition, instrumental and vocal—a substitute for the old 'exercise'; (b) five-part counterpoint and double counterpoint; (c) harmony; (d) two-part canon; (e) two-part fugue; (f) sonata-form; (g) the pitch and quality of the stops of the organ; (h) such knowledge of orchestral instruments as is necessary for reading from score; (i) the analysis of some classical composition announced six weeks before the examination; (j) playing at sight from figured bass and from vocal and orchestral score; (k) general musical history; (l) a general knowledge of the standard classical compositions. *Regulations for the M.Mus. degree.*—(1) An examination including (a) eight-part counterpoint; (b) the highest branches of harmony; (c) four-part canon; (d) four-part fugue and double fugue; (e) form in practical composition; (f) instrumentation and scoring of chamber and orchestral music; (g) the analysis of some classical composition announced six weeks before the examination; (h) the art of music historically and critically considered. (2) An exercise, with full orchestral accompaniment, containing portions for solo voices and for five-part chorus, and specimens of canon and fugue: there is also an oral examination for those whose exercises have been provisionally approved. *Regulations for the D.Mus. degree.*—A candidate must be a graduate in some faculty of the University (not necessarily in music), and must be not less than thirty years of age; he must send in not more than three (printed or manuscript) works, upon which his claim to a degree is based, such works to include either an oratorio, an opera, a cantata, an orchestral symphony, a concerto, or an extended piece of chamber music. Fees: for the B.Mus. examinations and degree, £14: 3s. (if a B.A. £10: 3s.); for the M.Mus. examinations and degree, £18: 6s.; for the D.Mus. examinations and degree, £30: 5s.

UNIVERSITY OF DUBLIN.—Founded in 1591, but very few degrees in Music (the first of which was granted in 1615 to Thomas Bateson, the madrigal composer) were conferred till recent times. No Professorship in Music existed till 1847, except from 1764–74, when Lord Mornington, father of the Duke of Wellington, held the position. In 1861 Sir R. P. Stewart was elected, and established a preliminary literary qualification for musical candidates, a principle peculiar to Dublin for sixteen years subsequently, but since accepted in one form or another by all British Universities. Candidates for degrees in music must matriculate in Arts. *Regulations for the B.Mus. degree.*—(1) Preliminary examination: (a) harmony in four parts; (b) counterpoint in four parts, strict and free; (c) a critical knowledge of specified works; (d) musical history up to Bach and

Handel, inclusive; (e) *viva voce* examination on general knowledge of music. (2) An exercise that shall be either a vocal cantata, on specified lines, or a string quartet. A practical test at pianoforte or organ may be offered in lieu of the exercise. (3) Final examination: (a) harmony in five parts; (b) counterpoint in five parts; (c) double counterpoint and canon in two parts; (d) fugue in four parts; (e) a critical knowledge of specified works; (f) musical history from C. P. E. Bach to the present time; (g) *viva voce*, principally on admitted masterpieces. *Regulations for the D.Mus. degree.*—(1) An exercise that shall be either a work for voices and orchestra comprising an overture, at least one eight-part chorus, at least one solo with orchestra, and specimens of contrapuntal writing; or a symphony for full orchestra. (2) An examination including (a) eight-part harmony and counterpoint; (b) double and triple counterpoint; (c) canon in four parts; (d) composition; (e) orchestration; (f) critical and historical questions; (g) *viva voce*, principally on the works of the great masters. Fees: for Matriculation, £15; for the B.Mus. examinations and degree, £12 (£5 to a B.A.); for the D.Mus. examinations and degree, £23.

UNIVERSITY OF LONDON.—The first degree in music was granted in 1879; the Professorship dates from 1902. Candidates for degrees in music must, unless specially exempted, pass the Matriculation examination. *Regulations for the B.Mus. degree.*—(1) Intermediate examination in four-part harmony, four-part counterpoint, form and analysis and history of music: questions on acoustics may also be included. (2) B.Mus. examination, consisting of an exercise—a work for chorus and orchestra, small or large, with or without solo voices—and an examination in composition (including five-part harmony and counterpoint, double counterpoint, canon, fugue and instrumentation), general history of music, with detailed criticism of a specified period, and form, with the critical analysis of two specified works: candidates may also offer to be examined in playing at sight from a vocal or instrumental score. *Regulations for the D.Mus. degree.*—(1) An examination in eight-part harmony and counterpoint, five-part fugue and canon, composition and history of music (including a critical knowledge in some detail of the great standard compositions). (2) An exercise—an opera or oratorio or cantata, with full orchestral accompaniment, and including an overture, vocal solos, eight-part polyphony and at least one movement in good fugal style. Candidates may also offer to be examined in playing at sight from a full orchestral score, and in extempore composition in regular form on a given subject. Fees: for the Intermediate and B.Mus. examinations, £12: 12s.; for the D.Mus.

examination, £21. Degrees are conferred on both internal and external students.

UNIVERSITY OF DURHAM.—Founded in 1831; but for a considerable period only honorary musical degrees were given. The Professorship dates from 1897. Candidates must (unless they have already passed an examination recognised as equivalent) pass an Entrance Examination qualifying for admission as a student in music. *Regulations for B.Mus. degree.*—(1) First examination in four-part harmony and counterpoint. (2) *Either* an exercise, which shall be a work in four movements on specified lines ((a) five-part chorus, (b) song, (c) unaccompanied vocal quartet or intermezzo for strings and (d) five-part introduction and fugue), with accompaniments for string band only; *or* an exercise consisting only of (a) and (d) as above, with a practical examination (playing specified pieces, sight-reading and extemporisation) in piano, organ or stringed instrument of the violin family. (3) Final examination in five-part harmony and counterpoint, double counterpoint and four-part fugue and canon, form, history of music and a *viva voce* examination on certain specified works, and on general musical matters. *Regulations for the D.Mus. degree.*—(1) An exercise consisting of a vocal composition, preceded by an instrumental overture, and containing eight-part harmony and good fugal counterpoint, with an accompaniment for full orchestra. (2) An examination in eight-part harmony and counterpoint, imitation, canon and fugue, form, instrumentation, history of music, elementary acoustics and knowledge of the scores of the standard works of the great composers. Fees: for the Entrance examination, £2; for the B.Mus. examinations and degree, £17:10s. or £18:10s.; for the D.Mus. examinations and degree, £24. Residence is not required.

UNIVERSITY OF EDINBURGH.—The Reid Professorship of Music dates from 1839, but owing to various causes no regulations for degrees in music were made before 1893. Matriculation and (unless candidates are otherwise exempted) the passing of a Preliminary examination in Arts or Science are required. *Regulations for the B.Mus. degree.*—Candidates must attend courses of instruction during a whole winter session. (1) The 'First Professional Examination' includes (a) ear tests and singing or performing on some instrument; (b) reading at sight; (c) elements of music; (d) four-part harmony; (e) elementary counterpoint; (f) form; (g) outlines of the history of music. (2) The 'Second Professional Examination' includes (a) five-part harmony; (b) advanced counterpoint; (c) two-part canon and four-part imitation and fugue; (d) form (more advanced); (e) elements of instrumentation; (f) critical knowledge of certain prescribed scores; (g) playing at sight from easy vocal

and instrumental scores and from figured bass; (h) history of music; (i) acoustics and physiology of the vocal organs. Each candidate will also be required to submit the following exercises: (a) a solo song with pianoforte accompaniment; (b) a four-part vocal composition; (c) an instrumental composition (other than a dance) for pianoforte or organ, or other instrument with accompaniment. *Regulations for the D.Mus. degree.*—The degree is granted in three departments: all candidates must be not less than twenty-five years of age. (1) Candidates as *Composers* must submit a prescribed number of vocal and instrumental compositions in the larger forms, and will be examined in (a) advanced counterpoint and fugue; (b) instrumentation; (c) the works of the great composers from Palestrina onwards. (2) Candidates as *Executants* will be required to perform solo and ensemble works in different styles, selected partly by themselves and partly by the examiners; they will be examined in sight-reading, playing from orchestral score, modulating, the history and literature of their special instrument, and the method of teaching it. (3) Candidates as *Theorists or Historians* must submit one or more treatises, the result of research and original thought, and will be examined in both the theory and the history of music, the examination being on a higher standard in the subject which the candidate selects as his specialty. Fees: for the Preliminary Examination, £1:1s.; for the B.Mus. examinations, £15:15s.; for the D.Mus. examination, £15:15s.

UNIVERSITY OF BIRMINGHAM.—Founded in 1899: the Professorship dates from 1905. *Regulations for the B.Mus. degree* (which ranks as an Honours degree).—Candidates must have passed the Matriculation examination or one of the examinations accepted in lieu of it; they must also satisfy the Professor of Music that they have (a) a sufficient knowledge of the theory of music, (b) an adequate power of performance on some musical instrument. (1) First examination, comprising (a) subjects mentioned in the syllabus of the first year's course (the early development of counterpoint and of harmony, the rise of English church music, folk-songs and national songs, chamber music, the early English madrigal, the 'Fitzwilliam Virginal Book,' the development of the art-song, bells, carillons and chimes); (b) acoustics; (c) four-part harmony and counterpoint; (d) another degree course in the Faculty of Arts. (2) Second examination, comprising (a) the second year's subjects (the modern development of harmony and counterpoint—lectures and classes—musical forms and the analysis of fugue, orchestration, the pianoforte works of Chopin, the organ works of Bach, the evolution of the orchestra); (b), (c) two Arts

courses. (3) Third examination, comprising (a) the third year's subjects (Bach's Mass in B minor and Wagner's 'Die Meistersinger,' choral music, the opera, the symphony); (b) the composition of an unaccompanied choral work, and also of *either* a symphonic work for full orchestra, *or* a vocal work (solos and choruses) with orchestral accompaniment, *or* a piece of chamber-music for at least three instruments: as an alternative to composition, candidates may submit *either* a literary thesis on an important musical work, an historical period of music or the theoretical development of music, *or* research work in transcribing, editing and rendering available for public use important MSS. in an English or foreign library. *Regulations for the M.Mus. degree.*—Candidates are required to carry out a course of study for one year under the Professor's direction and to submit original musical works (composed after taking the B.Mus. degree), and also a dissertation embodying critical or historical research on some musical subject. Fees: for the B.Mus. examinations and degree, £12:2s.; for the M.Mus. examination and degree, £8:7s.

UNIVERSITY OF MANCHESTER.—The first musical degrees were conferred in 1894. Candidates must have passed the Matriculation examination; and (unless graduates in another faculty) they must also at some time attend a class in one of the non-musical subjects for the Intermediate B.A. examination. *Regulations for the B.Mus. degree.*—(1) First examination in four-part harmony, history of music, and elementary theory of acoustics. (2) Second examination, including five-part harmony, four-part counterpoint, ancient and modern, a specified period of musical history, musical form, and a practical test (excused to candidates possessing certain qualifications) involving sight-reading and the playing of a previously approved prepared piece. (3) Third examination, including five-part counterpoint and fugue, composition in various forms, orchestration, an oral examination including analysis of selected scores: candidates must also submit *either* a thesis or an important musical work, or a period of musical history, *or* a composition with portions for solo voice and for five-part chorus, with specimens of canon and fugue (but at the same time showing acquaintance with the resources of modern harmony and counterpoint), and with accompaniment for strings, wood-wind and optional organ. *Regulations for the D.Mus. degree.*—(1) *Either* an exercise containing (a) the first movement of a symphony for full orchestra, (b) an unaccompanied octet, (c) a song, (d) a recitative, (e) an eight-part choral fugue; *or* any one of the following: a symphony, a symphonic poem or suite for orchestra, a concerto for

solo instrument and orchestra, a cantata or choral ballad with orchestral accompaniment. (2) An examination in eight-part counterpoint, and in composition for full orchestra, and for various combinations. Fees: for Matriculation, £2; for the B.Mus. examinations and degree, £17:17s.; for the D.Mus. examinations and degree, £23:2s.

NATIONAL UNIVERSITY OF IRELAND.—Constituted in 1908 (as successor to the Royal University founded in 1880). There are Professors of Music at two of the constituent colleges (Dublin and Cork) and also, at the former, a 'Dublin Corporation Professor of Irish Music.' All candidates must have passed the Matriculation examination. *Regulations for the B.Mus. degree at University College, Dublin.*—(1) First examination, including elementary acoustics, four-part harmony, three-part strict counterpoint, the elements of musical form, musical history to Bach and Handel inclusive, history and practice of Irish Music, and a practical examination on organ, piano or (together with piano) violin, violoncello or harp, comprising sight-reading and the performance of two works of different types selected by the candidate. (2) Final Examination, including five-part harmony and counterpoint, three-part fugue, canon and double counterpoint, form, musical history from C. P. E. Bach to the present time, critical analysis of selected scores, further history and practice of Irish Music, and *either* more advanced practical tests, or composition, vocal and instrumental. *Regulations for the B.Mus. degree at University College, Cork.*—(1) First examination, including harmony, counterpoint, history of music, ear-training, acoustics, form, physiology of the vocal organs, practical examination in (a) piano-forte or organ, and (b) singing, violin, viola, violoncello, flute, oboe, clarinet, bassoon or horn. (2) Final examination, including harmony, counterpoint, canon and fugue, history of music, ear-training, form, instrumentation, methods of teaching, critical knowledge of a specified score, and a further practical examination on the same lines. Two Arts examinations in languages are also compulsory. *General Regulations for the D.Mus. degree.*—An original composition and theoretical and practical examinations: details are not given in the syllabus. Fees: for the B.Mus. examinations and degree, £6; for the D.Mus. examinations and degree, £7.

UNIVERSITY OF WALES.—Constituted in 1894: there are Professors of Music at two of the constituent colleges (Aberystwyth and Cardiff). Candidates must have passed the Matriculation examination or an equivalent. *Regulations for the B.Mus. degree.*—For the pass degree there are College examinations in the history and theory of music and in composition

(together with two scientific or linguistic subjects), and a University examination in theory of music and composition, with the presentation of an exercise for strings or for voices or for both. For the honours degree there is a further University examination in either advanced study in harmony, counterpoint, fugue, form and composition, with a critical study of one or more periods or works, or an exercise in advanced musical composition, with a dissertation embodying the results of some scheme of musical research. Holders of the B.A. degree who subsequently proceed to the B.Mus. are permitted certain modifications. *Regulations for the M.Mus. degree.*—(1) An exercise for chorus, solo or soli, and full orchestra, including an overture, a chorus in eight-part harmony, and specimens of canon and fugue. (2) An examination in eight-part harmony and counterpoint, double, triple, and quadruple counterpoint, six-part fugue, instrumentation and scoring of chamber and orchestral music, form in composition considered historically, and the general history of music. *Regulations for the D.Mus. degree.*—Original compositions, including specimens of both choral and instrumental writing, one of which must be an oratorio, opera, cantata or symphony. Candidates who fail to reach the required standard may be granted the M.Mus. degree. Fees: for the B.Mus. examinations, £6 : 15s. ; for the M.Mus. examinations, £10 ; for the D.Mus. examination, £20.

GENERAL CONDITIONS

All candidates for the doctorate must already hold the B.Mus. degree of the same university, except at the Universities of Oxford, Cambridge, Manchester and Wales, where exemptions of different kinds are granted. *Ad eundem* degrees are, however, occasionally conferred. Some other British universities than those above mentioned have the power to grant musical degrees, but have not yet issued any regulations on the subject ; the University of St. Andrews has granted honorary degrees, but no others. The Archbishop of Canterbury possesses, and occasionally exercises, the privilege of creating Doctors of Music (as well as Doctors in other faculties, and, after specified examinations, Masters of Arts). All the doctorates are conferred at the Archbishop's discretion, and no rules are laid down with regard to them ; but in all cases the Archbishop takes skilled advice as to the applicant's qualifications. The D.Mus. fees are not mentioned in the regulations, but they have been estimated at £63 ; and the fees for the M.A. degree, which may be taken as a general guide, 'must not be expected to be less than £55.' This is a vestige of the ancient rights of the occupant of the See as Legate of the Pope—rights which have, however, been, at

various times from the 13th century downwards, strongly contested by representatives of the regular universities ; it is highly probable that, sooner or later, this relic of antiquity will be quietly allowed to lapse.¹

The 'Union of Graduates in Music' is a body including most (at present about two-thirds) of the holders, male and female, of the above-mentioned degrees, both ordinary and honorary. It was founded in 1893, principally by the efforts of Stainer, 'for the protection of the value and dignity of the Degrees in Music regularly conferred in Great Britain and Ireland' ; the immediate cause of its existence being an attempt made by a colonial university to grant degrees *in absentia* through an English agency. It publishes an annual 'Roll and Kalendar' containing particulars of its members' careers and qualifications and other matter of musical interest, and holds an annual general meeting, followed by a dinner : in recent years there have also been summer conferences in different university towns, when papers are read and discussed and special musical performances given. A chief part of its official work hitherto has consisted in the detection and exposure of those who have traded, in ways not altogether irreproachable, on the strange passion for ornamental letters which consumes a large section of the British public ; but it has also dealt with other matters, such as the registration of teachers.

Apart from the musical degrees, music is included among the studies for the degree of B.A. in the Universities of Oxford, Cambridge, Durham, Birmingham, Wales and the National University of Ireland ; and also in the Universities of Leeds and Belfast. The University of London also confers the degree of Ph.D. in music.

(Principal authorities consulted : Abdy-Williams, *Degrees in Music* ; official regulations of the various Universities ; the *Roll and Kalendar of the Union of Graduates in Music.*)

E. W.

AMERICAN UNIVERSITIES

Before a comprehensive or an accurate account of musical degrees in America can be made, some preliminary observations are desirable concerning the several types of musical degrees and the latitude of practice in conferring them. Any degree is the symbol of high attainment in science, art or literature, conferred by some educational institution of authoritative position. The award is made either for the fulfilment of definite requirements or as an official compliment (*honoris causa*), the donor often being as much honoured as the recipient. The specifically musical degrees in America are the Bachelor of Music and the Doctor of Music. The usual collegiate degrees,

¹ Nine 'Lambeth' musical doctorates have been conferred within the last twenty years.

however, of A.B., A.M. or even Ph.D. sometimes imply considerable attainment in music, since the recipient may have won the degree by special emphasis on musical studies. The variety of meaning implied in the above degrees is much increased as soon as music is involved, for the following reasons: (1) Music is such a peculiar subject, and attainment in it depends so largely upon natural aptitude—or, in the case of the highest achievements, upon genius—that it is very difficult to be appraised in accordance with ordinary academic standards. (2) America is a large and young country in which music has been taught in colleges and universities for a comparatively short time; hence no uniform practice has, as yet, been worked out; seventy-five years covers the entire time during which music has been taught in institutions of higher learning. Some institutions confer musical degrees for distinct ability on the executive side of the art, that is, for proficiency in playing upon some instrument (pianoforte, organ, violin) or in singing. Other institutions emphasise scholarship ('musicology'), critical ability and so-called research; while for the highest degrees creative ability is often required. The matter is further complicated by attempts to apply the somewhat arbitrary classification of 'vocational' and 'cultural' studies. It is taken for granted that a young student wishing to teach any subject, such as science, languages, history, etc., will be recognised as a master of his subject by the winning of a degree of some kind from an accredited seat of learning. In the above subjects standards are so definite that rational estimates can be made. When a student with musical aptitude attempts to follow along the same line, difficulties arise, because there is as yet no definition as to just what, from the academic point of view, a musician is. The highest type of musician is undoubtedly one who has creative fancy, deep emotions and a technique in expressing what he has to say. To a man of this kind, as in the case of a poet, it is a matter of comparative indifference whether he has a musical degree or not. When we begin to consider less gifted musicians, who, nevertheless, may be able men in scholarship, in pedagogic ability, or as executants, it is evident that careful classification is necessary, and that the requirements for a degree in music be so planned that they show clearly just what kind of attainment the student has reached. Until quite recently in America there has been an erroneous opinion that any one endowed with a love for music, if he studied sufficiently, especially in methods of teaching, became a musician and was able to teach music. As it was necessary in order to secure a good teaching position to have some degree, many colleges and universities have conferred musical degrees on rather elastic

terms. The fact is gradually being faced that, to be a really efficient teacher of music, one must be a thorough musician, and, furthermore, that inborn aptitude is by far the most important factor in the whole question. No one not born with a keen and accurate ear, a sensitive feeling for rhythm, and a certain amount of creative and emotional power can ever acquire these qualities merely through courses of study. Recognition, furthermore, is spreading that a student with innate ability in music should, just for this reason, secure a general education if he wishes to become a broadly equipped musician. The better nourished a man's intellect and imagination, the more he will have to express and the more efficient will he be as a teacher of others. The day has gone by when one may be a musician and nothing else. For the dominant note in the music of our time is its close relationship with the other arts and the fact that it touches life on every side. Hence, in American universities a strong tendency is setting in to have musical degrees imply not merely attainment in music itself, but a knowledge as well of modern languages, the fine arts, history and science—everything, in fact, which would comprise the education of a well-rounded man. To show the actual manner in which these principles are applied, a tabulation is made of the requirements in five American institutions where music has been taught for a considerable time: i.e. Oberlin College, Northwestern University, the University of Iowa, Yale University and Harvard University.

At OBERLIN there is a flourishing Conservatory of Music, that is, a professional school, under the direction of Professor Edward Dickinson, which has affiliations with the college of the same name. The degree of Bachelor of Music is given by the Conservatory to candidates who show a high attainment in a four-year course, the studies of which are entirely of a musical nature, e.g. harmony, counterpoint, orchestration, composition and the history of music. The candidates must also show technical ability on some instrument, as the pianoforte, violin, organ, clarinet or even the cornet. The degree of Master of Music is open to students who take advanced work for a year in the above courses. Students wishing a broader education may combine the requirements for either of these Conservatory degrees with courses in the College, such a plan of studying being completed in six years. It should be understood that before entering Oberlin Conservatory or College, every student is required to pass an examination, which comprises such general subjects as English, mathematics, modern languages, history and science.

At NORTH-WESTERN UNIVERSITY, where music is under the direction of Professor Percy Lutkin, only one degree is offered, that of Bachelor of Music, and the terms of qualifying

for this degree and the courses studied are practically identical with those at Oberlin.

The UNIVERSITY OF IOWA, where the music is under the direction of Dr. Philip G. Clapp, has been most progressive in working out a definite correlation between the requirements of a general education and specialisation in music, and at this university there are offered the following five degrees, toward the winning of which music may be offered as a principal subject or an elective :

(1) The degree of Bachelor of Arts requires a four-year course, which prescribes study in languages, literature, science and philosophy, together with logical development throughout the course of a principal subject and a due proportion of free electives. This principal subject is to occupy from one-third to one-fourth of the student's time. Music, if a student selects this as his principal subject, would have exactly the same privileges as are connected with any other subject in the University.

(2) The degree of Bachelor of Arts in music. This degree is identical with the above degree, except that the student must devote a full third of his time specifically to music.

(3) The degree of Bachelor of Music requires a four-year course with the same requirements in general studies as the Bachelor of Arts degree, but one-half of the student's time is to be devoted to musical subjects.

(4) The degree of Master of Arts requires two years of advanced study in a principal subject, together with a group of related subjects. Here again the candidate for the degree may elect music as his principal subject, or any other subject in the University.

(5) The degree of Doctor of Philosophy requires two years of study following the Master's degree. If music be chosen for the chief part of the work, the study of the subject must occupy two-thirds of the candidate's time, and in addition a thesis must be presented which embodies some original contribution to knowledge.

At YALE UNIVERSITY, where for many years there has been a flourishing School of Music vitally associated with the career of the well-known composer, Horatio Parker, and which is now under the supervision of Professor David S. Smith, also a well-known composer, there has not been until recently a close affiliation between the courses in the University and those in the School of Music, but from now on all students in Yale College may count courses in music toward the regular academic degree of Bachelor of Arts. In addition, the degree of Bachelor of Music is conferred by Yale University, on the recommendation of the School of Music, upon candidates who have completed satisfactorily a five-year course in the theoretical study of music. The candidates

for this degree must not only pass prescribed courses but also show a mastery in at least one of the following branches : original composition in one of the larger musical forms, technical efficiency on some instrument or special aptitude for musical criticism and research. A thesis is also required which shows original ability in investigation and musical criticism.

HARVARD UNIVERSITY may fairly claim to have followed from the outset a consistent course as to the relationship which specific technical training in music should bear to a broad general education. At Harvard no purely musical degrees are offered, but the three customary academic degrees of A.B., A.M. and Ph.D. may be won, and often are, by students who devote a chief part of their time and efforts to courses in the grammar of music, in musical composition, orchestration, history, biography and æsthetics. No credit is given for ability on the executive side of the art, that is, for playing upon an instrument or for singing. The courses in music at Harvard were begun in 1862 under the leadership of Professor John Knowles Paine, one of the earliest American composers to write in the larger forms, such as symphonies, chamber music, oratorios and cantatas. Professor Paine's influence in the development of music in America may be considered comparable with that of the late Sir Hubert Parry in England. Professor Paine believed strongly that a university should not offer degrees which imply merely technical ability in music. The place, in his opinion, for such degrees would be a technical school, that is, a Conservatory of Music, just as a Law School, a Medical School or a Dental School offer degrees in these respective subjects. No matter how thoroughly a student may specialise in music, he must secure a good education in languages, history, literature and science. That this policy has had a distinct influence upon the development of music in America is shown from the fact that a large number of the prominent composers and teachers in the country are graduates of Harvard. It will suffice to name Arthur Foote, George Osgood, Louis A. Coerne, John Alden Carpenter, Frederick S. Converse, Edward B. Hill, Daniel G. Mason, Percy Lee Atherton, William C. Heilman, Edward Ballantine, Archibald J. Davison, Blair Fairchild, Philip G. Clapp and Chalmers Clifton. It may also be noted in passing that many of the leading critics in America, such as Philip Hale, Henry T. Finck, W. J. Henderson and Richard Aldrich are college graduates, who began their musical studies in connexion with the work of an academic career. All these men have laid the foundations of a sound musical training and at the same time have gained one or more of the regular academic

degrees by fulfilling the requirements in general studies. These requirements at Harvard for the three degrees offered are as follows :

A candidate for the A.B. degree, who is to specialise in music, must pass with distinction courses in harmony, counterpoint, fugue, orchestration, history and musical appreciation ; he must also demonstrate ability to read French, Italian and German, must take certain courses in English literature and then may elect his other courses from the fields of history, mathematics or science.

For the A.M. degree a candidate is required to spend from one to two years in residence in the university and must do advanced work in musical theory and in composition. Whatever he may have to say in music, he must show the ability to express grammatically and logically. For candidates lacking in creative power who may have aptitude for criticism or historical investigation, a thesis on some original subject may be substituted.

The degree of Ph.D. is meant to be the highest award for innate musical qualities and thorough scholarship which the University can confer, and that the standard is rigorous is shown from the fact that this degree has been bestowed only three times, although there have been at least a dozen candidates within the last twenty-five years.

The candidate for the degree of Ph.D. in music must do original work in musical æsthetics or history and his thesis must embody some special contribution to the subject. He must present instrumental compositions correct in grammar and in style, or in place of this may substitute one or more orchestral arrangements of short compositions to be selected by the Division of Music. The candidate will be given an oral and a written examination, the former to test his general knowledge and his acquaintance with musical history, æsthetics and allied fields ; the latter to determine his knowledge of harmony and of contrapuntal and fugal writing.

Certain reflections may now be made on the above survey of actual practice concerning degrees in music in American universities. It is evident that music is gaining more definite public recognition as an educational subject of exceeding value, since it correlates the ear, the eye, the intellect, the imagination and the emotions. Just because music in its highest aspect is and always will be such a mysterious subject, evading as it were rigid classification, a real point of progress is obtained when definite courses of study are formulated and when achievement is measured in a manner comparable to that applied in any other field of mental activity. The standards of teaching in America, the broader judgments in musical criticism, the keener imagination of original composers, all bear witness to this improve-

ment in conception as to what musical degrees should really stand for.

Until recently, rather undue emphasis has been laid upon the vocational aspect of degrees in music, that is, such degrees conferred upon students meant that they were able to earn their livelihood by teaching music in some form. In localities where standards were low, they could often do this without being musicians of real attainment. Of late, however, there has been such improvement in standards that commanding positions are secured only by men of genuine ability and of broad education. The demand, in fact, for well-trained musicians is much in advance of the supply. A degree in music in America is now a badge of distinct artistic and educational value. W. R. S.

DEHN, SIEGFRIED WILHELM (b. Altona, Feb. 25, 1799 ; d. Berlin, Apr. 12, 1858), musical writer. He made diligent researches on various subjects connected with music both in Germany and Italy, which he utilised in Marx's *Berliner Musikzeitung* and other periodicals. In 1842, on the recommendation of Meyerbeer, he was appointed librarian of the musical portion of the Royal Library at Berlin. He was given the title of Königl. Professor in 1849. He catalogued the entire musical library, and added to it a number of valuable works scattered throughout Prussia, especially Pölchau's collection, containing, besides many interesting theoretical and historical works, an invaluable series of original MSS. of the Bach family. Dehn scored no fewer than 500 motets of Orlando Lasso, and copied for the press an enormous number of works by J. S. Bach. He it was who first published Bach's 6 concertos for various instruments (Peters, 1850) ; the concertos for 1, 2 and 3 clavers ; and the 2 comic cantatas. Dehn also published a collection of vocal compositions in 4, 5, 6, 8 and 10 parts, called 'Sammlung älterer Musik aus dem XVI. und XVII. Jahrh.' He succeeded Gottfried Weber in the editorship of the musical periodical *Cæcilia* (1842-48). He had re-edited Marpurg's treatise on Fugue (Leipzig, 1858), had translated Delmotte's work on Orlando Lasso, under the title *Biographische Notiz über Roland de Lattre*, and was preparing a larger work on the same subject, from valuable materials collected with great labour, when he died. Among his many distinguished pupils were Glinka, Kullak, A. Rubinstein and F. Kiel. Among his friends were Kieseewetter and Fétis, for the latter of whom he collected materials equal to two volumes of his *Biographie universelle*. His theoretical works were *Theoretische-praktische Harmonielehre* (Berlin, 1840 ; 2nd edition Leipzig, 1858) ; *Analyse dreier Fugen . . . J. S. Bach's . . . und Bononcini's*, etc. (Leipzig, 1858), and *Lehre vom Kontrapunkt* (Schneider, 1859). The latter, published after his death by his pupil Scholz (2nd edition, 1883) contains examples

and analyses of canon and fugue by Orlando Lasso, Marcello, Palestrina, etc. Dehn was a good practical musician and violoncellist. M. C. C.

DE HOND, see CANIS.

DEISS, MICHAEL, musician to the Emperor Ferdinand I. of Germany, for whose obsequies in 1564 he composed a motet for 4 voices, and 8 other pieces, published by Joannelli in his *Thesaurus musicus*. Other motets of his are contained in Schad's *Promptuarium musicum*. M. C. C.

DEITERS, HERMANN (b. Bonn, June 27, 1833; d. Coblenz, May 11, 1907), studied at first law and philology, taking the degree of Doctor in both faculties in 1858.

He held various scholastic appointments, successively at Bonn, Düren, Konitz, Posen and Coblenz, and had a place in the Cultus-ministerium at Berlin. After some early contributions to Bagge's *Deutsche Musikzeitung* and other musical papers, he wrote various important articles in the *A.M.Z.*, such as 'Beethovens dramatische Compositionen,' 'R. Schumann als Schriftsteller,' 'Max Bruchs Odysseus,' etc. He published the first authoritative biography of Brahms in 1880 (English translation by Mrs. Newmarch in 1888), completed after the master's death by a new edition, 1898. Deiters's most important work was the revising and editing of A. W. Thayer's monumental life of Beethoven. The German translation from Thayer's original English (MS.) in the three volumes published during the author's lifetime (in 1866, 1872 and 1879) were his work. After Thayer's death, Dr. Deiters undertook to revise and complete the work; vol. i. of the new edition appeared in 1901, the fourth volume appearing before his death. (See BEETHOVEN, Additional Bibliography; also KREHBIEL.) M.

DELABORDE, ÉLIE MIRIAM (b. Paris, Feb. 7, 1839; d. there, Dec. 9, 1913), an eminent French pianist and composer, a pupil of Alkan and Moscheles. On completing his studies he made successful tours in England, Germany and Russia. The war of 1870 drove him to London for a time with his 121 parrots and cockatoos. At the Hanover Square Rooms he gave a concert at which he played on a pedallier fitted to his pianoforte. In 1873 he was appointed professor at the Paris Conservatoire, and devoted himself to teaching with the greatest success. He wrote an overture, 'Attila'; an opéra-comique, 'La Reine dort'; 12 preludes, études and fantasias, for piano, a quintet for piano and strings, and songs. G. F.

DE LA FERTE, P., see PAPILLON.

DELARUE, L'ABBÉ GERVAIS (b. Caen, June 1751; d. there, 1833), fled to England in 1793, returning to France in 1798. He was a member of the London Society of Antiquaries and wrote *Essais historiques sur les bardes, les jongleurs et les trouvères normands et anglo-normands*, 3 vols. E. V. D. S.

DELÂTRE, CLAUDE PETIT JAN, a composer (probably Flemish) of the mid 16th century, who was maître de chapelle at Verdun Cathedral, and later (1555) at Liège. In 1576 he was awarded a silver lyre at the St. Cecilia musical festival held at Evreux in Normandy, for one of his 'chansons' ('Ce riz plus doux'). An account of this, with some information about Delâtre's connexion with it, is given in a 16th-century manuscript which was later edited and published by M. M. Bonnin & Chassant, under the title 'Puy de musique, érigé à Evreux, en l'honneur de madame sainte Cécile (Évreux, 1837).' (See *Félis* and *Q.-L.*, under Latre.) J. M. S.

DELDEVEZ, ÉDOUARD MARIE ERNEST (b. Paris, May 31, 1817; d. there, Nov. 6, 1897), entered the Conservatoire in 1825, where he was pupil of Habeneck, Halévy and Berton.

He obtained the 1st prize in 1833, the 2nd prize for fugue in 1837, and the 2nd Prix de Rome in 1838 for his cantata 'La Vendetta,' which he subsequently revised and printed (op. 16). As violinist, he played in various orchestras at the Théâtre Italien, Opéra and Société des Concerts du Conservatoire. He became 2nd conductor of that society (1860), then 1st conductor there (1872), and at the Opéra (1873) after G. Hainl, leaving it in 1877. He directed the orchestral class at the Conservatoire, 1873-85. The list of his compositions is to be found in *Mes Mémoires* (1890); they consist of chamber music, 3 symphonies, 'ouvertures de concert,' etc.; also dramatic works, ballets performed at the Opéra, 'Lady Henriette,' 'Eucharis,' etc. He was a learned musician and a pedagogue. He published an anthology of violinists (1 vols.) and theoretical works: *Des principes de la formation des intervalles et des accords* (1868); *Curiosités musicales* (1873); *L'Art du chef d'orchestre* (1878), etc. G. F.; rev. M. L. P.

DELIBES, CLÉMENT PHILIBERT LÉO (b. St. Germain du Val, Sarthe, Feb. 21,¹ 1836; d. Paris, Jan. 16, 1891), came to Paris in 1848, and was admitted into the solfège class at the Conservatoire; at the same time singing in the choirs of the Madeleine and other churches.

Having obtained a first prize for solfège in 1850, he studied pianoforte, organ, harmony and advanced composition under Le Couppey, Benoist, Bazin and Adolphe Adam. Through the influence of the last-named, he became accompanist at the Théâtre Lyrique in 1853, and also organist in the church of St. Pierre de Chaillot, and elsewhere, before his final appointment at St. Jean St. François, which he held from 1862-71. He devoted himself from an early period to dramatic composition, and after his first essay, 'Deux sous de charbon' (Folies Nouvelles, 1855), wrote several short comic operas for the Théâtre Lyrique—'Maître

¹ Date verified by register of birth.

Griffard' (1857), 'Le Jardinier et son seigneur' (1863); and a number of operettas for the Folies Nouvelles, the Bouffes Parisiens and the Variétés, of which some were very successful—'Deux vieilles gardes' (1856), 'L'Omelette à la Pollembûche' (1859), 'Le Serpent à plumes' (1864), 'L'Écossais de Chatou' (1869), etc. He also wrote a number of choruses for male voices, a Mass and some choruses for the school children of St. Denis and Sceaux, where he was inspector. In 1863 Delibes became accompanist at the Opéra, and in 1865 second chorus-master (under Victor Massé): he kept this appointment until 1872, when he gave it up on the occasion of his marriage with the daughter of Mlle. Denain, a former actress at the Comédie-Française. In 1865 a cantata, 'Alger,' was performed. By his appointment at the Opéra a new career was opened out to him. Having been commissioned to compose the ballet of 'La Source' (Nov. 12, 1866) in collaboration with the Polish musician Minkous, he displayed such a wealth of melody as a composer of ballet music, and so completely eclipsed the composer with whom he had as a favour been associated, that he was at once asked to write a *divertissement* called 'Le Pas de fleurs' to be introduced into the ballet of his old master, Adolphe Adam, 'Le Corsaire,' for its revival (Oct. 21, 1867). He was finally entrusted with the setting of an entire ballet, on the pretty comedy 'Coppélia' (May 25, 1870), which is rightly considered his most charming production. In 1872 he published a collection of charming melodies, 'Myrto,' 'Les Filles de Cadix,' 'Bonjour, Suzon,' etc., and on May 24, 1873, he produced at the Opéra-Comique a work in 3 acts, 'Le Roi l'a dit.' After this Delibes returned to the Opéra, where he produced a grand mythological ballet, 'Sylvia' (June 14, 1876), which confirmed his superiority in dance music. In spite of this fresh success Delibes was still anxious to write a serious vocal work, and produced a grand scena, 'La Mort d'Orphée,' at the Trocadéro Concerts in 1878. He then composed two dramatic works for the Opéra-Comique, 'Jean de Nivelle' (Mar. 8, 1880) and 'Lakmé' (Apr. 14, 1883). A 5-act opera, 'Kassya' (completed by Massé after the composer's death), was given at the Opéra-Comique, Mar. 21, 1893. Some other dramatic pieces ('Le Don Juan suisse' and 'La Princesse Ravigotte') remain in MS. In addition to the above works he composed incidental music for 'Le Roi s'amuse,' on its revival at the Comédie-Française, Nov. 22, 1882, and published several songs, almost all intended for representations at the last-named theatre. In 1877 Delibes was made Chevalier of the Legion of Honour; in Jan. 1881 he succeeded Reber, who had just died, as professor of advanced composition at the Conservatoire; and in Dec. 1884 he was elected a member of the Institut in the place of Victor Massé.

DELIUS, FREDERICK (b. Bradford, Jan. 29, 1863), one of the most remarkable composers of his time, came of German parents who had settled in England.

His musical temperament developed early, and as a boy he became tolerably proficient upon the violin; but his parents destined him for a mercantile career, and refused to allow him to devote himself to music. His distaste for a business life, however, was so profound that in his 20th year he left home and established himself as an orange-planter in Florida. In this remote seclusion he devoted his leisure time to the study of music. He had no means of instruction save books on the theory and history of music, and the scores of the great masters. The friendship of an American organist, Thomas F. Ward, helped him considerably in the pursuance of his studies. After a sojourn of several years in Florida he returned to Europe, and entered the Conservatorium at Leipzig, where he studied under Jadassohn and Reinecke, and came under the influence of Grieg, who was at that time residing at Leipzig. From 1890 Delius has lived principally in France, either in Paris or in the country town of Grez-sur-Loing (Seine-et-Loire). Delius's first published work, a 'Légende' for violin solo with orchestral accompaniment, dates from 1892. It was first performed at a concert of Delius's works given in London in 1899. This was followed by a fantasia-overture, 'Over the Hills and Far Away' (1893), first performed under Dr. Haym at Elberfeld in 1897, and a pianoforte concerto in C minor (1897). The latter was first played at Elberfeld in 1904 by Professor Julius Butts, under the conductorship of Haym, and repeated at Düsseldorf. The composer then subjected it to a drastic revision, and in its remodelled form it was played at a Promenade Concert in London in Oct. 1907 by Theodor Szanto. In 1897 Delius was invited by the Norwegian dramatist, Gunnar Heiberg, to write incidental music for his political play, 'Folkeraadet,' which was produced during the same year in Christiania amidst stormy scenes of protest and disapproval. Delius's satirical use of the Norwegian national anthem was ill taken by critics and public alike, and popular feeling was roused to such a point that at one performance a member of the audience actually fired several revolver shots at the composer,¹ who was surveying the house from the proscenium curtain, happily without any result save that of terrifying a portion of the audience into hysterics. An orchestral suite drawn from the 'Folkeraadet' music was performed at

¹ *Hewitt* says, p. 38, 'One outraged patriot even went so far as to fire off a blank cartridge at the conductor of the orchestra.'

the above-mentioned London concert in 1899. Meanwhile Delius was engaged upon an opera, 'Koanga' (1896-97), the libretto of which was drawn by C. F. Keary from G. W. Cable's novel, *The Grandissimes*. This was produced at the Elberfeld Stadttheater in 1904 under Fritz Cassirer. His next works were two symphonic poems: 'Life's Dance' (1898), first performed at Düsseldorf in 1904 under Buths; and 'Paris: the Song of a Great City' (1899-1900), produced by Haym at Elberfeld in the latter year, and first given in London under Thomas Beecham in 1908. From 1900-02 Delius was engaged upon two operas, 'Romeo und Julia auf dem Dorfe' and 'Margot la Rouge.' The first of these, which is in a prologue and three acts, was produced at the Berlin Komische Oper in 1907; and was given in English as 'A Village Romeo and Juliet,' with moderate success, during Beecham's season at Covent Garden, Feb. 22, 1910. It was revived at Covent Garden in 1920 with greater success owing partly to the fact that by that time Delius's outlook and musical style was much more familiar to English audiences, and partly to the greater care expended on its stage production. The second, in one act, has not yet (1924) been performed. To these succeeded 'Appalachia,' a tone-poem for orchestra and chorus (1903), produced at the Lower Rhine Festival under Buths in 1905, and first performed in London by Cassirer in 1907; 'Sea-Drift' (1904), a setting of a poem by Walt Whitman for baritone solo, chorus and orchestra, produced at the Tonkünstlerfest at Essen in 1906, and first performed in England at the Sheffield Festival of 1908 under Henry J. Wood; and 'A Mass of Life' (1905), an adaptation of selected passages from Nietzsche's 'Also sprach Zarathustra,' for soloists, chorus and orchestra, first given in its entirety in London under Thomas Beecham in 1909. Other productions of the same period were: 'Brigg Fair,' first given in London under Beecham in 1908, 'In a Summer Garden,' which was conducted by the composer at a Philharmonic concert in the same year, and 'A Dance Rhapsody,' which the composer conducted at the Hereford Festival of 1909. At this period Delius was engaged on the composition of another opera, 'Fennimore and Gerda,' based on J. P. Jacobsen's novel *Niels Lyhne*, which was not, however, performed until 1919, when it was given at Frankfort-on-Main.

By 1910 the efforts of the conductors, both German and English, above mentioned had produced a wide recognition of the distinctive voice of Delius, yet it is noticeable that many of his important works have had to wait several years for their first performances. Particularly may be mentioned 'A Song of the High Hills' for choir (without words) and orchestra written in 1911-12, but unheard until

1920 when the Royal Philharmonic Society of London with the Philharmonic Choir produced it under Albert Coates. The 'Requiem,' nationalistic in its outlook, written during the war (1914-19) was first given by the same organisation on Mar. 23, 1922. Delius has never composed for special occasions or indeed taken any personal steps to secure performances. His works, written as the spirit moves him, have appeared in no order and the list of them indicates no special absorption in one type of music at a given time. It is exceptional to find that two concertos, that for violin and violoncello and that for violin, were completed at about the same time (1916). Even the incidental music to James Elroy Flecker's play *Hassan*, produced at His Majesty's Theatre, London (Sept. 1923), was written as long before its performance as 1920.

Delius is a solitary figure in the world of modern music. It is impossible to range him in the ranks of any given school. By reason of the circumstances of his birth and upbringing he stands apart from the main currents of musical influence, and he owes but little to any of the men who have done most to guide the onward course of modern music. Although his methods are fully as advanced with regard to harmony and form as those of any of his contemporaries, he appears to have moulded them for himself, not to have inherited them from any of his predecessors. From the later developments of Wagnerianism, as represented in the works of Strauss, he is as remote as from the 'atmospheric' experiments of Debussy and his fellows. One can detect traces of the influence of Grieg in some of his earlier compositions, but it is only in the most general sense that his maturer works can be said to owe anything to the initiative of other men. But if Delius, as regards his manner, is to a great extent 'orbed in isolation,' as regards his matter, he has proved himself susceptible to influences the most varied and diverse.

Much of Delius's music is confessedly pictorial, but it is something much more as well. It is less a painting of nature herself, than a study of the influence of nature upon the human soul. Delius views nature, not with that 'innocence of eye' which was one of the catchwords of the early impressionistic painters, but in the light of his own temperament, and it is the blending of the psychological with the pictorial element that gives to his music its peculiarly characteristic quality.

A musician so keenly alive to external influences has naturally been profoundly affected by the varied scenes in which his life has been passed. His early fantasia-overture, 'Over the Hills and Far Away,' was obviously inspired by the moorland scenery of his native Yorkshire. His experience of the tropical luxuriance of Florida is reflected in his opera,

'Koanga,' a work in which the negro element plays an important part; and to a certain extent in 'Appalachia,' that remarkable work in which the virgin forests and mighty waters of America seem to speak. 'Paris' is a musical picture of the composer's impressions of the great city by night. It is no mere exercise in musical realism, though it displays a keen sense of pictorial effect. Rather is it a personal record of the feelings engendered by the contemplation of the sleeping city. It is a study of effects rather than of causes, and is thus a peculiarly characteristic example of Delius's attitude towards music, and of his employment of its resources.

His attitude towards questions of pure musical form is best studied through the concertos. The early pianoforte concerto (in the form in which it is now known) shows him adopting more or less the standpoint of Liszt, that is a standpoint relying on contrasts, though the contrasts are drawn more nearly together than in the classical concerto form of separated movements. In the three later concertos, i.e. the double concerto, the violin and the violoncello concerto contrasts are less essential to the design; indeed in the violin concerto, the finest of the three, the whole design seems to grow out of an expansion of the initial idea. Though the features of traditional form are discoverable by analysis, the hearer gains an impression of continuous evolution in which direct contrast is little considered.

Like most modern composers, Delius is happier with the orchestra than with the human voice, which in some of his works he is apt to treat in what may be called too instrumental a fashion. 'A Mass of Life,' his most ambitious choral work, suffers from a disconnected libretto; the author thereof, Herr Cassirer, seems to have abandoned as impossible the idea of reducing Nietzsche's famous book into manageable limits, and to have contented himself with choosing those passages that seemed to lend themselves most readily to musical treatment without paying much attention to philosophical development. 'A Mass of Life' contains much striking and impressive music, but the general effect of the work, at any rate at a first hearing, is somewhat indefinite. In 'Sea-Drift,' on the other hand, Delius is at his best and strongest. The same may be said of the 'Song of the High Hills,' in which the wordless choir is treated as a second and more spiritualised orchestra. The voices, as it were, carry the development of the melodic material up above the snow line.

Two monographs must be mentioned. *Frederick Delius* by Max Chop was published in Germany (1907) in the series *Moderne Musiker*; *Delius* by Philip Heseltine, published London (1923), is a keenly appreciative study of his work as a whole, and of major composi-

tions in particular. It also contains full lists of works with dates of composition and of first performances.

The following summarises Delius's principal works:

OPERAS

- * *Irmelin*. 3 acts. MS.
- * *The Magic Fountain*. 3 acts. MS.
- * *Koanga*. 3 acts. MS.
- * *A Village Romeo and Juliet*.
- * *Margot la Rouge*. 1 act. MS.
- * *Fennimore and Gerda*.
- * Incidental music to 'Hassan.'

ORCHESTRAL

- * *Sur les cimes*. Tone poem. MS.
- * *Légende* for vln. and orchestra.
- * *Over the Hills and far Away*. Tone poem. MS.
- * *Appalachia*. Variations (with chorus).
- * *Paris: the Song of a Great City*.
- * *Life's Dance*. Tone poem.
- * *Brigg Fair*. An English Rhapsody.
- * *In a Summer Garden*.
- * *A Dance Rhapsody*. No. 1.
- * *Summer Night on the River*.
- * *On hearing the first Cuckoo in Spring*. For small orchestra.
- * *North Country Sketches: (a) 'Autumn,' (b) 'Winter Landscape,' (c) 'Dance,' (d) 'The March of Spring.'*
- * *A Dance Rhapsody*. No. 2.
- * *Eventyr*. Ballad.
- * *A Song before Sunrise*. For small orchestra.

CONCERTOS

- For PF. and orchestra.
- For vln. and v'cl.
- For vln.
- For v'cl.

CHORAL WORKS

- * *Sea-Drift*. Baritone solo, chorus and orchestra.
- * *A Mass of Life*. Soli, chorus and orchestra.
- * *Songs of Sunset*. Soli, chorus and orchestra.
- * *On Craig Dhu*. Unaccompanied chorus.
- * *Midsummer Song*. Unaccompanied chorus.
- * *Wanderers' Song*. Male voice chorus.
- * *Arabesk*. Baritone solo, chorus and orchestra.
- * *A Song of the High Hills*. Chorus and orchestra.
- * *Requiem*. Soli, chorus and orchestra.
- Two unaccompanied choruses. 'To be sung of a summer night on the water.'

SONGS

- Three English songs.
- Two songs. Verlaine.
- Seven Danish songs (with orchestra).
- Five German songs. Nietzsche and others.
- Various songs published separately.

CHAMBER MUSIC

- String Quartet. No. 1. MS.
- String Quartet. No. 2. (1916-17.)
- 3 Sonatas, vln. and FF. (1892, 1915, 1924.)
- Sonata, v'cl. and FF. (1 movement. 1917.)

R. A. S.; addns. C.

DELLER, FLORIAN JOHANN (b. Drosendorf, Austria, June 1729; d. Munich, Apr. 19, 1773), educated at the Karlschule, Stuttgart, was violinist in the court orchestra, 1751; also singer and afterwards Konzertmeister and court composer. In 1771 he went to Vienna, where his opera 'Il maestro di cappella' was performed; thence he went to Munich. He achieved his greatest successes with the composition of ballets by Noverre, but composed also a number of operas, symphonies, trio sonatas, including 6 sonatas for 2 violins and violoncello, with bass for harpsichord (Welcker, London), arias, vocal duets, etc. (See Q.-L.).

E. v. d. S.

DELMAS, JEAN FRANÇOIS (FRANCISQUE) (b. Lyons, Rhône, Apr. 14, 1861), dramatic bass singer, studied at the Conservatoire of his native town; then at that of Paris under Bussine (singing) and Obin (lyrical declamation), obtaining first prizes in both branches (1886). His débuts at the Opéra took place on Sept. 13 and 22, 1886, in 'Freischütz' and 'Les Huguenots.' Subsequently, until 1911, he sang and created 50 parts there. In the prologue to Leoncavallo's 'Pagliacci' (1903) he was unprecedentedly successful.

His Wagnerian parts, beginning with 'Lohengrin' (King), 1891, up to Gurnemanz in 'Parsifal,' 1914, attained a high artistic level. His creations of Wotan and Hans Sachs remain very striking interpretations. He has sung in Russia, England, Belgium, Holland, Portugal. His voice, of exceptional compass and tone, the authority of his acting, a firm declamation and ampleness of style, combined with an innate understanding of dramatic music, have made him one of the most remarkable operatic singers of his day.

BIBL.—*Nouvelle Revue*, Sept. 15, 1920; H. DE CURZON, *Croquis d'artistes*: J. F. Delmas.

M. L. P.

DELMAS, MARIE JEAN BAPTISTE, called Marc Delmas (b. St. Quentin, Aisne, Mar. 28, 1885), composer, pupil of the Paris Conservatoire, was rewarded with the Grand Prix de Rome in 1919. His production consists of chamber music, PF. pieces, a lyric legend, 'Anne Marie,' 'Les Deux Routes' (symphonic poem), a lyric drama, 'Iriam,' etc. M. L. P.

DELMOTTE, HENRI FLORENT (b. Mons, 1799; d. there, Mar. 9, 1836), librarian of the public library at Mons, and author of *Notice bibliographique sur Roland Delattre*, etc. (Valenciennes, 1836). This work was translated into German by Dehn. The authenticity of the chronicler Vinchant, from whom Delmotte took the chief part of his facts, has been contested since his death. At the time of his death Delmotte was collecting materials for the life of Philippe de Mons. M. C. C.

DEMACHI, GIUSEPPE (b. Alessandria della Paglia, Piedmont, early 18th cent.), was violinist in the court chapel, Turin, c. 1740; and at Geneva, 1771. On his MS. symphony in E flat he calls himself maître de concert of the Princess of Nassau-Weilburg. He composed symphonies, violin concertos and sonatas, six orchestra quartets (Welcker), concertini for 3 violins and violoncello; trio sonatas for 2 violins and bass, etc. (Q.-L.)

DEMANTIUS, JOHANN CHRISTOPH (b. Reichenberg, Dec. 15, 1567; d. Freiberg, Saxony, Apr. 20, 1643), German cantor and composer. He was an instructor at the St. Lorenz Academy in 1592, was living at Leipzig from 1594-95, and was cantor at Zittau in 1597, until in 1604 he was engaged in a similar capacity at Freiberg. He was a prolific composer, and was the author of several treatises on music and singing. Publications of his compositions between 1595 and 1650, besides the usual sets of motets, Magnificats, Te Deums, Introits, Psalms, etc., include a 6-part St. John Passion, several sets of Polish and German dances and galliards, with and without words, arranged for 4 and 5 voices—but some also for instruments, a set of German madrigals and canzonets with a 6-part Villanelle, funeral songs and epithalamiums, and a Tympanum Militare (a collection of 21 Songs of Triumph and Battle for 5, 6, 8 and 10 v.). (See Q.-L.) J. Mx.

DÉMAR, JOHANN SEBASTIAN (b. Gaus-schach, Bavaria, June 29, 1703; d. Orleans, c. 1832), pupil of Fr. X. Richter, Strassburg, organist at Weissenburg. He visited Vienna; went to Italy; to Paris, c. 1788; then to Orleans, where about 1806 he became director of the Grand Concert d'Amateurs, and music publisher. He composed concertos for various instruments, quartets, trios, duets, sonatas, etc., as well as tutors for sundry instruments.

E. V. d. S.

DEMEUR, ANNE ARSÈNE (née CHARTON) (b. Sanjon, Charente Inférieure, Mar. 5, 1824¹), a soprano opera singer, who was taught music by Bizot of Bordeaux, and in 1842 made her début there as Lucia.

She sang next at Toulouse, and in 1846 at Brussels. On July 18 in the same year she made a successful début at Drury Lane as Madeleine in 'Le Postillon,' and later sang with great success as Angèle ('Domino noir') with Couderc, the original Horace. On Sept. 4, 1847, she married M. Demeur the flautist.² In 1849-50 she was first female singer of Mitchell's French Company at St. James's Theatre, and became highly popular in various light parts, many of which were then new to England. She sang at the Philharmonic Concert of Mar. 18, 1850; in 1852 she appeared in Italian at Her Majesty's on July 27, as Amina; and on Aug. 5, in the Duke of Saxe-Coburg-Gotha's 'Casilda.' Mme. Charton-Demeur having sung with little success in 1849 and 1853 at the Opéra-Comique, adopted the Italian stage, and won both fame and fortune in St. Petersburg, Vienna, in North and South America, and in Paris at the Italiens as Desdemona in 1862. On Aug. 9 of that year she played the heroine on the production of Berlioz's 'Béatrice et Bénédict' so much to the composer's satisfaction that he requested her to play Dido in 'Les Troyens à Carthage,' produced at the Lyrique, Nov. 4, 1863. Berlioz has commemorated in his Memoirs her great beauty, her passionate acting and singing as Dido, although she had not sufficient voice wholly to realise his ideal heroine. On the conclusion of the run of the opera she sang at Madrid, but afterwards returned to the Lyrique. For many years Mme. Charton lived in retirement, but occasionally appeared at concerts, viz. at the Berlioz Festival at the Paris Opéra, with Nilsson in the 'duo-nocturne' from 'Béatrice et Bénédict,' Mar. 22, 1870; and finally sang at the Padeloup Concerts in 1879 on the production of 'La Prise de Troie' by the same composer. A. C.

DEMI-SEMI-QUAVER (Fr. *triple croche*; Ger. *Zweihundreissigstel*—whence the American

¹ Pouchin.

² Demeur, Jules Antoine (b. Hodincont-lez-Verriers, Sept. 23, 1810), studied the flute at the Brussels Conservatoire from Lahore—subsequently learnt the Boehm flute from Durus at Paris; from 1842-47 was first flautist at the Brussels Opera, and as such played at Drury Lane in 1846; he relinquished that post to accompany his wife on all her engagements.

'thirty-second note'; Ital. *semi-bis-croma*), the half of a semi-quaver; in other words, a note the value or duration of which is the quarter of a quaver and the thirty-second part of a semibreve. It is shown, when single, in this form,  and, when joined, thus, ; its rest is .

DEMOM, THE, opera in 3 acts; words by Vistakov, after Lermontov's poem; music by Anton Rubinstein. Produced St. Petersburg, Jan. 25, 1875; Covent Garden, in Italian, June 21, 1881. M.

DÉMOPHON, tragédie lyrique, in 3 acts; words by Marmontel; music by Cherubini; produced Académie Royale, Dec. 5, 1788.

DENEVE, JULES (b. Chimay, 1814; d. Aug. 19, 1877), violinist and composer; entered the Brussels Conservatoire in 1833. He studied the violoncello under Platel and Demunck; became professor of the violoncello at the École de Musique, and first violoncello at the theatre, and at the Société des Concerts at Mons. Within a few years he became director of the École, conductor of the Société des Concerts, and founder and conductor (1841) of the Roland de Latre Choral Society. He composed 3 operas for the Mons theatre; a number of choruses for men's voices; several cantatas (one for the erection of a statue to Orlando Lasso in 1858); a Requiem, and various orchestral pieces. Deneve was a member of the Société des beaux arts et de littérature, of Ghent, and honorary member of the most important choral societies in Belgium and the north of France.

M. C. C.

DENGREMONT, MAURICE (b. Rio, Mar. 19, 1866; d. Aug. 1893), a violinist of Franco-Brazilian origin. As a youth he made public appearances on the Continent with extraordinary success, but ultimately gave way to habits of dissipation. W. W. C.

DENHOF OPERA COMPANY. This company was formed by Ernst Denhof, a musician resident in Edinburgh, to give a performance of 'Der Ring des Nibelungen' in that city, following on its production in English at Covent Garden under Richter in 1908. The Edinburgh performances, the first to be given in the provinces, took place Feb.-Mar. 1910, under the direction of Michael Balling, and were sufficiently successful to warrant Denhof giving another series in 1911 at Leeds, Manchester and Glasgow. In 1912 another tour was made—Hull, Leeds, Manchester, Liverpool and Glasgow—the operas given being 'Elektra,' first performance in English, 'Orpheus,' 'Flying Dutchman' and 'The Mastersingers.' The 1913 season began at Birmingham with a repertory which included 'Rosenkavalier,' 'Pelléas et Mélisande,' both given for the first time in English, and the 'Magic Flute'; but these tours had unfortunately been less and

less of a financial success—it was new at that time to give opera on such lines, a large orchestra of admirable quality necessitating higher prices for seats—and the fortnight's season promised at Manchester had to be reduced to a week. At this moment Beecham came to the rescue of the company, and its personnel may be said in general to have come thenceforward under his control. (See BEECHAM and BRITISH NATIONAL OPERA Co.)

N. C. G.

DENIS, of Lyons (early 18th cent.), maître de chapelle, Tournay Cathedral; also at St. Omer. He wrote *Nouveau Système de musique pratique*, Paris, 1747. He is probably also the author of 'Sonates à violon seul avec la basse,' par M. Denis, i. livre, Paris, 1723, and *Nouvelle Méthode pour apprendre la musique et l'art de chanter, dédié aux dames de St. Cyr* (1730).

E. V. D. S.

DENKMÄLER DER TONKUNST, the title of a publication of ancient music, inaugurated by Dr. Chrysander with a reprint of Palestrina's 4-part motets. After 5 volumes, the series was merged in other publications, the first volume of CORELLI and COUPERIN (q.v.) being completed by a second volume of each. The contents were as follows:

1. Palestrina's 4-part motets, book I, ed. Bellermann.
2. Carissimi's Oratorios (Jephthé, Judicum Salomonis, Baltasar, Jonas).
3. Corelli's works, ed. Joachim, book I.
4. Couperin's suites, ed. Brahms, vol. I.
5. Urio's Te Deum (afterwards withdrawn, and issued as one of the 'Supplément' to Chrysander's edition of Handel).

DENKMÄLER DEUTSCHER TONKUNST. In May 1892 a committee of musicians, including Brahms, Joachim, Chrysander, Herzogenberg, Spitta and Helmholtz, undertook the publication of a series of musical reprints under this title, and with financial help or subvention from the Government. After the first two volumes a long interval elapsed, during which the Austrian musicians had followed the good example, and had started their own set of 'monuments' with Government support, under the general editorship of Guido Adler (q.v.). (See below: Denkmäler der Tonkunst in Österreich.) On the resumption of the scheme in 1900, the German series was divided into two sections, one for Germany and one for Bavaria, the latter being called *Zweite Folge* (second series). The following is a list of the volumes already published:

- I. Samuel Scheidt's 'Tabulatura nova' for organ, etc., ed. Max Seiffert.
- II. H. L. Hasler's 'Cantiones Sacrae,' ed. H. Gehrmann.
- III. F. Tunder's solo cantatas and choral works, ed. Max Seiffert.
- IV. J. Kuhnau's clavier works, ed. K. Fiedler.
- V. J. B. Ahle's selected vocal works, ed. Joh. Wolf.
- VI. Matthias Weckmann and Chr. Bernhard, selected vocal works, ed. M. Seiffert.
- VII. H. L. Hasler's Masses, ed. Jos. Auer.
- VIII. Ignaz Holzbauer, 'Günther von Schwarzburg,' opera in three acts, ed. J. H. Kretschmar, part I.
- IX. Do. Part II.
- X. Joh. Caspar F. Fischer's 'Journal du printemps,' and D. A. B.'s 'Zodiaco,' ed. E. von Werra.
- XI. D. Buxtehude, Sonatas, vln., v'cl. and harpsichord, ed. C. F. Blüml.
- XII. Heinrich Albert's 'Arien,' part I, ed. Renard Bernoulli.
- XIII. Heinrich Albert's 'Arien,' part II, ed. E. Bernoulli.
- XIV. Dietrich Buxtehude's 'Abendmüllers' and Church Organs, ed. Max Seiffert.

- IV. C. H. Gram's 'Monteruma,' ed. Albert Mayer-Reinach.
 XVI. Selected instrumental compositions of Melchior Franck and Valentin Hausmann, ed. Franz Bösche.
 XVII. Pasion-settings by J. Sebastiani and J. Thelle, ed. Friedrich Zelle.
 XVIII. Johann Krieger's 'Sonate da Camera,' ed. Karl Nef.
 XIX. Adam Kræger's 'Arien,' ed. Alfred Heuss.
 XX. J. A. Hasse's 'Conversione di Sant' Agostino,' ed. Arnold Schering.
 XXI. and XXII. Selected compositions of F. W. Zachow, ed. M. Seiffert.
 XXIII. Selected compositions of Hieronymus Praetorius, ed. H. Leichenfrit.
 XXIV. and XXV. H. Leo Hassler's 'Sacri Concentus,' ed. Joseph Auer.
 XXVI. and XXVII. J. G. Walther's complete organ works, ed. H. Leichenfrit.
 XXVIII. G. P. Telemann's 'Tag des Gerichts,' ed. 'Ino' (K. W. Ramler), ed. M. Schneider.
 XXIX. and XXX. Instrumental concertos by various German masters, ed. A. Schering.
 XXXI. Philippus Dulichius's 'Centuriae' (1607), ed. Rudolf Schwartz.
 XXXII. and XXXIII. N. Jommelli's 'Fetonte,' ed. H. Abert.
 XXXIV. Neue deutsche geistliche Gesänge (1644), ed. Joh. Wolf.
 XXXV. and XXXVI. Sperontes's Singende Muse an der Pleisse, ed. F. Buhle.
 XXXVII. and XXXVIII. Kessler's 'Krösus' and selection from 'L'inganno felice,' ed. Schneider.
 XXXIX. Selected works of Johann Schobert, ed. H. Riemann.
 XL. Selected works of A. Hammerschmidt, ed. Leichenfrit.
 XLI. Dulichius's 'Centuriae' (see XXXI.), ed. Schwartz.
 XLII. Songs of Ernst Bach and Valentin Herbing, ed. Kretzschmar.
 XLIII. and XLIV. Ballets of F. Deller and J. J. Rudolph, ed. Abert.
 XLV. Elsenhorst's Geistliche Lieder, composed by J. W. Franck, Böhm, Wockenfluss, ed. Kromolke and Krabbe.
 XLVI. and XLVII. Eriehar's Harmonische Freude, ed. Kinkelden.
 XLVIII. Johann Ernst Bach's Pasion, ed. Kromolke.
 XLIX. and L. Thuringian Motets of 1st half of 18th century, ed. Seiffert.
 LI. and LII. North German symphonies (vol. I.), ed. Schneider and Engelke.
 LIII. and LIV. Selected church compositions of Krieger, ed. Seiffert.
 LV. Palavicino's Gersusalem liberata, ed. Abert.
 LVI. J. C. F. Bach's 'Kindheit Jesu' and 'Auferweckung des Lazarus,' ed. Schönmann.
 LVII. Odes and songs of Telemann and Görner, ed. Krabbe.
 LVIII. and LIX. Church cantatas of Leipzig masters before Bach (Knäuper), ed. A. Schering.

SECOND SERIES (BAVARIA)

- I. F. F. Dall' Abaco, selected works, part I. ed. A. Sandberger.
 II. (I.) Joh. and W. H. Pachelbel's clavier works, ed. M. Seiffert.
 III. (I.) J. K. Kerll's selected works, part I. ed. A. Sandberger.
 IV. (I.) Symphonies of the Mannheim School (J. Stamitz, F. X. Richter, and A. Filtz), ed. H. Riemann. (II.) 1903 L. Senf's works, vol. I. ed. Th. Kroyer.
 V. (I.) Organ works of Joh. Pachelbel, with some by Hieronymus Pachelbel, ed. M. Seiffert. (II.) Selected works of Christian Erbsch (I.) and compositions of H. Leo Hassler (I.) ed. von Werra.
 V. (Two vols.) Works of H. Leo Hassler (II.) and annotations, etc., by A. Sandberger.
 VI. (I.) Geistliche Konzerte and Church Cantatas, by Nuremberg masters of the 17th century, ed. Max Seiffert. (II.) Selected compositions of Agostino Steffani, ed. A. Einstein and A. Sandberger.
 VII. (I.) Selected works of J. Staden, ed. E. Schmitz. (II.) Symphonies of the Mannheim School (I.) ed. H. Riemann.
 VIII. (I.) Selected works of J. Staden, ed. E. Schmitz. (II.) Symphonies of the Mannheim School, (II.) ed. H. Riemann.
 IX. (I.) Selected works of E. F. Dall' Abaco, part II. ed. A. Sandberger. (II.) Leopold Mozart's selected works, ed. M. Seiffert.
 X. (I.) Selected works of G. Aichinger ed. Kroyer. (II.) Selected works of A. Gumpelshaimer, ed. Mayer.
 XI. (I.) Hassler's works (pt. 3), ed. Schwartz. (II.) Steffani's opera 'Alarico' and bibliography of operas, ed. Kiernann.
 XII. (I.) Selected operas of Steffani, ed. Riemann. (II.) Symphonies of Kowler (Rostett), ed. Kaul.
 XIII. Selected works of J. E. Kindermann, ed. Schneider.
 XIV. (I.) Selected works of Traetta, ed. Goldschmidt. (II.) Gluck's 'Nozze d' Ercolo e d' Ebe,' ed. Abert.
 XV. and XVI. Chamber music of Mannheim, 18th century, ed. Riemann.
 XVII. Selected works of Traetta, ed. Goldschmidt.
 XVIII. Selected works of J. Krieger, Murschauer, J. P. Krieger, ed. Seiffert.
 XIX. and XX. Selected works of P. Torri, ed. Junker.
 XXI. Selected works of Kindermann, ed. Walner.

DENKMÄLER DER TONKUNST IN ÖSTERREICH

- I. (I.) J. J. Fux's Masses, ed. J. E. Habert and G. A. Glossner. (II.) Georg Muffat's 'Florilegium primum' for strings, ed. H. Rietach.
 II. (I.) J. J. Fux's Motets, part I. ed. J. E. Habert. (II.) Muffat's 'Florilegium secundum,' ed. Rietach.
 III. (I.) Joh. Stadlmayer's Hymns, ed. J. E. Habert. (II.) Marcantonio Cesti's 'Pomo d' oro,' part I. ed. Guido Adler. (III.) Gottlieb Muffat's 'Compomendium musicale,' ed. Guido Adler.
 IV. (I.) J. J. Froberger's clavier works, part I. ed. Guido Adler. (II.) Cesti's 'Pomo d' oro,' part II. ed. Guido Adler.
 V. (I.) Heinrich Isaac's 'Choralis Constantinus' book I. ed. E. Bezecny and W. Rabl. (II.) Heinrich Biber's violin sonatas, ed. Guido Adler.
 VI. (I.) Jacob Handl's (Gallus) 'Opus musicum,' motets, part I. ed. E. Bezecny and J. Mantuan. (II.) Froberger's clavier works, part II. ed. Guido Adler.
 VII. Six Trent Codices, M88. of vocal works of the 16th century, ed. Guido Adler and O. Koller.

- VIII. (I.) And. Hammerschmidt's 'Dialogi,' part I. ed. A. A. W. Schmidt. (II.) Joh. Pachelbel's 94 compositions for organ, ed. H. Botscher and M. Seiffert.

DENNER, JOHANN CHRISTOPH (b. Leipzig, Aug. 13, 1655; d. Nuremberg, Apr. 20, 1707), maker of wood wind instruments. Attempts to improve the old French shawm led him to the discovery of the clarinet. His sons continued and enlarged his factory. E. v. d. s.

DENSS, ADRIAN, lived at Cologne at the end of the 16th century, and published there, in 1594, a collection of lute music by famous masters under the title of 'Florilegium omnis fere generis cantionum,' etc.

DENT, EDWARD JOSEPH (b. Ribston, Yorkshire, July 16, 1876), educated at Eton and Cambridge, became professor of music at Cambridge in 1926. He was elected a Fellow of King's College, Cambridge, in 1902. He devoted himself to musical research, more particularly with regard to the 17th and 18th century Italian opera, and the fruits of his study appeared in articles contributed to the *Encyclopædia Britannica*, the second edition of this Dictionary and periodicals, including *The Musical Antiquary* and the *Riemann Festschrift* (1909). More important, however, are two books, *Alessandro Scarlatti, His Life and Works*, and *Mozart's Operas* (1913, translated into German, 1922), both of which showed that the writer possessed in a rare degree the power to form keen critical estimates on the results of a close and accurate research. His lectures on music at Cambridge brought together a strong body of musical students, and many of the younger generation of English musicians, composers, singers and research students owe their

ideals as well as their success to his teaching and example. His translations of 'Die Zauberflöte,' 'Figaro' and 'Don Giovanni' set a new standard in English translation of opera. The first of these was produced at Cambridge (Dec. 1, 1911) by members of the University. It and the others have been brought into general use at the 'OLD VIC' (q.v.).

Dent has taken an active part as arranger and producer of several old English operatic works, especially Purcell, at Cambridge, the 'Old Vic' (London) and Glastonbury. He undertook the production of Purcell's 'Dido and Aeneas' at Homburg in 1924. In 1919 he became music critic to the *Athenæum* (later *Athenæum and Nation*), and he was active in the formation of the BRITISH MUSIC SOCIETY (q.v.). But the special task he set himself was the restoration of artistic intercourse between the late combatant nations of the war. With this purpose he has spent much time on the Continent writing about English music in continental papers, and on continental music, particularly German, in the English press. It was largely due to him that the chamber music festival held at Salzburg in 1922 developed into a permanent organisation in the new INTERNATIONAL SOCIETY FOR CONTEMPORARY MUSIC, and Dent was elected its first president. c.

DENTICE, (1) FABRIZIO (b. Naples, 16th cent.), praised by Galilei as a famous lutenist. He lived for some time in Rome; then at Parma. He composed 'Lamentationi a 5 voci,' with appendix of Benedictus, Miserere, etc., published Milan, 1593; church compositions, madrigal, motets, etc., and lute pieces. (For list, see Q.-L.) (2) SCIPIONE (b. Naples, c. 1559; d. there, 1633), entered the Order of the Oratorio; and was in Rome in 1593. He composed 5 books of madrigals a 5 v., 1 book motets a 5 v., and according to *Riemann* 1 book 'Madrigali spirituali,' a 5 v. (3) LUIGI (Naples, 16th cent.), brother of Scipione (*Fétis*), wrote 'Due dialoghi della musica' (1553). A Miserere of his is said to be one of the finest written for the Papal Chapel. (Q.-L.; *Riemann*; *Fétis*.)

DENZA, LUIGI (b. Castellamare di Stabia, Italy, 1846; d. Jan. 27, 1922), entered the Conservatoire at Naples at the age of 16, and studied composition under Mercadante and Serrao. Although in 1876 an opera from his pen on the subject of Wallenstein was produced at Naples, his activity as a composer was almost entirely limited to songs, of which he wrote over 500 to Italian, French and English texts. Residing in London from 1879, he published a series of drawing-room successes, but he will always be best known as the composer of the Neapolitan ditty 'Funiculi Funicula' (1880), of which considerably more than half a million copies were sold, and translated versions issued in almost every civilised language. An unconscious compliment was paid to it by Richard

Strauss, who, under the impression that it was a genuine folk-song, put it into his orchestral suite, 'Aus Italien.' Denza was one of the directors of the London Academy of Music. From 1898 he was professor of singing at the R.A.M. E. E.

DÉPART, CHANT DU. According to some authorities (Castil Blaze, Chouquet, Pougin) this national air was composed by Méhul to some fine lines by Marie Joseph Chénier, for the concert celebrating the fourth anniversary of the taking of the Bastille (July 14, 1794). There are different versions of the circumstances in which the words were written. One of these is that Chénier was in hiding at the house of B. Sarrette, and that the first edition, by order of the National Convention, states merely 'Paroles de . . . ; musique de Méhul.' It must be remembered also that the sub-heading of the air is 'Hymne de guerre,' and there is no allusion to the taking of the Bastille in the text itself. In reality it was played for the first time on July 4, 1794, in a concert at the Tuileries, conducted by Sarrette, to commemorate military victories; then on July 14 and Aug. 10. It was in fact performed at nearly all official ceremonies from 1794-1800, and its theme was adapted to some 30 songs. The first verse is as follows:

Tempo di marcia.

La vic-tou-re en-chant-ant nous ou-vre la bar-
 riè-re, La li-ber-té gui-de nos pas; Et du Nord au mi-
 di la trom-pet-te guer-riè-re a sonné l'heu-re des com-
 bats. Tren-blez, en-ne-mis de la Fran-ce, Rois
 i-vres de sang et d'or-gueil! Le peuple souve-raîn s'a-
 van-ce; Ty-rans, des-cen-dez au cor-cueil! Le ré-pu-
 bli-que nous ap-pel-le, Sa-chez vaincre ou sa-chez pé-
 rir; Un Fran-çais doit vi-vre pour el-le, Pour
 elle un Français doit mou-rir! Un Français doit vi-vre pour
 el-le, Pour elle un Français doit mou-rir!

Brahm used the opening phrase, perhaps unintentionally, in 'The Death of Nelson.'

G. C.; addns. M. L. F.

BRL.—CONSTANT PIERRÉ. *Les Hymnes et les chansons de la Révolution, aperçu général et catalogue avec notices historiques, onomastiques et bibliographiques.* (Paris, 1904.)

DEPPE, LUDWIG (b. Alverdisen, Lippe, Nov. 7, 1828; d. Bad Pyrmont, Sept. 5, 1890), a distinguished pianoforte teacher, studied with Marxsen at Hamburg, subsequently with Lobe at Leipzig, and settled in Hamburg in 1857, where he founded a musical society, and was its conductor till 1868. From 1874–86 he was Hofkapellmeister in Berlin, and in 1876 he conducted the Silesian Musical Festival founded by Count Hochberg (*Riemann*). The special object of his system of technique, a minute description of which is given in Amy Fay's *Music Study in Germany* (Chicago, 1880; London, 1886), was the acquirement of an absolutely even touch by the adoption of a very soft tone and a slow pace in practising, a seat much lower than most teachers recommend, and minute attention to the details of muscular movement. Emil Sauer and Donald F. Tovey are among the most distinguished of the advocates of the Deppe system.

M.

DERING (DERING), RICHARD, Mus.B. (d. early in 1630), an early 17th-century musician, illegitimate son of Henry Dering of Liss, near Petworth, who was educated in Italy.

He returned to England with a great reputation as a musician, and for some time practised his profession in London, in 1610 taking the degree of Bachelor of Music at Oxford. He became organist to the convent of English nuns at Brussels in 1617. Upon the marriage of Charles I. in 1625, Dering was appointed organist to Queen Henrietta Maria, and was also one of the King's musicians. He died in the Roman communion. Dering's published works are wholly of a sacred kind. They consist of:

'Cantiones sacre sex vocum cum basso continuo ad organum,' Antwerp, 1597; 'Cantiones sacre quinque vocum,' 1617; 'Cantiones sacre ad melodium madrigalium elaboratae senis vocalibus,' Antwerp, 1618; 'Cantiones sacre quinque vocum,' 1619; 'Cantinetta' for 3 and 4 voices (respectively, two books, 1620 (the author's name is here, as often elsewhere, given as 'Richardo Deringo Inglesse'); 'Cantica sacra ad duos & tres voces, composita cum basso continuo ad organum,' London, 1622.

On the title-page of this work, which is dedicated to the Queen-Dowager, Henrietta Maria, Dering is styled 'Regiæ Majestatis quondam organista.' In 1674 Playford published a second set of *Cantica sacra* by various composers, in which are 8 motets attributed to Dering, but which Playford, in his preface, candidly admits were 'by some believed not to be his.' Dering also experimented successfully with a species of quodlibet made up of popular cries of various kinds. Orlando Gibbons wrote at least one piece in this manner ('The first London crie'), but Dering's 'Country Cryes' (a 5) would seem to have been very popular, as it is to be found in four different manuscripts (B.M. Add. MSS. 18,936-9, 29,372-7, 17,792-6, and the altus

part alone at 29,427). There is also another long and elaborate composition of his called 'The Cryes of London,' which may be the same as that entered in the Stationers' Register (1599), as 'The Crye of London, with the song'; this has recently been edited and published by Sir Frederick Bridge. The score of a so-called glee by Dering, 'Whilst fond desire,' is in Add. MSS. 29,386. An interesting passage in Wood's MS. *Lives of Musicians* is printed by Davey (*Hist. Eng. Mus.*); it records that when John Hingston (the private musician to Cromwell), with two of his pupils used to sing to the Protector, it was the Latin motets of Dering which 'Oliver was most taken with.' The following compositions by Dering are in MS.:

VIOLE MUSIC

Pavan (a 4) 'for 2 Trebles,' Ch. Ch. 423-8.
Three Phantasies, Almaine and Pavan (a 5). Ch. Ch. 423-8.
Pavan for three viols with basso continuo to the harpsichord.
Add. MSS. 18,940-4.
Pavan in G, for four viols. Add. MSS. 31,422.
Almaine in C flat (basso continuo part only). Add. MSS. 36,983/2b.
Five fancies (a 5). Add. MSS. 29,391-8.
Six fancies (a 5). Add. MSS. 17,792-6.
Two fancies (a 5). Add. MSS. 17,791-91.

ANTHEMS AND MOTETS

'Almighty God which through,' Durh., PH.; Add. MSS. 30,478-9 (Tenor part only).
'And the King was moved' (a 5). Add. MSS. 29,372-7.
'Gloria patri' (a 3) (printed in the *Cantica sacra* of 1662). Add. MSS. 11,608; Add. MSS. 30,321/3 (score).
'Justus cor' } Duets in score with bass part for harpsichord or
'Amicus cor.' } organ. Add. MSS. 11,608/30-31.
'Lord, Thou art worthy,' PH.
'Therefore with angels,' PH.
'Unto Thee, O Lord' (verse anthem). Yk.; R.C.M. 1045-51.

The library at Ch. Ch., Oxford, also contains many motets in MS., mostly published in the 'Cantica sacra' of 1662 and 1674 (see Catalogue of Mus. MSS., Part I.)

W. H. H.; addns. J. M^c.

D'ERLANGER, see ERLANGER, D.

DERRICK (17th cent.), an English church composer, some of whose music still exists in MS. There is a Short Service by him, including Te Deum, Benedictus, Kyrie and Creed, in the Cathedral Library at Durham; also a Jubilate, Kyrie and Creed, and a Latin Benedicite at Peterhouse, Cambridge. J. M^c.

DERUYTS, JEAN JACQUES (b. Liège, 1790; d. there, Apr. 11, 1871), maître de chapelle at several churches at Liège, and composer of church music. He was a teacher of César Franck. E. v. d. s.

DES, the German name for D flat.

DESARGUS, (1) FRANÇOIS XAVIER (b. Amiens, c. 1768; d. Paris, after 1832), harpist virtuoso. He began by cultivating his voice, was a chorister in Amiens Cathedral, and, after the Revolution, chorister at the Opéra in Paris. He had undertaken, in the interval, the study of the harp, in which he succeeded brilliantly. In a few years he became one of the most reputed professors for this instrument. He composed about 25 works for harp alone, harp and pianoforte, and songs with harp accompaniment—all of but slight value. He also wrote a good *Méthode de harpe* (Paris, Nader-

man, 1809), revised in 1816 under the title *Cours complet de harpe*.

(2) XAVIER, son of the preceding, also a talented harpist, appears at the end of 1822 in the orchestra of the King of Prussia at Berlin (Ledeber), after which he is found again in Paris in 1832, and then at Brussels. He abandoned his musical career about 1848. (*Fetis*; *Q.-L.*)

M. P.

DESAUGIERS, MARC ANTOINE (b. Fréjus, c. 1742; d. Paris, Sept. 10, 1793), a musical autodidact, who came to Paris in 1774; a friend of Gluck and Sacchini. He composed a Requiem for the memorial service for Sacchini. He had a vein for easy flowing melody and wrote several operas for the principal Paris theatres, a festival cantata, 'Hérodrame,' to celebrate the storming of the Bastille, songs, and *L'Art du chant figuré* (1776), a translation of J. B. Mancini's work.

E. v. d. s.

DESCANT (DISCANT). (1) The general term used from the 12th century onwards to cover every species of polyphony. 'Est autem discantus diversus consonus cantus,' writes the author of the *Discantus positio vulgaris* (Cousse-maker, *Scriptores*, i. 94b).

(2) In a more restricted sense descant is applied to any polyphonic composition which is subject to the rules of mensurable music in all its parts, as opposed to *organum purum*, in which the plain-song tenor is 'ultra mensuram.' Thus Franco (Cousse-maker, i. 118a) writes:

'Dividitur mensurabilis musica in mensurabilem simpliciter et partim. Mensurabilis simpliciter est discantus, eo quod in omni parte sua tempore mensuratur. Partim mensurabilis dicitur organum, pro tanto quod non in qualibet parte sua mensuratur. (Mensurable music is either wholly or partly mensurable. Descant is wholly mensurable because strict time is observed in all its parts. Organum is partly mensurable, inasmuch as one of its parts is not measured.)'

Franco's definition of descant, which is repeated with slight variations by nearly every theorist of the 13th and 14th centuries, is as follows:

'Discantus est aliorum diversorum cantuum consonantia in qua illi diversi cantus per voces longas, breves vel semibreves proportionaliter ad invicem quantur, et in scripto per debitas figuras proportionari ad invicem designantur.' ('Descant is the simultaneous and harmonious sounding of two or more diverse melodies, which are made equal to one another proportionately by the use of sounds of three degrees of length, represented in writing by the figures of the long, breve, and semibreve.')

He then divides descant into three classes: (1) 'Discantus simpliciter prolatus' ('id est sine fractionibus,' explains the author of the *Quatuor Principalia*, Cousse-maker, iv. 278a); (2) 'Discantus truncatus qui ochetus dicitur' (see HOCKET); (3) 'Discantus oopulatus qui copula nuncupatur' (see COPULA). 'Discantus simpliciter prolatus' is further subdivided into (a) 'Discantus cum eadem littera,' i.e. with the same words in all the parts,—'ut in cantilenis, rondellis et cantu aliquo ecclesiastico'; (b)

'Discantus cum diversis litteris,' i.e. with two or more different sets of words, 'ut in motetis qui habent triplum vel tenorem, quia tenor cuiusdam litterae equipollet'; (c) 'Discantus cum littera et sine,' i.e. with words in one part, but not in others, 'ut in conductis et discantu aliquo ecclesiastico qui improprie organum appellatur.'

Of more general interest are the rules of composition relating to the intervals that might be employed and to the movement of the counterpoint in relation to the CANTUS FIRMUS. Among the earliest are those contained in the *Discantus positio vulgaris*, which is thought to have been written about A.D. 1150. The author is speaking of *organum purum*, but it is clear that his rules are applicable to descant generally. He tells us that where the voices meet, i.e. on the strong beats, the unison, fifth or octave should be taken. For the intervening or passing notes the third, fifth and seventh are preferable to the second, fourth or sixth. He illustrates this by giving directions for the movement of the counterpoint over any possible progression of the canto fermo within the compass of an octave, but unfortunately, except in a few instances, ignores the passing notes. The progressions authorised are as follows:

'Quibus visis,' adds the author, 'et memoriae commendatis totam discantandi artem habere poteris, arte usui applicata.' ('Commit these rules to memory, and apply them in practice, and you will have mastered the whole art of descant.')

At a later date Franco, whose authority was universally recognised, gives the following classification of chords (Cousse-maker, i. 129a):

1. Perfect Concords, the unison and octave.
2. Less Perfect Concords, the perfect fourth and fifth.
3. Imperfect Concords, the major and minor third.
4. Imperfect Discords, the whole tone, major sixth and minor seventh.
5. Perfect Discords, the semitone, augmented fourth, diminished fifth, minor sixth and major seventh.

The descant, he tells us, may begin at the

fourth or major or minor third, as well as at the unison, fifth or octave, and should proceed by consonances 'commiscendo quandoque discordantias in locis debitis' ('with occasional discords in their proper place'). A concord should always be taken 'in principio perfectionis' or, as we should say, on the first beat of the bar, and an imperfect discord is always admissible immediately before a concord. Contrary motion should be employed as a rule, though similar motion is at times to be preferred 'propter pulchritudinem cantus.' Strict time must be observed until the penultimate note of the canto fermo is reached, 'ubi non attenditur talis mensura, sed magis est organicus ibi punctus' ('where there is generally an organ point in which time is disregarded,') (see ORGANUM). If a third part ('triplum') is added, care should be taken that any note that is a discord to the tenor or canto fermo, should be a concord to the descant or second part, and vice versa. The following example is given in the Oxford text (MS. Bodl. 842). The original is in 6-2 time throughout:

Philip de VITRY (*q.v.*), a writer of the early part of the 14th century, who is credited with the invention of the minim, still regards the minor sixth as a discord (Coussemaker, iii. 366). He forbids consecutive unisons, fifths and octaves, and allows not more than four consecutive thirds or sixths:

This last example, in which the C would doubtless have been sharpened in performance, serves to remind us that all the rules of descant were subject to modification by the application

of *musica ficta* or *falsa*, i.e. the sharpening or flattening of a note, 'propter consonantiam bonam inveniendam' (Coussemaker, i. 258a). The use of *musica ficta* was necessary to avoid the discord of *mi* against *fa* or *fa* against *mi*, i.e. of F against B \sharp either above or below. It was also frequently employed to provide a leading note in the cadence from sixth to octave (which may possibly account for the minor sixth being regarded as a discord by the theorists), and generally to bring intervals and progressions into harmony with the prevailing tonality. Franco leaves its application entirely to the discretion of the singer: 'Quando per rectam musicam consonantias utiles habere non poterit discantor, falsam fingat, sicut placeat' ('when a discanter cannot find a suitable consonance among the notes of the Gamut, let him introduce accidentals at his pleasure') (Coussemaker, i. 156b), and even in the early form of descant known as *organum purum*, he tells us that if the vox organalis should strike a discord on a long note, the tenor must either remain silent 'vel se in concordantiam fingat' (Coussemaker, i. 135a). (See MUSICA FICTA.)

(3) The term 'descant' is applied not only to the art of counterpoint, i.e. of adding one or more parts to a canto fermo, but also to the part, or the first of the parts, so added. 'Cantus vel tenor est primus cantus primo procreatus vel factus. Discantus est secundo procreatus vel factus, supra tenorem concordatus.' ('The canto fermo or tenor is the first melody to be constructed. Descant is the second melody constructed above the tenor and in harmony with it.') (Coussemaker, i. 356b.)

(4) A special form of descant noticed in the *Quatuor Principalia* (Coussemaker, iv. 294a) deserves mention. It is described as 'quaedam ars in qua plures homines discantare apparent, cum in rei veritate unus tantum discantabit' ('a device by which several singers appear to be descanting, when in fact only one is doing so'). Two or three voices double the canto fermo at the fifth, eighth and twelfth, disguising the bare diaphony 'frangendo et florendo notas, prout magis decet,' while a single skilled discanter completes the deception by filling in thirds and sixths, and avoiding concords. This is probably the 'pure descant' referred to in the *Discantus positio vulgaris*, and by the pseudo-Aristotle (Coussemaker, i. 96a, 269a).

J. F. R. S.

The less complicated of the above forms were frequently sung at sight, the only written music before the singers being the plain-song which served as tenor. This method was known as *discantus supra librum*, and lasted for four centuries, into Elizabethan days.

(5) In modern times there has been a successful revival of descant in connexion with English hymn-singing and other forms of church music, well-known congregational melodies being

treated with a superimposed counterpoint sung by the trebles of the choir. This is of course the actual arrangement of Tallis's 'Festal Responses,' but in practice congregations as a rule sing the treble descant of these responses instead of the tenor melody. Among other modern composers, Sydney Nicholson of Westminster Abbey has produced a descant setting of Merbecke's Communion Service, has used the form in his cantata 'The Saviour of the World,' and in his Solemn Te Deum written for the Peace celebrations in 1918—for the revival of descant was partly instigated by a desire to vary the unison singing of war-time choirs. The new method of treatment has also been applied to secular singing; but it is in the department of hymn-singing that it has taken the deepest root. Some of the principal recent publications are:

HYMNS.—A Collection of Fauxbourdons and Descants, by Riley (Mowbray, 1916). The Tenor Tune Book, by six composers (Faith Press, 1917, 3rd edn, 1924). A Book of Descants, by Alan Gray (Cambridge University Press, 1920). The Descant Hymns Tune Book, by G. Shaw (Novello, 1926). Single hymns by Martin Shaw and C. Hylton Stewart (Curwen).

CHANTS.—Sets of Canticles, XIV. Ancient Fauxbourdons (Plain-song and Medieval Music Society). F. Burgess and S. Ryley Shore (Novello). Anselm Hughes and E. W. Goldsmith (Faith Press). H. R. Norton (Faith Press). Also The Fauxburden Chant-book, by G. Secate and F. Burgess (Novello), and Psalms and Chants with Descants, by Alan Gray (Novello). See further the Service Books of the Gregorian Association from 1915 onwards.

SONG-BOOKS.—The Montgomeryshire Song-Book, and the Shropshire Song-Book, by Nicholas Gatty and Alan Gray (Stainer and Bell). National Songs with Descants, by Geoffrey Shaw (Novello).

A. H.

DESCARTES, RENÉ (b. La Haye, Touraine, Mar. 31, 1596; d. Stockholm, Feb. 11, 1650), the great philosopher who wrote *Compendium musicae* (1650), one of the most remarkable books on music of its time; translated into English by Lord Wm. Brouncker and published anonymously in 1653. A French edition by Nic. Poisson appeared in 1668; also in Descartes's letters are many passages dealing with music. (*Riemann*; *Q.-L.*)

DÉSERTEUR, LÉ, musical drama in 3 acts, words by Sedaine, music by Monsigny; produced, Théâtre des Italiens, Mar. 6, 1769, and revived, Opéra-Comique, Oct. 30, 1843.

DESMARETS, HENRI (b. Paris, c. 1659; d. Lunéville, Sept. 7, 1741), was brought up at the court of Louis XIV. His first compositions were sacred, and were made public under the name of Goupillier.

His first opera, 'Didon,' in 5 acts, was performed Sept. 11, 1693. It was followed by 'Circé' (1694), 'Théagène et Chariclée' and 'Les Amours de Momus' (1695), 'Vénus et Adonis' (1697), 'Les Fêtes galantes' (1698), and additions to 'L'Europe galante' (1699). About this time he got into trouble in consequence of a secret marriage with the daughter of a dignitary at Senlis, and had to escape to Spain, where he became, in 1700, 'Surintendant' to Philip V. In 1704 his 'Iphigénie en Tauroide,' with sundry additions by Campra, was given in Paris. In 1708 he settled in Lorraine as director of Duke Leopold's music.

At Nancy and Lunéville some of his 'divertissements' were performed, notably 'Le Temple d'Astrée,' 1709. For the marriage of Princess Elizabeth Thérèse with the King of Sardinia (Mar. 1737) he composed a motet and a Te Deum. His own marriage was sanctioned by Parliament in 1722. In that year his 'Renaud, ou la Suite d'Armide' was performed in Paris. M.; addns. M. L. P.

DES PRÉS, see JOSQUIN.

DESQUESNES, JEAN (b. Mons or St. Ghilain), became a prebendary of Tournay, June 31, 1581. He is mentioned (1630) in accounts of Duke Ernest, Governor of the Netherlands. He wrote 2 books of madrigals a 5 v., published in 1594 and 1603 (*Q.-L.*).

DESSAUER, JOSEF (b. Prague, May 1798; d. Mödling, near Vienna, July 8, 1876), was a pupil of Tomacek and Dionys Weber, became a successful and prolific writer of songs, string quartets, pianoforte pieces, etc., and wrote the operas 'Lidwina' (1836), 'Ein Besuch in St. Cyr' (1838), 'Paquita' (1851), 'Domingo' (1860) and 'Oberon' (not performed). His song 'Lockung' was for many years a favourite in England. (*Riemann.*)

DESSOFF, FELIX OTTO (b. Leipzig, Jan. 14, 1835; d. Frankfurt, Oct. 28, 1891), was a pupil of the Conservatorium there, studying with Moscheles, Hauptmann and Rietz. He was conductor in the theatres of various small towns between 1854 and 1860, was appointed in the latter year conductor of the court opera in Vienna, and had a position there in the Conservatorium of the Gesellschaft der Musikfreunde, and as director of the Philharmonic Concerts. In 1875 he became conductor at Carlsruhe, being succeeded in Vienna by Richter. In 1881 he was appointed first conductor at the opera at Frankfurt. He published some chamber music, etc. (*Riemann.*)

DESTINNOVA (DESTINN), EMMY (*née KITTL*) (b. Prague, Feb. 26, 1878), noted dramatic soprano, received instruction at Prague in violin-playing from Lachner and singing from Fr. Marie Loewe-Destinn, whose latter name she adopted 'from gratitude for her artistic progress' (*Monthly Musical Record*). In Aug. 1898 she made her début, with great success, at the New Royal Opera-House, Berlin (formerly Kroll's), as Santuzza and sang there in the 400th performance of 'Tannhäuser' (first performed there Jan. 7, 1856). In September she made her débuts at the Royal Opera as Santuzza, Valentine and Mignon; became a great favourite, and remained there until 1908. In 1901, and again in 1906, she was very successful as Diemut in 'Feuersnot,' and as the heroine in 'Salomé,' on the production of Richard Strauss's operas in Berlin. In 1901, on leave of absence, she sang at the Colonne Concerts, Paris, and as Senta at Bayreuth. On May 2, 1904, she made her début at Covent Garden,

with remarkable success, as Donna Anna, and sang the same season as Nedda in 'Pagliacci,' Elia, etc. She became very popular and remained there until 1914. She sang in the first productions in England of 'Madama Butterfly,' July 10, 1905, and 'Tess,' July 14, 1909. On May 7, 1907, she sang as Salomé at the Châtelet, Paris, under the direction of the composer, with great success. From 1908-14 she sang in America and created there (N. Y. Dec. 10, 1910) the part of Minnie in 'La Fanciulla del West' (Puccini), after which she returned to Europe. In May and June 1919 she sang (as Emmy Destinova) at the Czecho-Slovak Festival, Queen's Hall, and later for a few nights at Covent Garden in 'Un Ballo' and 'Aida.' She then went back to Prague. She has produced a drama, 'Rabel,' and has also written poems and novels. She is one of the greatest artists of the time, being equally talented both as a singer and an actress. A. C.

DESTOUCHES, ANDRÉ-CARDINAL (b. Paris, 1672/73; d. there, Feb. 8, 1749), originally a sailor who took ship on the frigate *L'Oiseau* (1685) sent to Siam on a scientific mission, afterwards became one of the 'mousquetaires du roi,' and at the age of 25 leapt into fame with his *Pastorale héroïque*, 'Issé' (Dec. 17, 1697).

He had abandoned his military career in 1696 and studied composition under Campra. He held the offices of 'Inspecteur général de l'Académie Royale de Musique' (1713), 'Surintendant de la musique du roi' (1727), and directed the Opéra from 1728-31, when his musical career came to an end. His other works for the French stage are as follows:

Amadis de Grèce (1699); *Marthésie* (1699); *Omphale* (1701); *Le Carnaval et la folie*, comédie-ballet (1704); *Le Professeur de folie* (1706); *Calistobé* (1712); *Télémaque et Salpée* (1714); *Hébéphantie* (1718); *Les Éléments*, an elaborate ballet in which Louis XV. danced (Dec. 31, 1721), Destouches's best work, to which Lalande contributed two numbers; *Les Stratagèmes de l'Amour*, in three acts and prologue (1726).

The last-named work, unlike all the other operas, which have 5 acts and a prologue, has only 3 acts and prologue. 'Omphale,' 'Issé,' 'Les Éléments' (edited by V. d'Indy) have been published in the collection 'Chefs-d'œuvre classiques de l'Opéra Français.' Besides these dramatic works, some of which contain passages of considerable dignity and beauty, Destouches wrote 2 cantatas, 'Enone' (1716) and 'Sémélé' (1719). Destouches's melody is concise and elegant, his invention being specially harmonic and instrumental. His style is altogether of a 'galant' and pastoral kind, and his music contains qualities which make his work akin to Rameau's, though his recitative does not differ from that of Lully.

DESTRANGES, LOUIS AUGUSTIN ÉTIENNE ROULLÉ (b. Nantes, Mar. 29, 1863; d. there,

May 31, 1915), a French musical critic who did much for the advancement of Wagner's cause in France and for the development of the modern French school. He edited (1890) *L'Ouest-Artiste*, an important French musical review. He was a contributor to the *Guide musical* and to the *Monde Artiste*, in the latter of which he gave an account of an interview with Verdi at Genoa in 1890, when that composer expressed his opinions of certain French musicians in a way that made a sensation in French musical circles. Destranges lived out of Paris, and devoted himself to an effort to make his native town a musical centre. He wrote an interesting study on *Le Théâtre à Nantes depuis ses origines*. His chief critical works are:

Les Interprètes musicaux du Faust de Goethe; *Les Œuvres lyriques de César Franck*; *L'Œuvre théâtral de Meyerbeer*; *Ferrail de d'Indy*; *Les Femmes de Wagner*; *Tannhäuser*; *Le Rêve d'Erneste* (and other works of the same master); *Samson et Dalila de Saint-Saëns*; *Souvenirs de Bayreuth*; *Consonances et dissonances*. DESWERT, see SWERT.

DETROIT. (1) Detroit Symphony Orchestra.—A small orchestra was established in Detroit, Michigan, in 1914, through the efforts of Weston Gales, a young American conductor. He continued at its head till the middle of the season of 1917-18, when he resigned. For the rest of that season several guest-conductors were engaged, among them Ossip Gabrilowitsch, whose performances aroused great interest. It was thereupon decided to enlarge the orchestra, place it on a sound financial basis, and engage Gabrilowitsch as its permanent conductor. A new orchestral hall was built at a cost of nearly \$1,000,000, seating 2100 people. The season of 1919-20 was so successful that it was decided to increase the size of the orchestra to 100 men. The cost of this was so great, however, that in subsequent years the number has been reduced to 86.

The season of the orchestra is 28 weeks, in the course of which 16 pairs of symphony concerts are given under Gabrilowitsch. Twenty-four Sunday concerts are given under the direction of Victor Kolar, the assistant conductor, as well as a series of 5 'young people's' concerts, and one of 10 public school concerts, with free admission to school children. In addition to these, about 25 concerts are given on tour outside of Detroit.

The management of the orchestra has made the interesting experiment of engaging an 'educational director,' who lectures at the young people's concerts and supervises courses in the appreciation of music in the public schools, among the women's clubs, and various mercantile establishments and great industrial organisations of the city. R. A.

(2) The Conservatory of Music, founded in 1874 by Jacob H. Hahn, has a staff of some 70 teachers, and students numbering over 1600.

It is regarded as an important educational institution.

(3) The Institute of Musical Art was founded in 1914, and under its president, Guy Beviés Williams, with a staff of 50 teachers, quickly established its reputation (*Amer. Supp.*). c.

DETT, ROBERT NATHANIEL (*b.* Drummondville, Quebec, Oct. 11, 1882), pianist and composer. He is said to be the first negro to receive the degree of Mus.B., which was given him by the Oberlin (Ohio) Conservatory. He has taken a prominent part in forwarding the musical education of negroes in the United States, and in many of his compositions has used negro themes and negro idioms. R. A.

DETTINGEN TE DEUM, THE, written by Handel to celebrate the victory of Dettingen (June 26, 1743). 'Begun July 1743'; first performed (not at the thanksgiving service, July 28, but) at the Chapel Royal, St. James's, Nov. 27, 1743. Many of the themes and passages are from URIO (*q.v.*).

DEUS MISEREATUR is the psalm (lxvii.) used in the evening service of the Anglican Church after the lessons, alternatively with the Nunc Dimittis. (See SERVICE.)

DEUTSCHER LIEDERKRANZ, see NEW YORK.

DEUTSCHE TANZ, see ALLEMANDE.

DEUX JOURNÉES, LES, comédie lyrique in 3 acts, words by Bouilly, music by Cherubini; produced, Théâtre Feydeau, Jan. 16, 1800. Various German versions are 'Der Wasserträger,' 'Die Tage der Gefahr,' and 'Graf Armand, oder die Zwei unvergesslichen Tage,' and the English titles 'The Escapes' and 'The Water Carrier'; produced, in a very mutilated state, in London 1801, and Covent Garden, Nov. 12, 1824, with the 'overture and all the music'; in Italian, Drury Lane, June 20, 1872, as 'Le due giornate,' for one night only; again revived, Princess's Theatre, by the Carl Rosa Co., Oct. 27, 1875. c.

D'EVE, see EVE, D'.

DEVELOPMENT, a word used in two somewhat different senses; on the one hand of a whole movement, in a sense analogous to its use with reference to an organism; and on the other of a subject or phrase, with reference to the manner in which its conspicuous features of rhythm or melody are employed by reiteration, variation, or any other devices which the genius or ingenuity of the composer suggests, with the object of showing the various elements of interest it contains.

The term is very apt and legitimate when used in the above senses, which are in reality the complements of one another; for the development of a movement is rightly the development of the ideas contained in its subjects; otherwise in instrumental music neither purpose nor unity of design could be perceived. It must, however, be borne in mind that the

mere statement of a transformed version of a subject is not development. A thing is not necessarily developed when it is merely changed, but it is so generally when the progressive steps between the original and its final condition can be clearly followed.

The most perfect types of development are to be found in Beethoven's works, with whom not seldom the greater part of a movement is the constant unfolding and opening out of all the latent possibilities of some simple rhythmic figure. Reference may be made to the first movement of the symphony in C minor; the scherzo of the ninth symphony; the allegro con brio of the sonata in C minor, op. 111; the last movement of the sonata in F, op. 10, No. 2; and the last movement of the sonata in A, op. 101. C. H. H. P.

DEVIIENNE, FRANÇOIS (*b.* Joinville, Haute-Marne, c. 1760; *d.* Charenton, Sept. 5, 1803), a celebrated flautist and composer; entered the army as oboist, was a bassoon-player at the Théâtre de Monsieur, 1788, and at the Grand Opéra, 1796. He was also appointed professor at the Conservatoire. Fétis says that he was equally good on the flute and bassoon and had a general knowledge of all other instruments. He created a new kind of literature for wind instruments, and, thus encouraging players to improve their technique, raised the standard of the French orchestra. The centre of his activity lay in his work as a composer, and in that capacity he was held in high esteem even beyond the middle of last century. His flute Tutor was still in use within recent times. (For list of works, see *Q.-L.*; also *Fétis*.)

DEVIL'S OPERA, THE, opera in 2 acts, words by G. Macfarren, music by G. A. Macfarren; produced, English Opera House, Aug. 13, 1838.

DEVIN DU VILLAGE,¹ LE (The Village Sorcerer), Intermède, in 1 act; words and music by J.-J. Rousseau; produced, Fontainebleau, Oct. 18, 1752, and Académie Royale, Mar. 1, 1753. It was translated and adapted as 'The Cunning Man' by Dr. Burney in 1766. G.

DEVRIENT, see SCHRÖDER-DEVRIENT.

DEZÈDE (DEZAIDES), N. Reichard says he was born at Turin, 1744, and died at Paris c. 1792, but nothing is known about his origin and he has been held in turn to be of French, German and Italian nationality. He had received a good education, and an abbé instructed him in music. He was then living in Paris and received an allowance of 25,000 francs per annum, which was doubled on his coming of age. He tried unsuccessfully to discover his parentage, but was told that if he persisted with his inquiries his allowance would be

¹ There is a modern reprint in vocal score by Charles Chail (Bonn, Geneva, 1924).

stopped. He continued, nevertheless, with the result of which he had been warned. He then turned his attention to the opera, and in 1772 his opera 'Julie' was given at the Théâtre des Italiens, and meeting with success was followed by 10 or more operas at this theatre, and at least 3 at the Opéra. (For list, see *Fétis*; *Q.-L.*) E. v. d. s.

D'HERBAIN, see HERBAIN, D'.

D'HERVELOIS, see CAIX D'HERVELOIS.

DIABELLI, ANTON (ANTONIO) (b. Mattsee, near Salzburg, Sept. 6, 1781; d. Vienna, Apr. 7, 1858), head of the firm of Diabelli & Co., music publishers in Vienna, and composer of pianoforte and church music.

He was at first a chorister, and afterwards studied at the Lateinschule at Munich. Being intended for the priesthood he received a good general education in the convent of Raichenhaslach, and profited much from association with Michael Haydn, who superintended his musical studies. When the Bavarian convents were secularised in 1803, he gave up the idea of taking orders, went to Vienna, and was warmly received by Joseph Haydn. His piano pieces and his numerous arrangements had an immense popularity. His masses, especially the 'Landmessen' (for country churches), are widely spread in Austria, being for the most part easy to execute, and interesting, if not particularly solid. He also composed songs for one and more voices, and an operetta, 'Adam in der Klemme.' He soon became a popular teacher of the pianoforte and guitar, made money enough to become partner with Peter Cappi, the music publisher, in 1818, and in 1824 the firm became Diabelli & Co. In 1852 it became C. A. SPINA (*q.v.*), and in July 1872 F. Schreiber, under which name it continued, though the business was purchased in May 1876 by A. Cranz of Hamburg. Its publications amounted to over 25,000 in 1880. In Diabelli's time it acquired the publications of the extinct firms of Artaria, L. Kozeluch, Th. Weigl, Berka, Leidesdorf, Pennauer and Traeg, and in 1855 those of Carlo Mecchetti. The firm published specially for Schubert, Czerny, Strauss and Lanner; also Marpur's *Abhandlung von der Fuge*, revised by Sechter, and Reicha's *Lehrbuch*; and, under the title *Ecclesiasticon*, a collection of church music. In 1874 a fresh catalogue of publications was issued, and a thematic catalogue of Schubert's published works, compiled with his usual exhaustive accuracy by Nottebohm. Diabelli's quiet and unassuming life made him many friends, some of whom in 1871 erected a tablet to his memory on the house at Mattsee in which he was born. Beethoven wrote his 3 Variations (op. 120) on a waltz of Diabelli's, and this alone will preserve his name to posterity should it disappear in other ways. (See VARIATIONS and VATERLÄNDISCHE KUNSTLERVEEIN.) C. F. F.

DIADESTE, opera-buffa; words by Fitzball, music by Balfe; produced, Drury Lane, May 17, 1838.

DIAGHILEV, SERGEI PAVLOVITCH (b. Government of Novgorod, Mar. 19, 1872), impresario, studied music while reading law at the University of St. Petersburg. He took to journalism in 1897 and organised art exhibitions. In 1899 he founded an important art review, which ceased to appear in 1905. It was in 1907 that he entered upon the activities on behalf of Russian music and art which were to secure him an international reputation. He began by giving concerts of Russian music in Paris, where he produced Moussorgsky's 'Boris Godounov' in 1908, with a Russian company that included Chaliapin. His first productions of Russian ballet, again in Paris, date from 1909, when his artistic taste and genius for organisation created a new type of ballet in which choreographic, histrionic, pictorial and musical art all played interdependent parts of equal importance (see BALLET-DANCING).

The company first came to London in 1911 (Covent Garden, June 21), and in the seasons of 1913 and 1914 Diaghilev was invited by the late Sir Joseph Becham to collaborate in a remarkable series of Russian opera and ballet performances at Drury Lane Theatre. After repeated appearances at the London Coliseum, the popularity of the 'Russian Ballet' had grown to such an extent that various theatres (Alhambra, Empire, Prince's, His Majesty's) were engaged at intervals for seasons exclusively devoted to Diaghilev's productions, and London became for a time the company's headquarters, several important new works being seen there for the first time. Since 1921 many novelties, mainly due to French artists and composers, have been first introduced to Paris, Monte Carlo having become the company's second home. But Diaghilev continues to visit all the most important art centres in Europe and America. E. B.

DIAMANTS DE LA COURONNE, LES, opéra-comique in 3 acts, words by Scribe and St. George, music by Auber; produced, Opéra-Comique, Mar. 6, 1841; Princess's Theatre, London, May 2, 1844, as 'Crown Diamonds.'

DIAPASON (1) originally meant the interval of an octave, because it was διὰ πασῶν χορδῶν συμφωνία, the consonance arrived at by going 'through all the strings of the lyre' from first to last. In this sense it is used by Dryden:

'Through all the compass of the notes it ran,
The diapason closing full in man.'

In French it came to mean a tuning-fork, and hence also the PRICH (*q.v.*) which was as it were registered by it; the 'Diapason normal' being the standard of pitch supposed to be generally accepted in France, which gave 435 vibrations for the *a'* above middle C at a temperature of

59° Fahr. which is equivalent in equal temperament to A = 439 at 68° Fahr. C. H. H. P.

(2) The diapason stops of the organ consist of the bold and dignified flue-pipe work of foundation tone and pitch, which forms the backbone of the tonal department of the organ or manual to which it belongs.

Diapasons are open and stopped pipes. The Open Diapason as a Great organ stop consists of cylindrical open metal pipes of true speaking length, the CC pipe approaching 8 feet in length and being about 6 inches in diameter.

In the pedal department the pipes are of true 16 feet speaking length, and are usually, —but not always—made of wood; they are square, or rather rectangular, in section.

The Stopped Diapason is of wood (or of metal in the treble), and although the pitch is of 8 feet *tone*, the pipe itself is of only half its true speaking length, the upper end being closed by a stopper or tampion, which causes it to sound an octave below the true open speaking length.

In the treble portion the stoppers are pierced, which imparts a reedier quality to the tone.

The tone of stopped pipes is soft, full, smooth and mellow, blending and contrasting well with other qualities of tone. (See ORGAN.) T. E.

DIAPENTE, the ancient Greek name for the consonance of the fifth. By the musicians of the 17th and 18th centuries a canon in the fifth was called in Epidiapente or Subdiapente, as it answered above or below.

DIAPHONE, an organ stop, pipes of iron or wood of 8-, 16- and 32-foot pitch, made by R. Hope-Jones. The actual invention has been disputed.¹ The tone is of extraordinary power and can be made to resemble Diapason, Diapason-tuba or Diapason-trombone. In all cases, however, the foundation tone is very prominent. (See ORGAN: VOCABULARY OF STOPS.)

T. E.

DIAPHONIA. (1) Dissonance as opposed to 'symphonia' or consonance.

'Dissonantia et Diaphonia idem sunt: nam, ut dicit Isidorus, diaphoniae sunt voces discrepantes sive dissonae, in quibus non est jocundus sed asperus sonus.'²

(2) A primitive form of DESCANT (*q.v.*), also known by the name of organum, described by Hucbald³ and Guido, in which the melody of the vox principalis was accompanied by the vox organalis at the fourth below, subject only to certain rules for the avoidance of the dissonant tritone

and

Hucbald's scale was laid out in tetrachords thus:

¹ See *Organs and Tuning*, p. 755.

² Marcellinus of Padua ap. Gerbert, *Scriptores*, III, 808.

³ The *Musica Sacristiana*, which contains the fullest account of Diaphonia, is by some attributed not to Hucbald, but to Odo of Clugny.

the four notes of the second tetrachord being the four finals of the church modes. The golden rule of diaphony for the avoidance of the tritone, or dissonance between the second note of one tetrachord and the third note of the tetrachord below, is that the vox organalis must never descend below the fourth note of a tetrachord, though it may move from one tetrachord to another according to the movement of the vox principalis. Hucbald illustrates this, in his own peculiar notation, by examples of the same melody in each of the four authentic modes, thus:

Princ. i.

Org. Tu pa-tris sem-pli-ter-nus es A - li-us

ii.

iii.

This transposition, we are told, is not apt for organal response, because the B is generally sung natural.

iv.

In the first of these examples Gerbert prints B₂ and A as the last two notes of the organum, but the author's comment:

'You will notice that the vox organalis can begin here with a consonance at the fourth below, but that it does not afterwards pass below C on account of the tritone between B₂ and E.'

shows that C and D are the notes intended.

Hucbald assures us that diaphony, if sung slowly and with the gravity which befits it—'quod suum est hujus meli,' cannot fail to produce a pleasing effect.⁴

Guido gives us the additional information that the intervals of a whole tone, major third and perfect fourth are admissible, but not that of a semitone, and rarely that of a minor third. It follows that the fifth, sixth and seventh modes, which have a whole tone, major third and perfect fourth above F, C and G respectively, are best adapted for diaphony, and that the third and fourth modes, which have a semitone and minor third above B₂ and E respectively, are the least suitable.

The vox organalis, he tells us, should not, as a rule, descend below C, or, in the higher registers, below F. If a B₂ occur in the vox principalis, the organum must take G. The close may be either at the fourth below or at the unison. In the latter case the vox organalis should rise to the unison by a whole tone or major third, not by a semitone or minor third.

⁴ Gerbert, I, 166, 188; Coussemaker, II, 75.

(3) Both writers appear to apply the term diaphony to a still cruder form of descant, in which the melody was accompanied *throughout* at the fourth below, or sometimes at the fifth below. In this case the vox organalis might be doubled at the octave above, or the vox principalis at the octave below; or four, or even six parts could be obtained by doubling or trebling both principal and organum. If we may judge by the disposition of the tones and semitones in one of Hucbald's examples, as printed by Gerbert, i. 166, the tritone and imperfect fifth were avoided in this form of descant by the use of B \sharp and F \sharp .

In the first volume of the *Oxf. Hist. Mus.*, Wooldridge has devoted a chapter to the diaphony of Hucbald and Guido, to which the reader is referred for more precise information on a subject that is not free from difficulty.

(4) The term diaphonia is also applied by John Cotton and other writers to the next stage in the development of descant, in which contrary motion is employed, and the vox organalis moves freely both above and below the canto fermo. The following example is from the anonymous treatise printed at p. 225 of Coussemaker's *Histoire de l'harmonie au moyen âge*:

By the 13th century the term diaphonia for polyphony had generally given place to discantus, though even so late a writer as Johannes de Muris speaks of 'diaphonia sive discantus.'¹

J. F. R. S.

DIARMID, opera in 4 acts, founded on Celtic legends. Written by the 9th Duke of Argyll (then Marquis of Lorne); music by Hamish MacCunn (op. 34). Produced, Covent Garden (Royal Carl Rosa Co.), Oct. 23, 1897.

DIATESSARON, the ancient Greek name for the consonance of the fourth—*διά τεσσαρῶν χορδῶν συμφωνία*.

DIATONIC is the name given to music which is confined to notes proper to the signature of the key in which they occur—such as the white notes only in the key of C major. The different forms of the minor scale are considered diatonic. Therefore the major seventh and major sixth, which often occur instead of the minor seventh and minor sixth in the signature of a minor scale, can be used without the passage ceasing to be diatonic.

C. H. H. P.

DIAZ, GABRIEL (b. circa 1590; d. Madrid, after 1631), a Spanish composer of secular and sacred music attached to the Spanish court. (The Gaspar Diaz mentioned by van der Straeten as being a choir-boy in the Capilla Flamenca of Philip III. in 1601 is probably a

different person.) Gabriel Diaz is recorded as assistant choirmaster at the Chapel Royal, Madrid, in 1606, and also as maestro de capilla at the monastery of the Encarnación. In 1611 he composed the Requiem for Doña Margarita of Austria and then relinquished his post. In 1616 he appears at Lerma, in 1621 in Granada, in 1624 at Córdoba, where he remained as capellán in the church of Santa Inés until 1631. In that year he was one of the judges in a competition to elect a new maestro de capilla at Granada, and afterwards became maestro at the convent of the Descalzas Reales, Madrid, a post formerly held by Victoria. His church music, mentioned in the catalogue of the library of John IV. of Portugal was lost in the Lisbon earthquake of 1755. Eight of his secular works, however, are printed in Aroca's edition of the Munich MS. 'Cancionero de Sablonara' (Madrid, 1916); and two are found in MS. 13,231 (Bibl. Medinaceli, Madrid). He was apparently a friend of the dramatist Lope de Vega, who dedicated a poem to him.

J. B. T.

DIBDIN, (1) CHARLES (b. Southampton, c. Mar. 4, 1745; d. Arlington Street, Camden Town, July 25, 1814), composer, was the son of a parish clerk at Southampton. His grandfather was a considerable merchant, who founded the village near Southampton which bears his name. Dibdin's eldest brother, who was twenty-nine years his senior, was captain of an Indian and father of the Rev. Dr. Thomas Frognall Dibdin, the well-known bibliographer.

Charles Dibdin was admitted a chorister of Winchester Cathedral in June 1756, and remained in the choir till Nov. 1759. The records of Winchester College give no support to the statement that he was at school there. He had a good voice and a quickness in learning, which induced Kent to compose anthems for him and teach him to sing them, and Fussell, who afterwards succeeded Kent as organist, taught him the rudiments of music and a few common tunes. All musical knowledge beyond that he acquired for himself, studying chiefly the concertos of Corelli and the theoretical works of Rameau. The place of organist at Bishop's Waltham becoming vacant, Dibdin offered himself for it, but was rejected on account of his youth. When 15 years old his eldest brother brought him to London and placed him in the music warehouse of Johnson in Cheapside, where, however, he did not remain long, a friend having advised him to try the stage. He obtained an engagement at Covent Garden Theatre as a singing actor. About the same time he began to write verses as well as music, in which he was encouraged by Beard, then manager of the theatre, who advised him to try his hand at something for the stage, promising to bring

¹ Coussemaker, *Scriptores*, II. 396a.

't out at Dibdin's benefit. He accordingly set to work and wrote and composed 'The Shepherd's Artifice,' a pastoral, which was performed at his benefit on May 21, 1764, and repeated in the following season, the author-composer performing the character of Strephon. He had performed in the summer of 1762 at the Richmond theatre on the hill; and he now obtained an engagement at Birmingham, where he not only played at the theatre but sang at Vauxhall.

In the beginning of 1765 the opera of 'The Maid of the Mill' was about to be produced at Covent Garden, and some difficulty arising with Dunstall, who was to have played Ralph, Dibdin was requested by Beard to undertake the part. He made a decided hit, and at once established himself firmly in the public favour. In 1767 he composed part of the music for 'Love in the City,' and in the next year two-thirds of that of 'Lionel and Clarissa.' In 1768 Dibdin transferred his services from Covent Garden to Drury Lane, where he signalled himself by his composition of the music of 'The Padlock,' and his admirable performance of Mungo in it. In the following year he was engaged to compose for Ranelagh, where he produced 'The Maid the Mistress,' 'The Recruiting Sergeant' and 'The Ephesian Matron.' He likewise composed some of the music for the Shakespeare Jubilee at Stratford-on-Avon in 1769. In 1772 Thomas King, having become proprietor of Sadler's Wells, engaged Dibdin to write and compose some little musical pieces to be brought out there. In 1774 Dibdin produced 'The Waterman,' and in 1775 'The Quaker,' pieces which kept uninterrupted possession of the stage for many years. At the end of the latter season he quitted Drury Lane owing to differences that had arisen between him and Garrick, and exhibited at Exeter Change a piece called 'The Comic Mirror,' in which well-known characters of the day were personated by puppets. In 1776 he took a journey into France, where he remained some time. On his return in June 1778 he was engaged as composer to Covent Garden Theatre at a salary of £10 a week, but he held the appointment for two or three seasons only. In 1782 he projected the erection of the Royal Circus (afterwards the Surrey Theatre), which was opened Nov. 7, 1782, Dibdin undertaking the general management, Hughes the equestrian department, and Grimaldi (father of the afterwards famous clown) the stage direction. For this theatre the ever-active pen of Dibdin was employed in the production of numerous little musical pieces and pantomimes. The first season was remarkably successful. In the second, dissensions broke out amongst the managers, in consequence of which he retired from the theatre. He then made an attempt to regain

his position at the patent theatres, and succeeded in getting his opera 'Liberty Hall' (containing the popular songs of 'Jack Ratlin,' 'The High-mettled Racer' and 'The Bells of Aberdovey') brought out at Drury Lane on Feb. 8, 1785. Soon afterwards he listened to a proposal to erect a theatre at Pentonville, where he purposed representing spectacles in which hydraulic effects should be introduced. He proceeded to some extent with the building, which he intended to call 'Helicon,' but his application for a licence was refused, and shortly afterwards a gale of wind destroyed the edifice and put an end to the project. Dibdin next meditated a visit to India, and, to raise funds for the purpose, in 1787-88 made a tour through a large part of England and gave entertainments. He published an account of this tour in 1788, in a quarto volume, under the title of *The Musical Tour of Mr. Dibdin*. In the summer of 1788 he sailed for India, but the vessel being driven to take shelter in Torbay, he finally abandoned his intention and returned to London.

Dibdin next resolved to rely on his own unaided exertions, and in 1789 produced at Hutchins's Auction Room, King Street, Covent Garden, the first of a series of 'table entertainments' of which he was author, composer, narrator, singer and accompanist, under the title of 'The Whim of the Moment.' On the first evening there was an attendance of only sixteen persons. Dibdin, however, persevered; he engaged the Lyceum and brought out 'The Oddities,' the success of which was at once decisive; and no wonder, for it contained, amongst others, the songs, 'To Bachelors' Hall,' 'Twas in the good ship Rover,' 'The Flowing Can,' 'Saturday night at sea,' 'Ben Backstay,' 'I sailed from the Downs in the Nancy,' 'The Lamplighter,' and 'Tom Bowling'; the last written on the death of his eldest brother, Captain Thomas Dibdin. And here it may be observed that nearly the whole of those sea-songs which gained for their author the appellation of the Tyrtæus of the British Navy, were written by Dibdin for his entertainments. In 1790 'The Oddities' was revised, and ran seventy-nine nights, when it was succeeded by 'The Wags,' which was performed for 108 nights.

The great sale of 'Poor Jack,' the copyright of which with eleven other songs he had sold for £60, and which in a short time had brought its purchaser a profit of £500, induced Dibdin about this time to become his own publisher. In 1791 he removed from the Lyceum to a room in the Strand, opposite Beaufort Buildings, which he opened under the name of Sans Souci, and where he remained for four years. He then built for himself a small theatre on the east side of Leicester Place, which he opened under the same name in 1796. In 1795 Dibdin

published a *History of the Stage*, in 5 volumes, and in 1803 his *Professional Life*, in 4 volumes. He had published several novels previously, such as *The Devil*, 1785; *Hannah Hewitt*, 1792; *The Younger Brother*, 1793; and a periodical, *The Bystander*, 1787. In 1802 Dibdin gave his entertainment in Dublin. In 1805 he sold his theatre and retired from public life. In 1803 Government granted him a pension of £200 per annum, but this being withdrawn on a change of ministry he was led to open a music shop in the Strand as a means of subsistence. The speculation, however, failed, and he became bankrupt. A subscription for his relief was opened in 1810, with part of which an annuity of £30 was purchased for himself, his wife and daughter successively. Subsequently his pension was restored to him. He brought out another play, 'The Round Robin,' at the Haymarket in 1811, and composed songs for Dr. Kitchener's 'Belle Assemblée.' Towards the end of the year 1813 Dibdin was attacked by paralysis, and died the following year. He was buried in the cemetery belonging to the parish of St. Martin-in-the-Fields, in Pratt Street, Camden Town, where there is a monument to his memory. Dibdin's two sons, Charles and Thomas, were well-known dramatists.

The following is a list of Dibdin's operas and other dramatic pieces. Of those marked thus * he was author as well as composer :

*The Shepherd's Artifice, 1763; Love in the City (part of the music), 1767; Damon and Phillida, Lionel and Clarissa (part of the music), and The Padlock, 1768; The Maid the Mistress, The Recruiting Sergeant, The Ephesian Matron, The Jubilee, Doctor Hualardo, Queen Mab, and The Captive, 1769; Pigmey Revels, 1770; The Wedding Ring, and The Institution of the Garter, 1771; *The Ladle, *The Mischance, The Brickbat Man, *The Widow of Abingdon, and The Palace of Mirth, 1772; The Trip to Portsmouth, The Deserter (partly selected from Monsigny and Hilliard), and *The Grenadier, 1773; *The Waterman, A Christmas Tale, and *The Cobler, 1774; *The Quaker, and The Two Misers, 1775; *The Seraglio, The Blackamoor, *The Metamorphoses, *The Razor Grinder, *Vo, Yea, or, The Friendly Tar, *The Old Woman of Eighty, *The Mad Doctor, *She is mad for a Husband, *England against Italy, *The Fortune Hunter, and *All's not Gold that Glitters, 1776; *Poor Vulcan, *Rose and Colin, *The Wives Revenged, *Annette and Lubin, and *The Milkmaid, 1778; Plymouth In an Uproar, *The Chelsea Pensioner, *The Mirror, and *The Touchstone, 1779; *The Shepherdess of the Alps, *Harclequin Freemason, and *The Islanders, 1780; *Jupiter and Alcmena, 1781; *None so blind as those who won't see, 1782; *The Barrier of Parnassus, *The Graces, *The Balcon, *Mandarin, or, The Refusal of Harlequin, *The Land of Simplicity, *The Passions, *The Statute, *Clump and Cudden, *The Benevolent Tar, *The Regions of Accomplishment, *The Lancashire Witches, *The Centaur, *Pandora, *The Long Odds, Tom Thumb, and Harlequin the Phantom of a Day (all for the Royal Circus), 1781; *The Merry Maid, 1785; Harvest Home, 1787; *A Loyal Effusion, 1797; and *Hannah Hewitt, 1798.

His table entertainments were—

The Whim of the Moment, and The Oddities, 1789; The Wags, 1790; Private Theatricals, 1791; The Quizzes, 1792; Collision, 1792; *Twelve in the Air, 1793; Nature in Noddy, and Great News, 1794; Will of the Wimp, and Christmas Gamboles, 1795; Datchet Mead, and The General Election, 1796; The Sphinx, and Valentine's Day, 1797; King and Queen, 1798; A Tour to the Land's End, and The Goose and the Grindiron, 1798; Tom Wilkins, 1799; The Glee House, 1800; A Frisk, 1801; Most Votes, 1802; New Year's Gifts, Britons, strike home, Heads and Tails, Valentine's Day, The Election, A Trip to the Coast, The Frolic, 1804; The Professional Volunteers, Rent Day, Commodore Pennant, Heads or Tails, and Cecilia, 1805; Wives and Sweethearts, Broken Gold (Drury Lane), 1806-6

Besides these Dibdin was author of 'The Gipsies,' a comic opera for which Dr. Arnold composed the music, *The Harmonic Preceptor*, a didactic poem, 1804, and *The Musical Mentor, Music Epitomised*. (Corr. and addns. from D.N.B. See also *Mus. T.* for 1886, p. 68. A

bibliography of Dibdin's works. by a descendant, appeared intermittently in *Notes and Queries*, July 1901-June 1904; a supplementary bibliography by Frank Kidson appeared in the same publication on May 22, 1909).

(2) HENRY EDWARD (b. Sadler's Wells, Sept. 8, 1813; d. Edinburgh, May 6, 1866), youngest son of Charles Dibdin the younger (that is, grandson of the above), acquired his first knowledge of music from his eldest sister, Mary Anne, afterwards Mrs. Tonna, an excellent harpist, pupil of Challoner and Bochsa.

He subsequently studied the harp under Bochsa, and also became proficient on the organ and violin. He appeared as a harpist at Covent Garden, Aug. 3, 1832, at Paganini's last appearance. Early in 1833 Dibdin went to Edinburgh, where he held the honorary post of organist of Trinity Chapel, and established himself as a teacher. Dibdin composed a few psalm tunes and some pieces for the organ and pianoforte, but he is best known as the compiler of 'The Standard Psalm Tune Book' (1857), the largest and most authentic collection of psalm tunes ever published, the contents being mainly derived from ancient psalters; also of 'The Praise Book' (1865). Besides his attainments as a musician Dibdin possessed considerable skill as a painter and illuminator. (Addns. D.N.B.)

W. H. H.

DICKINSON, EDWARD (b. West Springfield, Mass., Oct. 10, 1853), was educated in music at the New England Conservatory (Boston), and under Klindworth at Berlin. In 1893 he became professor in Oberlin College and Conservatory and developed a system of instruction in musical history which has had a wide influence (see DEGREES IN MUSIC, subsection AMERICAN UNIVERSITIES). He has published a number of books, amongst which the *Study of the History of Music*, 1905 (3rd ed. 1914), is important. Amer. Supp.

DICKONS, MRS. MARIA (b. London, c. 1770; d. May 4, 1833), whose father's name was Poole, was a pupil of Rauzzini, and in 1787 appeared at Vauxhall Gardens as a singer. She sang at the Concert of Ancient Music and other concerts. On Oct. 9, 1793, she made her appearance at Covent Garden Theatre as Ophelia in 'Hamlet' and shortly afterwards as Polly in the 'Beggar's Opera.' She next sang in several of the principal towns of England, Scotland and Ireland with great success. She married in 1800, and retired for a time, but resumed her career, and reappeared at Covent Garden in 1807 as Mandane in 'Artaxerxes.' She joined the Drury Lane company in 1811. She was subsequently engaged at the King's Theatre, where on June 18, 1812, she performed the Countess in Mozart's 'Nozze di Figaro' to the Susanna of Mme. Catalani. In 1816 she was engaged at the Italian opera at Paris;

HENRY CAREY
From a mezzotint by J. Faber after J. Worsdale

from thence she went to Italy. On her return to England she was again engaged at Covent Garden, where she appeared Oct. 13, 1818, as Rosina in Bishop's adaptation of Rossini's 'Barber of Seville.' (D.N.B.) W. H. H.

DICTIONARIES OF MUSIC. The oldest¹ known work of the kind is that of the learned Flemish musician Jean Tinctor, entitled 'Terminorum musicae Diffinitorium,' 15 sheets, 4to, undated, but in all probability printed with the type of Gérard de Flandre, and published at Naples, 1474. The original is extremely rare, but Forkel has reprinted it in his *Allgemeine Literatur der Musik*, and thus placed it within the reach of students. (See TINCITORIS.) The *Glossarium* of Du Cange also includes many musical terms and explanations useful to historians of music. Musical archæologists will further do well to consult Ménage—whose *Dictionnaire étymologique de la langue française* appeared in 1650—and the *Dictionnaire universel* (Rotterdam, 1690) of Furetière, afterwards remodelled by Basnage (The Hague, 1701).

These works are often overlooked, and the credit of having written the two oldest dictionaries of music is generally assigned to Janowka and the Abbé Sébastien de Brossard. The former, a Bohemian organist, wrote in Latin, and his *Clavis ad thesaurum magnæ artis musicae* (Prague, 1701) was unknown to BROSSARD (q.v.) when he published his *Dictionnaire de musique* (Ballard: Paris, 1703). Taking into account the enormous difficulties under which they laboured, both authors are deserving of great praise for works so eminently useful to students of musical terminology. Amongst their imitators may be named Walther, Grassineau and J. J. Rousseau. Walther's work, *Alte und neue musikalische Bibliothek, oder musikalisches Lexicon*, was originally published at Weimar, but the second edition (Leipzig, 1732) is the important one. In it he so far adopted the plan suggested by Brossard at the end of his dictionary, that his work forms a kind of complement to that. James Grassineau, in his *Musical Dictionary* (London, 1740, 1 vol. 8vo; 2nd ed., 1769), made ample use of Brossard's definitions and examples; but his work is much more complete, and his remarks on the music of the ancients and on musical instruments evince much reading, and may still be consulted with advantage. J. J. Rousseau in his *Dictionnaire de musique* (Geneva, 1767) also utilised the labours of Brossard, especially with regard to ancient music; it is to his literary ability rather than to his elevated views on æsthetics that the success of his dictionary is due. Not only was it translated into several languages (see WARING), but it was imitated by Meude-Monpas (Paris, 1788) and by Reynvaan

(Amsterdam, 1795), only half of whose *Musikaa Kunst Woorden-book* was ever published. Rousseau's influence may be traced also in the *Dictionnaire de musique* contained in the *Encyclopédie méthodique*. That enormous mass of undigested material forms two huge 4to volumes, of which the first (1791) was compiled under the superintendence of Framery and Ginguené, with the assistance of the Abbé Feyjou and of Surremain de Missery, and is far superior to the second (1818) edited by Momigny, whose theories were not only erroneous but at variance with those of the first volume. In spite, however, of its contradictions and errors, both scientific and chronological, a judicious historian may still find useful materials in this dictionary.

Whilst Rousseau's writings were exciting endless discussions among French musicians, the labours of Gerber and Forkel in Germany were marking a new era in the literature of music. By his *History* (*Allg. Geschichte der Musik*, Leipzig, 1788–1801) Forkel did as much for the musicians of Europe as Burney and Hawkins had in all probability done for him. His influence may be recognised in Koch's *Musikalisches Lexicon* (Frankfort, 1802), a work in all respects superior to that of G. F. Wolf (Halle, 1787). Koch also published his *Kurzgefasstes Handwörterbuch der Musik* (Leipzig, 1807), a work distinct from his *Lexicon*, but quite as useful and meritorious. But the happy influence of Forkel is more especially evident in the biographical work of Gerber, *Neues historisch-biographisches Lexicon der Tonkünstler* (Leipzig, 1812–14, 4 vols.), a work in every way a great improvement on his first edition (Leipzig, 1790–1792, 2 vols.), although incomplete without it, owing to his habit of referring back. Gerber was the model for the *Dictionnaire historique des musiciens* of Choron and Fayolle (Paris, 1810–11), the first book of the kind published in France, and preceded by an excellent introduction, by Choron, of which Fétis in his turn made good use.

In Italy the Abbé Gianelli was the author of the first dictionary of music printed in Italian (Venice, 1801, 2nd ed., 1820); but his book has been entirely superseded by the *Dizionario e bibliografia della musica* of Dr. Lichtenthal, the first two volumes of which are devoted to music proper, while the last two contain an historical and critical catalogue, which has been largely utilised by Fétis. It was translated into French by Mondo (Paris, 1821, 2 vols. 8vo). A modern book of great practical usefulness is *L'Italia musicale d'oggi. Dizionario dei musicisti, compositori, direttori d'orchestra*, etc., by Alberto de Angelis, published in Rome, 1918, and in an enlarged edition, 1922.

The *Dictionnaire de musique moderne* of Castil Blaze (Paris, 1821, 2nd ed., 1825, 2 vols.), in part copied from that of Rousseau, attained a certain

¹ An Arabic dictionary some 500 years before Tinctor is described under the name of its author FARAJ (q.v.).

amount of success from the position of its author and its animated style; but it is by no means equal either in extent or accuracy to Lichtenhal's work. Partly founded on a similar model is the *Dictionnaire de musique d'après les théoriciens, historiens, et critiques les plus célèbres* (1844; 5th ed., 1872) by Marie et Léon Escudier, a compilation, as its title indicates, but containing much useful information in a small space, especially on ancient musical instruments and on contemporaneous matters. Jos. d'Ortigue, on the other hand, opened up a new line in his *Dictionnaire liturgique, historique, et théorique de plain-chant et de musique d'église* . . . (Paris, 1854 and 1860). It has the merit of quoting distinctly all the sources from which the author derived his information, and of mentioning by name all those who assisted him; and for the special branch of which it treats this dictionary is hitherto without a rival.

The *Biographie universelle des musiciens*, by F. J. Fétis, was in its own time equally unrivalled. The first edition (Paris and Brussels, 1835-44), in 8 vols. 8vo, double columns, contains a long and admirable introduction, not republished in the second edition (Paris, 1860-1865), also in 8 vols. 8vo. The necessary supplement to Fétis's book was edited by Arthur Pougin and published in 1878 in two volumes. Much later work has been accomplished in this direction with increasing care and accuracy by French authors. Among recent works the following may be mentioned: Michel Brenet's *Dictionnaire pratique et historique de la musique* (Armand Colin, 1925); P. Rougnon's *Petit Dictionnaire de musique* (1924). An exhaustive work, *Encyclopédie de la musique et dictionnaire du Conservatoire*, is still in process of publication; begun under Alfred Lavignac, it is now (1926) directed by L. de La Laurencie. It is designed in three parts: (1) History, arranged on a basis of nationality; (2) Technique, pedagogics and æsthetics; (3) the Dictionary containing alphabetical reference to all matters treated in parts 1 and 2. The History began to appear in parts in 1913.

Whilst the French authors were writing their dictionaries, either on Rousseau's plan or were following the lead of Choron, Fétis and d'Ortigue, by enlarging their sphere beyond that of musical terminology, the tendency in Germany was to include in dictionaries not only all that concerns the technical part of music, but the biography of musicians, and the philosophy, literature and bibliography of the art. Gustav Schilling therefore justly entitles his dictionary *Encyclopädie der gesammten musikalischen Wissenschaften, oder universal Lexikon der Tonkunst* (Stuttgart, 1835-38, 7 vols. 8vo.). In this work biography holds an important place, but the other departments are treated with equal skill and research, so that the whole forms a precious depository of information, and is a notable ad-

vance on all previous works of the kind in other countries. Gassner, in his *Universal Lexikon der Tonkunst* (Stuttgart, 1849, 1 vol.), and Bernsdorf, in his *Neues universal Lexikon der Tonkunst*, in continuation of Schladebach (Dresden and Offenbach, 1856-61, 3 vols.), have obviously made considerable use of Schilling, and both works have a well-merited reputation. Koch's *Lexikon* has been re-edited by Dommer (Heidelberg, 1865), and Oscar Paul has published a useful *Handlexikon der Tonkunst* (Leipzig, 1873), in which condensation is carried to its utmost limit. But of all the German works which have followed Schilling the most important and deserving of mention is the *Musikalisches Conversations-Lexikon*, edited by Mendel, and since his death by August Reissmann (Berlin, 1870, etc.), the second edition of which was published in 11 vols. in 1883. The handiest of musical dictionaries is the *Musik-Lexikon* of Hugo Riemann, of which the first edition appeared at Leipzig in 1882, and the fifth in 1900. It was translated into English by J. S. Shedlock, with a good many additions in articles dealing with English musicians (no date). A French translation by Georges Humbert, professor of history at the Conservatoire of Geneva, appeared in two issues (1899, 1913), the first coming after the fourth edition. Alfred Einstein edited the ninth German edition (1919) and the tenth, including much new material, in 1922. In 1900 Robert Eitner, whose *Verzeichniss neuer Ausgaben aller Musikwerke* appeared in 1870, and his *Bibliographie der Musik-Sammelwerke* (with F. X. Haberl) in 1877, began the publication of his monumental *Quellen-Lexikon*, in which authority is quoted for almost every statement made. Emil Vogel's *Bibliothek der gedruckten weltlichen Vocal-musik Italiens* (2 vols., 1892) is in alphabetical order of composers' names, and may therefore be counted among dictionaries.

Space compels us, to confine ourselves to a mere mention of such works as the Swedish dictionary of Envalson (Stockholm, 1802); that edited by Tobias Norlind (since 1913); and the *Illustriertes Musiklexikon* (Copenhagen, 1924) of Hortense Panum, W. Behrend and O. M. Sandvik; the illustrated dictionary of Souiller (Paris, 1855); and the Spanish dictionaries of Melcior (Lerida), 1859; Parada (Madrid, 1868) and B. Sandoni (5 vols.).

Besides musical lexicons properly so called there are a certain number of Encyclopedias and Dictionaries of the Fine Arts, which contain important articles on music and musical terms. Amongst these may be cited the *Encyclopédie* of Diderot and D'Alembert (Paris, 1751-80, 35 vols.); the *Allgemeine Theorie der schönen Künste* (Leipzig, 1773), by Sulzer, of which Millin has made great use in his *Dictionnaire des Beaux-Arts* (Paris, 1806); the *Allgemeine Encyclopädie der Wissenschaften und*

Kunst (Leipzig, 1818-47), by Ersch and Gruber, an enormous collection, containing many remarkable articles on music; and the *Dictionnaire de l'Académie des Beaux-Arts*, begun in 1858, of which the sixth vol. concludes with the word 'Gypse.' It contains important articles (unsigned) by eminent musicians, members of the Académie, Méhul, Lesseur, Berton, etc. Similarly *La Grande Encyclopédie* contains important musical contributions by Pougin, Ernst, Michel Brenet, Guittard, etc.

In England, among cyclopædias, the earliest place is held by that of Rees (1819), the musical articles in which were written by the eminent Dr. Burney. In the ninth edition of the *Encyclopædia Britannica* (begun 1875) the musical articles—restricted in number—were at first written by Franz Hueffer, and subsequently by W. S. Rockstro. The supplementary volumes of that edition devote much more space to music, and the articles are by various authors. The musical articles in the *Dictionary of National Biography* (1885-1903) are full and generally accurate. Chambers's *Encyclopædia* (1859-68 and 1888-92) on a smaller, and Brande's *Dictionary* (1842; 3rd ed. 1853) on a still smaller scale, contain good articles on musical topics, the former including the leading biographies.

The early dictionaries were few and unimportant: *A Short Explication of such Foreign Words as are made use of in Musick Books* (1724), Grassineau (1740), Busby (1786), Danneley (1825), Jousse (1829), Wilson, or Hamilton's and Hiles's *Dictionaries of Musical Terms*—each a small 8vo volume—are specimens of the manner in which this department has been too long filled in England. As regards biography, the *Dictionary of Musicians* (2 vols. 8vo, 1822 and 1827), though good in intention, was imperfectly carried out. A great advance was made in the *Dictionary of Musical Terms*, edited by J. Stainer and W. A. Barrett (1 vol. 8vo, Novello, 1876, 2nd ed. 1898), and in a condensed version as one of Novello's *Music Primers*. The same series contains a *Biographical Dictionary of Musicians* by W. H. Cummings, revised edition by W. G. McNaught (1916), and a *Dictionary of Violin Makers*, by C. Stainer. A *Music Lover's Cyclopædia* in one volume, compiled by Rupert Hughes, is conveniently arranged in two alphabets, one of musical terms, the other of musicians. A useful little *Dictionary of Fiddlers*, by A. Mason Clarke, was published by W. Reeves in 1895, and a curious work in dictionary form, *On The Organ*, written and published by John Warman, was begun in 1898. It is only fitting that brief mention should be made of the first edition of Sir George Grove's *Dictionary of Music and Musicians*, 4 vols., of which the first part appeared in 1878, and the last, with the appendix, in 1889. The second and greatly enlarged edition (5 vols.) was edited by J. A. Fuller Maitland

(1904-10). An American Supplement edited by Waldo Selden Pratt was published in America in 1920, and a *New Encyclopædia of Music and Musicians*, under the same editorship, also intended to supplement the second edition of this Dictionary, appeared in 1924. The *Biographical Dictionary of Musicians* by James D. Brown (Paisley, 1886) was the forerunner of his excellent *British Musical Biography*, written in collaboration with Stephen S. Stratton and published in 1897. David Baptie's *Musicians of all Times*, 1889, is less trustworthy. A *Dictionary of Modern Music and Musicians*, under the general editorship of Eaglefield Hull (1924), deals concisely with the biographies of musicians alive in the year 1880 and since. It includes a number of theoretic articles.

An excellent work for its date and its intention was the *Complete Encyclopædia of Music* by John W. Moore (Boston, U.S.A., 1852), a large 8vo volume of 1000 pages, constructed on a popular basis. The *Cyclopædia of Music and Musicians*, edited by John Denison Champlin, junior, and William F. Apthorp (New York, 1889-91) is contained in three handsome volumes, and is well arranged; the *Biographical Dictionary of Musicians* by Theodore Baker, Ph.D. (New York, 1900) is of distinct value in regard to American musicians, but the author's reliance on Riemann's *Lexikon* is perhaps rather too complete. A third edition, revised and enlarged by Alfred Remy, appeared in 1919.

G. C., with addns.

DIDO AND AENEAS, opera in 3 acts, written by Nahum Tate; music by Purcell. The first performance took place between the years 1688 and 1690, at the boarding-school of Josias Priest at Chelsea.

It was revived by the R.C.M. on the occasion of the bicentenary of Purcell's death (1895), has since been frequently given in England, and in 1926 in German (translation by Anton Mayer) at Münster.

DIEMER, Louis (b. Paris, Feb. 14, 1843; d. Paris, Dec. 21, 1919), French pianist, studied at the Conservatoire under Marmontel, Bazin and Ambroise Thomas, winning the first piano prize at the age of thirteen and that for fugue three years afterwards. In 1888 he succeeded Marmontel as professor of one of the higher pianoforte classes at the same institution. At the Paris Exhibition of 1889 he won especial fame in the compositions of the harpsichord masters of the past. A consequence of this was the creation of the Société des Instruments Anciens which, with his help, appeared often in London with great success. He established also a triennial competition for those among the male piano students of the Conservatoire who have obtained the first prize during the previous ten years. Diémer published a number of compositions, of which the following are the most important: a 'Concert

stück,' op. 31, and a concerto in C minor, op. 32, for piano and orchestra; a 'Concertstück,' op. 33, for violin and orchestra; besides some interesting chamber works, songs, and very numerous pianoforte solos, as well as a collection of 'Clavecinistes français.' G. F.

DIEPENBROCK, ALPHONS (b. Amsterdam, 1862; d. there, 1921), a Dutch composer, originally a philologist, and musically self taught. He first became known as a composer by a liturgical Mass, which was followed (1900) by his chief work, a *Te Deum* for united choir, solo voices and orchestra. Besides songs (some with orchestra), Diepenbrock composed music for several plays; Verhage's 'Marsyas'; Vondel's 'Gysbrecht van Amstel'; Aristophanes' 'Birds'; Goethe's 'Faust.' He was originally under Wagner's influence, but later turned more towards the modern French impressionism. His music is poetic and full of phantasy, but lacks strong concentration. He holds a representative place as a spiritual leader of the younger generation of Dutch composers. A complete edition of his works is in preparation. His essays on musical aesthetics appeared after his death under the title 'Ommegeengen.' R. M^o.

DIEREN, BERNARD VAN (b. Holland, Dec. 27, 1884), composer, was educated with a view to a scientific career, and became assistant in a research laboratory. His youthful artistic interests were chiefly literary, though he was skilled in drawing, musical studies being confined to the violin, which he learnt to play in early youth. Having had little opportunity of hearing good music, he did not begin to compose until he was nearly twenty years of age, when he wrote a series of immature works which have not been preserved. They were followed by a period of serious study of composition as well as of musical history and literature. In 1909 van Dieren settled in London, for some years acting as correspondent to Continental newspapers and periodicals. His earliest preserved works date mainly from 1912, which year was spent in study in various German musical centres.

The style of van Dieren's earlier works is nearly always distinguished by great polyphonic complexity gained by the independent development of melody. Contrapuntal devices are largely employed in conjunction with a scheme of harmony that is both modern and individual, and, while allowing the composer a wide scope, demands a strictly logical treatment. In the later works the harmonic basis becomes gradually simpler, while the workmanship is concentrated in a still higher degree upon organic unity and balance of form.

For a long time van Dieren was a solitary figure in modern music. Lately, however, greater curiosity in his work has been shown: the Universal Edition in Vienna and more especially the Oxford University Press have

acquired a number of MSS. for publication and performances are growing less rare. Among the outstanding first performances are the following:

Opp. 9 and 19 at Cecil Gray's concert, Wigmore Hall, London, 1917; op. 19 at a 'Sackbut' Concert in London, 1920; Introduction to op. 16 at a Promenade Concert, Queen's Hall, 1921; op. 22 by the British Music Society, Apr. 1, 1925, and (1st public performance) at S. J. Morgan's concert, Wigmore Hall, June 8, 1925; op. 21 at Gerald Cooper's concert, Aeolian Hall, Nov. 6, 1925; op. 13 by the British Music Society, Dec. 1, 1925; opp. 17, 20 and a scene from op. 14, at a whole concert devoted to van Dieren's work, Wigmore Hall, Dec. 14, 1925; op. 9 was also heard in Berlin in 1923 at a concert given by the International Composers' Guild; and op. 18 at the second Donaueschingen Musical Festival in 1922.

The following is a list of his principal works:

- Op.
1. Elegy for orchestra and violoncello obbligato.
2. Heine's *Belshazzar* for chorus and orchestra.
3. *Bestes Centes*. Orchestral Epilogue to Shelley's *The Cenci*.
4. Six Sketches for PF. (Universal Edition, Vienna).
4a. Toccata for PF.
5. Sonata for violin solo.
6. String Quartet No. 1, for 2 violins, viola and violoncello.
7. *Tread on Fugue*, with 3 Fuguettes for PF.
7a. Sketch for a Treatise on Harmony on a polyphonic basis.
8a. 15 songs on poems by Heine and Goethe.
8b. 6 songs on poems by Verlaine, Charles d'Orléans, Ronsard and Boileau.
8c. Lyric Scene (Villiers de l'Isle Adam).
9. Overture for chamber orchestra (16 solo instruments).
10. Unaccompanied Choral Works: *Ave Maria* (4 parts), *Ave Maria* (5 parts), *Deus meus* (4 parts).
11. Symphony for orchestra, 5 solo voices and mixed choir on texts by Chinese poets.
12. *Diafonia* in 5 parts for chamber orchestra (17 solo instruments and baritone solo) on 3 Shakespeare sonnets.
13. *Serenade* for small orchestra.
14. *The Tutor*, opera built in 3 acts with chamber orchestra. Text by Robert Richman.
15. 'Les Propos des Beuveurs,' for chorus and orchestra, on Rabelais' *Gargantua*, chapter v.
16. 2 songs for baritone and string quartet: (a) Song from Shelley's *The Cenci*; (b) *Our Three Ladies of sorrow* (the Quinceys).
17. 2 Poems for recitation with string quartet: (a) *Recueillement* (Raudelaire); (b) *Ballade pour prier Notre Dame* (Villon).
18. String Quartet No. 2, for 2 violins, viola and violoncello.
19. Symphony for orchestra in 3 movements (*clacouns, sarahande, galliarde*).
20. String Quartet No. 3, for 2 violins, viola and violoncello.
21. *Fayre eies* (Edmund Spenser) for baritone and chamber orchestra.
22. String Quartet No. 4, for 2 violins, viola and double bass.
23. 6 songs on poems of Victor Hugo.
24. String Quartet No. 5, for violin, viola, violoncello and double bass.
25. Variations on an original theme for PF.
26. Netherlands melodies for PF.
27. Sonata for violin and PF.
2 études for violin solo.

E. B.

DIES, ALBERT CHRISTOPH (b. Hanover, 1755; d. Vienna, Dec. 28, 1822), wrote *Biographische Nachrichten von Joseph Haydn*, biographical notes from Haydn's own communications, 1810 (with portrait and musical examples).

E. v. d. s.

DIES IRAE, the Sequence sung in Masses for the Dead.

The truth of the tradition which ascribes the poetry to Thomas de Celano, the friend, disciple and biographer of St. Francis of Assisi, seems to be established beyond all controversy. It is not properly a liturgical Sequence in form, but a poem to which a tune has been adapted. It is not known when it first became so used, and many years seem to have elapsed before its use became general. It is very rarely found, in early MS. Missals, either in England, France, or Germany, and is wanting in many dating as late as the close of the 15th century, or the beginning of the 16th. It is doubtful, indeed, whether its use was recognised in all countries, until its insertion in the *Tridentine Missale Romanum* rendered it a matter of obligation.

For further information as to the poem and its translations Julian's *Dictionary of Hymnology* should be consulted.

The old ecclesiastical melody is a remarkably fine one, in modes I. and II. (Mixed Dorian) ranging throughout the entire extent of the combined scale, with the exception of the octave to the final. No record of its origin, or authorship, has been preserved; but we can scarcely doubt that, if not composed by Thomas de Celano himself, it was adapted to his verses at the time of their completion. The melody is not proper Sequence melody, but its structure is essentially different since it only extends over part of the prose, and is then repeated with a certain difference for the closing lines (see SEQUENCE). The idea of it is evidently taken from the verse of the Respond 'Libera me Domine' used in the office of the dead, which runs thus:

The polyphonic masters have generally in their Requiem Masses left the 'Dies irae' to be sung simply to its plain-song melody. It is employed, however, as the basis of the composition in not a few masses by composers of somewhat lower rank; as, for instance, in a Missa pro Defunctis, for 4 voices, by Giovanni Matteo Asola (Venice, 1586); in one for 8 voices, by Orazio Vecchi (Antwerp, 1612); in one for 4 voices, by Francesco Anerio; and in one for 4 voices, by Pitoni.

With modern composers the 'Dies irae' has always been a popular subject; and more than one great master has adapted its verses to music of a broadly imaginative, if not a distinctly dramatic character. Among the most important settings of this class we may enumerate those by Colonna and Bassani, copies of which are to be found in the library of the R.C.M.; that in Mozart's Requiem; the two great settings by Cherubini; the first, in his Requiem in C minor, and the second, in that in D minor; the extraordinarily realistic settings in the Requiems of Berlioz, Verdi and Bruneau; as well as a not very interesting setting in Gounod's 'Mors et Vita.' w. s. r. and w. h. r.

DIESIS, from the Greek *δiesis*, which means division, and was the name given to quarter tones in their system. Aristotle takes it as the unit of musical tones, the last subdivision of intervals. In modern acoustics it means the interval which results from the two sounds which are arrived at by tuning up three perfect thirds and an octave, which is the same as the difference between a major or diatonic semitone, and a minor or chromatic semitone, the ratio of their vibrations being 125 : 128. It is commonly called the Enharmonic Diesis.

C. H. H. P.

DIETER, CHRISTIAN LUDWIG (b. Ludwigsburg, June 13, 1757; d. after 1815), studied at Karlschule, Stuttgart, was chamber musician (violinist) in the court chapel there, 1781. He composed 11 or more Singspiele (ballad operas), symphonies, chamber music, concertos for various instruments, especially flute and bassoon. (Q.-L.)

DIETRICH, ALBERT HERMANN (b. Golk, near Meissen, Aug. 28, 1829; d. Berlin, Nov. 20, 1908), was educated at the Gymnasium at Dresden, from 1842 onwards; he went to the University of Leipzig in 1847, having previously studied music with Julius Otto. At Leipzig his musical tuition from 1847-51 was in the hands of Rietz, Hauptmann and Moscheles.

From 1851 he had the advantage of studying under Schumann at Düsseldorf until 1854. In the autumn of 1853 an incident occurred which brought Dietrich into collaboration with his master and Johannes Brahms. Joachim was coming to Düsseldorf to play at a concert on Oct. 27, and Schumann formed the plan of writing a joint violin sonata with the other two, by way of greeting. Dietrich's share was the opening allegro in A minor. (See SCHUMANN.) In 1854 his first symphony was given at Leipzig, and a year later he was appointed conductor of the subscription concerts at Bonn, becoming town Musikdirector in 1859. In 1861 he became Hofkapellmeister at Oldenburg. On his frequent visits to Leipzig, Cologne and elsewhere, he proved himself an excellent conductor and an earnest musician. He became a member of the Kgl. Akademie der Künste and in 1899 Kgl. Professor. He retired in 1890 and settled in Berlin. Among his works may be mentioned:

An *Oper* in three acts, 'Robin Hood,' performed with success at Frankfurt in 1879; pieces for pianoforte, op. 2; songs, op. 10; a trio for piano and strings, op. 9; a symphony in D minor, op. 20; a concert overture, 'Normannenfahrt'; 'Morgenhymne'; 'Rheinmorgen'; and 'Altchristlicher Bittgeang'; works for choir and orchestra; concertstück for horn (op. 27), concertos for horn (op. 29), violin (op. 30) and violoncello (op. 32); a pianoforte sonata for four hands, etc.

His incidental music to 'Cymbeline' was played in the Lyceum revival in 1896. In 1899 he published, in conjunction with J. V. Widmann, an interesting series of *Erinnerungen an J. Brahms*.

M.

DIETRICH, SIXT (b. Augsburg, between 1490 and 1492; d. St. Gall, Oct. 21, 1548), an excellent German composer. He was at the Freiburg University, and went in 1517 to Strassburg, becoming a schoolmaster in Constance in 1518. About 1535 he seems to have inherited some money, and to have renewed his own studies in music and other things, entering the university of Wittenberg in 1540. He returned to Constance, quitting it at the time of the attack of the Emperor Charles V., and dying two months afterwards. He published *Epiciedion Thomae Sporeri* in 5 parts in 1534; a first book of Magnificats in 1535; 36 Antiphons, Witt. 1541; and 'Novum opus

musicum,' Witt. 1545. Five of his compositions are in the *Dodecachordon*. (Q.-L.)

DIETSCH, PIERRE LOUIS PHILIPPE (b. Dijon, Mar. 17, 1808; d. Feb. 20, 1865), composer and conductor, was educated by Choron and at the Paris Conservatoire, was maître de chapelle at St. Eustache, and in 1860 became chief conductor of the Opéra. He was dismissed by Perrin, the director in 1863. He became organist of the Madeleine, wrote much church music and organ works (the popular Ave Maria, falsely attributed to Arcadelt, is said to have been by him), and acquired an unenviable notoriety in connexion with the purchase of Wagner's 'Flying Dutchman' libretto, at a time when Wagner was in straitened circumstances in Paris. Dietsch's composition was produced at the Opéra, Nov. 9, 1842. M.

DIETZ (1), JOHANN CHRISTIAN (b. Darmstadt, 1788; d. Holland c. 1845), German maker and inventor of musical instruments, first established himself at Emmerich-on-Rhine, but, in 1805, having invented an instrument which he called a melodeon, he journeyed in the next year through Westphalia and Holland to exhibit it. This was not the instrument which bears this name to-day, but a kind of small piano about 4 ft. long and 2 ft. high. He then founded an instrument factory in Holland, but later settled in Paris where he invented the claviharpe (a harp with a mechanical action for plucking the strings, see HARP), and later (1812) the trochleon. About 1820 Dietz went to Brussels and set up a factory to make hydraulic machines and steam engines. (See *Fétis*.) J. M^c.

(2) CHRISTIAN (b. Emmerich c. 1801), son of the above and, like his father, an inventor and maker of musical instruments. In 1819 he executed and exhibited one of his father's claviharpes at the Louvre, Paris, as described in the pamphlet *Description du claviharpe, inventé par M. Dietz et exécuté par M. Dietz fils* (Paris, 1821). The younger Dietz was himself responsible for the polyelectron and the phys-harmonica (see *Fétis*) and had a considerable reputation in France as a maker of upright pianos. J. M^c.

DIEUPART, CHARLES (d. circa 1740), a native of France who came to England in the latter part of the 17th century, and was a fine performer on the violin and harpsichord.

In 1707 he was associated with CLAYTON (q.v.) and Haym in introducing translations of Italian operas at Drury Lane Theatre. After the discontinuance of those operas and the failure of their subsequent concert speculation, Dieupart devoted himself entirely to teaching the harpsichord, and for some time taught, and gave concerts (1711-12) with considerable success, but towards the latter part of his life he acquired low habits, and frequented ale-

houses, where he entertained the company by his fine performance of Corelli's violin solos. He published

'Six Suites de clavecin, divisées en ouvertures, allemandes, courantes, sarabandes, gavottes, menuets, rondeaux, et gîgues, composées et mises en concert pour un violon et flûte, avec une basse de viole et un archilut.' (Rogier, Amsterdam.)

An edition in London, with a dedication to the Countess of Sandwich by the composer, was sold by Francis Vaillant, 'The French bookseller in the Strand' (*Athenæum*, Dec. 1904). A copy in the National Library in Paris contains an autograph letter of Dieupart. A reprint of a portion of them was published by Walsh in London as 'Select lessons for the harpsichord or spinet.' In Dannreuther's *Musical Ornamentation*, part i., it is clearly proved that Dieupart's suites were well known to Bach, who based the prelude of his 'Suite anglaise' in A, No. 1, on the gigue from Dieupart's first suite in the same key. In a lecture at the Royal Institution, Apr. 30, 1892, the author suggested that the name 'Suites anglaises' may have been a term in use in Bach's family for the suites which Bach had based upon the works of a composer whose vogue was greatest in England.

DIFFERENTIAL TONES, see RESULTANT TONES.

DIGITORIUM. An apparatus for exercising and strengthening the fingers, intended especially for the use of pianists, but claimed by its inventor, Myer Marks, to be of great service to all who require flexible and well-trained fingers.

It consists of a small box about six inches square, provided with five keys,¹ fitted with strongly resisting springs, upon which keys five-finger exercises are to be practised. In addition, there are attached to the sides of the box certain appliances for stretching the fingers, and a support for the wrist.

The question of finger gymnastics received very full consideration from E. Ward Jackson in a work entitled *Gymnastics for the Fingers and Wrist* (London, Metzler & Co., 1874), in which he quoted opinions in favour of his system of exercises not only from musicians but from very eminent surgeons. F. T.

DIGNUM, CHARLES (b. Rotherhithe, c. 1765; d. London, Mar. 29, 1827), a singer, the son of a master-tailor.

His father, an Irish Roman Catholic, placed him when a boy in the choir of the Sardinian ambassador's chapel in Duke Street, Lincoln's Inn Fields, where his fine voice attracted the attention of Samuel Webbe, then organist there, who undertook to instruct him. He wished to be sent to Douay to be educated for the priesthood, but eventually decided on

¹ Digitortums are occasionally made of greater compass, with black and white keys, the ordinary digitortum having only white keys.

adopting the profession of music, and articulated himself to Thomas Linley for seven years. In 1874 Dignum made his first appearance at Drury Lane Theatre as Young Meadows in 'Love in a Village,' and, although his figure was somewhat unsuited to the part, the beauty of his voice and his judicious singing secured him a favourable reception. He next appeared as the hero in Michael Arne's 'Cymon,' and fully established himself in public favour. In 1787, on the removal of Charles Bannister to the Royalty Theatre, Dignum succeeded to a cast of characters better suited to his person and voice. In 1790 he gained much credit by his performance of Crop the miller, in Storace's 'No Song No Supper,' of which he was the original representative. After singing at the theatres, at Vauxhall Gardens and at concerts for several years, he retired in easy circumstances. Dignum composed several ballads. He published, in 1810, a volume of songs, duets and glees, composed and adapted by himself, to which an engraved portrait of him is prefixed.

W. H. H.

DIMINISHED INTERVALS are such as are either less than perfect or less than minor by one semitone. Thus (a) being a perfect fifth, (b) is a diminished fifth; and (c) being a perfect fourth, (d) is a diminished fourth:

These are both of discordant nature, the diminished fourth always so; but if a major sixth be added below the bass note of the diminished fifth it is considered to modify the discordance so far as to admit of its being used as a concord. This rule is of old standing, especially in regard to the occurrence of the chord diatonically, as (e) in the key of C, which was admitted in the strict old style where discords were excluded. Of intervals which are changeable into major or minor the diminished seventh is the commonest (f), which is a semitone less than the ordinary minor seventh (g), according to the rule above given. The complete chord, which is commonly known as that of the 'diminished seventh' (h), is, properly speaking, an inversion of a chord of the minor ninth (i). It occurs

with remarkable frequency in modern music, part of its popularity no doubt arising from the singular facilities for modulation which it affords. For the notes of which it is composed being at equal distances from one another, any one of them can be chosen at will to stand as minor ninth to the root which is understood. (See HARMONY, subsection THE CLASSIFICATION OF CHORDS; and MODULATION.)

The chord of the diminished third, as (k), occurs in music as the inversion of the chord of the augmented sixth, as (l). Bach uses it with powerful effect at the end of the 'Crucifixus' in his B minor Mass, and Beethoven in the chorus to the same words in his 'Missa Solennis.'

C. H. H. P.

DIMINUENDO, lessening the tone from loud to soft; employed indiscriminately with decrescendo. Expressed by *dim.* or *dimin.*, and by the sign — .

DIMINUTION, (1) in Counterpoint, is the repetition of a subject or figure in notes of smaller value than in its original statement, as:

It is a device almost confined to music of a contrapuntal character, such as fugues and canons, and is not of as frequent occurrence as augmentation, which is its converse. There is an example in Handel's chorus 'Let all the angels of God' in the 'Messiah'; in Bach's well-known fugue in E, No. 33 in the 'Wohltemperirtes Clavier'; and in the Overture to Wagner's 'Meistersinger.' In this last, and in the final scene of Saint-Saëns' 'Samson et Dalila,' where Dalila mocks the blinded Samson, the device of diminution seems to convey a suggestion of derision.

C. H. H. P.

(2) For the use of the term in connexion with the time signatures, D , C , etc., see NOTATION.

(3) An ornament of the French school left to the discretion of the executant, which consists of replacing the written notes by others of less value. Thus:

E. B.

D'INDY, see INDY, D'.

DINORAH, opéra-comique in 3 acts, words by Barbina Carré; music by Meyerbeer; produced Opéra-Comique, Paris, Apr. 4, 1859, as 'Le Pardon de Ploërmel'; in Italian with recitatives by Meyerbeer, and under his direction, Covent Garden, July 26, 1859; in English, Covent Garden, Oct. 3, 1859 (Pyne and Harrison); New York, Academy of Music, Nov. 24, 1864.

DIONIGI, MARCO, LL.D. (b. Poli, early 17th cent.), lived at Parma and wrote a treatise on the cantus firmus, *Li primi tuoni ovvero introduzione nel canto fermo*, in 1648; another enlarged edition in 1667 (Q.-L.).

DIPPEL, JOHANN ANDREAS (b. Cassel, Germany, Nov. 30, 1866), tenor singer and operatic manager, made his début at the Bremen Stadttheater in 1887. In 1890 he sang at the

Metropolitan Opera House in New York, and for five years was a member of the company of the Imperial Opera of Vienna. In 1908 he became joint manager of the Metropolitan Opera House with Giulio Gatti-Casazza, a position he held for two years. He was manager of the Chicago Opera from 1910-13.

R. A.

DIRECT, a mark (↑) to be found in music up to the 19th century at the end of a page, and even of a line, to warn the performer of the note at the beginning of the next page or line, like the catchword at the foot of a page. Here it indicates that the first note of the next line will be G, thus:

DIRECT MOTION, see SIMILAR MOTION.

DIRUTA, AGOSTINO (b. Perugia, late 16th cent.), belonged to the Order of St. Augustine. From the title-page of his first work, published 1617, we gather that he was related to Girolamo Diruta, and a pupil of his. The reference to 'D. Stephani Venetiarum organistae' might mean either that he, or that Girolamo, was the organist in question. If Girolamo, it would be before 1593, when he left Venice. In the dedication of his 'Messe concertate,' 1622, Agostino says that he has been maestro di cappella and organist in Asolo for two years (1620-22). He was organist and maestro di cappella of Sant' Agostino in Rome, 1630-47.

List of works, taken from Parisini's *Cat. della Bibl. del Liceo musicale di Bologna*, 11.66, etc.:

1. Sacrae Cantiones 1, 2, 3 & 4 vocibus concinendae, una cum suo Basso continuo pro organo Fratr. Augustini Diruta Perusini Ordinis Eremitarum Divi Augustini, Sacrae Theologiae (viro), nepotis ac olim discipuli R.P.F. Hieronymi Diruta, in Ecclesia D. Stephani Venetiarum organistae. Venetiae, Jac. Vincentium. 1617. 4to. Five partbooks containing 29 concerti.

2. Davidis exultantis cantica. 1 and 3 v. Opus 2. Venetia. Vincenti. 1618. 4to. Four partbooks containing 25 numbers. (*Edinw.*)

3. Messe concertate a 5 voci del P. Agost. Diruta Perugino, maestro di cappella & organista della magnifica comunità di Asolo. Con il basso per sonar nell' organo. Novamente composte & date in luce. Venetia. Aless. Vincenti. 1622. 4to. Six partbooks in the Bibl. Comunale of Cesena, containing: Missa primi toni & Missa secundi toni, a 5 voci, concertata.

4. Sacri motetti a gloria di Gesù et ad honore di Maria a 1 & 2 voci. In musica riportati dal P. Bacelliere Frat' Agost. Diruta Perugino, Agostiniano nella Chiesa di Santo Agostino di Roma, organista e maestro di cappella. Lib. I, opera VI. Prima parte. Venetia. Aless. Vincenti. 1630. 4to.

5. Sacrae modulationes Eremitici ordinis divorum, a R.P. Fr. August. Diruta Perusino, ejusdem ordinis Alumno, in Aede August. Urbis Organorum Musiceque Praefecto. 2, 3, 4, 5, 6, 7, 8 vocibus decantatae. Opus X. Romae, P. Masottum. 1630. 4to. In the Bibl. comunale of Cesena.

6. Messe concertate a 5 voci con il Basso continuo per l'organo in musica riportate da Rev. P. Bacc. Agost. Diruta Perugino Agost. nella chiesa di Sant' Agost. di Roma, maestro di cappella e organista. Lib. II. Opera XIII. Roma, J. B. Robletti. 1631. 4to. Six partbooks.

7. Viridarium Marianum in quo Delparae Virginis Letaniae, et Hymni 4, 5, 6 vocibus, una cum Basso ad organum decantatur. A.R.P. Bacc. F. August. Diruta Perusini in aede August. Urbis Musices, et organorum praefecto dispositum. Opus XV. Romae, J. B. Robletti. 1631. 4to. (In the Santini Catalogue.)

8. Psalmi vespertini 3 vocibus qui in omnibus Ecclesiis solennitibus decantari solent. Auctore F. Agost. Diruta Perusino, Sac. Theol. Bacc. Eremita August. & in Ecol. ejusdem ordinis in Urbe Musices praefecto. Lib. 2. Opus XVI. Romae, P. Masottum. 1633. 4to. Cantus secundus in the B.M.

9. Poetie heroicæ morali et sacre poete in musica a 1, 2, 3, 4 & 5 voci dal R.P. Agostino Diruta Perugino, Agostiniano Bacc. in Sac. Teol., maestro di Cappella in Sant' Agostino di Roma. Opera XX (Dedication dated Roma, Nov. 16, 1640) fol. pp. 111.

10. Il secondo libro dei Psalmi che si cantano ne' Vesperti di tutto l'anno concertati a 4 voci da P. Agost. Diruta Perugino Agost. Bacc. in Sac. Teol. e maestro di Cappella nella chiesa di S. Agost. di Roma, Opus XXI. Roma, Lud. Grignani, 1647. 4to. Five partbooks containing 23 numbers.

11. Davidicae modulationes et Litaniae B. Mariae Virginis 3 vocibus concinendae, una cum Basso ad organum. Auctore P. August. Diruta Perusino August. Sac. Teol. Bacc. in Ecol. Div. August. de Urbe Musices Praefecto. Opus XVIII. Roma, Giac. Fel. 1668. 4to. Four partbooks. This edition was probably issued after Agostino's death; it first appeared in 1641, Venezia. Vincenti. 4to. C. S.

DIRUTA, GIROLAMO (b. Perugia, 1554-64). His family probably came from the little village of Diruta, near Perugia. Diruta, who became a member of the Frati Minori Conventuali, entered the Franciscan monastery at Correggia on Jan. 19, 1574, at the same time as Batista Capuani, who is said to have given him his first instruction in music.¹ That the pupil's opinion of his master's teaching was not very favourable is shown by Diruta's references² to the deficiencies in his early musical education, which led to his going to Venice for further study. He remained in Venice from about 1582-93; he was a pupil of Gioseffo Zarlino (d. 1590), the great authority of the time on counterpoint and theory; of Constanza Porta, then at Ravenna; and of the celebrated organist Claudio Merulo, who was in Venice from 1557-1584.³ Franchini⁴ says that among the pupils of Merulo 'fu principale il Diruta.' In 1597 he was organist of Chioggia Cathedral, and in 1609 and 1612 is known to have been organist of Agobbio (Gubbio) Cathedral, for it is recorded in *Il Transilvano* (1609 and 1612), and is corroborated by Andrea Banchieri,⁵ who refers to Ugobbio Cathedral with its 'organo stupendissimo suonato da Girolamo Diruta.' Banchieri⁶ leads one to suppose that although organist at Gubbio, Diruta was still living in Chioggia, for he addresses one letter to Sig. Girolamo Diruta, organista nel Duomo d' Ugobbio,⁷ and another to P. Girolamo Diruta, Francescano, Chioggia.⁸ Diruta is again styled organist of Chioggia on the title-page of the 1625 edition of *Il Transilvano*, i., but it is probably merely a reproduction of the title-page in the earlier edition (1597); for Chioggia Cathedral was burnt down in Dec. 1623, and the rebuilt Cathedral was not opened till Aug. 15, 1647.⁹ Diruta is known not only as a celebrated organ-player at a time when famous organists flourished (in *Il Transilvano*, i. 62 is related how he heard Claudio Merulo and Andrea Gabrieli play in San Marco 'un duello di due organi' soon after he went to Venice), but as the author of a remarkable treatise on organ-playing which was far in advance of any contemporary publication. It was the first attempt to treat of the organ separately as an instrument that required a distinct method of treatment and of finger technique from that used for the clavier. It was written in two parts, which were pub-

¹ Colloani, *Notizia degli scrittori di Correggia*, 1775.

² *Il Transilvano*, i. p. 62.

ished at an interval of twelve years. The first was entitled :

Il Transilvano. Dialogo sopra il vero modo di sonar organi, & istrumenti da penna. Del R. P. Girolamo Diruta, Perugino, dell'ordine de' Frati Minori Conv. di S. Francesco. Organista del Duomo di Chiochia. Nel quale facilmente, & presto s' impara di conoscere sopra la tastatura il luogo di ciascuna parte, & come nel diminuire si devono portar le mani, & il modo d' intendere la intavolatura; provando la verità & necessità delle sue regole, con le toccate di diversi eccellenti organisti, poste nel fine del libro. Opera nuovamente ritrovata, utilissima & necessaria a professori d' organo. Al serenissimo Principe di Transilvania. Con privilegio. In Venetia appresso Giacomo Vincenti, 1597, folio, pp. 64.

This is the earliest extant edition and is very rare; two copies are known, one in the B.M., the other in the Bologna Liceo Musicale. Fétis mentions a 1593 edition; Herr Carl Krebs, who has gone very thoroughly into the whole question, thinks its existence, though problematical, is slightly favoured by the following facts. In his introductory letter to *Il Transilvano* (1597), Claudio Merulo mentions his *Canzoni alla francese* as having just been published :

'Però essendomi venuta occasione di mandare alla stampa il primo libro delle mie *Canzoni alla francese* da me poste di nuovo in intavolatura.'

And the Prince Transilvano, on his travels in Italy, wishing to obtain the newest musical works, acquires

quella novella compositione delle canzoni alla francese intavolate dall' eccellentissimo Signor Claudio Merulo da Correggio'

(p. 5). The only known copy of this book is in the Basle Universitäts-Bibliothek, and is dated 1592.¹ Again, in the second edition of *Il Transilvano* (1612), the dedication, 'Al Serenissimo Principe di Transilvania, il Sig. Sigismondo Battoni,' is dated, Di Venetia, Apr. 10, 1593. This would seem to point to the dedication having been simply reprinted from a 1593 edition.

Other editions besides those of 1597 and 1612, just mentioned, both printed by Giacomo Vincenti, were published in 1615, 1625 and possibly again in 1626, all by Alessandro Vincenti in Venice. The Bologna Liceo Musicale has copies of the 1612 and 1625 editions; the contents are identical with those of the 1597 edition.

In 1609 appeared :

Seconda parte del Transilvano. Dialogo diviso in quattro libri del R. P. Girolamo Diruta, Perugino, Minore Conventuale di S. Francesco. Organista del Duomo d' Agobbio. Nel quale si contiene il vero modo & la vera regola d' intavolare ciascun canto, sempre & diminuito con ogni sorta di diminutioni : & nel fin dell' ultimo libro v' è la regola, la qual scopre con brevità e facilità il modo d' imparar presto a cantare. Opera nuovamente dall' istesso composto, utilissima & necessaria a' professori d' organi. Con privilegio. In Venetia appresso Giacomo Vincenti, 1609, folio.

The dedication, 'All' Illustrissima Signora la Signora Duchessa Leonora Ursina Sforza,' is dated 'Da Gubbio il dì 25 Marzo, 1610.' The second edition, published in Venice by Alessandra Vincenti in 1622, reprints the same dedication, signed in the same way. Copies of both the 1609 and 1622 editions are in the Bologna

Liceo Musicale and elsewhere. A 1639 edition mentioned by one authority does not appear to be known.

The contents of the two parts of *Il Transilvano* may be briefly sketched : in *Il Transilvano*, i. the preface is written almost entirely in praise of the organ; the fine instruments in Trento, Ugobbio and Cagli Cathedrals are mentioned; and as no one has written on their characteristic qualities and the proper way to play them, rules are promised for the right use of the fingers, necessary to be observed in organ-playing. The introductory letter written by Claudio Merulo follows in which he highly commends Diruta's talent :

'Ed io infinitamente mi glorio, ch' egli sia stato mia creatura, perche in questa dottrina ha fatto a lui ed a me insieme, qual singular honore, che da persona di molto ingegno si deve aspettare.'

Then the instruction begins in the form of a dialogue between Transilvano and Diruta. The musical scale and the characters used in cantus mensurabilis are explained; the rendering of music is considered from an artistic as well as from a technical point of view. The position of the hand and fingers while playing, and the distinction to be drawn between organ and clavier playing is discussed. Musical examples are given in the form of toccatas or 'Lessons' on the ecclesiastical tones. Those composed by Diruta are : Toccate di grado del primo tuono; di salto buono del secondo tuono; di salto cattivo del sesto tuono; del undecimo e duodecimo tuono. The other examples were contributed by Claudio Merulo, Andrea and Giovanni Gabrieli, Luzzasco Luzzaschi, Antonio Romanini, Paolo Quagliati, Vincenzo Bell' Haver and Gioseffo Guami, all well-known names in Italy at that time. The music follows the usual custom in being written on a five-line stave for the right hand and an eight-line stave for the left hand.

Il Transilvano, ii. contains four books. Bk. 1 explains how to write down music in 2, 3 or 4 parts for the organ, with musical examples by Giov. Gabrieli and Ant. Mortaro. How to add the five different kinds of Diminutioni (Minuta, Groppi, Tremoli, Accenti and Clamationi) to a melody without unduly interfering with it; two musical examples by Giov. Gabrieli and Ant. Mortaro follow. Bk. 2 teaches the rules of counterpoint, and the way to compose ricercari; with examples by Luzzasco Luzzaschi, Gabriel Fatorini, Andrea Banchieri and Diruta himself (those on the 7th, 8th, 11th and 12th tones). Bk. 3 gives the twelve ecclesiastical tones and the way to transpose them into different keys, with other matters which every organist ought to know. Bk. 4 gives the intonations, in different keys, of hymns, masses, etc., with a discourse on using combinations of the organ registers (i.e. stops); and a short introduction to the learning of singing. The musical examples by Diruta are genuine organ compositions :

¹ *Canzoni d' intavolatura d' organo di Claudio Merulo da Correggio a 4 voci fatte alla francese. Nuovamente da lui date in luce e con ogni diligenza correte. Lib. I. Venetia. Ant. Gardano 1592.*

two of them, 'Ut queant laxis (Imo tuono)' and 'Magnificat (5to tuono) nelli tasti naturali,' were reprinted by Ritter.¹

In Zacconi's *Prattica di musica*, Parte II. lib. 3, Venetia, 1622, p. 240 (B.M.) are also to be found musical examples taken from *Il Transilvano*, ii. lib. 2 and 3. C. Krebs reprints 3 toccate and one ricercare,² and mentions the two toccate, 'di salto buono' and 'di salto cattivo,' as being in Bernhard Schmid's *Tabulaturbuch*. The following references to Diruta may also be found of interest: Bononcini of Modena³ mentions 'li già dimostrati dodici tuoni il che si conferma ancora con l' autorità del . . . Diruta nel Transilvano'; Costanzo Antegnati of Brescia says⁴: 'Lodo l' opera del Reverendo P. Diruta, nomata il Transilvano, che insegna à portar bene la mano nel suonare,' etc.; Andrea Banchieri⁵ says his object is not to teach organists to play brilliantly, for that is already done in *Il Transilvano* 'del sufficientissimo Diruta.'⁶ Diruta's system of ornamentation is carefully analysed in Dannreuther's treatise on *Ornamentation*; a ricercare and two toccate for the organ are in vol. iii. of Torchi's *Arte musicale in Italia*. c. s.

DIS, the German term for D \sharp , and also, according to a curious former Viennese custom, for E \flat . The Eroica symphony was announced at Clement's concert in Vienna, Apr. 7, 1805 (its first performance), and at Meier's concert, 1808, as 'in Dis.' (See D.)

DISCANT, see DESCANT.

DISCORD is a combination of notes which produces a certain restless craving in the mind for some further combination upon which it can rest with satisfaction.

Discords comprise such chords as contain notes which are next to each other in alphabetical order, and such as have augmented or diminished intervals, with the exception in the latter case of the chord of the sixth and third on the second note of any key. The changed combination which must follow them in order to relieve the sense of pain they produce is called the resolution. For the various kinds of discords and their resolutions see HARMONY.

C. H. H. P.

DISSOLUTO PUNITO, IL, OSSIA IL DON GIOVANNI. (See DON GIOVANNI.)

DISSONANCE is any combination of notes which, on being sounded together, produces BEATS; that is, an alternate strengthening and weakening of the sound, arising from the opposition of the vibrations of either their prime tones, their harmonics or their combination tones, which causes a painful sensation to the ear. (See CONSONANCE) C. H. H. P.

DISTLER, JOHANN GEORG (b Vienna, 1760;

d. there, 1798). With Pleyel and Neukomm, he was one of Haydn's pupils, and, according to Wasielewski (*Die Violine*), his favourite. In 1781 he entered, as violinist, the court chapel at Stuttgart, of which he became the leader in 1790. Soon afterwards he developed melancholia, which caused him to return, in 1796, to his parental home, where he died. His compositions consisted of 18 string quartets, 6 string quintets, a violin concerto, a flute concerto, and several other works which have disappeared.

E. v. d. s.

DITAL HARP, see HARP LUTE.

DITSON, OLIVER & CO., the oldest music-publishing firm in the United States. Its headquarters are in Boston, Massachusetts, where its founder, Oliver Ditson, was born Oct. 20, 1811. He died Dec. 21, 1888. The firm of Parker & Ditson was formed in 1832. In 1857, when John C. Haynes joined it, its style was changed to Oliver Ditson & Co. In 1867 the New York branch was established and put in charge of Ditson's eldest son, CHARLES H. In 1875 another son, J. EDWARD, was made the head of the Philadelphia branch, then established. Another branch has existed in Chicago since 1864, under the name of Lyon & Healy.

R. A.

DITTERSDORF, KARL DITTERS VON (original name DITTERS) (b. Vienna, Nov. 2, 1739; d. Oct. 24, 1799), was a distinguished violinist, and prolific composer in all branches of music, but specially esteemed for his German national operas.

He soon outstripped his early teachers on the violin, König and Ziegler (not Zügler, as he calls him in his biography). Ziegler worked his pupil in the orchestra at St. Stephen's, and also in that of the Schottenkirche. Here Ditters was noticed by his chiefs, and on their recommendation was received into the private band of the Prince von Hildburghausen, who, being himself a man of high cultivation, looked after the general education of his young page (a lad of 11), and had him instructed in composition by Bonno, the court composer, in the violin by Trani, and in foreign languages, fencing, dancing and riding. When the Prince dismissed his band in 1759 he procured a place for Ditters in the Empress's opera, but wishing to see the world he started in 1761 with Gluck on a professional tour in Italy, where his playing was much admired. Meantime the famous Lolli had been performing in Vienna with great success, but Dittersdorf on his return vanquished him; the general verdict was 'Each has marvellous execution, but Ditters also speaks to the heart.' His intimacy with Haydn was of service to them both. 'Whenever we heard,' says he, 'a new piece, we went through it carefully together, doing justice to all that was good, and criticising what was bad in it.' In the early part of 1764 he went with Gluck and Guadagni

to Frankfort for the election and coronation (Apr. 3) of the Archduke Joseph as King of the Romans. He played twice at court with brilliant success. On his return to Vienna the rudeness of Count Wenzel Spork, the then manager of the theatre, made him gladly accept the post of Kapellmeister to the Bishop of Grosswardein at Pressburg, *vice* Michael Haydn departed to Salzburg. For his new master he composed symphonies, violin concertos, string quartets and his first oratorio, 'Isacco figura del Redentore,' to a Latin adaptation of Metastasio by the Bishop himself. He also started a small theatre in the castle, for which he wrote several pieces, including his first comic opera, 'Amore in musica.' But in 1769 the Bishop received a rebuke from the Empress on the laxity of his life, and dismissed his whole band. At Troppau Dittersdorf made the acquaintance of Count Schafgotsch, Prince Bishop of Breslau, who invited him to his estate at Johannisberg, where he was living in retirement and disgrace. The versatile musician found means to cheer his master's solitude. He got together a band, engaged singers and musicians, set up a theatre, wrote operas and oratorios and went out hunting, all with equal zest. In return for his services he was made, through the Bishop's influence (in 1770), Knight of the Golden Spur (a distinction enjoyed by Gluck and Mozart), and Amtshauptmann of Freiwaldau (1773), and received a title of nobility—'Ditters von Dittersdorf.' The oratorio 'Davide' and the comic opera 'Il viaggiatore americano' belong to this period, and it was while rehearsing them that he fell in love with Fräulein Nicolini, whom he had engaged from Vienna, and married her.

During a visit to Vienna he composed 'Ester,' words by the Abbé Pintos, for the concerts (Dec. 19 and 21, 1773) in aid of the widows' fund of the Tonkünstler Societät. Between the parts he played a concerto of his own, and so pleased the Emperor that, on Gassmann's death (Jan. 22, 1774), he wished to appoint him court Kapellmeister, but Dittersdorf was too proud to apply for the post, and the Emperor was not inclined to offer it unsolicited. 'Ester' was repeated before the court in 1785; 'Isacco' was performed in Vienna (1776); and 'Giobbe,' also written for the Tonkünstler Societät, on Apr. 8 and 9, 1786, one part each night, Dittersdorf himself conducting. In 1789 it was produced in Berlin with marked success. On another visit to Vienna, in 1786, he produced a symphony on Ovid's *Metamorphoses* at the morning concerts in the Augarten, and it was on this occasion that the often-quoted conversation with the Emperor Joseph II. took place. 'Doktor und Apotheker' (July 11), a lively, sound, though somewhat rough operetta, which has kept the stage to the present day; 'Botrug durch Aberglauben' (Oct. 3, 1786); 'Democrito corretto' (Jan. 24, 1787); 'Die Liebe im

Narrenhause' (Apr. 12) and 'Hieronymus Knicker' (1787), all at Vienna, were brilliant successes, with the exception of 'Democrito.'

In the meantime things had changed at Johannisberg. The Bishop's band, dismissed during the war, had reassembled after the Peace of Teschen, 1779. About 1790 Dittersdorf was obliged to attend to his duties at Freiwaldau, and during his absence his enemies slandered him to the Bishop. Dittersdorf nursed him devotedly during his long illness, but on his death (1795) was dismissed with 500 gulden, a sum soon exhausted in visiting the baths with a view to restore his health, shattered by his irregularities. His next asylum was at the house of Count von Stillfried at Rothlhotta, near Neuhaus in Bohemia, and here, in spite of constant suffering, he composed operas, symphonies and innumerable pianoforte pieces, for which he in vain sought a purchaser. On his death-bed he dictated his autobiography to his son, and died two days after it was completed. (For the doubts as to the place of death, and evidence as to its date, see *Q.-L.*)

Dittersdorf was a thoroughly popular composer. He possessed a real vein of comedy, vivacity and quick invention, bright spontaneous melody, original instrumentation, and breadth in the ensembles and finales, qualities which, exercised on pleasing librettos, made him the darling of his contemporaries. He held the same position in Germany that Grétry did in France, though inferior to Grétry in delicacy, spirituality and depth of sentiment. (For a criticism of his operas see the *M.f.M.*, 24, 55.) His oratorios, much valued in their time; his symphonies, in the style of Haydn, though inferior to Haydn in grace and liveliness; his violin concertos, string quartets (of which 12 were published in 1866), duos, 'divertimenti,' many concertos, one with 11 instruments obbligato, masses, motets and songs—all contributed to his fame, and if they did not survive him, were of moment in their day. Besides the operas already named he composed:

'L' Amore disprezzato'; 'Der Gutsherr'; 'Der reisende Schulmeister'; 'Der Schiffschiffen'; 'Lo sposo burlesco' (1775); 'La contadina fedele' (1785); 'Orpheus der zweite' (1787); 'Das rothe Käppchen' (1788); 'Hocus Focus' (1790); 'Das Gespenst mit der Trommel' (1794); 'Gott Mars oder der eiserne Mann'; 'Don Quixotte' (all 1795); 'Ugolino, grand' opera seria'; 'Der Durchmarsch'; 'Der schöne Herbsttag' (all 1796); 'Der Tarnungsgewinn'; 'Der Mädchenmarkt'; 'Die lustigen Weiber von Windsor'; 'Der Schach von Schiras' (1787); 'Don Coribaldi' (1798); 'Il tribunale di Giove, serenata' (1788); and 'Das Mädchen von Cola,' a song from Ossian with pianoforte (1795).

Of his symphonies, 'Six Symphonies à 8 parties'; 'Trois Symphonies à 4 parties obl., etc.'; and 'Symphonie dans le genre de cinq nations,' etc., were published in Paris in 1770. On the title-page of the first set he is called 'first violin and maître de musique to Prince Esterhazy.' Three symphonies on subjects from Ovid's *Metamorphoses* were published in 1785 by Artaria of Vienna. Six 'Ovid' symphonies and other works (10 vols.) were

published to commemorate the centenary of Dittersdorf's death (Leipzig, 1899). c. F. P.

BIBLIOGRAPHY

- Autobiography of Dittersdorf* (see above). Trans. English by A. D. Colledge. (London, 1896.)
ANOLD: *Karl von Dittersdorf* (founded on the *Autobiography*). (Erfurt, 1810.)
K. KÄRJA: *Dittersdorffiana* (with thematic catalogue). (Berlin, 1900.)
L. RINDINORE: *Dittersdorf als Opernkomponist*. (1914.)

DIVERTIMENTO (Fr. *divertissement*), a term employed for various pieces of music.

1. In Mozart it designates a piece closely akin to a **SERENADE** or **CASSATION**, usually in six or seven movements—though sometimes only four, and once as many as ten; indifferently for trio or quartet of strings, wind alone, or wind and strings mixed. Köchel's *Catalogue* contains no less than twenty-two of such *Divertimenti*.

2. A pot-pourri or arrangement of the airs of an opera or other piece for orchestra or piano.

DIVERTISSEMENT, a kind of short ballet, such as Taglioni's 'Divertissement silésien,' sometimes mixed with songs. Also a pot-pourri or piece on given themes, such as Schubert's 'Divertissement à la Hongroise.' Also a French term for an entr'acte (see **ACT-TUNE**).

DIVIDED STOPS. Organ stops arranged to draw in two portions, as Stopped Diapason Treble, and Stopped Diapason Bass, the latter having a compass of about an octave from the lowest note, which octave frequently has to do duty as the bass of another stop of short compass, as for a Dulciana down to tenor C only.

T. E.

DIVISI (Ital., 'divided'), an expression often met with in the string parts of orchestral scores, meaning that the body of players hitherto playing in unison is to be divided into two or more parts, the number of parts being specified if more than two, or else the parts are written on separate staves, it being obvious that the use of the term is a space-saving device. The abbreviation 'unis' is often used to show where the division ceases (see **ABBREVIATIONS**).

N. C. G.

DIVISIONS, in the musical nomenclature of the 17th and 18th centuries, were rapid passages—slow notes divided into quick ones—as naturally takes place in variations on a theme or ground. Hence the word can be applied to quick consecutive passages like the long semiquaver runs in Handel's bravura songs, such as 'Rejoice greatly,' 'Let the bright Seraphim,' etc.

DIVISION VIOL, see **SIMPSON**, Christopher.

DIVITIS (DE RYCHE, LE RICHE), **ANTONIUS** (ANTOINE), a French or Flemish composer, first mentioned as De Ryche in the account-books of the college of St. Donatus, Bruges, June 13, 1501; he went to Zeeland in 1504, and entered the service of Philippe le Bel in 1505. Later on he was a colleague of Mouton as singer

in the chapel of Louis XII. (d. 1515). The following is a list of his works at present known:

1. A 4-part mass, 'Gaude Barbara' (MS.), in the library at Cambray.
2. A 6-part Credo (MS.) and a Salve Regina a 5 in the Royal Library at Munich.
3. A mass, 'Quem dicunt homines' (of which Ambros gives a description in his *History of Music*), in MS. in the Sistine Chapel, and in the 15th book of the collection by Pierre Attaingnant of Paris.
4. A motet, 'Gloria laus,' in the 10th book of the collection of ancient motets by Pierre Attaingnant (Paris, 1530), who has also, in his collection of Magnificats (Paris, 1534), included one by Divitia.
5. A motet, 'Desolatorum consolator,' in 4 parts, in the 1st book of the 'Motetti della corona' (Petrucchi, Venice, 1514).
6. Many motets for 3 voices in the collection 'Trium vocum cantiones 15' published by Petrus Nuremberg, 1540).
7. A setting of the words 'Ista est speciosa,' in the collection 'Bleina Gallica, Latina, Germanica, etc.,' published by Rhaw (Wittenberg).
8. Two chansons, under the name Le Riche, in the collection 'des plus excellentes chansons' published by Nicolas Duchemin in 1551.
9. A motet and a chanson are at Bologna in a MS. dated 1518.
10. A vocal work in the B.M. Add. MSS. 19,583. (See Q.-L.)

J. R. S. B.

D'IVRY, see **IVRY, D'**.

DIXON, WILLIAM (b. ? London, c. 1760; d. there, 1825), composer, writer, teacher and music-engraver; lived partly in London, partly in Liverpool, where he was apparently connected with All Saints' Church. He composed 'Psalmody Christiana,' a collection of sacred music (1790); 'Euphonia,' 62 psalm and hymn tunes in 4 parts for All Saints' Church, Liverpool; Moralities, or verses on music, friendship, avarice, etc.; services, anthems, glees; also some numbers in Arnold's collection of hymn tunes. He also wrote an *Introduction to Singing* (1795). E. v. d. s.

DJAMILÉH, opéra-comique in one act; words by Louis Gallet, music by George Bizet. Produced, Opéra-Comique, Paris, May 22, 1872; Covent Garden, June 13, 1893.

DLABAČ, BOHUMIL JAN (b. Cerhenice, July 17, 1758; d. there, Jan. 4, 1820), librarian and choirmaster of the Premonstratensian convent of Strahov, Prague. He was the author of *Allgem. historisches Künstlerlexikon für Böhmen*, etc. (Prague, 1815-1818, 3 vols.); *Versuch eines Verzeichnisses der vorzüglicheren Tonkünstler*, etc. (in Rigger's *Statistik von Böhmen*)—two exact and valuable works.

DO, the syllable used in Italy and England in sol-faing instead of Ut. It is said by Fétis to have been the invention of G. B. DONI. It is mentioned in the *Musico pratico* of Bononcini (1673), where it is said to be employed 'per essere più resonante.'

DOBLHOF-DIER, KARL L. B. A. VON (b. Vienna, July 13, 1762; d. there, 1836), an amateur and popular composer; a pupil of A. Salieri. Kiesewetter inherited his library, containing his own compositions, a great part of which is now in the library of the Musikfreunde, Vienna. His compositions were printed at his own expense and never came into the market. They consisted of masses and other church music, sacred and secular songs in parts and for solo voices, etc. (See list in Q.-L.)

DOCHE, JOSEPH-DENIS (b. Paris, Aug. 22, 1766; d. Soissons, July 1825), was a choir-boy

at Meaux Cathedral and became, at the age of 19, Kapellmeister at Constanz Cathedral. In 1791 he went to Paris and joined the orchestra of the Vaudeville Theatre, first as viola, then violoncello, and finally contrabass player. He then became conductor at that theatre, for which he wrote a large number of extra songs and arias for operettas, etc., which met with great success. He composed an opéra-comique, several operettas, masses, piano pieces, etc. (see *Q.-L.*), and retired to Soissons in 1824.

E. v. d. s.

DOCTOR OF MUSIC, see DEGREES.

DODD, bow-makers. (1) EDWARD (*b.* Sheffield, 1705; *d.* London, 1810) is said to have lived to the great age of 105. He was the first bow-maker of this name, and did much towards improving its design. He worked in Salisbury Court, Fleet Street, and was buried in St. Bride's Church.

(2) JOHN (*b.* 1752; *d.* Richmond, Surrey, 1839) was the greatest of the English bow-makers. He has been known as 'The English Tourte.' He was slightly younger than François Tourte, and must have seen examples of bows made by him and by the elder Tourte, and he was the first of the English makers to adopt the fundamental improvements introduced by them. These improvements include the ferrule and the slide, and, what was even more valuable, the discovery of the principle upon which the stick of the bow curved inwardly towards the hair; before Tourte's time the stick was straight, and it was scarcely possible to get any 'spring' in bowing. Dodd used beautiful wood, and his finest bows are admirably finished. Unfortunately, a large number of his violin bows are too short for practical use, but some of his violoncello bows are very fine. The legend that he refused £1000 for the revelation of his 'secret' in bow-making has no foundation in fact. Dodd died a pauper in Richmond workhouse and was buried at Kew.

(3) THOMAS, brother of John, made bows and also instruments, some of his violoncellos being very serviceable. He worked first in Blue Bell Alley, Southwark, then in New Street, Covent Garden, and afterwards in St. Martin's Lane. He was also a dealer in musical instruments. The instruments that bore his label were not made by him, but by some of the best workers of the period; among these were Fendt, John Lott and Tobin. He claimed to be 'the only possessor of the recipe for preparing the original Cremona oil varnish.' In later life he made harps, and introduced some new features in their construction.

(4) EDWARD and (5) THOMAS were sons of Thomas (3), and carried on the business in St. Martin's Lane, but Edward devoted his attention to making harps rather than violins and bows.

- (6) JAMES, another brother of John, and
(7) JAMES, his son, were bow-makers in London.

E. H. F.

DODECACHORDON (original Greek title, ΔΩΔΕΚΑΧΟΡΔΟΝ, from δώδεκα, 'twelve,' and χορδή, 'a string'). A work, published at Basle in Sept. 1547 by the famous mediæval theorist, now best known by his assumed name, Glareanus, though his true patronymic was Heinrich Loris, Latinised Henricus Loritus. (See GLAREANUS.)

The *Dodecachordon* owes its existence to a dispute which, at the time of its publication, involved considerations of great importance to composers of the polyphonic school; and the clearness and logical consistency of the line of argument it brings to bear upon the subject render it the most valuable treatise on the later developments of the Ecclesiastical Modes, that has ever been given to the world.

According to the earlier mediæval theory four modes only were formally acknowledged: at a later date the custom began of counting the plagal modes as distinct from the authentic, and so reckoning eight modes. At a much later date, in the polyphonic period, and when musicians were accustomed to think more continually in terms of the octave, it was natural to think theoretically of fourteen modes, and even to wish to reckon so: some, regarding the modes which have B for their final as unsatisfactory, for want of a perfect fifth in their scale, rejected these two and maintained twelve modes: while the most conservative party, pointing out that the higher four of the twelve were, so far as melody is concerned, mere transpositions of the lower ones, maintained still the old numbering of eight modes (see MODES, ECCLESIASTICAL). The ardent upholders of the twelve claimed Charlemagne as their authority, while the maintainers of the eight could base their contention on far more solid history. Unfortunately, however, they combated the position of the 9th-12th modes by untenable arguments. The complete arrangement is shown in the following scheme:

I. Dorian.	IX. Aeolian.
II. Hypodorian.	X. Hypoaeolian.
III. Phrygian.	XI. Locrian (or Hypo-aeolian).
IV. Hypophrygian.	XII. Hypolocrian (or Hypophrygian).
V. Lydian (or Hypophrygian).	XIII. Ionian (or Iastian).
VI. Hypolydian.	XIV. Hypoionian (or Hypo-astian).
VII. Mixolydian (or Hypolydian).	
VIII. Hypomixolydian.	

Now in all essential points Glareanus follows the system of twelve modes. He describes the Ionian and Hypoionian forms as modes XI. and XII., and simply mentions the rejected Locrian and Hypolocrian scales by name, without assigning them any definite numbers. But all editors of polyphonic music have not followed his example.

Dr. Proske, in his *Musica divina*, follows the first-mentioned system, describing the Ionian and Hypoionian modes as Nos. XIII. and XIV.; and the same plan has been uniformly adopted

in the present Dictionary in dealing with the later modal systems. The want of an unvarying method of nomenclature is much to be regretted; but it no way affects the essence of the question, for, since the publication of the *Dodecachordon*, no one has ever seriously attempted to dispute the dictum of Glareanus, that for polyphonic music twelve modes are available, and twelve only, for practical purposes. These twelve have found pretty nearly equal favour among the great masters of the polyphonic school.¹

The *Dodecachordon* enters minutely into the peculiar characteristics of each of the twelve modes, and gives examples of the treatment of each, selected from the works of the best masters of the early polyphonic school. The amount of information it contains is so valuable and exhaustive, that it is doubtful whether a student of the present day could ever succeed in thoroughly mastering the subject without its assistance.

The text, comprised in 470 closely printed folio pages, is illustrated by 89 compositions, for 2, 3 and 4 voices, with and without words, printed in separate parts, and accompanied by directions for deciphering the enigmatical canons, etc., by the following composers: Antonio Brumel (4 compositions); Nicolaus Craen (1); Sixt Dietrich (5); Antonius Fevin (1); Adam de Fulda (1); Damianus à Goes, Lusitanus (1); Heinrich Isaac (5); Josquinus Pratensis (Josquin des Prés) (25); Listenius (1); Adam Luyr Aquisgranensis (1); Gregor Meyer (10); Joannes Mouton (4); Jac. Obrecht (3); Johannes Okenheim (3); De Orto (1); Pertus Platensis (Pierre de la Rue) (3); Richafort (1); Gerardus à Salice Flandri (1); Lutvichus Senflius (3); Andr. Sylvanus (1); Thomas Tzamen (1); Jo. Vannius (Wannenmacher) (1); Vaqueiras (1); Antonius à Vineia (1); Paulus Wuest (1); Anonymous (9).

The first edition of the ΔΩΔΕΚΑΧΟΡΔΟΝ was printed at Basle in 1547. A second edition, entitled *De musices divisione ac definitione*, but with the same headings to the chapters, is believed to have been printed at the same place in 1549. A small volume, entitled *Musicae epitome, sive compendium, ex Glareani Dodecachordo*, by J. Wonnegger, was published at Basle in 1557, and reprinted in 1559. The original work is now very scarce and costly, though, happily, less so than the *Syntagma* of Praetorius, or the *Musica getuschl und auszgezogen* of Sebastian Virdung. Copies of the edition of 1547 will be found at the British Museum and the R.C.M.; and the British Museum also possesses the first edition of Wonnegger's *Epitome*. W. S. R.; recast by W. H. F.

DÖHLER, THEODOR (b. Naples, Apr. 20, 1814; d. Florence, Feb. 21, 1856), an accomplished pianist of Jewish family, and a com-

poser of 'salon' music. Döhler was an infant phenomenon, and as such the pupil of Benedict, then resident at Naples. In 1829 he was sent to Vienna, and became Carl Czerny's pupil. From Vienna, where he remained till 1834, he went to Naples, Paris and London—then travelled in Holland, Denmark, Poland and Russia—as a successful fashionable virtuoso. He was raised to noble rank by the influence of his patron, the Duke of Lucca, and enabled to marry a Russian princess in 1846; he gave up public playing about that time, and lived successively in Moscow, Paris and (from 1848) Florence. An opera by him, 'Tancreda,' was performed at Florence in 1880. (*Riemann*.) His works reach as far as op. 75. E. D.

DÖRFFEL, ALFRED (b. Waldenburg, Saxony, Jan. 24, 1821; d. Leipzig, Feb. 1905), received his first musical education from the organist Joh. Trube. In 1835 he went to Leipzig, where he received instruction from Karl Kloss, G. W. Fink, C. G. Müller, Mendelssohn and Schumann.

In 1837 he made a successful appearance as a pianist, and soon afterwards attained to a high position as a musical critic. In the *Neue Zeitschrift für Musik* he wrote some reviews of Schumann's works, which anticipated the verdict of posterity, although they did not correspond with contemporary opinion concerning that master's greatness. His criticism of 'Genoveva' gave the composer great pleasure. From 1865–81 he contributed to the *Leipziger Nachrichten*, and in 1860 was appointed custodian of the musical department of the town library. In the following year he established a music lending library together with a music-selling business, in both of which he was succeeded in 1885 by his son, Balduin. This business afterwards became the basis of the lending library of the Peters firm. He undertook much work for the firm of Breitkopf & Härtel, whose critical editions of the classics, and especially that of Beethoven, were chiefly corrected by him. For the edition of Peters he edited the pianoforte works of Schumann, and other compositions, and several of the Bach-Gesellschaft volumes have been issued under his direction. In 1887 he edited the St. Luke Passion for the first-named firm. To the literature of music he contributed an edition of Berlioz's treatise on Instrumentation, the second edition of Schumann's *Gesammelte Schriften*, and published an invaluable history of the Gewandhaus concerts from 1781–1881 (*Festschrift zur hundertjährigen Jubelfeier*, etc., Leipzig, 1884), in recognition of which the University of Leipzig conferred upon him an honorary Doctorate in 1885. H. B.

DOGNAZZI, FRANCESCO, a 15th–16th century musician, in the service of seven Dukes of Mantua Monferrata from c. 1603 onward. In 1619–20 he followed Orlando Sante as maestro

¹ Consult, on this point, Bain's *Life of Palestrina* (*Memorie*, etc.), tom. ii. p. 81.

dicappella and was still in that position in 1643. He composed 'II I. lib. de varij concerti a 1 ed a 2 voci . . .' (1614); 'Musiche varie da camera a 5'; some motets, etc. (See Q.-L.)

DOHNÁNYI, ERNST VON (b. Pressburg, Hungary, July 27, 1877), a distinguished composer and pianist, was at first taught music by his father, the professor of mathematics in the Gymnasium there, where he received his general education; in 1885 he began pianoforte lessons with Carl Forstner, organist of the cathedral of Pressburg, and later on studied harmony with him, remaining under his musical supervision until 1894, when he entered the Royal Hungarian Academy of Music, in Budapest, as a pupil of Stephan Thomán for piano, and of Hans Koessler for composition.

While he was still at Pressburg he made several experiments in the larger forms of composition, writing a string sextet, and 3 string quartets, besides pianoforte sonatas, songs, etc. At Budapest a symphony in F was rewarded with the King's prize, and performed in 1897. In July and August of that year he had some lessons from Eugen d'Albert, being already a pianist of high attainment; on his first appearances, in Berlin, Oct. 1, 1897, and at Vienna a little later, he was recognised as an artist of the highest rank. Not only is his technical accomplishment extraordinarily complete, but the breadth of his phrasing, his command of tone-gradation, and the exquisite beauty of his tone, are such as to satisfy the most exacting lover of classical and modern music, and in both an intensely poetical nature is revealed. He played in the principal cities of Germany, Austria and Hungary, before his first appearance in England, which took place at a Richter concert in the Queen's Hall in Beethoven's G major concerto, on Oct. 24, 1898. He made a rapid and permanent success within a very short time, and first visited the United States in 1899. His tours there have been frequent and successful. He became professor of the pianoforte at the Berlin Hochschule in 1908, and director of the Conservatoire of Budapest in 1919.

As a composer Dohnányi first founded his high reputation on works for the pianoforte and concerted chamber music. His quintet in C minor (op. 1), given in Budapest in 1895, showed at once his feeling for classical forms, and the influence of Brahms on his manner of dealing with sonata form is evident through his early works, including the beautiful and now popular sonata for violin and pianoforte (op. 21). From the first, however, there was originality, and a vivacious wit was always ready to relieve the severer forms, sonata, variations or passacaglia, in which he worked. Alike in the Humoresken in form of a suite (op. 17), some numbers of the 'Winterreigen' for pianoforte (op. 13), and

more recently the brilliant 'Variations on a nursery song' ('Ah vous dirai-je, Maman'), these qualities appear. Latterly Dohnányi has extended his activities to dramatic music, and two comparatively small works, 'Der Schleier der Pierrette' (ballet) and 'Tante Simona' (one-act opera), both produced at Dresden, 1910 and 1912 respectively, proved to be precursors of a more important opera. In 'The Tower of Voivod,' based on an Hungarian folk-ballad, produced with success at Budapest (Mar. 18, 1922), Dohnányi asserted his nationality. While it was remarked that his music did not draw very extensively on the national folk-song as revived by such composers as Kodály and Bartók, in fact that it was written in his own style, it was felt to be an example of that national romanticism which produced the characteristic operas of the surrounding Slavonic nations in the 19th century. As such it appeared highly significant considering the new independence of Hungary.

The following is a list of Dohnányi's chief instrumental works:

ORCHESTRA

Symphony in F. (1897).
Pianoforte Concerto in E minor (op. 5).
Symphony in D minor (op. 9).
Concertstück, vcl. and orch. (op. 12).
Suite for orchestra, F# minor (op. 19).
Violin Concerto in D.
Variations on a Nursery Song, PF. and orch. (op. 25).

CHAMBER MUSIC

Quintet in C minor, PF. and strings (op. 1).
String Quartet in A minor (op. 7).
Sonata in B flat minor for vcl. and PF. (op. 8).
Serenade in C for vln., vla. and vcl. (op. 10).
String Quartet in D flat (op. 15): do. in A minor (op. 33).
Sonata in C# minor for vln. and PF. (op. 21).

PIANOFORTE

Four Pieces (Clavierstücke) (op. 2).
Waltzes (four hands) (op. 3).
Variations in G (op. 4).
Passacaglia (op. 6).
Four Rhapsodies (op. 11).
Winterreigen, 10 Bagatelles (op. 13).
Humoresken in form of a Suite (op. 17).
Three Pieces (Clavierstücke) (op. 23).
Songs include 6 poems by Victor Heindl (op. 14).

M. and C.

DOISI DE VELASCO, NICOLAS (b. Portugal, c. 1600), a guitar-player, brought up in Spain, and attached for a time to the suite of Philip IV. In 1640 he published (at Naples) a book of tablature entitled 'Nuevo modo de cifra para tañer guitarra con variedad y perfeccion' (Bibl. Nac., Madrid). His real name is said to have been Diaz de Velasco.

J. B. T.

DOKTOR FAUST, see FAUST (5).

DOLBY, see SAINTON-DOLBY.

DOLCE, sweetly; a sign usually accompanied by *piano*, softly—*p. dol.*, and implying that a sweet melodious feeling is to be put into the phrase. Beethoven (string quartet, op. 59, No. 1) has *mf e dolce*; and Schumann begins the Finale of his E♭ Symphony with *f dolce*.

DOLCIAN (DOLCINO, DOUCAINE, DULCIAN), also known as ALTO FAGOTTO, an obsolete instrument of conical bore of the bassoon type and an octave higher in pitch. The later TENORON was thus intermediate.

The bell-mouth of the Dolcian was covered by a perforated cap, by which the open and harsh character of the lower notes was subdued. (PLATE LIV. No. 1.) D. J. B.

DOLES, JOHANN FRIEDRICH (b. Steinbach, Saxe-Meiningen, Apr. 23, 1715; d. Leipzig, Feb. 8, 1797), was educated at the Schleusingen Gymnasium, where he availed himself of instruction in singing and in playing on the violin, clavier and organ.

In 1739 he went to Leipzig for a course of theology at the University, and while there pursued his musical studies under J. S. Bach. His compositions, however, bear little trace of Bach's influence. Doles would seem to have been more affected by the Italian opera, with which he became familiar by constant attendance at performances given for the Saxon court at Hubertsburg. His light, pleasing and melodious compositions, together with the charm of his manners, rapidly brought him popularity at Leipzig. In 1743 the Gewandhaus Concerts were founded¹; and on Mar. 9, 1744, he conducted the first performance of his 'Festival Cantata' in celebration of the anniversary of their foundation. In that same year he was appointed cantor at Freiberg, where he wrote, in 1748, on the occasion of the hundredth anniversary of the Peace of Westphalia, the Singspiel, out of which arose the famous dispute between Biedermann, Mattheson and Bach.² In Jan. 1756 he succeeded Gottlob Hasser as cantor of the Thomasschule and also as director of the two principal churches, which posts he held until 1789, when old age and failing health compelled him to resign them. In the spring of 1789 Mozart visited Leipzig, and on Apr. 22 he played on the organ at St. Thomas's Church, and made his well-known remark to Doles about Bach's music. (See MOZART.) It was probably on the same occasion that J. C. BARTHEL (q.v.) played before Mozart at Doles's house. And in the following year Doles published his cantata to Gellert's words (performed in 1789), 'Ich komme vor dein Angesicht' (Leipzig, 1790), dedicated to his friends Mozart and Naumann. Special interest attaches to this work, because its preface records Doles's opinions as to the way in which sacred music should be treated, and those opinions have little in common with the traditions of J. S. Bach. It is plain, indeed, that although Doles was proud of having been Bach's pupil, he took no pains whatever, during his directorship at Leipzig, to encourage and extend the taste for his great master's works. Bach's church music was almost entirely neglected both by him and his successor, J. A. Hiller.

¹ They were then called 'das grosse Concert,' and were held in a private house; they were interrupted by the outbreak of the Seven Years' War.

² See Bitter's *J. S. Bach*, III. 229, and Spitta's *J. S. Bach*, III. 255 f. (Engl. transl.).

His compositions consist principally of cantatas, motets, psalms, sacred odes and songs, and chorales, many of which have been printed, including some sonatas for the clavicembalo. His *Elementary Instruction in Singing* had, in its day, considerable reputation as a useful practical method. Among his many works (see Q.-L.) may be mentioned three settings of the Passion-music, according to St. Matthew, St. Mark and St. John, two Te Deums, two Masses, a Kyrie, a Gloria, a Salve and a German Magnificat. A. H. W.

BIBL.—GREGOR SCHURERMAN, *Die Bescherer um das Freiburger Kantorat*. (Doles, pp. 194-202). A.M. I, 1919.

DOLEŽIL, HUBERT (b. 1876 at Volké Kunčice, Moravia), musical critic and writer, established in Prague. Editor of the musical periodical *Smetana*. R. N.

DOLEŽIL, METHOD (b. Oct. 15, 1885), choir-master and professor at the Prague Conservatoire. He founded the Choral Union of Prague Women Teachers, and, in 1922, succeeded Fr. Spilka as conductor of the famous choir *Pěvecké sdružení pražských učitelů* (Choral Union of Prague Teachers), one of the two choral societies which visited London during the Czechoslovak Musical Festival, 1919 (see also FERD. VACH). R. N.

DOLMETSCH, ARNOLD (b. Le Mans, France, 1858), after studying the violin with Vieuxtemps in Brussels, began the practical study of old instruments and their music, on which he has become a high authority.

Dolmetsch approached the subject in the most practical manner, collecting specimens, making his own repairs and discovering their technique by his own performance. He built keyboard instruments, clavicords and harpsichords, and for seven years (1902-9) was engaged by the firm of CHICKERING (q.v.) at Boston from whence many of his instruments were issued. Subsequently he took charge of a similar department in the firm of GAVEAU (q.v.) in Paris, but from 1914 onwards he has lived in England and has set up his own workshop at Haslemere, Surrey. Pursuing the practical method he has taught the several members of his numerous family to play on viols and recorders, and has thus re-created the domestic consort of the 17th century. His eldest daughter HÉLÈNE (b. Nancy, Apr. 14, 1880; d. 1924), was a fine player of the viola da gamba. Dolmetsch has given many concerts in London and elsewhere of music from the 16th to 18th centuries, and has brought forward much of the old English school (see FANCY) formerly unknown. In the summer of 1925 he gave a festival of such music at Haslemere. He has edited *Select English Songs and Dialogues of the XVI. and XVII. Centuries*, but his most important publication is *The Interpretation of the Music of the XVII. and XVIII. Centuries* (1915), a book invaluable to students. c.

DOMINANT (1) the name given to the 5th note of the scale of any key counting upwards. Thus G is the dominant in the key of C, F in that of B \flat , and F \sharp in that of B. In the harmonic system of **TONALITY** (q.v.) it and the chords built on it play the principal part in defining the key. Hence the name. (See **CADENCE**.)

(2) Under the ancient modal system the dominant was not always upon the same degree of the scale. For its history and position, see **MODES**, **ECCLESIASTICAL**.

DOMINICETTI, CESARE (b. Desenzano, lake of Garda, July 12, 1821; d. Sesto, Moura, June 21, 1888), composer of dramatic music. He studied music in Milan, where he first challenged the verdict of the public as composer with the opera 'I Belli Usi di Città' (1841). To this first experiment followed 'Due mogli in una' (1853), and 'La Maschera,' given the following year. He then left Italy for Bolivia, where he amassed considerable wealth. On his return to his native country he produced other operas, the most notable of which are 'Morovico' (1873), 'Il Lago delle Fate' (1878) and 'L'Ereditiera' (1881). Appointed professor of composition at the Milan Conservatoire in 1881, he retained this place until his death. F. B.

DOMINO NOIR, LÉ, opéra-comique in 3 acts, words by Scribe, music by Auber; produced Dec. 2, 1837. Translated by Chorley and produced in English (an earlier attempt had failed), Feb. 20, 1861, at Covent Garden.

DOMMER, ARREY VON (b. Danzig, Feb. 9, 1828; d. Cawel, Feb. 18, 1905), a musical writer of Leipzig (1851) and Hamburg (1863). In 1873 was made secretary to the Hamburg city library, a post which he held until 1889, when he retired and went to live at Marburg. In 1862 his *Elemente der Musik* appeared; in 1865 he published an enlarged edition of H. C. Koch's *Musikalisches Lexicon* of 1802, a sterling work. His *Handbuch der Musikgeschichte* (1868, 2nd ed. 1878) was re-edited (3 vols. by Arnold Schering) in 1914. (Riemann.)

DONALDA, PAULINE (née **LICHTSTONE**) (b. Montreal, Mar. 5, 1884), operatic soprano. She studied music at the Royal Victoria College, Montreal, and singing with F. Duvernoy, Paris, where she married the baritone, Paul Seveilhac, and, after his death, another well-known singer, Mischa Léon. Her stage name was adopted out of compliment to Sir Donald Smith (Lord Stratheona), who endowed the Victoria College. She made her début in opera at Nice in 1904 as Manon, her success there being emphatically endorsed in the following year at the Brussels Monnaie and at Covent Garden in 1905. The rich, sympathetic quality and resonant timbre of her voice and her vivacious, artistic style won general admiration. She appeared here several seasons in familiar parts such as Marguerite, Zerlina,

Micaela, Gilda, Mimi, Nedda, Violetta and Carmen, besides creating the rôle of Ah-joe in Leoni's opera 'L'Oracolo' (1905) and that of Concepcion in Ravel's 'L'Heure espagnole' (1919). In all of these she showed exceptional talent as an actress. She sang in 1906 under Oscar Hammerstein at the Manhattan Opera House, New York, and in 1907 appeared at the Opéra-Comique, Paris.

II. K.

DONATI, IGNATIO (b. Casalmaggiore near Cremona). In 1612 he was organist of Urbino Cathedral, in 1616 and 1619 maestro di cappella della Archiconfraternità e Accademia dello Spirito Santo di Ferrara, in 1622 and 1626 maestro di cappella della Terra di Casalmaggiore. In Lomazzo's *Flores praeantissimorum virorum*, Milan, 1626, Ignatio Donati is termed 'maestro di cappella of Novara Cathedral' (Parisini, ii. 67). In 1629 and 1630 he was organist of Lodi Cathedral, and from 1631 till 1638 maestro di cappella of Milan Cathedral. Donati was probably organist of Pesaro Cathedral before 1612; at any rate it was there, as well as at other places, that he tried his plan of making the different voices sing at a distance from each other (Parisini, ii. 144).

LIST OF WORKS

1. Ignatio Donati Ecclesiae Metropolitanae Urbini Musicae Praefecti sacri concensus 1, 2, 3, 4 & 5 vocibus, una cum parte organica. Venetia. Glucino Vincenti. 1612. 4to. Contains fifty-four compositions. Five partbooks in the Breslau Stadtbibl.
2. Motetti a 5 voci in concerto con due sorti di letanie della Beata Vergine & nel fine alcuni canoni. D' Ign. D. maestro di cappella dell' Archiconfraternità & Accademia dello Spirito Santo di Ferrara. Venetia. Gluc. Vincenti. 1616. 4to. Opera completa. Six partbooks. Tenore e quinto in Berlin Konigl. Bibl.
3. Concerti ecclesiastici a 2, 3, 4 & 5 voci. Con il basso per sonar nell'organo. D' Ign. D. maestro di cappella dello Spirito Santo di Ferrara. Opera IV. Venetia. Gluc. Vincenti. 1618. 4to. Contains twenty-one compositions. Five partbooks in Bologna Liceo Musicale.
4. Concerti ecclesiastici a 1, 2, 3 & 4. Con il basso per l'organo. D' Ign. D. maestro di cappella dello Spirito Santo in Ferrara. Opera V. Venetia. Gluc. Vincenti. 1618. 4to. Four partbooks. Cantos I. and II. in Bologna Liceo Musicale.
5. Motetti concertati a 5 & 6 voci con dialoghi, salmi e letanie della B.V. e con il basso continuo per l'organo. D' Ign. D. maestro di cappella della Archiconfraternità & Accademia dello Spirito Santo di Ferrara. Opera VI. Venetia. Gluc. Vincenti. 1618. 4to. Contains fifteen compositions. Seven partbooks in Königsberg Bibl.
6. Concerti ecclesiastici. . . Opera IV. Novamente con ogni diligente correte e ristampate. Venetia. Aless. Vincenti. 1619. 4to. Six partbooks in the Brussels Bibl. royale.
7. Concerti ecclesiastici. . . D' Ign. D. maestro di cappella della Terra di Casal Maggiore. Opera V. Novamente con ogni diligente correte e ristampate. Venetia. Aless. Vincenti. 1622. 4to. Canto II, terza e quarta parte in Bologna Liceo Musicale.
8. Motetti a 5 voci in concerto. . . Novamente ristampate & con diligente correte. Venetia. Aless. Vincenti. 1622. 4to. Tenor, basso, quinto, e basso per l'org. in Bologna Liceo Musicale.
9. Messe a 4 & 6 voci, parte da cappella e da concerto con il basso per l'organo. D' Ign. D. maestro di cappella della Terra di Casal Maggiore. Venetia. Aless. Vincenti. 1622. 4to. Contains four Masses. Seven partbooks. Tenor, quinto e sesto in Bologna Liceo Musicale.
10. Salmi boccarecci concertati a sei voci, con aggiunta, se piace, di altre sei voci, che servono per concerto, e per ripieno doppio, per cantare a più chori: con una messa similmente concertata & con il ripieno, d' un'altra simile a sei, già stampata; & con il basso principale per sonar nell'organo. D' Ign. D. maestro di cappella nella Terra di Casal Maggiore; L' Auriga nella Accademia de' Filomeni. Opera IX. Venetia. Aless. Vincenti. 1623. 4to. Contains sixteen compositions. Thirteen partbooks in Ferrara. Bibl.
11. Concerti ecclesiastici. . . Opera V. Novamente in questa terza impressione con ogni. etc. Venetia. A. Vincenti. 1625. 4to. It includes one motet by A. Serra, a pupil of Donati, to whom he dedicated No. 18. Four partbooks in Bologna Liceo Musicale.
12. Concerti ecclesiastici. . . D' Ign. D. maestro di cappella della Terra di Casal Maggiore. Opera IV. Novamente in questa terza impressione corretti & ristampati. Venetia. A. Vincenti. 1628. 4to. Five partbooks in the Breslau Stadtbibl.
13. Motetti a 5 voci in concerto. . . Novamente in questa terza impressione ristampati e corretti. Venetia. A. Vincenti. 1628. 4to. Six partbooks in Bologna Liceo Musicale.
14. Messe a 4, 5 & 6 voci. . . Novamente in questa terza impressione ristampati. Venetia. A. Vincenti. 1626. 4to. Seven partbooks in Bologna Liceo Musicale.

In the Vienna Hofbibl. (Mantuan). Some madrigals (in score) in the Brussels Bibl. royale. MS. 2269. Madrigal for 4 voices, 'O grief, if yet my grief' (Add. MSS. 17,792-6), and two cançons for 4 voices, 'Chi la gagliarda' and 'Te parlo, tu me ridi' (B.M. Add. MSS. 11,584).

In Collections (published at Venice):

1048. S' una fedecamerosa: S' haver altrui più. Lib. III. di madrigali a 5 voci di C. de Rore.
1549. O felice colui. Fantasia ed ricercari a 3 voci da Giul. Tiburtino da Tievole. Also in the 1551-55-59-61-69-97 editions of Madrigali a 3 voci da div. eccell. musici. In Musica libro primo a 3 voci di Adr. Wigilar. 1586. In the 1570-78-89 editions of Lib. I. delle Justintiane a 3 voci. (Scotto.) Motet Lib. I. de' moletti a 5 voci da div. eccell. musici. (Scotto.)
1567. Amor io son sì lieto. Lib. IV. Madrigali a 5 voci di C. de Rore, and in 1563 edition.
1561. Pensier dicea. Lib. III. delle musice a 5 voci composto da div. eccell. musici. (Gardano) And in 1569 edition.
1569. O dolce servito; Anchor ch' io possa dire; S' io veggio in altrà. La Cletta di tutta la musica infinita corona de' diversi, a 4 voci. Lib. I.
1570. Questo sì ch' è. Antonelli's I dolci frutti. Lib. I. Madrigali di div. eccell. autori a 5 voci.
- Quando madonna. Lib. VI. delle Villotte alla Napoletana a 3 voci. (Gardano.)
1572. E volo eriar, tanto eriar. Lib. I. delle Justintiane a 3 voci.
1576. Che val peregrinar. Musica di XIII autori illustri a 5 voci per Angelo Gardano raccolta. And in 1589 edition.
- Seven motets from B. D.'s Lib. I.: Adesse nuptiales; O Jhesu Christe; Quam diuus hydrops; Quid haecitas rogare; Rumpite somnium; Turba de Christo; Unde iudicibus datur. In Cantiones suavissime quatuor vocum. (Erfurt, Baumann.)
1579. Tratto fuori del mar. Trionfo di musica di diversi a 6 voci. Lib. I. Also in Melos olimpia, a 6 voci. (Vinc. di Amadieu, raccolta da Pietro Philipp. 1591, 1594 and 1611 editions. Anversa.)
1582. The song in lute tablature. Novae tabulae musicae. J. C. Barbeci (Strassburg).
1584. Da quel bel crin (a 5). Deh l' lascia l' autor (a 4). Dolor, se l' mio dolore (a 5). Fronimo, in notazione di luto. Vinc. Galliei.
- Cantano dunque (a 8); Quando nascesti (a 12). Musica di diversi autori illustri. Lib. I. (Vincenzi and Amadieu.)
1585. Wann uns die Hertz; Zu dir allein Herr steht. Schoner Lieder . . . mit 4 Stimmen gesetzt, durch Joh. Pöhlerum Schwanndorffensem. (Amlich.)
1588. O grief, if yet my grief (Dolor se l' mio dolor); As in the night (Come la notte). Yonge's Musica transalpina, a 4 voci. Nos. 5 and 6, reprinted by Ruidt, 1869.
1589. Che val essa audirita. Musicale essercitio di Ludovico Balbi, a 5 voci.
- 1588-89. 90. Chi dira mai; O dolce vita; Tu mi farai. Gemma musicilis. Frederici Lindner. (Noribergae.) Lib. I., II., III. a 4 voci.
1593. Da quel bel crin (a 5). Nuova spoglia amorosa (Vincenzi).
1594. Madrigal a 4 voci. Florilegium omnis. Per Adr. Bensa.
1597. Se pur ti guardo. Livre vu des chansons a 4 parties. (Anvers.) Also in 1613, 1620 and 1626 editions.
1598. Olue ch' il mio languire. Madrigali de' diversi a 4 voci. Raccolta da G. M. Radino.
1600. Più potente, e più forte; Vergin Dea ch' il Ciel' adora; Vergine dolce e pia. Arascone's Nuove laudi ariose (Roma), a 4 voci.
- Veni domine (a 6). Sacrarum symphoniarum continuatio div. excell. authorum. (Noribergae.)
1606. Deh Pastorale. Leggiadra nimpha a 3 voci alla napoletana. (Gardano.)
1609. Motet, a 5 voci. Florilegium sac. cant. (Antverpia).
1613. Beati eritis cum maledixerint (a 5). Promptuarii musici. Schadaeus. Part 3. Reprinted in Commers's Musica sacra, vol. XXIV. (r. 1800).

In 1837, 'All ye who music love' was included in Thos. Oliphant's 'Favourite Madrigals arranged from the original part-books.' The graceful 'Chi la gagliarda' from the first book of Canzoni has often been reprinted—in Burney, III. 216; Busby, II. 108; Kiesewetter, No. 23; Reissmann, II. No. 19; Wüllner, No. 92; and at more recent date edited by W. B. Squire, with 'Viva sempre,' villotta for four voices (Novello, 1895). These two, together with three madrigals, are in the first volume of Torch's *Arte musicale in Italia*.

C. S.

DON CARLOS. (1) Opera seria in 3 acts, words by Tarantini, music by Costa; produced Her Majesty's Theatre, June 20, 1844. (2) Grand opera in 5 acts, words by Méry and Du Locle, music by Verdi; produced Opéra, Paris, Mar. 11, 1867; Covent Garden, June 4 the same year.

DONFRID, JOHANN, an early 16th-century rector of the school of Rothenburg a./Neckar, and from 1627 director of music at St. Martin. He published one of the most important collections of church compositions of older masters, 'Promptuarium musicum,' in 3 volumes (Strassburg, 1622-27); 'Viridarium Musico-Marianum' (1627). 201 songs, 'Corolla Musica Missarum 37' (1628); 'Der Tablatur für

Orgel I.ter, II.ter Teil' (Hamburg, 1623). Walther, in 1732, was unable to trace the 1st part of this important organ book, and Eitner has evidently not found the 2nd part either.

M. v. d. s.

DON GIOVANNI (IL DISSOLUTO PUNITO, OSSIA IL DON GIOVANNI), opera buffa in 2 acts; words by Da Ponte; music by Mozart. Produced Prague, Oct. 29, 1787; King's Theatre, Apr. 12, 1817; in English, Covent Garden, May 30, 1817; New York, Park Theatre, May 23, 1826. The actual first performance in England appears to be one given by amateurs at Hayward's Floor-cloth Manufactory, Borough, and afterwards at London Tavern, Bishopsgate, sometime before 1806.

W. B. S.

DONI, GIOVANNI BATTISTA (b. Florence, c. 1593; d. 1647), studied Greek, rhetoric, poetry and philosophy at Bologna and Rome.

He received the degree of Doctor from the university of Pisa, and was chosen to accompany Cardinal Corsini to Paris in 1621, where he became acquainted with Mersenne and other literary persons. On returning to Florence in 1622, he entered the service of Cardinal Barberini, and went with him to Rome, where he became secretary to the Papal College, afterwards accompanying the cardinal to Paris, Madrid, and back to Rome. Doni made good use of the opportunities that came in his way on these journeys, to acquire an exhaustive knowledge of ancient music; among other things he invented, or reconstructed, a double lyre, which, in honour of his patron, he called 'Lyra Barberina,' or 'Amphichord.' After the death of his brother he returned to Florence about 1640, when he married and settled down as professor in the university there. In 1635 his valuable treatise on the ancient Greek music, *Compendio del trattato de' generi e de' modi della musica*, was published at Rome; and, as it was an abstract of a larger work, it was completed by the publication of *Annotazioni sopra il compendio*, etc., in 1640. Another book, *De praestantia musicae veteris*, appeared at Florence in 1647, and as late as 1763 his description of the 'Lyra Barberina' was published at Florence. Some other treatises are still in existence in a MS. in the library of Sta. Cecilia in Rome, and a few fragmentary works are mentioned in Q.-L.

M.

DONIZETTI, GAETANO (b. Bergamo, Nov. 29, 1797; d. there, Apr. 8, 1848). Though he began his career as a composer of operas at a very early age, he never achieved any important success until after Rossini had ceased to compose.

Having begun his studies at the Conservatorio of Naples, under Mayr, he completed them at the Liceo Filarmonico at Bologna. His father, originally a weaver by trade, wished

him to be a teacher, but to avoid this he entered the army, and while quartered at Venice produced, in 1818, his first opera, 'Enrico di Borgogna,' which was rapidly followed by 'Il Falegname di Livonia' (Mantua, 1819). His 'Nozze in villa' failed in 1820, but 'Zoraide di Granata,' given at Rome in 1822, procured for him exemption from military service, and the honour of being carried in triumph and crowned at the Capitol. A long series of operas (see below) was given in Rome, Naples and other cities, but the first which gained the ear of all Europe was 'Anna Bolena,' given for the first time at Milan in 1830. This opera, which was long regarded as its composer's masterpiece, was written for Pasta and Rubini. It was in 'Anna Bolena' too, as the impersonator of Henry VIII., that Lablache made his first great success at the King's Theatre in London. The graceful and melodious 'Elisir d'amore' was composed for Milan in 1832. 'Lucia di Lammermoor,' perhaps the most popular of all Donizetti's works, was written for Naples in 1835, the part of Edgardo having been composed expressly for Duprez, that of Lucia for Persiani. Among other results of its success was the appointment of Donizetti as professor of counterpoint at the Real Collegio di Musica at Naples. The lively little operetta called 'Il campanello di notte' was produced in 1836 to save a Neapolitan manager and his company from ruin. 'If you would give us something our fortune would be made,' said one of the singers. Donizetti declared they should have an operetta from his pen within a week, and, recollecting a vaudeville which he had seen in Paris, called 'La Sonnette de nuit,' took that for his subject, rearranged the little piece in operatic form, and forthwith set it to music. Donizetti seems to have possessed considerable literary facility. He designed and wrote the last acts both of the 'Lucia' and of 'La favorita'; and he himself translated into Italian the libretti of 'Betly' and 'La Fille du régiment.' In May 1837 he was made director of the Collegio di Musica in succession to Zingarelli.

On the refusal of the Neapolitan censorship to allow the production of his 'Poliuto,' Donizetti went to Paris in 1839, bringing out many of his best works at one or other of the lyric theatres of Paris. 'Lucrezia Borgia' had been composed for Milan in 1833. On its revival in Paris in 1840, the 'run' was cut short by Victor Hugo, who, as author of the tragedy on which the libretto is founded, forbade the representations. 'Lucrezia Borgia' became, at the Italian opera of Paris, 'La reine-gata'—the Italians of Alexander the Sixth's Court being changed into Turks. 'Lucrezia Borgia' may be said to mark the distance half-way between the style of Rossini,

imitated by Donizetti for so many years, and that of Verdi, which he in some measure anticipated. Not only 'Poliuto' (under the name of 'Les Martyrs'), but 'La Fille du régiment' and 'La favorita,' were all brought out in the same year, 1840. Jenny Lind, Sontag, Patti, Albani, all appeared with great success in 'La figlia del roggimento.' 'La favorita' is based on a very dramatic subject (borrowed from a French drama, 'Le Comte de Comminges'). In London its success dates from the time at which Grisi and Mario undertook the two principal parts. The concluding act of this opera is probably the most dramatic Donizetti ever wrote. With the exception of a cavatina, and the slow movement of the duet, which was added at the rehearsals, the whole of this fine act was composed in from three to four hours. Leaving Paris, Donizetti visited Rome, Milan and Vienna, at which last city he brought out 'Linda di Chamouni,' and contributed a Miserere and Ave Maria to the Hofkapelle, written in strict style, and much relished by the German critics. He received the titles of Hofcompositeur and Kapellmeister. Then, coming back to Paris, he wrote (1843) 'Don Pasquale' for the Théâtre Italien, and 'Dom Sébastien' for the Académie. 'Dom Sébastien' did not succeed. The brilliant gaiety, on the other hand, of 'Don Pasquale' charmed all who heard it. For many years after its first production 'Don Pasquale' was played as a piece of the present day; but the singers and their audience considered that there was a little absurdity in prima donna, baritone and basso wearing the dress of everyday life; and it was usual, for the sake of picturesqueness in costume, to put back the time of the incidents to the 18th century. 'Don Pasquale' and 'Maria di Rohan' (Vienna) belong to the same year.

Donizetti's last opera, 'Catarina Cornaro,' was produced at Naples in 1844, and apparently made no mark. This was his sixty-third work, without counting two operas which were never played in his lifetime. One of these, the 'Duc d'Albe,' was produced in 1882 in Rome. Donizetti, during the last years of his life, was subject to fits of melancholy and abstraction which became more and more intense, until in 1845 he was attacked with paralysis, and in 1847 was able to return to his native place, Bergamo, where he died. He was buried some little distance outside the town, was disinterred on Apr. 26, and reburied on Sept. 12, 1875, in Santa Maria Maggiore, Bergamo, where a monument by Vincenzo Vela was erected in 1855.

H. S. E.

Donizetti's music has aged very considerably since his death. Nor could it be otherwise considering the conditions in which it was written. In the first place the plan favoured by Donizetti of writing as rapidly as possible is

never likely to result in work of enduring quality. He wrote an opera ('Il campanello di notte') in nine days and the greater part of the last act of 'La favorita' in a few hours. Even allowing for the thinness and conventional character of the accompaniments it is clear that such work can be no more than successful improvisation. Moreover, Donizetti lived in an age of vocal virtuosity. His interpreters were Mario, Pasta, Rubini, Grisi, Lablache, Duprez, Persiani, and it would be difficult to determine whether he was under a heavier debt to them than they were to him. With the passing of the great virtuosi the music written for them, the music which fed that fashion, was bound to suffer. Facile, sentimental melodies can no longer sustain the interest or be supposed to represent adequately dramatic action, and Donizetti seldom rises above that standard. He is said to have imitated Rossini first and then anticipated Verdi. But his music never attains to anything like the brilliancy of the first or to the earnest sincerity of the second. F. B.

The following is a list of Donizetti's operas:

Enrico di Borgogna, 1818.
Il falgname di Joviana, 1819.
Le nozze in villa, 1820.
Zoraida di Granata, 1822.
La Zingara.
La lettera anonima.
Chiara e Serafina.
Il fortunato inganno, 1823.
Ariete. Alfredo il Grande.
Una follia.
L'ajo nell'imbarazzo, 1824.
Emilia di Liverpool.
Alahor in Granata, 1825.
Il castello degli invalidi.
Elvira.
Olivo e Pasquale, 1827.
Il borghese di Stuardina.
Le convenienze teatrali.
Otto mesi in due ore.
Elisabetta a Kenilworth, 1828.
La Regina di Golconda.
Gianni di Calais.
Il giove di grasso.
L'esule di Roma.
Il Paria, 1829.
Il castello di Kenilworth.
Il diluvio universale, 1830.
I pazzi per progetto.
Francesca di Foix.
Isabella di Lambertazzi.
Anna Bolena.

Fausta, 1832.
Ugo l'onte di Parigi.
L'elvir d'amore.
Sancia di Castiglia.
Il nuovo Pomereagano.
Il furioso, 1833.
Parina.
Torquato Tasso.
Luceria Borgia.
Rosamonda d'Inghilterra, 1834.
Maria Stuarda.
Gemma di Vergy.
Marino Faliero, 1835.
Lucia di Lammermoor.
Belisario, 1836.
Il campanello di notte.
Belli.
Roberto Devereaux, 1837.
Pia di Polono.
Maria di Rudenz, 1838.
Poliuto, 1840.
Gianni di Parigi, 1839.
Gialfrida di Vergy.
La Fille du régiment, 1840.
La favorita, 1840.
Adelasia, 1841.
Maria Padilla.
Linda di Chamounix, 1842.
Maria di Rohan, 1843.
Don Pasquale.
Dom Sébastien.
Catarina Cornaro, 1844.

Posthumously performed:
Rita, ou le mari battu. (Paris, 1860.)
Il Duca d'Alba. (Rome, 1862.)

DONNA DEL LAGO, LA, opera in 2 acts, founded on *The Lady of the Lake*; libretto by Tottola, music by Rossini. Produced San Carlo, Naples, Oct. 4, 1819; and King's Theatre, London, Feb. 18, 1823.

DON PASQUALE, opera buffa in 3 acts; music by Donizetti. Produced Jan. 4, 1843, Théâtre des Italiens, Paris; Her Majesty's Theatre, June 29, 1843; New York (in English), Mar. 9, 1846.

DON QUIXOTE. The theme of Cervantes's novel attracted the attention of playwrights soon after the English translation was issued,

and there are one or two 17th-century dramas bearing the title. The most famous of these is Thomas D'Urfey's 'Comical History of Don Quixote,' acted at the theatre in Dorset Gardens in 1694. A second part followed in the same year, and a third in 1696.

There are musical settings in each, and some of the songs attained a considerable degree of popularity. Henry Purcell and John Eccles were the principal composers, and the music was published by Samuel Briscoe in three small folio volumes having the above dates.

Other musical plays with Cervantes's hero as a title might be quoted, one among them being 'Don Quixote in England,' 1733, by Henry Fielding; in this first appears the famous song 'The Roast Beef of Old England.' F. K.

No fewer than 29 operatic settings of the subject, or of libretti taken from some part of the book, are enumerated in Riemann's *Opern-Handbuch*. The earliest seems to be that by Fürsch at Hamburg, 1690; among others may be mentioned settings by Caldara (1727), Padre Martini (c. 1730), Salieri (1771), Paesello (c. 1775), G. A. Macfarren's setting of a libretto by his father in 2 acts (Drury Lane, Feb. 3, 1846), Hervé (Paris, 1848), Frederic Clay (1875) and Massenet ('Don Quichotte,' 5 acts, Monte Carlo, 1910, London Opera House, May 18, 1912). Manuel de Falla's 'El retablo de Maese Pedro' (The Puppet-show of Master Pedro), opera in 1 act, an incident in Don Quixote's career, received its first public performance in an English version by J. B. Trend (based on Skelton's *Don Quixote*, 1620) at Victoria Rooms, Clifton, Oct. 21, 1924. Richard Strauss's symphonic poem on the subject of Don Quixote is called 'Fantastische Variationen,' and was first played in London, June 5, 1903. M.

DONT, JACOB (b. Vienna, Mar. 2, 1815; d. Nov. 17, 1888), was a violinist, son of Joseph Valentine Dont, a violoncellist well known and esteemed in his time.

Thoroughly grounded at the Vienna Conservatorium by Böhm (one of the teachers of Joachim and Holmesberger senior), he became a very capable player, though his career as a soloist does not appear to have been one of especial brilliancy. He obtained positions in the orchestra of the Burgtheater (1831) and in the Imperial Chapel (1834), but was more famous as pedagogue than performer, teaching at various Viennese institutions with great success. His best work was done at the Vienna Conservatorium, though he was not appointed professor till 1873, his pupils including Auer and Gregorowitsch. He published some 50 works, amongst them 'Studies for the violin,' which rank, in the opinion of Spohr and many other authorities, among the best written for the instrument. W. W. C.

DONZELLI, DOMENICO (b. Bergamo, c. 1790; d. Bologna, Mar. 31, 1873), studied in his native

place. In 1816 he was singing at the Valle Theatre in Rome.

Rossini wrote for him the part of Torvaldo, in which he distinguished himself. At the carnival of the next year he sang at the Scala in Milan, and was engaged for two seasons. From thence he went to Venice and Naples, returning to Milan, where 'Elisa e Claudio' was written for him by Mercadante. He was very successful in 1822 at Vienna, and obtained an engagement at Paris for 1824. There he remained, at the Théâtre Italien, until the spring of 1831. As early as 1822 efforts had been made, unsuccessfully, to get him engaged at the King's Theatre in London. At length, in 1828, he was announced; but did not actually come until 1829—making his first visit to England at the same time with Mendelssohn. When he did appear, Lord Mount-Edgcumbe thought him 'a tenor, with a powerful voice, which he did not modulate well.' He was re-engaged in 1832 and 1833. In 1834 his place was taken by Rubini. Returning to Italy, he sang at various theatres, and in 1841 at Verona and Vienna. About the end of that year he retired to Bologna. He was an associate member of the Accademia Filarmonica at Bologna, and of that of Santa Cecilia at Rome. He published a set of 'Esercizi giornalieri, basati sull' esperienza di molti anni' (Milan).

J. M.

DOPPEL FLÖTE, an open organ-stop of 8-foot pitch, the pipes of which have two mouths; also a stop having two rank of pipes.

DOPPER, CORNELIS (*b.* Stadskanaal, near Groningen, Feb. 7, 1870), a Dutch composer.

He studied 1887–90 at the Conservatorium at Leipzig; he was for some years an operatic conductor in Holland and in America, and in 1908 he became assistant conductor to Mengelberg at the Concertgebouw in Amsterdam. Dopper has composed seven symphonies and numerous other orchestral works; especially 'Ciacona Gothica,' first performed in 1920, a work which made his name known outside his own country. He has also written several operas and choral works. He is among the most typical of present-day Dutch composers. His work has signs of genuine Dutch nationality. Even the titles of some of his symphonies point to this: the second is called 'Rembrandt'; the sixth 'De Amsterdamsche'; the seventh 'Zuiderzee-Symphonie.' Dopper's masterly and individual orchestration is admirable. This is also noteworthy in various very clever arrangements of works by classical masters.

R. M^a.

DOPPIO (Ital., 'double'); *canone doppio*, 'double canon'; *doppio movimento*, 'double the speed of the preceding'; *pedale doppio*, 'two parts in the pedals' (organ music), etc.

DOPPIO PEDALE, a term used in organ-peddalling to signify the simultaneous use of both feet. It is often loosely applied to the

playing of the pedals in octaves, a device used to eke out the poor resources of a deficient supply of stops. It is sometimes used to make a pedal-melody predominate over a full organ (as in Reger's chorale-prelude 'Vom Himmel hoch'); but the free use of the two feet simultaneously is of great artistic value. It is no new device, having been used by Franz Tunder (1614–67), a predecessor of Buxtehude at Lübeck. Both Buxtehude and J. S. Bach made great use of this device, the latter particularly in the chorale-preludes 'Aus tiefer Noth' and 'An Wasserflüssen Babylon.' Unless playing very loudly, only 8-foot tone should be used. Otto Olsson (*b.* 1879), of Stockholm, has written a fine study for *doppio pedale* in his 'Sestotto.' Lemmens ('Lauda Syon'; 16-8-4 ft.), Guilmant (1st sonata; 16-8-4 ft.), Vierne (3rd symphony; 4 ft. only), Bonnet ('Rhapsodie catalane'; 16-8-4 ft.) and Dupré (Prelude in G minor; swell to pedal, no pedal-stops) have secured triple-peddalling by the simultaneous use of the heel and toe of one foot; and some of the American composers have even written 4-note chords for the pedals.

A. E.-H.

DOPPLER, (1) ALBERT FRANZ (*b.* Lemberg, Oct. 16, 1821; *d.* Baden, near Vienna, July 27, 1883), a distinguished flautist and dramatic composer. His first teacher was his father, who later on went as oboist to Warsaw and then to Vienna. He made his début at Vienna, and, after several concert tours with his younger brother Karl, joined the orchestra of the Pest theatre as first flute; here, in 1847, his first opera, 'Benjowski,' was given, and had a considerable success. In 1858 he left Pest for Vienna, where he became first flute and assistant conductor of the ballet at the court opera, afterwards rising to the position of chief conductor. In 1865 he was appointed professor of the flute in the Conservatorium. His works include the operas 'Benjowski,' 'Ilka,' 'Afanasia,' 'Wanda,' 'Salvator Rosa,' 'Die beiden Husaren,' 'Judith' and (in conjunction with his brother and Erkel) 'Erzabeth,' the comic ballet 'Margot,' produced at Berlin in 1891, and several overtures, concertos for the flute, etc.

His brother, (2) KARL (*b.* Lemberg, Sept. 12, 1825; *d.* Stuttgart, Mar. 10, 1900), early acquired remarkable proficiency on the flute under his father and brother. Whilst still quite young, he undertook long concert tours, often with his brother, and appeared with great success in Brussels, Paris and London. He then became conductor at the National Theatre in Pest; and from 1865–98 was Hofkapellmeister in Stuttgart. He wrote several Hungarian operas, of which 'The Grenadiers' Camp' and 'The Son of the Desert' are the best known, and also ballets and flute music.

Karl's son, (3) ARPAD (*b.* Pest, June 5,

1857), studied at the Stuttgart Conservatorium, where for some time he gave piano lessons, until he went to New York in 1880 to be piano teacher in the Grand Conservatorium. In 1883 he returned to his old position in Stuttgart, and since 1889 has been chorus-master at the Court Theatre. Besides piano music, songs, etc., he has composed an opera, 'Viel Lärm um Nichts,' and a 'Fest-Ouverture,' suite in B \flat , scherzo, and a theme and variations, all for full orchestra.

DORATI DI GRANAIOLA, NICOLÒ (b. Castle of Granaiola, Lucca, c. 1513; d. Lucca, 1593), was appointed trombone-player to the town chapel at Lucca, Dec. 27, 1543, and maestro di cappella, Feb. 9, 1557, which position he still held in 1579. He composed 6 books of madrigals, also motets and songs. (For list see *Q.-L.*; *Riemann*.)

DORIAN (DORIC), see **MODES, ECCLESIASTICAL**.

DORN, HEINRICH LUDWIG EGMONT (b. Königsberg, Prussia, Nov. 14, 1804; d. Berlin, Jan. 10, 1892), composer, teacher and conductor, went through the curriculum of the Königsberg University, and after visiting Dresden (where he made Weber's acquaintance) and other towns of Germany, fixed himself at Berlin in 1824 or 1825. He set seriously to work at music under Zelter, Klein and L. Berger, mixing in the abundant intellectual and musical life which at that time distinguished Berlin, when Rahel, Heine, Mendelssohn, Klingemann, Marx, Spontini, Devrient, Moscheles, Reissiger, and many more, were among the elements of society. With Spontini and Marx he was very intimate, and lost no opportunity of defending the former with his pen. At Berlin he brought out an opera, 'Die Rolandsknappen' (1826), with success. He was successively teacher at Frankfurt and Königsberg; in 1829 he went to Leipzig in the same capacity, and remained there till 1832, when he took Krebs's place at Hamburg. At Leipzig he taught counterpoint to Schumann. After leaving Leipzig, his next engagements were at the theatres of Hamburg and Riga, in the latter place succeeding Wagner. At Riga he remained till 1843, when he was called to succeed C. Kreutzer at Cologne. During the five years of his residence there he was fully occupied, directing the festivals of 1844 and 1847, founding the Rheinische Musikschule (1845), and busying himself much about music, in addition to the duties of his post and much teaching. In 1849 he succeeded O. Nicolai as conductor of the Royal Opera in Berlin, in conjunction with Taubert. This post he retained till the end of 1868, when he was pensioned off in favour of Eckert, and became a 'Königlicher Professor.' He subsequently occupied himself in teaching and writing, in both which capacities he had a great reputation in Berlin. Dorn was of the Conservative party, and a bitter opponent

of Wagner. He was musical editor of the *Post*, and wrote also in the *Gartenlaube* and the *Hausfreund*. His account of his career, *Aus meinem Leben* (Berlin, 1870, 3 vols.) and *Ostracismus* (ib. 1874), are among his more valuable books. His compositions embrace ten operas, the names of which are as follows:

Die Rolandsknappen, Berlin, 1823; *Die Bettlerin*, Königsberg, 1828; *Amors Macht* (ballet), Leipzig, 1830; *Abu Kara*, Leipzig, 1831; *Der Schiffe von Paris*, Riga, 1838; *Das Barmen von England*, Riga, 1842; *Die Nibelungen*, Berlin, 1854; *Ein Tag in Russland*, 1856; *Der Botenläufer von Pirna*, 1865; *Gewitter bei Sonnenschein*, 1869.

There are also many cantatas, a Requiem (1851), symphonies and other orchestral works, among which the most important is 'Siegesfestklänge'; many pianoforte pieces, songs, etc.

As a conductor he was one of the first of his day, with every quality of intelligence, energy, tact and industry to fill that difficult position.

DORNEL, LOUIS ANTOINE (d. Paris, c. 1755), organist and composer. In 1706 he won, in competition with Rameau, the position of organist to the church of Sainte Madeleine en la Cité; he was afterwards for many years chief organist at Sainte-Genevieve. Dornel was regarded by his contemporaries as a master of the organ and of the harpsichord. An honest executant, he has left numerous compositions, religious and secular, psalms, motets, harpsichord pieces (1731), a book of 'symphonies en trio' (1709), a book of sonatas for violin alone, and suites for flute with bass (1711), of good technical workmanship, but no more.

Bibl.—*LA LAURENCIE, L'Ecole française de violon*, 1. (1922), pp. 180-91.

DORSET GARDEN THEATRE. This house was erected upon the garden of a mansion belonging to the Earl of Dorset, situate upon the bank of the Thames at the bottom of Salisbury Court, Fleet Street. Sir William (then Mr.) Davenant had obtained a patent for its erection in 1639 and another in 1662, but from various causes the building was not erected in his lifetime. His widow, however, built the theatre from the designs of Sir Christopher Wren; and the Duke's company, removing from Lincoln's Inn Fields, opened it Nov. 19, 1671. It became celebrated for the production of pieces of which music and spectacle were the most prominent features, amongst which the most conspicuous were:

Davenant's adaptation of Shakespeare's 'Macbeth,' with Lock's music, 1672; Shadwell's adaptation of Shakespeare's 'Tempest,' with music by Lock, Humfrey and others, 1673; Shadwell's 'Psyche,' with music by Lock and Draght, Feb. 1673-74; Dr. Davenant's 'Circe,' with Banister's music, 1677; and Lee's 'Theodosius,' with Purcell's music, in 1680.

In 1682 the King's and Duke's companies were united, and generally performed at Drury Lane; but operas and other pieces requiring a large space for stage effects were still occasionally brought out at Dorset Garden, amongst them:

Dryden's 'Albion and Albanius,' with Grabu's music, 1685; 'The Fool's Preferment,' with Purcell's music, 1688; 'Dioclesian,' with Purcell's music, 1690; 'King Arthur,' with Purcell's music, 1691; 'The Fairy Queen,' with Purcell's music, 1699; 'Epithem Wells' and 'The Female Virtuoso,' with Purcell's music, 1693; 'Don Quixote,' parts 1 and 2, 1694; and Powell and Verbruggen's 'Brutus and Alba,' with Daniel Purcell's music, in 1697.

In 1699 the house was let to William Joy,

a strong Kentish man styled 'The English Samson,' and for exhibitions of conjuring, fencing and even prize-fighting. It was again opened for the performance of plays in 1703, and finally closed in Oct. 1706. After the demolition of the theatre the site was successively occupied as a timber yard, by the New River Company's offices, and the City Gas Works. An engraving showing the river front of the theatre was prefixed to Elkanah Settle's *Empress of Morocco*, 1673, another, by Sutton Nicholls, was published in 1710, and a third in the *Gentleman's Magazine*, July 1814. DORUS-GRAS, see GRAS.

DOT (Fr. *point*; Ger. *Punkt*; Ital. *punto*), (1) a point placed after a note to indicate that its length is to be increased one-half; a semibreve with the addition of a dot being thus equal to three minims, a minim with a dot to three crotchets, and so on.

So far as regards rhythm, this is at the present time the only use of the dot, and it is necessitated by the fact that modern notation has no form of note equal to three of the next lower denomination, so that without the dot the only way of expressing notes of threefold value would be by means of the bind, thus

$\text{f} \cdot$ instead of $\text{f} \cdot$, $\text{f} \cdot$ instead of $\text{f} \cdot$, which method would greatly add to the difficulty of reading. The sign itself is, however, derived from the early system of 'measured music' (*musica mensuralis*, c. 1300), in which it exercised several functions. (See **POINT**.)

In modern music the dot is frequently met with doubled; the effect of a double dot is to lengthen the note by three-fourths, a minim with double dot ($\text{f} \cdot \cdot$) being equal to seven quavers, a doubly dotted crotchet ($\text{f} \cdot \cdot$) to seven semiquavers, and so on. The double dot was the invention of Leopold Mozart, who introduced it with the view of regulating the rhythm of certain adagio movements, in which it was at that time customary to prolong a dotted note slightly, for the sake of effect. Leopold Mozart disapproved of the vagueness of this method, and therefore wrote in his *Violinschule* (2nd edition, Augsburg, 1769):

'It would be well if this prolongation of the dot were to be made very definite and exact; I for my part have often made it so, and have expressed my intention by means of two dots, with a proportional shortening of the next following note.'

His son, Wolfgang Mozart, not only made frequent use of the double dot invented by his father, but in at least one instance, namely at the beginning of the symphony in D written for Hafner, employed a triple dot, adding seven-eighths to the value of the note which preceded it.

Dots following rests lengthen them to the same extent as when applied to notes.

In old music a dot was sometimes placed at the beginning of a bar, having reference to the last note of the preceding bar (Ex. 1); this method of writing was not convenient, as the dot might easily escape notice, and it is now superseded by the use of the bind in similar cases (Ex. 2).

The older way of representing this was occasionally revived by Brahms (see **BRND**).

Handel and Bach, and other composers of the early part of the 18th century, were accustomed to use a convention which often misleads modern students. In 6-8 or 12-8 time, where groups of dotted quavers followed by semiquavers occur in combination with triplets, they are to be regarded as equivalent to crotchets and quavers. Thus the passage

not with the semiquaver sounded after the third note of the triplet, as it would be if the phrase occurred in more modern music.

(2) Besides the employment of the dot as a sign of augmentation of value, it is used to indicate *staccato*, being placed above or below the note, and written as a round dot if the staccato is not intended to be very marked, and as a pointed dash if the notes are to be extremely short (see **DASH**). As an extension of this practice dots are used to denote the repetition of a single note; and they are also placed before or after a double bar as a sign of the repetition of a passage or section. In old music for the clavichord they are used as an indication of the *Bebung* (see **ABBREVIATIONS**: **BEBUG**). F. T. and M.; rev. S. T. W.

DOTZAUER, JUSTUS JOHANN FRIEDRICH (b. Hildburghausen, June 20, 1783; d. Mar. 6, 1860), one of the greatest players and teachers of the violoncello. His teachers were Henschel, Gleichmann and Rüttinger—a pupil of Kittl and therefore only two removes from J. S. Bach. For the violoncello he had Kriegck of Meiningen, a famous virtuoso and teacher. He began his career in the Meiningen court band in 1801, and remained there till 1805. He then went by way of Leipzig to Berlin, where he found and profited by B. Romberg. In 1811 he entered the King's band at Dresden, and remained there till his retirement in 1852; until his death he was occupied in playing, composing, editing, and, above all, teaching. His principal pupils were Kummer, Drechsler, C. Schubert, and his own son, C. Ludwig. His

works comprise an opera ('Graziosa,' 1841), masses, a symphony, several overtures, 9 quartets, 12 concertos for violoncello and orchestra, sonatas, variations; and exercises for the violoncello. He edited Bach's 6 sonatas for violoncello solo, and left an excellent *Method* for his instrument.

DOUBLE (Fr.), (1) the old name for 'variation,' especially in harpsichord music. The doubles consisted of mere embellishments of the original melody, and were never accompanied by any change in the harmonies. Examples are numerous in the works of the older masters. Handel's variations on the so-called 'Harmonious Blacksmith' are called 'doubles' in the old editions. In Couperin's 'Pièces de clavecin,' Book I. No. 2, may be seen a dance, 'Les Canaries,' followed by a variation entitled 'Double des Canaries,' and two instances will also be found in Bach's English Suites, the first of which contains a 'Courante avec deux doubles' and the sixth a sarabande with a double. The term is now entirely obsolete. (2) In combination the word 'double' is used to indicate the octave below; thus the 'double-bass' plays an octave below the ordinary bass, or violoncello; a 'double' stop on the organ is a stop of the pitch known as 16-foot pitch (see **ORGAN**), an octave below the 'unison' stops. (3) 'The notes below Gam-ut are called double Notes, as Double F, fa, ut, Double E, la, mi, and as being Eights or Diapasons to those above Gam-ut' (Playford's *Introd. to the Skill of Musick*, p. 3).

The notes in the bass octave from

are often spoken of by organ-builders as double G, double F, etc. (4) The word is applied to singers who understudy a part in a vocal work, so as to replace the regular performer in case of need; and those who undertake two parts in the same play are said to 'double' one with the other.

E. P.

DOUBLEÉ, the name of an *agrément* of the French school. (See **ORNAMENTS**.) E. B².

DOUBLE BARS divide a piece or a movement into main sections, and when accompanied by dots indicates that the section on the same side with the dots is to be repeated.

The double bar is a prominent feature in the older examples of the symphony or sonata. In the first movement it occurs at the end of the first section, which is then repeated, and is followed by the working out, or development. In certain symphonies before Beethoven, and in Beethoven's pianoforte sonata No. 6, the second section was repeated as well as the first. It may be pointed out that a double bar may be placed anywhere in the measure, without affecting its value.

DOUBLE BASS, see **VIOLIN FAMILY**; **VIOL**.

DOUBLE BASSOON, see **BASSOON** (2).

DOUBLE BASS VIOL, see **VIOL** (4).

DOUBLE CADENCE, the name of an *agrément* of the French school. (See **ORNAMENTS**.)

DOUBLE CHANT, a chant equal in length to two single chants, and covering two verses. The form is peculiar to the English Church, and was not introduced till after the Restoration. (See **CHANT**.)

DOUBLE CONCERTO, a concerto for two solo instruments and orchestra, as Bach's for two harpsichords, for two violins, Mozart's for violin and viola (Köchel, 364), Brahms's (op. 102) for violin and violoncello, and Delius's for the same instruments.

DOUBLE COUNTERPOINT is the accompaniment of a subject or melody by another melody, so contrived as to be capable of use either below or above the original subject. (See **INVERTIBLE COUNTERPOINT**.)

DOUBLE FLAT (Fr. *double bémol*; Ger. *Doppel-B*; Ital. *doppio bemolle*) lowers a note by two semitones. The sign is $\flat\flat$, and it is corrected by the sign \sharp or occasionally \flat . The German nomenclature for the notes is *Äses*, *Asas*, *Deses*, etc. (See **ACCIDENTALS**; **INTONATION**.) S. T. W.

DOUBLE FUGUE, a common term for a fugue on two subjects, in which the two start together, as in the following for organ by Sebastian Bach (B.-G. xxxviii. p. 19):

or in D. Scarlatti's harpsichord fugue in D minor; or Handel's organ fugue, quoted under **COUNTER-SUBJECT**. G.

The term is also sometimes applied to fugues in which subsidiary subjects appearing first as **EPISODES** (*q.v.*) achieve prominence by their subsequent development in conjunction with the chief subject. For an example see *Das wohltemperirte Clavier*, Book I. No. 4. C.

DOUBLES, the name given to changes on 5 bells, from the fact that two pairs of bells interchange at each permutation. (See **CHANGE**.) W. W. S.

DOUBLE SHARP (Fr. *double dièse*; Ger. *Doppelkreuz*; Ital. *doppio diesis*) raises a note by two semitones, and is denoted by a \times , probably in abbreviation of $\sharp\sharp$. It is corrected by the sign \sharp . The Germans call the notes *Cisis*, *Fisis*, *Gisis*, etc. (See **ACCIDENTALS**; **INTONATION**.) S. T. W.

DOUBLE STOPPING, the simultaneous sounding of two notes on the violin or other instrument of that tribe. Such notes are termed 'double stops.' (See **STOPPING**.)

Strictly speaking, the term 'double stopping'

ought only to be applied to the simultaneous sounding of two 'stopped' notes; it is, however, indiscriminately used for any double sounds, whether produced with or without the aid of the OPEN STRINGS (*q.v.*). (See FINGERING, VIOLIN.)

P. D.

DOUBLE TONGUEING, a method of articulation applicable to the flute, the cornet-à-pistons, and some other brass instruments. The oboe, bassoon and clarinet are susceptible only of single tongueing, which signifies the starting of the reed-vibrations by a sharp touch from the tip of the tongue similar to the percussion action in harmoniums. It requires long practice to give the necessary rapidity to the tongue muscles co-operating for this end. Single tongueing is phonetically represented by a succession of the lingual letter T, as in the word 'rat-tat-tat.' Double tongueing aims at alternating the linguodental explosive T with another explosive consonant produced differently, such as the linguo-palatals D or K, thus relieving the muscles by alternate instead of repeated action. The introduction of the mouthpiece into the cavity of the mouth itself prevents such an alternation in the three instruments above named, but it is possible in the flute and cornet. Any intermediate vowel sound may be employed. The words commonly recommended for double tongueing are 'tucker' or 'ticker.' Triple tongueing is also possible; and even four blows of the tongue against the teeth and palate have been achieved and termed quadruple tongueing. Indeed the system may be farther extended by employing words such as 'Tikatakataka,' in which dental and palatal explosives are judiciously alternated.

The term 'double tongued' is applied to certain reed stops on the organ which have two tongues instead of one.

DOUBLE TOUCH, see ORGAN.

DOURLIN, VICTOR CHARLES PAUL (*b.* Dunkerque, Nov. 3, 1780; *d.* Battignolles, near Paris, Jan. 8, 1864), studied at the Paris Conservatoire where, in 1800, he was entrusted with a class for elementary singing. In 1805 he gained the Prix de Rome for composition. In 1812 he became assistant teacher of harmony, for which he obtained the full professorship in 1816 and was pensioned in 1842. He composed several opéras-comiques for the Théâtre Feydeau, chamber music (trios and sonatas for various instruments), a pianoforte concerto, etc., and some books on harmony on the lines of Catel's method: *Traité d'harmonie*; *Traité d'accompagnement*; *Principes d'harmonie*.

E. v. d. s.

DOW, DANIEL (*b.* Perthshire, 1732; *d.* Edinburgh, Jan. 20, 1783), lived as a teacher at Edinburgh and published two important collections of ancient Scottish music (ports, salutations, pibrochs, reels, strathspeys), as well as some books of new minuets, reels and

strathspeys, including many of his own composition.

E. v. d. s.

DOWDING, EMILY, from 1796 to 1814 organist at the Temple Church, London, and probably the first woman organist in England.

E. v. d. s.

DOWLAND, (1) JOHN (1563-1626), lutenist and composer, is said by Fuller, on hearsay evidence, to have been a native of Westminster,¹ but the name is not found in the parish registers before 1628, when there is an entry of the burial of a Matthew Dowland. He has been claimed as an Irishman,² mainly on the strength of the dedication of a song in his 'Pilgrimes Solace' (1612) 'to my loving countryman, Mr. John Forster the younger, merchant of Dublin in Ireland.'³ But the assumption that the names Doian, Dowling, Dulling, etc., are the same as Dowland is hardly admissible. Among the accounts⁴ of Trinity College, Dublin, there are entries for commons and sizings of 'Sr' (the designation of all Bachelors of Arts) 'Dowland,' dated May 4, 1605. The name does not occur in Burtohaell and Sadleir's *Alumni Dublinenses*, and no degrees in music were granted there until a much later period. That Dowland was in England in the winter of 1603-4 is known from the preface to his 'Lachrymae,' which was registered at Stationers' Hall on Apr. 2, 1604, but it is unsafe to conclude that the badly written entries in the Trinity College accounts refer to him, even if the name read as 'Dowland' is correct, as to which there seems some doubt. Moreover, in the preface to his 'Pilgrimes Solace' he addresses the public as 'my loving countrymen,' so that the expression merely seems to distinguish Englishmen from the foreigners among whom he had lived for so long. His birth must have taken place in 1563, for in his 'Observations belonging to Lute-playing,' which appeared in his son Robert's 'Varietie of Lute-Lessons' (1610), he refers to Hans Gerle's 'Booke of Tableture,' printed 1533, and adds 'myselfe was borne but thirty yeares after Hans Gerles Booke was printed,' while in his 'Pilgrimes Solace,' which appeared in 1612, he says: 'I am now entered into the fiftieth yeare of mine age.' Nothing is known as to his education, but before he was twenty he was in the service of Sir Henry Cobham, who in 1579 succeeded Sir Amyas Paulet as English Ambassador at Paris. In a remarkable letter⁵ written from Nurem-

¹ The statements in Q.-L. (III. 239) as to his being a son of John Johnson, and in the service of Sir George Carey, are inaccurate, and have been made from a misreading of the articles on Dowland in the *Mus. T.* for Dec. 1896 and Feb. 1897.

² See the preface to Fellowes's edition of Dowland's *First Booke of Aires*.

³ This John Forster was probably the son of the John Forster who was Sheriff of Dublin in 1578-79 and Mayor in 1580; he may be identified as the John Forster who was admitted, as the son of a freeman, to the franchise in 1592. (See J. T. Gilbert, *Calendar of Ancient Records of Dublin*, II. 108, 137, etc.)

⁴ Fully printed in Appendix V. of *The Particular Book of Trinity College* (1904), p. 226.

⁵ Printed in vol. v. of the *Calendar of the Marquis of Salisbury's Papers at Hatfield*, and again with elucidations in the *Mus. T.* for Dec. 1896 and Feb. 1897.

berg on Nov. 10, 1595, to Sir Robert Cecil, Dowland says that in 1580 he was in Paris with Sir Henry Cobham, where he fell in with a Roman Catholic priest named Smith, with Richard Verstegen, the poet and author of the *Restitution of Decayed Intelligence*, Richard or Thomas Morris or Morrice, a member of the Chapel Royal who fled to Douay in 1582 and afterwards went to Rome, and one Morgan, by whom he was persuaded to become a Roman Catholic. Sir Henry Cobham was recalled in 1583 and was succeeded as Ambassador by Sir Edward Stafford. In 1584 Dowland was in his service, for a petition of that year¹ from some English merchants in Paris, who had been condemned to the galleys, mentions that Stafford had sent them his 'favourable charity' by his servant, John Dowland. Shortly afterwards he must have returned to England and married. On July 5, 1588, he was admitted (from Ch. Ch., Oxford) Mus.B., and some time before 1597 he received the same degree at Cambridge, though there is no record of the degree at the latter university. About 1594 Dowland 'became an humble suitor' for the place of one of Queen Elizabeth's musicians, John Johnson,² but unsuccessfully, for (as he says) 'my religion was my hindrance; whereupon my mind being troubled, I desired to get beyond the seas.' He was invited to Germany by the Duke of Brunswick, and obtained the necessary licence to travel through the instrumentality of the Earl of Essex and Sir Robert Cecil. His wanderings may be told in his own words:

'When I came to the Duke of Brunswick he used me kindly and gave me a rich chain of gold, £23 in money, with velvet and satin and gold lace to make me apparel, with promise that if I would serve him he would give me as much as any prince in the world. From thence I went to the Landgrave of Hesse, who gave me the greatest welcome that might be for one of my quality, who sent a ring into England to my wife, valued at £20 sterling, and gave me a great standing cup with a cover gilt, full of dollars, with many great offers for my service. From thence I had great desire to see Italy and came to Venice and from thence to Florence, where I played before the Duke and got great favours.'

At the court of Brunswick he became acquainted with Gregory Howett of Antwerp, and at that of the Landgrave with Alessandro Orologio; at Venice he made friends with Giovanni Croce. Dowland's aim in going to Italy was to study with Luca Marenzio, who wrote to him a letter dated Rome, July 13, 1595, which is printed in Dowland's 'First Booke of Songes' (1597). But the journey to Rome seems to have been interrupted at Florence, where he fell in with a number of English recusants, the chief of whom was a son of Sir John Seudamore, of Kentchurch, who was at one time in Spain in the company of Father Parsons. In spite of a promise that he 'should have a large pension of the Pope, and that his Holiness and all the

Cardinals would make wonderful much of' him, Dowland appears to have taken alarm at finding himself in the company of men whose methods were treasonable to Elizabeth and her Government. He longed to see his wife and children

'and got me by myself and wept heartily to see my fortune so hard that I should become servant to the greatest enemy of my prince, country, wife, children, and friends, for want. And to make me like themselves, God knoweth I never loved treason nor treachery, nor never knew of any, nor never heard any mass in England, which I find is great abuse of the people, for, on my soul, I understand it not.'

By way of Bologna and Venice, Dowland returned to Nuremberg, whence he wrote (on Nov. 10, 1595) the letter to Cecil from which the above quotations are taken. In this document he gives much information as to 'the villany of these most wicked priests and Jesuits' and thanks God that he has 'both forsaken them and their religion, which tendeth to nothing but destruction.' Whether the letter had any immediate result on Dowland's fortunes it is impossible to say. The news he gave of the movements of the English Romanists in Italy was probably of small value, but the writer's protestations as to his religious views may have smoothed the way for his return. In 1596 some lute pieces by him appeared in Barley's 'New Booke of Tableture,' apparently without his authority, for in his 'First Booke of Songes or Ayres of Foure Parties with Tableture for the Lute,' which was published by Peter Short in 1597, he alludes to 'divers lute lessons of mine lately printed without my knowledge, false and unperfect.' The 'First Booke of Songes' achieved immediate success, and a second edition appeared in 1600, a third in 1606, a fourth in 1608, and a fifth in 1613. In 1598 Dowland contributed some eulogistic verses to Giles Farnaby's 'Canzonets,' and in the same year his fame was celebrated in Richard Barnfield's sonnet (sometimes attributed to Shakespeare) 'To his friend Maister R. L., in praise of Musique and Poetrie':

'If Musique and sweet Poetrie agree,
As they must needs (the Sister and the Brother),
Then must the Love be great, twixt thee and mee,
Because thou lov'st the one, and I the other.
Dowland to thee is deare; whose heavenly touch
Upon the Lute, doth ravish humane sense;
Spenser to mee; whose deepe Conceit is such,
As, passing all Conceit, needs no defence.
Thou lov'st to heare the sweete melodious sound,
That *Phœbus* Lute (the Queen of Musique) makes:
And I in deepe Delight am chiefly drownd,
When as himselfe to singing he betakes.
One God is God of Both (as Poets faine),
One Knight loves Both, and Both in thee remaine.'

On Nov. 11, 1598, Dowland was appointed lutenist to Christian IV. of Denmark at the very large salary of 500 dalers per annum—a sum that rivalled the salaries of the high officers of the state. In 1599 a sonnet by him appeared in Richard Alison's 'Psalms.' In the following year he published his 'Second Booke of Songes

¹ Cal. State Papers, Foreign Series, Elizabeth, 1584, p. 218.

² For whose death see *Audit Office Declared Accounts*, Bundle 387, No. 37, quoted in the *Musical Antiquary*, II. p. 118.

or Ayres, of 2. 4. and 5. parts,' dedicated to Lucy, Countess of Bedford, and with a preface dated 'From Helsingnoure in Denmarke, the first of June.' In the same year he received an extra payment of 600 dalers from Christian, the autograph receipt for which is preserved in the Copenhagen Archives, and has been printed in A. Hammerich-Elling's *Musiken ved Christian den Fjerdtes Hof* (Copenhagen, 1892). In 1601 he was decorated and presented with the King's portrait, and in the same year he came to England to buy musical instruments of the value of 300 dalers. In 1603 appeared his 'Third and Last Booke of Songs or Aires,' in the dedication of which he alludes to his being still abroad. In 1603 he was again in England, and had a house in Fetter Lane, from which he published his 'Lachrymae, or Seven Teares, figured in seaven passionate Pavans,' for instruments, dedicated to Anne of Denmark. This work is undated, but was entered at Stationers' Hall on Apr. 2, 1604. It seems from the preface that he had been driven back by storms on his return to Denmark, and forced to winter in England. But the Danish Archives show that his conduct at Copenhagen had not been satisfactory. In spite of frequent advances of money and an attempt to help him by giving him the charge and education of one of the choristers 'to teach and instruct upon the lute,' he was finally, on Feb. 24, 1606, when Christian was absent at Brunswick, dismissed from the King's service, and at his departure there was a long account to be settled for salary, advances, etc. In 1606 Dowland was again living in Fetter Lane, whence he issued a translation of the *Micrologus* of Andreas Ornithoparcus, dedicated to the Earl of Salisbury (see COUNTERPOINT). In his address to the reader he promises a work on the lute, to which reference is also made by his son Robert in the preface to the latter's 'Varietie of Lute Lessons' (1610). To this work John Dowland appended a 'Short Treatise on Lute-Playing,' a German translation of which, with a valuable commentary, by Dr. Willibald Nagel, appeared in the *Monatshefte für Musikgeschichte* for Sept. 1901. In 1612 he published his last work, 'A Pilgrimes Solace. Wherein is contained Musically Harmonic of 3. 4. and 5. parts, to be sung and plaid with the Lute and Viols,' in which he is described as lutenist to Lord Walden (eldest son of the Earl of Suffolk). In the preface to this work he says:

'I have been long obscured from your sight, because I received a kingly entertainment in a foraine climate, which could not attaine to any (though never so meane) place at home.'

This neglect with which he was treated in England is referred to by Henry Peacham, in his *Minerva Britanna* (1612). He compares Dowland to a nightingale sitting on a briar in the depth of winter:

'So since (old frend), thy yeares have made thee white,
And thou for others, hath consum'd thy spring,
How few regard thee, whom thou didst delight,
And farre, and neere, came once to heare thee sing:
Ingratefull times, and worthles age of ours,
That lets us pine, when it hath cropt our flowers.'

But recognition came to Dowland in his old age, and on Oct. 28, 1612, he was appointed one of the King's Musicians for the Lutes, in the place of Richard Pyke, deceased, at 20d. a day for wages, and £16:2:6 yearly for livery.¹ In 1613 the names of both John Dowland and his son Robert appear in the lists of musicians paid for performing in Chapman's masque of the Middle Temple and Lincoln's Inn at Whitehall. In 1614 Dowland contributed two compositions² to Sir William Leighton's 'Teares' and some commendatory verses to Ravenscroft's 'Briefe Discourse.' Of his late years not much is known. In 1618 his name still appears in the *Audit Office Accounts*,³ as second musician for the Lutes, after that of Robert Johnson, and in the Accounts for 1623⁴ he is styled 'Doctor Dowland,' though there is no record of his having taken a Doctor's degree either at Oxford, Cambridge or Dublin. In the accounts for the year ending Michaelmas, 1624, his name precedes that of Johnson. His death must have taken place on Jan. 20 or 21, 1625/26, for the accounts for Michaelmas, 1626,⁵ record the payment to him for 'one quarter of a yeare ended at Christmas 1625 and xxvi daies in parte of other Lady Day quarter 1626,' while his son Robert (2) 'in the place of Doctor Dowland his father deceased' was paid at Michaelmas, 1626, 'from the death of his said father.' To the list of his printed music already given must be added some harmonised psalm tunes in East's Psalter (1592); viol pieces in Füllsack's 'Auserlesener Paduanen . . . Erster Theil' (1607), T. Simpson's 'Opusculum' (1610) and 'Taffel-Consort' (1621); and lute pieces in Rude's 'Flores musicae' (1600), Besardus' 'Thesaurus harmonicus' (1603), Van den Hove's 'Delitiae musicae' (1612), Fuhrmann's 'Testudo Gallo - Germanica' (1615), and Besardus' 'Novus partus' (1617). Many of the instrumental pieces are probably arrangements or transcriptions. Manuscript music by him is to be found in many of the large English and German libraries. His 'First Booke of Songs' was reprinted in score by the Musical Antiquarian Society in 1844, and all four books, together with the three songs in 'The Musical Banquet,' have been published with the original lute tablature by Fellowes in the ENGLISH SCHOOL OF LUTENIST SONG-WRITERS (q.v.). Fuller⁶ says that John Dowland was 'a

⁶ *Worthies*, ed. Nicholas, II. 112.

cheerful person . . . passing his days in lawful meriment,' but this character may have been given him because of a well-known anagram on his name :

'Iohannes Doulandus,
Annos ludendo hausi,'

which Fuller attributes to one Ralph Sadler, of Standon, who was at Copenhagen with Dowland, though its authorship is claimed by Henry Peacham in his *Minerva Britanna*. An autograph of Dowland is preserved in the *Album Amicorum*¹ of Johann Cellarius of Nuremberg (1580-1619), written towards the end of the 16th century. In this his name is spelt 'Doland.'

W. B. S.

DOWLAND'S SONGS.—Dowland was a great virtuoso. As a performer on the lute he was without a rival in Europe, and there can be little doubt that he was also a highly skilled singer. It was those qualities which set him on such a high pinnacle of fame in his own day, not only in England, but throughout the Continent. The fame of the virtuoso is of necessity greatly impaired by the lapse of time, and few there be whose names are remembered in the later ages solely on the strength of their ability as performers. But Dowland was also a great composer. His outstanding ability was probably less conspicuous in his own day than it is now, partly owing to the fact that his singing and playing to some extent eclipsed his other gifts in the eyes of most of his contemporaries; partly because the general level of composition stood so high in this country at that date that excellence was not so obvious; and partly also because the greatness of his achievement as a pioneer in the composition of the art-song can only be measured in the light of the development of that particular form during the three centuries that have elapsed since his death.

It is as a song-writer that Dowland establishes a claim to a place among the immortals. He wrote, it is true, with great skill in other forms; but his compositions for the lute, of which few were printed in his day, although a very large number survive in manuscript, are, like many other notable instrumental compositions of the same period, of an experimental character, and in the face of the tremendous development of all forms of instrumental music since the dawn of the 17th century few of them could successfully hold a place on a modern concert programme without special explanation. But his songs show no signs of old age, and indeed some of them sound amazingly modern both as regards form and harmonic effect even in the company of 20th-century music.

Of the four volumes of songs, the first three were described as Books of 'Songs or Ayres,' and that of 1612 as 'A Pilgrimes Solace.' Each

of these books contains 21 songs, and three more published by his son Robert in 'A Musical Banquet' in 1614 make a total of 87. Dowland was the first of the great English lutenists to produce such a book, and the main scheme upon which his first book was planned was followed by the rest of these composers. One feature of these 'Ayres' was that the principal melodic interest lay in the top voice and was not equally shared by all the voices as in a madrigal. For the purpose of accompaniment two alternative devices were commonly employed by the composers; thus three other voice parts, for alto, tenor and bass, were associated with the cantus, or top part, and as an alternative these three voice parts were adapted for performance on the lute, the bassus part being duplicated on a bass viol although the harmonic scheme was completely represented on the lute without the bassus being necessary to it. Dowland's first book in 1597 was the earliest publication in which these ideas were embodied, and he may justly be regarded as having originated them. Further than this it may be claimed for him that he contributed more than any other pioneer to the creation of the art-song; art-songs of a primitive kind, having a definite accompaniment forming an essential part of the composition as distinct from folk-songs, were written by Luys Milan and published in Italy as early as 1535; Byrd, too, wrote perfect examples of the art-song with string accompaniment many years before Dowland; for instance 'My little sweet darling' is at least as early as 1583; but Dowland was the first to specialise in this form and to develop it, and the art-songs or Lieder, of Schubert, Schumann and Brahms with pianoforte accompaniment are the lineal descendants of Dowland's Ayre with lute accompaniment.

Dowland's first book consists of songs of a fairly simple design, each musical phrase following the verbal outline with scarcely any repetition and very little contrapuntal development; but the songs are characterised by great beauty of melodic material, a singular fitness in matching the words with music, and a great freedom and variety of rhythmic treatment. Some of the melodies may be founded on traditional folk-songs, as is certainly the case with 'Now O now I needs must part,' the melody of which was known as 'the frog galliard.' Perhaps the earliest known instance of transferring from the voice to the accompaniment the chief melodic interest in the course of a song is to be found in 'Can she excuse my wrongs?' where for several bars the voice is confined to a single note while the lute plays the traditional melody of the song 'Shall I go walk the woods so wild?'

The opening songs of Dowland's second book show a wonderful advance in the art of song-

¹ B.M. Add. MSB. 27,579.

writing; in these the conventional square-set design is almost entirely abandoned, while the independent importance of the lute accompaniment is developed in a manner that was brought to perfection two centuries later by Schubert. In this connexion the accompaniment of 'Sorrow stay' is an astonishing piece of work when it is realised that nothing of the kind had previously been attempted and that the resources of the lute are so very limited. 'I saw my lady weep' and the famous 'Lachrimae' ('Flow, my tears') are superb songs. These three songs have no alternative arrangement for four voices. The third and fourth books contain examples both of the simple and straightforward design of song which relies almost entirely on beauty of melody and phrasing, and also of the freer and more elaborate type with an important accompaniment. In the third book is the exquisite 'Weep you no more, sad fountains,' and the scarcely less beautiful 'Flow not so fast, ye fountains.' In the fourth book there are three songs in which the accompaniment is written for a treble and bass viol in addition to the lute; the treble viol part is wholly independent of the lute as regards melodic material. The most remarkable of these three songs is 'In silent night' in which the harmonic treatment is very daring and original.

The three songs published by his son Robert are of very unconventional character, and some of the harmonic effects are startling even to modern ears. Enough has been said to show that Dowland was not only the greatest of the English lutenist school, but that he stands among, perhaps, the first half-dozen of the world's song-writers.

E. H. F.

(2) ROBERT (*b. circa 1586; d. 1641*), son of the foregoing, lutenist, was born before his father left England (1598) to settle in Denmark. His godfather was Sir Robert Sidney, and during his father's absence he was educated at the partial cost of Sir Thomas Monson, to whom he dedicated his first work 'Varietie of Lute Lessons,' which appeared in 1610. In the same year he edited

* A Muscull Banquet: Furnished with varietie of delicious Ayres, collected out of the best Authors in English, French, Spanish and Italian.

dedicated to his godfather. On Apr. 26, 1626, he was appointed one of the lutenists to Charles I., in the place of his father, with 20d. a day wages, and £16:2:6 for livery, payment to begin 'from the death of his said father' (see above). On Oct. 11 of the same year he obtained a licence to be married at St. Faith's to Jane Smalley; at this time he was living in the parish of St. Anne's, Blackfriars. His name is said to occur in a list of *Musicians for the Waytes* in 1641, in which year he died, his place as 'musician for the lutes and voices' being filled on Dec. 1 by John Mercure. A lute-piece by Robert Dowland was printed in Fuhrmann's 'Testudo Gallo-Germanica' (Nuremberg, 1615).

W. B. S.

DOYAGÜE, MANUEL J. (*b. Salamanca, 1755; d. there, 1842*), a Spanish church musician, the son of a silversmith, who was successively a choir-boy in the cathedral, maestro de capilla (1789), and professor of music at the University—the last to hold that appointment, which was suppressed after his death. In 1817 he conducted a Te Deum in Madrid for the Queen's confinement, and in 1831 became maestro honorario at the Conservatoire. His works include:

3 Magnificats, 9 Lamentations, 5 Misereres, Masses and Vespers (MSS. Capilla Real, Madrid, and 4 works in the Bibl. Municipal, Madrid (Sobrbi collection). Kaleva printed a Hymn to Santiago for 5 voices; the MS. of a Magnificat for 8 voices was buried with him.

J. B. T.

DRAESEKE, FELIX, AUGUST BERNHARD (*b. Coburg, Oct. 7, 1835; d. Feb. 26, 1913*), a gifted and highly cultivated, though somewhat eccentric, composer and writer upon musical subjects, disciple of Liszt at Weimar, and one of that circle of musicians who were known as 'die neudeutsche Schule,' and, amongst whom were Hans von Bülow, Peter Cornelius, Carl Klindworth and Carl Tausig. Draeseke was at first a pupil of the Leipzig Conservatorium, and on leaving Weimar settled at Dresden, and subsequently at Lausanne, as teacher of the pianoforte and harmony, from 1864–74, with one year's intermission, when, in 1868, Von Bülow called him to Munich as a master of the new Conservatorium. After residing some time at Geneva, he settled in Dresden in 1876, and in 1884 succeeded Wüllner as teacher of composition in the Conservatorium. He received the title of professor in 1892 and of Hofrath in 1898. Draeseke published a number of pianoforte pieces, remarkable for harmonic and rhythmic subtleties; 'Fantasiestücke in Walzerform,' op. 3; 'Deux valse de concert,' op. 4; a fine Sonata in E major, op. 6; several pieces for piano and violoncello; some vocal compositions. He wrote the libretto for his first opera. Of his literary labours, the elaborate analysis of Liszt's 'Poèmes symphoniques' in Brendel's *Anregungen*, and the essay on Peter Cornelius, in *Die neue Zeitschrift für Musik*, as well as the treatises, *Anweisung zum kunstgerechten Modulieren* (1876), *Beseitigung des Tritonus*, and *Der gebundene Styl* (1903) are valuable. His compositions include:

Four symphonies, opp. 12, 25 and 40, and one in E minor (1912), a serenade, op. 49, overtures 'Das Leben ein Traum,' 'Pentheüs' and 'Jubelouverture,' concertos for violin, violoncello and piano; 3 string quartets, a string quintet, a Requiem. Advertised, and the Easter scene from *Faust*, a trilogy of oratorios, 'Christus,' as well as the operas 'Gudrun' (1884) and 'Herrat' (1892).

E. D.

DRAG, the name given to a certain kind of stroke used in the side-drum. (See DRUM (3).)

DRAGHI, (1) ANTONIO (*b. Ferrara, 1635; d. Vienna, Jan. 18, 1700*¹), Kapellmeister to the court of Vienna. In 1674 he was invited to

¹ Various mistakes have been made about the year of his death. Walther's *Lexicon* speaks of him as alive in 1708, and Fétis, followed by most modern biographers, says he went back to Ferrara and died there in 1707; but all doubts are set at rest by the register of death in Vienna.

Vienna as Hoftheater Intendant to the Emperor Leopold I. and Kapellmeister to the Empress Eleonore, and in 1682 took up his abode there for life. He was a gifted dramatic composer, and most prolific, as may be seen by the list of his works performed at the court during thirty-eight years, amounting to no less than 67 operas, 116 feste teatrali and serenades, and 37 oratorios, besides hymns and cantatas, etc. (See Köchel's *Life of Fux*.) Some of his carnival operas have been several times revived. The scores of most of his works are in the imperial library, and some in the archives of the Gesellschaft der Musikfreunde. His librettos, some of them illustrated, were printed in the imperial press by Cosmerow, and have nearly all been preserved. Occasionally he wrote librettos, which were set by other composers, Ziani, Bertali, and even the Emperor Leopold, who composed the complete opera 'Apollo deluso' (1669), and airs for others. A son of his, (2) CARLO (d. May 2, 1711), was Hof-scholar in 1688 and Hof-organist in 1698.

C. F. P.

BIBL.—MAX NEWHAUS, *Antonio Draghi*. *S. S. M. W.* I. (1913), pp. 104-92.

DRAGHI, GIOVANNI BAPTISTA, was an Italian musician who settled in London in the middle of the 17th century, and who, during his long residence in this country, so completely adopted the English style of composition that he must be regarded as in effect an English composer. It has been conjectured that he was a brother of Antonio Draghi. The earliest notice of him is found in Pepys's *Diary*, under date of Feb. 12, 1667. The diarist there mentions having heard him (at Lord Brouncker's house) sing through an act of an Italian opera which he had written and composed at the instance of Thomas Killigrew, who had an intention of occasionally introducing such entertainments at his theatre. Pepys expresses in strong terms his admiration of the composition. It is extremely doubtful whether this opera was ever produced. Draghi, however, lived to witness the introduction into this country of the Italian opera at the commencement of the following century. He excelled as a player on the harpsichord, for which instrument he composed and published in England many lessons. He was music-master to Queen Anne, and probably also to her elder sister, Queen Mary. On the death of Locke in 1677 Draghi succeeded him as organist to Catherine of Braganza, wife of Charles II. In 1687, for the celebration of St. Cecilia's Day, he composed music for Dryden's fine ode beginning 'From Harmony, from heavenly Harmony.' In 1706 he contributed part of the music to D'Urfey's comic opera, 'Wonders in the Sun; or, the Kingdom of the Birds,' produced at the Queen's Theatre in the Haymarket. Many songs by him are found in the collections of the period. w. h. h.

DRAGONETTI, DOMENICO (b. Venice, Apr. 7, 1763; d. London, Apr. 16, 1846), one of the greatest known players on the double-bass.

As a boy he showed remarkable talent for music, teaching himself the guitar and violin, which, however, he soon exchanged for his own special instrument. On this he quickly outstripped his master Berini, and was admitted to the orchestra of the 'Opera buffa' at 13, and a year later to the 'Opera seria' at San Benedetto, and to all performances of importance. In his 18th year he was appointed to the post in the choir of St. Mark's, hitherto occupied by his master, who himself persuaded him to accept it. He had now attained to such perfection that nothing was too hard for him; he composed sonatas, concertos and capriccios for his instrument, and frequently played upon it the violoncello part in string quartets. At Vicenza he played in the opera orchestra, and while there was fortunate enough to discover the marvellous double-bass, with which he never again parted, although often tempted by large offers of money. This instrument belonged to the convent of S. Pietro, and was made by Gasparo di Salò, master of the Amati. He tested its powers on the monks of S. Giustina at Padua, by imitating a thunderstorm and bringing them out of their cells in the dead of night. Meantime his fame had spread beyond Italy, and he was offered an engagement at the Imperial Opera in St. Petersburg, upon which the Procurators of St. Mark's immediately raised his salary. Shortly after, however, he obtained a year's leave of absence, having been persuaded by Banti and Pacchierotti to accept an invitation to London, where he arrived in 1794, and was immediately engaged for the opera, and for the concerts at the King's Theatre. He made his first appearance on Dec. 20, and gave a benefit concert on May 8, 1795, when he was assisted by Banti, Viotti, the harpist Le Fournier, Harrington, Monzani, Holmes, and the brothers Leander, French-horn players. The force and expression of his playing and his power of reading at sight excited universal astonishment, and he was at once invited to take part in all the great provincial performances. Henceforth he became the inseparable companion of the violoncellist Lindley; for fifty-two years they played at the same desk at the opera, the Ancient Concerts, the Philharmonic, the Provincial Festivals, etc., and their execution of Corelli's sonatas in particular was an unfailing attraction. Great as was Dragonetti's power of overcoming difficulties, it was his extraordinary tone, and the taste, judgment and steadiness of his performance, that characterised him and made him so indispensable to the orchestra.

Soon after Dragonetti's arrival in London he

met Haydn, with whom he became intimate. On his way to Italy in 1798 Dragonetti visited the great master in Vienna, and was much delighted with the score of the 'Creation,' just completed. In 1808 and 1809 he was again in Vienna, but from caprice would play before no one but the family of Prince Starhemberg, in whose palace he lived, and whose wife often accompanied him on the piano. Here he made the acquaintance of Beethoven, and also that of Sechter, afterwards court organist, a sound musician, who was teaching the porter's children, and whom Dragonetti requested to put a pianoforte accompaniment to his concertos. To him he played unasked, though he locked up his instrument because the Starhembergs invited some of the nobility to their soirées. His silence was perhaps partly caused by his fear of Napoleon, who was then in occupation of Vienna, and who wished to take him by force to Paris. With Sechter he corresponded all his life, and remembered him in his will. In Aug. 1845, when 82 years old, he headed the double-basses (13 in number) at the Beethoven Festival at Bonn; and Berlioz, in his *Soirées de l'orchestre*, writes that he had seldom heard the scherzo in C minor Symphony played with so much vigour and finish. Thus, in his old age, he rendered homage to the great master, of whose friendship he was reminded on his death-bed. Shortly before his end, when surrounded by Count Pepoli, Pigott, Tolbecque and V. Novello, he received a visit from Stumpff, the well-known harp-maker, who, as Dragonetti held out his great hand covered with callosities and unnaturally spread from constant playing, said with emotion, 'This is the hand which Beethoven our great friend, whose spirit now dwells in purer regions, bade me press.' He died in his own house in Leicester Square, and was buried on Apr. 24 in the Roman Catholic chapel at Moorfields. His remains were re-interred in the Roman Catholic cemetery, Wembley Park, in 1899, after the demolition of the chapel at Moorfields.

Many solos for double-bass are in MSS. in the British Museum; and a curious arrangement of the pedal parts of Bach's organ fugues was in the possession of F. G. Edwards. It is not generally known that he wrote for the voice, but three canzonets with Italian words, written during his stay in Vienna, still exist in a collection of 'XXXIV Canzonette e Romanze,' by various composers, and dedicated to the Archduke Rudolph, Beethoven's friend and pupil. He was a great collector of pictures, engravings, musical instruments and music, and left to the British Museum alone 182 volumes of scores of classical operas. Many music books, given or left by him to Vincent Novello, were presented by the latter to the Fitzwilliam Museum, Cambridge. Some which came into the hands of Ouseley are now at St. Michael's, Tenbury.

His eccentricities were many and curious. He was an inveterate snuff-taker, and had a perfect gallery of snuff-boxes. Among his treasures were found a quantity of curiously dressed dolls, with which he used to play like a child, taking a selection of them with him to the musical festivals, especially a black one which he called his wife. His dog Carlo always accompanied him in the orchestra. The most curious thing about him was his speech, a mixture of his native Bergamese dialect with bad French, and worse English. He was a man of kindly temper and a warm friend, though in money matters very close. His picture, 'Il Patriarca dei Contrabassi,' was published by Thierry, after a half-length taken in crayons by Salabert, of London. His precious instrument, his companion for nearly sixty years, he bequeathed to the 'Vestry of the Patriarchal Church of St. Mark at Venice.'

C. F. F.

DRAGONI, GIOVANNI ANDREA (b. Mendola, c. 1540; d. Rome, 1598), pupil of Palestrina; from 1576 maestro di cappella at St. John Lateran. His compositions, published at Venice between 1575 and 1588, consisted of 3 books of madrigals, 5 v., 1 book of madrigals, 4 v., 1 book of madrigals, 6 v., 1 villanelle, 5 v., 1 book of motets, 5 v., the last published at Rome, 1600. Some church compositions are contained in collective volumes. (See Q.-L.)

E. v. d. s.

DRAUD (DRAUDIUS), GEORG (b. Davernheim, Hesse, Jan. 9, 1573; d. Butzbach, 1636), fled to Butzbach to escape the horrors of war. He was preacher successively at Grosskabern, Ortenberg and Davernheim, and a famous bibliographer who published the following works, which are particularly valuable for musical bibliography: *Bibliotheca classica* (1611 and 1625); *Bibliotheca ecclastica* (1625); *Bibliotheca librorum Germanicorum classica* (1625). Unfortunately his translation of non-Latin titles of books into Latin detracts somewhat from their value; yet for a long period they formed the chief source of information for all biographers.

E. v. d. s.

DREAM OF GERONTIUS, THE, oratorio, in two parts, set to a great part of Cardinal Newman's poem, by Elgar (op. 38). Produced Birmingham Festival, Oct. 3, 1900. Translated into German by Julius Butths, Niederheinische Fest, Düsseldorf, May 1902. M.

DRECHSLER, JOSEF (b. Vlachovo, Brezi, Bohemia, May 26, 1782; d. Feb. 27, 1852), composer and teacher, received his first instruction from his father, schoolmaster in his native place. After various alternations of place and pursuit, he studied music and law at Prague; in 1807 found himself at Vienna, but it was not till 1810 that he obtained employment as chorus-master at the court opera. This was followed in 1812 by a place as 'Kapellmeister

adjunct,' then by an organist's post at the Servite Church; in 1815 he opened a music school, and gradually won his way upwards, till in 1822 he was chief Kapellmeister at the theatre in the Leopoldstadt. On Gänsbacher's death in 1844 he became Kapellmeister at St. Stephen's, a post which he retained till his death. He left behind him books of instruction for the organ, harmony, thorough-bass, and the art of preluding, with a new edition of Pleyel's Clavier-school; 16 masses and a Requiem; 24 smaller pieces of choral music; 6 operas; 25 shorter dramatic pieces (Singspiele) and pantomimes; 3 cantatas, and a host of airs, sonatas, fugues, quartets, etc.

G.

DRECHSLER, KARL (b. Kamenz, Saxony, May 27, 1800; d. Dresden, Dec. 1, 1873), a great violoncello-player. He entered the court band at Dessau in 1820, and in 1824 put himself under Dotzauer at Dresden. In 1826 he received a permanent appointment as leader of the band at Dessau. Before then he had visited England, and played with much success. He shone equally in quartets, solos and the orchestra, with a full tone, good intonation and excellent taste. Drechsler was the master of Cossmann, Grützmacher and A. Lindner. He retired in 1871.

G.

DREHER, a name given in Austria and Bavaria to a dance very similar to the LANDLER. The name, which is descriptive of the dance, is derived from the verb *drehen*, 'to twirl.' Suites of Dreher's are said to be in existence, but dance, music and name are now alike obsolete. E. F.

DREHLEIER, the German name for HURDY-GURDY (*q.v.*).

DREI PINTOS, DIE, operatic fragment by Weber (written c. 1821), the libretto rearranged by the composer's grandson, Carl von Weber, the music completed by Gustav Mahler from Weber's sketches. Produced Leipzig, Jan. 20, 1888.

DRESDEN. OPERA.—The centre of musical life in Dresden is the State (formerly Royal) Opera of Saxony. Its traditions down to the early years of the 19th century were those of the Italian school, though the movement for reform had begun with the influence of Gluck after the production of the 'Orfeo' in 1763. The re-organisation on the lines of German opera was undertaken in 1816 when C. M. von Weber was summoned from Prague to Dresden. The State opera-house was built in 1837–41 from the plans by Gottfried Semper. It was burnt down in 1869, but rebuilt from the old plans by Manfred Semper, and was reopened in 1878. It has been remodelled within and the stage mechanism has been modernised, but it is otherwise unaltered. Among its directors have been C. M. von Weber, Richard Wagner, E. von Schuch and Fritz Reimer. The present director (1926) is Fritz Busch, who came to

Dresden from Stuttgart in 1922. The permanent staff of the opera consists of 40 performers and a choir. The orchestral staff of the Staatskapelle numbers 125. The Dresden opera-house has a record as a pioneer in new productions comparable to that of Weimar. The first production of 'Rienzi' took place on Oct. 20, 1843, and 'Tannhäuser' on Oct. 19, 1845. The association of Richard Strauss with the Dresden opera-house lasted from 1901, when 'Feuersnot' was first produced, down to the production of 'Intermezzo' in 1924, works first performed including 'Salome' (Dec. 9, 1905), 'Elektra' (Jan. 25, 1909), and 'Rosenkavalier' (Jan. 26, 1911).

THE DRESDNER STAATSKAPELLE, the principal orchestra, has an unbroken history dating back to 1548, when it was founded by the Elector Moritz von Torgau. It counts as one of the finest in Germany and owes its development mainly to von Schuch, who directed it from 1877–1916. Among its instrumentalists have been Quantz, the flautist who taught Frederick the Great, the violinists Rappoldi and Henri Petri and the harpist Alfred Kastner. Under Busch the orchestra has led the way with the performance of modern music, and of late years it has co-operated occasionally with the International Society for Contemporary Music. Other concert orchestras in Dresden are the Dresdner Philharmonie (director: Professor J. G. Mrazek); the Philharmonisches Orchester (directors: Eduard Möricke and I. Dobrowon) and the Kapelle Fereis. There are numerous orchestral associations and student orchestras.

CHAMBER AND CHORAL MUSIC.—The principal chamber music organisation is the Dresdner Streichquartett, well known throughout Germany. The chief choral society (of which altogether there are over a hundred in Dresden) is the Singakademie (director: Dr. H. Knoll), founded in 1848. The first Singverein on record in Dresden was in existence in 1802. Choral concerts are a feature in Dresden's musical life. They are usually held in one or other of the three great Dresden churches, the Dreikönigskirche (holds 3000 persons), Frauenkirche (5000), Kreuzkirche (3000). The larger concert halls are the Gewerbehaus (large hall, 2300; small hall, 300), Volkswohlsaal (1900), Musenhaus (650), Künstlerhaus (600), Kaufmannschaft (large hall, 600; small hall, 200).

EDUCATION.—As a teaching centre Dresden has an almost world-wide fame. Robert Schumann taught in Dresden in 1844; there is a tablet to his memory on the house No. 74 Reitbahnstrasse. The oldest educational institution is the Kapellknabeninstitut für die Katholische Kirche. The present director is Karl M. Pembaur. The Royal Conservatory of Music was founded in 1856 by Tröstler and later taken over by F. Pudor. It has a

opera school and an instrumental school. Among the leading institutions in Dresden are the Konservatorium für Musik und Theater, with preparatory school; the Dresden Music School; the Pädagogium der Tonkunst, the orchestra school of the Staatskapelle, and numerous private music schools. Dresden remains the leading centre for the teaching of voice production in Germany and has of recent years added to its other activities the study of Eurythmics according to the method of JAKUES-DALCROZE (q.v.). The school is in the garden city of Hellerau, a suburb of Dresden.

H. G. D.

DRESSLER, ERNST CHRISTOPH (b. Greussen, Thuringia, 1734; d. Cassel, Apr. 6, 1779), studied (c. 1751) at Halle, Jena and Leipzig; went to Bayreuth to study singing under Signora Turcotti; became a member of the court chapel and chamber-secretary; and held a similar position at the court of Gotha about 1763. In 1767 he was Kapellmeister of Prince Fürstenberg at Wetzlar; went as opera singer to Vienna in 1771; and finally to Cassel. He wrote a number of songs, as well as *Fragmente einiger Gedanken des musikalischen Zuschauers*, etc. (1767); *Gedanken die Vorstellung der Alceste . . . betreffend* (1774); *Theaterschule für die Deutschen* (1777).

E. v. d. s.

DRESSLER, GALLUS (b. Nebra a/d Unstrut, Oct. 16, 1533), was teacher at the Magdeburg 'gymnasium' (college), 1559; cantor, 1563; deacon at St. Nicolas at Zerbst, 1577, where he married for the second time (Riemann). Eitner questions the latter date, as Dressler still calls himself cantor at Magdeburg in 1580. He was a church composer of great merit, a long list of whose sacred and secular compositions appears in *Q.-L.* Seventeen of his motets have been republished by Eitner.

DREXEL (d. 1801), Kapellmeister at Augsburg Cathedral. Schubart calls him 'the best Nürnberg organist and pupil of J. S. Bach. He understood the registers thoroughly, and his writing for the instrument was inspired. His fugues had melodious-flowing subjects and were pleasant to listen to.' He wrote also some church compositions which prove him a master of counterpoint. A few of his compositions, 2 masses, *Miserere*, *Stabat Mater*, etc., are enumerated in *Q.-L.*

E. v. d. s.

DREYER, JOHANN MELCHIOR (c. 1784), church composer. On his 'Missae VI.,' op. 6, published at Augsburg in 1792, he calls himself organist and director of music at Ellwangen. He wrote 5 books of 6 masses each, with orchestra; also 'Die deutsche Mess . . . in der röm. Kath. Kirche . . . mit neuen Melodien'; 2nd ed., Augsburg, 1816. Apart from a large number of church compositions he wrote sonatas for PF., oboe and organ. (See *Q.-L.*)

E. v. d. s.

DREYSCHOCK, (1) ALEXANDER (b. Zák, Caslau, Bohemia, Oct. 15, 1818; d. Venice, Apr. 1, 1869), a pianist of great executive attainment. J. B. Cramer, who in his old days heard him at Paris, exclaimed: 'The man has no left hand! here are two right hands!' Dreyschock played his own pieces principally, though his repertory included many classical works, which he gave with faultless precision, but in a manner cold and essentially prosaic. In early youth he was a pupil of Tomášek at Prague. He began his travels in 1838, and continued them with little interruption for twenty years. Up to 1848, from which year the golden time for itinerant virtuosi began to decline, Dreyschock gathered applause, reputation, decorations and money in plenty, from one end of Europe to the other. In 1862 he was called to the professorship of the pianoforte at the Conservatorium of St. Petersburg, and was at the same time chosen director of the Imperial school for theatrical music, and appointed court pianist. Unable to support the Russian climate, he was sent to Italy in 1868, and died in Venice. His body was buried at Prague in accordance with the desires of his family. Dreyschock's publications consist chiefly of 'salon music.' A sonata, a rondo with orchestra, a string quartet, and an overture for orchestra had no lasting success.

E. D.

(2) RAIMUND (b. Žak, Aug. 30, 1824; d. Leipzig, Feb. 6, 1869), brother of the above, was professor of violin at the Conservatoire at Leipzig, and leader of the famous Gewandhaus orchestra.

R. N.

DRIEBERG, FRIEDRICH VON (b. Charlottenburg, Dec. 10, 1780; d. there, May 21, 1856). He entered the army in 1794, but left it in 1804 and went to Paris, where he studied music and composition under Cherubini and Spontini. He was in Vienna in 1810, but returned after the death of his father to attend to his estate near Neu Ruppín. In 1812 he produced his opera 'Don Tancagno' at Berlin, which met with success and was followed by others, of which 'Der Sänger und der Schneider' was performed for a long time. From 1816 he occupied himself chiefly with the music of the ancient Greeks, about which he wrote a number of books; but though he was both learned and clever, he lacked the power of concentration and thoroughness to ensure success for works of this nature. He also wrote a book on the art of composition, published in 1858. (See list of works in *Q.-L.*)

E. v. d. s.

DRONE, (1) a name given to the three lower pipes of the bagpipe, which each emit only a single tone. They are distinguished from the CHAUNTER, which has the power of producing a melodious succession of notes. (See BAGPIPE.)

The term has hence been transferred to a continuous or pedal bass in a composition.

W. H. S.

(2) A bowed monochord known as the Drone or Bladder and string, was in use in England by wandering minstrels until a century ago and, as the Bumbass or Basse de Flandres, is still to be found on the Continent. It was employed as a rhythmic accompaniment to song and dance, but claims no descent from the true MUSICAL BOW (*q.v.*). A coarse gut string was attached at both ends to a long pole or stick and stretched over a bladder, a can, or a wooden box, which served as a bridge and resonator. It was played with a short horse-hair bow plentifully rosined. Jewett (*Ballads and Songs of Derbyshire*) gives an illustration of 'Singing Sam' (1760) using this instrument. (See also HUMSTRUM.) F. W. G.

DROUET, LOUIS FRANÇOIS PHILIPPE (b. Amsterdam, 1792; d. Berne, Sept. 30, 1873), one of the most eminent of flute-players. At 7 years old he played at the Conservatoire and the Opera-house, Paris. From 1807-10 he was teacher to King Louis of Holland, and claims to have put 'Partant pour la Syrie' into shape for Queen Hortense. His serious study of the flute began in 1807, after an extraordinary success which he achieved at a concert of Rode's in Amsterdam. In 1811 he was appointed solo flute to Napoleon I., a post which he retained after the Restoration. He settled in London and established a flute factory which existed from 1815-19. He appeared at the Philharmonic, Mar. 25, 1816, and this was probably the beginning of a lengthened tour, during which he resided for some time at Naples and The Hague. He played again at the Philharmonic, May 17, 1830. From 1836-54 he was Hofkapellmeister at Coburg, after which he visited America. After his return he lived at Gotha and Frankfurt. Drouet was eminently a flute-player, not remarkable for tone, but with extraordinary skill in rapid passages and in double-tonguing. He left some 150 works of all kinds, admirably written for the flute, and greatly esteemed by players, but of little account as music (*Félics*).

DRUM, a percussion instrument of varying pattern which may be defined as a skin stretched on a frame or vessel of wood, metal or earthenware. The Tambourine, which technically falls under this definition, is described under its own heading. (See PLATE XXIV.)

(1) KETTLEDRUMS (Fr. *timbales*; Ger. *Pauken*; Ital. *timpani*) are the only drums which produce musical sounds. A skin is stretched across a basin-shaped shell of copper or alloy; strained upon a wooden hoop, it is held in place by a circular iron ring which, by means of screws, usually from six to eight in number, can be tightened or slackened. Any note within the resounding capacity of the shell can thus be secured. The sounds are produced by drum-sticks, made of cane with padded ends of felt. Special effects have been made,

such as the use of side-drum sticks, or two coins, while the placing of one drum-stick on the drum head and hitting it with the other to produce single *pp* notes, may be mentioned. Sticks with heads of sponge instead of felt are also effective for *pp* notes.

Kettledrums were formerly used only in pairs, a high drum giving the range

and a (larger) low drum

Owing doubtless to the fact that they only played the tonic and dominant notes of the key of the movement, they were treated in old scores as transposing instruments in the key of C, the parts being written in the bass clef with an indication as to what the tuning should be. For long now, however, it has been customary to write the actual notes required, the tuning being given at the beginning of the movement and changes duly recorded as they occur. Moreover, since Beethoven's day any pair of notes is freely used. Beethoven was the first to tune drums at an interval of a diminished fifth (A, E flat) in 'Fidelio,' a minor sixth (A, F) in the 7th Symphony, and an octave in the 8th and 9th Symphonies.

The addition of a third kettledrum into the orchestra (Berlioz says it took seventy years to achieve this) has further revolutionised the value of the instrument, and for general use this number has become normal. Composers, however, have not hesitated to employ more from time to time. There is of course the famous example of Berlioz in his 'Requiem.' The four and more used by Meyerbeer, 'Robert le Diable,' Spohr, 'Calvary,' Strauss, 'Burleske,' Schönberg, 'Gurrelieder,' Stravinsky, 'Le Sacre du printemps,' and Arthur Bliss, 'Colour Symphony,' may also be mentioned.

The usual compass of the three normal drums is as follows: high drum

G above

is possible; middle drum

drum

Gustav Mahler, it may be noted, takes the low drum down to D in his 9th Symphony.

A small high drum has been used by Rimsky-Korsakov in his 'Mlada,' on which the note

is obtained. Stravinsky requires

in his 'Le Sacre du printemps.'

The effects obtained from kettledrums are of two kinds, single notes and the roll. The latter is indicated by the sign 'tr' and a wavy line ~~~~~ showing how long the roll continues. If over several bars, the notes must be

tied, so that the first beats of each succeeding bar will not be accented.

The drums have been muted, or muffled, by placing a cloth over the drum head. Examples of this effect occur in the finale of Mozart's 'Die Zauberflöte,' "timpani coperti," and in Mahler's 1st Symphony. See Berlioz's *Instrumentation*.

The tuning of drums during the course of a movement naturally takes some little time as there is more than one screw to be turned. The first attempt to overcome the difficulty appears to have been a patent taken out in 1837 by Cornelius Ward, by which a single screw affected the whole skin simultaneously. But the skin is not homogeneous and may require more tension in one part than in another. Later systems have been devised, worked by levers and pedals. The practical advantages of mechanical tuning are so obvious that if the resulting tone is completely satisfactory there could hardly be any question as to the advisability of its general adoption. Even so, however, Forsyth in his *Orchestration* observes that the function of the drums is not to play scales, portamentos and melodies, and that their character is vividly opposed to chromaticism.

The kettledrums were of Arabian origin. Forsyth points out that they were introduced into Europe towards the close of the 13th century and were commonly known in England as *NAKERS* (*q.v.*). Chaucer in *The Knightes Tale* refers to them as follows:

'Yemen on foote, and knaves many oon,
With schorte staves, as thikke as they may goon;
Pypes, trompes, nakers, and clariounes,
That in the batail blew bloody sownes.'

It does not appear to be known when the system of changing the pitch of the sound was first introduced. The nakers were probably used in the same way as the modern side-drums, without regard to any definite pitch.

(2) *BASS-DRUM* (Fr. *grosse caisse*; Ger. *Grosse Trommel*; Ital. *gran cassa*; *cassa grande*, or *cassa*—in old scores *tamburo grande* or *grosso*) is the largest of the non-musical drums. It produces no note from its irregular vibrations, rather a sound of indefinite pitch. A cylindrical wooden shell, narrow in proportion to diameter, is covered at either end with vellum stretched over hoops with a cord and braces for adjustment of the tension. It is generally played with a single stick having a large felt-padded knob. For the roll effect a double-headed stick (Fr. *tampon*, *mailloche double*) is sometimes used.

Gustav Mahler has revived the *Ruthe*, a sort of birch-rod or broom, in his 2nd Symphony, such as Mozart used in 'Il seraglio.' The part for the bass-drum is generally written on the bass clef, the C on the second space being used for the indication of the sounds required. For

the association of the bass-drum with the cymbals see *CYMBALS*.

The bass-drum is also made in another form, known as a gong-drum, having only one head; in fact being similar in design to a large tambourine. It is inferior in quality of tone to the ordinary bass-drum, but is convenient in orchestras where space is scarce.

(3) *SIDE-DRUM* (Fr. *tambour militaire*, *caisse claire*; Ger. *Kleine Trommel*; Ital. *tamburo militare*), the smallest of the orchestral drums, is a brass cylinder with a skin or head at each end whose tension is controlled by a cord and braces as in the bass-drum, or by brass rods and screws. Across the lower head several cords of catgut, called snares, are stretched which rattle against it at every stroke. They give the instrument its peculiar quality and brilliance. The roll on the side-drum (nicknamed 'Daddy-Mammy') is peculiar in being obtained by alternately striking *two* blows with the left hand and *two* with the right. Single notes are made effective by means of the 'flam,'

which is really two strokes in the rhythm, , 'open' when the first note, and , 'closed'

when the second note, is on the accented beat. The 'drag' is another technical device for securing an effective single note, consisting of a little flourish before the accent such as

 Military associations naturally tend to limit the appropriate use of the side-drum. It is notably prominent in Strauss's 'Ein Heldenleben.' The part is usually written for on the treble clef, the note C, third space, being used.

The side-drum can be muffled by means of loosening the snares and wrapping a piece of cloth round them, or by making them very slack. The continuous muffled roll played during the whole of the Dead March in 'Saul' in the military band arrangement is an impressive and unforgettable effect.

(4) *TENOR-DRUM* (Fr. *caisse roulante*; Ger. *Wirbeltrommel*, *Rolltrommel*, *Rührtrommel*; Ital. *tamburo rullante*) is midway in size between the side-drum and bass-drum, cylindrical and usually made of ash wood. It has no snares and is used chiefly in military bands, where its roll replaces that of the timpani. It has been but seldom introduced into the orchestra; Gluck used it in 'Iphigenie en Tauride,' and Wagner in 'Die Walküre' and 'Parsifal.'

(5) *TABOR* (Fr. *tambourin de Provence*; Ger. *Tambourin*) as used in the orchestra is a long, narrow drum with a single snare passed across the vellum head on which the strokes are made. Bizet introduced it into his second suite, 'L'Arlésienne,' and William Wallace, who possesses a fine specimen of the instrument, wrote for it in his 'Villon.' See also *PIPE* and *TABOR*.

DRURY LANE THEATRE, opened in 1696 under the name of the Theatre Royal in Drury Lane; materially altered and enlarged in 1762 and 1763; pulled down in the summer of 1791; the new theatre opened (for plays) Apr. 21, 1794; burned Feb. 24, 1809; rebuilt and opened Oct. 10,¹ 1812. Among the eminent composers who have been connected with this theatre must, in the first place, be mentioned Dr. Arne, who from the year 1738, when he wrote the music to Milton's 'Comus,' until shortly before his death in 1778, produced a large number of operas and operettas. In 1806 one of Sir Henry Bishop's first works, a pantomime-ballet called 'Caractacus,' was brought out at Drury Lane. But Bishop, after the burning of the theatre in 1809, accepted an engagement at Covent Garden, where most of his operas and musical dramas were performed. Meanwhile foreign operas as arranged or disarranged for the English stage by Rophino Lacy, Tom Cooke and others, were from time to time performed at Drury Lane; and in 1833, under the direction of Alfred Bunn, some English versions of Italian operas were produced with the world-renowned prima donna Marietta MALIBRAN (*q.v.*) in the principal parts. Drury Lane was the last theatre at which she sang. A few years later Bunn made a praiseworthy but not permanently successful attempt to establish English opera at this theatre. During this period Balfe's 'Bohemian Girl,' 'Daughter of St. Mark,' 'Enchantress,' 'Bondman,' etc.; Wallace's 'Maritana' and 'Matilda of Hungary,' Benedict's 'Crusaders' and 'Brides of Venice,' were brought out at Drury Lane, for which theatre they had all been specially written. When Her Majesty's Theatre was burnt down (Dec. 6, 1867), Mapleson took Drury Lane for a series of summer seasons. In 1870 the performances took place under the management of George Wood (of the firm of Cramer, Wood & Co.), who among other new works produced Wagner's 'Flying Dutchman'—the first of Wagner's operas performed in England. Until 1877 'Her Majesty's Opera,' as the establishment transferred from Her Majesty's Theatre was called, remained at Drury Lane. In 1877, however, Mapleson returned to the Haymarket; and Drury Lane was not used for serious operas until the German season of 1882 under Richter, when 'Tristan und Isolde' and 'Die Meistersinger' were given for the first time in London. In the spring of 1883 Carl Rosa took Drury Lane and brought out Thomas's 'Esmeralda' and Mackenzie's 'Colomba.' Stanford's 'Canterbury Pilgrims' was given in 1884, and Thomas's 'Nadeshda' in 1885. The successful career of Sir Augustus Harris as an operatic manager began at Drury Lane, when in 1887 he introduced the brothers

de Reszke and other notable singers to London audiences. After that single season he made Covent Garden the centre of his operations; but in 1892-93 Drury Lane was used for extra performances of German opera. A regular German season was given at the same theatre in 1895, when the Ducal Company of Saxe-Coburg and Gotha gave a very interesting series of performances of comic operas of a more or less high class. Smetana's 'Verkaufte Braut' was the most important of the operas new to London. In the spring of 1896 a series of performances of stock operas in English was given at Drury Lane before the beginning of the regular season at Covent Garden. In 1904 the Moody-Manners Company gave a series of operas in English at Drury Lane. Most important were the two seasons (1913, 1914) in which Sir Joseph Beecham introduced the Russian opera with Chaliapin at its head, giving at Drury Lane the first performance of 'Boris Godounov' and other works.

H. S. E., with addns.

DRYSDALE, F. LEARMONT (*b.* Edinburgh, 1866; *d.* there, June 18, 1909), entered R.A.M. and won the Lucas prize for composition in 1890.

An orchestral ballad, 'The Spirit of the Glen' (1889), and an orchestral prelude, 'Thomas the Rhymer' (1890), were written during his student days. His overture 'Tam o' Shanter' obtained a prize offered by the Glasgow Society of Musicians, and was performed at the Crystal Palace, Oct. 24, 1891. On Apr. 24, 1894, his overture 'Herondale' was produced by the Stock Exchange Orchestral Society; and a cantata, 'The Kelpie,' was given on Dec. 17 of the same year in Edinburgh. A musical play, 'The Plague,' was produced at the Lyceum Theatre, Edinburgh, Oct. 1896 (*Brit. Mus. Biog.*). His opera 'Red Spider' was performed at Her Majesty's in Dundee, Nov. 1898. For a full list of compositions see *B. M. S. Ann.*, 1920.

DUBLIN possesses two Church of Ireland cathedrals, one Roman Catholic pro-cathedral, two large theatres capable of seating over 2000 each, four smaller theatres, two large Round Rooms (in the Rotunda and the Mansion House), innumerable picture-houses of varying sizes, but no concert hall suitable for the performance of choral and orchestral works. So long ago as Apr. 1742, at the first performance of Handel's 'Messiah' for the benefit of Mercer's Hospital, the ladies were 'requested not to wear their hoops, so that there might be more accommodation,' and, even with this concession, the theatre in Fishamble Street (now occupied by Kennan's iron works) only accommodated 700.

The concert hall in Earlsfort Terrace, built in connexion with the Exhibition of 1865, is now incorporated with the buildings of the National

¹ This opening, for which the address was written by Byron, gave occasion to the *Rejected Addresses* of James and Horace Smith.

University, and is no longer available; the Antient Concert Rooms, built by the Society of that name (see below), now form a picture theatre; the Examination Hall in Trinity College, where the University of Dublin Choral Society gives its concerts, is not a public hall; the Metropolitan Hall, in the occupation of the Y.M.C.A., is only available to a limited extent for public concerts, while the Lecture Theatre of the Royal Dublin Society, where the annual series of Chamber Music Recitals have been given, has since 1922 been taken over as the Parliament House of the Irish Free State. The present state of affairs (1925) is that any concert on a large scale must be given in the Theatre Royal *in the afternoon*, but the FEIS CEOL (*q.v.*) is making a spirited attempt to obtain funds for a Citizens' Hall.

Music in Dublin during the 19th century owed much to Joseph ROBINSON (*q.v.*). He founded and conducted the ANTIENT CONCERTS SOCIETY (which built the Antient Concert Rooms in Great Brunswick Street) in 1834. Mendelssohn's 'Elijah' was performed in Dec. 1847. The Society came to an end in 1863, and in 1876 Joseph Robinson (who had in the meantime conducted the Irish Academy of Music Choral Society) founded the DUBLIN MUSICAL SOCIETY. Its concerts were given in the Large Hall in Earlsfort Terrace, the current choral and orchestral repertory being performed by a choir and orchestra of about 350, with the leading soloists of the day. Robinson was succeeded by the late Dr. Joseph Smith, who acted as conductor till the Society ceased to exist in the 'nineties.

THE DUBLIN ORCHESTRAL SOCIETY, founded in 1899 by public subscription, was an attempt to provide a permanent orchestra for the city. Under Esposito, its conductor and moving spirit, it continued with a band of about 70 to give performances of all the orchestral masterpieces until the war put an end to its activities. The concerts were given in the Earlsfort Terrace Hall and the Gaiety and Royal Theatres. An outcome of this society was the annual series of Sunday orchestral concerts given for several years by Esposito in the Antient Concert Rooms with a band of about 30 and an extensive repertory of symphonic music.

THE DUBLIN ORATORIO SOCIETY under the conductorship of Vincent O'Brien from 1906-1914 performed many choral and orchestral works, including 'The Dream of Gerontius' in 1909. The want of a suitable hall (its performances were given in the Theatre Royal) has suspended its activities.

THE ORPHEUS CHORAL SOCIETY, founded in 1899 by Dr. James Culwick (organist of the Chapel Royal) for the performance of madrigals and part songs, carried on its activities with much artistic success until the conductor's

death in 1906. His daughter, Florence Culwick, started in 1910 a Ladies' Choir to compete at the Feis Ceoil; this led to the formation of a mixed choir in 1913, which gives an annual series of concerts, and in 1924, in conjunction with Turner Huggard's PEMBROKE CHORAL SOCIETY, gave three performances of Granville Bantock's choral symphony 'The Vanity of Vanities.' The Orpheus, Miss Culwick's Choral Society, and the Pembroke Choral Society, are the permanent outcome of effort temporarily made in connexion with the Feis Ceoil Choral Competitions.

THE UNIVERSITY OF DUBLIN CHORAL SOCIETY, familiarly known as 'the College Choral,' was founded in Nov. 1837, and was the outcome of informal meetings of students at the rooms of Hercules H. G. MacDonnell for the practice of choral singing. The first conductor of the Society was Joseph Robinson, who was succeeded in 1847 by Sir Robert (then Dr.) Stewart, Dr. Charles G. Marchant, and Dr. George H. P. Hewson.

In 1837 the amount of printed music available for choral use was small. The Society, therefore, for some time confined its studies to some of Handel's best-known works, Haydn's 'Creation,' etc. In 1845, however, an important advance was made by the performance, on May 23, of Mendelssohn's music to 'Antigone,' which had been produced at Covent Garden Theatre in the preceding January, and from that time forward the Society has performed every work of merit within its powers.

For many years the old-fashioned regulations compelled the Society to employ only the chorists of the cathedrals for the treble parts in the chorus, and on occasions when boys' voices were inadequate, to give its concerts outside the college walls, but in 1870 permission was granted to admit ladies as associates, and since that time they have taken part in the concerts of the Society. In 1903 an amateur orchestra was formed in connexion with the Society by Dr. Marchant, the conductor.

The Society meets weekly for practice from November to June, and usually gives three concerts during the season in the Examination Hall of the college, which contains a full-length portrait of Queen Elizabeth and the chandelier of oak, carved and gilt, which formerly hung in the House of Commons in College Green.

A MUSICAL FESTIVAL was held in Dublin, Aug. 30 to Sept. 3, 1831, for the benefit of the Mendicity Association and the Sick and Indigent Room-keeper's Society. Conductors, Sir George Smart and Ferdinand Ries. Three evening concerts and three morning oratorio performances in the Theatre Royal were given, as well as three grand balls in the Rotunda. Paganini seemed to have been the great attraction at the concerts, and indeed to

have prevented the festival being a financial fiasco.

THE PHILHARMONIC SOCIETY, founded in 1826, lasted for 40 years. In 1856 Beethoven's Choral Symphony was performed. Henry Bussell conducted, and the soloists were Miss Ellen Williams, Mrs. Cantwell, Gustavus Geary and Joseph Robinson. In June 1847 Joseph Joachim, and in May 1858 Anton Rubinstein, made their first appearances in Dublin at these concerts.

THE STROLLERS, an amateur society, founded in 1865 for the study of unaccompanied male voice choruses, still keeps to its tradition. The members dine together once a month during the winter, when the performing members, known as 'The Band,' provide a programme of choruses and partsongs. A large number of these—German partsongs to which English words were written by members of the Strollers—are published by Augener.

THE HIBERNIAN CATCH CLUB, founded in 1679–80 by the vicars-choral of St. Patrick's and Christ Church Cathedrals, claims to be the oldest existing musical society in Europe. Monthly dinners are held from December till May, to which members may invite guests, and at which the vicars-choral or their substitutes provide the music. The existing records of the club date from 1740. Sir John Stevenson (who wrote the Charter Glee which is sung at each meeting), was knighted on the occasion of Lord Hardwicke's visit to the club in May 1803. The late Duke of Cambridge was elected an honorary member in 1847, and H.R.H. the Duke of Connaught in 1877.

THE ROYAL DUBLIN SOCIETY have given an annual series of chamber music recitals for many years. The music was at first provided by a local string quartet, with Esposito as pianist. Of late years the Brodsky, Wessely and Catterall Quartets, among others, have made yearly appearances. These concerts were first given in the small lecture theatre attached to Leinster House. The present theatre was built in 1898, when a fine four-manual organ by Willis was installed. Since 1923, when the theatre was occupied by the Dail, the concerts have been given in the Abbey Theatre and in the Theatre Royal.

The choir of the Pro-Cathedral, Marlborough Street, formed in 1902, consisting of at least eight men and twenty boys, owes its existence to the munificence of the late Edward Martyn of Inlyra Castle, Co. Galway, a well-known patron of ecclesiastical fine art, with the approval and support of the late Most Rev. Archbishop Walsh, himself a noted authority on church music. The choir is maintained by the income from £10,000 given by the founder, to which is added an annual sum of £300 from the resources of the cathedral. The deed of gift states, 'The music to be sung shall be

Gregorian and that of Palestrina or in the Palestrina style.' No music composed later than the end of the 17th century may be sung unless it has been sanctioned by the Supreme Liturgical Authority of the Roman Catholic Church.

To secure the proper rendering of the Gregorian chant the Archbishop secured the services of the Very Rev. Dom Gatard, O.S.B., sub-prior of the Solesmes Benedictine community, who gave a course of instruction in the chant to the newly-formed choir. The choir entered on the discharge of its duties Jan. 1, 1903, and has since then faithfully carried out the purpose for which it was founded, under the capable direction of the choirmaster, Vincent O'Brien, the organist being Brendan Rogers.

St. Patrick's Cathedral and Christ Church Cathedral for many years shared the services of one organist. The morning service at Christ Church and the afternoon service at St. Patrick's were elaborate cathedral services, at which the organist and principal members of each choir assisted. The afternoon service at Christ Church and the morning service at St. Patrick's were simpler, and the assistant organist and a small choir took part. This custom continued until the death of Sir Robert Stewart, who also held the post of organist at Trinity College Chapel. The list of organists kindly supplied by the Very Rev. H. Jackson Lawlor, Dean of St. Patrick's, is:

St. Patrick's Cathedral—

William Herbit, 1509; William Browne, 1555; Anthony Willis or Wilkes, 1606; Thomas Godfrey, 1686; Thomas Finell, 1689; Daniel Roseingrave, 1698; Ralph Roseingrave, 1719; Richard Broadway, 1747; George Walsh, 1760; Henry Walsh, 1765; Michael Sandys, jun., 1769; Samuel Murphy, 1770; Philip Cogan, 1780; John Matthews, 1810; William Warren, 1827; Francis Robinson, 1828; John Robinson, 1830; Richard Cherry, 1844; William Henry White, 1845; Robert Prescott Stewart, 1852; William Murphy, 1865; Charles George Marchant, 1879; George H. P. Hewson, 1920.

Christ Church Cathedral—

Robert Hayward, 1546; Walter Kennedy, 1591; John Fermor or Farmer, 1596; Thomas Bateson, 1609; Randall Jewett, 1631; Richard Galvan, 1631; Benjamin Rogers, 1639; John Hawkshaw, 1645; Thomas Godfrey, 1689; Thomas Piacell, 1689; Peter Isaac, 1692; Thomas Finell, 1694; David Roseingrave, 1698; Ralph Roseingrave, 1727; George Walsh, 1747; Richard Woodward, 1765; Samuel Murphy, 1777; Langrishe Doyle, 1780; William Warren, 1805; John Robinson, 1841; Robert Prescott Stewart, 1844; John Horan, 1894; James F. Fitzgerald, 1906; Charles H. Kitson, 1913; Thomas Henry Wearing, 1920.

Boy choristers were introduced by Archbishop Talbot in St. Patrick's Cathedral in 1432.

The organ at St. Patrick's was presented by the Earl of Iveagh in 1902. It is built by Willis, and contains some of the stops of the older organs. It occupies a chamber on the triforium level which was built specially for the purpose. Access is provided by a very beautiful spiral staircase of marble and stone

designed after a similar structure at Mayence. There is a fine peal of ten bells by Taylor of Loughborough, also the gift of the Earl of Iveagh in 1897.

The organ at Christ Church Cathedral occupies the upper part of the north transept. It is a four-manual instrument of various dates, and has recently been renovated by Telford & Telford of Dublin.

THE FATHER MATTHEW FEIS is held in connexion with the hall in Church Street, which is owned by the Franciscan Capuchin friars. Founded in 1907, it has been uniformly successful. Competitions are held in vocal and instrumental music in addition to dancing, recitation in Irish, and dramatic sketches. Competitors in 1924 numbered over 1600. c. w. w.

THE ROYAL IRISH ACADEMY OF MUSIC, founded in 1848, was reorganised in 1856, the necessary funds being obtained by private subscription, and by the proceeds of operatic performances given by amateur musicians resident in the country. It was not until 1870 that the English Government, of which Gladstone was then head, voted it an annual grant of £150, subsequently increased to £300, on condition that £100 should be contributed annually by private subscribers. This grant has been continued by the Irish Free State Government. The title 'Royal' was granted in 1872.

Various capital sums have been acquired by the Academy at different times, chiefly through the agency of Sir Francis Brady, Bart., whose efforts on behalf of the Academy cannot be forgotten. These are: The Beagley Fund, £125, the Albert Fund, £940, the Vandeleur Bequest, £4000, in addition to a Stradivarius violin which was sold for £500, and the Coulson Bequest, £13,000. The last-named was left by Elizabeth Coulson in 1883, to found a school in which 'the children of respectable Irish parents' could be taught instrumental music. The money was handed over to the Academy for administration in 1887 by the Commissioners of Charitable Donations and Bequests, the Academy having been first reconstituted and incorporated under the Educational Endowments (Ireland) Act of 1885.

The Government of the Academy consists at present of: a Patron, His Majesty the King; a Vice-Patron, H.R.H. the Duke of Connaught; a President, the Lord Lieutenant of Ireland; nine Vice-Presidents; a Board of twenty-four Governors, of whom twelve are nominated by subscribers, eight by the Municipal Corporation, three by the Coulson Endowment trustees, and one by the Board of Studies, which consists of the professors. There is no director, orders being carried out by a secretary under direction of the Board of Governors.

After 1856 the premises of the Academy were the upper portion of a house No. 18 St.

Stephen's Green, the classes having previously been held in the rooms of the Antient Concerts Society. In 1871 the Council purchased the present building, No. 36 Westland Row, which was the town residence of Sir FitzGerald Aylmer, a fine old house, and later purchased the adjoining house, No. 37.

DUBOIS, FRANÇOIS CLÉMENT THÉODORE (b. Rosnay, Marne, Aug. 24, 1837; d. Paris, June 11, 1924), composer, came to Paris at an early age, and entered upon a brilliant course of study at the Conservatoire, where he gained successively first prizes for harmony, fugue and organ, and finally, in 1861, under Ambroise Thomas, the Prix de Rome. On his return from Italy in 1866 he devoted himself to teaching, and was appointed maître de chapelle of Ste. Clotilde, where, on Good Friday, 1867, he produced an important and carefully written work, 'Les Sept Paroles du Christ,' afterwards performed at the Concerts Populaires in 1870. Being unable to force an entrance into the great musical theatres, he contented himself with producing, at the Athénée, a pleasing little work, 'La Guzla de l'Émir' (Apr. 30, 1873). In 1878 he carried off, together with B. Godard, the prize at the Concours Musical instituted by the city of Paris, and his 'Paradis perdu' was performed, first at the public expense (Nov. 27, 1878), and again on the two following Sundays at the Concerts du Châtelet. His other dramatic works for the stage are 'Le Pain bis' (Opéra-Comique, Feb. 26, 1879); 'La Farandole,' ballet (Opéra, Dec. 14, 1883); 'Aben-Hamet,' a grand opera (Théâtre Italien de la place du Châtelet, Dec. 16, 1884); and 'Xavière,' dramatic idyl in three acts (Opéra-Comique, Nov. 26, 1895). Among Dubois's many concert works are 'Divertissement' and 'Pièces d'orchestre' (Concert National, Apr. 6 and Dec. 14, 1873), a 'Suite d'orchestre' (do. Feb. 8, 1874), 'Scènes symphoniques' (Concerts du Châtelet, Nov. 25, 1877), and his overture 'Fritiof' (do. Feb. 13, 1881). A symphonic poem, 'Notre Dame de la Mer' was produced in 1897, and Dubois also set to music a Latin ode on the baptism of Clovis, for tenor and baritone solo, choir and orchestra, performed at Rheims in 1899. His church music, 'Messe de Requiem,' 'Messe de la Délivrance,' motets 'O quam suavis' and 'Puer natus est nobis,' has been very popular with choirmasters and organists. For some time he was maître de chapelle at the Madeleine, and succeeded Saint-Saëns as organist there in 1877. He succeeded Elwart as professor of harmony at the Conservatoire in 1871, and in 1883 was decorated with the Legion of Honour. In 1894 he was elected to the

Institut in place of Gounod, and became the head of the Conservatoire (1896-1905). His treatise on fugue, his *Notes et études d'harmonie* and his *Leçons de solfège* are well known to students. A. J.; addns. M. L. P.

BIBL.—H. IMBERT, *Nouveaux profils de musiciens*.

DUBOURG, (1) MATTHEW (b. London, 1703; d. there, July 3, 1767), an eminent English violinist, pupil of Geminiani, was, according to Burney, a natural son of Isaacs, the dancing master.

It is reported that he first appeared as a boy at one of the concerts of Britton, the small-coal man, when he performed a solo of Corelli with great success, standing on a high stool. On May 27, 1714, he had a benefit concert at Hickford's Room. He visited Dublin in 1724, and on June 17, 1727, married Frances Gates at Stanmore (Middlesex). In 1728 he was appointed to succeed Cousser as conductor of the Viceroy's band at Dublin, in which capacity he set many odes for the celebration of royal birthdays. During his residence there he led the band at the performances given by Handel during his visit to Ireland in 1742, and also had the distinction of assisting at the first performance of the 'Messiah.' Later he returned to London, and in 1752 succeeded Festing as leader of the King's band though still retaining the Dublin appointment. In 1761 he was appointed Master of Her Majesty's Band of Musick at £200 a year. Geminiani was his guest in Dublin in 1761-62 and on many other occasions. Dubourg composed the Birthday Odes for Dublin Castle from 1728-64; he finally left Ireland in 1765. He was buried in Paddington churchyard. Dubourg appears to have been a brilliant performer and fond of showing off his skill. Burney relates that on one occasion he introduced a cadenza of extraordinary length into the ritornello of an air. When at last he finished, Handel, who was conducting, exclaimed, 'Welcome home, Mr. Dubourg.' A portrait of Dubourg, by Philip Hussey, was in the possession of Joseph Cooper Walker of Dublin. His published compositions are few, and scattered through minor collections. Several are in John Simpson's 'Delightful Pocket Companion for the German Flute,' c. 1746-47, and to Walsh's 'Musica Bellicosa, or Warlike Musick' (about the same period), he contributed some 'Serenading Trumpet Tunes.'

P. D.; addns. W. H. G. F. and F. K.

(2) GEORGE (b. 1799; d. Maidenhead, Apr. 17, 1882), a grandson of Matthew, was author of a history of the violin and the most celebrated performers on it, which was originally published in 1836, and in 1878 reached a fifth edition.

W. H. H.

DUC, PHILIPPE DE (often, but erroneously, 'le Duc') (2nd half of 16th cent.), a Netherlander living in Padua, according to the dedication of his madrigals a 5 and 6 v., 1586. Q.-L.

mentions 2 other books of madrigals of 1570 and 1574; also some motets. E. v. d. s.

DUCASSE, JEAN - JULES - AMABLE, ROGER- (ROGER-DUCASSE) (b. Bordeaux, Apr. 18, 1875), composer, studied composition in the class of Gabriel Fauré at the Paris Conservatoire, obtaining the second Grand Prix de Rome in 1902, with the cantata 'Alcyone.' Since 1909 he has been inspector of singing-teaching in the City of Paris schools.

His first compositions date from 1895. A 'Petite Suite' for piano (4 hands), 1897, orchestrated afterwards, was played at the Société Nationale, Mar. 5, 1898. Two quartets, one for piano and strings in G minor (1899-1912), the other for strings only in D minor (1900-09) — the latter dedicated to G. Fauré — show what might be expected from him in the domain of chamber-music. He did not, however, follow them up but turned in another direction with the two following works: 'Au Jardin de Marguerite,' a symphonic poem for mixed and double chorus and orchestra (1901-05) (Durand, 1912), performed at the Société Nationale, Apr. 18, 1913; 'Orphée,' a mimodrama (Durand, 1913), first performed in its concert form at the Siliti Concerts in St. Petersburg (Jan. 31, 1914; Paris Opéra, June 11, 1926). This last is an ingenious combination of pantomime, choreography and music. The libretti of both works are by the composer. 'Orphée' remains his outstanding contribution to stage music. Subsequently he has composed for orchestra alone, 'Suite française' (Durand, 1909), 'Prélude d'un ballet' (Durand, 1910), 'Nocturne de printemps' (Durand, 1919), 'Épithalame,' a symphonic poem (1923), and 'Poème symphonique sur le nom de Fauré' (1923), has combined the voices with the orchestra in 'Sarabande,' a symphonic poem (Durand, 1911), and used the harp as an obbligato instrument in 'Variations plaisantes sur un thème grave' for orchestra, performed at the Concerts-Lamoureux, Jan. 24, 1909.

His vocal music includes 3 motets; choruses: 'Aux premières clartés de l'aube,' 'Le joli jeu du furet' (English translations), 'Sur quelques vers de Virgile,' 'Madrigal sur des vers de Molière' (1925); and a few songs. He has also written pieces for pianoforte and violin, pianoforte and violoncello; 'Pastorale' for organ (1909), etc.; also didactic works such as *École de la diction*, *Piano exercices* (2 books).

A diligent student of J. S. Bach, his tendency towards polyphonic writing and contrapuntal combinations, interwoven with massive harmonic effects, finds free vent in his piano compositions, which are of considerable difficulty. He composed 6 Preludes in 1907, and since 1914 his contribution to pianoforte literature has been greatly increased: 'Variations sur un choral,' 6 Études, 'Esquisses,' 'Rythmes,' 'Sonorités,' 2 Arabesques, 3 Barcarolles, etc.

His style, founded on the tradition of G. Pauré, has gradually evolved to a more elaborate manner, in which his innate sensibility and elegance are nevertheless always manifest. His work is that of a sincere musician, careful of form, whose free imagination neither rejects systematically the classic discipline nor loses sight of the natural inclination, common to his contemporaries, towards harmonic innovations.

M. L. F.

DUCIS (HERTOGHS),¹ BENEDICTUS (*b. circa* 1480),² a Flemish musician in the early part of the 16th century, organist of the Lady Chapel in the cathedral at Antwerp, and 'Prince de la Gilde' in the brotherhood of St. Luke in that city. He left Antwerp for England in 1515 (*Biogr. belge*), but as his name does not appear in the lists of court musicians at that time, and no manuscript compositions of his have been found in this country, it appears that his residence here must have been very short, if not altogether mythical. His elegy on the death of Josquin (1531), and another on the death of Erasmus (1536) fix two more dates in his life. After that no more is known of him. Some German historians have claimed him as a countryman on the strength of the publication and dedication of a setting of the Odes of Horace (published at Ulm in 1539, and dedicated to the youths of that city), maintaining that this proves his residence in that city, but the dedication was more probably the work of the publisher than of the composer, and the existence of the book is itself very doubtful. (See *Q.-L.*) His connexion with Antwerp, mentioned above, was discovered by M. Léon de Burbure, and certainly outweighs anything said in favour of his being a German; while the internal evidence of his compositions, which bear the decided Flemish character, and very closely approach the style of Josquin, sets the matter entirely at rest.

We have the following compositions of his: (1) A 4-part 'monody' on the death of Josquin, in the seventh set of French chansons in 5 and 6 parts printed by Tylman Susato in 1545. A copy of the book is in the British Museum. The composition itself is printed in Burney's *History* (ii. 513), with critical remarks. This with 14 other compositions by Ducis is in a MS. at Cambrai, dated 1542. There are also songs by Ducis to the number of 80 in the old collections between 1532 and 1570. (2) Another elegy in 5 parts, 'Plangite Pierides,' on the death of Erasmus, and an 8-part *Agnus Dei*, both from the 'Selectissimae necnon familiarissimae cantiones ultra centum' (Augsburg, 1540). (3) Songs in the collection

of German songs made by Förster and printed by Petreius (Nuremberg, 1539-40). (4) A motet, 'Peccantum me quotidie,' from the 'Cantiones octo . . . vocum' printed by Uhlard (Augsburg, 1545). 'No wonder,' says Ambros, speaking of this motet, 'that historians have striven to prove such a composer their countryman.' (5) A motet, 'Dum fabricator mundi supplicium,' from Rhau's 'Selectae harmoniae . . . de Passione Domini' (Wittenberg, 1538). (6) Two 5-part motets, 'Benedic Domine,' and 'Corde et animo,' from Kriesstein's 'Cantiones sex et quinque vocum, etc.' (Augsburg, 1545.)

J. R. S. B.

DÜBEN, a remarkable family of musicians: (1) ANDREAS (*b. Lützen, 1558; d. Apr. 19, 1625*), organist at St. Thomas's, Leipzig. (2) ANDREAS, son of the former (*b. circa 1590; d. Stockholm, 1662*), pupil of Sweelinck at Amsterdam, 1614-20, went to Stockholm in 1621, became organist of the German church there in 1625, and court Kapellmeister in 1640. Twenty dances for viols in a codex in the Upsala library are by him. His son, (3) GUSTAF (*b. Stockholm, 1624; d. there, Dec. 19, 1690*), was a member of the court chapel, 1647; organist of the German church and court Kapellmeister, 1663. The most important composer of the family, he composed church music, concerti grossi and symphonies for viols; also for violins, etc. The great collection of sacred and secular 17th-century compositions in the Upsala library was made by Gustaf, as also a MS. collection of 220 dances for 4-6 viols, including some of his own. An appreciation of his work appeared in vol. ii. of *Sammelh. Int. Mus. Ges.* His son, (4) GUSTAF (*b. Stockholm, Aug. 6, 1659; d. there, Dec. 5, 1726*), succeeded his father as court Kapellmeister in 1690; was raised to the rank of the nobility in 1698; and became successively a court-intendant, court-marshal (1712) and a baron (1718). Of his compositions only an aria with instruments is known. His brother, (5) ANDREAS (*b. Stockholm, 1673; d. there, Aug. 23, 1738*), became court Kapellmeister in 1696. He also received the title of baron and died as a court-marshal. A ballet, arias, songs, minuets, etc., in the Upsala library are attributed to him. A son of Andreas (2), (6) KARL GUSTAF (*d. 1758*), was also court Kapellmeister. He resigned in 1724. (*Riemann; Q.-L.*)

DUET (*Fr. duo; Ger. Duett; Ital. duetto*), a composition for two performers, singers or players, with or without accompaniment, in which the interest of the writing is divided as equally as possible. Some writers have used the term 'Duet' for vocal, and 'Duo' for instrumental compositions. Beethoven wrote 3 duos for clarinet and bassoon, published without opus number. Spohr's Duos for 2 violins or violin and viola retain this title, but gener-

¹ Benedictus Ducis, who is often called by his first name alone, must not be confounded with Benedictus Appenzelers, a Swiss musician who lived in Belgium, but of later date and less genius.

² *Phil.*

ally, except in the case of the piano, instrumental duets are called sonatas, sonatas for violin and piano, violoncello and piano, etc. As an example of accompanied duet, Bach's sonata in C for two violins may be mentioned. Reger has written duets for two violins. A modern duet sonata of unusual combination is that of Ravel, for violin and violoncello. (See SONATA.)

In pianoforte music the term is used in two ways: first, for music à quatre mains (i.e. for two performers on one piano); and, second, for when two pianos are used with one player at each.

The earliest printed works for the piano à quatre mains of which we have any knowledge are Burney's four 'Sonatas or Duetts' published in 1777 and those published in Dessau about 1782, under the title 'Drey Sonaten fürs Clavier als Doppelstücke für zwey Personen mit vier Händen von C. H. Müller'; before this, however, E. W. Wolf, musical director at Weimar in 1761, had written one or more sonatas for two performers, which were published after his death. The short compass of the harpsichord keyboard, which rarely exceeded five octaves, was ill adapted to the association of two performers on the same instrument, hence doubtless the small amount of music of the kind in that period.

According to Fétis, Haydn wrote a divertissement, à quatre mains, which was never published, the two sonatas, opp. 81 and 86, published under his name, being spurious. Mozart wrote 9 duets, two of which were originally written for a mechanical organ or musical clock in a Vienna exhibition, afterwards arranged for piano by an unknown hand. Schubert's 'Grand Duo,' op. 140, and the 'Divertissement à la Hongroise,' op. 54, should be mentioned, as also Brahms's op. 23, the variations on a theme of Schumann. There is also a sonata in G minor of Hermann Goetz.

The first composition for two keyboard instruments with one performer at each is probably Giles Farnaby's little duet in the 'Fitzwilliam Virginal Book,' vol. i. p. 202. The ninth of Couperin's 'Ordres' begins with an 'Allemande à deux Clavecins.' J. S. Bach used harpsichords together, but generally in the concerto-form. There are, however, two fugues in the *Kunst der Fuge* for two harpsichords alone. The sonata in F, published as his in B.-G. xliii., was proved to be by Wilhelm Friedmann Bach. Mozart wrote a sonata in D, and a fugue in C minor for two pianofortes; and Clementi's two sonatas, both in B flat, are worth mentioning. Schumann's variations in B flat, op. 46, originally written for two pianos, two violoncellos and horn, and Chopin's rondo in C should be mentioned, and Parry's 'Characterisches Duo' in E minor; and there is a set of variations by Sinding. A large quantity of

orchestral and other music has been arranged for both forms of piano duet; the comparative facility in performance, making such works more readily accessible to the amateur. For two pianos there are in particular some examples of such arrangement calling for mention, such as Brahms's own version of his quintet in F minor and his variations on a theme of Haydn. This combination is particularly successful in representing works for piano and orchestra; all the best-known concertos are arranged for two pianos, and in the case of Chopin the arrangement is at least as effective as the original.

Organ music à quatre mains is very rare. There are three duets by Samuel Wesley and other pieces by Hesse, Höpner and Julius André.

The vocal duet differs from a two-part song in that the interest is more evenly divided. It is generally accompanied. Morley's 'First Book of Canzonets to two voices' was published in 1595 (see CANZONET). The 'chamber duet' (*duetto da camera*) became a work of some importance in the 18th century. See especially duets of Handel and of Steffani. These duets were often in several movements linked by recitatives, and almost invariably in the polyphonic style. The duet, of course, takes a prominent place in opera, nowadays with a very free design in which the *ensemble* may take a comparatively small share.

F. T. and N. C. G.

DUETTINO (Ital. dimin.), a duet of short extent and concise form.

DUFAY, GUILLELMUS (Guilielmus, Guglielmus, or Wilhelmus Dufay, Dufais or Duffai) (b. probably Hainault, before 1400; d. Cambrai, Nov. 27, 1474), was, with BINCHOIS (q.v.), leader of the first Netherland School of polyphonic composition. He is specially famous for his 'chansons' (3 v.). Bains's statement that Dufay sang in the Pontifical Choir from 1380-1432 has misled various later writers, some of whom were driven to the conclusion that there were two musicians of the same name.

The biographical facts which seem to be now established are as follows: He was a chorister in the cathedral of Cambrai; wrote a song celebrating the marriage of Charles Malatesti and Vittoria di Lorenzo Colonna, which took place in 1416; was transferred to the Papal Choir in Rome in Dec. 1428, remaining there (apparently with short intervals) until 1437; was appointed to a canonry at Cambrai, Nov. 1436, and to one at Mons soon afterwards; held both appointments at the time of his death; probably lived in Savoy for some time before 1446, after which he was constantly at Cambrai.¹

Houdoy's researches at Cambrai prove, beyond all doubt, that he took his degree of Magister in artibus, and Baccalareus in decretis,

¹ Stainer's *Dufay and his Contemporaries*.

in Paris, at the Sorbonne, before 1442; and that he entered the service of Philippe le Bon, Duke of Burgundy, as musio-tutor to his son Charles, Comte de Charolais.

In his will, which is still in existence at Cambrai, Dufay bequeaths to one of his friends six books which had been given to him by the Comte de Charolais; to another, a portrait of Louis XI., who, when Dauphin, spent some time at the court of Burgundy; to a third, a portrait of René of Anjou, who was Philippe's prisoner for a long time; and to a certain Pierre de Wez thirty livres. He also desires that, when he has received the last sacraments, and is in *articulo mortis*, eight choristers of the Cathedral shall sing, very softly, by his bedside, the hymn 'Magno salutis gaudio'; after which, the altar-boys, with their master, and two choristers, shall sing his motet, 'Ave Regina coelorum.' This pious duty was, however, performed, not at his bedside, but in the chapel, after his death, *corpore praesente*.

The will is printed entire by Haberl, who also gives a woodcut of the tombstone in the chapel of St. Etienne, with the following epitaph,

'Hic inferius jacet venerabilis vir magr. guillelmus dufay music. baccalareus in decretis olim hu' ecclesie chorialis deinde canonic' et sec. waldetrudis montem. qui obiit anno dni. millesimo quadringentesimo . . . II^o die XXVII^a mensis novembris.'

and a representation in bold relief of the master, kneeling, with folded hands, in the dexter corner, in front of S. Waltrudis and her two daughters, the remainder of the stone being occupied with a representation of the resurrection of our Lord, while the four corners are ornamented with a medallion, or rebus, in which the name, Dufay, is encircled by a Gothic G. The stone was in the collection formed by M. Victor de Latre of Cambrai, but was sold after his death in 1889.

The archives of the Cathedral of Cambrai contain a record of 60 scuts, given to Dufay as a 'gratification,' in 1451. And the text of a letter, written to Guil. Dufay by Antonio Squarcialupi, the Florentine organist, and dated 1 Maggio, 1467, is given by Otto Kade.¹

Guil. Dufay is mentioned in an obscure passage quoted from Adam de Fulda in Gerbert's *Scriptores*, as having made certain innovations which seem to have reference mainly to matters of musical notation.² So highly was his learning esteemed by his contemporaries, that, when on a visit to Besançon, in 1458, he was asked to decide a controversy concerning the mode of the Antiphon 'O quanta exultatio angelicis turmis,' his decision that it was not, as commonly supposed, in mode IV., but in mode II., and that the mistake had arisen through a clerical error in the transcription of the final, was accepted by the assembled

savants as an authoritative settlement of the question.

Besides the collection of Dufay's MS. compositions among the Archives of the Sistine chapel, and the Vatican Library, Haberl has identified 62 in the Library of the Liceo Filarmonico, at Bologna; 25 in the University of the same city; and more than 30 in other collections. (See Q.-L. for list.³) The Ave Regina Coelorum is given, by Haberl, in the original notation of the old partbooks, and also in the form of a modernised score; together with a score of a 'Pange Lingua, a 3'; and some important examples are given among the posthumous Noten-Beilagen at the end of Ambros's *Geschichte der Musik*. The most valuable English study of Dufay is Stainer's *Dufay and his Contemporaries* (see Bibliography), containing a summary of the events of Dufay's life, with 19 compositions from a MS. in the Bodleian Library. The reprint of the Trent Codices will be found in *D.T.Ö.* vols. vii., xi. (i.), xix. (i.), xxvii. (i.), containing works by Dufay. (See also FAUXBOURDON.)

DUGAZON, (1) LOUISE ROSALIE LEFÈVRE (b. Berlin, June 18, 1755; d. Paris, Sept. 22, 1821), was daughter of a French ballet-master named Lefèvre, at the court of Prussia. She and one of her sisters began their career as ballet-dancers at the Comédie Italienne (1767), and Rosalie made her first appearance as a singer at the same theatre on June 19, 1774. Grétry had the greatest admiration for her dramatic talent: 'To try to praise Mme. Dugazon,' he says, 'is to attempt to explain nature' (*Mémoires ou essais sur la musique*). She married the actor, Dugazon, of the Comédie-Française, in 1776. One of her most remarkable creations was the part of Nina in Dalayrac's 'Nina ou la folle par amour' (Comédie Italienne, May 15, 1786). After an absence of three years during the Revolution, she reappeared in 1795, and played with unvarying success till 1804, when she retired. The classes of parts in which she excelled were long known as 'jeunes Dugazon' and 'mères Dugazon.'

DUIFFOPRUGCAR, GASPARD (b. circa 1514; d. circa 1570), musical instrument-maker. A native of Bavaria, he is said to have attracted the notice of François I. and to have been persuaded by him to settle in Paris. He seems, however, to have worked continuously at Lyons. His viols were remarkable for their elaborate inlaid work. A notable example of his work is a bass-viol, now belonging to the Brussels Conservatoire, on the back of which is a plan of the city of Paris made of different coloured inlaid woods. This instrument belonged early in the 19th century to J. B. VUILLAUME (q.v.) of Paris, who ornamented some of his violins and violoncellos with inlaid work after the manner of Duiffoprugcar's viols. It is sometimes stated that Gaspard Duiffoprugcar made violins, but this is an error. After his death the business was carried on for some years by his son John and other members of the family. A portrait of Gaspard was engraved at Lyons by Pierre Wocriot and published in 1562.

E. H. F.

DUKAS, PAUL (b. Paris, Oct. 1, 1865), one of the most distinguished of the present generation of French composers.

He entered the Conservatoire in 1882, and was a pupil of Mathias, Th. Dubois and Ernest Guiraud. He gained a second Grand Prix de Rome, for his cantata 'Velléda.' At that time he had already composed two overtures, 'King Lear' and 'Götz von Berlichingen,' which remained unpublished. These were followed, after a period of fruitful study, by other works, melodies, choruses, symphonic and dramatic sketches, all unpublished.

In 1892 an overture to 'Polyeucte' was performed at one of the Lamoureux concerts. This work interpreted in a remarkable way the poetic substance of Corneille's tragedy. The influence of Wagner, so understandable at that period, could not obscure Dukas's striking qualities of delicacy. These qualities had already attracted the attention of the discriminating, and led them to consider Dukas as one of the young French musicians for whom a great future was in store.

There followed in 1896 the symphony in C major, conducted at the concerts of the Opéra in Paris by Paul Vidal, to whom it was dedicated. It is distinguished by a youthful ardour, which does not exclude a style of lofty feeling and a strong structure, in which some prolixity of development may be criticised. Without detracting from the charm of the

other movements, the andante surpasses them by the quality of its emotion and the finished purity of its style.

'L'Apprenti sorcier,' the most renowned of Dukas's works, which he conducted in the following year (1897) at the Société Nationale de Musique, was very soon accepted in the concert repertoires of all countries. In England, it was played for the first time in May 1899 at the London Musical Festival. It is a symphonic poem in the form of a scherzo, or it may be taken as a comment at will on the mordant Ballad of Goethe; but nevertheless it is a work logically built up, carrying its sense within itself, well worthy, with its ironic rhythm, its furious animation, and its brilliant instrumental writing, to remain as one of the models of a difficult style. In 1901 and 1903 there appeared two works which occupy an important place amongst modern compositions for the piano: the imposing sonata in E flat minor, which carries a hint of Beethoven, and the 'Variations, Interlude and Final' on a theme of Rameau, which has an altogether tender character, enticing, touching, nimble, showing a mastery of traditional forms united with brilliance of writing and depth of personal feeling. The same delicacy of language, the same fullness of poetic sentiment is found again in the shorter pieces composed for special occasions: 'Villanelle' (horn and piano, 1906), for a conference at the Conservatoire; Vocalise (1909), in the second volume of the 'Vocalises-Études,' collected by Hettich in the Leduc edition; 'Prélude élégiaque' (piano, 1909), on the occasion of Haydn's Centenary; 'La Plainte au loin du faune' (piano, 1921), a striking homage to the memory of his friend, Claude Debussy; 'Sonnet de Ronsard' (voice and piano, 1924), written for the fourth centenary of the poet, full of subtle and flavoured archaism.

But it is, without question, in the sphere of dramatic music that Dukas has given so far the most complete expression to his art. After having undertaken the poem and the score of a Hindu drama, 'L'arbre de science,' he put it aside to devote himself altogether to a piece which Maurice Maeterlinck had conceived with him in view, 'Ariane et Barbe-Bleue.' This is a lyrical story in three acts (Paris, Opéra-Comique, 1907), which gained a considerable artistic success. Since then, the work has been performed at Milan, New York, Vienna, Madrid, Nice, Frankfurt, Turin, Bologna, Trieste, Buenos-Aires, Zürich and Bâle. An English translation of the score has been published (Durand). The character of Ariane symbolises the liberating pity which struggles against the enslavement and feebleness of humanity, and which endeavours to educate towards a higher consciousness those souls which are not yet sufficiently developed to understand its signifi-

ance. Through the touching humanity of the principal figure, the variety of the successive scenes, the nature of the dialogue, the poem (although lacking the violent *coups de théâtre* dear to Italian realists) gives a great opportunity to the music. And indeed the music becomes the inspiration of the drama, the soul and being of the work. This music has a clarity and a rare depth, inspired by an emotion which is well balanced throughout. One may call to mind here in the first act the first chorus; the brilliant variations accompanying the rustle of precious stones which fall from the doors opened by Ariane; the striking colour of the underground song, sung by Bluebeard's wives; the sudden apparition of Bluebeard himself; and in the second act, the poignant scene between Ariane and the imprisoned women; their deliverance: their ecstasy before the sudden glow of the daylight; before the beauty of the country and of the sea. Above all, in the third act, after the tragic return of the tyrant, the indescribable eloquence of Ariane's departure, where she sings with such dignity and serenity, with solemn and trembling feeling; whilst the wives, who dare not follow their liberator, choose rather to take up again the daily slavery of their existence. This is a profoundly moving scene, where the loftiness of the thought attains that equilibrium in which an art completely realises its goal of human expression. One recognises something of the spirit of 'Parsifa,' recreated by a later technique, by an altogether individual temperament, strengthened by a profound knowledge of classical tradition, and of the most modern musical language, not forgetting that of 'Pelléas et Mélisande,' of which from the first moment Dukas was a convinced admirer.

The 'Poème dansé' of the 'Péri,' represented in Paris (1912), with the Russian dancer, Mlle. Trouhanova, then at the Opéra, has been played often at concerts. It represents under a new aspect a conception of the relationship between music and dancing which approximates to that in the second version of the Venusberg in 'Tannhäuser.' Inspired by a poetic, oriental legend, preceded by a striking fanfare of horns, the music of the Péri unites once again the deep feeling and ardour of perception with the originality of a form which is always plastic and symphonic, the result of intense poetic feeling. The instrumentation of these works reveals the hand of a master; by turns light, subtle, lustrous, sumptuous, always solid and firmly built up. Thus the virtues of Dukas's spirit and art are maintained at an equal level, and adapt themselves to different subjects.

Dukas helped C. Saint-Saëns to finish 'Frédégonde,' the uncompleted opera of his master, Guiraud (Paris, 1895), of which he orchestrated the three first acts. He contri-

buted to the modern edition of the works of Rameau (Durand), in re-editing: 'Les Indes galantes,' 'La Princesse de Navarre,' 'Les Fêtes de Ramire,' 'Nélie et Myrthis,' 'Zéphyre.' He revised 'Les Goûts réunis' (Couperin), the 'Essercizi per gravicembalo' (D. Scarlatti), the sonatas for piano, piano and violin, the variations for piano, the concerto for violin, the trios of Beethoven (Durand). He made an arrangement of 'Samson and Delilah' (4 hands), and of the 'Venusberg' music (2 pianos, 4 hands). He is a musical critic of manifest authority, a notable writer; he has contributed to *La Revue hebdomadaire* (1892-1902), *Chronique des Arts* (1894-1903); *Gazette des Beaux-Arts* (1894-1903); and now to the *Quotidien*. He has also written numerous articles for the *Courrier musical* and the *Revue musicale*, proving the uncommon acuteness of his mind and the independence and liberality of his views. He is a member of the Conseil Supérieur of the Conservatoire; inspector of the Beaux-Arts (musical department), and an officer of the Légion d'honneur. He was professor of the orchestral class at the Conservatoire (1910-12). Dukas counts among those musicians of whom to-day France has the greatest reason to be proud.

DUKE, RICHARD (fl. circa 1750-80), has been considered one of the best of the Stainer and Amati copyists at this period, and his high reputation amongst English violin makers is amply justified by the genuine examples of his work, but unfortunately it became the fashion to affix his name to a large number of spurious instruments of very poor quality. He worked, as his labels state, 'near opposite Great Turn-Style, Holbourn, London.'

E. H. F.

DUKELSKY, VLADIMIR (b. Parifanovna, near Polotzk, N. Russia, Sept. 27, 1903), composer, belongs to a family settled at Kieff. One of his grandparents is directly descended from the kings of Georgia, and another is Spanish. At six years of age he attempted to write a ballet. He studied composition at Moscow and Kieff under Glière and Yavorsky. He left Russia in 1920 and spent two years in Constantinople, after which he migrated to America, where he became acquainted with George Gershwin, the composer of the 'Rhapsody in Blue' and innumerable ragtime pieces. His overture 'Gondla' was produced at Carnegie Hall. In May 1924 he returned to Europe with a piano concerto, dedicated to Arthur Rubinstein, which he played to Diaghilev, with the result that he was at once commissioned to write the ballet 'Zephyr and Flora.' This was composed in June at Choisei (Seine-et-Oise) and

completed the following November at Monte Carlo, where it was produced Apr. 28, 1925. His present style is contrapuntal and almost classical in construction, despite the freedom of the part-writing.

WORKS

Overture to 'Gondia,' drama by N. Gumileff. 1922.
'Triplets for the North,' Song-cycle (5 triplets by Fedor Sologoub), voice and P.F. 1922.
Three Songs, voice and P.F. 1920-23.
Concerto in C maj., P.F. and orch. 1923.
'Zephyr and Flora,' Ballet. 1924.

DUKE OR DEVIL, farcical opera in one act, text by Ivor Gatty, music by Nicholas Gatty. Produced (Moody-Manners Co.) Gaiety Theatre, Manchester, Dec. 16, 1909.

DULCIANA, virtually an open diapason organ stop of small scale and pleasing tone.

DULCIMER (Fr. *tympanon*; Ger. *Hackbrett*; Ital. *cembalo*, *timpanon*, *salterio tedesco*), the prototype of the pianoforte, as the psaltery was of the harpsichord. These instruments were so nearly alike (see **PSALTERY**) that one description might serve for both, were it not for the different manner of playing them, the strings of the dulcimer being set in vibration by small hammers held in the hands, while in the psaltery the sounds were produced by plectra of ivory, metal or quill, or even the fingers of the performer. It is also no less desirable to separate in description instruments so nearly resembling each other on account of their ultimate development into the harpsichord and pianoforte by the addition of keys. (See **HARPSICHORD**, and **PIANOFORTE**.)

Dr. Rimbault (*Pianoforte*, p. 23) derives dulcimer from 'dulce melos.' Perhaps the 'dulce,'—also used in the old English 'dulsate' and 'dulsacordis,' unknown instruments unless dulcimers—arose from the ability the player had to produce sweet sounds with the softer covered ends of the hammers, just as 'piano' in pianoforte suggests a similar attribute. The Italian 'salterio tedesco' implies a German derivation for this hammer-psaltery. (See **CEMBALO**.) The roughness of description used by mediæval Italians in naming one form of psaltery 'strumento di porco,' pig's head, was adopted by the Germans in their faithful translation 'Schweinskopf,' and in naming a dulcimer 'Hackbrett'—a butcher's board for chopping sausage-meat.

The dulcimer is a trapeze-shaped instrument of not more than three feet in greatest width, composed of a wooden framing enclosing a wrest-plank for the tuning-pins, round which the strings are wound at one end; a sound-board ornamented with two or more sound-holes and carrying two bridges between which are the lengths of wire intended to vibrate; and a hitch-pin block for the attachment of the other ends of the strings. Two, three, four and sometimes five strings of fine brass or iron wire are grouped for each note. The dulcimer, laid upon a table or frame, is struck with hammers,

the heads of which are clothed on either side with hard or soft leather to produce the forte and piano effects (see **PLATE I.**).

The tone, harsh in the loud playing, is always confused, as there is no damping contrivance to stop the continuance of the sounds when not required. This effect is well imitated in various places in Schubert's 'Divertissement à la Hongroise.' The compass of two or three octaves, from *c* or *d* in the bass clef has always been diatonic in England, but became chromatic in Germany before the end of the 18th century. English dulcimers have ten long notes of brass wire in unison strings, four or five in number, and ten shorter notes of the same. The first series, struck with hammers to the left of the right-hand bridge, is tuned

the F being natural. The second series, struck to the right of the left-hand bridge, is

the F being again natural. The remainder of the latter series, struck to the left of the left-hand bridge, gives

This tuning has prevailed in other countries, and is old. Chromatic tunings are modern and apparently arbitrary. As in most mediæval musical instruments ornamentation was freely used on the sound-board, and on the outer case when one existed. The dulcimer and psaltery appear to have come to us from the East, it may be through the Crusades, for the dulcimer has been known for ages in Persia and Arabia, and also in the Caucasus, under the name of 'santir.' Its European use is now limited to the semi-oriental gipsy bands in Hungary and Transylvania. The Magyar name is 'cimbalom.' Compare also the Celtic 'timpan.' Carl Engel (*Descriptive Catalogue*, 1874) points out the remarkable resemblance between an Italian dulcimer in South Kensington Museum of the 17th century and a modern Georgian santir; and refers to the use by the translators of the English Bible of the word 'dulcimer' as well as of the names of other instruments common in the Elizabethan epoch, to represent Hebrew musical instruments about which we have no sure knowledge. For a description of Pantaleon Hebenstreit's development of the instrument see **PANTALEON**. (See also **SCHROETER**.) A. J. H.

DULCITONE (Fr. *typophone*), a keyboard instrument somewhat similar in effect to the **CELESTA** (*q.v.*), in which graduated steel tuning-forks are struck by hammers. The compass is usually five octaves from bass A. The same

principle was employed in the 18th century by Charles Clagget in his *Aiuton* or Ever-tuned organ. (See CLAGGET.)

DULCKEN, MADAME LOUISE (b. Hamburg, Mar. 20, 1811; d. London, Apr. 12, 1850), a pianist, younger sister of Ferdinand David.

She was the pupil of Willy Grund, and made her appearance in public at Hamburg as early as her tenth year. In 1823 she played at Berlin, and in 1825 with her brother at Leipzig, always with the greatest success. In 1828 she married, and left Germany for London, where she resided for the rest of her life. Her first public appearance here was at one of Ella's soirées in 1829. At the Philharmonic she played a concerto of Herz's on Mar. 1, 1830, and thenceforward was one of the most prominent features in the music of London. She was an executive pianist of the first order. G.

DULICHUS, PHILIP (b. Chemnitz, 1562; d. Stettin, Mar. 25, 1631), was teacher of music in the Pädagogium at Stettin from 1587, and held the degree Ph.D. of Chemnitz. His compositions seem to have been highly thought of by his contemporaries.

LIST OF WORKS

1. *Cantiones quinque sensu vocibus compositae*. . . Philippo Dulichio Chemnicensi Hermunduro, illustra Pedagogi Stettinensis Musico. Stettin. Kellner. 1599. Obl. 4to. Six partbooks in B.M.
2. *Philomelicus omnis et singulis domile et amicis suis colenda, haec quatuor octavarum vocum cantiones sacras concinat*. Stettin. Kellner. 1599. Obl. 4to. Eight partbooks in Rostock Universitätsbibli.
3. *Harmonice aliquot septenis vocibus compositae*. (1) Laudate Dominum. (2) Venite ad me. (3) Delectare a Domino. (4) Erravi sicut ovis. (5) Quaeite primum. Auctore P.D. Chem. illus. Pedag. Stet. Musico. Stettin. Andreae Kellneri. 1593. With:—
Quatuor Cantionum. P.D. Chem. Four motets for 8 v. (1) Exultate le. (2) Exultate iusti. (3) Confitemini Domino. (4) Deus miseretur. Eight partbooks, obl. 4to. in the Zwickau Bibl.
4. *Six cantiones sacrae quibus vocibus concinnatae et in lucem editae studio P.D. Chem. illus. Pedag. apud Stettinenses musico*. Stettin. Kellner. 1593. Obl. 4to. Five partbooks in B.M.
5. *Passionis novae continens Dieta insigniora ex evangelis, dierum cum festorum tum Dominicorum, intra Pentecostes et Adventus ferias cententorum desumpta et quinarum vocum concentu X.II. Glareani modis indubitatis attempore, exornata studio P.D. Chem. Herm. illus. Pedag. quod Stettin est, Musico. Stettin. in officina Kellneriana. 1598. Obl. 4to. Five partbooks in the Brig Gymnasialbibl. Another edition was published in 1609: . . . ex evangelis totius anni desumpta quibus vocibus concinnata. Auctore P.D. Stettin. 4to.*
6. *Novum opus musicum duarum partium. Continens dicta . . . tum Dominicorum praecipuorum totius anni, desumpta: . . . accurate exornata. In Commaeinae Ecclesiae Dei usum compositum, atq. jam primum editum a P.D. Chem. Herm. illus. Pedag. quod Stettin Pomeraniae est, musico. Stettin. in officina Myllana. 1599. Obl. 4to. Five partbooks in the B.M. This must have been a rival edition to that of 1598 (No. 5). Another edition was published in Leipzig. 1609. 4to.*
7. *Hymenaeus VII vocum in solemnibus nuptiarum*. . . Christophori Abini . . . compositus a P.D. illus. Pedag. Stet. Musico. Stettin. Typis Myllanis. Oct. 14, 1606. 4to. Text: *Dilectus meus iugitum*. Three partbooks in Breslau Univ. Bibl.
8. *Hymenaeus VII vocum solemnibus nuptiarum*. . . Guilhelmi Simonis . . . virginem Elisabetham . . . Fridrici . . . illam. Auctus a P.D. illus. Pedag. Stet. Musico. Stettin. Nov. 18, 1606. Text: *Ego flos campi & lilium*. Six partbooks in one vol. 4to in the Zwickau Bibl.
9. *Prima pars Centuria octonum et septenum vocum harmonias sacras laudibus sanctissime triados consecratae continentia accurata diligentia adornata*. . . a P.J. Chem. illus. Pedag. Stet. Musico. Stettin. Job. Duber. 1607. 4to.
10. The same: *Secunda pars*. Stettin. Myllandrinia. 1608.
11. The same: *Tertia pars*. Stettin. Myllandrinia. 1610.
12. The same: *Quarta pars*. Stettin. Kellneriana. 1612. A complete set in eight partbooks of the four volumes is in the Berlin Königl. Bibl. Other editions were published in Leipzig and Danzig in (?) 1608, 1610, 1619.
13. *Dictum Psalmi: 30*. Stettin. 1611. 4to. Eight partbooks in the Archiv der Marienkirche Elbing.
14. *Primum tomus Centuria senarum vocum harmonias sacras laudibus sanctissime Triados consecratae continentia*. Stettin. Georg. Gretschili. 1630. 4to. Six partbooks in the Archiv der Marienkirche, Elbing.

Vollhardt (p. 18) mentions the following MS. motets as being in the Zwickau Library:

1. *Deus parentum meorum* (s 8). 2. *Quam magnifica sunt* (s 8). 3. *Lobet den Herrn* (s 8). 4. *Steh wie fein u. lieblich* (s 8).

5. *Deus in adiutorium meum* (s 8). 6. *Ehre sei Gott dem Vater* (s 7). 7. *Zion spricht: der Herr hat mich verlassen* (s 8).

There are two copies of 'Quaeite primum regnum' (a 7) in the Breslau Stadtbibl. MS. 30 (Bohn). Dulichius's motet 'Exultate justi in Domino' (a 8) was included in the Bodenschatz collection 'Florilegium selectis, cationum,' Lipsiae, 1603; and again in the 1618 edition. C. S.

DUMANOIR, (1) GUILLEAUME (b. Paris, Jan. 16, 1615; d. there, end of 17th cent.), son of a violinist, succeeded L. Constantin as 'roi des ménétriers,' Nov. 20, 1657. The degrading intrigues, connected with the revenues of the Confréries de St. Julien (see ROI DES VIOLONS), of which he was the head, attempting to compel dancing masters to pay a tribute to the guild, which they resisted, caused him to write the coarsely worded pamphlet, 'Le Mariage de la musique avec la danse' (1664; republ. 1870). His dance music, which Louis XIV. greatly appreciated, procured for him the appointment of ballet-master of the pages. The suites of the Cassels MS. signed 'G. D.' which Écorcheville published as those of Dumanoir, are probably by G. Diesener; but some of Dumanoir's compositions are in the Upsala library. He was succeeded as 'roi des ménétriers,' in 1668, by his son, (2) GUILLEAUME (d. 1697), who presided at the Confrérie de St. Julien until 1693. He engaged in a long quarrel with Lully on account of a privilege accorded to the latter to train orchestral musicians, which was decided by law in 1673 in Lully's favour. Dumanoir's subsequent renewed quarrels with the dancing masters in which he was equally unsuccessful, led to his resignation in 1685. Of a number of dances which have been preserved, it is impossible to ascertain the authorship except in the case of a suite of 3 five-part airs, entitled, 'Charivaris,' which is dated 1648, and therefore attributable to Dumanoir (1). E. v. d. s.

DUMERY, (1) JORIS (GEORGE) (b. Hooff, 1699; d. 1784), one of the greatest founders of bells.

In 1736 he was registered as a burghess of Antwerp. In 1743 he was invited by the Bruges authorities to reside there. They held him in such esteem that they provided him with a house to live in, and also with a site on which to set up his bell foundry. The reason of this was the necessity of recasting their carillon which had been destroyed by fire.

Dumery accepted the terms, and used the old bell metal from the conflagration to cast the new carillon. These bells were unsatisfactory, and were eventually sold in Amsterdam. The fault was undoubtedly due to the impurity of the old metal, into which no doubt many foreign substances had become incorporated. With all new metal his second attempt produced the present fine carillon of Bruges, which

is second to none in the Netherlands. It has been made famous by the verse of Longfellow, and it is worthy of its reputation. It will ever remain the masterpiece of Dumery.

Joris left his son (2) WILLIAM (*d.* 1795) to continue his work. William left two sons, (3) WILLIAM and (4) JAMES (*d.* 1836).

James continued the business till his death, when his widow carried on the foundry with indifferent success and died at Bruges in 1855.

W. W. S.

DUMKA (pl. Dumky, 'lament'), a term introduced into the terminology of cosmopolitan music by Dvořák, in whose chamber music it is of frequent occurrence as the name of a movement of melancholy character in more or less slow tempo. His op. 90, a trio for piano and strings, is called 'Dumky,' and consists of a series of short movements linked together by a common bond of poignant expression. In a footnote the term is explained as a Little Russian word, occurring frequently in popular literature, and generally indicating a passionately emotional character.

M.

DUMONT, HENRY (*b.* Villers l'Évêque, near Liège, c. 1610; *d.* Paris, May 8, 1684), was a choir-boy at Maestricht, but returned to Liège, where he entered the priesthood. From 1639-1684 he was organist at St. Paul's, Paris, and in 1665 director of the court chapel, Paris, and canon of Maestricht Cathedral. He composed 5 'Messes royales en plain chant,' 5 books of 2-4-part motets with instruments (1652-86), 2-part motets edited by Philidor l'aîné (1690); cantica sacra 2, 3, 4 v.; *Airs à 4 parts*, etc.; 3 books of meslanges (chansons, motets, Magnificats, preludes for organ and for viols, and serenades). (For titles of biographies, see *Riemann* and *Q.-L.*)

E. v. d. S.

DUMP, a piece of music of a melancholy cast, probably synonymous with LAMENT (*q.v.*). In 17th- and 18th-century books of instrumental music the name is occasionally met with as a title to a piece; for example, 'The Irishe Dumpe' in the 'Fitzwilliam Virginal Book.' The following is a late instance from S. Holden's

An Irish Dump.

Collection of Old Established Irish Slow and Quick Tunes, vol. i. It is named 'An Irish

Dump.' An arrangement of this tune to words by Joanna Baillie was made by Beethoven.

F. K.

DUN, FINLAY (*b.* Aberdeen, Feb. 24, 1795; *d.* Edinburgh, Nov. 28, 1853), viola-player, teacher of singing, musical editor and composer, in Edinburgh. He studied abroad under Baillot, Crescentini and others, and played first viola in the orchestra of the San Carlo theatre, Naples.

Besides two symphonies (not published), solfeggi, and scale exercises for the voice (1829), he edited, with Professor John Thomson, 'Paterson's Collection of Scottish Songs,' and took part also with G. F. Graham and others in writing the pianoforte accompaniments and symphonies for Wood's 'Songs of Scotland'; he was editor also of other Scotch and Gaelic collections.

W. H^s.

DUNCAN, WILLIAM EDMONSTOUNE (*b.* Sale, Cheshire, 1866; *d.* there, June 26, 1920), composer, became an associate of the R.C.O. at the age of 16, and obtained an open scholarship at the R.C.M. on the foundation of that institution in 1883. There he studied under Parry and Stanford, and after leaving the college studied with Macfarren for some little time.

He spent ten years in London, acting as musical critic, etc., and was for some time professor at the Oldham College of Music. The most remarkable of his early compositions was an overture performed at Hampstead in June 1888, op. 4. An ode for chorus and orchestra, 'Ye Mariners of England,' made a great success when given by the Glasgow Choral Union in 1890; a Mass in F minor was composed in 1892; and in the same year an opera, 'Perseus,' was written. Swinburne's 'Ode to Music' was set in 1893; and Milton's sonnet 'To a Nightingale,' for soprano solo and orchestra, in 1895. In that year a trio in E minor was given at Oldham, and various other works show untiring ambition and much musical skill. (*Brit. Mus. Biog.*) Among his literary works on music of a useful, popular kind are *The Story of Minstrelsy* (1907) and *The Story of the Carol* (1911).

DUNHILL, THOMAS FREDERICK (*b.* Hampstead, Feb. 1, 1877), composer, teacher and lecturer. He received his musical education at the R.C.M., which he entered in 1893, studying the piano with Franklin Taylor, and composition with Stanford.

In 1897 he was awarded a scholarship for composition, and several early works of his were performed at the College concerts. From 1899-1908 he was assistant music-master to Dr. C. H. Lloyd at Eton College, at the same time holding other posts as teacher and examiner, notably of harmony and counterpoint at the R.C.M. In 1907 he instituted a series of concerts, of which the special function

was to revive works by young British composers, which had already been played for the first time and then laid aside. His chamber concerts were continued in London through several years, and at them many of his own works were heard together with those of his contemporaries.

Dunhill first made his name as a composer of well-written concerted chamber music. Three quintets—one in E flat for piano, violin, violoncello, clarinet and horn, one in F minor for strings and horn, and one in C minor for piano and strings—are the work of a serious mind devoted to classical principles of structure. A quartet, piano and strings, in B minor, two phantasy trios (piano and strings), a sonata in D minor for violin and piano, variations for violoncello and piano, alike show his knowledge of what is suitable for expression in various forms of chamber music, knowledge which took literary form in his important book, *Chamber Music* (1913). From time to time he has written some charming songs, amongst which 'The Cloths of Heaven' and 'The Fiddler of Dooney' are most widely known, and also children's cantatas, operettas and other educational pieces (see list *B. M. S. Ann.*, 1920). Later he turned his attention more to the orchestra, and two works deserve particular mention—a set of elegiac variations on an original theme, written in memory of Sir Hubert Parry and produced at the Gloucester Festival, 1922, and a symphony in A minor (four movements) produced at Belgrade by the composer during a continental concert tour, and in England at the Bournemouth Festival, Apr. 1923. A one-act opera, 'The Enchanted Garden,' was awarded publication by the Carnegie Trust in 1925, and was given in more or less amateur conditions at Liverpool in the following year. G. S. K.-B.; addns. C.

DUNI, EGIDIO ROMOALDO (b. Matera, near Naples, Feb. 9, 1709; d. Paris, June 11, 1775), composer of Italian and French operas. The son of a maestro di cappella he studied at several of the Naples Conservatoires and then went to Rome where his first opera, 'Nerone,' was so successful that it triumphed over a much better work, Pergolesi's 'Olympiade,' which came out about the same time. Shortly afterwards he visited Vienna, but returning to Italy he was made maestro di cappella at S. Nicolò di Bari, in Naples. He then visited Venice, Paris, London (1744), and Genoa, composing industriously wherever he went, but finally became tutor at the court of Parma. In 1755, being encouraged by the Duke, he composed a French opera, 'Ninette à la cour,' which was so successful that he settled in Paris two years later. His music was light and graceful in style, and the 20 operas he wrote at Paris, usually to a comic libretto, from 1757 until his death, were so successful that he may be re-

garded as one of the founders of French light opera and opéra-bouffe. (See Q.-L.) J. M^k.

DUNSTABLE (DUNSTAPLE), JOHN (d. Dec. 24, 1453), musician, mathematician and astrologer, has generally been said to be a native of Dunstable, in Bedfordshire. For this there is no authority, and the evidence of his bearing the same name as that of the town is of no weight so late as the 15th century. On Mar. 16, 1449, the manor of Broadfield, Herts, was conveyed to a John Dunstable, Margaret his wife, and others,¹ and it is not impossible that this was the musician. The owner of Broadfield might well have been acquainted with the Abbot of St. Albans, in the same county, and that John Whethamstede (Abbot from 1420–40 and again from 1451–65) personally knew Dunstable the musician may be gathered from the epitaph printed below. Another John Dunstable, a goldsmith and citizen of London, mentioned in the Patent Rolls (1 Edw. IV. *Calendar*, p. 6), was living in 1461, and therefore cannot have been the musician. Of Dunstable's life absolutely nothing is known, but he has long enjoyed a shadowy celebrity as a musician, mainly owing to a passage in the Prohemium to the *Proportionale* of Johannes Tinctoris (1445–1511). The author, after mentioning how the institution of royal choirs or chapels encouraged the study of music, proceeds:

'Quo fit ut hac tempestate, facultas nostrae musices tam mirabile susceperit incrementum quod ars nova esse videatur, cuius, ut ita dicam, novae artis fons et origo, apud Anglicos quorum caput Dunstaple extitit, fuisse perhibetur, et huic contemporandi fuerunt in Gallia Dufay et Binchois quibus immediate successerunt moderni Okeghem, Busnois, Regis et Caron, omnium quos audiverim in compositione praestantissimi. Haec eis Anglici nunc (dicit vulgariter jublare. Gallici vero cantare dicuntur) veniunt conferendi. Illi etenim in dies novos cantus novissime inveniunt, ac isti (quod mirerrimi signum est ingenii) una semper et eadem compositione utuntur.'²

Ambros³ has shown conclusively how this passage has been gradually misconstrued by subsequent writers, beginning with Sebald Heyden in his *De arte canendi* (1540), until it was boldly affirmed that Dunstable was the inventor of counterpoint! Ambros also traces a still more absurd mistake, by which Dunstable was changed into S. Dunstan; this was the invention of Franz Lustig, who was followed by Printz, Marpurg and other writers.

It might have been considered that the claim of any individual to be the 'inventor' of counterpoint would need no refutation. Counterpoint, like most other branches of musical science, can have been the invention of no single man, but the gradual result of the experiments of many. Tinctoris himself does not claim for Dunstable the position which later writers wrongly gave him. It will be

¹ Channey. *Antiquities of Hertfordshire*, 1700, p. 72.

² Coussemaker, *Scriptores*, iv. 154.

³ *Geschichte der Musik*, ii. 470–1.

noticed that the 'fons et origo' of the art is said to have been in England, where Dunstable was the chief musician; and though Tinctoris is speaking merely from hearsay, yet there is nothing in his statement so incredible as some foreign writers thought. So long as the evidence of the Rota 'Sumer is ICMEN IN' is unimpeached, it must be acknowledged that there was in England, in the early 13th century, a school of musicians which was in advance of anything possessed by the Netherlands at the same period. (See MOTET and POLYPHONY.) An important light was thrown upon the relation of Dunstable to the Netherlandish musicians, Dufay and Binchois, by the discovery¹ that Dufay died in 1474, and not, as had been hitherto supposed, some twenty years before Dunstable. Binchois did not die until 1460, so it is clear that, though the three musicians were for a time contemporaries, yet Tinctoris was right in classing the Englishman as the head of a school which actually preceded the Netherlanders and Burgundians.

Dunstable's fame was certainly great, though short-lived. He is mentioned as early as 1437, in *Le Champion des Dames* of Martin Le Franc, and in two other treatises of Tinctoris, the *De arte contrapuncti*, and the *Complexus viginti effectuum nobilis artis musices*; in a MS. preserved in the Escorial (c. iii. 23), written at Seville in 1480,² the *Dialogus in arte contrapuncti* of John Hothby³ in the *Déploration de Guillaume Crétin sur le trépas de Jean Okeghem*⁴ and by Franchinus Gaforius, who in his *Practica musicae*⁵ (Milan, 1496) gives the tenor of a setting of 'Veni Sancte Spiritus' by the English composer.⁶ Yet he was—in his own country at least—so soon forgotten, that his name does not occur in Bale's *Scriptores Britanniae* (1550), and Morley⁷ quotes a passage from his motet 'Nesciens virgo mater virum' (no longer in existence), in which he has divided the middle of the word 'Angelorum' by a pause two Long rests in length, as an example of

'One of the greatest absurdities which I have seen committed in the dittyng of musick.'

The passage is doubtless absurd to modern ideas: but Dunstable's fault was not considered such at the time he wrote. Similar passages occur as late as Josquin's days.

The main difficulty of determining what ground there was for Dunstable's fame lay in the fact that up to the end of the 19th century very little of his work had been discovered or made accessible. Gaforius evidently was acquainted with a treatise by him, and the same work is quoted by Ravenscroft, from a marginal

note in whose *Briefve Discourse* (1614) we learn that Dunstable's treatise was on 'Mensurabilis Musica.' Until comparatively recent days it was thought that the fragments printed by Gaforius and Morley were all that remained of his works. But more than this has been preserved. A three-part song, 'O Rosa bella,' was discovered in a MS. at the Vatican by MM. Danjou and Morelot⁸ and another copy was subsequently found in a MS. collection of motets, etc., at Dijon. This composition has been scored by Morelot, and printed in his monograph *De la musique au XV^e siècle*.⁹ Its effect in performance, considering the period when it was written, is really extraordinary, and quite equal to anything of Dufay's. Besides these compositions the British Museum possesses three specimens of Dunstable's work. The first is apparently an enigma which has not yet been deciphered. It occurs in a MS. collection of Treatises on Music¹⁰ transcribed by John Tuck at the beginning of the 16th century. Owing to its being written at the end of fol. 18, and signed 'Qd. Dunstable,' an idea has arisen that it forms part of the preceding treatise, which has therefore been sometimes alleged to be the lost treatise; but this is not the case, for the treatise, as Coussemaker has shown, is that which is nearly always ascribed to John de Muris, and Dunstable's enigma is evidently written in to fill up the page. In a similar and almost identical MS. at Lambeth, transcribed by William Chelle of Hereford, the treatise of de Muris and enigma of Dunstable occur in the same juxtaposition. The second composition of Dunstable in the British Museum is to be found in a magnificent volume which formerly belonged to Henry VIII.¹¹ It is a three-part composition of some length, without words: the tenor consists of a short phrase which is repeated in accordance with the Latin couplet written over the part. It has been scored by J. F. R. Stainer, and is printed in the *Sammelbände* of the Int. Mus. Ges.¹² The third composition is a Kyrie¹³ different from the one catalogued in the article just mentioned.

But by far the most valuable collections of Dunstable's works are to be found in six volumes of manuscript music discovered at Trent by Haberl, and now belonging to the Ministry for Religion and Education at Vienna; in a volume in the Estensian Library at Modena (Cod. vi. H. 15); and a MS. (Cod. 37) in the Liceo Musicale of Bologna. The Trent MSS. have been edited and published by the Gesellschaft zur Herausgabe der Tonkunst in Österreich (see DENKMÄLER). The Modena MS. contains thirty-one motets by Dunstable; copies of these (made by the writer of this

article in 1892), together with collations and copies from the Trent and Bologna MSS., are now in the British Museum.¹ The motets at Bologna were issued in facsimile in the volume of *Early English Harmony* by the Plain-song and Mediaeval Music Society in 1897. In the MS. at Old Hall (Roman Catholic College of St. Edmund's), near Ware, No. 63 is a four-part setting of 'Veni Sancte Spiritus,' by Dunstable.² In addition to these may be mentioned a MS. collection of 15th-century Astronomical Treatises in the Bodleian at Oxford, which contains at p. 74:

'Longitudo et latitudo locorum praeclue in Anglia, secundum aliam antiquam scripturam de manu Dunstapil.'

At the bottom of the margin of the page the date occurs: 'Anno Gratiae 1438 die mensis Aprilis.' A valuable contribution to our knowledge of Dunstable is the article *Dunstable and the various settings of O Rosa bella* in the *Sammelbände* of the Int. Mus. Ges. vol. ii. p. 1. This article contains the most complete catalogue yet made (thematic) of the works of Dunstable now known to exist.³ (See also *Proc. of Mus. Assn.* vol. xvii. p. 79.)

Dunstable died on Dec. 24, 1453 (according to one version of the epitaph printed below),

and was buried in St. Stephen's, Walbrook, where, according to Stow,⁴ the following epitaph was inscribed on 'two faire plated stones in the Chancell, each by other.' It runs as follows:

'Clauditur hoc tumulo, qui cælum pectore clausit
Dunstaple I. juris Astrorum conscius illo
Iudice novit Hiramis abscondita pandere cœli.
Hic vir erat tua laus, tua lux, tibi musica princeps,
Quique tuas dulces per mundum sperserat onus,⁵
Anno Mil. Equater,⁶ semel L. trias iungito Christi.
Pridie natale sidus⁷ transmigrat ad astra,
Susciplant proprium civem cœli sibi cives.'⁸

Another epitaph is preserved in Weever's *Funeral Monuments* (1631), where it is quoted from a MS. in the Cottonian Library, containing a number of poetical epitaphs written by John of Whethamstede, Abbot of St Albans:

'Upon John Dunstable, an astrologian, a mathematician, a musitian, and what not.

Musicus hic Michaelus alter, novus et Ptholomeus,
Junior ac Athlas supportans robore celos,
Pausat sub cinere; mellior vir de muliere
Nunquam natus erat; vici quia labe carebat,
Et virtutis opes possedit unicus omnes.
Cur exoptetur, sic optandoque precetur
Perpetuis annis celebratur fama Johannis
Dunstapil; in pace requiescat et hic sine fine.'

Appended is an example of Dunstable's work. W. B. S.

³ In the Introduction to *English Carols of the Fifteenth Century* (1891) the editor remarked on the similarity of certain turns of phrase in the carols to the known works of Dunstable. Henry Davey, in his *History of English Music* (1896), improves this into the statement that 'both words and music of the carols are probably by Dunstable or Power.' This in turn is copied by Eltner, who includes these thirteen carols among the list of Dunstable's works in Q-L.

⁴ Stow's *Survey*, 1618, p. 425.

⁵ *I.e.* 'C. quater.'

⁶ The Incorporated Society of Musicians has re-erected a monument to Dunstable in St. Stephen's, Walbrook, Oct. 8, 1904, and restored thereon the inscription from the version given by Stow. The text is evidently corrupt, and the following is the text of the restored epitaph:

Clauditur hoc tumulo qui cælum pectore clausit
Dunstaple Joannes. Astrorum conscius ille
Iudice novit Urania abscondita pandere cœli.

⁷ Qu. 'natalis idus.'

DUNSTAN, RALPH, Mus.D. (b. Truro, Nov. 17, 1857), has published many educational works, notably in connexion with the teaching

Hic vir erat tua lams, tua lux, tibi musica princeps,
Quinque tuas dulces per mundum asperserat artes.
Anno Mli C. quater sonet L. tris Jungito Christi
Pridie natalem, sidus transmigra ad astra.
Pascipiant proprium cives coeli sibi cives.

A pamphlet on *The Dunstable Epitaph*, & propos of this restoration, was written by Dr. C. Maclean and published by Chadfield of Derby in 1904.

of sight-singing in which he has been active. A more distinctive achievement, however, is his composition of a series of liturgical masses in modal counterpoint on the plain-song of the Vatican and the Solesmes Graduals. Ten of these together with a 'Missa pro Defunctis' have been published (Curwen), and a copy was graciously accepted by the Pope. Dr. Dunstan is not a member of the Roman Communion.

his interest in liturgical music was aroused by Terry's exposition of it at Westminster Cathedral, from which he set himself assiduously to study the style of the old polyphony based on a plain-song foundation. c.

DUO, see DUET.

DUODRAMA, a kind of melodrama, of which Mozart speaks with enthusiasm and at some length in letters to his father from Mannheim and Kaisersheim in the end of 1778. The name would indicate a piece for two performers; and those which he heard—Benda's 'Medea' and 'Ariadne auf Naxos'—and that which he contemplated writing himself—'Semiramis'—appear to have been pieces in which spoken dialogue was accompanied by the orchestra. 'Not a note is sung,' says he, 'only spoken; in fact it is a recitative with instruments, only the actor speaks instead of singing' (Letter 120). There is no trace of 'Semiramis' having been composed, but Mozart acted on the idea in 'Zaide' (1780), which contains two long monologues treated *en mélodrame*. g.

DUPARC, ELISABETH, see FRANCESINA, LA.

DUPARC, MARIE EUGÈNE HENRI FOUQUES (b. Paris, Jan. 21, 1848), French composer, showed no particular disposition for music in his childhood. Whilst being educated at the Jesuit College of Vaugirard (Paris), he had César Franck as piano teacher, who gradually developed his musical taste. When studying for his legal examination, he only then began to devote himself to serious harmony studies, and afterwards to composition under Franck; together with Arthur Coquard and Albert Cahen, he was one of the earliest pupils of César Franck before the Franco-German war (1870-1871). His first published works were pianoforte pieces, 'Feuilles volantes' (1869). Possessing a rare power of self-criticism, he destroyed many compositions of value, including a sonata for pianoforte and violoncello (1867), 'Poème nocturne' (1873), 'Laendler' (performed at the Société Nationale, June 24, 1874). Among those which remain, a symphonic poem, 'Lénore' (1875), one of the best models of its kind, was performed at one of Padeloup's Concerts Populaires, Oct. 28, 1877. It was arranged for two pianos and for four hands on one piano by Saint-Saëns and Franck respectively. A 'nocturne' for orchestra, 'Aux étoiles,' was issued in 1910, and of late, a motet, 'Benedicat vobis Dominus,' 3 voices, has appeared. Duparc took an active part in the contemporary musical movement till 1885, in which year he was compelled by severe illness to give up all compositions and leave Paris. His actual abode is Switzerland. His 15 songs, which represent the best of himself, were all composed before 1885, but published long after. The first ones (1868) date from a time when his knowledge of harmony was immature. Following the tendencies of his friend A. de Castillon in the lyrical style,

Duparc created a few master-works that can be compared to those of Schubert and Schumann. As J. Tiersot justly wrote (*Un demi-siècle de musique française*, 1918), he has given French melody an impulse, an amplitude, a power, not surpassed since. To this can be added the expression of his innate dramatic sentiment which gives striking expression to his songs.

BIBL.—OCTAVE BÉRT, *Musiciens français d'aujourd'hui* (1921); ANDRÉ COCHUROY, *La Musique française*, 1st and 2nd ed., 1922-1924.

M. L. P.

DUPONCHEL, FRÈRE JACQUES (b. Douai, 17th cent.), a Franciscan monk; maestro di cappella at the Basilica of the Twelve Apostles, Rome, 1665; organist to Cardinal Richi at Osimo and at the cathedral there, 1665. He composed masses, psalms and sacred songs a 3, 4 and 5 v., which were greatly praised by Caifaleri (Q.-L.).

DUPONT, (1) AUGUSTE (b. Ensival, near Liège, Feb. 9, 1827; d. Brussels, Dec. 17, 1890), was educated at the Liège Conservatoire, and after several years spent in successful travel as a pianist was appointed in 1850 a professor of the Brussels Conservatoire.

His works for the pianoforte were numerous. A 'Concertstück' (op. 42) and a concerto in F minor (op. 49), both with orchestral accompaniment, are his most ambitious works. Among his solo pieces the best are 'Roman en dix pages' (op. 48), a set of short pieces showing the influence of Schumann in their structure, and 'Contes du foyer' (op. 12). His younger brother,

(2) JOSEPH (b. Ensival, Jan. 3, 1838; d. Brussels, Dec. 22, 1899), educated at Liège and Brussels, attained great distinction as an operatic conductor. He held posts of this kind successively at Warsaw (from 1867), Moscow (from 1871), and Brussels. At the last-named he was professor of harmony in the Conservatoire, and conductor to the Théâtre de la Monnaie, and the Association des Artistes Musiciens from 1872. In the following year he succeeded Vieuxtemps as director of the Concerts Populaires. During the final seasons of Gye's management of Italian Opera, Dupont conducted many of the most important performances given at Covent Garden. M.

DUPONT, GABRIEL (b. Caen, Mar. 1, 1878; d. Vésinet, Aug. 3, 1914), was the son of Achille Dupont, organist of St. Pierre, Caen.

He was a pupil of Ch. M. Widor, won the 2nd Prix de Rome, 1901; and gained his first success with the opera 'La Cabrera' (in 2 acts), which took, in 1904, the Szonozgno prize founded by the Milanese publisher.

Endowed with a fine dramatic temperament, Dupont also composed 'La Glu' (Cannes, 1910); 'La Farce du cuvier' (Brussels, 1912); and 'Antar,' a romantic story by Chekri-Ganem, which was being rehearsed at the opera when he died, and which was only to receive its first

performance, Mar. 14, 1921, under Chevillard. The scores of Dupont are full of life, movement and ardour, and keep a high musical level. The first act of 'Antar' is especially remarkable and representative of his noble and powerful art.

Dupont wrote also a string quartet, songs, 'Poème d'automne'; symphonic poems: 'Hymne à Aphrodite' and the 'Chant de la destinée,' the subject of which is indicated by a single verse by Laforgue, 'Berce-moi, roule-moi, vaste fatalité . . .'

'Les heures dolentes' (14 pieces for piano, of which several are orchestrated) are, as it were, his last legacy to posterity. In this music he sought both a means of expressing his emotions and something which might distract him from them. And it is this which makes them a collection of poignant confidences. F. R.².

DUPONT, two eminent violoncellists, brothers, the sons of a dancing-master and first dancer at the Opéra.

(1) JEAN PIERRE—'Dupont l'aîné'—(b. Paris, Nov. 27, 1741; d. Berlin, Dec. 31, 1818), violoncellist, was considered the best pupil of Berhaut.

He played with success at the Concert Spirituel in 1761, and was attached to the Prince de Conti's band until 1769, when he travelled to England, and in 1771 to Spain, and finally in 1773, on the invitation of Frederick the Great, settled at Berlin as first violoncello in the king's band, and after Frederick's death director of court concerts. After the battle of Jena, his post was abolished, but he continued to live at Berlin till his death. His pupil was the future king, Friedrich Wilhelm II. His compositions, which were not numerous, consist of music for his instrument. His tone on the violoncello was beautiful: he played the most difficult passages with ease; but he had not in his playing the large and expressive style which was so remarkable in his brother's playing.

He was eclipsed by his brother and pupil, (2) JEAN LOUIS (b. Paris, Oct. 4, 1749; d. there, Sept. 7, 1819), who made his début at the Concert Spirituel in 1768. The arrival of Viotti in Paris in 1782 inspired the latter to imitate the breadth and brilliancy of style of that great violinist, and thus to become the extraordinary player he was. About this time he made the acquaintance of Crosdill, and at his invitation visited London for six months. On the breaking out of the Revolution he joined his brother in Berlin, and entered the king's band. It was either with him or his brother—probably with him—that Beethoven played his two sonatas for piano and violoncello (op. 5) at the Prussian court in 1796. The younger Dupont returned to Paris in 1806 ruined by the war. He gave a concert in 1807 with Mlle. Colbran (the future Mme. Rossini) which created great enthusiasm. He

entered the service of the ex-King of Spain at Marseilles, but returned to Paris in 1812. At length fortune smiled on him; he appeared three times at the Odéon concerts during the winter of 1812-13; he was admitted into the private band of Marie Louise, then into that of the Emperor, and at length as professor into the Conservatoire, until its suppression in 1815. He remained afterwards a member of Louis XVIII.'s band. In the evening of his life he composed a great deal, but the work by which he will survive is his *Essai sur le doigtier du violoncelle et la conduite de l'archet, avec une suite d'exercices* (English and German translation). A sentence from this work exhibits the modesty of a great artist.

'Tout le monde connoît le coup d'archet martelé ou staccato; c'est une affaire de tact et d'adresse. Il y a des personnes qui le saisissent tout de suite, d'autres ne parviennent jamais à le faire parfaitement. Je suis du nombre' (p. 171).

He is considered as the originator of the modern technique of his instrument (see VIOLONCELLO-PLAYING). His violoncello, a Stradivari, became the property of Franchomme, who purchased it from his son for the enormous sum of 25,000 francs (£1000). (See Van der Straeten's *History of the Violoncello*.)

G.; addns. M. L. P.

DUPRÉ, MARCEL (b. Rouen, May 3, 1886), organist. His family has been devoted to music for more than a century. His paternal grandfather, Aimable Dupré, was organist of Saint-Macloa, Rouen, from 1848 to 1885; his maternal grandfather, Étienne Chauvière, was maître de chapelle at the Church of Saint Patrice, Rouen, for 30 years; his father, Albert Dupré, a pupil of Guilman, is founder and conductor of the choral society of Rouen, 'L'Accord parfait,' and has held with distinction since 1911 the post of organist of the great church of St. Ouen, Rouen (the church which inspired the 'Gothic Symphony' of Widor). Finally, his mother, Alice Dupré, is a remarkable pianist and violoncellist.

When Marcel Dupré was 10 years old (at the festival of the exhibition of 1896 at Rouen), he played from memory preludes and fugues of J. S. Bach; at 12 years old he was appointed titular organist of Saint-Vivien, Rouen; in 1901 the first of his important compositions was performed, a biblical oratorio 'Le Songe de Jacob,' upon a poem by his uncle, Henri Dupré. He became the most brilliant pupil of his time at the Conservatoire, Paris, and gained one after another the most coveted prizes. He won the first prize for piano-playing in Diémer's class (1905); the first prize for organ-playing in Guilman's class (1907); the first prize for fugue in Widor's class (1909); the Grand Prix de Rome, July 4, 1914. In 1906 Dupré was chosen by his master, Widor, to act as his assistant organist at Saint-Sulpice. From 1916 until 1922 he held with distinction the organist-

ship of Notre-Dame, during the enforced absence, owing to ill-health, of Louis Vienne.

In 1920 Marcel Dupré set the seal upon his reputation by playing from memory at the Paris Conservatoire, in ten concerts, the complete organ works of J. S. Bach. A distinguished public came to these concerts, which achieved a triumph. After the last recital, Widor did not hesitate to felicitate him publicly, saying:

'Combien cordialement nous vous remercions! Un regret toutefois, celui de ne pas voir ici celui de vos auditeurs qui eût été le plus intéressé à la question, le grand Jean-Sébastien lui-même. Ce fut à lui de vous remercier en vous serrant dans ses bras.'

As an improviser, those who have constantly heard him at Saint-Sulpice and at Notre-Dame admire his facility in playing in all contrapuntal forms; the inexhaustible fantasy with which he knows how to develop a theme, and the mastery with which he carries out a fugue. Of the perfect science of the great masters, Louis Vienne has written: 'Dupré knows how to unite the brilliance of imagination and harmonic richness with an entirely modern sensibility.'

His successes as a recitalist in England and America, 1920-25, must also be recalled.

As composer, Marcel Dupré has already published (Leduc) for the piano:

Six Preludes (op. 12).

Four Pieces (op. 19).

A Fantasy in 8 movements with Orchestra.

Other compositions include:

Motets (op. 9).

De Profundis (op. 18), for solo, choir, organ and orchestra.

Several 'collections' of 'Melodies' with piano or orchestral accompaniments.

A Sonata (op. 5), for violin and piano.

Pieces for violoncello and piano.

His work for the organ must be considered separately as that of a master profoundly imbued with classical culture, but who understands at the same time how to use with complete mastery all the most modern technical resources:

Three Preludes and Fugues (op. 7).

Fifteen 'Versets pour les Vêpres du Commun des Fêtes de la B.V.M.

'Coriège et Hitanie,' for organ and orchestra, the Scherzo (op. 17),

and 'Variations sur un Noël (op. 20).

'Symphonie-Passion,' for the organ (1924).

DUPREZ, GILBERT (b. Dec. 6, 1806; d. Passy, Sept. 23, 1896), tenor singer, was the 13th of the 22 children of a Paris perfumer. His first appearance was in 1820 as a boy treble in the incidental music to *Athalie*, composed by Féty, and produced at the Comédie-Française.

Having completed his studies under Choron at the Conservatoire, he made his début (Dec. 1825) as tenor at the Odéon, where Castil-Blaze was producing his translations of the favourite operas of Rossini and Weber. His success was

not great, and when the theatre closed in 1828 he went to Italy. At first he attracted little attention; but having altered his style and adopted the 'voix sombrée' he became speedily popular, and by his creation of the part of Edgardo in 'Lucia di Lammermoor' (Naples, 1835) placed himself at the head of the French dramatic singers of his time. He was engaged for the Opéra in Paris, and made his first appearance (Apr. 17, 1837) in 'Guillaume Tell.' During the eight years he remained at this theatre he created the principal tenor parts in 'Guido et Ginevra,' 'Benvenuto Cellini,' 'Le Lac des fées,' 'Les Martyrs,' 'La Favorite,' 'La Reine de Chypre,' 'Charles VII,' 'Dom Sébastien,' 'Otello,' 'Lucie' and 'Jérusalem' (a translation of 'I Lombardi'), as well as playing the parts created by Nourrit in 'La Muette,' 'Robert,' 'La Juive,' 'Les Huguenots' and 'Stradella.' His physical appearance was against him, and he had a propensity to over-gesticulation; but in spite of these defects he made his way as a tragedian, and was frantically applauded for his excellent declamation and the smoothness of his 'canto spianato.' His two most serious faults were said to be the abuse of the notes 'sombrees,' so prematurely wearing to the voice, and a habit of dragging the time. Duprez was professor of singing at the Conservatoire from 1842-50, and in 1853 founded an École spéciale de chant, which still exists, and has turned out many dramatic singers. He composed an oratorio, 'The Last Judgment,' a Requiem, and other sacred works, romances, chamber music, two masses, and eight operas, of which the best are 'Joanita' (1848), 'La Lettre au bon Dieu' (1851) and 'Jeanne d'Arc' (1857), though none of the eight have any originality. He also published *L'Art du chant* (1845) and *La Mélodie* (1873), two Methods which deserve to be better known. His *Souvenirs d'un chanteur* (1888) and *Récréations de mon grand âge* are very interesting. G. C.

DUPUIS, THOMAS SANDERS, Mus.D. (b. London, Nov. 5, 1733; d. there, July 17, 1796), received his early musical education as a chorister of the Chapel Royal under Bernard Gates, and subsequently became a pupil of John Travers, then one of the organists of the Chapel Royal.

He was elected a member of the Royal Society of Musicians on Dec. 3, 1758. He married, July 16, 1705, at St. George's, Hanover Square, Martha Skelton of Fulham. Many of his name occur in St. George's register. In 1773 or earlier he was organist of the Charlotte Street Chapel, near Buckingham Palace. On the death of Dr. Boyce, in 1779, Dupuis was appointed his successor as organist of the Chapel Royal. On June 26, 1790, he accumulated the degrees of Bachelor and Doctor of Music at Oxford. He died from

an overdose of opium at his house in King's Row, Park Lane (West's *Cathedral Organists*). He was buried on July 24, 1796, in the west cloister of Westminster Abbey. (*D.N.B.*) He published during his lifetime several sonatas and concertos for the pianoforte, some organ pieces, chants, anthems and glees. In the year after his death a selection from his cathedral music was published under the editorship of John Spencer, one of his pupils, to which his portrait is prefixed. W. H. H.

DUR, German for 'major' in reference to keys; the equivalent of 'minor' is 'moll.' For the use of the Latin term *durum* and *molle*, from which these are derived, see HEXACHORD.

DURÁN, JOSÉ (18th cent.), a Catalan composer, conductor of the opera at Barcelona, and of the private band of the Marqués de los Vélez. His 'Antigono' was given in 1760. 'Temistocles' (1762), an arrangement in Spanish of Metastasio's play, was written in less than a month 'owing to the non-appearance of what was expected from Italy.' Durán presumably studied at Naples, since he is described in the libretto as 'catalán, maestro de capilla napolitano' (v. Cotarolo y Mori, *Orígenes y establecimiento de la ópera en España*, Madrid, 1917). J. B. T.

DURAND (DURANOWSKY), AUGUSTE FRÉDÉRIC (b. Warsaw, c. 1770), violin-player.

After having received his first instruction on the violin from his father, a musician at the court of the king of Poland, he was sent in 1787 to Paris by a nobleman. Here he studied under Viotti, but appears not so much to have adopted the style of his master, as to have followed the bent of his own talent for the execution of technical *tours de force*. In 1790 he was first violin at the Brussels opera. In 1794 and 1795 he travelled in Germany and Italy, meeting everywhere with great success. Suddenly, however, discarding the violin, he entered the French army, and became adjutant to one of the generals. Owing to some misconduct he was imprisoned at Milan and had to quit the service. He then returned to the violin, and till 1814 led an unsettled life in Germany, continually changing his abode. He finally settled at Strassburg as leader of the band, and was living there in 1834.

According to Fétis, Paganini confessed that his peculiar style and many of his most brilliant and popular effects were to a considerable degree derived from Durand, whom he had heard when young. There can be no doubt that Durand's technical skill was extraordinary and his treatment of the violin full of originality. The full development of his talent appears however to have been impeded by his irregular habits of life. It is amongst other things related that he often had no violin of his own, and would play in public on any instrument he could get hold of, however bad. His com-

positions—concertos, airs variés and a number of smaller pieces for the violin—show him to have been but an indifferent musician. P. D.

DURAND ET FILS, A., French music publishers, are the present representatives of the firm of Flaxland, founded in 1847, and continued from 1870–91 as Durand et Schoenewerk.

(1) MARIE AUGUSTE (b. Paris, July 18, 1830; d. there, May 31, 1909), composer and organist in various Paris churches, was a fellow-student of Saint-Saëns and Franck at the Paris Conservatoire.

His son (2) JACQUES (b. Paris, Feb. 22, 1865), replacing Schoenewerk from 1891, is, together with RENÉ DOMMANGE, the present (1926) manager of the firm.

MM. A. Durand are the publishers of nearly all the works of Saint-Saëns, and of many of Lalo, Massenet, Widor, Fauré, Franck, Bizet, Castillon, and more recently of Vincent d'Indy, Chausson, Dukas, Debussy, Ropartz, Ravel, etc. They have also published French editions of 'Lohengrin,' 'Tannhäuser' and the 'Flying Dutchman' of Wagner; and have undertaken a complete critical edition of Rameau, under the direction of Saint-Saëns, provided with bibliographical information by Ch. Malherbe. L. Diémer's series of *Clavecinistes français*; Th. de Lajarte's *Airs à danser* (from French operas of the 17th and 18th centuries); an album of *Chansons populaires du Vivarais* noted by Vincent d'Indy; the well-known *Échos du temps passé* (ed. by Weckerlin); collections of airs of different countries; the valuable collection of motets, etc., published under the title *Échos du monde religieux* have also been issued by this firm, as well as numerous methods and treatises in every branch of musical knowledge. The 2nd volume of *Quelques souvenirs d'un éditeur de musique* (2 vols.) was published in 1925.

G. F.; addns. M. L. P.

DURANTE, FRANCESCO (b. Frattamaggiore, near Naples, Mar. 15, 1684; d. Naples, Aug. 13, 1755), was a pupil of the Conservatorio dei Poveri di Gesù Cristo under Gaetano Greco, and subsequently of the Conservatorio di San Onofrio under Alessandro Scarlatti.

He is generally supposed to have gone to Rome, and studied there under Pitoni and Pasquini; but documentary evidence for this statement is not forthcoming. He is said to have succeeded Scarlatti as head of the Conservatorio San Onofrio and to have exchanged this post for that of head of the Conservatorio di Santa Maria di Loreto, in 1742. Considering the high esteem in which he was held by his contemporaries, and the fact that his pupils included many of the most distinguished of the Italian composers, such as Traetta, Vinci, Jommelli, Piccinni, Sacchini, Pergolesi and Paisiello, it seems strange that none of his music should

have been printed in his lifetime, except six harpsichord sonatas. A copy is in the British Museum, and the sonatas are reprinted in Farrenc's *Trésor des pianistes*, livr. 1. The State Library at Berlin, the Paris Conservatoire, the Liceo Musicale of Bologna, the State Library at Dresden, the British Museum, the R.C.M., the Real Collegio di Musica at Naples and the State Library at Vienna, are the richest in collections of Durante's MSS. The assumption that he held the post of maestro di musica at the court of Naples, during the last ten years of his life, appears to rest on the title of a five-part offertorium, 'Proteixisti me, Deus,' which in several copies is headed 'Concorso fatto per la real capella di Napoli, a 21 April 1745.' In the libraries already mentioned, and elsewhere, there are a great number of masses, motets, psalms and other church compositions (see *Q.-L.*); among modern publications of his works specimens are to be found in Commer's *Musica sacra*, Rochlitz's *Sammlung*, Novello's *Fitzwilliam Music*, etc. The libretti of two oratorios, 'Abigaile' (1740) and 'S. Antonio di Padova' (1755), are in the Liceo Musicale of Bologna, but the music is not known to exist; nor is the source of the song, 'Danza fanciulla,' by which Durante's name is best known to modern musicians, given in any edition of it. He seems to have combined the severe style of the Roman school with the melodic instinct of the Neapolitans, and it is interesting to see in many of his works the first traces of a practice which in the hands of his successors became a mere mannerism; the practice, namely, of treating two soprano parts with interwoven figures and ornamentation above the groundwork of the other parts. (See the writer's *Age of Bach and Handel* (*Oxf. Hist. Mus.* pp. 61-64, etc.)) M.

DURANTE, SILVESTRO, maestro di cappella at San Maria Trastevere, Rome, 1652; maestro di cappella 'nella Consolazione,' 1664; again at San Maria Trastevere, 1668-72. (For list of masses, motets and other church music, see *Q.-L.*) E. v. d. s.

DURASTANTI, MARGHERITA (b. circa 1695), was a prima donna at the King's Theatre in the Haymarket, during Handel's management. She, like Senesino, was engaged from the Dresden Theatre.

She was a married woman when she came to England, and the following quotation from the *Evening Post* of Mar. 7, 1721, shows that she soon acquired favour at court:

'Last Thursday, his Majesty was pleased to stand godfather, and the Princess and Lady Bruce godmothers to a daughter of Mrs. Durastanti, chief singer in the Opera-house. The Marquis Visconti for the King, and the Lady Litchfield for the Princess.'

This was so unusual a favour, that it seems likely that either she or her husband was of a noble family. She had already appeared in 1720 in company with Senesino. In 1721 she played the principal female parts in 'Muzio

Sccevola'; in 'Arsace'; and in 'Odio e l'amore,' probably a pasticcio. On Jan. 12, 1723, the 'Otho,' or 'Ottone,' of Handel was produced, and Durastanti played Gismonda, but a formidable rival had appeared in Cuzzoni, who sang the principal part of Theophane. Durastanti, however, continued to sing through this and the next season, in spite of Cuzzoni, and performed in 'Flavio,' 'Coriolano,' 'Erminia' and 'Farnace.' In 1724 she played Sesto in 'Giulio Cesare,' and appeared also in 'California' and 'Vespasiano.' She took her leave of the public at her farewell performance in 'California,' in a song written by Pope for her—some say at the desire of her patron the Earl of Peterborough—which ended with this couplet,

* But let old charmers yield to new;
Happy soil, adieu, adieu!

If she understood the meaning of the words, her modesty was astonishing, and sets a brilliant example to all singers. Durastanti returned to London in 1733, in company with Carestini, Scalzi, and the two sisters Negri, to help Handel to withstand the opposition of Cuzzoni and Farinelli at the other house. On Jan. 26, 1734, Handel produced his 'Ariadne,' on Mar. 11 'Parnasso in Festa,' and subsequently a revival of 'Ottone,' in all which Durastanti took her part. She never appeared again in England, nor is she mentioned as having appeared subsequently on any other stage. J. M.

DUREY, LOUIS (b. Paris, May 27, 1888), composer, did not begin his musical studies until 1910, when he took private lessons in harmony, counterpoint and fugue from Léon Saint-Requier, one of the professors of the Schola Cantorum in Paris. Durey, although never entering any musical institution, studied seriously until 1914, when, on the outbreak of the European War, he enlisted in the French army. By that time he had already written some immature but promising works, including two unaccompanied choruses, sets of songs on poems by Paul Verlaine and Francis Jammes, and an 'Offrande lyrique' to words by Tagore.

It was not until 1916, when on leave, that Louis Durey found another opportunity for composition. The setting of three poems from the *Voyage d'Urien* by André Gide, written at that time, marked a distinct advance in style and individuality. To this succeeded a piano-forte trio and two pieces for four hands, 'Carillon' and 'Neige.' At this point the influence of Erik Satie and Stravinsky began to make itself felt in the music of Durey, who by this time had joined the group of young composers known as 'Les Six.' Their tendencies, directed against romanticism and impressionism in music, found expression in Durey's 'Scènes de cirque.' Before long, however, he found it incompatible with artistic honesty to remain subjected to the arbitrary views of the association. From that moment

he ignored the doctrines laid down by the group as resolutely as they themselves defied academic principles, and he found that his style had become clarified by this temporary aberration and its attendant reaction. The immediate outcome of this phase was a string quartet, to which succeeded, in 1918, the 'Images à Crusoe,' a song-cycle with accompaniment for several instruments to poems by Saint-Léger Léger. Both works represent the composer's art at its best.

The 'Images à Crusoe' were succeeded by several sets of songs of an idyllic character, including the 'Épigrammes de Théocrite' and the 'Trois Poèmes de Pétrone,' and these were in their turn followed by a string trio. Another important work is 'Le Bostiaire,' where Durey has set a number of diminutive poems on animals by Guillaume Apollinaire with a mixture of irony and poignancy which fits them perfectly.

In 1921 Durey seceded formally from the group of 'Les Six.' He lives (1923) in comparative seclusion in the south of France, where he continues to write with great deliberation and unconcerned with considerations of success. In 1922 a second string quartet was finished, and in 1923 a sonatina for flute and piano. Among Durey's unpublished works are an opera in one act, based on Mérimée's *L'Occasion*, incidental music for Hebbel's *Judith*, 'Eloges' for solo voices, chorus and orchestra, a 'Pastorale' for orchestra, a quartet for wind instruments, and several sets of songs and piano pieces.

The art of Durey is modern, not from any aggressive repudiation of established rules, but from a natural taste and a feeling for form which enable him to dispense with them. Although he does not shrink from harmonic harshness and rhythmic complexities when he requires them, his music is often almost classical in its simplicity and balance. Where he is at his best, his sensitive restraint is engaging and even touching, but it is sometimes carried to such lengths as to produce a feeling of emotional aridity. The undoubted poetry of his work is often ultra-refined and precious, and cannot appeal to humanity at large, but Durey's limitations are at any rate those of a distinctive personality. E. B.

D'URFEY, THOS., see URFEY, D'.

DURÓN, SEBASTIÁN (*b.* Brihuega, New Castille, mid. 17th cent.; *d.* Cambó, Pyrenees, after Aug. 1716), one of the earliest Spanish composers of opera. (He is not to be confused with José Durán, a composer who was for some years a pupil of DURANTE at Naples and afterwards maestro de capilla at Barcelona cathedral, for which he composed numerous oratorios; nor yet with Juan Durán who was maestro de capilla at Santiago in 1525.)

Sebastián Durón received his first appoint-

ment at Las Palmas, Canary Islands, where a portrait of him is said to exist in the church of SS. Justo y Pastor. In 1691 he was summoned to be master of the Chapel Royal, Madrid, which office he held until the death of Charles II. of Spain in 1700. Durón supported the unsuccessful claimant, the Archduke Charles of Austria; and when the war of the Spanish Succession turned in favour of the Bourbons, he seems to have gone into exile. His will is dated Bayonne, 1715; and a codicil was added at Cambó in the August of the following year.

Durón has been accused by a Spanish moralist (Fejoo) of having introduced Italian music and violins into Spain. Neither of these statements is strictly true. Violins (though *violines* perhaps here means 'viols') had been in use in the Chapel Royal since 1633; and Durón's works for the stage seem rather more Spanish than Italian in character. Sometimes with spoken dialogue, sometimes apparently without it, they are primitive indeed when compared with those of his Italian contemporaries, especially Alessandro Scarlatti. The melodies seem much influenced by the rhythms of Spanish song; and Durón has a passion for odd turns of phrase and unexpected syncopation. Specimens of his work are printed by Pedrell (*Teatro lírico español*), and Mitjana (*Encl. de musique: Espagne*). Genuine Italian opera made its first appearance in Madrid in 1703, under the Bourbon Philip V.; the company was only saved from ruin by the personal interest of the king, while the public flocked to hear Spanish *zarzuelas* in the style of Durón, in which political allusions were easily detected between the lines of an apparently mythological story. At Barcelona, however, the Archduke Charles and his followers supported the Italian opera (see ASTORGA).

The National Library at Madrid contains the following works of Durón in MS.:

(M. 1365.) 'Muerte en amor es la ausencia. Comedia en 3 jornadas puesta en musica,' por M. Duron. (Text by Zamora; performed Nov. 17, 1697.)

(M. 2308.) 'Apolo y Dafne.' Zarzuela en 3 jornadas del Maestro Duron.

(M. 2311.) Zarzuela intitulada 'Selva encantada de Amor,' compuesta por Dr. Sebastian Duron a los Ados del Ex^{mo} Sr Conde de Oñate. (Text by Zamora, *d.* 1744.) Also two ballets.

(M. 2276.) Zarzuela armonica intitulada 'Las nuevas armas de Amor.' M. Duron.

(M. 2377.) 'Loa con clar^a y violines de la comedia de Jupiter.' (Not signed, but in same hand and style as the preceding.)

(M. 2278.) 'Opera scenica deduzida de la Guerra de los Gigantes' (= gigantes) a 4 con v^a y clar^a. . . . M. Duron.

(M. 2383.) Fiesta que se hizo a sus M^{as} 1^{as} se intitula Salir el amor del mundo,' del Maestro Don Sebastian Duron.

The Chapel Royal, Madrid, possesses sacred music by Durón, including a Requiem (8v.) and a Litany (8v.). J. B. T.

DUSEK (DUSCHEK), (1) FRANTIŠEK XAVER (*b.* Chotěboř, Bohemia, Dec. 8, 1731¹; *d.* Prague, Feb. 12, 1799), pianoforte teacher, performer and composer. Count Spork had him educated in the Jesuits' seminary at König-

¹ Hostinsky and Borecky both give 1721 as date of birth.

gratz, but after a fall which crippled him for life he gave up other studies and devoted himself to music. His patron sent him first to Prague and then to Vienna, where, under Wagenseil's instruction, he became an excellent pianist. On his return to Prague, he soon had numerous pupils, and exercised a powerful influence on the taste of his time. Reichardt, in his *Briefe* (i. 116), speaks of him as one of the best pianists of that time (1773), 'who, besides his excellent reading of Bach, possesses a peculiarly pleasing and brilliant style of his own.' Among his best pupils may be numbered L. Kozeluch, Mašek, Vitásek, Nostic, and his own wife Josepha. He was also esteemed as a composer of symphonies, quartets, trios, pianoforte concertos, sonatas, Lieder, etc., of which only a small part were published. In his compositions is reflected the gentleness of character which made him universally beloved. He was a kind-hearted man, and all artists, whether his own countrymen or foreigners, were sure of a kind reception at his house. His friendship with Mozart is well known, and it was in his villa and garden near Prague that the great composer put the finishing touches to the score of 'Don Giovanni.' In this very villa Bertramka at Košire near Prague, a subsequent proprietor erected a bust of Mozart, which was solemnly unveiled on June 3, 1876. For further particulars of both husband and wife see Jahn's *Mozart; Jahrbuch der Tonkunst von Wien und Prag*, 1796; Cramer's *Magazin für Musik*; and *Mozart's Letters*, edited by Nohl.

His wife (2) JOSEPHA (née HAMBACHER) (b. Prague, 1756) was a celebrated singer. Her husband taught her music, and she became a good pianist and composer, but above all a fine singer. Mozart, from his first acquaintance with her in Salzburg in 1777, looked upon her as a true and sympathising friend, and wrote for her (Nov. 3, 1787) at Prague the concert aria 'Bella mia fiamma' (Köchel, No. 528). She sang at Vienna, Berlin, Weimar, Leipzig and Dresden, where the Elector had her portrait painted life-size (1787). On her first visit with her husband to Vienna (Mar. and Apr., 1786), they gave no public performance, but were often invited to the houses of the aristocracy, especially to Prince Paar's, where Josepha sang with great success. They witnessed the downfall of the intrigues against the first representation of Mozart's 'Figaro' in Vienna, and it was their partisanship and enthusiastic admiration of the work which prepared the way for its brilliant reception in Prague on Oct. 14, and that of 'Don Giovanni' on Oct. 29, 1787. Beethoven was at Prague early in 1796, and wrote his 'Ah perfido!' there; and as it was first sung by Madame Dušek on Nov. 21 of that year, we may infer that he composed it for her. She died at Prague at an advanced age. Fétis's statement that she came to London in 1800 and died

there, arises from a confusion with the wife of Dussek the pianist.

C. F. P.

DUSSEK, JAN LADISLAV (b. Časlav, Bohemia, Feb. 9, 1761; d. Saint Germain-en-Laye, Mar. 12, 1812), one of the most renowned pianists and composers for the pianoforte of the latter part of the 18th and beginning of the 19th centuries. His father, Johann Joseph Dussek (b. circa 1739), a musician of considerable repute in his day, was organist and leading professor in that town, where he married the daughter of Judge Stebeta, by whom he had three children, the eldest being Jan Ladislav. Although the brother, FRANTIŠEK BENEDIKT (b. 1766), and the sister, VERONIKA ROSALIA, were more or less distinguished, the subject of this memoir is the only one of the three whose memory and works have come down to us. According to Dlabáč, there were various modes of spelling our composer's patronymic: Dussik, Duschek, Dussek, the last of which has long been recognised, and is unlikely henceforth to be disturbed in its prerogative, notwithstanding that the father of our English Dussek signed 'Jan Josef Dussik.' When the son established himself in London, he altered the penultimate letter from *i* to *e*, and pronounced his name 'Duschek,' for which we have the authority of Pio Cianchettini, whose father married Veronika Rosalia, already mentioned. Modern Czech authorities write the name Dušík.

Jan Ladislav Dussek began to study the pianoforte in his fifth year, and the organ in his ninth, and in the capacity of organist soon gave valuable assistance to his father. From Časlav he went to Jihlav (Iglau), where he was engaged as treble singer in the Minorite church, pursuing his musical studies with Father Ladislav Spinar, and familiarising himself with the 'humanities' at the College of Jesuits, subsequently for two years continuing the same course of instruction at Kutna Hora, where he was appointed organist of the Jesuit church. Thence he removed to Prague, where he studied theology and took his bachelor's degree. A patron—Count Manner, an artillery officer in the Austrian service, took him to Mechlin (Malines) where he gave a concert, Dec. 16, 1779. Tired of Mechlin, he left for Berg-op-Zoom, again accepting the post of organist at one of the principal churches. He went to Amsterdam about 1782, where he may be said to have laid the foundation of his brilliant reputation as pianist and composer. It is worth remark that Dussek's last engagement as church organist was at Berg-op-Zoom; and at the same time—which more than one German critic (Professor Marx among others) has observed—that this early acquaintance with the organ had much to do with the peculiar style of not a few of the slow movements to be met with in his finest sonatas—among which may especially be cited the adagio of the 'Invocation' (op. 77), his last great composition

for the pianoforte. Dussek's brilliant success at Amsterdam soon obtained for him an invitation to the Hague, where he passed nearly a twelve-month, giving lessons on the pianoforte to the children of the Stadtholder. Here he also devoted much time to composition, producing 3 concertos and 12 sonatas for pianoforte, with accompaniments of stringed instruments. From the Hague, Dussek, now 22 years of age proceeded to Hamburg, obtaining further instruction from Emanuel Bach, second son of the immortal John Sebastian. The advice and encouragement of this eminent master exercised a salutary influence on the young musician. A year later, nevertheless, we find him at Berlin, astonishing the *dilettanti* of the Prussian capital with his pianoforte-playing, and also with his performances on the instrument called the 'Harmonica,' the qualities of which, in agreement with one Hessel, the *soi-disant* inventor, he travelled through various parts of Germany to exhibit, exciting the admiration of Gerber (at Hesse-Cassel, 1785) both for the instrument and the performer. From Berlin Dussek went to St. Petersburg, where he accepted the invitation of Prince Radziwill, at whose estate in Lithuania he remained more than a year. We next meet with him at Paris (towards the end of 1786) enchanting Marie Antoinette with his playing; her seductive offers, however, could not dissuade Dussek from carrying out a long-considered project of visiting his brother, František Benedikt, in Italy. At Milan he earned new laurels as a performer, both on the pianoforte and harmonica. Returning to Paris in 1788, the threatening circumstances of the time caused him to quit the French capital after two years. His next residence was London, where he made his first appearance at a concert of Salomon, Mar. 2, 1790, remaining there for nearly twelve years. In London his genius was rapidly appreciated; he became a fashionable teacher and the centre of a circle of eminent musicians. One of the greatest compliments ever paid to Dussek, who could boast of many, was contained in a letter addressed from London to the elder Dussek (Dussik) at Časlav, by Joseph Haydn, then composing his imperishable symphonies for Salomon.

'MOST WORTHY FRIEND—I thank you from my heart that, in your last letter to your dear son, you have also remembered me. I therefore double my compliments in return, and consider myself fortunate in being able to assure you, that you have one of the most upright, moral, and, in music, most eminent of men, for a son. I love him just as you do, for he fully deserves it. Give him, then, daily, a father's blessing, and thus will he be ever fortunate, which I heartily wish him to be, for his remarkable talents. I am, with all respect, your most sincere friend,
JOSEPH HAYDN.
'London, Feb. 26, 1792.'

In 1792 Dussek married the daughter of Domenico Corri. 'This lady,' says Gerber, 'was principal singer at the London professional concerts, he (Dussek) being concerto player to the same, and playing in a style of incredible per-

fection.' (See DUSSEK, SOPHIA.) The marriage brought about a joint speculation between Dussek and Corri, and the establishment of a music shop, which ended in failure, so that, in 1800, in order to elude his uncompromising creditors, he was obliged to leave the country surreptitiously, and once more seek shelter in his favourite Hamburg (see CORRI & Co.). The story of the Northern Princess who, at this juncture, became enamoured of our pianist, carrying him off to a retreat near the Denmark frontier, where they lived together in seclusion for nearly two years, may be discarded as a myth. At all events we find in a correspondence to the *Leipziger Musik-Zeitung*, accounts of various concerts given by Dussek at Hamburg, in 1800 and 1801, with references to Steibelt, Himmel, Woelfl, and our own great singer, John Braham, who, with Madame Storace, sang at Ottensen, on the Elbe, in a concert at which Giarnowichi was violinist, and Dussek pianist. In 1802, after appearing at the Concert Hall in Prague, where he played his concerto in G minor, Dussek, accompanied by his sister, Madame Cianchetti, visited Časlav to see his father, whom he had not met for more than a quarter of a century, and, after passing some months at home resumed his professional wanderings. In 1803, at Magdeburg, he became acquainted with Prince Louis Ferdinand of Prussia, with whom he lived for three years on terms of affectionate intimacy, to whom he gave advice both in pianoforte playing and composition, and whose premature death, on the field of Saalfeld, was the origin of the 'Élégie harmonique' (op. 61). This was another turning-point in the somewhat tortuous life of our composer, and, for better or for worse, materially influenced his character. Much that is interesting with regard to the intercourse between Dussek and the Prince may be read in the *Leipziger Musik-Zeitung* (1807); in Ludwig Rollstab's *Reminiscences of Berlin Music* in the *Berlin Musik-Zeitung* (1850); and, most characteristic of all, in Spohr's *Selbstbiographie*.

The death of Prince Louis Ferdinand threw Dussek once more upon his own unaided resources. It says no little for him that before thinking about future prospects he should have devoted time to composing the 'Harmonic Elegy' already mentioned, a fitting tribute to the memory of that royal friend whose close relations with him fully justified his giving expression to sentiments of deepest regret through the medium of the art they both so dearly loved. Nor could anything be more touching and appropriate than the few words which Dussek inscribed on the title-page of his sonata

'L'auteur, qui a eu le bonheur de jouir du commerce très intime de S.A.R., ne l'a quitté qu'au moment où il a versé son précieux sang pour sa patrie.'

About the Prince von Ysenburg (or Isenburg), into whose service, after the death of his

illustrious patron, Dussek entered, as court and chamber musician, little is on record. In 1807, having resigned his situation with the Prince von Isenburg, he entered the service of the Prince of Benevento (Talleyrand). Here his leisure was entirely at his own disposal. He would vouchsafe occasional instructions to favoured amateurs, such as Mlle. Charlotte (Talleyrand's adopted daughter), the Duchesse de Courland, Mlle. Betsy Ouvrard (to whom the grand sonata called 'L'Invocation' is dedicated), etc.; he would also now and then give a concert, at which he produced his latest works, the rest of his time being exclusively devoted to composition.

With the Prince of Benevento, his latest patron, Dussek continued to reside until his last illness compelled him to seek another retreat, at St. Germain-on-Laye, where he died.

With regard to Dussek's style of playing, about which we of course can only gather a notion from the works he has left, many contemporaneous opinions could be cited, but perhaps not one more suggestive than that which J. W. Tomaschek, himself a pianist and composer of eminence, gives in his *Autobiography and Reminiscences*:

'In the year 1804, my countryman, Dussek, came to Prague, and I very soon became acquainted with him. He gave a concert to a very large audience, at which he introduced his own Military Concerto. After the few opening bars of his first solo, the public uttered one general Ah! There was, in fact, something magical about the way in which Dussek with all his charming grace of manner, through his wonderful touch, extorted from the instrument delicious and at the same time emphatic tones. His fingers were like a company of ten singers, endowed with equal executive powers, and able to produce with the utmost perfection whatever their director could require. I never saw the Prague public so enchanted as they were on this occasion by Dussek's splendid playing. His fine declamatory style, especially in *cantabile* phrases, stands as the ideal for every artistic performance—something which no other pianist since has reached. . . . Dussek was the first who placed his instrument sideways upon the platform, in which our pianoforte heroes now all follow him, though they may have no very interesting profile to exhibit.'

There is much confusion in the opus numbers of Dussek's works, owing to the different systems adopted by French, English, and German publishers. The following is an imperfect attempt at a complete list:

- | | |
|---|--|
| Op. 1. 3 Concertos for PF. and Orchestra. | Op. 13. Rondo militaire, PF. |
| 2. 3 Trios, FF. and Strings. C, Bb, E min. | 14. 3 Sonatas, PF. and Violin. C, G, F. |
| 3. Concerto, No. 1, FF. and Orch. Eb. | 15. Concerto No. 2, FF. and Orch. F. |
| 4. 3 Sonatas, FF. and Violin. F, Eb, F min. | 16. 12 Leçons progressives, FF. 2 Bks. |
| 5. 3 Do. FF. and Violin or Flute. G, D, C. | 17. 3 Sonatas, FF. and Violin. C, F, G. |
| 6. 3 Do. FF. and Violin. G, Bb, Ab (1 FF. solo). | 17. 3 Do. do. C, F, G. |
| 6a Airs Variés, FF. & F. A. Dmin., G min., G min. | 17. Concerto No. 2, FF. and Orchestra. F. |
| 7. 3 Sonatas, FF. and Flute. C, G, Eb. | 18. 3 Sonatas, FF. and Violin. Bb, A min. (solo), Eb. |
| 8. 3 Do. FF. and Violin. C, F, A (la Chasse). | 19. 6 Do. FF. and Flute. D, C, F, A, C, Eb. |
| 9. 3 Do. FF. Bb, C, D. | 20. 8 Sonatas, FF. and Flute or Violin. G, C, F (solo), A, E, Bb (solo). |
| 10. 3 Do. FF. A, C min., E. | 20. Concerto in MS. in the Brussels Conservatoire. |
| 12. 3 Sonatas, FF. and Violin. F, Bb, C. | 21. Trio, FF., Flute and Violon, G. |
| 13. 3 Do. FF. and Violin. Bb, D, G min. | |

- | | |
|--|---|
| Op. 21. 3 Trios, FF. and Strings. C, A, F. | Op. 70. Concerto, No. 12, FF. and Orch. Eb. |
| 22. Concerto No. 5, FF. and Orch. Bb. | 71. Sonata, FF. Ab. (Le Retour à Paris). |
| 23. The sufferings of the Queen of France, FF. C. | 71. Plus Ultra, Sonata, FF. Ab. (dedicated to Non plus ultra). |
| 23. Sonata, FF. Bb. (ded. to Mrs. Chinnery); and 3 airs variés, G, A, A. | 71. Airs connus Variés, FF. Bb, F, C, G, C, Bb. 2 Bks. |
| 24. Same Sonata in the English ed. | 72. Grand Sonata, FF., 4 hands. Eb. |
| 24. 3 Trios, FF. and Strings. F, Bb, D. | 73. Sonata, FF., 4 hands. F. |
| 25. 3 Sonatas, FF. and Violin or Flute. F, D (FF. solo), G, C. | 74. Do., do., du. Eb. |
| 26. Concerto No. 6, FF. and Orch. Eb. | 75. Do., do. Eb. |
| 27. Concerto No. 3, FF. and Orch. F. (See op. 14.) | 76. Fantaisie, FF. F. |
| 28. 6 Easy Sonatas FF. and Violin. C, F, Bb, D, G min., Eb. | 77. Sonata, FF. (No. 31). F min. (L'Invocation.) |
| 29 or 30. Concerto, No. 7, FF. (or Harp) and Orch. C. | Works without Opus number. (Various Concertos (one at least for two Pianos) are in MS.) |
| 29. 3 Sonatas, Flute or V. and Cello. F, Bb, D. | Feudal times, favourite Overture. |
| 30. 4 Sonatas, FF. and V. ad lib. C, F, Bb, G. | Overture to 'Pizarro.' |
| 31. 3 Trios, FF. and Strings. Bb, D, C; and 3 Preludes. FF. Bb. | Grand Overture, FF., 4 hands. Instructions on the Art of playing the 2 Pianos. |
| 32. Grand Sonata, FF., 4 hands. C. | 2 Trios, FF. and Strings. Eb, Bb. |
| 33. 'Il Rivocato.' | 'Le Combat naval.' Sonata for Tr. V., V. Adieu, with Gr. Tambour ad lib. |
| 34. 2 Trios, FF. and Strings. Eb, Bb. | 2 Duos faciles, 2 Pianos. C, F. |
| 35. 3 Sonatas, FF. Bb, G, C min. | Sonata facile, FF., 4 hands. C. |
| 36. Grand Sonata, FF. and Violin. C. | 3 Grand Sonatas, FF., 4 hands. 3 Fugues and Sonata, FF., 4 hands. |
| 37. Trio (non favorite), FF. and Strings. Eb. | 8 Rondos. |
| 38. Sonatas, 2 Pianos. Eb. | Sonata, FF. F. (La Chasse). |
| 39. 3 Sonatas, FF. G, C, Bb. | 6 Sonatines for Harp. |
| 40. Concerto, No. 8 (militaire), FF. and Orch. Bb. | Rondo on 'L'Adieu.' FF. Bb. |
| 41. Quintet, FF. and Strings. F min. | Do., Air Russe. C. |
| 42. Sonata, FF. A. | Do., A la Tedesco. Bb. |
| 44. Do. Eb. (The Farewell, dedicated to Clementi). | Do., L'Amusoire. F. |
| 45. 3 Do. Bb, G, D. | Rondo on Countess of Sutherland. F. |
| 46. 6 Easy Do., FF. and Violin. C, F, Bb, C, D, G. | Do., Militaire. F. |
| 47. 2 Do. FF. G, C. | Do., Mignon. C. |
| 48. Grand Sonata, FF., 4 hands. C. | Do. on the favourite Horn-pipe. |
| 49 or 50. Concerto, No. 9, FF. and Orch. G min. | Do. Lord Howe's Horn-pipe. |
| 51. 3 Sonatas, FF. and Violin or Flute. G, D, E (F). | Do. on 'My lodging is on.' |
| 52. 6 Canzones to Italian and English words. | Do. on 'The Ploughboy.' |
| 53. Grand Quartet, FF. and Strings. Eb. | Do. on the Royal Quickstep. |
| 54. | Do. on 'To the Caravan.' |
| 55 or 56. Fantasia and Fugue, FF. F min. (dedicated to J. B. Cramer). | Do. on Viotti's Polacca. |
| 56. Quartet, FF. and Strings Eb. | Do., L'Éléante. |
| 57. | Do., La Matinée. |
| 58. | Variations on 'Anna,' do. C. |
| 59. | Do. on 'Il Pastore Alpignano,' do. C. |
| 60. 3 String Quartets. G, Bb, Eb. | Do. on 'Partant pour la Syrie,' do. Eb. |
| 61. Élégie harmonique sur la mort du P. L. F. de Prusse. FF. min. | Do. on 3 Swiss airs. |
| 62. La Consolation, FF. Bb. | Do. on 'Hope told a flattering tale.' |
| 63. Concerto, No. 10, 2 FF.'s and Orch. Bb. | Do. on a favourite German air. |
| 64. Fugue à la Camera, FF., 4 hands. D, G min., F. | Do. on Blaise et Babet. |
| 65. Trio, FF., Flute, and Violon. F. | Do. on Fah la la. |
| 66. Concerto, No. 11, FF. and Orch. F. | Do. on God save the King. |
| 67. 3 Sonatas progressives, FF., 4 hands. C, F, Bb. | Do. Petits airs connus ('Œuvre VI'). |
| 68. Notturno, FF., Violin and Horn. Eb. | Do. Three Parisian airs. |
| 69. 3 Sonatas, FF. and Violin. Bb, G, D (solo). | 6 New Waltzes for FF. and Violin or Flute. |

J. W. D., with corrections.

DUSSEK, (1) SOPHIA (b. Edinburgh, 1775; d. 1847), daughter of Domenico Corri. Instructed by her father, at a very early age she performed in public on the pianoforte.

In 1788 the family removed to London, when Miss Corri appeared with great success as a singer. In 1792 she married J. L. Dussek, under whose instruction she became as able a pianist and harpist as she was a singer. She continued to sing in public, at her husband's concerts and elsewhere. After his death, in 1812, she contracted a second marriage with John Alvis Moralt. She composed and published many pieces for the pianoforte and harp. Her daughter (2) OLIVIA (b. London, 1797), became, under the instruction of her mother, an excellent performer on the pianoforte and harp. She composed some songs and several pieces for both instruments. She married a man named Buckley, and was organist of Kensington Parish Church from 1840.

W. H. H.

DUVAL (DU VAL), FRANÇOIS (b. circa 1673; d. Versailles, Jan. 27, 1728¹), musician to the Duke of Orleans, belonged to the Royal Chapel. His name figures at the court of Louis XIV., amongst the *Dessus de violon*, of those 'fameux joueurs d'instruments,' the historic '24 violons.' To him is accorded the honour of being the first Frenchman to have dared to compose in the Italian style (Daquin, *Lettres sur les hommes célèbres dans les sciences, la littérature et les beaux-arts* . . . 1752), that is, to introduce sonatas for violin written with a basso continuo. Though J. Ferry Rebel, his contemporary and comrade, had written works on this description in 1695, these were not published until 1705, whereas Duval's 'Premier livre de sonates et autres pièces pour le violon seul et la basse' appeared in 1704. His name therefore holds a place of some importance in the history of violin music in France. His first book of sonatas was published in Paris by Roussel in 1704; similar books came out in 1707, 1708 and 1715. Two books of 'Sonates à trois' were published in Paris in 1706 and a sixth book of sonatas for 'violon et basse' appeared in Paris in 1718. All the above are in the Bibliothèque Nationale in Paris.

Duval composed 5 other books of sonatas (1707, 1708, 1715, 1718) and 1 book for 2 violins and a bass (1706). He had the reputation of being a good player of Corelli's sonatas, which were beginning to be greatly appreciated in Paris. His music shows marked French characteristics in the variety and suppleness of rhythm, and in the tendency to musical description. His violin technique is far more advanced than what is described in the methods of Dupont and Montéclair; his bowing is carefully indicated. In fact, it may be said of him that he occupies a distinguished rank among the earlier composers of sonatas in France.

¹ From death certificate.

DUVERNAY, YOLANDE MARIE LOUISE (PAULINE DUVERNAY) (b. near Paris, 1813; d. Lynford Hall, Norfolk, Sept. 2, 1894), was a favourite ballet dancer. She was taught dancing at the training school of the Opéra by Barrez, Vestris and Filippo Taglioni (*De Boigne*) and made her début there about 1830. On June 20, 1832, she played the part of Miranda in a new five-act ballet-opera, music by Halévy and Casimir Gide, 'La Tentation.' In this work her success was immediate both on account of her beauty and her skill as a dancer and pantomimist. She was none the less popular in society for being possessed of not a little wit and humour. Later she danced with great success in 'La Révolte au sérail' (Labarre) and in various new operas, and remained at the Opéra until 1836 (De Boigne). On leave of absence, she made her début in England, Feb. 13, 1833, at Drury Lane Theatre, as the Princess Iscult, in Hérold's ballet, 'The Sleeping Beauty, adapted from Perrault's fairy tale, and on Mar. 16 as Zelica in 'The Maid of Cashmere,' on the production in English of Auber's 'Dieu et la Bayadère,' wherein she made a great success. Thackeray recalled her triumph therein in the *Roundabout Papers*, No. 8, 'De Juventute.' In 1834 she danced at the King's Theatre and in 1836 again at Drury Lane, where on Dec. 1 she danced as Florinda in the first performance of the ballet 'The Devil on Two Sticks' music by Gide, adapted from 'Le Diable boiteux' of Le Sage. This ballet was a great success, and Mlle. Duvernay increased her fame by her dancing of the CACHUCHA (q.v.), 'one of the most graceful exhibitions of which the art is capable' (*Athenæum*, Dec. 3). In 1837 she danced at the Opera House and soon after retired. On Oct. 14, 1845, she married Stephens Lyne Stephens of Roehampton Grove and Lynford Hall, Norfolk, sometime M.P. for Barnstaple, and High Sheriff for the County of Norfolk. He died in 1860, leaving her the mistress of an enormous fortune, which for many years 'she devoted . . . to works of practical philanthropy' (*Annual Register*). The Roman Catholic church at Cambridge was built and endowed with money given by her for the purpose.

A. C.

DUVERNOY, FRÉDÉRIC (b. Paris, Oct. 16, 1765; d. there, July 19, 1838), a famous horn-player, who made his début at the Concert Spirituel, Aug. 6, 1788. He joined the Opéra orchestra, 1797, was solo horn in 1801, and was pensioned in 1816. He was a member of Napoleon's private band, and professor at the Conservatoire until its suspension in 1815. He had a peculiar method (see *Fétis*) for which he wrote a Tutor. He also composed horn concertos, studies, sonatas and chamber music for horn and strings.

E. v. d. s.

DUVERNOY, VICTOR ALPHONSE (b. Paris, Aug. 31, 1842; d. Mar. 6, 1907), an eminent French pianist and composer.

He was a pupil of the Conservatoire under Marmontel, Bazin, and lastly, Barbereau, and at first intended to adopt the career of a virtuoso, but afterwards devoted himself to composition, and became master of a pianoforte class at the Conservatoire. Among his works may be mentioned, 'La Tempête,' for soli, chorus, and orchestra, which obtained the prize of the City of Paris in 1880; two operas 'Sardanapale' (given at the Lamoureux Concerts in 1882, and in 1892, at the Théâtre Royal of Liège; and 'Hellé,' given at the Paris Opéra in 1896; a lyric scene, 'Cléopâtre,' a two-act ballet, 'Bacchus,' Paris Opéra, Nov. 26, 1902); symphonic pieces, an overture, 'Hernani,' some chamber music, which gained the Prix Chartier, and many works for piano, alone or with orchestra. G. F.

DUX (leader), an early term for the first subject in a fugue—that which leads; the answer being the *comes* or companion.

DUX, CLAIRE, soprano, made her reputation in Germany and became known to London audiences when, in his spring season at Covent Garden in 1913, Beecham gave the first performance in England of 'Der Rosenkavalier.' She was the Sophie in a brilliant cast which included Eva von der Osten and Paul Knüpfer. Her success was emphatic, her voice—a lyric soprano of charming quality—being heard to the utmost advantage in the trio. During the same season she sang, with equal success, as Eva in 'Die Meistersinger' to the Sachs of Weil and the Walter of Walter Kirchhof. As Pamina in the 'Magic Flute,' at Drury Lane in 1914, she revealed herself as one of the best Mozart singers of this generation. Since the war she has sung mainly in America. She is as much at home in the concert room as on the stage. S. H. P.

DVOŘÁK, ANTONÍN (*b.* Nelahozeves on Vltava, near Prague, Sept. 8, 1841; *d.* Prague, May 1, 1904), was a distinguished Czech composer, conductor and teacher of composition.

Dvořák came of a simple stock of Czech tradesmen; he was the eldest of the eight children of František Dvořák, who kept an inn and a butcher's shop in Nelahozeves. His musical gifts were evident from his earliest years. As a schoolboy of eight he played on the pilgrimages; at various festivals, in his father's band; and took part in the choir of the parish church at Nelahozeves. When in his twelfth year he was sent to the neighbouring town of Zlonice, near Slaný, in order to learn German, he began to receive instruction in the rudiments of music from the local schoolmaster, organist and leader of his own private band, Antonín Liehmann. From this time forward, music was for Dvořák his own special element. Liehmann, who belonged to the famous type of Czech schoolmaster-musicians, was above all an enthusiast, devoted

to the diffusion of the art, who not only aided Dvořák's rare musical talent by giving him a sound foundation in that branch of his education, but also rescued this gift in time for its further development, when, on account of the impoverished conditions of life at home, Dvořák was threatened with the prospect of becoming assistant and successor to his father. Dvořák actually worked for a time in the butcher's business, but by 1857 he was able to get to Prague, there to continue his musical education at the Organ School, under the direction first of Karl F. Pitsch, and then of Josef Krejčí. His masters were František Blažek (theory), Josef Foerster, senior (organ), and Josef Leop. Blažek (singing). At the Organ School, founded in 1830 by the Association for the Improvement of Church Music in Bohemia, Dvořák acquired not only a thorough training, mainly in the theory of music, but also a profound knowledge of the works of the old classical masters. At the same time he became acquainted with the later German romantic composers, especially Schumann and Wagner, through the orchestra of the Society of St. Cecilia, in which he acted voluntarily as a violinist, the conductor being that enthusiastic amateur and ardent admirer of the romantic school, Antonín Apt. On leaving the Organ School in 1859, Dvořák, having no other means of subsistence, entered a Prague concert-band, directed by Komzák, as viola player, from which he was transferred to the orchestra of the Czech National Theatre (Prague), where he was engaged until 1873, first under the conductorship of J. N. Maýr, and later under the composer and creator of the Czech national school of music, Bedřich Smetana. The remuneration of this work was not very considerable and he was obliged to supplement it by giving private lessons.

Dvořák began to occupy himself with composition immediately after leaving the Organ School. From the first, assiduous industry, great modesty and love of art upheld him in his work. For more than ten years only a few of his most intimate friends knew anything about his compositions; and yet already there were among these works some notable examples of chamber and symphonic music, masses, song-cycles, and even two operas, 'Alfred' and 'King and Collier' (*Král a uhlíř*). It is true that Dvořák's rich and robust musical nature has permeated these works with a joyous energy; but they still lack individuality, and are influenced by the classics, Mozart and Beethoven; in some instances, too, they are reminiscent of Wagner and Liszt, and yet withal they bear witness to a strong creative impulse. Not until the last two years of his engagement in the orchestra of the National Theatre were a few of Dvořák's smaller works heard in the concert

halls of Prague, and he won his first great success in 1873, with his 'Hymnus,' from Vít. Hálek's poem, 'The Heirs of the White Mountain.' In this work (published by Novello in London in 1885), which is a hymn to the suffering mother-country, lit up by the halo of martyrdom, Dvořák, in grave, joyous and lofty accents, first gave some clear indication of his patriotic sentiments. The success of this work induced him to resign from the orchestra of the National Theatre in 1873 in order to devote himself to composition and teaching. At this time he married Anna Čermáková, the daughter of a Prague citizen, a good contralto singer, member of the chorus of the National Opera, with whom he lived happily until his death. Six children were born of the marriage.

Bohemia was becoming conscious of Smetana, in whose works the Czech movement towards self-determination proclaimed itself eloquently. Dvořák, recognising the originality and national feeling of Smetana's music, resolved to follow the same path in his own compositions. He began to turn to account his Czech nationality in his own works, as well as the clear-cut and characteristic stamp of his personality. Where formerly his artistic speech, under the influence of Wagner and Liszt, expressed a tempestuous ebullience, and was unequal and unnatural in construction, it was now clarified and simplified, returning again as regards form to classical models, while at the same time, like Smetana, he refreshed his musical thoughts at the rich sources of Czech national music. Henceforward, Dvořák's works began to show the qualities which became typical of all his subsequent musical compositions: symmetry and elegance of form, beauty, nobility and raciness of musical content. Among the works of this period the most striking are certain examples of chamber music, the quintet for strings and double bass, in G major, op. 77; the pianoforte trio in B, op. 21; the pianoforte quartet in D major, op. 23; the Serenade for strings, op. 22—all belonging to the year 1875, and the symphony in D minor, op. 18; then the operas 'King and Collier,' now entirely reset to music, and the delightfully gay 'Pig-headed Peasants' (*Tvrďé palice*), penetrated by the folk-spirit, which dates from 1874.

The effort to refresh the melodic zone by the transplantation of new ideas grown in the soil of Czech national art strengthened Dvořák's intimate ties with the folk-poetry. It was to folk-verse—to which he now remained faithful in almost all his works—that he wrote his first cycle of songs, and more especially the album of charming, fresh and original Moravian Duets (1876), the starting-point of his great success abroad. He essayed also to develop new characteristic national forms in other branches of music, especially in his

chamber and orchestral works; whereby he emphasised not only his national origin, but also his relation to the great Slavonic race. From the string quartet in E major and the symphony in F (1875) onward, he began gradually to introduce into his movements the Little Russian form of the *Dumka*, and for the subject of his new opera, 'Vanda,' which was never performed on account of its poor libretto, he used a Polish legend. The most important works of this period were, however, his cantata, the *Stabat Mater*, for solo voices, chorus and orchestra, which Dvořák wrote under the influence of his grief at the loss of the first of his three children (1876); the comic opera 'The Cunning Peasant' (*Selma sedlák*) (1877), in which he follows on the lines of Smetana's national operas; the Symphonic Variations, op. 78 (1877), and the pianoforte concerto in G minor, op. 33 (1876).

With the above works Dvořák at first only penetrated his own country, and even then they brought him but a poor return; nor was a publisher to be found. But in 1875 a few compositions, supplementing his petition for a State grant, which was assigned to him after public competition by the former Austrian Ministry of Culture, caught the attention of Johannes Brahms and the critic Edward Hanslick in Vienna. Brahms in particular took a lively interest in Dvořák, and in 1877 he wrote to his publisher Simrock, in Berlin, recommending him to publish the Moravian Duets.

'On the recent occasion of allotting a State grant, after several years, I took much pleasure in the works of Dvořák of Prague. I have recommended him to send you his Moravian Duets. If you play them through, you will enjoy them as much as I have done. . . . Dvořák has written in all possible styles: operas, symphonies, quartets, pianoforte pieces. Decidedly he is a very talented man. Besides, he is poor. Please take this into consideration.'

Simrock actually published the Moravian Duets, and with such success that not only this firm, but other German publishers invited Dvořák to send them new works. The bond of union between Dvořák and Brahms now developed into a warm personal friendship, only broken by the death of the latter. The artists had also much in common in their art and mutually influenced each other.

With the first success abroad there grew up in Dvořák the consciousness of a duty which he felt was owing to his country and to Czech art. In the works which immediately followed he adhered closely to the rich sources of Czech folk-music; not, perhaps, literally to the use of the folk-tunes, but to a reflection of them; just as Smetana wrote in their spirit, while artistically ennobling them. He took also great pains to show in his works all that is most remarkable and inherent in Czech folk-music. The Czech dances seemed to him the most characteristic of all. Therefore he wrote

his first series of eight Slavonic Dances, op. 46 (1878), in which in three-section lyrical form (Lied-form) he idealised the most characteristic of these dances. The Slavonic Dances appeared first in the form of pianoforte duets, which Dvořák afterwards scored for orchestra. He interpolated into other chamber and symphonic works some of the Czech dances and songs—chiefly the *furiant*, *polka*, *skočná* (reel) and *sousedská* (slow valse or styrienne): the string quartet in E flat, op. 51, with a *dumka* in the second movement; the string sextet in A major, op. 48, with the *furiant* in the scherzo; the *Malíčosti* (bagatelles) for harmonium, two violins, and violoncello, op. 47; the Czech Suite in D major, op. 39, consisting of prelude, *polka*, *sousedská*, romance and *furiant*; the symphony in D major, op. 60, with a *furiant* as scherzo, and other works (1878–80). Dvořák also turned repeatedly for inspiration to the Bohemian past, at this and at a later date; for example, in his Three Slavonic Rhapsodies for orchestra, op. 45; the Ten Legends, op. 59, for pianoforte (four hands); the epic opera 'Dimitrij' (1882), to a libretto taken from Russian history; the dramatic overture 'Husitská' (1883), which celebrates in a lofty style the victory of the great national ideal of religious freedom, for which Jan Hus stood forth as leader, and for which the strong Hussite movement blazed up early in the 15th century. Later on, Czech history formed the basis of the great national oratorio 'St. Ludmilla,' on the poem by Jaroslav Vrchlický (1886).

Of the above-mentioned works the Slavonic Dances met with the greatest success from the beginning. The words of enthusiastic welcome accorded to them by the German musical critic, Louis Ehlert, gave the first impetus to their popularity in Germany and England, and made way for the success of other works by Dvořák. Prominent German and English conductors and virtuosi, such as Hans Richter, Hans von Bülow, Joseph Barnby, August Manns, Joachim, Becker's Florentine Quartet and others, became Dvořák's friends, and shared in the performance and appreciation of his works. Those happy material conditions were now established which made it possible for Dvořák to devote himself to further creative work. His success in England was important and fruitful from an artistic point of view. It began at the end of the 'seventies of last century with the Slavonic Dances, which were soon followed by various chamber and orchestral works, and reached a climax with the first performance of the Stabat Mater, given Mar. 10, 1883, by the London Musical Society at St. James's Hall under Joseph Barnby. The success of this work was so far-reaching that the English desired to make Dvořák's personal acquaintance. Dvořák acceded to

their wish, and in Mar. 1884 conducted his Stabat Mater at the Albert Hall; at the Philharmonic Society and the Crystal Palace he directed performances of his symphony in D major, the overture 'Husitská,' a Slavonic Rhapsody, the Scherzo Capriccioso, and other works, invariably meeting with enthusiastic ovations from the public and those who took part in the music. After this first great success Dvořák was invited by several other musical institutions to revisit England and compose important new works for them. In the autumn of 1884 he again conducted his Stabat Mater and the D major symphony, this time at the Worcester Festival on the occasion of the celebration of the eight-hundredth anniversary of the foundation of the Cathedral. In Apr. 1885 he directed the performance of his new symphony in D minor, op. 70, composed for the Philharmonic Society, and again in May his pianoforte concerto (Franz Rummel as soloist) and the 'Hymnus' (The Heirs of the White Mountain), which Novello had already published. In August of this year he took part in the Birmingham Musical Festival, for which, at the invitation of the committee, he composed a new cantata, 'The Spectre's Bride,' for solo voices, chorus, and orchestra (op. 69), to words by the Czech poet, K. J. Erben (also published by Novello). Sir Alexander Mackenzie introduced this work to London at one of Novello's Oratorio Concerts in St. James's Hall, Feb. 2, 1886. Dvořák visited England for the fifth time in the autumn of 1886, going first to the Leeds Festival, for which he wrote the oratorio already mentioned, 'St. Ludmilla' (Novello), and then to London, where this work was thrice repeated, with what success is best seen by a quotation from one of the composer's letters home:

'I am still in the greatest excitement, the result of the wonderful performance on the part of the orchestra, chorus and soloists of the first rank (Albani, Patty, Lloyd, Santley), and the splendid ovation on the part of the public. Was this truly English enthusiasm, the like of which I have not enjoyed for a long while? At the close of the work, after tempestuous applause and repeated recalls, I had to bow my thanks again and again. . . .'

After an interval of a few years Dvořák revisited England in 1890, when he conducted his new symphony in G, op. 88 (Novello), at a concert of the Philharmonic Society. He returned twice in 1891: first in order to receive in person the honorary degree of Doctor of Music, conferred upon him by the University of Cambridge (on which occasion he conducted on the preceding evening his G major symphony and Stabat Mater); and again later in the year when he directed, at the Birmingham Festival, the first performance of his most recent work, the Requiem, for solo voices, chorus and orchestra, op. 89 (Novello). Every time Dvořák visited England he met with the happiest ap-

preciation, which had great significance both for himself and for Czech music. He was recognised there as one of the greatest creative musicians of the day; and because he received encouragement to compose new works on a large scale, England certainly had a most favourable influence upon his technical development, while the opportunity of handling great choral and orchestral masses enriched his command of sonority. That portion of Dvořák's music which originated immediately before these successful visits to England includes several works which show features otherwise extremely rare in Dvořák, the singer of life's joys. Some of these works are frank revelations of his persistent inward conflicts at this time, permeated by indignation, defiance and passionate doubt; some are steeped in calm resignation; and again, others seem only the expression of an intrepid contest. These are the pianoforte trio in F minor, op. 65; the Scherzo Capriccioso, op. 66; the dramatic overture 'Husitská,' op. 67; and the symphony in D minor, op. 70, written for England (1883-85). They reflect that struggle of conscience which Dvořák experienced at the time when his German friends pressed him to make a compact with the Teutonic world of music, and would have rejoiced had he written an operatic work to a German text, which would have facilitated his success on the foreign stage; they are echoes of a time at which an effort was made to tempt or coerce him into settling in Vienna. To this pressure Dvořák did not succumb; but the traces of this inward discord are stamped upon the above-mentioned works, and also—even after his final victory—upon the closing movement of the symphony in D minor.

If just at this time Dvořák composed works of such great dimensions as regards both form and content, and of such frankly patriotic interest as 'St. Ludmilla' and the overture 'Husitská,' his subsequent creations manifest a welcome and vital breath of inward serenity and idyllic calm, as well as a more virile maturity. The compositions of this period speak to us again of a simple and sincere artist; quickly responsive to his emotional moods; with the soul of a child and the imagination of a poet; a distinctive artistic personality, who willingly celebrates in music life's joys and sorrows, and who is, above all, in close contact with Nature in his own land, especially in Southern Bohemia. Here he bought himself in 1884 a small homestead called 'Vysoká,' near the town of Píbram, where he lived and worked most happily when not in Prague. Among the works belonging to this period (after 1884) the following deserve mention: a number of songs in the Folk-style, op. 73; Four Songs, op. 82; Love Songs, op. 83; a new series of 8 Slavonic Dances, op. 72, first written for pianoforte (4-hands) and afterwards orches-

trated, in which he idealises some typical dances of the various Slavonic nations—Slovaks, Jugoslavs, Malo-Russians, Poles, etc.; the little pictures called Pianoforte Duetts, 'From the Bohemian Forest' (Ze Šumavy), op. 68, and the charming Poetic Moods, Op. 85 (13 pieces for piano, 2-hands); the Romantic Piece for violin and piano, op. 75, and the Terzetto for 2 violins and viola, op. 74. To this group belong also the string quartet in C major, op. 61; the pianoforte quintet in A major, op. 81; the pianoforte quartet in E flat, op. 87; the 'Dumky' trio, op. 90; the symphony in G major, op. 88; the three overtures—'Amid Nature,' op. 91; 'Carneval,' op. 92, and 'Othello,' op. 93; the joyous Te Deum, op. 103 (1881-92), the simple and intimate Mass in D major, op. 86, and the broadly planned and lofty Requiem, op. 89. His very successful comic opera, a remembrance of his own childhood, may be added here; 'Jakobín' like 'Dimitriji' was composed to a text written by Marie Cervinková-Riegrova, the daughter of a prominent Czech politician, Dr. František Lad. Rieger.

In 1890 Dvořák added to his successes abroad a visit to Russia and a new concert tour in Germany and England. At this time he also received from the Czech University in Prague the honorary degree of Doctor of Philosophy, was elected a member of the Czech Academy of Art and Science, and received from the Austrian Government the order of the Iron Crown of the Third Class. Early in 1891 he accepted the position of professor of composition, instrumentation and musical form at the Prague Conservatoire, a step which proved to be highly beneficial to the future development of the modern school of Czech music.

Meanwhile the fame of Dvořák's name had reached overseas. A number of his more important works having found their way to various centres in America, American musical circles desired to follow the example of England and to make the personal acquaintance of the great Czech musician. At the invitation of Mrs. Thurber, the foundress of the National Conservatory of Music in New York, Dvořák, in 1892, accepted the directorship of this institution, and having obtained leave from the Prague Conservatoire, migrated to America, where he met with a splendid reception and remained for three years, being greatly appreciated there as a teacher, a conductor of his own works, and of course as a composer. His aim of developing a national school of composition among his American pupils met—as may be well understood—with no success. In America his works were again received with enthusiasm. The series of works which originated in America is highly characteristic of Dvořák's art as a whole. In them he expresses, in the first place, the impressions evoked by his

visits to various parts of America; the great bustling cities, the wide and silent prairies; the cultivated and strenuous social atmosphere of New York, and the life of the simple, intimate, and far-away Czech colony at Spillville in Iowa State, where he spent his summer vacations. In an effort to emphasise the novelty of these impressions, and in order to give distinctive and characteristic expression to them, he chose for some of his compositions which originated in America themes which are built on certain typical features of the folk-songs of the Indian and Negro races. Otherwise these works are pre-eminently manifestations of his own characteristic and exclusively national personality, and the assertion that Dvořák in making direct use of the folk-tunes of America was trying to create 'an American national music' are erroneous and without foundation. The first work which depicts the flood of his impressions in America is the symphony in E minor, op. 95, called 'From the New World,' not only the most successful of all Dvořák's symphonies, but also one of the most famous in the symphonic literature of the whole world. It was first performed under Anton Seidl, Dec. 16, 1893, at the Philharmonic Society of New York. The intimate impressions of his sojourns at Spillville are reflected in the string quartet in F major, op. 96, and the quintet in E flat, op. 97 (1893). The remainder of the works which Dvořák composed in America were primarily inspired by his great yearning for his native land, which is revealed in several of the works already mentioned and permeates deeply the whole cycle of Biblical Songs, op. 99, and the concerto for violoncello and orchestra, op. 104 (1895). His joy at the prospect of returning to Bohemia is expressed in the little 'Humoresques' for pianoforte (of which No. 7 has since been arranged for every possible instrumental combination, and has become one of the most popular compositions in the world), and particularly in the string quartets in A flat, op. 105, and G major, op. 106 (1895).

After his return home Dvořák again took up his post as professor of composition at the Prague Conservatoire. He was appointed director at the beginning of 1901, and held this position until his death. As regards his own music, he now devoted himself exclusively to symphonic poems and opera. The subject-matter for all these works he drew without exception from legendary sources; his tie with the people was very close, and he was the first who succeeded in satisfactorily developing the Czech musical legend. The series of symphonic poems for orchestra based on the ballads of Karl Jaromír Erben includes 'The Watersprite' ('Vodník'), 'The Golden Spinning-Wheel' ('Zlatý kolovrat'), 'The Mid-day Witch' ('Polednice'), and 'The Little Dove'

('Holoubek') (1896), and these were succeeded by the 'Heroic Song,' which has no programmatic intention. In the sphere of legendary opera he wrote 'The Devil and Kate' ('Čert a Káča') (1898) and the remarkably poetic 'Rusalka' (1900), to a libretto by the dramatist, Jaroslav Kvapil, chief manager of the National Theatre in Prague. This work is now the favourite of all Dvořák's operas with the Czechoslovak public. Finally he composed the legendary-romantic 'Armida,' the libretto of which, based on Tasso's 'Jerusalem Delivered,' is by Jaroslav Vrchlický. Dvořák's artistic career was ended suddenly by his death on May 1, 1904. He was buried, as became one of the greatest sons of the Czech people, with every mark of respect on the part of the nation in the cemetery of the Vyšehrad at Prague. (For portrait see PLATE XI.)

ESTIMATE OF DVOŘÁK'S ART

Dvořák must be placed among the most richly gifted and versatile composers of the 19th century. Truly, like Haydn, Mozart and Schubert, he was of the race of those divinely blest and naively genial leaders whose thoughts and emotions manifest themselves spontaneously in musical forms, and whose musical imagination gives itself out in an inexhaustible wealth of pure, fresh and fascinating ideas, in melody, harmony and rhythm. He seemed to be a late offspring of the masters above mentioned, and his nature, fundamentally simple and unsophisticated, was nevertheless innately intelligent, perceptive and witty, robust and fresh, tenderly emotional and gifted. He had a wonderful love of Nature, a firm and simple faith in God, a joyous optimistic outlook on life. Such was his disposition, which during his whole life always preserved the typical features of the simple peasant origin that coloured his personality and his work. In his art intuition gets the better of intellect. Dvořák's extensive life-work is therefore unequal; there is in it much which lacks weight and significance as compared with the rest; we find weak places in which ideas appear hastily put together, and which contain melodically more chaff than wheat. On the other hand, Dvořák's creative output includes a series of great works which are the pure manifestations of a strong and noble art; which in content, workmanship and form bear witness to an inspired creative spirit, and to a great mastery of technique; qualities which, taken together, will insure him a prominent place in the musical history of the world.

Dvořák ranked the old classical masters as his chief models, although in youth he did not resist a passing admiration for the ideas disseminated by the neo-romantics, Wagner and Liszt. Nevertheless, the foundations of Dvořák's art were then already laid upon the

Beethoven tradition. Dvořák is indebted to Beethoven for the structural art of a work as a whole; for the detailed working of the motives which grow out of the more sustained, expressive themes; and for his wealth of shifting and ever-new resources, rhythmic and melodic. The influence of Brahms, however, played its part in the purity of form and attractive interest of Dvořák's later works. Brahms soon became Dvořák's staunch friend and appreciator, often acting as his adviser also, and it is partly owing to him that Dvořák was not only a gifted and spontaneous composer as regards melody and rhythm, but also an artist of refinement and culture, to whom fastidious purity of workmanship and definite design were of as much direct importance as the beauty and endurance of the musical content. Dvořák is also akin to Franz Schubert, in his natural gift of spontaneity, which permits him to evolve works on a great scale from flashes of passing fancy, apparently without much intellectual and creative effort.

It is also significant that as regards the ideas and content of his music, Dvořák's individuality remains absolutely itself, and bears the clear stamp of his nationality. The style of his melody and of certain works, which are frank confessions of his soul, show how the love of his land and people filled his whole vision. To this profound national consciousness Dvořák united a conscious racial attachment; he felt his equality and relationship with the great Slavonic family. In his work, which is first of all Czech—and often specifically Czech, even when the author shows himself distinctly 'Slavonic'—there are manifestations of racial elements and forces. His musical spirit, like that of Smetana, dwelt chiefly in the fields and country-side of Bohemia, enamoured of his folk, of their joys and sorrows, their songs and dances, echoing the glorious past and looking forward to a happier future. But 'his lyric music also voices the sad reverie of the distant steppe; his oratorios and cantatas are, as it were, inspired by the roar of great rivers and of ocean; his dance rhythms pulsate with the hot blood of a young, half-civilised, half-barbarous race' (F. V. Krejčí).

Dvořák was one of the greatest masters of instrumentation, whether we point to his smaller works of chamber music or to his orchestral compositions. With comparatively simple means he derived a magical colouring from his instrumental palette; and his orchestral combinations glow with inspiration and echo a simple and natural beauty.

He expresses himself most fully and symmetrically when the wealth of his musical inspiration is guided by his intimate feelings, unfettered by any programme or literary idea, in the kind of music now called 'absolute,' especially in chamber and symphonic music,

and in his sacred works. In this sphere he has produced masterpieces which are pure and lofty in style, polished and compact in form; sincerely felt, of fresh and original content; works of nobler significance than any others in this branch of Czech music. He belongs to those who have shown that the classic cyclic sonata-form did not die out with Beethoven, but that it is of lasting value, thanks to the perfection of its formula, and that it may always continue to exist, renewed from time to time by fresh thoughts, musical and intellectual, without the help of a poetic or literary basis. Dvořák endows the individual movements of his cyclical works with a wealth of beautiful music, the sincere expression of his spiritual moods, as manifested to his clear judgment, both human and artistic. We may read in them his attitude to humanity, nature, God and country. Most eloquent of all are the slow movements. The scherzo movements are also highly characteristic, especially those in which he idealises certain typical Czech or Slavonic dances, which break away in a bubbling stream of rhythmic *verve*.

Coming to his orchestral music, the first place belongs of right to the symphonies (nine in all), which in themselves are admirably characteristic of Dvořák's musical development; if not as a whole, at least in some individual movement they bear witness to his remarkable grasp of symphonic form. The most important and successful of them is the last, 'From the New World.' The popularity of this work has eclipsed the world's interest in the rest of Dvořák's symphonies; unjustly, however, for several of them are by no means its inferior in musical value. How interesting in form, in its folk-spirit, and in the virile serenity it exhales, is the outline of the symphony in G, op. 88, with the wonderful variations in the finale. And, again, the passionately agitated symphony, op. 70, in D minor, with its Brahms-like austerity and strong inward utterance so characteristic of Dvořák. The joyous symphony in D, op. 60, full of the fragrance and melody of the Czech fields and forests, full of light and cheerful courage, with the furiant in the scherzo—a work of striking originality. With the symphonies may be honourably associated the concertos with orchestral accompaniment, of which the lyrical violin concerto, op. 53, and the romantic concerto for violoncello, op. 104, specially deserve to be reckoned among the most remarkable examples of the concerto form. Two attractive and popular works are the Serenades: the first for strings, op. 22, has an erotic and yearning character, the second is the humorous Serenade for wind instruments, op. 44.

In programme music of a symphonic kind, Dvořák is at his happiest when the music does

not strictly follow concrete descriptive lines, but approaches to some form, such as the sonata or overture. First among such works ranks the well-known cycle of three overtures: 'Amid Nature,' 'Carneval' and 'Othello,' the fundamental idea which connects them all being shown in the original title which they bore in common—'Nature, Life and Love.' The 'Carneval Overture,' thanks to its sparkling and spirited rhythmic flow, is one of the most frequently performed of Dvořák's compositions. A work of impetuous temperament and vigour is the overture 'Husitská,' which was a favourite with Bülow, just as Arthur Nikisch loved to conduct the Scherzo Capriccioso and Hans Richter the Slavonic Rhapsodies. Rare musical charm, especially as regards effective orchestration, is contained in the symphonic poems on legendary subjects, opp. 107-111, to which objection is made on account of their epic diffuseness and a superfluity of detail which arrests the progress of the tale; for pith and unity of form, 'Holoubek' ('The Little Dove') is far the best of them. The Slavonic Dances occupy a special place among Dvořák's orchestral works. Though originally written as pianoforte duets, they were first assessed at their true value in their well-known, highly-coloured and riotous orchestral version. With their luxuriant wealth of characteristic melody and fiery, pointed rhythms, Dvořák celebrates Czech dance-forms, frank Czech humour and folk merriment.

Much esteemed for its charm and purity of style is Dvořák's chamber music, rendered specially famous by the clear interpretations of the Bohemian (Czech) Quartet. In these works the various stages of his musical culture and the progress of his art as regards its structural side are most eloquently expressed. Among the works of the first order are the string quartet in D minor, op. 34 (with its very beautiful *Adagio*); the quartets in E flat major, op. 51; C major, op. 61; A flat major, op. 105; and G major, op. 106. Of works written for other instrumental combinations, now justly famous, we must select the spirited pianoforte quintet in A, op. 81, the string quintet in E flat, op. 97 (the 'American'); the two pianoforte quartets, the first in D major, op. 23, and more especially the one in E flat, op. 87, the sextet for Strings, op. 48, with its national colouring, and of the pianoforte trios, particularly that in F minor, op. 65, which in its impassioned subject-matter matches the symphony in D minor, op. 70. Works of peculiar charm and loveliness are the 'Dumky' trio for pianoforte and strings, op. 90, which unites in cyclic form a series of idealised dances under a general title; and the 'Maličkosti' (Bagatelles) for harmonium, two violins and violoncello, op. 47.

The vocal and orchestral works on a large scale breathe throughout a sincere faith in the supernatural direction of the world, of nature and life, which is one of the most expressive features of Dvořák's temperament. They also contain a wealth of lovely Schubert-like melody, a touch of colour characteristic of his own artistic individuality, and an affinity—especially in the choral numbers—with Handelian technical methods, although Dvořák contributes much that is new and entirely his own. In the *Stabat Mater* and the *Requiem* great tenderness and poetical expression, depth and nobility of thought and beauty of sonority are the most characteristic qualities. The *Stabat Mater* is the more serene and sustained, and laid out on a more unified plan; the *Requiem*, on the other hand, is more detailed in design, more romantic in its melodic material and modulations, more highly coloured and effective in its vocal and orchestral sonority. The great amplitude of conception of the oratorio 'St. Ludmilla' is perhaps the reason why the composer planned it in three parts. Its subject is the conversion of the Czech prince, Bořivoj, and his wife Ludmilla, at the time of the victory of the Christian faith over Czech heathendom, about A.D. 873. To the text—not altogether happy—of Jar. Vrchlický is woven music of considerable beauty, in which lyrical scenes of great tenderness alternate with stirring drama. In style and structure it bears the strongest resemblance to Handel of all Dvořák's works. In spite of some archaisms in utterance, this work is, however, purely Slavonic in feeling. Immeasurably more intimate and direct in its simplicity is the expression of Dvořák's religious sentiment in the little Mass in D, for mixed chorus and organ, an occasional composition. The same qualities characterise the 149th Psalm and the joyous, uplifting *Te Deum*, for solo voices, chorus, and orchestra, with its poetical duet for solo soprano and bass. Later on, the ten 'Biblical Songs,' op. 99, emanated also from this sense of sincere humility before the greatness and goodness of God. These deep and noble utterances are the culmination of Dvořák's art as a song writer. Two important works for voices and orchestra, to secular words, are the cantata, 'The Spectre's Bride' and 'Hymnus' ('Heirs of the White Mountain'). The former is a musical setting of a poem by K. J. Erben, which has something in common with Bürger's 'Leonore,' but with a note of reconciliation at the end. The score shows many characteristic and original passages both melodic and structural, and has charm of feeling and tone-colour. Here and there, however, the considerable spinning-out of the music is at variance with the static structure of the individual parts. The 'Hymnus,' a work of Dvořák's youth, overflows with frank and

vigorous patriotic fervour. The weakest of his works is the cantata 'The American Flag,' an occasional composition written to patriotic verses by J. Rodman Drake.

Dvořák's cantatas and oratorios soon made their way from end to end of the musical world, but his operas have not penetrated equally far. And yet here he shows himself strong and sincere. It is true that the dramatic side was not so strong in him as the absolute quality of his music, which often attains a climax to the detriment of the dramatic intrigue and expression. Nevertheless, in this aspect of his genius he shows evidences of a dramatic instinct, which intuitively led him to seize upon the significant moment in the development of an operatic plot. Besides which, Dvořák puts into his operas a wealth of fresh, characteristic and fascinating music, and it is by these works that he penetrates the hearts of his fellow-countrymen. The most successful, because its text is most felicitous, is the tragic legend 'Rusalka,' the music of which is full of poetic feeling and enchantingly beautiful melody and sonority. Genuine humour and touching sentiment impregnate 'Jakobín.' Both works are popular in Czechoslovakia. Other operas of remarkable musical charm and refinement are the comic opera 'Šelma sedlák' ('The Cunning Peasant'), written to a libretto which is not a very successful imitation of 'Figaro,' and the one-act opera 'The Pigheaded Peasants,' both subjects being borrowed from Czech rustic life. In serious opera there is the clear-cut design, the lofty pathos and beautiful music of 'Dimitrij.' Two other serious operas by Dvořák—the historical 'Vanda' and the romantic 'Armida'—have fought in vain to maintain their existence, even in Czechoslovakia, owing to the poverty of their libretti.

Dvořák's minor works lose in essential significance by comparison with the series of compositions above mentioned, although they are numerous and some of them are valuable for their attractive qualities. Among the music for pianoforte (4-hands) the popular Slavonic Dances, which attracted attention even before they were arranged for orchestra, take the first place. Akin to these in form are the admirable cycle of 10 'Legends,' op. 59, and 6 Sketches, 'From the Bohemian Forest,' op. 68. Of the pianoforte music (2-hands), which consists partly of dance-forms (the furiant, valse, mazurka, dumka) artistically treated, and partly of small mood-pictures, the most important works are the 'Poetic Moods,' op. 85 ('Poetické nálady'); while the most widely known, chiefly thanks to No. 7, are the 'Humoresques,' op. 101. The interesting 'Theme con variazioni,' op. 36, deserves mention. Of his songs, which culminate, as already pointed out, in the 'Biblical Songs,'

op. 99, the 'Love Songs,' op. 83, with their poetical charm are specially noticeable; also the 'Songs in Folk-style,' op. 73, the songs to words from the MSS. of Králové Dvůr (the Königinhof Manuscript), op. 7, the 'Three Modern Greek Songs,' op. 50, the 'Gipsy Songs,' op. 55, and, without doubt, the delightful 'Moravian Duets,' for soprano and alto, with pianoforte accompaniment.

Dvořák has this significance for Czech music in particular, that he completes the work of Bedřich Smetana, who was both his predecessor and contemporary, and occasionally his guide. Together they laboured as the two great founders of the Czech school of national music, upon whose works, as upon an unshakable basis, is built all modern Czech music. Unlike Smetana, who grasped and invoked the whole spirit of the Czech people, making himself the singer of their past and the prophet of their victory and freedom, Dvořák in all his music is simply human, intimate and personal. If Smetana surpasses Dvořák in the great fundamental idea of his art as a whole, and in fusion between intellect and intuition, Dvořák although his music is not always equally exemplary, commands a wealth of musical inspiration and creative versatility. Smetana's significance as the founder of Czech music is completed in Dvořák, who was the first to compose a national oratorio and utilise national legend for symphonic purposes. He was also the first to create works on a grand scale in which the mould of the old classic forms (the symphony, suite, concerto, chamber music, etc.) is filled with the national material; with Czech speech, thought and sentiment; with Czech song and dance.

As a conductor, Dvořák, who was merely engaged to conduct his own works, showed himself a musician of temperament, who knew how to exact obedience from his players and to stir the heart and awake the enthusiasm of his audience, both at home and abroad. As a teacher, however, his work was of immeasurable importance and profit to Czech music; for here he displayed rare individual powers productive of great results. It is not a mere accident that the two most distinguished personalities in the world of Czech music to-day, Josef Suk (who married Dvořák's eldest daughter) and Vítězslav Novák, are both his pupils. In their work they are carrying on his traditions as a teacher among the younger generation of Czech musicians.

PUBLISHED WORKS WITH OPUS NUMBERS

1. See Unpublished Works.
2. Four Songs, to words by Pfafer. 1865.
3. Four Songs, to words by Hálek. 1876.
4. See Op. 30.
5. Sirotek (The Orphan). Ballad for Voice and PF., to words by Krben. 1871.
6. Four Serbian Songs. 1872.
7. Six Bohemian Songs. 1872.
8. Silhouettes for PF. 1878.
9. Four Songs, to words by Krásoborská and Hálek. 1871 and 1876.

10. See Published Works without Opus Number.
11. Romance for Violin and Orchestra. 1873.
12. Dumka and Furiant for PF. 1884.
13. See Published Works without Opus Number.
14. Opera 'Král a uhlík' ('King and Collier'). 1874. (See below.)
15. Ballad for Violin and PF. 1885.
16. String Quartet in A minor. 1874.
17. Opera, 'Turdé palice' ('Pigheaded Peasants'). 1874. (See below.)
18. See Op. 77.
19. Three Latin Hymns for Voice and Organ. 1879.
20. Four Vocal Duets (to Moravian folk texts). 1878.
21. Trio in Bb for PF and Strings. 1875.
22. Serenade in E for Stringed Orchestra. 1875.
23. Quartet in D for PF and Strings. 1875.
24. See Op. 76.
25. Opera, 'Vanda.' 1875. (See below.)
26. Trio in G major for PF and Strings. 1878.
27. Part Song for Chorus. (See also Op. 80.) 1878.
28. Hymna českého rolnictva ('Hymn of the Czech Peasants'), for mixed Chorus with 4-hand accompaniment. 1886. (See Op. 84.)
29. Four Choruses for mixed Voices. 1878.
30. 'Hymnus' ('The Hail of the White Mountain'), for mixed Chorus and Orchestra, to words by V. Hálek (originally Op. 4). 1872.
31. Five Evening Songs (V. Hálek). 1876.
32. 'Moravské dvojvýchý' (Moravian Duets). Vocal Duets. Sop. and Alt. 1876.
33. PF. Concerto in G minor. 1876.
34. String Quartet in D minor. 1877.
35. Dumka for PF. 1876.
36. Variations in Ab for PF. 1878.
37. Opera 'Šelma sedlák' ('The Cunning Peasant'). 1876. (See below.)
38. Four vocal Duets. 1877.
39. Suite in D for Orchestra (Preludium, Polka, Minuet, Romance, Furiant). 1879.
40. Notturmo in B for String Quintet. 1870. (See Op. 78.)
41. Scotch Dances for PF. Duet. 1877.
42. Two Furiants for PF. 1877.
43. Three Choruses with accompaniment for PF, 4-hands. 1877.
44. Serenade for Wind, Violoncello and Bass. 1878.
45. Three Slavonic Rhapsodies (in D, in G minor, in A) for Orchestra. 1878.
46. The Slavonic Dances for PF. Duet, arranged for Orchestra. 1878.
47. Bagatelles for Harmonium (or PF.), two Violins and Violoncello. 1878.
48. String Sextet in A. 1878.
49. Mazurek for Violin and Orchestra. 1879.
50. Three Modern Greek Songs (to words by Nebešky). 1878.
51. String Quartet in E. 1879.
52. Impromptu, Intermezzo, Gigue and Eclogue for PF. 1880. (See Op. 79.)
53. Violin Concerto in A minor. 1879-80.
54. Walzer for PF. 1880.
55. Festival March for Orchestra. 1879.
56. The Gipsy Songs for Tenor Voice and PF. to words by Heyduk. 1880.
57. Mazurkas for PF. 1880.
58. Sonata in F for Violin and PF. 1880.
59. Stabat Mater for Solos, Chorus, and Orchestra (originally Op. 28). 1876-77.
60. Legends, for PF. Duet, arranged for Orchestra. 1881.
61. Symphony in D. 1880.
62. String Quartet in C. 1881.
- 62a. Overture to the play 'J. K. Tyl' (Mein Heim) for Orchestra. 1882.
- 62b. Music to the play 'J. K. Tyl', arranged for PF. Duet. 1881.
63. 'Vpřirodě' ('Amid Nature!'). Five Choruses for mixed Voices, to words by Hálek. 1882.
64. Opera, 'Dimnitrij.' (See below.)
65. Trio in F minor for PF and Strings. 1883.
66. Scherzo capriccioso for Orchestra. 1883.
67. 'Husitáké' Overture for Orchestra. 1883.
68. 'Ze Sumavy' ('From the Bohemian Forest') for PF. Duet. 1884.
69. 'The Spectre's Bride.' Cantata for Soli, Chorus and Orchestra, words by K. J. Erben. 1884.
70. Symphony in D minor. 1885.
71. Oratorio, 'Judithin' for Soli, Chorus and Orchestra, words by Jaroslav Vrchlický. 1886.
72. New Slavonic Dances for PF. Duet, arranged for Orchestra. 1886.
73. 'Vnárodním tónu' (In Folk-style). Four Songs. 1886.
74. Terzetto for two Violins and Viola. 1887.
75. Romantic Pieces for Violin and PF. 1887.
76. Symphony in F (originally Op. 24). 1875.
77. String Quintet in G (originally Op. 18). 1875.
78. The Symphonic Variations for Orchestra (originally Op. 40). 1877.
79. Pa. 148 for Chorus and Orchestra (originally Op. 52). 1879.
80. String Quartet in E (originally Op. 27). 1876.
81. Quintet in A for PF and Strings. 1887.
82. Four Songs, to words by Malýbruk-Stieler. 1887.
83. Eight Love-songs, to words by Pfleger. 1885 and 1888.
84. Opera, 'Jacobin.' 1888. (See below.)
85. 'Poetic Moods,' for PF. (13 pieces). 1889.
86. Mass in D. 1887.
87. Quartet in Bb for PF and Strings. 1889.
88. Symphony in G. 1889.
89. Requiem for Soli, Chorus and Orchestra. 1890.
90. Dumky, Trio for PF and Strings. 1891.
91. Overtures, 'Amid Nature.' 1891.
92. Overture, 'Carnaval.' 1891.
93. Overture, 'Othello.' 1891.
94. Rondo for Violoncello and Orchestra. 1891.
95. Symphony, 'From the New World,' in E minor. 1893.
96. String Quartet in F. 1893.

97. String Quintet in Eb. 1893.
98. Piano-forte Suite in A, arranged for Orchestra. 1894.
99. Ten Biblical Songs. 1894.
100. Sonatina in G, Violin and PF. 1893.
101. Humoresques for Piano. 1894.
102. Cantata, 'The American Flag,' for Soli, Chorus, and Orchestra to words by Rudman Drake. 1893.
103. Te Deum for Soli, Chorus, and Orchestra. 1892.
104. Violoncello Concerto in B minor. 1895.
105. String Quartet in Ab. 1895.
106. String Quartet in G. 1895.
107. Symphonic Poem, 'The Watersprite.' 1896.
108. Symphonic Poem, 'The Mid-day Witch.' 1896.
109. Symphonic Poem, 'The Golden Spinning-wheel.' 1896.
110. Symphonic Poem, 'The Little Dove.' 1896.
111. Symphonic Poem, 'Heroic Song.' 1896.
112. Opera, 'Ceri a Kaca' ('The Devil and Kate'). 1899. (See below.)
113. 'The Festival Song,' for Chorus and Orchestra, to words by Vrchlický. 1900.
114. Opera, 'Rusalka.' 1900. (See below.)
115. Opera, 'Armida.' 1903. (See below.)

PUBLISHED WORKS WITHOUT OPUS NUMBERS

- String Quartet, 'Cypress Trees.' 10 Love-songs. 1865, arranged 1887.
- Dramatic Overture for Orchestra (composed for the opera 'Alfred'). 1870.
- Symphony in Eb (originally Op. 10). 1873.
- Symphony in D minor (originally Op. 13). 1874.
- Rhapsodie for Orchestra (originally Op. 15). 1874.
- Vocal Duet. 1876.
- Six Choruses. 1877. 'The Song of a Czech.' 1877.
- Polonaise for Orchestra. 1879.
- Latin Hymn for Voice and Organ. 1878.
- Valse for PF. 1879.
- Eclogues for PF. 1880.
- 'Memories,' for PF. 1880.
- Two Impromptus for PF. 1880.
- Vocal Duet. 1881.
- Impromptu for PF. 1882.
- Humoresque for PF. 1884.
- Two Songs for Voice and PF. 1885.
- 'Forest Calm,' for Violoncello and Orchestra. 1891.
- 'Two Pearls,' for PF. 1887.
- Gavotte for three Violins. 1890.
- Two piano-forte pieces. 1894.
- Slumber Song. 1895.
- Song to words by Sv. Čech. 1901.

UNPUBLISHED WORKS

- Polka for PF. 1860.
- String Quintet in A minor (originally Op. 1). 1861.
- String Quartet in A (originally Op. 2). 1862.
- Symphony in C minor. 1865.
- Violoncello Concerto in A with PF. accompaniment. 1866.
- 'Cypress Trees.' 18 Songs to words by Pfleger. 1865.
- Symphony in Bb. 1865.
- Two Evening Songs. 1865.
- Opera, 'Alfred.' 1870. (See below.)
- String Quartet in D. 1870.
- String Quartet in E minor. 1870.
- Quintet in A for PF and Strings (originally Op. 5). 1872.
- String Quartet in F minor (originally Op. 9). 1873.
- String Quartet in A minor (originally Op. 12). 1873.
- Concert Piece for Violin and PF. 1878.

OPERAS

- 'Alfred,' tragic opera in 3 acts; words by K. Th. Körner. 1870. (Not produced.)
- 'King and Collier,' comic opera in 3 acts; words by B. Guldener. 1874. Produced at Prague, 1874.
- 'The Pigheaded Peasants,' comic opera in 1 act; words by J. Stöbba. 1874. Produced at Prague, 1881.
- 'Vanda,' grand tragic opera in 5 acts; words by V. B. Šumavský, from the Polish of Surzycki. 1875. Produced at Prague, 1876.
- 'The Cunning Peasant,' comic opera in 2 acts; words by J. O. Veselý. 1877. Produced at Prague, 1878; Dresden, 1882; Hamburg, 1883; Vienna, 1885.
- 'Dimnitrij,' tragic opera in 4 acts; words by M. Červinková-Riegrová. 1882. Produced at Prague, 1892.
- 'Jacobin,' tragic opera in 3 acts; words by M. Červinková-Riegrová. 1888. Produced at Prague, 1889.
- 'The Devil and Kate,' comic opera in 3 acts; words by A. Weing. 1899. Produced at Prague, 1899.
- 'Rusalka,' opera in 3 acts; words by Jaroslav Kvapil. 1900. Produced at Prague, 1901; Barcelona, 1924.
- 'Armida,' tragic opera in 4 acts; words by Jar. Vrchlický. 1903. Produced at Prague, 1904.

The following works are published in Czech.
The titles given are English equivalents:

DVORSKY, see HOFMANN, JOSEF.

DWIGHT, JOHN SULLIVAN (b. Boston, Massachusetts, May 13, 1818; d. there, Sept. 5, 1893), musical critic and journalist. He became a Unitarian minister after graduating from Harvard in 1832, but gave it up after a few years to devote himself to the Brook Farm community, where he taught music and the classics. In 1848 he returned to Boston and founded *Dwight's Journal of Music*, published 1852–81 (see PERIODICALS). It was a powerful force on the side of the best in music, conservative and unfriendly to the new developments of the period, but upholding ideals that needed to be upheld in the United States at that time. A memoir of him was published in 1899 by G. W. Cooke, who also edited Dwight's correspondence with George William Curtis.

A. R.

DYCK, ERNEST MARIE - HUBERT VAN (b. Antwerp, Apr. 2, 1861; d. Berlaer-lez-Lierre, Aug. 31, 1923), a famous Wagnerian tenor. After studying law at the universities of Louvain and Brussels he became a journalist in Antwerp and Paris. In the latter city he was taught singing by Saint Yves - Bax, and in June 1883 he sang at short notice at the 'Concours de Romo' concerts in Vidal's 'Gladiator' at the request of the composer's master Massenet, *vice* Warot ill. On Dec. 2 and 9 of this year he made his début at the Lamoureux Concerts in Bach's 'Phœbus and Pan' cantata, and in the Choral Symphony. In 1886 he married the sister of the violoncellist François Servais. On May 3, 1887, he made his début on the stage as Lohengrin at the production at the Eden Theatre, Paris, but the opera was only given twice, owing to the overwhelming opposition in Paris to Wagner and his works at the time. In 1888 he sang as Parsifal at Bayreuth with very great success, having previously studied the part under Mottl at Carlsruhe. Later in the year he was engaged at Vienna. On May 19, 1891, he made his début at Covent Garden as Des Grieux in 'Manon' with great success, and in the same season as Faust. In the autumn he sang as Lohengrin on the successful revival of that work at the Paris Opéra, and in Jan. 1892 sang as the hero in Massenet's 'Werther' on its production at Vienna. He sang for several seasons at Covent Garden (creating the title-part in Kienzl's 'Evangelimann,' July 2, 1897), and in Wagner operas in Paris, also in Brussels, the United States, etc. In 1907 he was manager of a winter season of German opera at Covent Garden, where he gave a large repertory of Wagner and revived 'Fidelio,' 'Der

Freischütz,' 'Lustige Weiber,' and 'Verkaufte Braut,' but the season was pecuniarily a failure. In 1908 he sang as Tristan and Tannhäuser at the Paris Opéra, and as Siegfried on the production of 'Götterdämmerung' there. He appeared as Parsifal at Bayreuth again in 1911 and in the first performance given at the Paris Opéra in 1914.

Van Dyck held a high position among the best Wagner singers, being particularly successful as Loge, Siegmund and Parsifal.

A. C.

DYGON, JOHN, the composer of a motet (3 v.), 'Ad lapidis positionem,' printed in Hawkins's *History*, where he is described as prior of St. Austin's (i.e. St. Augustine's Abbey), Canterbury. The known facts are that John Dygon took the degree of Mus.B. at Oxford in Apr. 1512, and that the signature appears as Prior of St. Augustine's with that of John Essex as Abbot in the deed of surrender of that Abbey (30 Henry VIII.), dated Sept. 30, 1538. Grattan Flood quotes the contemporary John Twyne as saying that in 1521 John Dygon, Sub-Prior of St. Augustine's, was sent to Louvain to study with the Spanish humanist Juan Luis Vives. The rest is mainly conjectural. A theory advanced by A. Hughes-Hughes in the second edition of this Dictionary is discussed by Grattan Flood in *Early Tudor Composers*.

C.

DYKES, (1) REV. JOHN BACCHUS, Mus.D. (b. Hull, Mar. 10, 1823; d. St. Leonards, Jan. 22, 1876), English Church composer. His grandfather was incumbent of St. John's Church, Hull. Dykes received his first musical tuition from Skelton, organist of St. John's. In Oct. 1843 he went to St. Catherine Hall, Cambridge, where he very soon obtained a scholarship.

He graduated as B.A. in 1847, and in the same year, having taken holy orders, obtained the curacy of Malton, Yorkshire. During his stay in CAMBRIDGE (*q.v.*) he pursued his musical studies under Walmisley, and became conductor of the University Musical Society. In July 1849 he was appointed Minor Canon and Precentor of Durham Cathedral. In the next year he proceeded M.A. In 1861 the University of Durham conferred on him the degree of Doctor of Music, and in 1862 he was presented by the Dean and Chapter to the vicarage of St. Oswald, Durham, on which he resigned the precentorship. Dr. Dykes composed many services and anthems, and a large number of hymn-tunes, many of which have become very popular. Among these may be noted 'Nearer, my God, to Thee,' 'The day is past and over,' and 'Jesus, lover of my soul.' He took an active part in the compilation of 'Hymns, Ancient and Modern.' Beyond his musical reputation he was much esteemed as a theologian. A memoir of Dykes, by J. T. Fowler, was published by Murray in 1897. He

was buried in the churchyard of St. Oswald, Durham, Jan. 28, 1876. His son, (2) JOHN ST. OSWALD (b. Oct. 27, 1863), is a successful pianist, a pupil of Mme. Schumann, and a professor of the pianoforte in the R.C.M. since 1887. A trio by him was played at the Popular Concert of Jan. 16, 1888. W. H. H.

DYLAN, opera in 3 acts, words by T. E. Ellis (Lord Howard de Walden), music by Holbrooke; produced Drury Lane, July 4, 1914. The second part of a trilogy of which *THE CHILDREN OF DON* is the first and *BRONWEN* the third.

DYNE, JOHN (d. Oct. 30, 1788), was a distinguished alto singer and glee composer. One of his glees, 'Fill the bowl,' obtained a prize from the Catch Club in 1768. In 1772 he was appointed a gentleman of the Chapel Royal, and in 1779 a lay vicar of Westminster Abbey. He was one of the principal singers at the commemoration of Handel in 1784. He died by his own hand. W. H. H.

DYPHON, see MACE, THOMAS.

DYSON, GEORGE (b. Halifax, Yorks, May 28, 1883), director of music at Winchester College, was educated at the R.C.M., where he held scholarships for the organ and composition (1900-4). He won the Mendelssohn Scholarship and travelled mainly in Italy and Germany (1904-8). A product of his Italian sojourn was a symphonic poem for orchestra, 'Siena,' suggested by the 'Palio' race, a vigorous and

picturesque work, produced at a concert of the PATRONS' FUND (*q.v.*) (July 1907) and played several times in London since, though still unpublished. On his return to England Dyson held music-masterships of increasing importance in public schools as follows: Osborne (1908), Marlborough (1911) and Rugby (1914). The next six years tested his capacities in other fields than that of music, and his *Manual of Grenade Fighting*, officially adopted by the War Office, is a permanent record of his occupations. Returning to civil life, Dyson was appointed organist and head music-master to Wellington College (1921), joined the teaching staff of the R.C.M., and also began lecturing and writing on musical subjects. His book, *The New Music* (1924), an examination of the modern technique in composition, is the outcome of essays published in *Music and Letters*, and lectures before the I.S.M., Musical Association and other bodies. In these several directions Dyson has exercised a strong educative influence, and his long experience of the needs and natures of boys in their schools, added to his own abilities as a musician, made his appointment to Winchester College (1924) peculiarly suitable. Dyson's published compositions are not many. Most important among them is a set of Three Rhapsodies for String Quartet (Carnegie Trust); there are also some piano pieces, songs and church music. G.

E, the name of the third degree of the natural scale of C in both English and German, the French and Italian name being *Mi*. Further nomenclature is as follows :

ENGLISH.	FRENCH.	GERMAN.	ITALIAN.
E flat.	Mi bémol.	Es.	Mi bemolle.
E double flat.	Mi double bémol.	Eses.	Mi doppio bemolle.
E sharp.	Mi dièse.	Eis.	Mi diesis.
E double sharp.	Mi double dièse.	Eisis.	Mi doppio diesis.

In the modal system E is the final of modes III. and IV., Phrygian and Hypo-phrygian; the dominant of modes IX. and XIV. (XII.), Aeolian and Hypo-ionian; and the theoretical dominant of mode XII., Hypo-loerian.

EAGER, JOHN (*b.* Norwich, Aug. 15, 1782; *d.* Edinburgh, June 1, 1853). Having learned from his father, a musical instrument-maker and organ-builder, the rudiments of music, he was, at 12 years old, taken under the care of the Duke of Dorset, an amateur violinist, who carried him to his seat at Knowle, where free access to the library enabled him to repair the defects of his early education.

His patron becoming insane he established himself at Yarmouth as a violinist and teacher of music. On the appearance of Logier's system of instruction Eager became one of its warmest advocates. In 1803 he was appointed organist to the corporation of Yarmouth. He passed the remainder of his life in teaching, settling in Edinburgh in 1833. He is said to have possessed a knowledge of, and to have taught, nearly every instrument then in use. His compositions consist of a pianoforte sonata and a collection of songs.

W. H. H.

EAGLES, see **ECCLES**.

EAMES, EMMA (*b.* Shanghai, Aug. 13, 1867), an operatic soprano singer of American parentage. She was taken to Bath, Maine, at the age of 5, and began her vocal training in Boston, becoming a pupil of Mathilde Marchesi in Paris, with whom she studied from 1886-88. She made her début as Juliette in 'Roméo et Juliette' at the Opéra in 1889, where she remained for two years, and created there the part of Colombe in Saint-Saëns's 'Ascanio.' In 1891 she appeared for the first time at Covent Garden as Marguerite in Gounod's 'Faust'; her later appearances there being as Elsa, Juliette, Mireille and Desdemona (in Verdi's 'Otello'). She afterwards added to her list of parts Micaëla, the countess in 'Figaro,' Eva, Elisabeth, Sieglinde, Tosca, Aida and Pamina.

Mme. Eames made her first appearance in opera in America at the Metropolitan Opera House in New York in 1891, as Juliette. She sang there every year thereafter until her retirement from the stage in 1909.

In 1891 she married Julian Story, a painter,

from whom she was divorced in 1907; and in 1911 she married Emilio de Gogorza, a baritone singer.

The quality of Mme. Eames's voice has been much admired; by some it has been considered somewhat cold. Its higher tones were produced with ease and flexibility; and she showed a high command of the technique and graces of florid singing. As an operatic actress her temperament was not essentially dramatic, and her command of the technique of acting was slowly gained.

R. A.

EARSDEN, JOHN, composer of songs. With George MASON (*q.v.*) he wrote the music for 'Ayres that were sung and played at Brougham Castle . . . in the King's Entertainment,' the words of which were written by Thomas CAMPIAN (*q.v.*) and published with the music in 1618.

E. H. F.

EAST (EASTE, ESTE, EST), the name, thus variously spelt, of one of the most important early music typographers and publishers, and of a composer reputed to have been the publisher's son. (1) THOMAS (*d.* 1608-09), is famous as the publisher of the Elizabethan madrigalists. Arber's *Stationers' Registers* show that he was made a freeman of the Company, Dec. 6, 1565, and that he issued a book of *Christmas Recreacons (sic)* in 1576. The first music printed by him was Byrd's 'Psalmes, Sonets and Songs of sadnes and pietie,' which was entered at Stationers' Hall, Nov. 6, 1587, and issued without date, being brought out in a dated edition in 1588, he then 'dwelling by Pauls Wharf,' and describing himself as 'the Assigne of W. Byrd'; i.e. assignee of the patent granted to the latter for the sole printing of music and ruled music paper. (See BYRD.) In the following year East removed to Aldersgate Street, where he published at the sign of the Black Horse. In 1592 he edited 'The Whole Booke of Psalmes, with their wonted tunes, in four parts.' The composers employed by him to harmonise the tunes were ten of the most eminent men of the day, viz.: Richard Allison, E. Blanks, Michael Cavendish, William Cobbold, John Dowland, John Farmer, Giles Farnaby, Edmund Hooper, Edward Johnson and George Kirbye. Two other editions of the work appeared in 1594 and 1604. This collection was the first in which some of the tunes were called by distinctive names—'Glassen-burie,' 'Kentish,' and 'Cheshire'—and was also one of the first to appear in score, instead of in separate partbooks. In 1600 he described himself as 'The Assigne of Thomas Morley,' and in 1609 as 'The Assigne of William Barley,' having acquired the interest in the patent granted to Morley in 1598 and by him assigned, or perhaps only licensed, to Barley. An example

of this monopoly music-paper stamped T. E. is to be seen in Thomas Hunt's autograph of his service (about 1600) in the library of St. Michael's, Tenbury (Tenb. MS. 786). East died before Jan. 17, 1609, when his successor, Thomas Snodham, obtained what would be now called his 'copyrights.' His widow, Lucretia East, died in 1631, having bequeathed £20, to purchase a piece of plate to be presented to the Stationers' Company. The most important works printed and published by East were:

1588, Byrd's 'Psalms, Sonets and Songs,' Yonge's 'Musica Transalpina'; 1589, Byrd's 'Songs of Sundrie Natures,' and 'Cantiones Sacrae,' bk. i.; 1590, Watson's 'Madrigals'; 1591, Damon's 'Psalter' (2nd ed.) and Byrd's 'Cantiones Sacrae,' bk. ii.; 1592, 'The Whole Booke of Psalmes'; 1593, Morley's 'Canzonets'; 1594, Morley's 'Madrigals,' and Mundy's 'Songs and Psalmes'; 1595, Morley's 'Bailets and two-part Canzonets'; 1596, Kirbye's 'Madrigals'; 1597, N. Patrick's 'Songs of Sundry Natures,' and 'Musica Transalpina,' 2nd ed.; 1598, Wilbye's '1st set of Madrigals,' Weelkes's '1st set,' Morley's 'Madrigals,' and 'Canzonets' from Italian authors, also a selection from O. di Lasso; 1600, Dowland's '2nd book of Ayres'; 1601, Jones's '1st book of Ayres,' and the 'Triumphes of Oriana'; 1603, Bateson's '1st book of Madrigals'; Weelkes's '2nd book' (1600), Byrd and Ferrabosco's 'Medulla Musicae' and Robinson's 'School of Musick'; 1604, Michael Este's '1st set of Madrigals,' Francis Pilkington's '1st book of Songs or Ayres'; 1605, Byrd's 'Gradualia'; 1606, Danyel's 'Songs'; 1607, Youll's 'Canzonets,' and Croce's 'Musica Sacra.'

The Whole Booke of Psalmes was published in score by the Musical Antiquarian Society in 1844, edited, with a Preface, by Dr. Rimbault (D.N.B.). W. H. H., addns.

(2) MICHAEL (*b. circa 1580; d. 1648*), composer of church music, madrigals and instrumental music, is conjectured to have been the son of Thomas.

He was probably quite a youth when invited to contribute to the 'Triumphes of Oriana' in 1601. His madrigal was sent in too late to be included in the body of that work, but it was added as an extra number at the beginning. His will, dated Jan. 7, 1647/8, was proved P.C.C. May 9, 1648. His son, Michael, continued to live in the Close at Lichfield. He also had a son Michael, aged 4 years in 1650.¹ He was organist of Lichfield Cathedral and took the degree of B.Mus. at Cambridge in 1606. From the dedication of his sixth set of books we gather that Williams, Bishop of Lincoln, had granted him an annuity to mark his appreciation of one of East's motets. In 1604 he published a set of madrigals, which was followed in 1606 by a second set, the preface to which is dated 'From Ely House in Holborne,' whence it may be inferred that he was then a retainer of Lady Hatton, the widow of Sir Christopher Hatton. In 1610 he published his third set of books, which was rather different in character from the first two; the vocal compositions were classified under various heads, namely, 'Pastorals,' 'Neapolitans,' 'Anthems' and 'Madrigals,' and there were included 8 Fancies for viols. The fourth set of books bears the date 1619, whereas the fifth set is dated 1618. The fourth set consisted mainly of madrigals, but included also some anthems. The fifth set contained 20 three-part madrigals,

¹ Dom. State Papers, Interregnum G. 290, Nos. 125, 127, 131. Communicated by Mr. C. S. Emden.

but no more than the opening phrase of the words was printed in any of the partbooks. The sixth set of books was published in 1624, and consists solely of anthems with one secular song printed on the fly-leaf; and the seventh set of books (1638) was devoted entirely to instrumental music, for, although it included some members 'that may be as well sung as plaid,' yet there are no words to them. East was an industrious composer, but his madrigals were not characterised by any marked individuality.

LIST OF WORKS

1. Madrigals to 3, 4, and 5 parts, 1604.
2. The 2nd Set of Madrigals to 3, 4, and 5 parts, 1606.
3. The 3rd Set of Books, 1610.
4. The 4th Set of Books, 1619.
5. The 5th Set of Books, 1618.
6. The 6th Set of Books, 1624.
7. The 6th Set of Books, 1638.
8. 'The Stars too dim of Light' for the 'Triumphes,' 1601.

 'When Israel came out of Egypt' and 'What alleth thee?' Durh., Add. MSS. 29,372-7. (Both these anthems are included in the Third Set of Books, 1610—see above.)

J. M^c.

EASTCOTT, REV. RICHARD (*b. Exeter, 1740; d. 1828*), was author of *Sketches of the Origin, Progress and Effects of Music, with an Account of the Ancient Bards and Minstrels*, a well-executed compilation published at Bath in 1793, which was so favourably received as to call forth a second edition in the same year. He also published six pianoforte sonatas and some songs. At the time of his death he was chaplain of Livery Dale, Devonshire. He was the early patron of John DAVY (*q.v.*).

W. H. H.

EBDON, THOMAS (*b. Durham, 1738; d. there, Sept. 23, 1816*), organist.

It is presumed from the circumstance of the name and date 'T. Ebdon, 1755,' still remaining, carved on the oak screen which divides the choir of Durham Cathedral from one of the aisles, that he received his early musical education in that church as a chorister, and probably, after the breaking of his voice, as an articulated pupil of the organist. In 1763 he was appointed organist of Durham Cathedral, which office he held until his death, forty-eight years afterwards. In 1783 he was associated with M. Hawdon, as conductor of the Newcastle Subscription Concerts; in 1786 he was associated with Meredith, and in 1790 with Charles Avison, junior, and Hawdon. Ebdon's published compositions comprise two harpsichord sonatas (*c.* 1780), six glees; a march for the installation of a grand provincial master of Freemasons;

and two volumes of cathedral music, the first of which appeared in 1790, and the second in 1810. Besides these he left many anthems, etc., in MS., the last of them bearing date June 1811.

W. H. H.

EBELING, CHRISTOPH DANIEL (b. Garmis-sen, Hildesheim, c. 1741; d. Hamburg, June 30, 1817); professor at Hamburg college and the Academy of Commerce from 1772. He established subscription concerts in 1775 and 1776, translated Handel's 'Messiah,' and Burney's diaries and wrote articles on musical subjects, a short history of the opera, and a 'Divertissement zu den Poeten nach der Mode' a 4 v., with instruments (*Mendel*; *Q.-L.*).

EBELING, JOHANN GEORG (b. Lüneburg, July 1637¹; d. Stettin, 1676), was director of the music at the Nikolaikirche of Berlin in 1662, and in 1668 professor of music at the Caroline Gymnasium at Stettin. He composed church music and some chorales of his are favourites; e.g. 'Warum sollt ich mich denn grämen.' He published *Archaeologiae Orphicae sive antiquitates musicae*, Stettin, 1675; *Pauli Gerhardi geistliche Andachten, bestehend in 120 Liedern mit 4 Singstimmen, 2 Violinen und Generalbass*, Berlin, 1666-67; a reduction of the latter into two parts, 1669.

EBER(US), MAGISTER PAUL (b. Kitzingen, Nov. 8, 1511; d. Wittenberg, Dec. 10, 1569), composed a book of Christmas songs, 'Cantilenae aliquot piae ad suaves, 4 et 5 voc.' (1570), and a German augmented version (1570); also a 4-part song in Figulus's 'Weihnachtslieder,' 1575. He was a collaborator in 'Cantilenae latinae,' 1591.

E. v. d. s.

EBERHARD VON FREISINGEN, (11th cent.), wrote 2 treatises on the organ, *De mensura fistulorum*, and *Regulae ad fundendas notas, id est organica tintinnabula*, both in Gerber, ii. 279.

E. v. d. s.

EBERL, ANTON (b. Vienna, June 13, 1766; d. there, Mar. 11,² 1807), a distinguished pianist and composer.

His theoretical studies were slight, but his first opera, 'La Marchande de modes' (Leopoldstadt, 1787), is said to have pleased Gluck so much that he advised the young composer to devote himself seriously to music. His friendship with Mozart was also of great service to him. His melodrama 'Pyramus and Thisbe' was produced at the court theatre in 1794, on his return from his first professional tour; but he soon undertook another in Germany, in company with Mozart's widow and Lange the singer. In 1796 he was appointed Kapellmeister at St. Petersburg, where he remained for five years greatly esteemed. On his return to Vienna he produced at the court theatre (May 1801) a romantic opera, 'Die Königin der schwarzen Inseln,' which was, however, only a

partial success. In 1803 he went again to Russia, and in 1806 travelled to all the principal towns of Germany, where the brilliance and fire of his playing were universally acknowledged. He returned to Vienna and died there suddenly. His compositions were long favourites. The following are among the most remarkable:

Five symphonies, dated 1783, 1784 and 1785, in MS. in the library of the Gesellschaft der Musikfreunde at Vienna; 'Grand Sonata,' op. 27, dedicated to Cherubini; 'Gr. Sonate caractéristique' in F minor, op. 12, dedicated to Haydn (Peters); 'Variations sur un thème russe,' for Violoncello obbl., op. 17; three Pianoforte Trios, op. 8, dedicated to Grand-Duke Pawlowsitch; Trio for Pianoforte, Clarinet and Violoncello, op. 36 (Kühnel); Pianoforte Quartet in C major, op. 18, dedicated to Maria Theresa; ditto in G minor, op. 25 (Vienna); ('Lavier Quintet,' op. 78 (Vienna); Sestet for Piano, Strings, Clarinet and Horn, in E flat, op. 47; Pianoforte Concertos in C major, op. 32, and E♭ major, op. 40 (Kühnel); and three String Quartets, op. 13, dedicated to Emperor Alexander I. (Vienna, Mollo). He also published many smaller pianoforte pieces for two and four hands, and six Lieder, op. 4 (Hamburg); a wedding cantata with orchestral accompaniment, 'La gloria d'Imeneo,' op. 11, also arranged for pianoforte; and a Symphony in D minor (Breitkopf & Härtel). He left in MS. symphonies, serenades, concertos for one and two pianofortes, several pieces of chamber music, and unpublished operas, besides the three already mentioned. (See list of works still extant in *Q.-L.*)

Though he has now entirely vanished from the concert-room, Eberl must in his day have been a very considerable person. It is well known that several of his pianoforte works were long published (and popular) as Mozart's—viz. the fine Sonata in C minor (finally published with his own name as op. 1 by Artaria); Variations on the theme 'Zu Steffen sprach'; Variations on 'Freundin sanfter Herzensstriebe'; and on 'Andantino von Dittersdorf.'* His symphony in E♭ would actually appear to have been played in the same programme with Beethoven's 'Eroica'†; and the two are contrasted by the reviewer to the distinct disadvantage of the latter! C. F. P.

BIBL.—FRANZ EWERS, *Anton Eberls Leben und Kompositionen*. Cologne Dissertation, 1923.

EBERLIN (EBERLE), JOHANN ERNST (b. Jettingen, near Günzburg Bavaria, Mar. 27, 1702; d. Salzburg, June 21, 1762), court organist and 'Truchsess' (or carver) from 1754 to the Prince-Archbishop of Salzburg, and an eminent German composer of sacred music.

He was the son of the land-steward to Baron von Stain. We learn⁵ that he was fourth organist at the Cathedral of Salzburg in 1725-1729, and chief organist in the latter year. He was court-organist to Archbishop Franz Anton, Graf von Harrach, as early as the time of his marriage, which took place in 1727 at Seekirchen on the Wallersee, near Salzburg. Among the best known of his many works are 'IX toccate e fughe per l'organo' (Lotter, Augsburg, 1747), dedicated to Archbishop Jacob Ernst. They passed through many editions, and are also printed in Commer's *Musica sacra*, vol. i. Nägeli's edition contains only the nine fugues. The last fugue, in E minor, was published (in E♭ minor) as Bach's in Griepenkerl's edition of Bach's works (Book ix. No. 13), an error which has since been corrected. Six preludes and fugues are in part 12 of the *Trésor des*

¹ Baptized July 11. (*Riemann*).

² Mar. 15, according to Becker.

³ See Köchel, anh. 287, 8.

⁴ *A.M.Z.* v. 321.

⁵ *M.f.M.* v. 41.

pianistes. Haffner published sonatas in G and A, and Schott two motets, 'Qui confidunt' and 'Sicut mater consolatur,' for three voices, with clavier accompaniment. To Leopold Mozart's collection for the Hornwerk at Hohen-Salzburg, 'Der Morgen und der Abend' (Lotter, 1759), Eberlin also contributed five pieces. *Q.-L.* gives a list of his church compositions in MS. in the libraries of Berlin, Vienna, Salzburg, Munich, Ratisbon, and *Fétis* cites the Latin dramas he composed for the pupils of the Benedictine monastery at Salzburg (1745-60), of which, however, the words only are extant. Proske's library contains the autographs of 13 oratorios, including the 'Componimento sacro,' performed with great success at Salzburg in 1747. The Gesellschaft der Musikfreunde at Vienna, possesses a copy of a Mass and a fugue for two choirs with double orchestra. Eberlin's strict writing was so much prized by Mozart that about 1777 he copied thirteen of his pieces (mostly church music in four parts), together with some by M. Haydn, into a MS. book which he kept for his own instruction, and which still exists. He afterwards (1782), however, wrote to his sister that Eberlin's fugues could not be ranked with those of Bach and Handel—'All honour to his four-part pieces; but his clavier fugues are merely extended Versetti.' Marpurge was the first to proclaim his merit,¹ and says that he wrote as much and as rapidly as Scarlatti and Telemann. C. F. P.

EBERS, CARL FRIEDRICH (*b.* Mar. 25, 1770; *d.* Berlin, Sept. 9, 1836), son of a teacher of English at Cassel, was a man evidently of great ability, but as evidently of little morale, taking any post that offered, and keeping none; doing any work that turned up to keep body and soul together, and at length dying in great poverty. He was in Schwerin in 1793, and at Strelitz in 1797. Some of his arrangements have survived, but his compositions—four operas, cantatas, symphonies, overtures, dance music, wind-instrument ditto, and, in short, pieces of every size and form—have all disappeared from the musical repertory with the exception of a little drinking-song, 'Wir sind die Könige der Welt,' which has hit the true popular vein. G.

His arrangement of Weber's clarinet quintet (op. 34) as a piano sonata called forth a vigorous protest from the composer in the *A.M.Z.* of Dec. 11, 1816. Ebers wrote an impudent rejoinder in the next number of the paper. Grove printed translations of both in former editions of this Dictionary. C.

EBERS, JOHN (*b.* London, c. 1785; *d. circa* 1830). The exact date of his death is uncertain, but his business was carried on with the style 'John Ebers & Co.' until 1836, when it was called 'S. Ebers & Co.' This may imply that he lived until about 1835, but it seems more likely that he died about 1830.

¹ *Kritische Beiträge*, vol. III. Stück 3, p. 183. (Berlin, 1787.)

Originally a bookseller and ticket-agent, he undertook the management of the opera at the King's Theatre in 1821, with Ayrton as musical director.

He engaged Garcia, Galli, Mme. Camporese, Pasta and other celebrated singers, besides Rossini (1824), but the expenses were so enormous that in seven years he was completely ruined.² He resumed his business as a bookseller after his failure (see *D.N.B.*). He published *Seven Years at the King's Theatre* (London, H. Ainsworth, 1828), an interesting record of Italian opera at that time in London.

M. C. C., with addns.

EBERWEIN, TRAUGOTT MAXIMILIAN (*b.* Weimar, Oct. 27, 1775; *d.* Rudolstadt, Dec. 2, 1831), violinist and composer, of note in his day.

At the age of 7 he played in the court band of Weimar, where his father was engaged. In 1797 he entered the service of the Prince of Schwarzburg-Rudolstadt, but it was not till 1817 that he became his Kapellmeister. In the interval he travelled much, making the acquaintance of Adam Hiller and Zelter at Berlin, and of Beethoven and Salieri at Vienna. He was a man of some influence and position, and one of the original founders of the musical festivals in Germany. His works, more numerous than original, include eleven operas, of which 'Claudine von Villa Bella' (1815) and 'Der Jahrmakkt von Plundersweile' (1818) enjoyed some celebrity: three others are mentioned in *Q.-L.*; three cantatas: a Mass in A₇, his best work; a symphonie-concertante for oboe, horn and bassoon; concertos, quartets, etc. M. C. C.

EBNER, WOLFGANG (*b.* Augsburg, c. 1610; *d.* Vienna, Feb. 1665), organist at St. Stephen's Cathedral, Vienna, from 1634; in the court chapel from Aug. 1, 1637; and Kapellmeister at St. Stephen's from 1663. Of his compositions, which were greatly valued in his time, but little has survived. He wrote 'Variations on a theme of the Emperor Ferdinand III.' for harpsichord, a sonata for 2 violins and viola da gamba, 1 motet, and some ballet airs for 4 viols and harpsichord. E. v. d. s.

ECCARD, JOHANN (*b.* Mülhausen, Thuringia, 1553; *d.* 1611³), was a church composer of importance in the development of the German chorale.

Eccard was a pupil of David Köller in the Kapellschule at Weimar from 1567-71, when he was paid three gulden 'zu endlicher Abfertigung' (E. Pasqué's MS. 1892, published in *Monatshefte*, 1897). He probably went that year to Munich to study under Orlando di Lasso; Stobæus (*Preuss. Festlieder*) refers to him as a pupil of the 'world-famed' Orlando. Eccard had returned to Mülhausen in 1574. In

² *Quarterly Mus. Mag.*, III. 379, vi. 516-26, vii. 189-91.

³ An engraved portrait dated 1634, is inscribed 'Natus anno 1553. obit 1611.'

1578 he was musician in the household of Jacob Fugger of Augsburg; for in dedicating his 'Neue deutsche Lieder,' 1578, to the three brothers Fugger, he says:

'Also hab' ich verschienener Zeit, in des . . . Herrn Jacob Fuggers, meines gnedigen Herrn, E. G. gebrüder dienst etliche deutsche Lieder, etc.'

dated from Augustae Vindelicorum, 1578. Similarly a MS. Mass in the Munich Hofbibliothek is dated 'de Jacobi Fuggeri Musico, 1578.' By 1581 Eccard was settled in Königsberg; in that year he published there his five-part music to some wedding hymns, in conjunction with the Kapellmeister, Theo. Riccio, and in the following year the five-part music to Psalm cxxxiv. (Jos. Müller, *Mus. Schätze*, 1870). Eccard was appointed vice-Kapellmeister and Musicus by the Markgraf Georg Friedrich of Brandenburg-Ansbach, and later, in 1604, he succeeded Riccio as Kapellmeister. On July 4, 1608, Eccard was summoned to Berlin to be Kapellmeister to the Kurfürst Joachim Friedrich of Brandenburg; the latter died on July 18, and was succeeded by Johann Sigismund, who in a letter on the following Sept. 11, confirmed the appointment on the grounds that Eccard was greatly famed and his equal not easily to be found, that he was an old, peaceful and quiet man, and that the salary, considering his attainments, was not too high!¹

Eccard's treatment of well-known chorales in his great work *Geistliche Lieder*, 1597, as well as of the fine chorales of his own composition, causes him to stand out prominently among his contemporaries. This work, consisting of motets for five voices, was undertaken at the request of the Markgraf Georg Friedrich; Eccard himself thought it the first real attempt to produce a cantional, written not only with religious but with musical and artistic aims: 'Darin nach musikalischer Art, was anmüthiger und der Kunst gemässer enthalten wäre.' Among his chorales which became a permanent part of church-song were the three, first published in 1574 (III Odae); the four which appeared in *Dreissig geistliche Lieder*, 1594; 'Es rühmt die heilige Schrift,' composed for a wedding-hymn in 1591; and 'Nachdem die Sonn, beschlossen,' from the 'Gebetlein,' 1600. Zahn (*Die Melodien der deutschen evangelischen Kirchenlieder*, 1889-93) gives twenty melodies with their sources and the various publications in which they subsequently appeared. There have been many reprints of Eccard's sacred songs; Herr v. Winterfeld, who considered that the characteristic strength and feeling in these compositions fully equalled anything produced by his Italian contemporaries, printed altogether forty-six of them.² Ten of Eccard's compositions, including 'O Freude über Freude' for double choir, are in *Musica sacra*, vols. v. and vi., edited by A. Neithard for the use of

the Berlin Domchor; eleven are in Fr. Wültners *Chorabungen der Münchener Musikschule*, 1893-95; in Commer's *Geistliche und weltliche Lieder*, 1870, Nos. 5 and 6; in Reissmann's *Allgemeine Geschichte der Musik*, 1863, Nos. 10 and 11; in Sir H. Bishop's '12 Coräle,' 1844, No. 11: one set to the English words 'When Mary to the Temple went,' edited by Otto Goldschmidt in the *Bach Choir Magazine*, has a quaint simplicity which is very pleasing. G. W. Teschner (1860-90) reprinted both the *Geistliche Lieder*, two vols., and the *Preussische Festlieder*, two vols.

On the other hand, Eccard's secular works, comparatively limited in number, have been carefully edited by Robt. Eitner, in the *Publ. älterer prakt. u. theoret. Musikwerke*, vol. xxi., 1897. He notes approvingly that Eccard differs from his contemporaries inasmuch as he always marks the necessary sharpening or flattening of notes.

LIST OF COMPOSITIONS

1. IIII Odae Lud. Heimboldi, Latinae et Germanicae . . . in 4 Stimmen componiert, durch J. & Burck, & Johannem Eccardum, Mühlhausen. Georgium Hauebach: 1574. Obl. 4to. Discantus and Bassus in Breg Gymnasialbibl. Three of the Odes were set to music by Eccard:—(1) Age nunc, parve puer. (3) Das noch viel Menschen. (4) Ihr Alten pflegt zu sagen. They were included in Heimbold's *Crepundia sacra*, 1578; later editions in 1589, 1596, 1609 and 1626. A. Prüfer reprinted it in 'Untersuchungen über den ausserkirchlichen Kunstgesang.' Leipzig, 1890.

2. Neue teutsche Lieder, mit vieren und fünf Stimmen, gantz hehlich zu singen, und auff allerley musikalischen Instrumenten zu gebrauchen, mit besonderm Fleiss und Observation componiert durch Johannem Eccardum Mühl. des waltzschloß Herrn Jacobi Fuggers Musicum. Mühlhausen. G. Hantzsch. 1578. Obl. 4to. Twenty-four compositions, two only being to sacred words. Five partbooks in U. psala Library.

3. Neue Lieder mit 5 und 4 Stimmen, gantz hehlich zu singen, und auff allerley Instrumenten zu gebrauchen: Durch Joh. Ecc. Mühl. F. D. (Fürstlicher Durchlaucht) in Preussen Musicum und Vice Capellmeister compoirt, corrigirt und in Druck verfertigt. Königsberg in Preussen. Georg Osterberger. 1589 (obl. 4to). Dedicated to the Burggrafen, Bürgermeister, etc., of Danzig. Twenty-five compositions, fifteen secular, ten sacred. Five partbooks in Berlin Königl. Bibl., etc. Reprinted in score by Eitner, 1897 (see above).

4. Epigrammata in honorem nuptiarum . . . per Th. Riccium. 6 vocibus. 1586. Obl. 4to. Includes 'Virgo boni patris' by Eccard.

5. XX Odae sacrae: Lud. Heimboldi . . . Harmonice numeris, pro scandione versum ornatae & compositae 4 vocibus a Joh. Ecc. Mühl. Illus. Principia ac Domini, D. Georg. Frid. Marchionis Brandenburgensis, etc. 'Hortus musicus Vicemagistri. Impensis Hyeron. Heinrichi Mühl. 1596. Sm. 8vo. One volume in Zwieskau Ratsschulbibl. Another edition in 1626, possibly an earlier one in 1574.

6. Dreyssig geistliche Lieder . . . mit 4 Stimmen auff besondere darn von L. Heimboldo verordnete Textus . . . ausgegangen von J. & Burck. Mühlhausen. Andrean Hantzsch. 1594. 12mo. Nos. 11. Zu dieser orteischen Zeit; 13. Gen Himmel fahrt; 15. Der heilige Geist; 20. 'Herr Gebirg Maria; were by Eccard. An earlier edition probably published in 1585, later editions in 1609 (Eitner) and 1626.

7. Der erste Theil geistlicher Lieder auff den Choral oder die gemeine Kirchen-Melodey durchaus gerichtet, und mit fünf Stimmen componiert durch Joh. Ecc. Mühl. F. D. zu Preussen, etc. Musicum und Vice Capellmeister. Königsberg in Fr. G. Osterberger. 1597. Obl. 4to.

Der Ander Theil geistlicher Lieder, etc. 1597. Obl. 4to. Vol. I. contains twenty-three and vol. II. twenty-nine compositions; the melodies are in the Diacant. The five partbooks of each vol. in Frankfurt Gymnasialbibl., etc.

8. Echo nuptialis magnifico . . . Andrean Fabricio, etc. A. Johann. Eccardio Mühl., etc. Ex other ed. G. Osterberger. 1597. Obl. 4to. Echo a 8 voci. The eight voice parts in British Museum.

9. Vierztig deutsche christliche Liedlein L. Heimboldi . . . in 4 Stimmen abgesetzt, die ersten 22 durch J. & Burck, die letzten 18 durch Joh. Ecc. Mühl. Auf's neu zusammen gedruckt zu Mühlhausen. A. Hantzsch. 1599. 8vo. Four partbooks in Hamburg Stadtbibl., etc.

10. Gebetlein umb ein gnediges köstliches Neues Jahr zu Ehren unser gnedigten Herrschafft der Hertzoge in Preussen etc. Mit 5 Stimmen componiert durch Joh. Eccard. Königsberg in Fr. G. Osterberger. 1600. 4to. Text: 'Nachdem die Sonn, beschlossen.' Five partbooks in Königsberg Univ.-Bibl.

11. Geistliche Lieder auff gewöhnliche preussische Kirchen-Melodeyen durchaus gerichtet, und mit 5 Stimmen componiert. Durch Joh. Ecc. Mühl. Thüringum, und J. Stobaum, etc. Danzig. Georg Rhetan. 1634. Obl. 4to. 102 compositions, fifty-seven by Eccard, which include his fifty-two geistliche Lieder, part. 1597. Five partbooks in Königsberg Univ.-Bibl., etc.

12. Erster Theil der preussischen Festlieder, von Advent an bis Ostern mit 5, 6, 8 Stimmen. Joh. Ecc. Mühl. Thür. und J. Stobaum etc. Elbing. Wendel Bodenhausen. 1642. Obl. 4to. 40 compositions. Ander Theil . . . von Ostern an bis Advent mit 5, 6, 7, 8 Stimmen,

¹ L. Schneider, *Gesch. der Oper*, 1852. Anhang., pp. 23, 25.

² *Der evangelische Kirchengesang*, vols. I. and II., 1843.

etc. Königsberg. J. Reusner. 1644. Obl. 4to. Sixty-one compositions; thirteen in vol. i. and fourteen in vol. ii. are by Eccard; they include (in vol. i. No. 20) No. 7 of the *Newe Lieder*, 1599; and 'Der heilly Geist' 'Zu dieser geystlichen Zeit,' from *Dreyssig geistliche Lieder*, 1594. Six partbooks of each vol. are in Elbing Marienkirche Bibl., etc. The first edition is said to have been published at Königsberg, 1598.

There are forty-seven small works of Eccard in the Königsberg Univ.-Bibl. with four exceptions, all wedding hymns (some of them composed 'nach Villanellen Art'), for 4, 5, 6 or 8 voices, published at Königsberg between 1585 and 1609. (Jos. Müller, Kat.) There are two in the Breslau Stadtbibl.: 'Tria me exhilarant' for 6 voices, 1586 (one partbook missing), and 'Honorable est inter omnes' for 5 voices, 1610 (Bohn Kat.). Some of these were later fitted with sacred words and included in the *Preussische Festlieder*, 1642-44.

Odorum sacrarum. Six vols. Mühlhausen. 1626. A collected edition of Heinbold's works included.—Vol. iv. *Odæ sacre* (1596); vol. v. *Dreyssig geistliche Lieder* (1594); vol. vi. *Crepundia sacra* (1577).

Geistliche Lieder. Matthæum Pfeilschmidt. 1608. Some five part (chorale).
Geistliche u. tröstliche Lieder. Michaelum Weyda. 1643. Several melodies.

Cautionale sacrum. Gotha. 1646-48; later ed. 1651-57. One composition.

Preussische Kirch- und Fest-Lieder. J. Reinhard. 1653. Forty-three melodies with figured bass, which included seventeen of those published in 1634.

Christlich . . . Gesangbuch. Erfurth, 1663. Three melodies. *Passionale meliorum*. Martino Juno. Gießen, 1663. 10 vols. for J. Joh. Krüger's Praxis pietatis. Peter Sohren. Frankfurt, 1668.

Four melodies with figured bass. Another edition, 1693, has one.

Preussisches Kirchen-Schul- u. Haus-Gesangbuch. 1675, and again in 1690, has five melodies. Another edition, 1702, has eight.

Musikallcher Vorchmack. Peter Sohren. 1683. Four melodies with bass.

Neue christliche Lieder. H. G. Demme. Gotha, 1799. Nos. 33 to 44, melodies by Eccard, Burck, etc.

Dr. Martin Luther's deutsche geistliche Lieder. C. v. Winterfeld. Leipzig, 1840. Nos. 6, 9, 13 from *Geistliche Lieder*, 1597, vol. II.

MSS.

In the Augsburg Stadtbibliothek: MS. 26 (1578); two motets a 5 voci, 'Vultum tuum dispresuntur' and 'Terribilis est locus iste.' A Kyrie a 4 voci. MS. 28 (1579) Missa a 5 voci, 'Mon cour se recommande a vous.' This Mass is also in the Munich Hofbibl. (Mus. MS. 57) dated: 'Auctore Joanne Eccardo, Mühlusino, de Jacobo Fugger Musico, 1578,' which is altered in another hand, writing to 1598. From this MS. the Kyrie, Sanctus and Agnus Dei were scored and published by Fr. Willner, *Chorübungen der Münchener Musikschule*, 1895.

In the Breslau Stadtbibl. MSS. 12, 17, 18, 20, 32 and 137 contain many of the *Geistliche Lieder*, publ. 1597. In the Königsberg Universitätsbibl. Motets: a 5 voci, 'Divitias quaerant alii' (with *Basso continuo*) and 'Kein edler Ding' (*Discantus missing*); a 6 voci, 'Gott ist mein Heil' (two copies) and 'Nuper saevus amor' (*Discantus missing*). Masses: a 6 voci, 'Domine adjuvandum' and 'Veni sancte spiritus'; a 6 voci, 'Domine quid multiplicati.' Also compositions in MSS. 66, 67, 69, 75 to 79, and 394.

In the Liegnitz Königl. Ritter-Akademie Bibl., in MSS. 15, 18, 19, 20 and 22, are fifteen different *Geistliche Lieder* for 4 and 5 voices. Q.-L. also gives a large number of MSS. in the Berlin Königl. Bibl.: a five-part motet (index 96) in the Nuremberg Lorenzkirche Bibl.; and 'O Freude über Freude,' for double choir (MS. 278, No. 10, in Score) in Dresden Hofbibliothek.

Bibl.—GRETE REICHMANN, *Joh. Eccards weltliche Werke*. Heidelberg Dissertation, 1922.

ECCLES (EAGLES), (1) SOLOMON (b. 1618; d. Feb. 11, 1683), descended from three generations of musicians, was from about 1647 a teacher of the virginals and viols, a pursuit from which he for some years derived £200 a year (see his *Musick-Lector*), but, embracing the tenets of Quakerism about 1660, he abandoned his profession, broke all his instruments, and burned them, together with his music books (the value of the whole being more than £24), on Tower Hill, and adopted the trade of a shoemaker.

His vagaries during the early part of Charles II.'s reign, and particularly during the great plague of 1666, when he ran naked through the town with a brazier of burning brimstone on his head, point to a deranged intellect. In 1667 he published a curious tract entitled:

'A Musick-Lector, or, The Art of Musick . . . discoursed of, by way of dialogue between three men of several judgments: the one a Musician, a zealous for the Church of England, who calls Musick the gift of God: the other a Baptist who did affirm it to be a decent and harmless practice: the other a Quaker (so called) being formerly of that art doth give his judgment and sentence against it, but yet approves of the Musick that pleaseth God.'

from which the foregoing particulars are gathered. He accompanied George Fox to the West Indies in 1671, and organised Quakerism there. He was in New England in 1672, and was prosecuted in 1680 at Barbadoes for seditious words. He is supposed to have resumed his profession and contributed several ground basses with divisions thereon to 'The Division Violin.' He was buried at Spitalfields.

His eldest son, (2) JOHN (b. London, c. 1650¹; d. Kingston, Jan. 12, 1735), learned music from his father, and about 1681 became engaged as a composer for the theatre, in which occupation he continued for upwards of a quarter of a century.

Among the earlier plays to which he wrote music, are 'The Spanish Friar,' 1681; 'The Lancashire Witches' and 'The Chances,' 1682; 'The Richmond Heiress,' 1693; and 'Love for Love,' 1695. Of the pieces to which he contributed, the most important (musically considered) were 'Don Quixote' (with Purcell), 1694; 'The Loves of Mars and Venus' (with Finger), 1696, and a revival of 'Macbeth' in 1696; 'Europe's Revels for the Peace,' 1697; 'The Sham Doctor,' 1697; 'Rinaldo and Armida,' 1699; and 'Semele,' 1707. A longer list of the plays will be found in the *D.N.B.* In 1700, after the death of Dr. Nicholas Staggins, Eccles was appointed master of the King's Band of Music, in fulfilment of the duties of which office he composed numerous birthday and New Year's odes. He had been a member of the band since 1694. He gained in 1700 the second of the four prizes given for the best compositions of Congreve's masque, 'The Judgment of Paris'; the first being awarded to John Weldon, and the third and fourth to Daniel Purcell and Godfrey Finger. The score of Eccles's music for this piece was printed. In the same year he wrote music to Congreve's 'Way of the World.' At about this time he published three volumes of 'Theatre Music'² (the 2nd and 3rd are dated London 1699 and 1700 respectively) containing arrangements of a large number of tunes, but without giving the names of the plays to which they belonged. In 1701 he set the ode written by Congreve for the celebration of St. Cecilia's Day in that year; and in 1702 wrote music for the coronation of Queen Anne.³ About 1710 he published a collection of nearly one hundred of his songs, comprising many of those which he had written for no fewer than forty-six dramatic pieces. The freshness and flow of Eccles's melodies rendered his songs universal favourites. In the latter part of his life he gave up all professional pursuits, except the annual production of the birthday and New Year odes, and retired to

¹ *Eitner and Riemann* give 1668 as the date of birth, apparently taking the statement from *Brit. Mus. Biog.* This would make him only 13 years old when he began to write music for the theatre, and no evidence for the date is forthcoming.

² Durham Cathedral Library Mus. Cat. 78.

³ The autograph score of Q. Anne's Coronation Ode is at Tenbury

Kingston-upon-Thames for the diversion of angling, to which he was much attached.

(3) HENRY, second son of Solomon, was a violinist of considerable ability, and a member of the King's Band from 1674-1710; conceiving himself neglected in England, he betook himself to Paris, where he was admitted a member of the French King's Band. In 1720 he published at Paris, in two books, 'Twelve Solos for the Violin' written in the style of Corelli. The first book of these sonatas contains adoptions from G. Valentini's *Allamenti* (op. 8).¹ In 1723 appeared his first and second books of sonatas for viola (viol). He was living in Paris in 1735, and Mendel's *Lexikon* gives 1742 as the date of his death, but without giving any authority.

(4) Another HENRY ECCLES, possibly uncle of this one, was a violinist in the King's Mask, etc., in 1674 and later; the name occurs in 1685 as a 'base,' and in 1689 he was appointed to the private music.²

(5) THOMAS, youngest of the three sons of Solomon, studied the violin under his brother Henry, and became an excellent performer. Being idle and dissipated, he gained a scanty and precarious subsistence by wandering from tavern to tavern in the city and playing to such of the company as desired to hear him.

W. H. H., with addns.

ECCLESIASTICON, a collection of classical church music in score, published by Diabelli & Co. of Vienna. Its contents are as follows:

No.	No.
1-20. Michael Haydn, Graduales.	63. Czerny, six Graduales.
21. Horzalka, Missa Solennis, op. 27.	64. Reissiger, Grand Mass in Eb.
22. Stadler, Saluum fac.	65. Mozart, Tremendum.
23. Do. Magna et mirabilia.	66. Sechter, Salve Regina and Ave Maria.
24. Mozart, Regina coeli.	67. Worzischek, Offertorium.
25-34. Cherubini, Offertorium and Graduales.	68. Geiger, Mass.
35. Stadler, Delectare.	69-71. Assmayr, Offertoria.
36. Do. Si Deus.	72. Mozart, Offertorium in F.
37. J. S. Bach, Chorus, Da pacem.	73. Seegner, Mass in F.
38. Winter, Dominus Israel.	74. Sechter, Missa Solennis in C.
39. Sechter, Mass, Graduale, etc.	75. Mozart, Sancti et Justi.
40. Albrechtsberger, Offertorium.	76. Seegner, Grand Mass in Eb.
41-62. Michael Haydn, Graduales.	77. Do. Mass in D.
	78. Beraneck, Offertorium.

ECHO. The organs built immediately after the Restoration generally contained what was then a novelty in England, called the Echo. This consisted of a repetition of the treble portion of a few of the leading stops of the organ, voiced softly, shut up in a wooden box, placed in some remote part of the organ case—usually behind the desk-board—and played upon by a separate half-row of keys. The 'echo effect' enjoyed great popularity for many years, and exercised an influence on much of the contemporary music both for voices and instruments. Purcell in some of his anthems exhibited a predilection for the loud and soft contrast; while most of the pieces written for keyed instruments abounded with recognitions of it up to the time of Handel, whose concertos, suites, etc., gave fresh impetus to the popular taste.

(See CORNET.) The Eco, very popular in old French organs, was used more freely and ingeniously than was the Echo by English composers. Modern echo organs are often placed at a distance from the main body of the instrument, with which they are connected by electricity; they generally possess a manual of their own, sometimes (as at Norwich and Westminster) styled a 'Celestial Organ.' At St. Paul's Cathedral, where it is played from the Solo manual, and used to accompany the voice of the priest at the altar, it is called the 'Altar Organ.' E. J. H.; addns. T. E. and H. G.

ECK (1), JOHANN FRIEDRICH (b. Mannheim, 1766; d. Bamberg, c. 1809³), an eminent violinist, son of a horn-player in the band. He was a pupil of Danner, and soon rose to be one of the best violin-players in Germany. Reichardt of Berlin speaks of him as having all the qualities of a really great player—large tone, perfect intonation, taste and feeling, and adds that, with the single exception of Salomon, he never heard a better violinist. From 1778-88 Eck was a member of the band at Munich, and afterwards conducted the opera of that town. In 1801, however, having married a lady of rank and wealth, he quitted Germany and spent the rest of his life in Paris, and in the neighbourhood of Nancy. Eck published four concertos for the violin, and a concertante for two violins.

Among his pupils was his brother (2) FRANZ (b. Mannheim, 1774; d. Strassburg, 1804), also an eminent violin-player. He entered the band at Munich while very young; but, driven from that city by a love-affair, he travelled in 1802 through Germany, and gained a great reputation as violinist. The Duke of Brunswick was at that time looking out for a master on the violin for Spohr, then 18, in whose rising talent he took a lively interest. He invited Eck to Brunswick and confided to him the technical education of the future great musician. They at once set out on a tour to Russia, Spohr getting instruction at the places where the journey was broken, but otherwise profiting chiefly by hearing his master. In his autobiography he speaks very highly of Eck as a violin-player. He describes his style as powerful without harshness, exhibiting a great variety of subtle and tasteful *nuances*, irreproachable in his execution of difficult passages, and altogether possessing a great and peculiar charm in performance. Nevertheless he was not ashamed to pass off unpublished compositions of his brother and other composers under his own name, a fact which confirms the low estimate of his general character to be gathered from Spohr's narrative. On arriving at St. Petersburg in 1803 he met with great success, and was appointed solo-violinist to the court, but, becoming involved in a scandalous affair, he fell into disgrace and

² *The King's Musicist*.

³ *Riemann*.

was transported by the police over the Russian frontier. His health broke down and he became insane. After living in the care of his brother at Nancy he appears to have died in a lunatic asylum. P. D.

ECKARDT, JOHANN GOTTFRIED (b. Augsburg, c. 1735; d. Paris, Aug. 1809), lived in Paris from 1758. He was a great pianist who was placed by many (Burney, Baron Grimm, etc.), above Schobert who was his rival. Schubart speaks about his brilliance, power and endurance; he was able to play several concertos and sonatas one after another without tiring, which very few could do at that time (1784). He composed also a number of sonatas and variations, and was, moreover, the first miniature painter of his time. E. v. d. s.

ECKELT, JOHANN VALENTIN (b. Werninghausen, near Erfurt, May 1673; d. Sondershausen, Dec. 18, 1732), organ virtuoso; pupil of Pachelbel. He was organist at Wernigerode, 1697; and Sondershausen, 1701. He left in MS. a Passion music, cantatas and organ pieces, including a valuable collection of organ pieces by 17th-18th century masters; also several theoretical treatises. E. L. Gerber acquired his extensive library, containing numerous MS. notes, for use in the compilation of his dictionary (Riemann; Q.-L.).

ECKERT, CARL ANTON FLORIAN (b. Potsdam, Dec. 7, 1820; d. Berlin, Oct. 14, 1879), violinist, pianist, composer and conductor, owed his education to the poet F. Förster of Berlin, who had him taught by Greulich, H. Ries and Rungenhagen. By the age of 10 he had completed an opera, 'Das Fischermädchen,' by 13 an oratorio, 'Ruth.' In 1839 he became a pupil of Mendelssohn at Leipzig. His oratorio 'Judith' was performed by the Sing-Akademie in Berlin in 1841, and in the following year the King of Prussia sent him to Italy for two years. On his return he composed an opera, 'Wilhelm von Oranien,' which was successfully performed in Berlin (1846) and at the Hague (1848). In 1851 he became accompanist to the Italian theatre in Paris, then accompanied Sontag on her tour in the United States, returning to Paris in 1852 as conductor of the Italian Opera. In 1853 he was called to Vienna to take the direction of the court opera, a post which he filled with great distinction, and in 1860 he went to Stuttgart as Kapellmeister in Kücken's place. This, too, he threw up in 1867; but in 1869 he was suddenly appointed to the head directorship at Berlin in place of Dorn, who was pensioned to make way for him. Eckert was a far better conductor than composer. He left three operas, much church music, a symphony, a trio, many pieces of smaller dimensions, including songs and a violoncello concerto. M. C. C.

ÉCOLE ROYALE DE MUSIQUE, see BRUSSELS.

ÉCORCHEVILLE, JULES ARMAND JOSEPH (b. Paris, Mar. 17, 1872; d. Perthes-les-Hurlus, Feb. 19, 1915), was a musical historian. He made his mark by his brilliant literary studies, informed with complete musical perception. He was a pupil of César Franck from 1887-90, and of Hugo Riemann in 1904-5. He took his doctorate at the Sorbonne, May 25, 1906, with two theses on musical history (cf. bibliography). Meantime he had formed, Mar. 1904, with Lionel Dauriac and J. G. Prod'homme, the Paris section of the International Musical Society. This soon gave him scope to found the *Bulletin français de la S.I.M.*, a successor of the *Mercur Musical*, and at that time the most important musical review in France.¹ Écorcheville died on the battlefield, Feb. 19, 1915. French musical history owes much to him, in the first place from his own works, which are of high value (cf. bibliography), numerous articles in the *S.I.M.* (on 'The Ornaments,' 'The History of the Lute,' 'The Publication of Old Musical Texts,' etc.), and in most of the musical publications of Europe. As director of the S.I.M. and president of the French section of the S.I.M. he exercised a distinct and vital influence on the contemporary music movement.

He also collected a musical library, of which certain sections (lute, and the French violin school) contain very rare documents. It was disposed of, May 26-29, 1920.

WORKS

Vingt suites d'orchestre du XVII^e siècle français (2 vols., Paris, 1906) (thesis for doctorate); *De Lully à Rameau, 1690-1730, L'Esthétique musicale* (Paris, 1906) (thesis for doctorate); *Cornélille et la musique* (Paris, 1907); *À l'occasion d'un état civil de musiciens inscrits au Châtelet de Paris, 1539-1650* (Paris, 1907); *Catalogue du Fonds de musique ancienne de la Bibliothèque nationale* (Paris, 1910-14).

BIBLIOGRAPHY

Le Tombeau de Jules Écorcheville suivi de lettres inédites (Paris, 1916), articles by L. LALOY, L. DE LA LATRENTIE and E. VUILLERMOZ with 2 portraits. Catalogue of rare and valuable books, containing the musical works of J. Écorcheville, with an introduction by HENRY FÉUNIERES (Paris, 1920). M. P.

ÉCOSSAISE, a dance, as its name implies, of Scotch origin. It was at first accompanied by the bagpipes, and in its original form was in 3-2 or 2-4 time. The modern Écossaise, however, is a species of contredanse in quick 2-4 time, consisting of two four-bar or eight-bar sections with repeats. Franz Schubert wrote a number of Écossaises for the piano, which will be found in his opp. 18, 33, 49 and 67. Beethoven also wrote in this form (see vol. vi. of complete works, B. & H.). The following example of the first part of an Écossaise dates from the beginning of the 18th century:

E. P.

¹ It was entitled successively *Mercur musical* et *Bulletin Français de la S.I.M.*, Jan. 18, 1907; *Bulletin Français de la S.I.M.*, Jan. 18, 1908; *Revue Musicale S.I.M.*, Nov. 18, 1908.

EDDY, CLARENCE (*b.* Greenfield, Massachusetts, June 23, 1851), American organist and composer. He studied the organ first under Dudley Buck, at Hartford, Connecticut; in 1871 he went to Berlin and became a pupil of Haupt and Löschhorn. On his return to America in 1874 he played church organs and became prominent as a teacher. He has given organ recitals in many cities of the United States and also in Europe. In 1876 he published a translation of Haupt's *Theory of Counterpoint and Fugue*. He has composed several pieces for the organ.

B. A.

EDELMANN, JOHANN FRIEDRICH, LL.D. (*b.* Strassburg, May 6, 1749; beheaded there July 17, 1794), a brilliant pianist, who went to Paris with his pupil, Baron Dietrich, where he became a favourite as player and composer. When Baron Dietrich became Mayor of Strassburg, Edelmann returned with his patron. During the Reign of Terror Edelmann and his brother, after sending many people to the scaffold, including Johann Friedrich's benefactor, Baron Dietrich, met with their well-deserved fate by the guillotine. Edelmann's once highly esteemed compositions consist of an opera, a ballet, symphonies, concertos, sonatas, and pieces for harpsichord, chamber-music, etc. (For list see *Q.-L.*)

E. v. d. s.

EDGEUMBE, RICHARD, Earl of Mount-Edgecumbe (*b.* Sept. 13, 1764; *d.* Richmond, Surrey, Sept. 26, 1839), musical amateur and composer. His opera 'Zenobia' was produced at the King's Theatre, London, in 1800, and he was also the author of *Musical Reminiscences of an old Amateur, chiefly respecting the Italian Opera in England . . . from 1773 to 1823* (W. Clarke, London, 1823; 4th edn., 1834). This deplores the decay of music, particularly of singing, refers enthusiastically to singers such as Pacchierotti and Manchesi, and is full of curious information and anecdotes about Billington, Grassini, Catalani and other musical personalities of the period.

J. M^s.

EDINBURGH. The old-time rallying-point—it is so no longer—of the aristocracy of a kingdom, Edinburgh has a fairly lengthy musical history, fragments of which can be recovered by the student content to delve among contemporary memoirs and other records. Civil disturbance continued to afflict Scotland to a later date than was the case in England. This, and the influence of Presbyterianism, no doubt contributed to retard the advance of the Arts generally. There is also to be taken into account the fact that Scotland was not a wealthy country. There are extant, however, vague contemporary references to concerts in Edinburgh in the 17th century, which suggest that there must have been a certain amount of musical activity at that time. With the coming-in of the 18th

century, there are increasing evidences of this activity.

The MUSICAL SOCIETY, founded in 1728, which at first held its meetings in St. Mary's Chapel in Niddry Wynd, and later in St. Cecilia's Hall,¹ in the same place, exercised a powerful influence, rendered the more effective through fashionable prestige, upon the musical life of the Scottish capital throughout the whole of the 18th century. The Musical Society, which was dissolved in 1801, was largely aristocratic in its membership. It was an association of amateurs, strengthened by a few professional musicians, and the music was that of the fashionable taste of the period, Corelli and Handel being predominant. There was also the equally fashionable preference for players and singers of Italian origin. Among the names of the latter is that of Senesino, who appears to have spent some time in Edinburgh.

In the early part of the 19th century, music in Edinburgh, so far as can be gathered from contemporary references, or perhaps it would be more correct to say, from the comparative absence of such references, experienced a measure of decline. In private life, it was evidently still a fruitful source of interest, and here again church influence, which had in the previous century been opposed to more frivolous amusements, may have indirectly helped the cause of music by doing its best to discourage other competitors for popular favour. Of public musical activity, however, there appears to have been little beyond a few subscription concerts. There was the MUSICAL FESTIVAL, extending over several days, which took place at the end of October and beginning of November, 1815, and of which Sir Walter Scott was one of the organisers. Festivals were also held in 1819 and 1824, these latter being conducted by Sir George Smart. In 1843, the opening of the Music Hall in George Street was celebrated with a festival which was conducted by the then Reid Professor of Music, Sir Henry R. Bishop. The festival, in the English sense of the term, has, however, found little support in Edinburgh.

From about the middle of the century, or a little later, there was a gradual improvement in musical affairs in Edinburgh. Organised effort began to make its influence felt to some extent. Various choral and amateur orchestral societies came into being, and there were attempts to bring orchestral music, on a more or less competent scale of performance, before the public. A notable event in the musical history of Edinburgh was the foundation, in 1858, of the EDINBURGH CHORAL UNION, to which there has been granted in recent years authority to assume the title of the EDINBURGH ROYAL CHORAL UNION. Apart from its valuable work in developing choral singing in Edinburgh, the Union rendered an even more

¹ See Fraser Harris, *St. Cecilia's Hall in the Niddry Wynd* (1899)

important service to the community in instituting orchestral concerts on a scale which had hitherto been unknown in Edinburgh, except in connexion with the annual Reid Commemoration Concert (see REID). These Choral Union orchestral concerts were the beginning of a winter orchestral season which has continued, under altered conditions, but with a break during the war years, to the present day. This scheme of orchestral concerts (at first six in number, with two choral concerts) was instituted in 1874, in conjunction with the Glasgow Choral Union. For the first three seasons all the concerts, orchestral and choral alike, were directed by the Choral Union's own conductor, Adam Hamilton. In the 4th season, 1877-78, Hans von Bülow became conductor of the orchestral programmes, the Union's conductor, as before, continuing to direct the choral works. In the following season Julius Tausch conducted the orchestral concerts, to be succeeded a year later by August Manns, whose connexion with the orchestral concerts in Edinburgh and Glasgow continued until the advent of the SCOTTISH ORCHESTRA (*q.v.*), in 1893, brought a new order of things into being. Meantime, however, the Choral Union, while assuming the increased liability involved in an improving orchestra and an increasing number of concerts, was not receiving a commensurate amount of support from the public. The seasons 1885-86 and 1886-87 were financially so disastrous that the Union abandoned an enterprise which had begun to prove beyond its resources. Fortunately, a public-spirited music-lover, the late Robert Roy Paterson, head of the music-selling firm of Paterson & Sons, stepped into the breach. Assuming liability for the Edinburgh concerts, he made a cautious beginning in the winter of 1887 with a series of four programmes, afterwards increased by degrees, until there are now twelve concerts, with, in recent years, one supplementary programme, intended mainly for juveniles. The history of these concerts has been practically that of the Scottish Orchestra. A large number of the most distinguished conductors of the day have appeared as 'guests' at the concerts, and their programmes also present a long roll of eminent pianists, violinists and singers.

Launched about 1906, as a sequence to some earlier concert work, the EDINBURGH CLASSICAL CONCERTS, which were organised by the late J. R. Simpson, of the music-selling firm of Methven Simpson, contributed importantly to the musical enlightenment of Edinburgh. They were discontinued on the outbreak of the war. During their course, however, placing a wide interpretation on the term 'classical,' they introduced much of the best music with which the Edinburgh public had hitherto been unfamiliar, and intro-

duced it under the best possible conditions. In particular, the Classical Concerts educated the public in the appreciation of the Art Song, and of modern French music. The crowning achievement of the Classical Concerts was a Beethoven Festival, lasting a week, which was given in 1913, and for which the Hallé Orchestra, conducted by Michael Balling, was engaged. Balling had first become known to the Edinburgh public as the conductor of the Festival performances of the 'Ring,' organised in 1910, by Ernest DENHOF (*q.v.*), at that time a teacher of pianoforte in Edinburgh, but who took up the cause of opera in English, and on a fine scale, with an enthusiasm which no discouragement could subdue.

Thus far, the principal musical undertakings of earlier years in Edinburgh, some of these institutions, fortunately, still extant, have been noted. There are a few others still to be mentioned. Among them are Mr. Kirkhope's Choir, averaging some 200 voices, carried on by an enthusiastic amateur with a remarkable gift for choir training; and Mr. Moonie's Choir, instituted by the late James A. Moonie, a local teacher of singing, in 1896. The KIRKHOPE CHOIR, starting from small beginnings in the mid 'seventies, continued in existence until about 1914. The MOONIE CHOIR is still active under the direction of Mr. W. B. Moonie, Mus.B., a son of its founder. Post-war musical Edinburgh exhibits in the main the same activities and limitations which are to be observed in other centres. There is perhaps rather less of organised public interest than might be desired, but there is no lack of music, even if the quality might in some cases be better. Professor TOVEY (*q.v.*) is doing his utmost to stir public interest where it is indifferent, and despite inadequate public support he is endeavouring to maintain in being the Reid Orchestra, recruited largely from the theatres and picture-houses, and with which he gives interesting programmes of music. Chamber music, of local origin, as regards performance, as in other towns, maintains a more or less precarious hold upon existence. As elsewhere, nowadays, amateur opera is the most popular form of communal musical effort. There are two societies which produce 'grand' opera, and several others which do work tapering downwards from Gilbert and Sullivan to musical comedy. Affecting a wider public than that of the Scottish capital, there is also the Edinburgh Musical Competition Festival, which has done important work since its institution in 1920.

W. H. D.

EDVINA, MARIE LOUISE LUCIENNE (*née MARTIN*) (b. Montreal), operatic soprano. Educated at a convent in Canada, she went to Paris to study singing with Jean de Reszke and appeared there for the first time in public at a concert in 1907. She married the Hon.

Cecil Edwardes and had two daughters; but on relinquishing private life she took the *nom de théâtre* of Edvina, under which she made her début at Covent Garden as Marguerite in 'Faust,' on July 15, 1908. Despite lack of experience, she made a favourable impression, and did even better the following season in Charpentier's 'Louise,' proving herself as the heroine not only an artistic singer but an intelligent and clever actress. Until 1914 she appeared regularly at the Royal Opera and by degrees added to her repertory Marguerite, Mélisande, Thais, Maliella, La du Barry, Fiora, Francesca da Rimini and Tosca. Her voice during this period acquired increasing roundness and power, together with a more assured mastery of such florid effects as modern romantic opera demands. She sang with success at Boston, U.S.A., during the opera seasons 1911-13, and in 1915 joined the Chicago company, besides later on heading concert tours in N. America and Canada.

BIBL.—NORTHOTT, *Covent Garden and the Royal Opera*.

H. K.

EDWARDE, MARTYR, a 16th- or 17th-century English church composer, of whose work two motets—'Terrum sitiens regnum' and 'Totius mundi domine'—are in the Library at Peterhouse, Cambridge. The latter is only imperfectly preserved. J. M^{rs}.

EDWARDS, FREDERICK GEORGE (b. London, Oct. 11, 1853; d. there Nov. 28, 1909), was editor of the *Musical Times* from 1897 until his death.

He was educated at the R.A.M. and pursued the career of an organist, holding several London appointments, notably those of Christ Church, Westminster Bridge Road (1876-81), and the St. John's Wood Presbyterian Church (1881-1905). His first contribution to the paper with which he was to be so closely identified was in 1891. He contributed to the *Dictionary of National Biography* and to the second edition of this Dictionary. He wrote much on church music and published (1896) *The History of Mendelssohn's 'Elijah'* with an introduction by Sir George Grove. c.

EDWARDS, H. SUTHERLAND (b. Hendon, Middlesex, Sept. 5, 1829; d. London, Jan. 21, 1906), historian and litterateur. His musical works comprise *History of the Opera . . . from Monteverdi to Verdi . . .* 2 vols. (1862); *Life of Rossini* (1869); *The Lyric Drama . . .* 2 vols. (1881); *Rossini*, a smaller work, for *Great Musicians* series (1881); *Famous First Representations* (1887); *The Prima Donna*, 2 vols. (1888). Edwards passed much time abroad as special correspondent, and his book *The Russians at Home* (1861) contains many notes on Russian music. For many years he acted as critic to the *St. James's Gazette*. a.

EDWARDS, RICHARD (b. circa 1523; d. Oct. 31, 1566), a native of Somerset, was

educated under George Etheridge, 'one of the most excellent vocal and instrumental musicians in England,' a distinguished physician of Thame, Oxon., Regius professor of Greek in Oxford in 1553, and living in 1587. On May 11, 1540, he was admitted a scholar of Corpus Christi College, Oxford. In 1547, on the foundation of Christ Church College, he became a student there, and in the same year graduated as M.A. In 1561 he was appointed master of the children of the Chapel Royal in succession to Richard Bower. He was admitted a member of Lincoln's Inn on Nov. 25, 1564, and at Candlemas following (Feb. 2, 1565) produced a play, 'Damon and Pithias,' one of the earliest music dramas, acted by his own choir boys, the 'Children of the Quene's Chappell,' for which he received 53s. 4d. It contained 'Loth am I to depart' accompanied on the regals. Edwards was the compiler of and chief contributor to the collection of poems called 'The Paradise of Dainty Devices,' which was not, however, published until 1576, ten years after his death. He was the author of a play called 'Palamon and Arcite,' acted before Queen Elizabeth in the Hall of Christ Church, Oxford, Sept. 3, 1566. This performance so pleased Elizabeth that she sent for the author and 'gave him promise of reward.' Unless, however, this promise was very promptly fulfilled it must have been profitless to Edwards, as he died in the following month. The only extant play is 'Damon and Pithias,' published 1571. But few examples of his skill in composition remain. W. H. H.

He is best known to musicians by his madrigal 'In going to my naked bed,' of which the words as well as the music were written by him. This composition appears in the Mulliner MS., date circa 1560 (B.M. Add. MSS. 30,513), where the music is written in short score with no more than the opening phrase of the words. Edwards's name is given here with the music, and the entire poem was printed later in 'The Paradise of Dainty Devices.' The tenor and bass parts, also without words, are to be found in the Brit. Mus. Add. MS. Another of Edwards's compositions in the Mulliner book is 'O the silly man,' which contains a very

early example of the chord  taken

unprepared.

E. H. F.

EDWINA, see EDVINA.

EEDEN, GILLES VAN DEN (d. June 1782). Beethoven's first instructor in music, was doubtless son or nephew of Heinrich van den Eede, who in 1695 was Hofmusicus to the then Elector of Cologne. In 1722 the name occurs again as a vocalist, but the first certain mention of Gilles is in 1728, when he represents to the Elector that he has been employed as organist for a year and a half without pay, on which

100 gulden is allotted him, increased, on his further petition (July 5, 1729), to 200 gulden.¹ He thus entered the Elector's service before Beethoven's grandfather. In 1774 he was composer to the court of Bonn. In 1780 we find him as teacher to the little Ludwig; when the teaching began or of what it consisted beyond the organ is not known. There is reason to believe, however, that Beethoven had no instructor in composition before NEEFE (*q.v.*). He often spoke of his old teacher, with many stories which have not been preserved.² He was buried on the 20th of June 1782. G.

EEDEN, JEAN BAPTISTE VAN DEN (*b.* Ghent, Dec. 24, 1842; *d.* Mons, Apr. 7, 1917), was a pupil of the Conservatoire of his native town and of Brussels, gaining at the latter (1869) the first prize for composition with a cantata, 'Fausts laatste nacht,' and became director of the music school at Mons in 1878 in succession to Huberti. He wrote an opera, 'Numance' (produced Antwerp, 1897), cantatas, 'Jacqueline de Bavière,' 'Jacob van Artevelde,' 'Brutus,' 'Het Woud,' and 'De Wind'; an oratorio, 'Le Jugement dernier,' 'Judith' (Le Siège de Béthulie), a piece of considerable extent for three voices; a symphonic poem, 'La Lutte au XVI^e siècle'; a scherzo; some suites; a 'Marche des esclaves,' etc., for orchestra, and many songs and partsongs.

BIBL.—PAUL BERGMANS, *Notice sur Jean Van den Eeden* (Brussels, 1924).

EFFREM, MUZIO (MUTIO), a 16th-17th century Neapolitan composer. For 22 years he was in the service of the Prince Gesualdo of Venosa; in 1617 at the court of Mantua; in 1622 at the grand-ducal court at Florence; in 1623 again at Naples. He published in 1626 the 6-part madrigals by Gesualdo. Effrem is known chiefly by his critique of Marco da Gagliano's 6th book of madrigals. Of his own compositions only some madrigals are known. In 1617 he took part in the composition of 'La Maddalena,' text by G. B. Andreini (*Riemann*; *Q.-L.*).

EGENOLFF, CHRISTIAN (*b.* Frankfurt-on-M., July 26, 1502; *d.* there, Feb. 9, 1555), one of the earliest German music printers. He published an edition of Horace's Odes by Tritonius; also 'Gassenhawerlin,' and 'Reuterliedlin' (1535). (See *Riemann* and *Q.-L.*)

E. v. d. s.

EGIDIUS, see AEGIDIUS.

EGLI, JOHANN HEINRICH (*b.* Seegräben, Zürich, Mar. 4, 1742; *d.* Zürich, Dec. 19, 1810), a foremost Swiss song composer, who published a large number of books of songs, several of which remained in public use (churches and schools) beyond the middle of the 19th century (*Q.-L.*).

¹ Thayer, vol. I. pp. 10, 17, 24 (2nd ed. pp. 10, 26, etc.). The name is spelt Vandendœet, and Van den Eede.

² Thayer, vol. I. p. 114 (2nd ed. pp. 126 ff.); Schindler (1st ed.), p. 12.

EHLERT, LUDWIG (*b.* Königsberg, Jan. 13, 1825; *d.* Wiesbaden, Jan. 4, 1884), pianist and composer, but chiefly known as a cultivated critic and litterateur.

He studied under Mendelssohn at the Leipzig Conservatorium in 1845, and after further studies in Vienna, settled in Berlin in 1850. For some years he stayed in Italy, directing the Società Cherubini in Florence, up to 1869, when he taught for two years at Tausig's school in Berlin, subsequently going to Meiningen as teacher to the ducal court, and finally to Wiesbaden, where he died from an apoplectic seizure. His *Briefe über Musik* (Berlin, 1859) contain notices of Beethoven, Mendelssohn, Schumann, Wagner, Weber, Schubert, Chopin, Berlioz and Meyerbeer, which, without being technical, are often happily characteristic. These have been translated into English by F. R. Ritter (Boston, U.S.A., 1870). Still more valuable are his *Römische Tage*, 1867, and *Aus dem Tonwelt* (1877), containing his latest contributions to the *Deutsche Rundschau*, etc. His compositions are ambitious, and embrace overtures to 'Hafiz' and 'The Winter's Tale,' a 'Spring Symphony'—performed with success at Berlin and Leipzig; a 'Requiem für ein Kind,' repeatedly performed with success; a Sonate romantique, Lieder, etc. M. O. C.

EHRlich, ALFRED HEINRICH (*b.* Vienna, Oct. 5, 1822; *d.* Dec. 29, 1899), an eminent pianist, critic and author.

He studied the pianoforte under Henselt, Bocklet and Thalberg, and Sechter was his master in composition. After a longish stay in Bucharest, where he devoted himself to music, he was called to Hanover as court pianist to King George V. He took a keen interest in current events, and acted as political correspondent to the *Allgemeine Zeitung*. He spent the years 1855-57 at Wiesbaden, London and Frankfurt-on-Main, and finally settled in Berlin in 1862. He taught the piano at the Stern Conservatorium from 1864-72, and again from 1886-98, and also had many private pupils, of whom Felix Dreychock is perhaps the best known. Ehrlich wrote several works for the piano, e.g. 'Concertstück in ungarischer Weise,' 'Lebensbilder,' Variations on an original Theme, etc. He contributed largely to the *Berliner Tageblatt*, *Die Gegenwart* and *Die neue Berliner Musikzeitung* as musical critic; he wrote novels and many monographs on musical and æsthetic questions, amongst which *Lebenskunst und Kunstleben*, *Kunst und Handwerk*, and *Die Musik-Ästhetik in ihrer Entwicklung von Kant bis auf die Gegenwart* are the chief.

H. B.

EIBENSCHÜTZ, ILONA (*b.* Budapest, May 8, 1873), an eminent pianist, made her first appearance as a child of 6 at Vienna, and travelled in Russia, Germany, Denmark, Sweden, Norway, etc., until she was 10 years old, study-

ing during part of that time, and until 1885, at the Vienna Conservatorium with Professor Hans Schmitt.

She studied at Frankfort with Madame Schumann for four years, and after playing to Rubinstein, Liszt and many other musical notabilities, her career as a mature artist began in 1890, when she played at one of the Gürzenich Concerts at Cologne; the Leipzig Gewandhaus and the Richter Concerts in Vienna followed next; and on Jan. 12, 1891, she made her first appearance in England at a Monday Popular Concert, playing Schumann's 'Études symphoniques,' and in Beethoven's sonata in A for piano and violoncello with Piatti. Her success was emphatic, and until her marriage with Carl Derenburg in 1902 she was one of the most highly esteemed of all the pianists that came regularly before the London public. Since then her public appearances have been rare.

M.

EICHBERG, JULIUS (b. Düsseldorf, June 13, 1824; d. Boston, Mass., Jan. 18, 1893), was violinist, composer and teacher.

In 1843 Eichberg entered the Conservatoire at Brussels, then under the direction of Fétis, and graduated in 1845 with first prizes for violin-playing and composition. He was then appointed a professor in the Conservatoire at Geneva, where he remained eleven years. In 1857 he went to New York, and two years later to Boston. He was director of the orchestra at the Boston Museum for seven years, beginning in 1859, and in 1867 established the Boston Conservatory of Music, which enjoyed in the United States a high reputation, especially for the excellence of its violin school. Eichberg's compositions are many and in various forms, for solo voices, chorus, violin, string quartet, pianoforte, etc. He prepared several text-books and collections of studies for the violin, and collections of vocal exercises and studies for the use of youths in the higher classes of the public schools. Eichberg's operettas were very successful. He produced four—'The Doctor of Alcantara,' 'The Rose of Tyrol,' 'The Two Cadis,' and 'A Night in Rome.'

F. H. J.

EICHNER, ERNST (b. Mannheim, Feb. 9, 1740; d. Potsdam, early in 1777), a distinguished bassoon and oboe player. At a concert in Frankfort-on-Main, Feb. 28, 1771, he calls himself Ducal Konzertmeister of Pfalz-zweibrücken. He left that position secretly (in 1770) and went to Paris, where he published symphonies, etc.; thence to London, where he appeared with great success as bassoon-player in 1773; thence he went to Potsdam as member of the chapel of the Crown Prince (afterwards Frederick William II.). His symphonies are among the better works of the younger Mannheim school. (For list of works, which include concertos, chamber

music, etc., see *Q.-L.*; see also *D.D.T.* vii, 2; viii, 2.)

E. v. d. s.

EIGHT-FOOT pitch (or *tone*) is a term employed to denote that the pitch of the stop is the same as that of the open diapason and kindred open stops of ground tone upon the manuals, the lowest (CC) pipes of which approach eight feet in length. When the pipes of a stop are of only half the true open tone length, and stopped at the top to produce the octave below, the distinguishing term *tone* is used—e.g. stopped diapason, 8 ft. *tone*. T. E.

EINSTEIN, ALFRED (b. Munich, Dec. 30, 1880), has worked as a historian and editor, having studied with Adolf Sandberger, and is most widely known as the editor of Riemann's *Musiklexikon* (see DICTIONARIES OF MUSIC).

Einstein graduated in 1903 with a study, *Zur deutschen Literatur für Viola da Gamba* (published 1905), and made researches, particularly in regard to the madrigal and its composers, many of which were recorded in the *Journal* of the Int. Mus. Ges. His chapter on the madrigal in Adler's *Handbuch der Musikgeschichte* (1924) is a comprehensive summary of the subject. He edited, with Sandberger, the selected works of Stefani, for the *D.D.T.*, 2nd series (see DENKMÄLER).

Since 1918 he has edited the *Zeitschrift für Musikwissenschaft* (see PERIODICALS) and has been responsible for two issues of Riemann's *Lexikon* (1919 and 1922), the latter (10th edition) being an important revise of the old Dictionary.

C.

EISENHUT, THOMAS, director of music to the Prince of Kempten; *canonicus regularis* at St. George's, Augsburg, in 1674. He composed 'Hymni ariosi' (1674); 'Sacer concentus' (1683); also a theoretical work, *Fundamentum musicale* (1702) (*Q.-L.*).

EISTEDDFOD (Welsh), 'a sitting of learned men.' These musical and literary festivals and competitions originated in the triennial assembly of the Welsh bards usually held at Aberffraw, the royal seat of the Princes of North Wales and Anglesey, at Dynevor in South Wales, and Mathrawael, Merionethshire, for the regulation of poetry and music, for the conferring of degrees, and electing to the chair of the Eisteddfod. The antiquity of this ceremony is very high, mention being made of an Eisteddfod in the 7th century at which King Cadwaladr presided. Those bards only who acquired the degree of 'Pencerdd' (chief minstrel) were authorised to teach, and the presiding bard was called Bardd Cadeiriawg—the bard of the chair—because after election he was installed in a magnificent chair, and was decorated with a silver or gold chain, which he wore on his breast as a badge of office. His emoluments from fees were considerable. Persons desiring to take degrees in music were presented to the Eisteddfod by a Pencerdd, who vouched for

their fitness, the candidates being required to pass through a noviciate of three years, and to study for further several periods of three years before advancement to each of the three higher degrees. It is now difficult to define the status of the titles conferred, but they cannot be considered more than historical names or complimentary distinctions, often bestowed by the Eisteddfodau upon persons who had but little knowledge of music.

After being discontinued for some time¹ the Eisteddfodau appear to have been revived in the reigns of Edward IV., Henry VII., Henry VIII. and Elizabeth. In 1450 what has been called 'The great Eisteddfod of Carmarthen,' was held in that town, with the king's sanction; and another meeting was held in South Wales in Henry VII.'s reign, of which no records are preserved. In 1523, at Caerwys, Flintshire, an Eisteddfod was held, at which many eminent men were present; and on May 26, 1560, there was another at the same place, under a commission granted by Queen Elizabeth. Still more memorable was the congress at Bwmpyr Castle in 1681, under the auspices of Sir Richard Bassett.

In 1771 the Gwyneddigion, a society established in London for the cultivation of the Welsh language, promoted several of these meetings in North Wales; and in 1819 the Cambrian Society held a great Eisteddfod at Carmarthen, at which the Bishop of St. David's presided. John Parry, who was a chief promoter of this society, and its registrar, edited the Welsh melodies for it (see WELSH MUSIC), and in recognition of his efforts a concert was given to him at Freemasons' Hall on May 24, 1826 (at which Miss Stephens, Braham, Mori, Lindley and others assisted), followed by a dinner at which Lord Clive presided. In later years the revival of these meetings was promoted by Sir Benjamin Hall (afterwards Lord Llanover); and at one of them, held in 1828 at Denbigh, the Duke of Sussex was present, and Sir Edward Mostyn president. c. m.

The National Eisteddfod is now held annually in August at one or other of the Welsh towns. It differs from other COMPETITION FESTIVALS (q.v.), to which it originally afforded a model, in its bardic ceremonial and customs, which have been revived as far as possible in accordance with what is known or supposed to have been the procedure of ancient Britain. The ceremony begins with the proclamation of the Eisteddfod a twelvemonth and a day before, and culminates in the chairing of the bard. c.

EITNER, ROBERT (b. Breslau, Oct. 22, 1882; d. Templin, near Berlin, Jan. 22, 1905), founder in 1868 of the Gesellschaft für Musikforschung, editor of and contributor to the valuable

historical periodical *Monatshefte für Musikgeschichte*.

He edited a *Verzeichniss neuer Ausgaben alter Musikwerke . . . bis zum Jahre 1800* (Berlin, 1871), which, though singularly defective as regards the English² School, is a useful catalogue. More recently he edited, in conjunction with Haberl, Langerberg and C. F. Pohl, a valuable *Bibliographie der Musik-Sammelwerke des 16. und 17. Jahrhunderts* (Berlin, 1877). The most important of his publications is the *Biographische-bibliographische Quellen-Lexikon der Musiker und Musikgelehrten der christlichen Zeitrechnung bis zum Mitte des 19. Jahrhunderts* (begun 1900, completed in 10 vols. 1904), a work which, though not absolutely faultless, marks a great advance in trustworthiness of information over anything else of the kind. The *Quellen-Lexikon* has been continued and corrected by *Miscellanea musicae bibliographica* (1912-15), edited by H. Springer, M. Schneider and W. Wolfheim. Eitner has edited Sweelinck's organ works, and other things for the Maatschappij tot bevordering der Toonkunst (see VEREENIGING). His papers on Peter Sweelinck (Berlin, 1870) and Arnold Schlick are of importance. f. g.

EKKEHARD. There were three of that name; the first, who was a monk of St. Gall (d. 978), composed sequences, and wrote an epic, 'Walther.' The second (Palatinus) (d. circa 996) was provost at Mayence, head of the school of St. Gall, and reader to the Duchess of Allemannia. The third, a pupil of Notker Labeo, was a singer and poet, and was called by Archbishop Aribio to Mayence as head of the school of singing. He sang before the Imperial family at Ingelheim in 1030. e. v. d. s.

ELCHE, MYSTERY OF. A mystery-play on the Assumption of the Virgin Mary performed every year at Elche, near Alicante in Spain on Aug. 14 and 15. The words are entirely set to music. The existing text dates from 1639 but it is undoubtedly taken from some MS. far older than that, and is written in the Limousine dialect, a species of Catalan or Provençal. The earliest known copy of the music is dated 1709, but was made from a 16th-century MS. Much of it is polyphonic, by JUAN GINÉS PÉREZ, ANTONIO DE RIBERA, and Lluís Vich; but the most striking pieces are the long monodic passages given to the boy who takes the part of the Virgin Mary. These are sung not as they stand in the MS. of 1709, but to a profusely ornamented version, a variant of the original, handed down by tradition. It has been concluded that these are fragments of the music of a 15th-century liturgic drama; they have a certain affinity with the 'Canto de la Sibila' sung every Christmas in the cathedral of Palma, Mallorca, with certain Balearic and

¹ An Eisteddfod held at Caerwys in 1110 is held to have been the model for the Irish 'Féis.'

² He omits all mention of the collections of Barnard (1641), Boyce (1778), and Arnold (1790), as well as Morley's 'Triumph of Oriana' (1601).

Valencian folk-songs, and perhaps with Mozarabic chant.

The Mystery of Elche as it is seen to-day is the 17th-century version of an earlier play. Another Spanish Assumption play is known, also in the Limousine dialect, the MS. of which is dated 1420. The Records of Elche relate that in 1266 (or 1370) an ark drifted to the coast of Spain, containing a miraculous image of the Virgin Mary as well as the words, music and ceremonial of the liturgic drama. This was performed, according to the directions given, until the mysterious death of Don Carlos (1568), after which it was forbidden by Philip II. In 1603, however, it was revived, and has been performed annually ever since.

The Mystery is divided into 2 parts, each lasting about two hours and a half, and representing in a dramatic and musical form the death and burial of the Virgin Mary and her Assumption into Heaven. The sacred image is drawn up into the dome of the cathedral in a 'machine' resembling a golden swing, in which is an angel playing the guitar and two cherubim with mandolines; the performance ends with the descent of another machine containing the Three Persons of the Trinity, while a crown is let down on to the head of the sacred image to the accompaniment of full choir, organ, bells and military band. The morning between the two performances is occupied by a very curious procession, showing definite traces of Astarte-worship.

ELECTRIC: ELECTRO - PNEUMATIC ACTION, see ORGAN.

ELEGY (ἔλεγος), in its original sense a poem always of a sad and touching character, and generally commemorative of some lamented decease (e.g. Gray's 'Elegy'); subsequently such a poem with music; and still more recently a piece of music inspired by the same feeling and suggested by a like occasion, but without poem, or any words whatever. J. H.

ELEKTRA, opera in one act, on von Hofmannsthal's tragedy, music by Richard Strauss. Produced Dresden, Jan. 25, 1909; New York, in the French version of Gauthier-Villars, Feb. 1, 1910; Covent Garden in German (Beecham season), Feb. 19, 1910; in English, Denhof Opera Co., Theatre Royal, Hull, Feb. 1912.

ELER, FRANZ (b. Uelzen, Lüneburg, c. 1500; d. Hamburg, Feb. 22, 1590), cantor and teacher at the Johanneum, Hamburg, 1529, and afterwards Kapellmeister at the cathedral. He wrote an important hymn book in 2 volumes, Part I., 'Cantica sacra,' etc., Part II., 'Psalmi Dr. Martini Lutheri,' etc., with notation of melodies after the system of Glareanus.

z. v. d. s.

ELFORD, RICHARD (d. Oct. 29, 1714), was educated as a chorister in Lincoln Cathedral. His voice changing to a fine counter-tenor he became a member of the choir of Durham Cathedral.

About the beginning of the 18th century he came to London, and was engaged as a singer at the theatre. On Aug. 2, 1702, he was sworn-in as a gentleman of the Chapel Royal, a place being created expressly for him. He also obtained the appointments of vicar-choral of St. Paul's Cathedral and lay vicar of Westminster Abbey. Weldon, in the preface to the first book of his 'Divine Harmony' (six solo anthems composed expressly for Elford), and Dr. Croft, in the preface to his 'Musica sacra,' speak in high terms of Elford's voice and singing. W. H. H.

ELGAR, SIR EDWARD (WILLIAM), O.M., Mus.D. (b. Broadheath, near Worcester, June 2, 1857), a great composer.

His father, W. H. Elgar, was a musician of the type in which, fortunately, this country is rich, who, without seeking or attaining any personal eminence, do sterling work in provincial centres. He founded a successful music-selling business in Worcester, was organist of St. George's Roman Catholic Church there, and was also a capable violinist. He played in a local orchestra as well as in the professional one engaged for the annual festivals of the Three Choirs. He took some part in determining the programmes of the festivals, exerting his influence to widen their repertory on certain occasions. Edward Elgar therefore grew up in musical surroundings, and the liberal experience he gained of string music through his father's violin, of wind instruments through his own playing of the bassoon in a wind quintet for which he also composed, of the organ and church music both Roman and Anglican (for he was constantly in and out of Worcester Cathedral and knew the repertory of the cathedral choir intimately), took the place for him of more systematised musical education. He was at school till he reached the age of 15 at Littleton House, near Worcester, but during his school-days he often deputised for his father at the organ of St. George's and also became a good violinist. The Worcester Glee Club proved another means of developing his talents. Elgar attended its meetings and so became conversant with that peculiarly English form of vocal chamber music, the glee. He also acted as piano accompanist and became leader of the orchestra which sometimes assisted at the Club's meetings, performing such works as the concertos of Corelli and the symphonies of Haydn. A proposal to send him to Leipzig for music study when he left school was not carried out; Elgar entered a solicitor's office but continued to develop his music along individual lines, playing and composing. It is worth recording

that he played the violin in the orchestra of the Three Choirs Festivals during these years.

In 1879 Elgar visited London to receive some violin lessons from Pollitzer, but his life continued uneventfully at Worcester for the next few years, unless indeed his appointment as bandmaster at the County Lunatic Asylum (1879), a post which he held for 5 years, can be called an event. Other local engagements began to occupy him; he became a member of Stockley's orchestra at Birmingham, where an Intermezzo of his composition was played (Dec. 13, 1883). He travelled abroad and spent three weeks in Leipzig in 1882, and in the same year was appointed conductor of the Worcester Amateur Instrumental Society. He succeeded his father as organist of St. George's (1885-89).

In 1889 he married Caroline Alice, daughter of Major-General Sir Henry Gee Roberts, K.C.B., and his wife's devotion and unswerving confidence in his genius was one of the prime factors in that ultimate success which, though slow in coming, arrived with extraordinary decisiveness a few years later. Up to the time of his marriage Elgar had composed small works only; from that time forward he began to think in larger musical terms, as the list of his works shows. Elgar and his wife settled in London, but London had no particular use for a composer of slight things, and was not the most congenial atmosphere in which to attain greater ones. Two years later (1891) he retired, therefore, to Malvern, from whence were issued during the next 13 years all those works for orchestra and voices which were to convince the world of the force of Elgar's individuality. There he enjoyed years of quiet and concentrated work in ideal surroundings, varied by the forming of many friendships, by holiday travels abroad, and later, as his fame grew, by journeys to conduct or otherwise superintend the production of his works. In 1904 the Elgars moved to Hereford and thence a few years later to Severn House, Hampstead (London), which was their headquarters until the death of Lady Elgar in 1920.

EARLY WORKS.—Meantime Elgar's public career may be said to have begun with the production of his 'Froissart' overture (op. 19) in the Shire Hall, Worcester, at the festival of 1890. Its significance scarcely seems to have been recognised at the time, a fact which those who know the conditions of these concerts, where a large orchestra is packed into a small hall, will readily account for. Moreover the distinctive qualities which make Elgar are now easily perceived in the light of his subsequent output; the hearers of 1890 had nothing to guide them. The 'Froissart' overture, with the quotation from Keats on its title-page,

'When chivalry
Lifted up her lance on high,'

stamps Elgar at once as belonging to the late

romantics. It is said¹ to have grown directly out of the scene in Scott's *Old Mortality*, in which Claverhouse dilates on the spirit of chivalry enshrined in the Chronicles of Froissart. But it does more than assign Elgar to a class; tune after tune emphasises personal characteristics. Alternate vigour and sensuousness, exuberant leaps of melody, and nervous chromatic twists of harmony, reveal his own voice and manner, and the glowing orchestration is part and parcel of the thematic ideas. 'Froissart' at once showed Elgar as a man who does not score for orchestra but thinks in its terms.

In 1893 the first of his important choral works, 'The Black Knight' (Longfellow's translation of Uhland's *Der schwarze Ritter*), described as 'a symphony for chorus and orchestra,' came out at Worcester, not at the festival but at a concert of the Festival Choral Society. The same body first gave three years later his suite for chorus and orchestra, 'From the Bavarian Highlands,' which he wrote after a summer holiday at Garmisch. The year 1896 was indeed an eventful one, since it included, besides this, the performance of Elgar's first oratorio, 'The Light of Life' (Lux Christi), at the Worcester Festival, and the production of 'Scenes from the saga of King Olaf' (poem by Longfellow, with additions by H. A. Acworth) at the North Staffordshire Musical Festival (Hanley). The latter is important as the first considerable work to be given outside the composer's immediate neighbourhood, for Elgar is a conspicuous instance of a prophet honoured first in his own country, as the above list of the Worcester productions shows.

'The Light of Life' is an oratorio on the miracle of Christ healing the man blind from his birth, and its words, put together by the Rev. E. Capel-Cure on the traditional plan of oratorio, are partly original and partly taken from Scripture. The Three Choirs Festivals had produced a long series of such oratorios year after year, only a small percentage of which had any permanent value. The life in Elgar's music was at once evident. He brought a fresh point of view and originality of musical style to a form which, in spite of a few masterpieces, had become jejune. Particularly striking was the note of sincere devotion with which he surrounded the character of the Saviour and His mission as the bringer of light into the world, and the use of representative themes to illustrate the idea anticipated the method of later and greater works. The other choral works of this period, 'The Black Knight,' 'King Olaf,' 'The Banner of St. George' (1897) and 'Caractacus,' which was Elgar's first introduction to the Leeds Festival (1898), all share with this oratorio a certain unsatisfactoriness of form, though their defects are due to a different cause. In the

¹ Ernest Newman, *Elgar*, p. 128.

one case Elgar was still subject to an established tradition; in these cantatas on secular themes he was trying to make up for the lack of one. The romantic spirit which had first shown itself in the 'Froissart' overture burns in them all, but these legends of ancient kings, deeds of heroes and loves of fair ladies all belong properly to the region of opera. An English composer, untrained to think in terms of the stage and lacking opportunity for performance thereon even if he turned his thoughts in its direction, had to use the choral society as a substitute and present to his public dramatic ideas undramatised. 'The Banner of St. George,' written for the Diamond Jubilee year of Queen Victoria, is the least important of the group. Its subject (verses by Shapcott Wensley) combines the story of St. George killing the dragon with the patriotic motive, and it served to give rein to Elgar's love of the symbolism of pageantry and power which gleams through a number of his compositions, including the Imperial March (written for the same occasion) and the later and more famous 'Pomp and Circumstance' marches.

'Caractacus' is a work of much greater significance. Its libretto, by H. A. Acworth, tells the story of the British leader's (Caractacus's) fruitless struggle against the Roman invasion. The general lay-out in six scenes is frankly operatic. The curtain rises (the phrase is inescapable) on a scene of the British Camp on the Malvern Hills; the second scene depicts the mysteries of the Druids; the third gives us a love scene between Eigen (the daughter of Caractacus) and Orbin, a minstrel; the fourth and fifth scenes deal with the overthrow of the Britons; and the sixth shows Caractacus a captive at Rome, with a choral peroration prophesying British freedom and aggrandisement. This choral finale, with some other places where the choir is used for scene-painting purposes, is one of the things which mark the hybrid form of the work. Opera could have done without it; the choral cantata was felt to need summing up, and the process of summing up hardly came natural to Elgar. In all these early works the attempt to do it brings bombast. At this stage indeed he offers a certain analogy to his great predecessor, Henry Purcell. His inspiration came in flashes and was apt to exhaust itself in a phrase. With the virtue was the attendant defect of scrappiness. In one respect, however, Elgar was, and has remained, very far from Purcell. He has never had that innate genius for setting the English language, and very few, if any, of his melodies seem to come straight from the ring of words as Purcell's do. Generally the melody is born as something independent, to which the words are subsequently fixed. The result is a certain *gaucherie* in the vocal writing. The brilliant qualities of 'Caractacus' as they appeared at Leeds con-

solidated Elgar's position among his contemporaries. It was performed there on Oct. 5, 1898, with the following singers in the principal parts:

Soprano—Medora Henson (Elgen).
 Tenor—Edward Lloyd (Orbin).
 Bass—Andrew Black (Caractacus).
 Baritone—John Browning and Charles Knowles.

In the following year (1899) two works made very essential additions both to the actual value of his output and to the growth of his reputation. These were the 'Variations on an original theme for Orchestra,' called 'Enigma,' first played under Hans Richter at St. James's Hall, June 19, 1899, and a cycle of five songs for contralto voice with orchestral accompaniment, called 'Sea Pictures,' which Mme. Clara Butt sang at the Norwich Festival. Each one of the 'Enigma' variations was dedicated to a personal friend, generally indicated by initials or some other device, and Elgar claimed that in writing them he had, as it were, 'looked at the theme through the personality' ¹ of that friend. He also explained the use of the title 'Enigma' by stating that the theme itself has for counterpart another theme which, however, is not heard. But the success of the work as a series of deliciously contrasted mood pictures and a masterpiece of orchestral device was not at all dependent on the intriguing questions which such suggestions raise. Indeed the audiences who still listen with delight to these variations have now almost forgotten to ask to whom they refer, and they have quite given up the hope of discovering the enigma theme, just as they no longer puzzle over the Sphinxes of Schumann's 'Carnaval.'

The 'Sea Pictures' contain: No. 1, 'Sea Slumber Song,' words by Roden Noel; No. 2, 'In Haven (Capri),' by C. Alice Elgar, the composer's wife, whose initials also stand at the head of the first 'Enigma' variation; No. 3, 'Sabbath Morning at Sea' (Elizabeth Barrett Browning); No. 4, 'Where Corals lie' (Richard Garnett); No. 5, 'The Swimmer' (Adam Lindsay Gordon). Though Elgar's settings of the poems will not always bear the closest scrutiny, for the reason hinted at above in the comparison with Purcell, the beauty of the musical ideas and of their orchestral handling leaves little desire to subject them to that sort of criticism.² The fact is that though Elgar may not always be guided by the poetic rhythm or even by the plain sense of the words he chooses, he so far comes under their spell as to produce music completely sympathetic to their mood.

THE ORATORIOS.—The year 1900 saw the birth of the work most widely acclaimed as Elgar's masterpiece, his setting of the greater part of Cardinal Newman's poem, 'The Dream of Gerontius,' for solo voices, chorus and

¹ *Mus. T.*, 1900.

² Ernest Newman has done it trenchantly in his book, *Elgar* (*Music of the Masters series*), chap. iv.

orchestra. It was produced at the Birmingham Festival on Oct. 3, 1900, and conducted by Richter. The solo singers were :

Mezzo-Sop.—Marie Brema (Angel).
 Tenor—Edward Lloyd (Gerontius).
 Baritone—H. Plunket Greeneo (Priest and Angel of the Agony).

At its first appearance 'Gerontius' seemed to miss fire. Probably Richter, in spite of his great Wagnerian experience, understood this subtle combination of voices and orchestra less thoroughly than he had grasped the orchestral style of the 'Enigma' variations; certainly the Birmingham choir was puzzled by its startlingly new choral idiom. A portion of the audience was too much repelled by the theology of the poem to appreciate the truthfulness with which the musician had entered into its psychology. One musician discovered that it 'stinks of incense,' and seemed to suppose the aphorism to be a complete condemnation, instead of being, as in fact it was, a tribute, though a superficial one, to the sympathy existing between poet and composer. That sympathy is the first quality of the musical setting of 'The Dream of Gerontius.' Had the Birmingham Festival Committee never commissioned a work from Elgar, it must have been written, and would have appeared sometime in exactly the same form. It was not in any way conditioned by the circumstances of production, as all the earlier choral works had been. Elgar had pondered the poem for ten years or so, and it had appealed to all that was both visionary and human in his nature. The result was one of those works of absolutely spontaneous feeling which are rare in the history of even the greatest artists. Criticism can put its finger on the weak spots as easily here as in the case of 'Caractacus,' but they matter less; they vanish out of sight or hearing as the listener becomes absorbed in the poignant struggle between life and death and the vision of judgment and eternity which the music unfolds.

The comparative failure of the Birmingham production was bound to be reversed by the verdict of time. It was partly through the exertions of Elgar's friend, A. J. Jaeger, a German in the employment of the firm of Novello & Co., that 'Der Traum von Gerontius' (translation by Julius Butts) was accepted for performance at the Lower Rhine Festival and given at Düsseldorf on May 19, 1902, under the direction of Julius Butts. In this performance the following were the solo singers :

Mezzo-Sop.—Muriel Foster (Angel).
 Tenor—Ludwig Willner.
 Bass—Johannes Messchaert.

The acclamations with which it was greeted were underlined by a public speech in which Richard Strauss conveyed to the composer the compliments of the continental connoisseurs. The second English performance then followed at the Worcester Festival in the same year

(1902), when the composer conducted and John Coates sang the name-part for the first time. A further performance was given the same autumn at Sheffield, and thenceforward it went the round of the provincial festivals. The London Choral Society was formed for the purpose of introducing it to London (1903), though it was first actually given there privately in the newly-built Roman Catholic Cathedral of Westminster on June 7, 1903. In America it was first given by the Apollo Club of CHICAGO (*q.v.*), then at the CINCINNATI (*q.v.*) Festival of 1904, and its success there paved the way for Elgar's personal visits to the United States a little later.

Before 'Gerontius' was launched on its career Elgar was pondering a still more ambitious scheme, a sequence of oratorios dealing with the calling and training of the Apostles and their mission to the world in founding the Christian church. The first part of this project was fulfilled in time for the next Birmingham Festival, and was given there under Richter's direction on Oct. 14, 1903, as 'The Apostles, Parts I. and II.' The solo singers were :

Soprano—Albani (Mary).
 Mezzo-Sop.—Muriel Foster (Mary Magdalene).
 Tenor—John Coates (John).
 Baritone—Ffrangcon-Davies (Jesus).
 " Kennerley-Rumford (Peter).
 Bass—Andrew Black (Judas).

It was first given abroad at the Lower Rhine Festival held at Cologne, 1904, but its appeal to the German audience was less powerful than that of 'Gerontius' had been. The words 'Parts I. and II.' were omitted from later editions of 'The Apostles,' since the next section to appear (Birmingham Festival, Oct. 3, 1906) was called 'The Kingdom.' The first solo singers in it were :

Soprano—Agnes Nicholls (Mary).
 Mezzo-Sop.—Muriel Foster (Mary Magdalene).
 Tenor—John Coates (John).
 Baritone—William Higley (Peter).

Another section yet remained for the completion of the trilogy, but after twenty years from the production of 'The Kingdom' this has not appeared, though it is believed that the composer, whose thoughts in the interval have been turned in widely different directions from oratorio, has proceeded some way towards its composition. Nevertheless the original plan is important in any discussion of 'The Apostles' and 'The Kingdom,' since it is evident, both from the choice of words and the structure of the music, that both were planned to lead to a larger fulfilment.

The words of both are taken from the Holy Scriptures, and texts, narrative, prophetic and descriptive, are woven together to illustrate the point of view from which Elgar approaches his subject. What is didactic¹ in that point of view is so suffused by the composer's

¹ The didactic side of the libretto is fully expounded in Canon Gorton's *Interpretation*. (See bibliography.)

mystical insight and reverent imagination, as well as human sympathy in such episodes as the penitence of Mary Magdalen and the remorse of Judas, that it is not on the whole oppressive. The hearer may even forget it just as he can forget the theological premises from which the psychology of 'Gerontius' is developed. The narrative of 'The Apostles' covers broadly the story of the Gospels from the beginning of the ministry of Christ to the Death, Resurrection and Ascension. 'The Kingdom' takes its story from the early chapters of 'The Acts of the Apostles,' including the miracles of healing, the gift of the Spirit at Pentecost, the first persecution and the consolidation of the infant church by sacramental worship in the upper chamber. But throughout, incident, whether described or referred to allusively, is treated rather as matter for reflection than as an affair of intrinsic interest. Thus the attitude towards the subject-matter is nearer to Bach's in the 'Passions' than to Handel's in the majority of the oratorios. Musically these works may be described as oratorio reviewed in the light of the Wagnerian music-drama. The interweaving of innumerable representative themes is the chief principle of cohesion. Some of them are of very great beauty, and the majority stamp themselves on the mind as belonging by right to the ideas associated with them. The attendant weakness of treating these themes in catalogue fashion appears acutely at times, for example in the orchestral opening of Part II. of 'The Apostles,' and also in setting certain words such as 'Judas who was guide to them that took Jesus' ('The Kingdom,' p. 33). Elgar's old difficulty of summing up in a developed movement is seen in the chorus 'Turn you to the stronghold,' which ends Part I. of 'The Apostles.' Again the setting of 'Our Father,' which leads to the finale of 'The Kingdom,' opens with a version of a theme from 'Gerontius,' which has lost all its mystery in the process of its attachment to words sung by the full choir. On the other hand the finale of 'The Apostles' may be pointed to as the greatest of Elgar's ensemble movements, both for its purely musical qualities and for its visionary aspect in the picture it presents of the Ascended Lord received by the hierarchy of Heaven. It is impossible to miss a certain growth of style between the two works in the musical handling. 'The Kingdom' is on the whole broader in melodic outline, more diatonic in harmony, less introspective but more daring. This change is partly conditioned by the subject-matter, but it is also indicative of the composer's personal growth towards the symphonic period of his career which followed the oratorios.

Before discussing that period it is necessary to refer to certain minor works contemporary

with the oratorios (1900-06), which were landmarks in Elgar's career. Such are the 'Pomp and Circumstance' marches (op. 39), the concert overture 'Cockaigne—In London Town' (op. 40), the 'Coronation Ode' (op. 44), the Introduction and Allegro for Strings (op. 45), and the concert overture 'In the South (Alassio)' (op. 50). Of the six military marches for orchestra called 'Pomp and Circumstance,' only four have appeared, and one is famous. That is No. 1 in D, first played with its companion No. 2 in A minor by the Liverpool Orchestral Society on Oct. 19, 1901. It has as its trio the broadly swinging melody subsequently known as 'Land of Hope and Glory.' This pair of marches was first heard in London at a Queen's Hall Promenade Concert of the same year (Oct. 22). No. 3 in C minor did not appear until 1905, and No. 4 in G, having something of the characteristic qualities of No. 1, was produced at a Promenade Concert on Aug. 24, 1907. All illustrate that strain of romantic militarism found in the earlier cantatas, the love of that proud pageantry of war which belongs essentially to times of peace. The same thing permeates the brilliant 'Cockaigne' overture, first heard at a concert of the Philharmonic Society (Queen's Hall, June 20, 1901), in which London, as represented by its parks and open spaces, the bands marching from Knightsbridge to Buckingham Palace, Westminster, with its dignified associations of Church and State, is mirrored in glowing orchestral colours.

The invitation to compose the official Ode to be sung at the gala performance at the Royal Opera, Covent Garden, in honour of the coronation of King Edward VII., was tantamount to the acknowledgment of Elgar as the musical laureate of the Edwardian era. He was knighted on the occasion of the coronation. The performance, planned for June 30, 1902, was postponed owing to the King's illness, and the Ode was never given its official production. The composer conducted its first performance at the Sheffield Festival in the autumn, and its first hearing in London at Queen's Hall on Oct. 26. The words of the Ode, written by A. C. Benson, were skilfully planned to give Elgar opportunities in directions in which he was known to excel, and the quality of the verse was superior to that of the earlier patriotic libretti which Elgar had chosen for himself. He made the most of his opportunity, producing a work generally imposing and occasionally distinguished, and gaining a world-wide celebrity for the tune from the first 'Pomp and Circumstance' march by allying it with the words 'Land of Hope and Glory.'

Of greater musical importance than any of these are the Introduction and Allegro for Strings (1905), in which quartet and orchestra are combined and contrasted rather in the

manner of the old Concerto Grosso, and the concert overture 'In the South (Alasiao),' which was, as its name implies, the outcome of a visit to the Italian Riviera. The dedication of the former to Professor S. S. Sanford of Yale University recalls the fact that this was the year of Elgar's first visit to the United States, when, on June 28, he was made a Doctor of Music of Yale University. He had received a similar degree from Cambridge (England) on Nov. 22, 1900, the year of 'Gerontius,' and from Oxford on Feb. 6, 1905. The overture 'In the South,' in spite of its later opus number, marks an earlier event. It was the new work of the three days' 'Elgar Festival' given in Covent Garden Opera House (Mar. 14, 15, 16, 1904), when 'Gerontius,' 'The Apostles' and a miscellaneous selection were heard. But the historical value of both these works, apart from their intrinsic beauties, is that both are essays in pure instrumental design leading up to the symphony so long projected and so long postponed.

SYMPHONIC WORKS.—More than two years passed between the composition of 'The Kingdom' (1905-06) and the production of Elgar's next work of first-rate importance, the Symphony No. 1 in A flat (op. 55), produced by Richter at a Hallé Concert in the Free Trade Hall, Manchester, on Dec. 3, 1908. It is dedicated 'to Hans Richter, true artist and true friend.' The time coincides with the one period in which he undertook academic work by accepting the Chair of music created for him at Birmingham University (1905-08). Unsuitable as he was by temperament to such work, it was not probably responsible for the apparent lull in his productivity. These were years in which his visits to America and elsewhere made heavy calls on his time, but they were also years in which his mind was maturing in purely musical thought. The symphony given at Manchester and repeated in London by Richter and the London Symphony Orchestra four days later (Dec. 7) was the first result of this process. It was realised at once to be a work of sustained power. A theme of noble simplicity, propounded in the barest outline, appears first to be introductory, and the bulk of the first allegro in a different key is based on a number of ideas, exuberant, agitated and impulsive, which contrast strongly with its classic calm. But this initial theme gradually imposes its mood. It appears in the several movements in fragmentary allusions as well as in more complete statements, and at the end of the finale its apotheosis arrives in a grandiose version. The two middle movements, 'Allegro Molto' and 'Adagio Cantabile,' are linked together by the fact that the theme of the latter is actually a rhythmic metamorphosis of that on which the mercurial scherzo is propelled forward. The symphony made an immediate and vivid im-

pression, and was performed over 100 times in the first year of its existence. That sort of popularity could not last, and it was in fact succeeded by a period of quite unjustifiable neglect. Its length may be said to account for that, only if it is admitted that length in music is not a question of actual time taken in performance. The symphony says the same thing too often, and not always with greater power in the course of its repetitions; moreover a tendency, which Elgar shares with César Franck, to write long movements in multiples of two-bar phrases brings rhythmic monotony. This is a more or less recurring structural defect, but one which is mitigated in the later symphonic works by the lighter handling of the thematic material.

The symphony in A flat, however, is the majestic opening of the richest period in Elgar's career, the period which contains the violin concerto (op. 61), the second symphony in E flat (op. 63), and the symphonic study for orchestra, 'Falstaff' (op. 68). The violin concerto, first played by Fritz Kreisler under the composer's direction at a concert of the Philharmonic Society (Queen's Hall, Nov. 10, 1910), is remarkable as the first work of the kind by an English composer which can be said to have taken root in the repertory of violin virtuosos. No doubt Elgar's early training as a violinist stood him in good stead in tackling the technical problems of writing for the solo instrument, and the bravura passages are as successful as they are daring. But more personal qualities make the work live in the affections of listeners. There is the charm of a wayward sentiment in its *cantilena*, something subtle and elusive which justifies the Spanish motto of its title-page—

'Aquí está encerrada el alma de . . .'

In a cadenza near the end, accompanied by thrummed chords on the strings, Elgar dwells on his themes as though he could not bear to say good-bye to them lest he should lose the soul enshrined therein.

The second symphony, produced at the London Musical Festival (May 24, 1911), the composer conducting the Queen's Hall Orchestra, is the strongest possible contrast to the first. It begins in a blaze of light and ends in the utmost quietude. In one of his Birmingham lectures Elgar dwelt on this characteristic of Brahms's third symphony (F major), and it is not impossible that this example may have influenced him in planning his own second. A comparison of the opening theme of his finale with that of Brahms's indeed seems to suggest an unconscious influence. The score bears the following inscription:

Dedicated to the Memory of His Late Majesty
King Edward VII.

This Symphony, designed early in 1910 to be a loyal tribute, bears its present dedication with the gracious approval of His Majesty the King. March 16th, 1911.

We may suppose that the noble funeral march

which forms the symphony's second movement took shape after the death of King Edward (May 1910). Though the work aroused less excitement than its predecessor, its greater clarity and directness of expression are beyond question, and it may be taken to be the high-water mark of Elgar's creative genius in instrumental music. In 'Falstaff,' produced under the composer's direction at the Leeds Festival (Oct. 2, 1913), Elgar returned again to programme music in order to recreate in musical imagery his impressions of characters and incidents in Shakespeare (*Henry IV.* and *Henry V.*). It is a big and virile work, but while immensely more accomplished than his early essays in the pictorial use of the orchestra, it seems in its mental attitude to be rather a throw-back towards the romanticism of younger years. It is worth noting here that Elgar broke through his usual rule of silence as to the intentions of his work, and wrote programme notes¹ to explain the scenario of his 'Falstaff' which from their numerous allusions show that the symphonic study had been the outcome of an extensive literary study of Shakespearian criticism.

This pre-eminently instrumental period contains a few vocal works which must be mentioned. Opus 45 is a set of five partsongs (words translated from the Greek Anthology by various writers) for male voices which have been widely used as test pieces at competitive festivals. Among numerous other partsongs one for mixed choir (6 voices), 'Go, Song of Mine' (op. 57), produced at the Hereford Festival 1909, is a thoughtful piece of a *cappella* writing. An ode for contralto solo, chorus and orchestra, 'The Music Makers' (op. 69), was first given at the Birmingham Festival (Oct. 1, 1912), Muriel Foster singing the solo part and the composer conducting. The poem is by Arthur O'Shaughnessy. Though it has had a certain popularity with choral societies since, it is on the whole unworthy of Elgar's genius. The vague sentiment of the poem appealed to his weaker side, and he allowed himself to underline its wording with quotations from his greater works such as the Enigma Variations, the 'Sea Pictures,' 'Gerontius' and the symphonies. For the Coronation Service of King George V. (1911) Elgar had composed an Offertorium and a Coronation March (opp. 64, 65), and on this occasion the signal honour of the Order of Merit was bestowed on him. In the following year an Imperial Masque in two tableaux, 'The Crown of India' (op. 66), was composed to celebrate the visit of the King-Emperor to India, and was produced on the stage of the London Coliseum (Mar. 11, 1912), the composer conducting. Such *pièces d'occasion* are rather distressingly prominent in Elgar's career at this period.

¹ *Mus. T.*, Sept. 1913.

MUSIC OF THE WAR.—The war of 1914, which stopped all musical festivals in England immediately, and checked all musical undertakings on a large scale, turned Elgar's energies in fresh directions. It produced from him several short but highly significant compositions. First and foremost among them came 'Carillon' (op. 75), a setting of orchestral music to the recitation of a poem in French by Émile Cammaerts, which Madame Tita Brand Cammaerts produced at Queen's Hall, Dec. 7, 1914. Poem and music together reflected the shock of horror with which the invasion of Belgium was received in this country, and the almost delirious determination to quell the invader which came as the inevitable reaction from that shock. At the time Elgar's music was a trumpet-call ringing through England. It has none of the unreal bombast of a peace-time patriotism. The persistent clangour of a four-note *ostinato* in the orchestra pictures the peal of bells from innumerable English steeples rather than the authentic Belgian carillon, and intensifies the white-hot fervour of the composer's inspiration. Neither the symphonic prelude 'Polonia' (op. 76), produced at Queen's Hall at a concert in aid of the Polish Relief Fund (July 6, 1915), nor a second essay in recitation with music, 'Le Drapeau belge' (op. 79), hit their mark with the sureness of 'Carillon,' but a setting of three short poems by Laurence Binyon, grouped together under the title of 'The Spirit of England,' has outlived the war. Composed in 1915, the second and third parts, 'To Women' and 'For the Fallen,' were first heard in London at a series of concerts organised by Mme. Clara Butt in aid of the Red Cross (Queen's Hall, May 8-13, 1916), when 'The Dream of Gerontius' was performed daily throughout the week. 'The Fourth of August,' now the first part, was added for the first complete performance given by the Royal Choral Society at the Albert Hall, Nov. 24, 1917. A set of songs, 'Fringes of the Fleet,' had considerable popularity during the war when they were brought out in a semi-dramatic setting at the Coliseum Theatre, June 1917. Two essays in the direction of stage music must be named here. 'Une Voix dans le désert,' produced at the Shaftesbury Theatre by Sir Thomas Beecham (Jan. 29, 1916), is a war piece consisting mainly of recitation to music; the fantasy, 'The Starlight Express' (Kingsway Theatre, 1916), consists of delicate incidental music to Algernon Blackwood's Christmas play of that name.

CHAMBER MUSIC.—The removal of the war-cloud brought a second though short-lived period of pure instrumental music from Elgar. It contained four works; a sonata in E minor for violin and piano (op. 82), a string quartet in the same key (op. 83), a quintet for piano and strings in A minor (op. 84), and the violoncello

concerto (op. 85). All were produced within the year 1919, but there seems to be internal evidence that some of the music, at any rate of the violin sonata, dates from an earlier time. Elgar had composed chamber music in his boyhood, but he had produced no important work of this class in his maturity. His decisive turning to it seems to indicate that the discipline of these years had caused him to shed some of that love of opulence in means of effect which had been a salient characteristic of his music. All three chamber works bear date 'Brinkwells, 1918' and were brought before the public as follows: the violin sonata, first played at the meeting of the British Music Society's London centre (Mar. 13, 1919) by W. H. Reed and Anthony Bernard, then at a public concert (Mar. 21) by W. H. Reed and Landon Ronald; the string quartet and the quintet, played privately at the house of Mr. Leo Schuster (May 3), were given at a public concert in Wigmore Hall on May 21. The string players on this occasion were Albert Sammons, W. H. Reed, Raymond Jeremy and Felix Salmond. William Murdoch was the pianist in the quintet. In neither sonata nor quintet does Elgar write for the piano with the mastery of technique which he possesses where other instruments are concerned; nevertheless the quintet is among his finest works. The sonata and quartet are full of the peculiar charm of his slighter thoughts, but the quintet possesses that largeness of purpose and strength of design which belongs to the symphonies.

The new-found economy of means is carried into the concerto for violoncello and orchestra first played by Felix Salmond with the London Symphony Orchestra at Queen's Hall under the composer's direction on Oct. 27, 1919. An unsatisfactory orchestral performance prevented the concerto from making the fullest impression at its first hearing. Moreover, an audience who came with memories of the luscious profusion of the violin concerto was disappointed to find a work of four short movements in which a few leading themes were treated with almost severe conciseness. But this quality of conciseness is its strength. In the concerto the composer has said all that he wanted to say, and a wealth of varied expression is contained within its simple outline.

Though Elgar has produced few compositions since the death of Lady Elgar in 1920, he has contributed to the literature of the orchestra transcriptions of Bach's organ Fantasia and Fugue in C minor and an overture of Handel.

When the fugue was first produced by Eugene Goossens and his orchestra (Oct. 27, 1921) very diverse opinions were expressed as to the appositeness of Elgar's instrumentation to the style of Bach's fugue, but of its brilliance as a piece of orchestral virtuosity there could be no question. The fantasia, treated in a more

restrained style, appeared later (Gloucester, 1922). The transcript of Handel's Overture in D minor was first given at the Worcester Festival, 1923. In 1924, on the death of Sir Walter Parratt, Elgar accepted the appointment of Master of the King's Musick. The duties involved therein are purely advisory. Here the chronicle breaks off, but it is not completed. Elgar's works hold the attention of his countrymen more decisively than do those of any other native composer. No English festival is complete without him; every choral society and orchestra, from the smallest to the greatest, gives his music a large place in its repertory; and it will be no surprise if further works should come from his pen bearing the stamp of that personality which is so recognisable that from his name the adjective 'Elgarian' has been coined, yet so elusive that the adjective has been necessary in default of any adequate description.

LIST OF WORKS

1. Romance, vin. and orch.
- 1a. Suite No. 1, 'The Wand of Youth' (produced 1907).
- 1b. Suite No. 2, 'The Wand of Youth' (produced 1908).
2. Three Motets (one published, 'Ave Verum').
3. Allegretto, vin. and PF.
4. Three Pieces, vin. and PF.
5. Two Songs.
6. Wind Quintet (MS.).
7. 'Sevillana', orch.
8. String Quartet (MS.).
9. Sonata, vin. and PF. (MS.).
10. Three Pieces, for orch. ('Mazurka', 'Sérénade Mauresque' and 'Contraste', the Gavotte, 1700 & 1900).
11. 'Surreum Corda', for strings, brass and organ.
12. 'Salut d'amour', vin. and PF. (also in innumerable arrangements).
13. Two Pieces, vin. and PF.
14. Organ Voluntaries (many).
15. Two Pieces ('Chanson de Nuit and 'Chanson de Matin'), for vin. and PF., subsequently scored for small orch.
16. Three Songs.
17. 'La Capricieuse, morceau de genre' for vin.
18. Two Partsongs. 1. 'O Happy Eyes.' 2. 'Love.'
19. 'Froisour', concert-overture.
20. Serenade for stringed orch.
21. Minuet for PF.
22. Six easy Exercises for vin. and PF.
23. Spanish Serenade, chorus and orch.
24. Five 'Études caractéristiques', vin.
25. The 'Black Knight', cantata.
26. Two three-part Songs, female choir, with vin. obligato. Orchestrated in 1904.
27. 'Scenes from the Bavarian Highlands,' for choir and orch.
28. Organ Sonata in G.
29. 'The Light of Life (Lux Christi)', oratorio.
30. 'Scenes from the Saga of King Olaf', soli, choir and orch.
31. Two Songs.
32. Imperial March (Diamond Jubilee, 1897).
33. 'The Banner of St. George', cantata.
34. Te Deum and Benedictus, in F. (Hereford, 1897).
35. 'Caractacus', cantata.
36. Variations, 'Enigma', for orch.
37. 'Sea Pictures', contralto solo and orch.
38. 'The Dream of Gerontius', oratorio.
39. Six Military Marches, 'Pomp and Circumstance.'
40. 'Cockaigne (In London Town)', concert-overture.
41. Two Songs.
42. Incidental Music and Funeral March for 'Grania and Diarmid' (by George Moore and W. B. Yeats).
43. 'Dream Children', two pieces for small orch.
44. Coronation Ode, 1902.
45. Five Partsongs for male voices, from the Greek Anthology.
- 46.
47. Introduction and Allegro of strings, quartet and orch.
48. Song, 'Pleading', with orch.
49. Oratorio, 'The Apostles.'
50. Overture, 'In the South,' for orch.
51. Oratorio, 'The Kingdom.'
52. 'A Christmas Greeting,' 2 soprano, strings, PF.
53. Four Partsongs, mixed voices.
54. Partsong, 'Reveille', male voices.
55. Symphony No. 1 in A flat.
56. Partsong, 'Angelus.'
57. Partsong, 'Go, Song of Mine.'
58. Elegy, for strings.
59. Six Songs, with orch.
60. Two Folk-songs (Eastern Europe), voice and orch.
61. Concerto in B Minor, vin. and orch.
62. Romance, bassoon and orch.
63. Symphony No. 2 in E flat.
64. Oratorium, 'O Hearken Thou' (Coronation, 1911).
65. Coronation March, for orch.
66. 'The Crown of India', masque in 2 tableaux.
67. Psalm XLVIII., bass solo, ch. and org.

68. Symphonic study, 'Falstaff,' orch.
 69. Ode, 'The Music Makers,' contralto solo, ch. and orch.
 70. 'Suspiri,' strings.
 71. Two Partsongs. 1. 'The Shower.' 2. 'The Fountain.'
 72. Partsong, 'Death on the Hills.'
 73. Two Partsongs. 1. 'Love's Tempest.' 2. Serenade.
 74. Psalm XXIX., ch. and org. or orch.
 75. 'Carillon,' recitation w th orch.
 76. Symphonic prelude, 'Polonia.'
 77. 'Une Voix dans le désert,' recit. with orch.
 78. Incidental music, 'The Starlight Express.'
 79. 'Le Drapeau Belge,' recit. with music.
 80. 'The Spirit of England,' sop. solo, ch. and orch.
 81. Ballet, 'The Fan' (Chelsea Palace, 1917).
 82. Sonata in E Minor, vln. and PF.
 83. String Quartet in E Minor.
 84. Quintet in A Minor, PF. and strings.
 85. Concerto in E Minor, v'cello and orch.

WORKS WITHOUT OPUS NUMBERS

- 'Serenade lyrique,' for orch. (early).
 'Carissimam,' for orch.
 'Rosemary,' for orch.
 March for orch. (Wembley Exhibition, 1924).
 Four Songs, with orch., 'Fingies of the Fleet.'
 Various Songs, Partsongs, Anthems.

 REV. CANON GORTON: Interpretation of the Librettos of the *Oratorios*: 1. The Dream of Ieronotus; 2. The Apostles; 3. The Kingdom.

ELI, oratorio in 2 parts; words by Bartholomew, music by Costa; produced Birmingham Festival, Aug. 29, 1855.

ELIJAH (German, *Elias*), Mendelssohn's 'oratorio on words from the Old Testament.' Produced Birmingham Festival, Aug. 26, 1846; in the revised version, Sacred Harmonic Society, Exeter Hall, Apr. 16, 1847; in Germany, Hamburg, Oct. 7, 1847. A stage version was produced by the Moody-Manners Opera Co., Kelly's Theatre, Liverpool, Feb. 1912.

ELISA, OU LE VOYAGE AU MONT BERNARD, opera in 2 acts; words by Saint-Cyr, music by Cherubini; produced Théâtre Feydeau, Dec. 13, 1794.

ELISIR D'AMORE, L', opera buffa in 2 acts; libretto by Romani, music by Donizetti. Produced Milan in 1832; Lyceum, London, Dec. 10, 1836; in English as 'The Love Spell,' Drury Lane, June 24, 1839; New York, Academy of Music, 1883. Auber's 'Le Philtre,' *q.v.*, has the same subject.

ELLA, JOHN (*b.* Thirsk, Dec. 19, 1802; *d.* London, Oct. 2, 1888), became a well-known writer on music.

His musical career was begun as a violinist. In 1822 he became a member of the orchestra of the King's Theatre, and subsequently of the orchestras of the Concerts of Antient Music,

Philharmonic, etc., retiring finally in 1848. In 1819 he received lessons in violin-playing from M. Fémy, in 1826 he was a pupil of Attwood in harmony, and finally completed his education in counterpoint, instrumentation and composition, under Fétis at Paris, in 1827. In 1845 he established, under the name of The Musical Union, a series of morning concerts of instrumental chamber music at which the best classical works were given by the best artists, native and foreign. He directed the Musical Union uninterruptedly for thirty-five years; the concerts came to an end in 1880. In 1850 he established a similar series of concerts under the name of Musical Winter Evenings, which were given annually under his direction until 1859, after which they were discontinued. At both these concerts he introduced 'analytical programmes' wholly written by himself. (See ANALYTICAL NOTES.) He contributed many notices of music and musicians to the *Morning Post* (of which paper he was musical critic for twenty years), *Musical World* and *Athenæum*. In 1855 he was appointed lecturer on music at the London Institution. He also published a *Personal Memoir of Meyerbeer*, with an analysis of 'Les Huguenots,' and *Musical Sketches Abroad and at Home* (1869), mostly reprinted from his MUSICAL UNION programmes.

W. H. H.

ELLERTON, JOHN LODGE (*b.* Cheshire, Jan. 11, 1801; *d.* London, Jan. 3, 1873), an amateur composer, a descendant from an ancient Irish family, and the son of Adam Lodge of Liverpool. He assumed the name of Ellerton about 1845.

Being sent to Brasenose College, Oxford (where he graduated as M.A. in 1828), he composed an English operetta and an Italian opera. On quitting the university he went to Rome, studied counterpoint for two years under Terriani, and composed seven operas. His English opera 'Domenica' was produced at Drury Lane in 1838. In 1836 and 1838 the Catch Club awarded him prizes for glees. His works comprise:

Six anthems: 6 masses; 17 motets; 'Paradise Lost,' oratorio, published 1857; 'Jephtha,' 'Bernice in Armenia,' 'Annals in Capua,' 'Il sacrificio di Egitto,' 'Andromacca,' 'Il crollo di Venezia,' and 'Il marito a vista,' Italian operas; 'Salvator Rosa,' 'Lucinda,' German operas; 'The Bridal of Triermalm,' another English opera; 61 glees; 65 songs; 19 vocal duets; 6 symphonies; 4 concert overtures; 3 quintets; 64 quartets and 3 trios for stringed instruments; and 8 trios and 13 sonatas for various combinations of instruments.

W. H. H.

ELLICOTT, ROSALIND FRANCES (*b.* Cambridge, Nov. 14, 1857; *d.* London, Apr. 5, 1924), daughter of the Right Rev. C. J. Ellicott, Bishop of Gloucester and Bristol, entered the R.A.M. (1874), and studied for seven years under Thomas Wingham. Her song, 'To the Immortals,' was sung at the Gloucester Festival of 1883, her 'Dramatic Overture' at the same festival, 1886, and a concert-overture at St. James's Hall in the same year. A cantata, 'Elysium,' was brought out at the Gloucester

Festival of 1889; 'The Birth of Song' in 1892, and a fantasia for piano and orchestra in 1895. Another vocal work, 'Radiant Sister of the Dawn,' was produced at the Cheltenham Festival in 1887, and a male-voice cantata, 'Henry of Navarre,' at Oxford, 1894. A Festival overture was played at the Cheltenham Festival in 1893, and a quartet for piano and strings was played for the first time in London in May 1900. (*Brit. Mus. Biog.*, etc.)

ELLIS (formerly SHARPE), ALEXANDER JOHN (b. Hoxton, June 14, 1814; d. Kensington, Oct. 28, 1890), was educated at Shrewsbury, Eton and Cambridge; Scholar of Trinity College, Cambridge, 1835; B.A. and 6th Wrangler 1837; F.R.S. 1864; F.S.A. 1870; President of the Philological Society 1873-74, and again 1880-81.

Ellis turned his attention to Phonetics from 1843; his chief work on *Early English Pronunciation*, begun in 1865, was published in five parts, 1869-89. He studied music under Professor Donaldson of Edinburgh. After vainly endeavouring to get a satisfactory account of the musical scale and nature of chords from Chladni, Gottfried Weber, and other writers, he followed a suggestion of Professor Max Müller and began in 1863 to study Helmholtz's *Tonempfindungen*, with special bearing on the physiology of vowels. In that work he found the explanation of his musical difficulties, and became ultimately the English translator of the third German ed. 1870, under the title of *On the Sensations of Tone, as a Physiological Basis for the Theory of Music* (London, 1875). To Helmholtz's work, with the author's consent, Ellis added many explanatory notes and a new appendix, in which were rearranged four papers published in the *Proceedings of the Royal Society*.—*On the Conditions, Extent and Realisation of a Perfect Musical Scale on Instruments with Fixed Tones* (read Jan. 21, 1864); *On the Physical Constitution and Relations of Musical Chords*, and *On the Temperaments of Instruments with Fixed Tones* (June 16, 1864); and *On Musical Duodenies, or the Theory of Constructing Instruments with Fixed Tones in Just or Practically Just Intonation* (Nov. 19, 1874); also several new theories, tables, etc. The *Proceedings of the Musical Association*, 1876-77, pp. 1-32, contain a paper by him *On the Sensitiveness of the Ear to Pitch and Change of Pitch in Music*, being an exposition and rearrangement of the interesting experiments of Professor Preyer of Jena; and some original works, *The Basis of Music*, 1877; *Pronunciation for Singers* (a primer), 1877; and *Speech in Song*, 1878.

Ellis's devotion to the scientific aspect of music led him into searching inquiries concerning the history of Musical Pitch, the varieties and uncertainty of which are so productive in the present day of disturbance of the musical ear and vexation to musical instrument-makers.

The results of those inquiries were read before the Society of Arts, May 23, 1877, and Mar. 3, 1880, and printed in their *Journals*, May 25, 1877, Mar. 5, 1880, with subsequent appendix and corrections (*ibid.* Apr. 2, 1880; Jan. 7, 1881) also reprinted by the author for private issue. Silver medals were awarded by the Society of Arts for each paper: the second essay may be appropriately described as exhaustive. Ellis subsequently turned his attention to the determination of extra-European musical scales. His method was by means of a series of tuning-forks of accurately determined pitches, and with the assistance of the present writer, to determine the pitch of the actual notes produced on native instruments, and then to calculate the intervals between those notes in terms of hundredths of an equal semitone. The results¹ are given in his paper on *Tonometrical Observations on some existing non-harmonic scales* (*Proceedings of Royal Society* for Nov. 20, 1884), and, more at length, in his paper *On the Musical Scales of Various Nations*, read before the Society of Arts, Mar. 25, 1885, and printed with an Appendix in their *Journals* for Mar. 27 and Oct. 30, 1885. For this paper a silver medal was awarded. A full abstract of his *History of Musical Pitch and Musical Scales* is given in his Appendix to the second enlarged and corrected edition of his translation of Helmholtz (1885), which also contains his latest views upon most of the subjects which form the scientific basis of music.

He became a Fellow of the Royal Society in 1864, of the London Mathematical Society in 1865, and of the Society of Antiquaries in 1870. He was twice president of the Philological Society, in 1872-74 and 1880-82. He received the degree of D.Sc. from the University of Cambridge in 1890. He was buried at Kensal Green Cemetery. His books, rich in marginal references, with his tuning-forks and measuring rods, are now (1924) at the Royal Institution, Albemarle Street, London. (See PRICH; SCHEIBLER.) A. J. H.; addns. E. J. H².

ELMAN, MISCHA (b. Talnoi, Kiev, Russia, Jan. 21, 1891), violinist. He first studied the violin in Odessa at the Royal Music School under Fiedelman, making his first appearance at a school concert in 1899, when he played De Bériot's seventh Concerto with orchestra. He was heard later by Professor Leopold Auer, who urged him to come to St. Petersburg, to study under him at the Conservatoire, which he did in 1901, and (with César Cui as harmony professor) made astonishing progress. He made his début in Berlin on Oct. 14, 1904; his success was immediate, and brought him engagements all over Germany. His introduction to the London public was in March of the follow-

¹ Ellis's exhaustive experiments were made entirely by calculation, as he was tone-deaf and unable to distinguish one tone or tune from another. Hipkins tested each experiment by ear.

ing year at Queen's Hall, where he played with the London Symphony Orchestra under Charles Williams, and laid the foundation of the reputation he enjoys of being in the first flight of the world's violinists. In 1908 and again in 1909 he was engaged for an American tour, since when he has played with success in every part of the world. His repertory includes all the great violin concertos and solos. The instrument he first played upon was a small Nicolas Amati; at the present day he uses a fine Stradivari dated 1727. w. w. c.

ELSBETH, THOMAS (b. Neustadt, Franconia, 1599/1600), a composer who lived at Frankfurt a./O.; was at Coburg in 1602; at Liegnitz, 1606-10; and at Jauer, Silesia, 1616-24. In the dedication of the 150th Psalm (1616) he complains about his poverty. He was a composer of motets, and sacred and secular songs, which still await examination with regard to their artistic merit. Twelve books to Latin and German texts, as well as some single numbers, were published between 1599 and 1624, while others, including a Mass, remained in MS. (Q.-L.; *Mendel*).

ELSNER, JOSEPH XAVER (b. Grottkau, Silesia, June 29, 1769; d. Warsaw, Apr. 18, 1854), composer, and first director of the Conservatoire at Warsaw, was son of a carpenter who made harpsichords, harps and other musical instruments.

Being interested for the profession of medicine, he had no regular instruction in music beyond a few lessons in harmony from Förster, director of the theatre at Breslau, but early began to compose. A visit to Vienna enabled him greatly to improve himself by studying classical scores, and by intercourse with the best musicians of his time. In 1791 he was appointed first violin in the theatre at Brünn, and in the following year Kapellmeister at Lemberg, where he wrote 6 operas, 4 symphonies, quartets, sonatas, etc. In 1799 he was appointed conductor of the theatre at Warsaw, and here he established himself for life, composing 22 operas in the Polish language within the space of twenty years. During a visit to Paris some of his compositions were performed at the Tuileries.

With the assistance of Countess Zamojska he started in 1815 a society at Warsaw for the encouragement of music, which resulted in the Conservatoire founded in 1821, of which he became the first director and professor of composition. This institution did good service before it was closed by the political troubles of 1830. In 1834 it was revived, with Soliva as director. Elsnér continued to compose, chiefly sacred music, till 1844, when he wrote his *Stabat Mater*, his right hand being paralysed. He is an interesting example of a successful composer who learnt composition by composing. His works are legion—operas, ballets, melo-

dramas, cantatas, church music, symphonies and instrumental pieces of all sizes and kinds. His operas, immensely popular in Poland, are light, and in the now old-fashioned style of Paër and Mayer. He wrote two treatises on the fitness of the Polish language for music; but his surest claim to remembrance is the fact that he was the master of Chopin. m. c. c.

ELSON, LOUIS CHARLES (b. Boston, Mass., Apr. 17, 1848; d. there, Feb. 14, 1920), an American critic and writer on music, who studied singing in Boston and theory in Leipzig. He served on the staffs of several Boston journals, joining that of the *Boston Advertiser* in 1888, on which he remained till his death. From 1882 he was head of the theory department of the New England Conservatory of Music. Elson was editor-in-chief of the *University Encyclopedia of Music* (1912) and of *Modern Music and Musicians*, and was on the editorial staff of *Famous Composers and their Works*. He was the author of about sixteen books, of which the most important is *A History of American Music* (1904; second edition, 1915). R. A.

ELSSLER, (1) FRANZISKA (known as Fanny) (b. Gumpendorf, near Vienna, June 23, 1810; d. there, Nov. 27, 1884), celebrated dancer, was the youngest child of Johann Elssler, copyist and devoted servant of HAYDN (q.v.). She was taught dancing by Herschett (Regli) or Kerschett (Larousse), and made her début at 6 or 7 years of age in the children's ballet at the Theatre 'an der Wien.'

In 1825 she appeared at the Kärnthnerthor Theatre, having received further instruction from Aumer, the ballet master. In 1827 she and her elder sister Therese (see below) were engaged at Naples, later Milan, etc.

'Fanny really laid the foundation of her fame in 1832 at Berlin as Zolcé in Auber's "La Bayadère." In the same year the Viennese admired her Fenella in "La Muette de Portici."'¹

On Mar. 9, 1833, the sisters made their débuts at the King's Theatre, Haymarket, in the ballet of 'Faust' (by Adolphe Adam), and danced two seasons there. From 1834-39 they danced at the opéra, Paris, returning to London (1838-40). Fanny having become a very great favourite in both capitals by her pantomimic acting and her dancing the Cachuca and Krakowiak, of which she was the original exponent in Paris.

On Mar. 9, 1840, the sisters made their last appearance together in England and went to America, where they remained over two years and were 'received with unwonted enthusiasm.'² In 1843 Fanny danced at Her Majesty's and in 1847 at Covent Garden, where on June 26 she danced for the last time as Manon Lescaut.

'She was the most intellectual dancer I have ever seen. Inferior to Taglioni in lightness, grace and

¹ *Musical World*, from the *Neue Freie Presse*.
² *New International Encyclopedia*.

sentiment; to Carlotta Grisi in the two latter qualities; and with less mere vigour than Cerito, she excelled them all in dramatic expression, and . . . exhibited tragic powers of a very high order, while the strongly dramatic element was the cause of her preclusiveness in all national and characteristic dances. . . . This predominance of the intellectual element in her dancing may have been the result of original organisation or . . . owing to the mental training received from Frederic von Genz, the . . . diplomatist who educated her. . . . Mrs. Grote always maintained that her genius lay full as much in her head as her heels. I am not sure that the finest performance . . . was not a minuet in which she danced the man's part . . . with most admirable grace and nobility of demeanour.'¹

After dancing a few more years on the Continent, she retired in 1851. Her later years were passed at Vienna, where she died in the Seiler Strasse.

Her sister (2) THERESE (b. 1808; d. Meran, Nov. 19, 1878) was known as 'La Maestosa' on account of her tall stature, and was content to take the secondary place and to support her sister after the manner of the male dancers of the period. She married (morganatically) Prince Adalbert of Prussia in 1848, and was created Countess von Barnim by the King. A.C.

ELVEY, (1) SIR GEORGE JOB, Mus.D. (b. Canterbury, Mar. 27, 1816; d. Windlesham, Surrey, Dec. 9, 1893), was an organist and church composer who began his musical education as a chorister of Canterbury Cathedral under Highmore Skeats, the organist.

After quitting the choir he pursued his studies under his elder brother, Stephen, and was afterwards at the R.A.M. under Cipriani Potter and Crotch. In 1834 he gained the Gresham prize medal for his anthem, 'Bow down Thine ear'; in 1835 he was appointed to succeed H. Skeats, junior, as organist of St. George's Chapel, Windsor, a post which he held until his retirement in 1882; in 1838 he graduated as Bachelor of Music at Oxford, his exercise being a short oratorio, 'The Resurrection and Ascension,' which was afterwards produced in London by the Sacred Harmonic Society on Dec. 2, 1840, and has also been given at Boston, U.S.A., and at Glasgow. Another oratorio, 'Mount Carmel,' is among his works, and several odes, among them one for the opening of the Royal Holloway College, June 30, 1886. In 1840 he proceeded Doctor of Music, his exercise being an anthem, 'The ways of Zion do mourn.' He conducted the Windsor and Eton Choral Society, and the Glee and Madrigal Society. He composed an anthem for voices and orchestra, 'The Lord is King,' for the Gloucester Musical Festival of 1853, and a similar one, 'Sing, O heavens,' for the Worcester Festival of 1857. Elvey's compositions are chiefly for the church; many of his anthems are published. He composed a Festival March for the wedding of the Princess Louise in 1871, which was afterwards performed in public. In the same year he received the honour of knighthood. He is buried near the

west front of St. George's Chapel, Windsor. A memoir was published in 1894 by his widow.

(2) STEPHEN, Mus.D. (b. Canterbury, June 27, 1805; d. Oxford, Oct. 6, 1860), elder brother of Sir George, was entered as a chorister of the cathedral under Skeats, senior, whose pupil he continued after the breaking of his voice.

On the death of Alfred Bennett in 1830, Elvey was appointed his successor as organist of New College, Oxford. In the following year he took the degree of Bachelor of Music at Oxford, his exercise being the hymn from Thomson's *Seasons*, 'These as they change.' In 1838 he proceeded Doctor of Music, his exercise being an anthem, 'Great is the Lord!' He was Choragus of the University from 1840 till his death. Stephen Elvey's compositions are not numerous; they consist chiefly of chants and services. His Evening Service, composed in continuation of Croft's Morning Service in A, and his 'Psalter and Canticles pointed' (Oxford, Parker), in collaboration with Ouseley, are well known. Some years before his death he had to submit to the amputation of a leg, through a gun accident; he was, however, able to pedal with a wooden appendage. W.H.H.

ELWART, ANTOINE AIMABLE ELIE (b. Paris, Nov. 18, 1808; d. there, Oct. 14, 1877), a learned musician, composer and author, of Polish origin.

He became a pupil of the Conservatoire, learning composition under Fétis. In 1828, when in Lesueur's class, he founded 'concerts d'émulation' among the pupils, which continued for six years. In 1831 he obtained the second prize for composition, and in 1834 the Grand Prix de Rome. While at Rome he composed, amongst other things, an 'Omaggio alla memoria di Bellini,' performed at the Teatro Valle in 1835. In 1836 he resumed his post of assistant professor to Reicha at the Conservatoire. He conducted the concerts in the Rue Vivienne, and those of the Société de Ste.Cécile. Elwart was for long professor of harmony at the Conservatoire; in 1871 he retired into private life. Among his compositions may be specified:

The oratorios 'Noé' (Paris, 1845) and 'La Naisance d'Ève' (1846); an opera 'Les Catalans' (Rouen); and choruses and instrumental music for the *Alcestis* of Euripides, performed at the Odéon; besides other operas not produced, symphonies, overtures, string quintets, quartets, and trios, masses and other church music.

He wrote *Duprez, sa vie artistique*, etc. (Paris, 1838); a *Petit Manuel d'harmonie* (Paris, 1839), translated into Spanish, and in use at the Madrid Conservatoire; *Théorie musicale* (1840); *Le Chanteur accompagnateur* (Paris, 1844); *Traité du contrepoint et de la fugue* (Paris), and other theoretical works. He completed the *Études élémentaires de musique* of Burnett and Damour (Paris, 1845), and contributed articles on musical subjects to the *Encyclopédie du dix-neuvième siècle* and to the *Revue et Gazette musicale de Paris*. His *Histoire de la Société des Concerts* (1860) and *Histoire des concerts*

¹ Kemble, *Recollections of a Later Life*.

populaires (1864) are two compendiums of useful and interesting matter. M. C. C.

ELWES, GERVASE CARY- (*b.* Billing Hall, Northampton, Nov. 15, 1866; *d.* near Boston, U.S.A., Jan. 12, 1921), was educated at the Oratory School, Birmingham, and Christ Church, Oxford; studied music, Vienna, Munich, Paris and London. He married (1889) Lady Winifred Fielding (daughter of the Earl of Denbigh) and served in the Diplomatic Service from 1891-95. He sang as an amateur tenor, taking part in the entertainment organised at Her Majesty's Theatre on behalf of the widows and orphans of the Household Troops, during the South African War, on Feb. 13, 1900. He made his first professional appearance at the Westmorland Festival, Kendal, in 1903, and in London with the Handel Society in the same year. Several appearances at the Popular Concerts, etc., were made later, and his first regular festival engagement was at Leeds, 1904. Later he sang with great success at the Broadwood Concerts, Promenade Concerts, at the Albert Hall, and at all the provincial festivals, besides giving very interesting recitals of his own. He gave recitals in Germany, where he was associated with Fanny DAVIES (*q.v.*); and also sang in Belgium and America. He was on a concert tour in America and was on his way to fulfil an engagement at Harvard University when the accident occurred which caused his death. He was struck by the moving train which he had just left and fell beneath it.

The high place which Elwes held among English singers was due more to his personal qualities than to natural vocal gifts. A temperament sensitive to every implication of the music but controlled by a refined intelligence made him a rare interpreter of classical song, particularly of Brahms. In oratorio his singing of two parts stood out: that of the Evangelist in Bach's 'St. Matthew Passion,' and the name part in Elgar's 'Dream of Gerontius.' His diction in singing the English language was perfect, but above technical considerations there was the spirit of a sincere piety in his attitude towards such works as these.

Elwes has been commemorated by a portrait bust placed in Queen's Hall and by the foundation of a permanent fund for the help of young musicians known as the Gervase Elwes Memorial Fund. M.; addns. C.

EMBOUCHURE, the part of a musical instrument applied to the mouth; and hence used to denote the disposition of the lips, tongue and other organs necessary for producing a musical tone.

To the embouchure are due, not only the correct quality of the sound produced, but also certain slight variations in pitch, which enable the player to preserve accurate intonation. In many instruments, such especially as the French

horn and the bassoon, almost everything depends upon the embouchure. W. H. S.

EMERALD ISLE, THE, comic opera in 2 acts, libretto by Captain Basil Hood, music partly by Sullivan, completed after his death by Edward German. Produced Savoy Theatre, Apr. 27, 1901.

EMMETT, DANIEL DECATUR (*b.* Mount Vernon, Ohio, 1818; *d.* there, June 27, 1904), a 'negro minstrel' (not a negro) to whose lot it fell to write the music of 'Dixie,' one of the most widely and lastingly beloved and most excellent of American popular tunes. In 1859 he was a member of 'Dan' Bryant's negro minstrel company then playing in New York, and produced the tune there in the regular course of his profession as composer-in-ordinary to the company. The song was first sung in Niblo's Garden and immediately became enormously popular. It was adopted in the Southern States as a national air in the Civil War. Nothing else of Emmett's escaped immediate oblivion. B. A.

EMPEROR CONCERTO, THE, a title gratuitously bestowed on Beethoven's PF. Concerto in E_♭ (op. 73).

EMPEROR'S HYMN, THE. A hymn written in 1796 by Lorenz Leopold Hauschka during the patriotic excitement caused by the movements of the French revolutionary army, set to music for four voices by Haydn, and first sung on Feb. 12, 1797, at the Emperor's birthday. The process by which the melody was adopted and developed from a Croatian national song is set forth in detail in W. H. Hadow's *A Croatian Composer*, 1797. Haydn afterwards employed it as the theme for four variations in his quartet (op. 76, No. 3). (See A. Schmid, *J. Haydn und N. Zingarelli*, Vienna, 1847.)

ENCINA, JUAN DEL, see ENZINA.

ENCORE (Fr.), 'again,' the cry in English theatres and concert-rooms when the audience desires to have a piece repeated. It has taken the place of the 'altra volta' of the 18th century, and was certainly in use as early as 1711, when Addison referred to it in the *Spectator*. A song, 'The Bath Teazers,' published in 1717, gives 'ancore' as a common form of the word, thus showing it to have been in general use at that date. The French and Germans use the Latin term 'Bis,' and the French have even a verb, 'bissier.' Similarly the English use 'encore' both as a verb and a noun. For example see *M.T.*, 1919, p. 61. 'Le public anglais est grand redemandeur, et exprime son vœu par un mot français, comme nous par un mot latin' (A. Adam, *Souvenirs*, xxvii.).

ENDERLE (ENDERLEIN), WILHELM GOTTFRIED (*b.* Bayreuth, May 21, 1722; *d.* Darmstadt, c. 1793), an excellent violinist and pianist, who composed symphonies, overtures, concertos, etc. (See *Q.L.*) E. v. d. s.

ENESCO, GEORGES (*b.* Dorohoiu, Roumania,

Aug. 19, 1881), violinist and composer, was early discovered to possess great musical gifts. At the age of 7 he entered the Conservatoire at Vienna, which he left in 1893, carrying with him the highest awards. He then went to Paris to finish his training (harmony and composition with Massenet, Gédalge and Fauré; violin with Marsick). After taking a brilliant first prize for violin in 1899, he began a virtuoso career, pursued ever since with éclat.

As composer, Enesco had played his first 'Poème roumain' at the Concerts Colonne in 1898. He has written numerous works for the piano ('Suite dans le style ancien,' 'Deuxième Suite'), piano and violin (two sonatas), for four or eight strings, for ten wind-instruments, for orchestra ('Rhapsodies roumaines,' two symphonies, 'Symphonie concertante'), melodies, etc. There is in preparation a large dramatic work, 'Œdipe,' of which fragments have already been performed at concerts. This music, full of strength, free from the influences of Brahms and Wagner which have hitherto marked him, takes its place as a work of Roumanian folklore. It is national music, in the large sense of the word. Through his influence as violinist, as composer, as leader of the orchestra, Enesco has also succeeded in forming a true Roumanian school, of which he is the uncontested leader. M. P.

ENFANT PRODIGUE, L'. (1) Opera in 5 acts; words by Scribe, music by Auber: produced Académie, Paris, Dec. 6, 1850; in Italian, as 'Il Prodigio,' Her Majesty's, June 12, 1851; in English as 'Azael the Prodigal,' Drury Lane, Feb. 19, 1851.

(2) Opera, 'Figliuol prodigo,' by Ponchielli, Scala, Milan, Dec. 26, 1880.

(3) Cantata, 'L'Enfant prodigue,' by Debussy (Grand Prix de Rome, 1884), first heard in England, Sheffield Festival, 1908, and produced in operatic form, Covent Garden (Beecham season), Mar. 1, 1910.

(4) A pantomime or wordless play in 3 acts, scenario by M. Carré, fils, music by André Wormser. Produced, Cercle Funambulesque, Paris, June 14, 1890, Bouffes Parisiens, June 21 of the same year, and Prince of Wales's Theatre, Mar. 31, 1891.

There is another opera on this subject by Gaveaux. (See also PRODIGAL SON.)

ENGEDI, see MOUNT OF OLIVES.

ENGEL, CARL (b. Thiedenweise, near Hanover, July 6, 1818; d. Kensington, Nov. 17, 1882), an eminent writer on musical instruments.

His attainments as a musician, his clear insight into books in many languages, his indefatigable perseverance in research, and the exercise of a rare power of judicious discrimination, made him one of the first authorities on his subject in Europe. When a student he studied first with Enckhausen, an organist in Hanover,

and afterwards received piano lessons from Hummel; after adopting music as a profession, he for some time remained in the family of Herr von Schläberndorf, a nobleman in Pomerania. About 1844-45 Engel came to England and resided at first at Manchester, where he gave lessons on the piano. He removed soon after to London, and settled in Kensington. He began by reading in the British Museum to prepare himself for those studies in musical history on which his reputation is founded, and became a collector when opportunities were more frequent than they are now for acquiring rare instruments and books. He thus formed a private museum and library that could hardly be rivalled except by a few public institutions. The change in the direction of his musical activity did not, however, divert him from pianoforte-playing; he became as familiar with the works of Schumann, Brahms and others, as he was with those of the older masters. He wrote and published a Pianoforte Sonata (Wessel, 1852), the *Pianist's Handbook* (Hope, 1853), and a *Pianoforte School for Young Beginners* (Augener, 1855). He also wrote *Reflections on Church Music* (Scheuermann, 1856). The first-fruits of his archæological studies were shown in the publication of *The Music of the Most Ancient Nations, particularly of the Assyrians, Egyptians, and Hebrews* (Murray, 1864), which was followed by *An Introduction to the Study of National Music* (Longmans, 1866). About this time began his connexion with the South Kensington Museum, to which he gave valuable advice respecting the formation of the rich collection of rare musical instruments which is an important branch of that institution. His first public essay in connexion with it was the compilation in 1869 of a folio volume entitled *Musical Instruments of all Countries*, illustrated by twenty photographs; a work now rarely to be met with. He compiled the catalogue of the Loan Collection of ancient musical instruments shown there in 1872; and followed it by a *Descriptive Catalogue of the Musical Instruments in the South Kensington Museum*, published in 1874, a masterpiece of erudition and arrangement, and the model for the subsequently written catalogues of the Paris and Brussels Conservatoires, and of the Kraus Collection at Florence. He resolved to complete this important work by an account of the musical instruments of the whole world, and wrote a book which, in manuscript, fills four thick quarto volumes, and is illustrated by upwards of 800 drawings. It remains in the hands of his executors. While, however, this, his *magnum opus*, was in progress, he wrote a contribution to *Notes and Queries on Anthropology*, pp. 110-14 (Stanford, 1874), *Musical Myths and Facts* (Novello, 1876), and articles in the *Musical Times*, from which *The Literature of National Music* (Novello, 1879) is a reprint. Among these articles the descriptions

of his four clavichords possess an unusually lasting interest and value. They were published in July-Sept. 1879, and were followed by *Music of the Gipsies*, May-Aug. 1880, and *Æolian Music*, Aug. and Sept. 1882. A posthumous publication of considerable importance is *Researches into the Early History of the Violin Family* (Novello, 1883). There remain in manuscript, besides the great work already mentioned, *The Musical Opinions of Confucius* and *Vox Populi* (a collection of national airs). After the death of his wife in 1881, he thought of living again in Germany, and sold his library by public auction, while the more valuable part of the musical instruments (excepting his favourite harpsichord, clavichord and lute, now in the possession of Herbert Bowman and the R.C.M.)¹ was acquired by South Kensington Museum. But after a short visit to Hanover he returned to England, and died at his house in Addison Road, Kensington. A. J. H.

ENGELMANN, GEORG (b. Mansfeld, end of 16th cent.), studied at Leipzig, 1616; organist at St. Thomas's, 1631. He wrote 5 books of pavans, galliards, courants (1616-22), remarkably developed; also vocal music (1596-1631) (*Riemann; Q.-L.*).

ENGLAND, GEORGE, and GEORGE PIKE ENGLAND (his son), organ-builders. The former flourished between 1740 and 1788, and married the daughter of Richard Bridge; the latter between 1788 and 1814. The elder England built many noble organs. Of Bridge little is known; he is believed to have been trained by Harris the younger, and to have lived in Hand Court, Holborn, in 1748. His best organ was at Christ Church, Spitalfields, 1730. v. de P.

ENGLISH FLUTE, see FIFPLE FLUTE (1); RECORDER.

ENGLISH FOLK-SONG. (1) THE PROCESS OF RECOVERY.—The songs of the common English people, which we now call folk-songs, were until recently quite unknown or disregarded by the generality of people, and even by musicians. The Rev. John Broadwood, squire of Lyne, on the Sussex and Surrey border, was one of the earliest to find in the songs sung by rustics at harvest-homes and rural merry-makings a delightful quaintness and simple beauty quite worthy of being recognised by the more cultured people. In 1843 he privately published a volume of 16 songs harmonised by a country organist. His prolix title tells us that they are songs sung 'every Christmas by the country people who go about to the neighbouring houses . . . the airs are set to music exactly as they are now sung.' Mr. Broadwood modestly forbore to give his name as collector. The work is of great rarity, but the author's niece, Miss L. E. Broadwood, reprinted it in 1889 (adding fresh

material), under the title *Sussex Songs*. Miss Broadwood has been a great worker on folk-song.

William Chappell included a few folk-songs in his *Popular Music of the Olden Time*, and the previous edition of this work (1838).²

In the 'thirties and 'forties certain comic music-hall singers burlesqued the words of one or two folk-songs and, retaining the original tunes, produced 'All round my hat,' 'Villikins and his Dinah' and others, which from the beauty of the airs had great popularity.

Systematic folk-song collecting began about 1889 or 1890. The Rev. S. Baring-Gould, from a chance remark at a dinner-table, began in 1889 to collect the folk-songs of Devon and Cornwall and found rich and undreamed-of wealth of melody. He published the result of his labours in parts, ranging in date from 1889-1891. Dr. W. Alex. Barrett issued a book on *English Folk-songs* in 1891, and the present writer published his *Traditional Tunes*, being songs and ballads with their tunes from Yorkshire and the Scottish Borders in the same year, 1891. Miss Lucy Broadwood and Fuller Maitland published their *English County Songs* in 1893, and Cecil J. Sharp came into the field of collecting (in Somerset) in 1905. Meanwhile the FOLK-SONG SOCIETY (*q.v.*) had been established in June 1898.

The gathering and publishing of folk-songs went on apace, and it would be tedious to add to the above list of pioneer works. The value of the labours of Cecil SHARP (*q.v.*) cannot be overestimated. He searched every corner of England for folk-song and folk-dances, and even went to America in further quest.

We find in folk-tunes many gems of melody, but in the uncouth verses which compose the song there is an earnestness and belief which the ordinary 'composed' song frequently lacks. If a folk-singer tells in rustic verse of the pleasures of being a ploughboy he really believes that such occupation is the best that a man can follow, and so on through the whole class of folk-song. The folk-song is limited to the sentiments felt by the people who sing such songs, and the themes are only those of everyday experiences.

The press-gang was a great factor in the life of the common people in the 18th and early 19th centuries, and we have a great number of doleful ditties telling of the woes of a pressed man taken from his life on land and separation from his sweetheart. Poaching and its heavy punishment was familiar to every country man, and the folk-song maker had plenty of examples to work from and therefore a goodly number of that class exist. Rustic life, highwaymen songs, sea songs, soldier songs, sporting songs and love have all examples in folk-song beside

¹ Those which are in the possession of the R.C.M. were presented after the death of A. J. Hipkins.

² In the new edition, edited by Woodbridge, these folk-songs are omitted.

the fragments of lyrical ballads which have come down from, perhaps, minstrel times. It is to be noticed that folk-song has lingered more in the south than in the manufacturing towns of the north. The rural life of the pastoral districts appears to have been favourable to the birth and preservation of the folk-song. The different life lived in the greater communities seems to be quite unfavourable, and the songs collected are of a different character.

F. K.

(2) CHARACTERISTICS OF THE ENGLISH SONG.

—The publication of such collections as those named above showed that the old impression as to the absence of traditional or national music in England was entirely false. The scientific study of the subject has indeed revealed that many melodies and words which have been claimed for Scotland, Ireland and Wales really belong to England.

Many folk-songs are probably the conscious composition of some individual musician whose name may have been lost in the course of time, or whose authorship was gradually forgotten. But the songs that have never had an author are in some ways far more interesting to the student of ethnology and comparative mythology; for very often the nonsense verses sung to-day by an unlettered peasant who imitates the sound his parents made in singing the same song, represent words which suggest a very distant origin. The curious numerical song, sometimes called 'The Twelve Apostles,' or 'I will sing you one, Oh!' contains in its different extant versions many lines which are absolutely unintelligible in the present day, or until they are compared with some other versions, perhaps in a foreign language, when the meaning becomes clear, and the process, so familiar to philologists, which is known as phonetic decay, is seen to have been at work. This particular song has its counterparts in almost all known languages, and a Hebrew original has been claimed for it. It seems to have been a method for teaching the elements of theology, and in the process of time to have degenerated into a kind of game, in which a series of words increasing with each repetition has to be said without a mistake on pain of a forfeit. Children's 'Counting-out' games, too, enshrine many words and phrases which probably come from a surprisingly remote past.

The habit of consciously recording important public events in the form of ballads is common to all countries, whether civilised or not; and it is curious to see how many English ballads there are which refer to things the modern singers know nothing about. Thus, the ballad made famous as 'Edward' by Brahms and Loewe, and known in Scotland and England as 'Lord Randal,' 'Lord Rendal,' 'Lord Ronald' and by other names, exists also in a version

'King Henry, my son,' which very probably contains a reference to a popular suspicion that either King Henry I. or the young prince, son of Henry II., who was crowned in the lifetime of his father, was poisoned. The children's game of 'Green Gravel' almost certainly originated in a ballad on the death of Queen Jane (Seymour) and the birth of Edward VI. (see *Folk-Song Society's Journal*, ii. 29, 30, iii. 43; and ii. 221, and iii. 67). Another song, 'The Six Dukes' (*Folk-Song Society's Journal*, iii. 170-179, etc.), seems to point to the popular tradition, embodied in Shakespeare, that there were tender passages between William de la Pole, Duke of Suffolk, and Margaret, Queen of Henry VI. The same song has been also fitted to a ballad on the death of the Duke of Grafton, son of Charles II., and whether or not either of the two can be said to represent a true tradition, the fact remains that some historical episode has been strangely preserved by means of folk-song. Besides these historical, or quasi-historical ballads, there are some traditional songs which deal with romantic subjects such as 'Lord Bateman,' 'The Wraggle-taggle gypsies' (on the escapade of Lady Cassilis with Johnny Faa, a famous Ayrshire legend), which are found in all parts of the country. It is not likely that such songs as 'The Seeds of Love' or 'The Sprig of Thyme,' with its beautiful and suggestive poem, preserved in various fragments in different quarters, and its wonderful range of suave and striking melodies (see *Folk-Song Society's Journal*, i. 86, 89, 209-211, ii. 23, 24, 288; *English County Songs*, p. 58), or 'The Unquiet Grave' otherwise called 'Cold blows the wind' (*English County Songs*, p. 34; *Folk-Song Society's Journal*, i. 119, 192, ii. 6), were based on any actual occurrence; but there is enough in each of them to make it certain that some unknown poets and musicians of the past enriched the world with lyrical compositions which, but for the energy of folk-song collectors, must have perished for ever. We need not suppose that even the words of the historical songs go actually as far back as the events they commemorate, but it is likely that they are not very much later. In these cases there is no tune which shows signs of great antiquity connected with either, but the tunes come from the common stock of the ballad-singer.

Many of the existing tunes handed down by country singers carry the strongest internal evidence (in the opinion of many students of folk-song) of a very respectable antiquity, for their structure is modal not only in the form of the scale chosen, but in other details, such as the descent of the penultimate note to the final by a single degree of the mode. All the church modes are represented in the folk-songs of Great Britain, and most of them in

purely English tunes. The fact that these modal tunes are in some cases associated with words that cannot be as old as the time before the modes had been superseded by our modern scales (see 'Napoleon's Farewell to Paris,' *Folk-Song Society's Journal*, i. 14, etc.) has suggested to some students of the subject the idea that the modal instinct, as it may be called, is so strong in some modern singers that they turn everything they hear into the mode of their own preference. Another theory has been put forward by an experienced collector, to the effect that there exists a kind of composite modal folk-song scale, combining peculiarities of various modes (see the *Folk-Song Society's Journal*, iii. 158). It is surely more reasonable to suppose that each modal tune which has survived with the characteristics of one particular mode unaltered, is a quite unconscious survival from the time when modes were in common use, and represents more or less accurately an original dating from at least the madrigalian era.

It has been said above that each of the church modes is represented in English folk-song; but some modes, notably the Lydian, can only be traced in a very few instances, such as the 'Six Dukes' already referred to (*Folk-Song Society's Journal*, iii. 170), where the sharpening of the fourth of the scale is not constant throughout the tune. The Ionian mode is so very nearly allied to our modern major scale that we are tempted to assign every major tune to that mode. But there are examples which prove their claim to be called modal by their obedience to the strict rule as to the descent of one degree upon the keynote or final of the mode, such as 'There is an Alehouse' (*Folk-Song Society's Journal*, i. 252), 'Ward the Pirate' (*ib.* ii. 163) and many others. In like manner there are many tunes which more or less closely follow the arrangement of the intervals in the Æolian mode, but not all of these obey the modal structure as fully as does 'Bushes and Briars' for instance (*ib.* ii. 143). In English folk-songs no modes, not even those most nearly resembling our modern scales, are as usual as the Dorian and the Mixolydian, and in fact the Dorian strength and austerity seem to suit the English nature better than the characteristics of any other mode. 'The Thresherman and the Squire' (*ib.* i. 79) and 'Bristol Town' (*ib.* i. 148) are but instances, chosen at random, of purely Dorian tunes. A certain large class of narrative tunes such as the quaint melody of 'Napoleon's Farewell to Paris' (*ib.* i. 14) is in the Mixolydian mode, and Phrygian characteristics have certainly influenced 'The Green Bed' (*ib.* i. 48) and 'Nancy of Yarmouth' (*ib.* iii. 101). Collectors are familiar with a large body of popular tunes that have no modal traces; many of these are set to interminable ballads of gallant enter-

prises undertaken by young women in or out of domestic service, and a good many survive in yearly use in connexion with such celebrations as May-Day, Easter and Christmas carols, harvest homes, and the like. As we might expect, the country singers, whose lack of musical knowledge is a most valuable element in keeping the tunes unspoiled by modern sophistication, are apt to confound traditional with composed songs, and to them the middle of the 19th century seems about as far back as the reign of King Henry I.; they will bring forward some hackneyed ditty of the late 'seventies with all the pride of one who knows a 'rare old song,' and it is by no means surprising that in certain instances collectors, more enthusiastic than judicious, have been deceived into accepting spurious folk-songs as genuine.

In other countries the study of folk-music has led in many cases to the creation of a national school of composers, and already the work done in amassing the great store of traditional English songs has opened a new source of inspiration to composers. The distinctive character of the fine examples of traditional music that have been collected in all parts of England will, we may be sure, be reflected increasingly in melodies which, without ceasing to be original, will be definitely and recognisably English. M.

BIBLIOGRAPHY

ENGLISH FOLK-SONGS WITH MUSIC

- E. TOPLIFF, *A Selection of the Most Popular Melodies of the Tyne and Wear, consisting of 71 Original Airs popular in the Counties of Durham and Northumberland*. Folio, c. 1812.
(This very rare publication has a dozen songs peculiar to Tyneside, with their airs.)
- WM. CHAPPELL, *National English Airs*. 2 vols. 4to. 1838.
Popular Music of the Olden Times. 2 vols. 8vo. 1857-59.
(Of these two works Chappell has given several excellent folk-airs which are omitted in the new edition.)
- JOHN BROADWOOD, *Old English Songs as now sung by the Peasantry of Surrey and Sussex*. Folio. 1845.
- M. H. MARSH, *Nursery Rhymes and Country Songs*. 8vo. 1877.
(An excellent collection of traditional Nursery Rhymes—a few songs, which are principally taken from the Rev. John Broadwood's book.)
- ROBINA EMMOT, *Pretty Peggy and other Ballads, illustrated by Rosina Emmot*. 8vo. c. 1880.
(Contains 5 folk-songs charmingly illustrated in colour.)
- J. COLLINGSWOOD BRUCE and JOHN STOKOE, *Northumbrian Minstrelsy. A Collection of Ballads, Melodies and Small Pipe Tunes*. 8vo. 1882.
(An interesting volume containing some Tyneside songs and a number of 'small pipe' tunes, two of which have already been printed as tunes for the violin in 18th-century works.)
- HEYWOOD SUMNER, *The Besom-Maker, and other Country Songs, collected and illustrated by Heywood Sumner*. 8m. 4to. 1888.
(Contains 9 songs, with their airs.)
- REV. JOHN BROADWOOD, *Sussex Songs, arranged by H. F. Birch Reynardson*. 4to. 1889.
(This is a reprint of the Rev. John Broadwood's 1843 book, with more songs added by Miss L. E. Broadwood.)
- REV. S. BURN-GUTHRIE, *Songs and Ballads of the West—a Collection made from the Mouths of the People*. 4 parts. 8vo. 1889-91.
(Several later editions of the parts and in volume form. Also an entirely new edition in association with Cecil J. Sharp, published in 1905. Also an edition named *English Folk-Songs for Schools* 1912.)
- FRANK KIDSON, *Traditional Tunes and Collection of Ballad Airs chiefly obtained in Yorkshire and the South of Scotland, together with their appropriate Words from Oral Tradition*. 1891.
- WM. ALEX. BARRETT, *English Folk-Songs collected and arranged by Dr. Barrett*. 1891.
- LUCY E. BROADWOOD and J. A. FULLER MATPLEAD, *English Country Songs collected and edited by Miss Broadwood and Fuller Matplead*.
- LUCY E. BROADWOOD, *English Traditional Songs and Carols*. 1908.
- FOLK-SONG SOCIETY, *Journal of the Folk-Song Society*. Parts 1 to 28, 1899-1924.
- REV. GEOFFREY HILL, *Wiltshire Folk-Songs and Carols*. 4to. 1904.
- ALICE E. GILLINGTON, *Eight Hampshire Folk-Songs taken from the Mouths of the Peasantry*. Folio. 1908.

- CECIL J. SHARP, *Folk-Songs from Somerset*.** Gathered and edited with pianoforte accompaniment by Cecil J. Sharp and Rev. Charles L. Mason. 4to. 1905.
Four more parts issued. In the 4th and 5th Sharp's name alone is mentioned.
A School Series of Folk-Songs in Numbers.
***Folk-Song Airs*.** Collected and arranged for the pianoforte. Books I. and II. Edited by Cecil J. Sharp.
Book I. *Folk-Songs from Dorset*. Collected by H. E. D. Hammond.
Book II. *Folk-Songs from the Eastern Counties*. Collected by R. Vaughan Williams.
Book III. *Folk-Songs from Hampshire*. Collected by George B. Gardner.
Book IV. *Folk-Songs from various Counties*. Collected by Cecil J. Sharp.
Book V. *Folk-Songs of Sussex*. Collected by W. Percy Merrick.
***English Folk Carols*.** Collected by Cecil J. Sharp.
***Folk-Songs collected in the Appalachian Mountains*.** 8vo. Books I. and II.
W. H. GILL, *Songs of the British Folk*. 1917.
FRANK KIDSON, *A Garland of Folk-Songs*. 1926.
ENGLISH FOLK-SONGS WITHOUT MUSIC
JOHN ARBON, *A Century of Ballads*. 1887.
***Modern Street Ballads*.** 1888.
***Real Ballad Songs*.**
JOHN BELL, *Rhymes of Northern Bards*. Being a collection of old and new songs and poems peculiar to the Counties of Newcastle-on-Tyne, Northumberland and Durham. 8vo. 1812.
ROBT. BELL, *Ballads Illustrative of History, Traditions and Customs*. 1856.
***Ancient Poems, Ballads and Songs of the Peasantry of England*.** 1857.
(These two most excellent books were really compiled by J. H. Dixon, who contributed much of the material to the Percy Society. Robert Bell being the general Editor of the series, used his own name as editor. There were many later editions published.)
JOHN HARLAND, *Ballads and Songs of Lancashire*. Chiefly older than the 19th century. 1865.
L. JEWITT, *Ballads and Songs of Derbyshire*. With illustrative notes and examples. 1867.
W. H. LOGAN, *A Pedlar's Pack of Ballads and Songs*. 1869.
JOSEPH RITSON, *Northern Garland*. 1810. A reprinted edition, 1887.
(This consists of 5 song 'Garlands' issued by Ritson: 'The Bishopric Garland and Durham Minstrel,' 1784; an enlarged edition dated 1781; 'The Yorkshire Garland,' 1788; 'The Northumbrian Garland,' 1795; 'The North Country Chorister,' 1802.)
SIR CUTHBERT SHARP, *The Bishopric Garland of Legends, Songs, Ballads, etc.* belonging to the County of Durham. 1834.
(A reprint of this work was issued at Sunderland 30 or 40 years ago.)
Carols - see CAROL.

LITERATURE

- CECIL J. SHARP, *English Folk-Songs: some Conclusions*.** 4to. 1907.
FRANK KIDSON, *English Folk-Song and Dances*. By Frank Kidson and Mary Noel. 8vo. 1916.

ENGLISH HORN, see OBOE (2); Cor Anglais.

ENGLISH MADRIGAL SCHOOL, THE. This is the first complete edition of the English madrigals (1588-1624). The whole was transcribed, scored and edited from the original partbooks by Edmund H. FELLOWES (q.v.), and published by subscription (Stainer & Bell) between the years 1913 and 1924. The reliability of its text makes it invaluable to students. The publication marks, and indeed has been largely responsible for, a widespread revival of these works in practical performance. Fellowes, both in his general preface and in his editorial method, has insisted on the necessity for interpreting madrigals according to phrase-rhythms. For this reason he has used irregular barring. Each of the madrigals in these 36 volumes is obtainable separately.

- Vol. I. Part I. THOMAS MORLEY. Canonets to two voices (1595).**
Part II. THOMAS MORLEY. Canonets to three voices (1593).
II. THOMAS MORLEY. Madrigals to four voices (1594).
III. THOMAS MORLEY. Canonets to five and six voices (1597).
IV. THOMAS MORLEY. Ballets to five voices (1600).
V. ORLANDO GIBBONS. Madrigals and Motets to five parts (1612).
VI. JOHN WILBYE. First set of madrigals (1598).
VII. JOHN WILBYE. Second set of madrigals (1609).
VIII. JOHN FARRER. Madrigals to four voices (1599).

ENGLISH OPERA, see BALLAD OPERA.

ENGLISH SCHOOL OF LUTENIST SONG-WRITERS, THE. This comprehensive edition of the solosongs with lute accompaniment of John Dowland and his contemporaries was undertaken by Dr. E. H. FELLOWES (q.v.), and began to be published by Winthrop Rogers in 1920. After the first eleven volumes had appeared the publication was transferred to Stainer & Bell, Dr. Fellowes remaining sole editor.

The edition has now been arranged in two series, the first of which was completed in 1924. In the first series each song is printed in two versions:

(1) In its original form and key, together with the lute tablature and an exactly literal translation of the tablature retaining the original barring.

(2) With the lute accompaniment adapted for use on a modern pianoforte with the addition of expression and tempo marks and occasional transposition. In this version the words of stanzas subsequent to the first are fitted to the music.

In the second series only one version is or will be given. The original key is retained and an exactly literal translation of the tablature is printed as the only accompaniment. As in the original editions, the first verse alone is set out, with the music, the complete poem being printed at the foot of the page. The original barring is not always followed, but the method of free barring is retained by the editor. Some suggestions as to tempo and expression are inserted. Neither series includes the arrangements for four voices published as alternative versions in the original books.

The contents are as follows:

FIRST SERIES

- JOHN DOWLAND. First Book of Songs or Ayres. 1597. 2 vols.**
Second Book of Songs or Ayres. 1600. 2 vols.
Third Book of Songs or Ayres. 1603. 2 vols.
A Pilgrime's Solace (1612, 2 vols.), including (vol. 2) Three Songs published in Robert Dowland's 'A Muscull Banquet.' 1616.

THOMAS FORD. *Songs in Musicke of Sundrie Kindes*. 1607. 1 vol.
 FRANÇOIS PILKINGTON. *First Booke of Songs or Ayres*. 1605. 2 vols.
 PHILIP ROSSETTER and THOMAS CAMPIAN. *A Booke of Ayres*. 1601. The first half by Thomas Campian, 2 vols.; the second half by Philip Rosseter, 2 vols.

SECOND SERIES

THOMAS CAMPIAN. *First Booke of Ayres* (undated).
 Second Booke of Ayres (undated).
 Third " " "
 Fourth " " "
 ROBERT JONES. *First Booke of Songes and Ayres*. 1600. Second Booke of Songes and Ayres. 1601.
 Ultimatum Vale, or Third Booke. 1608.
 A Musically Drame, or Fourth Booke. 1609.
 The Muses Gardiu for Delights, or the Fifth Booke. 1610.
 JOHN ATTEY. *First Booke of Ayres*. 1622.
 JOHN BARTLETT. *A Booke of Ayres*. 1606.
 MICHAEL CAVENDISH. *Airs*. 1598.
 WILLIAM CORKEIN. *Ayres*. 1610.
 Second Booke of Ayres. 1612.
 JOHN DANYEL. *Songs*. 1606.
 ALFONSO PERRABOSCO (the younger). *Ayres*. 1609.
 THOMAS GRAYES. *The Songs in Songes of Sundrie Kindes*. 1604.
 THOMAS HYME. *The Songs in Musically Humors* (1608), and *Poeticall Musicke* (1607). C.

ENGLISH SINGERS, THE, a group of six singers, whose special province has been the principles of ensemble in the English Madrigals. Their first concert in London (Feb. 28, 1920) was given as a group of singers without a name. The first foreign tour was to Prague in Jan. 1922, on the invitation of the Czecho-Slovak Ministry of Education, for a series of British Concerts conducted by Adrian Boult. In Apr. 1922 concerts were given in Berlin, Prague and Vienna, and in Apr. 1923 a more extended tour in Czecho-Slovakia and Berlin, with a tour in Holland in the autumn of the same year. The original 'English Singers' were Flora Mann, Winifred Whelen, Lillian Berger, Steuart Wilson, Clive Carey, Cuthbert Kelly. In addition to their special study of the English Madrigals, they were the instruments of propaganda abroad for the unaccompanied music of Vaughan Williams, particularly his folk-song settings. The importance of their work lay in its exact coincidence with the republication of the text of so much English vocal music of the 16th-17th centuries, after the style and knowledge necessary for the performance of it had been rediscovered (cf. *ENGLISH MADRIGAL SCHOOL*).

In Oct. 1924 the group was reconstituted to consist of Flora Mann, Nellie Carson, Lillian Berger, Norman Stone, Norman Notley, Cuthbert Kelly. This group made the first tour in America, on the invitation of Mrs. Coolidge, in 1925.

ENGLISH STRING QUARTET, THE. Founded in 1909, this quartet at first consisted of Tom Morris (1st violin), Herbert Kinze (2nd violin), Frank Bridge (viola), and Ivor James (violinist). In 1911 Miss Marjorie Hayward succeeded Morris as first violin. From the first the quartet took a high position as a result of both their intelligent interpretation of the classics and their enterprising attitude towards new music. They brought forward many works by their contemporaries, among them naturally those of Frank BRIDGE (q.v.). C.

ENGRAVING, MUSIC. The modern process

by which is produced the greatest bulk of the music issued to-day is this:

The stave lines are first cut on a pewter plate, then a series of small steel punches are used for striking the notes and lettering, the graver being employed in other parts, and for the title-page. Proofs are pulled by an ordinary copper-plate press, and corrections can be easily made on the plates. For the final printing a copy in transfer ink is placed on a lithographic stone, from which the entire edition is worked, leaving the plates for future use, and with the exception of the lithographic part, this process has remained exactly the same for a couple of centuries.

While the arts of engraving and etching for pictorial purposes had attained a high degree of perfection during the 17th century, it is singular that so obvious a method and so superior a one to that where the clumsy music typography of the day was employed should have been so seldom used. The first music (of which we have record) printed in England from plates is either 'Parthenia,' 1611, or Gibbons's 'Fantazies of three parts' for viols. The date of this latter work has been fixed at 1609, and again at 1610, but these years are quite uncertain. Both 'Parthenia' and the 'Fantazies' were reprinted several times from the same plates.

It has been recently stated that the first English printed plate music occurs in the work, *The Noble Arte of Venerie or Hunting*, George Turberville, imprinted by Henry Bynnemann for Christopher Barker, 1575, 4to (second edition, 1611). The music is a short passage—notes for the hunting-horn—but the present writer contends that in both editions it has been printed from a raised surface, probably a woodcut, for the work is freely adorned with these. The appended list of English printed music from engraved plates before 1700 will probably be found to be fairly comprehensive, but so many of the works named are now only represented by a single copy that it is possible the titles of many others are now lost.

In 1683 Thomas CROSS (q.v.) began to engrave, and he soon made a revolution in English music publishing. After 1700 it was the rule rather than the exception to issue music from plates. About this time the Dutch appear to have found out a method of softening copper, so that the notes could be readily stamped on the plate. Pewter soon took the place of the more expensive metal, and engraving was superseded by stamping.

John Walsh and John Hare are stated to have introduced the process into England about 1710, but probably the date may be a few years earlier.

There are indications that Cross (except in his very early work) did much of his engraving on either zinc or pewter, and probably used in

some cases the etching-needle and acid. It must be noticed that before Cross engraved, nearly all engraved music was instrumental and that the quavers and semiquavers were joined in groups as in the manuscript of the day, while in music typography of the same period before the introduction of the 'tied note' the quavers were separate. The three principal London music engravers of the 18th century were Wm. Smith (working from about 1730-62), and John Phillips and his wife Sarah (1750-63). In Scotland (Edinburgh) Richard COOPER (*q.v.*) worked from about 1725-64. T. Phinn and James Read were a little later, while James Johnson, from 1772-1811, monopolised the whole of the Scottish trade. Manwaring and the Neal family worked in Dublin about the middle of the 18th century.

ENGLISH ENGRAVED MUSIC BOOKS BEFORE 1700

1611. 'Parthenia or the Maydenhead of the first music that ever was printed for the Virginals.' Folio. (Reprinted 1613, 1655, 1659, with a 'Second Part' issued in 1689.)
1613. Notari, Angelo. 'Prime musiche nuove a una, due, e tre voci, etc.' William Hole, London. Folio. (35 M.)
- a. 1614. 'Parthenia in violata,' obl. 4to. (The only known copy is in an American collection.)
- (No date.) Gibbons, Orlando. 'Fantazies of three parts (for Viols) cut in copper, the like never before extant, and the Bell in St. Paul's Churchyard.' 4to. (Reprinted from the original plates, no doubt several times: advertised by Playford in 1653, etc.)
1639. Child, Wm. 'Chiose musick to the Psalmes of David for three voices,' 12 mo. Four parts. (Reprinted by Playford: advertised in 1633; one of his editions dated 1656.)
1659. Simpson, Christopher. 'Division Violin.' Folio. (Letterpress and title printed; music from engraved plates. Later editions 1687 and 1712.)
1661. Greeting, Thomas. 'The Pleasant Companion or new Lessons for the Flagelet,' obl. 12°. (J. Playford: other editions said to be dated 1666, 1672, 1673, 1680, 1682, 1683 and 1688.)
1663. 'Musick's Handmaid, New Lessons and Instructions for the Virginals or Harpsichord,' obl. 4to. (J. Playford: many later editions.)
1678. Bowman, Henry. 'Songs for one, two and three voices.' Oxford. Folio. (A later edition 1679.)
1679. A Vade Mecum for the lovers of Musick, shewing the Excellency of the Recorder. MDCLXXIX. London. N. Thompson for John Hudgebutt. Obl. 8vo. (Bodleian Library.)
1683. 'The Gentel Companion, being exact directions for the Recorder.' Humphrey Sautler. Obl. 4to.
1683. 'The Delightful Companion, a new Book of Lessons for the Recorder.' Folio. J. Playford.
1683. Purcell, H. 'Sonatas of III. parts for two violins and a basso.' Folio.
1684. 'Division Violin.' II. Playford. Obl. 4to. (Other editions 1685-95, 1700-01.)
1685. Mattioli, N. 'Ayres for the Violin.' 4 vols. obl. 8vo. (Engraved by T. Greenhill: the date is concealed in the ornamentation of a crown on one of the title-pages.)
1686. Thornton, Robert, a Dublin bookseller and engraver, advertises in this year that 'The choicest New Songs with musical Notes... fairly engraven on Copper will be constantly printed and sold at Twopence a song by the said Robert Thornton.'
- 1695? 'Joyful Cuckoldom, or the Love of Gentlemen and Gentlewomen.' J. Heptinstall. London. 4to. (B.M.)
1696. Purcell, H. 'Lessons for the Harpsichord.' Obl. 4to.
1697. 'Youth's Delight on the Flagelet.' Sold by J. Clarke. Seventh edition. Obl. 8vo. Date cut off. Circa 1680. The eleventh edition, published by J. Hare, is dated 1697 in part from same plates.
- a. 1698. A collection of songs by R. Leveridge, engraved by T. Cross, in possession of writer, title absent.
1706. Dr. Blow's 'Lessons for the Harpsichord.'

In addition several sheet songs published by Henry Playford and by T. Cross might be mentioned. F. K.

ENHARMONIC. (1) One of the genera of GREEK MUSIC (*q.v.*). (2) The word is usually applied to such modulations as involve in just intonation the use of the DIESIS (*q.v.*), in equal temperament the use of two names to a single note, *e.g.* F sharp and G flat. See HARMONY; MODULATION.

ENNA, AUGUST (b. Nakskov, Denmark, May 13, 1860), composer, born of humble parents, his father being a shoemaker. His grandfather was an Italian soldier in Napoleon's army, who

married a German woman and settled in Denmark. In 1870 the Ennas moved from Nakskov to Copenhagen, where August attended the free-schools. In early years he taught himself the pianoforte, and at 17 had a few lessons of little value on the violin and in theory. With this exception he was entirely self-taught. When he was about 20 he attached himself to a small travelling orchestra on a tour to Finland. After a fairly successful tour of six months he returned to Copenhagen, and composed an operetta called 'A Village Tale,' which was produced, towards the end of 1880, in several provincial theatres. In 1883 he obtained the post of conductor to a provincial company, for which he wrote the incidental music and several overtures. He was now enabled to publish some music, viz. songs, an orchestral suite, piano pieces and a symphony, which happened to attract Gade's attention. By Gade's help Enna gained the Ancker Scholarship, which enabled him to go to Germany for a year (1888-89), where he studied. A three-act opera called 'Heksen'—'The Witch'—was produced at the Royal Opera-house, Copenhagen, Jan. 24, 1892, and was a brilliant success. Two years later he produced another opera, 'Cleopatra,' at Copenhagen, but for some reason this failed to catch the public taste until the following year, when, with a new cast, it became extremely popular. He met with a further success with his 'Aucassin et Nicolette,' produced at Copenhagen in 1896, and at Hamburg in the following year. Later operas produced at Copenhagen have included 'The Little Matchseller' (after Hans Andersen) and 'Lamia,' both 1897, the latter revised as 'Ung Elskor' (1902); 'The Nightingale' (Nattergalen), 1912; 'Gloria Arsena,' 1917; 'The Jester' (Komedianten), after Victor Hugo, 1920. Two ballets, a choral work 'Mother-love,' a festival overture, symphonic pictures, a violin concerto and 2 symphonies are also in his list of compositions. His music is notable for its unconventional freshness, its beauty of sound and its clever and original orchestration. H. B., with addns.

ENOCH & SONS, a London firm of music publishers. The business was established by Emile S. Enoch in 1869 at No. 18 Berners Street, and in 1874 was removed to 19 Holles Street. In 1886 the firm moved to Great Marlborough Street. The publications of Enoch & Sons cover a great number of noteworthy and valuable works. They are the English agents for the well-known Litolf cheap editions of classical music. F. K.

ENRIQUEZ (ANRIQUEZ) DE VALERA RABANO, ENRIQUE (b. Peñaranda de Duero, 16th cent.), a Spanish lutenist, author of a 'Libro de musica de Vihuela, intitulado Silva de Sirenas' (Valladolid, 1547). The book contains a number of transcriptions of sacred

and secular music of the time, some of them arranged for two vihuelas, the parts being printed on opposite pages, and facing in opposite directions, so that the book could be used by two performers sitting opposite to one another. The transcriptions include a number of *villancicos* and madrigals, by Juan VASQUEZ (*q.v.*), Mateo Flecha and others, some of which are known in their original form (see DAZA). Morphy published a selection of the works of Enriquez in 'Les Luthistes espagnols.' J. R. T.

ENSDALL, JOHN (probably 1st half of 16th cent.), an English church composer whose 4-part motet 'Hic dies, quam fecit dominum' is in the British Museum (Add. MSS. 17,802-5). There is also a score of this, but arranged in 3 parts (Add. MSS. 29,382-5). J. M^c.

ENSEMBLE (Fr.), 'together,' is a term adopted into the English language and used in a special sense. Its use as a substantive may come from the French phrase, 'musique d'ensemble,' for what we call concerted music, whether in regard to the concerted pieces in an opera, where the principal characters take part together, or in chamber music, written for a small number of instruments in combination. It is in regard to this latter sense that the special use of the word is most common. A party of players, brought up in different schools, each pre-eminent in his own line, if required to join their forces in a string quartet, for example, would find a special difficulty in so modifying their own individuality as to present a perfectly harmonious interpretation of the work; their 'ensemble' would probably be pronounced unsatisfactory, and players of far inferior attainment, who happened to have enjoyed frequent opportunities of playing together, and learning each other's manner of phrasing, would probably give a far better idea of the work as a whole, and their 'ensemble' would be rightly said to be good. The same applies to vocal performances of concerted music.

The term is also frequently used with regard to orchestral performances, but with less significance, since there the 'ensemble' is controlled by one mind, that of the conductor.

BIBL.—J. A. FULLER MAITLAND, *The Consort of Music*. London, 1915; T. DUNHILL, *Chamber Music*. M.; addns. c.

ENTFÜHRUNG AUS DEM SERAIL, DIE (Fr. 'L'Enlèvement au sérail'; Ital. 'Il seraglio'), singspiel in 3 acts by Mozart; text altered by Stephanie from Bretzner's *Belmont und Constanze*. Begun July 30, 1781; produced, Vienna, July 16, 1782; in English 'with additional airs by Kramer' as 'The Seraglio,' Covent Garden, Nov. 24, 1827 (see Moscholes, *Life*, i. 193); as 'Il seraglio' and 'Der Serail' by a German company, Drury Lane, June 14, 1854; and as 'Il seraglio,' Her Majesty's Theatre, June 30, 1866, and Covent Garden, June 9, 1881; revived in English (Beecham season), His Majesty's, June 20, 1910. a.

ENTR'ACTE (Fr.), literally 'between the acts,' is the word customarily used in England as elsewhere for orchestral music played between the acts of an opera or a play. It corresponds to the old English ACT-TUNE (*q.v.*), and is often used rather as the prelude to the coming act than as an interlude. Bizet's 'Carmen' gives admirable specimens of the Entr'acte standing apart altogether from the action of the play. C.

ENTRÉE. (1) A name formerly given to a small piece of music in slow 4-4 time, with the rhythm of a march, and usually containing two parts, each repeated. It received its name from the fact of its being largely used in theatrical and ballet music to accompany the entry of processions, etc. An example of this kind of Entrée may be found in J. S. Bach's Suite in A for piano and violin. (B.-G. ix. p. 51.) (2) The word Entrée (Ital. *Intrada*; Span. *Entrada*) is also used as synonymous with 'introduction,' and is applied to the opening piece (after the overture) of an opera or ballet. J. J. Rousseau (*Dictionnaire de musique*) defines it as 'Instrumental air forming the beginning of a ballet.' (3) It is also applied in an opera to one whole act, and in an opera-ballet where every act forms a separate argument (Rousseau). The ALLEMANDE (*q.v.*) with its heavy rhythm and rather solemn expression, was easily transformed into a prelude which, under the name of Entrée or Overture, was played before a ballet. E. P.; addns. M. L. P.

ENZINA (ENCINA), JUAN DEL (b. near Salamanca, 1469; d. León, 1534), a Spanish composer of the time of Ferdinand and Isabella. His work as a poet and dramatist, author of *representaciones* and *eglogas* both sacred and secular, is well known to Spanish scholars. They have a peculiar interest for the musician in that the speeches alternated with song, and that a considerable quantity of the music has been preserved and published. His technique shows the influence of the Flemish school, but has a curious directness of expression which distinguishes his work both from the Flemish composers and the authors of Italian *frottole*. It is curious that all his known compositions should be secular, for the greater part of his life was spent in ecclesiastical surroundings, and he was successively archdeacon of Malaga and prior of León.

From the University of Salamanca, Juan del Enzina passed to the service of the first Duke of Alba, where he began by the composition of mystery plays for performance before the duchess in her private oratory at Toledo. Most of his works, both in music and in verse, were (he says) written between his 14th and 25th year. In 1514 he was in Rome, where his 'Farsa de Placida e Vittoriano' (in which he parodied the Office of the Dead, and acted in it himself) attracted the attention of Leo X.,

and he was promised the priorate of León. (A curious account of the performance, and of the spectators who witnessed it, is printed by Mitjana from a contemporary Italian source.) His appointment as archdeacon of Malaga dates from 1509, though he was not at that time in full orders, and seldom in his place in the Chapter. There is no evidence that he was ever a singer in the papal choir, or that he was professor of music in the University of Salamanca, as has sometimes been supposed. In 1519 he went on pilgrimage to the Holy Land; and then retired to the enjoyment of his priorate. His music is to be found in Barbieri's *Cancionero musical de los siglos XV y XVI*, Madrid, 1890. (See also Mitjana, *Estudios sobre algunos músicos españoles del siglo XVI*, Madrid, 1918.) J. B. T.

EOLINA, see AEOLINA.

ÉPINE, FRANCESCA MARGHERITA DE L' (d. Aug. 9 or 10, 1746),¹ in spite of her French-sounding surname, appears to have been an Italian singer, although she frequently signed herself 'Françoise Marguërite.' She is famous as the first Italian to sing publicly in English.

From Italy she came to England with a German musician named Greber, and was often, therefore, called 'Greber's Peg' by the wits of the day. An advertisement in the *London Gazette* (No. 2834), 1692, announces that the 'Italian lady (that is lately come over that is so famous for her singing) though it has been reported that she will sing no more in the consort at York-buildings; yet this is to give notice, that next Tuesday Jan. 10th, she will sing there, and so continue during the season.'

A fortnight later, this 'lady' is more familiarly called the 'Italian woman' in the notice given in the *Gazette*, that she would not only sing at York-buildings every Tuesday, but on Thursday in Freeman's Yard, Cornhill. In May 1703 she received '20 ggs for one day's singing in y^e play call'd the Pickle Shepherdess' (MS. in the writer's collection). In the theatrical advertisement for Lincoln's Inn Fields, June 1, 1703, it is said that 'Signora Francesca Margarita de l'Épine will sing, being positively the last time of her singing on the stage during her stay in England.' She continued, notwithstanding this, to sing during the whole of that month; nor did she ever quit England, but remained here till the time of her death.

On Jan. 29, 1704, Margherita sang, for the first time, at Drury Lane. On her second appearance there was a disturbance in the theatre while she was singing, the instigation of which was attributed to her rival, Mrs. Tofts, whose servant was, indeed, one of the principal agents in it. Mrs. Tofts, however, indignantly denied this in a letter to Rich, printed in the *Daily*

Courant, Feb. 8, 1704. In 1705 'Arsinoë' was produced, as announced in the *Daily Courant*, 'a new opera, after the Italian manner, all sung, being set by Master Clayton, with dances and singing before and after the opera, by Signora F. Margarita de l'Épine.'

This singing was probably in Italian. She sang in Greber's 'Temple of Love' the year after; and in 1707 in 'Thomyris,' the music taken from Scarlatti and Buononcini, the recitatives and accompaniments being added by Pepusch. She sang also in 'Camilla,' performing her part in Italian, while the English singers sang their own language. These rôles she repeated in 1708, and in 1709 added that of Marius in Scarlatti's 'Pyrrhus and Demetrius,' arranged for the English stage by Swiny and Haym. In 1710 she sang in 'Almahide,' that opera, the first ever performed wholly in Italian on our stage, the names of neither poet nor composer of which are known; and again in 'Hydaspes.' In addition to these she took part in 'Antiochus' and 'Ambleto,' and in Handel's 'Pastor Fido' and 'Rinaldo' in 1712; and in the pasticcio 'Ernelinda' and Handel's 'Teseo' in 1713. She continued to sing until 1718, when she married Dr. Pepusch, and retired from the stage. She is said to have brought him a fortune of £10,000.

Her execution was of a very different order' from that of the English singers of that time, and involved real difficulties. Indeed, her musical merit must have been very considerable to have kept her so long in favour on the English stage, where, till employed at the opera, she sang either in musical entertainments, or between the acts, almost every night. Besides being out-loudish, she was so swarthy and ill-favoured, that her husband used to call her *Herate*, a name to which she answered with as much good humour as if he had called her Helen' (Burney).

She is said to have been an excellent musician, not only as a singer, but also as an extraordinary performer on the harpsichord, and marks an era in the history of music in England. J. M.

EPISODES are secondary portions of musical works, which stand in contrast to the more conspicuous and definite portions in which the principal subjects appear in their complete form, through the appearance in them of subordinate subjects, or short fragments only of the principal subjects.

Their function as an element of form is most easily distinguishable in the fugal type of movement. In the development of that form of art composers soon found that constant reiteration of the principal subject had a tendency to become wearisome, however ingenious the treatment might be; and consequently they often interspersed exposition and counter-exposition with independent passages, in which sometimes new ideas, and more often portions of a counter-subject, or of the principal subject, were used in a free and fanciful way. By this means they obtained change of character, and relief from the stricter aspect of those portions in which

¹ It appears from a MS. diary (in the writer's possession) kept by B. Cooke (i.e. Dr. Cooke), a pupil of Dr. Pepusch, that Miss Pepusch began to be ill on July 19, 1746, and that, on Aug. 10, following, in the afternoon he (B. Cooke) went to Vaux-Hall with the Doctor, Mrs. Pepusch being dead. She was 'extremely sick' the day before.

the complete subject and answer followed one another, in conformity with certain definite principles. In connexion with fugue, therefore, episode may be defined as any portion in which the principal subject does not appear in a complete form.

There are a certain number of fugues in which there are scarcely any traces of episode, but in the most musical and maturest kind episodes are an important feature. It is most common to find one beginning as soon as the last part which has to enter has concluded the principal subject, and therewith the exposition. Occasionally a codetta in the course of the exposition is developed to such dimensions as to have all the appearance of an episode, but the more familiar place for the first one is at the end of the exposition. As an example of the manner in which it is contrived and introduced, the Fugue in F minor, No. 12 of the first book of J. S. Bach's *Wohltemperirtes Clavier*, may be taken. Here the subject is clearly distinguishable at all times from the rest of the musical material by its slow and steadily moving crotchets. The counter-subject which at once follows the first statement of the subject, as an accompaniment to the first answer, introduces two new rhythmic figures, (a) and (b), which afford a marked contrast to the principal subject—

and out of these the various episodes of the movement are contrived. The manner in which it is done may be seen in the beginning of the first episode, which begins at bar 16, and into which figure (a) is closely woven. The adoption of this little figure is especially happy, as the mind is led on from the successive expositions to the episodes by the same process as in the first statement of subject and counter-subject, and thereby the continuity becomes so much the closer.

As further examples in which the episodes are noticeable and distinct enough to be studied with ease may be quoted the 2nd, 3rd, 5th, 10th and 24th of the first book of the *Wohltemperirtes Clavier*, and the 1st, 3rd, 12th and 20th of the second book. They are generally most noticeable and important in instrumental fugues, which have a definite and characteristic or rhythmically marked subject.

It follows from the laws by which expositions are regulated that episodes should be frequently used for modulation. While the exposition is going on, modulation is restricted; but directly it is over, the mind inclines to look for a change from the regular alternation of prescribed centres. Moreover, it is often desirable to introduce the principal subject in a new key, and the episode is happily situated and contrived for the process of getting there; in the same way that after transitions to foreign keys an-

other episode is serviceable to get home again. In this light, moreover, episodes are very frequently characterised by sequences, which serve as a means of systematising the steps of the progressions. Bach occasionally makes a very happy use of them, by repeating near the end a characteristic episode which made its appearance near the beginning, thereby adding a very effective element of form to the movement.

In a looser sense the term Episode may be applied to portions of fugues which stand out noticeably from the rest of the movement by reason of any striking peculiarity; as, for instance, the instrumental portion near the beginning of the Amen Chorus in the 'Messiah,' or the central portions of certain very extensive fugues of J. S. Bach, in which totally new subjects are developed and worked, to be afterwards interwoven with the principal subjects.

In the purely harmonic forms of art the word is more loosely used than in the fugal order. It is sometimes used of portions of a binary movement in which subordinate or accessory subjects appear, and sometimes of the subordinate portions between one principal subject and another, in which modulation frequently takes place. It serves more usefully in relation to a movement in Aria or Rondo form: as the central portion in the former, and the alternative subjects or passages between each entry of the subject in the latter cannot conveniently be called 'second subjects.' In the old form of Rondo, such as Couperin's, the intermediate divisions were so very definite and so clearly marked off from the principal subject that they were conveniently described as Couplets. But in the mature form of Rondo to be met with in Sonatas and Symphonies the continuity is so much closer that it is more convenient to define the form as a regular alternation of principal subject with episodes. (See SONATA.) It sometimes happens in the most highly artistic Rondos that the first episode presents a regular second subject in a new key; that the second episode (following the first return of the principal subject) is a regular development or 'working out' portion, and the third episode is a recapitulation of the first transposed to the principal key. By this means a closer approximation to binary form is arrived at.

In operas and oratorios, and kindred forms of vocal art, the word is used in the same sense as it would be used in connexion with literature.

C. H. H. P.

EQUAL TEMPERAMENT is the division of the octave into 12 semitones of equal vibration ratios. It is the system of tuning now adopted for all keyboard instruments, and has superseded that known as Mean-tone System. An adjustment of some kind is necessitated by the existence of the COMMA (*q.v.*). Methods are fully discussed under TEMPERAMENT. See also INTERVAL; JUST INTONATION. C.

EQUAL VOICES, a term of rather ambiguous use, strictly denoting voices of equal compass. Sometimes works for female voices alone, or for male voices alone, are spoken of as 'works for equal voices'; but this is incorrect, and the term should be kept for those of equal compass, such as compositions for two or more soprani or for several contralti, as the case may be. In cases where one of two soprano parts is taken by a tenor, or one of two contralto parts by a bass, the composition does not cease to be 'for equal voices,' and the term is more correctly used of this combination than of that for soprano and contralto, or for tenor and bass.

M.

ERARD. The name borne by this firm of harp and pianoforte makers has been known almost as long in England as in France, its workshops having been established in London near the close of the 18th century, not long after those in Paris. The reputation of Erard's house is as much due to successful improvements in the harp as in the pianoforte, those of the *HARP* (*q.v.*) being of similar importance to the perfecting of the violin accomplished by the famous Cremona makers.

(1) **SÉBASTIEN ERARD** (b. Strasburg, Apr. 5, 1752; d. Aug. 5, 1831) was early put to his father's handicraft of cabinetmaker. His father dying when he was 16, he went to Paris and placed himself with a harpsichord maker. He had soon the opportunity to display his practical ingenuity by the construction of a mechanical harpsichord, which was described by the Abbé Roussier in 1776. The Duchess of Villeroi took notice of him, and allotted to him a workshop in her own château, where, in 1777, he made the first pianoforte constructed in France. According to Fétis this was a square with two unison stops and a compass of five octaves, similar to the English and German instruments that had been imported. He now established himself, with his brother Jean Baptiste, in the Rue de Bourbon. Their success exciting the jealousy of the Parisian musical instrument makers known as Luthiers, and belonging to the Fan-makers' Guild, they used the power they possessed to seize Erard's workshops; Louis XVI., however, came to the aid of the brothers, and conferred upon Sébastien (in 1785) a *brevet* permitting him to make 'forte-pianos' independent of the guild, but obliging him to employ workmen who had satisfied its regulations.¹

Sébastien was in London in 1786, and in 1792 took out a patent for improvements in harps and pianofortes. He returned to Paris, after the Terror, in 1796, in which year he made his first grand piano, using the English action, which, Fétis informs us, he continued with until 1808. In 1809 he patented a repetition grand piano action (the first) and improvements in the

construction of the harp, nearly completing that ingenious double action which was begun about 1786 and was perfected in 1810. A feature in the 1809 patent was the inverted bridge or upward bearing at the wrestplank bridge of the piano. Advanced age made Sébastien leave to his nephew Pierre Erard the introduction of his perfected repetition action, the patent for which was taken out in London in 1821. Among Sébastien's other inventions may be mentioned a 'Piano organisé,' or combination of piano and organ, a 'harpe à fourchette,' and the 'orgue expressif.' In 1835 the patent was extended to Pierre Erard for seven years on the plea of its great value and of the losses sustained in working it. The invention in 1838 of the Harmonic Bar is claimed for him.² (See *PIANOFORTE*.)

(2) **PIERRE ERARD** (b. 1796; d. Château de la Muette, Passy, near Paris, Aug. 18, 1855). His widow succeeded him in the business. From her it descended to the Count de Franqueville, who had married her niece and became the chief proprietor of the Paris house, his partner Blondel being in direction of affairs. The London manufactory was discontinued in 1890.

BIBL.—Revue musicale de Fétis, II. 337-44, III. 1-10, XI. 215; CONSTANT PIERRE, Les Facteurs d'instruments, Paris, 1893, 142-4 and 163-7.

ERBA, **DON DIONIGI**, a much-esteemed composer of Milan at the end of the 17th century. Like Marcello and Astorga he was of noble birth, and Cardinal Benedetto Erba seems to have been his brother. In 1692 he was maestro di cappella of the church of S. Francesco in Milan (see F. Vigoni's *Sacre armonie*, 1692, which contains music by him). The title of Don, given him by Quadrio, and that of 'R^d,' mentioned below, show that he was in holy orders. In 1694 he took part with Valtellina in the composition of the opera 'Arion,' and in 1695 with Besozzi and Battestini in 'Antemio.' But Erba's interest to us lies in the fact that he is not improbably the composer of a Magnificat for two choirs, from which Handel borrowed more or less closely for several pieces in the second part of 'Israel in Egypt.' A complete copy of this work, entitled 'Magnificat. Del R^d Sgr. Erba,' is in the R.C.M., and a partial one (ending in the middle sheet), in Handel's writing, without title or date, in the Roy. Lib., B.M. Opinions are divided as to whether it is an original composition of Handel's Italian time (1707-10), or of Erba. In favour of the former were Schoelcher and Macfarren (preface to 'Israel in Egypt' for the Sacred Harmonic Society). It is obvious that but for the existence of the MS. by Handel the question would never have been raised. The whole evidence was examined at great length and pains by Chrysander (*Handel*, i. 168-78), whose conclusion is strongly in favour of its being that

¹ Rimbault, *The Pianoforte*, 1860, p. 124.

² Dr. Oscar Paul, *Geschichte des Claviers*, Leipzig, 1868.

of Erba. He shows that the date of Handel's MS. is probably 1735-40 ('Israel' was 1738); that it has marks of being a copy and not an original composition; that the paper is not Italian, but the same as that used for his English works; and that the style of the music differs materially from Handel's style, whether early or late. In addition it might be urged that it is extremely improbable that in a copy of a work of Handel's his powerful name would be displaced on the title in favour of the insignificant one of Erba. Chrysander published the Magnificat as the first of the 'Supplemente' to his edition of Handel. Since then the researches of Percy Robinson, embodied in his book *Handel and his Orbit*, have added fresh matter to this discussion. Robinson has found that Erba and URIO (*q.v.*) are names of places in the neighbourhood of Milan (Erba is between Como and Lecco), and on this discovery founds the theory that the MSS. which bear these names are the composition of Handel himself, dating from the Italian period. In this respect Robinson's book is of importance to the student. For the list of numbers borrowed in 'Israel,' see Sedley Taylor, *The Indebtedness of Handel* (Cambridge, 1906). S. G.

ERBACH, CHRISTIAN (*b.* Algesheim, Palatinate, 1573). About 1600 he became organist to the Fuggers at Augsburg, succeeded Hassler as town organist of Augsburg in 1602, and in 1628 (according to Gerber) was appointed 'Rathsherr' of the same city. The first book of his 'Modi sacri seu cantus musici vocibus 4, 5, 6, 7, 8 et pluribus, ad omne genus instrumenti musici accomodatis' was published in 1600 at Augsburg, the second in 1604, and the third in 1606. Bodenschatz's 'Florilegium Portense' and Schad's 'Promptuarium musices' (Strassburg) contain motets of his in 4, 6 and 8 parts. MS. compositions of his are in the cathedral library at Augsburg and in the State Library at Berlin. (See *Q.-L.*)

F. G., with addns.

ERBEN, K. J. (*b.* Miletině, Nov. 7, 1811; *d.* Prague, Nov. 21, 1870), a famous Czech poet, author of a popular 'Garland' of National ballads, from whose works compatriot musicians have drawn largely for their subject-matter. Dvořák's setting of his 'Svatební Košile'—literally 'The Wedding Shift' (or chemise), but toned down in a decorous Victorian translation to 'The Spectre's Bride'—is well known to us. Quite unfamiliar in this country is Vít. Novák's more modern version of Erben's ballad (op. 48). Dvořák also borrowed from the 'Garland' for the literary basis of his *Orchestral Ballads* (opp. 107-110). Bendl utilised the greater part of the ballad 'Štědrý Den' (Christmas Eve) for one of his best choruses. Fibich used the same material for a melodrama, and also the ballad 'Vodník' (The Water-sprite). R. N.

ERDMANN, EDUARD (*b.* Wenden, Latvia,

Mar. 5, 1896), pianist and composer, comes of a Baltic family of scholars. Whilst attending the gymnasium at Riga he took piano lessons from Bror Möllersten and Jean de Chastain and learned theory from Harald Creutzburg. In June 1914, having matriculated, he went to Berlin to study the piano with Conrad Ansgor, and composition, until 1918, with Heinz Tiessen. From 1919 onwards he has toured as a concert pianist, in which capacity he has come to be known also as a disinterested champion of modern composers. For instance, at the Venice Festival of the International Society for Contemporary Music in 1925 he introduced the exacting piano sonata of Arthur Schnabel, another pianist-composer. Since Oct. 1925 he is a professor at the Hochschule in Cologne. As a composer he first attracted attention with a symphony performed at the 50th Tonkünstlerfest at Weimar in 1920, and afterwards in many German cities. His second symphony was performed for the first time in 1925 at the Prague Festival of the International Society. In his works Erdmann shows himself a daring and original thinker. He makes few concessions to his audiences, and it is sometimes a difficult task to follow his rather complex mode of expression, but whilst availing himself of modern harmonic freedom, he adheres to sound methods of construction, and notably to the principles of tonality. Of the compositions enumerated below, all of which are published, opp. 8, 10, 11, 12 and 13 are those which represent his present stage of development.

WORKS

- Op. 1. 'An den Frühling,' vln. and PF.
2. Four songs.
3. Six songs.
4. Unpublished.
5. 'Bagatellen' for PF.
6. Five PF. pieces.
7. Five songs.
8. 'Himmel und Erde,' song.
9. Rondo for orchestra.
10. Symphony No. 1.
11. Two songs.
12. Sonata for vln., unaccomp.
13. Symphony No. 2.

Without opus number: a Fox Trot in C major.

E. E.

EREDI (HEREDI), FRANCESCO, of Ravenna; maestro di cappella of the cathedral, 1623; and of the town, 1629. He composed 1 book of madrigals (1600); vesper psalms (1623); 'L' Armida del Tasso . . . a 5 voci,' op. 3 (1629); also songs in collective volumes (*Q.-L.*).

EREMITA, GIULIO (real name GIULIO GIUSBERTI) (*b.* Ferrara, second half of 16th cent.), a monk, organist at Ferrara (? Calmadori monastery), who composed 3 books of madrigals, 1584-89 (*Q.-L.*).

ERK, LUDWIG CHRISTIAN (*b.* Wetzlar, Jan. 6, 1807; *d.* Berlin, Nov. 25, 1883), rendered very important services to German popular music. His father (Adam Wilhelm Erk, 1779-1820) was cathedral organist at Wetzlar. Ludwig studied music under his father and André of Offenbach, receiving his general education from

Spieß, a well-known teacher at Frankfort. In 1826 he was appointed professor at the teachers' seminary at Moers on the Lower Rhine, and it was here that his connexion with popular music began. He started musical festivals at Remscheidt, Ruhrort, Duisburg and other small towns, which largely contributed to the taste for sacred and secular part-music. In 1836 he was appointed musical professor of the royal seminary at Berlin, and in the following year conductor of the newly-formed cathedral choir, which post, for want of proper support, he relinquished in 1838. In 1843 he founded a Männergesangverein in Berlin, for the express purpose of singing Volkslieder, and in 1852 started the 'Erksche Gesangverein' for mixed choir. In 1857 Erk was appointed director of music. In the beginning of 1877 he resigned his post in the seminary at Berlin, and was succeeded by Dienel. Among the most important of the many collections of German lieder which he edited is his 'Deutscher Liederhort,' of which vol. i. contains modern 'Volkslieder,' and vol. ii. those of the 13th-18th centuries.

F. G.

ERKEL, FRANZ (*b.* Békés, Gyula, Nov. 7, 1810; *d.* Buda-Pest, June 15, 1893), a composer of national Hungarian operas, was not at first intended for the musical profession, but having succeeded, by the indefatigable energy with which he trained himself as a pianist, in attracting the attention of Count Koloman Czáký, he was sent by the latter to Kolozsvár with a letter of introduction which enabled him in due course to become the centre of the musical life of the town, where his pianoforte recitals aroused considerable interest.

In the early 'thirties he was appointed deputy conductor at the German Theatre in Buda-Pest, and in 1838 he became conductor of the National Theatre. From this point his career was attended with unbroken success, which was due at least as much to his opportune introduction of the Hungarian national element into opera, as to his musicianship. The 'forties found the political conditions of Hungary such that any artistic embodiment of patriotic ideals was almost bound to ride on the wave of popular feeling; thus it is that the operas of Erkel, which, whilst containing much excellent music, were not intrinsically superior to many which have since been forgotten, attracted an amount of attention that would perhaps strike the modern critic as disproportionate. His first opera, 'Bathori Maria,' was produced Aug. 8, 1840, with instantaneous success. Its popularity was eclipsed by that of the opera 'Hunyady László,' which remains to this day the most frequently performed work of the national repertory. Its jubilee in '894 was made the occasion of brilliant musical festivities. The year after its production there was a competition for a hymn to become the National Anthem

of the Hungarians, in which Erkel obtained the prize. Then followed a period during which the musical life of Hungary was crippled by political disturbances which lasted several years, but in the early 'sixties we find Erkel at the zenith of his activity. In 1861 he produced an opera, 'Bank-Ban,' which, although surpassed in power and earnestness by some of its successors, is generally held to represent melodically the ideal of Hungarian music. These later operas, such as 'Dozsa György' (1866), 'Brankovics' (1874), 'Istvan Kiraly' (King Stephen), although sufficiently successful to be retained in the repertory, did not arouse such unbounded enthusiasm as the earlier works. Possibly their greater maturity was an element detrimental to popular success. 'Brankovics' is remarkable for the introduction of Serbian and Turkish melodies happily blended with the Hungarian. From 1868 to his death, Erkel occupied the position of head of all the choral societies of his native country and was held in the highest respect. He retired from active work in 1889, and was only seen afterwards at one or two festivals organised in his honour. Besides his operas he left a large number of songs, the majority of which are too intensely national to be of interest to musicians of other countries.

E. E.

ERLANGER, CAMILLE (*b.* Paris, May 25, 1863; *d.* Paris, Apr. 24, 1919), French composer, entered the Conservatoire at the age of 17, studying piano and composition under G. Mathias, E. Durand, Taudou, Bazille and L. Delibes; won the Grand Prix de Rome in 1888 with the cantata 'Velléda.' His first great success was with a dramatic legend in three parts, 'Saint-Julien l'Hospitalier,' a powerful work after Flaubert's story, performed at the Conservatoire in 1896, and at the Concerts de l'Opéra in 1895; an 'Idylle d'Armorique' in three acts and a prologue, 'Kermaria,' was produced at the Opéra-Comique, Feb. 8, 1897; and his most important work hitherto, 'Le Juif polonais,' on the popular Alsatian story, in three acts, at the Opéra-Comique, Apr. 9, 1900. 'Aphrodite' was performed at the Opéra-Comique, Mar. 23, 1906; 'Bacchus triomphant,' 1910; 'La Sorcière,' at the Opéra-Comique, 1912. A 'Sérénade carnavalesque' for orchestra; six 'Poèmes russes'; besides other songs and some piano pieces, may also be mentioned. Another opera, 'Le Fils de l'étoile,' was produced at the Opéra, Apr. 20, 1904; he also composed 'Hannele Mattern' and 'Taublas.'

BIBL.—A. BACHELET, *Camille Erlanger, Le Monde musical*, May 1919.

G. F.

ERLANGER, FRÉDÉRIC D' (*b.* Paris, May 29, 1868), composer, son of a German father and an American mother. He began his musical studies in Paris under Anselm Ehmann, his only teacher. His first work, a book of songs, was published by Hamelle during the composer's

twentieth year, and shortly afterwards he took up his abode in London, becoming a naturalised Englishman. His compositions include works of all kinds, notably three operas, 'Jehaf de Saintré' (Aix-les-Bains and Hamburg, 1894), 'Inez Mendo' (produced, under the pseudonym of Ferd. Regnal, at Covent Garden, July 10, 1897, and subsequently in Germany) and 'Tess of the d'Urbervilles' (after Thomas Hardy), produced at the San Carlo Theatre, Naples, Apr. 10, 1906, and at Covent Garden, July 14, 1909. Among his other works are a string quartet, a sonata for violin and piano, an 'Andante symphonique' for violoncello and orchestra, a quintet for piano and strings (Popular Concerts, 1902), a 'Suitesymphonique' for orchestra (Promenade Concerts, Sept. 1895), a violin concerto, op. 17, played by Kreisler at the Philharmonic Concert of Mar. 12, 1903, and a 'Concerto symphonique' for piano and orchestra (Queen's Hall, 1921). Clearness of form and elegance of idea and expression are the distinguishing marks of d'Erlanger's music, whether in his operatic work, in his chamber and orchestral music, or in his songs. G. F.

ERLEBACH, PHILIPP HEINRICH (b. Essen, July 25, 1657; d. Rudolstadt, Apr. 17, 1714), Kapellmeister at the court of Rudolstadt, 1697; an important vocal and instrumental composer. His opera (Singspiel), 'The Plejades,' appears to be lost. He wrote cantatas, sacred songs, overtures, sonatas, etc. (See *Q.-L.*; also Spitta, *J. S. Bach*; Einstein, *Zur deutschen Literatur f. V. da Gamba.*) E. v. d. s.

ERNANI, opera in 4 acts, by Verdi, founded on Victor Hugo's *Hernani*; produced La Fenice, Venice, Mar. 9, 1844. On its production at the Théâtre-Italien, Paris—Jan. 6, 1846—the libretto was altered in obedience to the wish of Victor Hugo. The personages were changed from Spaniards to Italians, and the name of the piece was altered to 'Il proscritto.' In England 'Ernani' was first played at Her Majesty's Theatre, Mar. 8, 1845, and in English, Surrey Theatre, Nov. 1, 1851; in New York, Astor Place Theatre, 1846.

ERNST, ALFRED (b. Périgueux, Apr. 9, 1860; d. Paris, May 15, 1898), French writer on music, one of the foremost champions of Wagner in French literature. The following are his most important works: *L'Œuvre dramatique d'Hector Berlioz* (1884); *Richard Wagner et le drame contemporain* (1887); *L'Art de Wagner*, part i. *L'Œuvre poétique* (1893), part ii. *L'Œuvre musicale* (unfinished); *Étude sur Tannhäuser de Wagner* (1895, in collaboration with E. Poirée); and lastly, the translations into rhythmic French prose of the words of 'Die Meistersinger' and 'Der Ring des Nibelungen.' Ernst wrote also many articles in various reviews, and undertook the musical reporting in the *Revue Encyclopédique*, etc. G. F.

ERNST, HEINRICH WILHELM (b. Brünn, Moravia, May 6, 1814; d. Nice, Oct. 8, 1865), celebrated violin-player. As a pupil of the Vienna Conservatorium he had Böhm for his master on the violin, and studied counterpoint and composition under Seyfried. He afterwards received instruction from Mayseeder, and soon achieved great proficiency on his instrument. When 16 he made his first tour and played with much success at Munich, Stuttgart and Frankfurt. At that time Paganini was travelling in Germany, and Ernst, greatly fascinated by this extraordinary artist, followed him from town to town in order to become familiar with the peculiarities of his style and technique. Towards the end of 1832 he went to Paris, and lived there for six years, studying and repeatedly playing in public. Between 1838 and 1844 he travelled over a great part of Europe, meeting everywhere with enormous success. On his appearing in Leipzig, Schumann greeted him with one of those genial criticisms which are so characteristic of him.¹ He first appeared in London, on July 18, 1843, in the Hanover Square Rooms; on Apr. 15, 1844, he played for the first time at the Philharmonic, after which he regularly came to London for the season and settled there in 1855. He played in Dublin in 1851 and 1855. After some years, however, his health began to fail, and he had to give up playing in public. He died after a painful and protracted illness.

Ernst's playing was distinguished by great boldness in the execution of technical difficulties of the most hazardous character. At the same time his cantabile was full of deep feeling, and his tone had a peculiar charm. The warm impulsive nature of the man was reflected in his fiery passionate style. But it must not be supposed that he was a mere virtuoso. Ernst was a thorough musician, and although critics have found fault with his reading of classical music, on the other hand very competent judges have pronounced him an excellent quartet-player.

As a composer he started with salon pieces and brilliant fantasias, which have not much intrinsic merit, but are extremely effective and well written for the instrument, and mostly very difficult. The 'Élégie,' which had a long run of popularity, is perhaps the best specimen of the first, the fantasias on airs from Rossini's 'Otello,' and on Hungarian airs, of the second kind. The concerto in F sharp minor (op. 23) is a composition of no mean order, equally distinguished by the nobility of its ideas and its skilful treatment of the orchestra. That it is seldom heard is due to its enormous technical difficulties, which even Ernst himself did not always succeed in mastering. The best-known among his compositions for the violin are:

Deux nocturnes, op. 1; Élégie, op. 10; Fantasia on airs from Rossini's 'Otello,' op. 11; Concertino in D, op. 12; Polonaise de Concert, op. 17; Variations on Dutch airs, op. 18; Introduction,

¹ *Gesammelte Schriften*, Jan. 14, 1840.

caprice, and finale, on airs from 'Il pirata,' op. 19; Rondo Papageno, op. 30; Fantasia on 'Le Prophète,' op. 24; Hungarian air, op. 22; Concerto pathétique in F \sharp minor, op. 23.

In conjunction with S. Heller he wrote a number of very pretty duets for piano and violin, which were published under the title of 'Pensées fugitives.' He also published an imitation of Paganini's once famous 'Carnaval de Venise.' He wrote two string quartets, in B \flat and A. The latter of these was his last work, and was played under Joachim's lead at the Monday Popular Concerts, June 6, 1864. P. D.

EROICA. The **SINFONIA EROICA** is the third of Beethoven's symphonies. The title is his own—

'Sinfonia eroica composta per festeggiare il sovvenire di un grand' uomo dedicata a Sua Altezza Serenissima il Principe di Lobkowitz da Luigi van Beethoven. Op. 55. No. III. Partizione. Bonna e Colonia presso N. Simrock.'

(Note the Italian: the titles of symphonies 1 and 2 are in French.) But its original title was simply 'Bonaparte. Louis van Beethoven.' The subject was suggested to him—perhaps as early as 1798, two years before the known completion of the first symphony—by Bernadotte, the French ambassador at Vienna; but there is no trace of his having set seriously to work at it till the summer of 1803. On his return to town in the autumn of that year he played the Finale to Mähler and Breuning (Thayer, ii. 236). For the story of the intended dedication to Napoleon, see Vol. I. p. 282.

The work was finished in 1804, and is in four movements: (1) Allegro con brio, E \flat . (2) Marcia funebre. Adagio assai, C minor. (3) Scherzo and Trio. Allegro vivace, E \flat . (4) Finale. Allegro molto; interrupted by a Poco Andante, and ending in a Presto, E \flat .

The symphony was purchased by Prince Lobkowitz. There is an interesting story of its having been played three times in one evening by the Prince's band, to satisfy the enthusiasm of Prince Louis Ferdinand of Prussia, passing through Vienna in strict incognito; but the first known performance (semi-private) was in Dec. 1804, when it was preceded by the previous two symphonies and the pianoforte concerto in C minor. The first public performance was at the Theatre 'an der Wien' on Sunday evening, Apr. 7, 1805, at a concert of Clement's, where it was announced as in D \sharp , and was conducted by Beethoven. Czerny remembered that at this performance some one in the gallery called out, 'I'd give a kreutzer if it were over.' The first performance in England was (probably) at one of the Vocal Concerts, at Hanover Square Rooms, on Feb. 14, 1806. It was played by the Philharmonic Society at the second concert of the second year—Feb. 28, 1814—and was announced as 'containing the Funeral March.' In France it was the opening work of the first concert of the Société des Concerts (Conservatoire), Mar. 9, 1828. It was published by Simrock of Bonn, the publisher of the first four symphonies, Oct. 29, 1806. G.

ERRARS, JEAN, a 14th-century troubadour,

who wrote 24 chansons now in the Paris National Library (*Félib.*).

ERTHEL, FATHER SEBASTIAN, an early 17th-century monk at Freising, Bavaria; afterwards choirmaster at the monastery of Garsten, Upper Austria. He wrote masses and other church music, vocal and instrumental. (See *Q.-L.*) E. v. d. s.

ESCLARMONDE, opera in 4 acts, prologue and epilogue, text by Alfred Blau and Louis de Gramont, music by Massenet; produced Opéra-Comique, May 15, 1889.

ESCOBAR (early 16th cent.), a Spanish composer, who was maestro de capilla at Seville from 1507 until 1514, and possibly longer. Church music by him is to be found in a MS. 'Varios de musica,' bought in Seville by Ferdinand, nephew of Christopher Columbus, about 1533 (Bibl. Columbina, Seville); in the Chapter Library at Toledo, in the Cathedral at Tarazona, and the Bibl. de la Diputación at Barcelona. More interesting, however, are his secular compositions, of which 18 (for 3 and 4 v.) are printed by Barbieri from the MS. in the Royal Library at Madrid. J. B. T.

ESCOBAR (ESCOVAR), ANDRÉ DE (b. Evora?, 16th cent.), a Portuguese musician, possibly of Spanish origin, and a noted performer on the *charamelinha* or *boé* (shawm). He seems to have spent some time at Evora and at Coimbra, where he was a member of the University and Cathedral bands. In 1550 he sailed for the Portuguese India. He wrote a method for his instrument, *Arte musica para tanger o instrumento da charamelinha*, which is said to exist in MS. at Coimbra. J. B. T.

ESCOBAR, JOÃO DE (early 17th cent.), a Portuguese composer, who published a 'Collecção de motetes' at Lisbon in 1620. A MS. 'Arte de musica theórica e pratica' by him was in the library of John IV., destroyed in the Lisbon earthquake of 1755. J. B. T.

ESCOBEDO (SCOREDO), BARTOLOMEO (b. Zamora, 1510-20; d. Segovia, 1563?), a Spanish composer, who was admitted to the Papal Choir in Rome in 1536, the year after Morales. He is described in the records as 'clericus zamorensis'; on a certain occasion he acted as judge in a dispute between Vicentino and Lusitano. In 1541 he applied for leave to visit his country; in 1554 he left Rome altogether and became maestro de capilla at Segovia in Old Castile. His works, which are admirably conceived in the severe style of Morales, include:

Mass, 6 v. 'Philippus Rex Hispanie' (for accession of Philip II.; MS., Sixtine Chapel, dated 1553).

MS., Sixtine Chapel, dated 1553). (Sixtine Chapel).

Mass, 6 v. 'Ad te levavi.' (Sixtine Chapel).

Motets: 'Domine, ne memineris'; 'Hodie completi sunt.' (Vatican); 'Immutetur habitus.' 4 v. (Vatican; Toledo); 'Exsurge, quare obdormis.' 4 v. (printed in Gomber's 'Musica 4 vocum, vulgo Motecta.' Venet. 1541. MS. Toledo).

Magnificat; Miserere (Madrid Capilla Real).

Eslava prints the last two of the above-mentioned motets, and 'Erravi sicut ovis.' 4 v. J. B. T.

ESCRIBANO (SCRIBANO), JUAN (*b.* end of 15th cent.; *d.* Rome, 1558), a Spanish singer and composer, who was in the Papal Choir under a succession of popes from 1507 until 1539. The Vatican archives contain a motet, 'Paradisi porta' (5 v.), and a Magnificat in the 6th tone. In secular music, he was the author of two chansons included in the 'Canzoni nove' of Andrea Antiquo di Montona, Rome, 1510, now in the University Library at Basle. J. B. T.

ESCUJER, (1) MARIE (*b.* Castelnauudary, Aude, June 29, 1819; *d.* Apr. 17, 1880), and (2) LEON (*b.* Castelnauudary, Aude, Sept. 17, 1821; *d.* June 22, 1881), two brothers famous as *littérateurs* on music. They were the founders of *La France musicale* (1838), a weekly musical periodical, and joint authors of *Études biographiques sur les chanteurs contemporains* (Paris, Tossier, 1840); *Rossini, sa vie et ses œuvres* (Paris, 1854); and *Vie . . . des cantatrices célèbres*, etc. (Paris, 1856), which contains a life of Paganini. They set up a music-publishing business, and brought out many of Verdi's works. Their *Dictionnaire de musique* (two vols., 1844, 5th ed. 1872) is a compact but unequal work. (See DICTIONARIES OF MUSIC.) In 1862 the brothers dissolved partnership, Léon continuing in the business and starting a new paper, *L'Art musical*, while Marie directed *La France musicale* until 1870. In 1876 Léon was for a short time director of the Théâtre Italien. M. C. C.

ESLAVA, MIGUEL HILARION (*b.* Burlada, Navarre, Oct. 21, 1807; *d.* Madrid, July 23, 1878), distinguished Spanish musician. In 1824 he was appointed violinist in the cathedral at Pampeluna, and in 1828 maestro de capilla of Burgo de Ossa. Here he was ordained deacon and took priest's orders when maestro de capilla at the metropolitan church of Seville (1832). In 1841 he produced at Cadiz his first opera, 'El solitario,' speedily followed by 'La tregua di Ptolemaide' and 'Pedro el Cruel,' which were successfully performed in several Spanish towns. In 1844 he was appointed maestro de capilla to Queen Isabella. He composed over 140 pieces of church music, including masses, motets, psalms, etc. His *Miserere* is sung annually in Seville cathedral. The work by which he will live is his 'Lira sacro-hispana' (Madrid, Salazar, 1869, ten vols.), a collection of Spanish church music of the 16th-19th centuries, with biographical sketches of the composers. Some of his organ music appears in another collection, his 'Museo orgánico español' (Madrid). His 'Método de solfeo' (1846) has been adopted throughout Spain. His 'Escuela de armonía y composición,' in three parts, harmony, composition and melody, the fruits of many years' labour, appeared at Madrid in 1861 (2nd ed.). In 1855-56 he edited the *Gaceta musical de Madrid*, a periodical of considerable interest.

The following are the contents of the 'Lira sacro-hispana'¹:

<p>16th Century, I. 1</p> <p>Ramos. Ave Regina. a 4 voces.</p> <p>Anon. Magnificat. 4.</p> <p>Do. Domine Jesu. 4.</p> <p>Fevin, A. Sanctus. 4.</p> <p>Do. Benedictus. 3.</p> <p>Do. do. 5.</p> <p>Do. ¹ The numbering of the volumes is very puzzling: but the plan seems to be that each century is represented by two 'series,' and each 'series' is divided into two volumes or 'tomos.' The number of the 'series' is indicated above in Roman figures, that of the 'tomo' in Arabic numerals.

Hugalde, C. J. Bone pastor. Bass solo and organ.	Caballero, M. F. Ave maris stella. 4 (orch.).
Hugalde. O salutaris. 3 (organ).	Calahorra, R. O. Lauda Mon. 1.
Meton, V. O quoniam suavis. 5.	Du. Vere languores. 4 (orch.).
Do. Ecce panis. 5.	
Do. O salutaris. 5 (all with orch.).	
Oileta, D. Salve Regina. 6 (organ and basses).	
Garcia, M. Ave maris stella. 4. (strings, trumpets and organ).	Secanilla, F. Hymn. Scripta sunt. 8, 3, 4, 5 (orch.).
Prádanos, H. O quam suavis. 4 (strings).	Doyagüe, M. Magnificat. 8 (str., oboes, trump. and organ).
	Duron, S. Fragmenta.

APPENDIX

M. C. C.

ESMERALDA, opera in 4 acts; words by Theo Marzials and Alberto Randegger, after Victor Hugo; music by A. Goring Thomas. Produced (Carl Rosa Co.) Drury Lane, Mar. 26, 1883; Berlin, Sept. 1891; Covent Garden (in French), July 12, 1890. For an earlier setting of Victor Hugo's libretto, see BERTIN. M.

ESPLÁ, OSCAR (b. Alicante, 1886), a Spanish composer who, after becoming a qualified civil engineer and doctor of philosophy, obtained a first prize at Vienna in 1909 for an orchestral suite. His subsequent works include a scherzo and sonata for PF.; sonata, PF. and violin; quintet; 'Crepusculo' for PF.; a symphonic poem, and a 'Suite Levantine.' His later manner, represented by 'Evocations, Danses, et Confins' for PF.; the ballet 'Ciclopes'; and the symphonic poem 'Los Cumbres,' has a markedly individual character, which, without drawing on folk-song, derives its inspiration from the 'Levantine' music of the south-east provinces of Spain. J. B. T.

ESPOSITO, MICHELE (b. Castellammare, near Naples, Sept. 29, 1855). At the age of 10 he entered the Conservatorio at Naples, where he remained for eight years, studying (as class-mate with G. Martucci) pianoforte-playing under Cesi, and composition under Serrao. In 1878 he came to Paris, where he remained until 1882, when he was appointed professor of pianoforte-playing at the Royal Irish Academy of Music, Dublin. For several years he was principally occupied with teaching and concert playing, giving pianoforte recitals under the auspices of the Royal Dublin Society, and also organising and playing for many years in the chamber music recitals given by that Society. In 1899, aided by some friends, he succeeded in establishing in Dublin a resident orchestra (the Dublin Orchestral Society), the concerts of which he conducted with much success (see DUBLIN).

His published works include 'Deirdre,' cantata for soli, chorus and orchestra (Feis Ceoil prize), produced Dublin, 1897, and subsequently given by Wood at a Queen's Hall Concert; an operetta, 'The Postbag' (libretto by A. P. Graves), produced at St. George's Hall, London, Jan. 27, 1902, by the Irish Literary Society; a string quartet; a sonata for violoncello and piano (Incorporated Society of Musicians prize, 1898); a sonata for violin and piano; and many songs and pianoforte pieces. He has also written an 'Irish' symphony (Feis

Ceoil prize, 1902), an 'Otello' overture, and other orchestral works unpublished. He was made Doctor of Music (*honoris causa*) of Dublin University in 1917, and the Italian title of Commendatore was conferred on him in 1922.

L. M'C. L. D.

ESQUIVEL, JUAN BARAHONA DE (ESQUIVEL BARAHONA, JUAN DE) (b. Ciudad Rodrigo, end of 16th cent.), a Spanish church musician, maestro de capilla in his native town, whose motets were printed at Salamanca in 1612 under the title of:

'Motecta festorum et dominicalium cum communi Sanctorum 4, 5, 6 et 8 vocibus concinnata. Salamanca, excudebat Artus Tabernellus Antverpianus, MDCXII.'

A second part, comprising hymns, Magnificats, etc., and published in 1613, is mentioned by Vicente Espinel, but has not been preserved. J. B. T.

ESSENGA, SALVADOR (DEL ESSENGA), a 16th-century composer and monk of Modena, apparently teacher of Orazio Vecchi, who composed 2 books of madrigals a 5 v. (1st lost; 2nd, 1561); 1 book of madrigals a 4 v. (1566); single numbers are in collective volumes (Q.-L.).

ESSER, HEINRICH (b. Mannheim, July 15, 1818; d. Salzburg, June 3, 1872), composer and conductor, was appointed Konzertmeister 1838, and then musical director in the court theatre at Mannheim. He was for some years conductor of the 'Liedertafel' at Mayence, and in 1847 succeeded O. Nicolai as Kapellmeister of the Imperial Opera, Vienna, where he was honoured as an artist and beloved as a man. In Nov. 1869, shortly after becoming art-member of the board of direction of the Opera, he was compelled by ill-health to resign, and retired on a considerable pension to Salzburg, where he died.

As a conductor he was admirable. Wagner showed his appreciation by entrusting him with the arrangement of his 'Meistersinger' for the piano. Esser was the first to discern the merit of Hans Richter, whom, while a member of his band, he recommended to Wagner as a copyist and arranger, and who ultimately justified the choice by succeeding Esser at the Opera in May 1875 (the former sub-conductor, Dessoff, having filled the chief post between Esser's death and Richter's appointment).

As a composer Esser was industrious and successful. The stage was not his forte, and though three of his operas were produced—'Silas' (Mannheim, 1840), 'Riquiqui' (Aix-la-Chapelle, 1843) and 'Die beiden Prinzen' (Munich, 1845)—they have not kept the boards. His compositions for the voice are numerous and beautiful—some forty books of Lieder, two of duets, four of choruses for men's voices and two for mixed ditto, etc. His symphonies (opp. 44, 79) and suites (opp. 70, 75), and orchestral arrangements of Bach's organ works (Passacaglia, Toccata in F), performed by the Phil-

harmonic Society in Vienna, are published by Schott, and a string quartet (op. 5) by Simrock. C. F. P.

ESSER, KARL MICHAEL RITTER VON (*b.* Aix-la-Chapelle, c. 1736), a famous violinist and viola d'amore player; Konzertmeister in the court chapel, 1763. He toured over Europe, 1772, and was knighted by the Pope. In 1774 he created sensation in Paris, and was no less successful in London, where 12 of his symphonies and 6 violin duets, op. 2, were published in 1775; 6 violin duets, op. 1, were published in Paris in 1770. Reichard, in the *Calendar* for 1783, mentions a singspiel 'Die drei Pächter.' A concerto for viol d'amour and a duet for the same instrument and viola da gamba, both in MS., are in the British Museum. (See *Q.-L.*) E. V. D. S.

ESSIPOFF, ANNETTE (*b.* St. Petersburg, Feb. 1, 1850; *d.* there, Aug. 18, 1914), Russian pianist, was educated at the Conservatorium of St. Petersburg, principally under the care of Theodor Leschetizky. After attaining considerable reputation in her own country she undertook a concert tour in 1874, appearing in London at the New Philharmonic concert of May 16, in Chopin's E minor concerto, at recitals of her own, and elsewhere. She made her début in Paris in the same concerto in 1875 at one of the Concerts Populaires, and afterwards at a chamber concert given by Wieniawski and Davidov. In 1876 she went to America, where her success was very marked. From 1880-92 she was the wife of Leschetizky. M.

ESTE (EST), see EAST.

ESTE, in N.E. Italy, between Padua and Rovigo. Two musical academies—*Degli Eccitati* and *Degli Atestini*—were established in Este in 1575. The family of the Este, always liberal patrons of the fine arts, encouraged especially the revival of music. Francesco Patrizzi (*b.* 1530; *d.* 1590), a professor in the latter of these two academies, in dedicating one of his works to Lucrezia d'Este, daughter of Ercole II., the reigning Duke, ascribes the revival of music in Italy to the House of Este, because Guido d'Arezzo was a native of Pomposa in their dominions, and because such famous musicians as Fogliano, Giusquino (Josquin), Adriano and Cipriano, first found favour and support from the Dukes of Este. C. M. P.

ESTEVE Y GRIMAU, PABLO (18th cent.), a Spanish composer, and author of a great number of *TONADILLAS* (*q.v.*) in the second half of the 18th century, the MSS. of which are preserved in the Bibl. Municipal, Madrid. One of his earliest works is a *zarzuela* (comic opera), 'Los portentosos efectos de la naturaleza,' written in collaboration with 'Sr. Escarlatti,' i.e. Scarlatti, nephew of Domenico. Pedrell (*Teatro Lírico*) prints extracts from various *tonadillas* dating from 1779-87.

J. B. T.

ESTHER. (1) Handel's first English oratorio; words by S. Humphreys, founded on Racine's 'Esther.' Written for the Duke of Chandos who paid Handel £1000 for it, and first performed at Cannons, Aug. 29, 1720. Performed again, in action, under Bernard Gates—in private Feb. 23, 1732, and in public at the King's Theatre, Haymarket, May 2, 1732, with 'additions' not specified.

(2) For the music to Racine's tragedy, see MOREAU.

ESTOCART, PACHAL DE, L' (*b.* Noyon, Picardie, 1540), gained the silver harp at the Évreux contest in 1584 with the motet 'Ecce quam bonum.' He composed several books of motets and French and Latin songs and 150 psalms (*Q.-L.*).

ESTRÉES, JEAN D', a 16th-century French musician, whom Duverdier calls 'joueur de hautbois du Roy.' He wrote 4 books: 'Livre de danseries, contenant le chant des branles communs, gays, de Champagne, de Bourgogne . . .' (Paris, 1559-64), a collection of great interest. E. V. D. S.

ESTWICK, REV. SAMPSON, B.D. (*b.* 1657; *d.* Feb. 16, 1738/39), was one of the children of the Chapel Royal under Captain Henry Cooke. Upon quitting the chapel on the breaking of his voice he went to Oxford, took holy orders and became one of the chaplains of Christ Church. He took the degree of B.A. in 1677, M.A. in 1680, and B.D. in 1692. In 1692 he was appointed sixth minor prebend of St. Paul's. On Nov. 27, 1696, he preached at Christ Church, Oxford, 'upon occasion of the Anniversary Meeting of the Lovers of Musick on St. Cecilia's day,' a sermon upon 'The Usefulness of Church Musick,' which was printed in the following year. In 1701 he was appointed vicar of St. Helen's, Bishopsgate, which he resigned in 1712 for the rectory of St. Michael, Queenhithe. Estwick composed several odes for performance at the Acts at Oxford, and other pieces still in MS. W. H. H.

ÉTOILE DU NORD, L', opera in 3 acts, words by Scribe, music by Meyerbeer, comprising many numbers from his 'Feldlager in Schlesien.' Produced, Opéra-Comique, Feb. 16, 1854; and as 'La stella del nord,' Covent Garden, July 19, 1855. For other operas on the story of Peter the Great, see CZAR UND ZIMMERMANN.

ÉTRANGER, L', 'action musicale,' in 2 acts; words and music by V. d'Indy. First performance, Paris Opéra, Dec. 4, 1903.

ÉTUDES (Fr.), studies, exercises, caprices, lessons. The large number of works extant under these heads for pianoforte, violin, violoncello, and in sundry instances for other orchestral instruments, are in a large measure mere supplements to the respective instruction books. They may be divided into two kinds—pieces contrived with a view to aid the student

in mastering special mechanical difficulties pertaining to the technical treatment of his instrument, like the excellent pianoforte *Études* of Clementi and Cramer; and pieces wherein, over and above such an executive purpose, which is never lost sight of, some characteristic musical sentiment, poetical scene or dramatic situation susceptible of musical interpretation or comment is depicted, as in certain of Moscheles's 'Characteristische Studien,' or the *Études* of Chopin, Liszt or Alkan.

An *étude* proper, be it only a mechanical exercise or a characteristic piece, is distinguished from all other musical forms by the fact that it is invariably evolved from a single phrase or 'motif,' be it of a harmonic or melodious character, upon which the changes are rung.

E. D.

EUGEN ONIEGIN, opera in 3 acts, libretto adapted from Pushkin, music by Tchaikovsky. Composed during 1877 and 1878, and performed by students of the Moscow Conservatorium, Mar. 1879; in English, Olympic Theatre, Oct. 17, 1892.

EULENSTEIN, CHARLES (b. Heilbronn, Württemberg, 1802; d. Styria, 1890), a performer on the JEW'S-HARP (*q.v.*). After enduring all sorts of privations and ill-success, he appeared in London in 1827, and produced extremely beautiful effects by performing on sixteen Jew's-harps, having for many years cultivated this instrument in an extraordinary manner. The patronage of the Duke of Gordon induced him to return in 1828; but he soon found that the iron Jew's-harp had so injured his teeth that he could not play without pain, and he therefore applied himself more and more to the guitar. At length a dentist contrived a glutinous covering for the teeth, which enabled him to play his Jew's-harp again. He was very successful in Scotland, and thence went to Bath (1834-45), to establish himself as teacher of the guitar, concertina and the German language. He eventually returned to Germany, and lived at Günzburg, near Ulm.

v. de P.

EULER, LEONHARD (b. Basle, Apr. 15, 1707; d. St. Petersburg, Sept. 7, 1783), wrote a number of important books on musical science, and was the first to employ logarithms in calculating the pitch of notes (*Riemann*; *Q.-L.*).

EUNUCH-FLUTE (*Flûte-eunuque*). An instrument described and figured by Mersenne.¹ It consisted of a tube (A C) open at one end where it terminated in a bell mouth (C), but closed at the other (A) by a piece of membrane stretched like the head of a drum, and covered for protection with a movable cap (A B) pierced with holes. In the side of the tube not far from the membrane, which was to be as thin as the skin of an onion, was a hole (B) into

which the player omitted his voice. The membrane, thrown into vibration by the sound of the voice, gave out notes of its own, the same in pitch as those of the voice, but louder, and different in timbre, they being of an ægophonous or bleating character. Mersenne states that music in four or five parts was performed on such instruments, the eunuch-flute having 'this advantage over all other flutes that it imitates better the concert of voices, for it lacks only the pronunciation to which a near approach is made in these flutes.'

He adds that 'the little drum imparts a new charm to the voice by its tiny vibrations which reflect it,' and expresses the opinion that a concert of eunuch-flutes is better than one of voices, 'which lack the softness of the harmony and the charm of the pieces of membrane.' The idea on which the eunuch-flute is based seems to have struck Lord Bacon, for he wrote²:

'if you sing into the hole of a drum, it maketh the singing more sweet. And so I conceive it would, if it were a song in parts sung into several drums; and for handsomeness and strangeness sake, it would not be amiss to have a curtain between the place where the drums are and the hearers.'

One of these instruments is preserved in the Museum of the Conservatoire of Paris. It is 88 centimetres in length, and is believed to date from the time of Henry III. of France. Eunuch-flutes are still manufactured, but only as toys. They are made in different sizes and sold as soprano, tenor, bass and contrabass.

C. W.

EUPHONIUM (Ger. *Euphonion*, *Baryton*). This brass valve-instrument is often called Tuba, and it is described under that heading. It is the highest in pitch of that group of instruments, and corresponds to the highest of the bass saxhorns, being built in B flat or C of the eight-foot octave. Tenor-tuba parts, such as that in Strauss's 'Don Quixote,' are generally played on the euphonium in England. (See SAXHORN and TUBA, and *PLATE LXXXIV.*)

EURHYTHMICS, see JACQUES-DALCROZE.

EURYANTHE, opera by Weber, the libretto by Helmine von Chezy; produced Oct. 25, 1823, Kärnthnerthor Theatre, Vienna; Covent Garden, June 29, 1833; Paris, Opéra, Apr. 6, 1831, with interpolations from 'Oberon'; Théâtre Lyrique, with new libretto, Sept. 1, 1857; New York, Wallack's Theatre, 1863. On Jan 19, 1904, it was revived at the Vienna Hofoper, with many alterations or omissions, both in words and music, by Gustav Mahler, who conducted it.

G.

EUSTORG DE BEAULIEU, HECTOR (b. Beaulieu, near Limousin, c. 1500; d. Basle,

¹ *Harmonie universelle*, liv. v. prop. iv.

² *Sylva sylvarum*, Cent. III. 283.

Jan. 8, 1552), organist at Lectoure, 1522; he became a Protestant, c. 1536, and went to Switzerland, where he set to music in 1546 a collection of his own poems, on the title-page of which he calls himself 'a former priest, musician and organist of the false Popish Church . . .' (Q.-L.).

EVACUATIO (Eng. *evacuation*; Ger. *Aus-leerung*; Ital. *evacuazione*), a term used in the 15th and 16th centuries to denote the substitution of a 'void' or open-headed note for a 'full' or closed one; e.g. of a minim for a crotchet. The process was employed both with black and red notes, and continued for some time after the invention of printing; but its effect upon the duration of the notes concerned differed considerably at different epochs. Morley,¹ writing in 1597, says:

'If a white note wh they called blacke voyd, happened amongst blacke full, it was diminished of halfe the value, so that a minime was but a crotchet, and a semibreve a minime,' etc.

But, in many cases, the diminution was one-third, marking the difference between 'perfection' and 'imperfection'; or one-fourth, superseding the action of the 'point of augmentation.' For the explanation of these cases, see NOTATION.

W. S. R.

EVANS, CHARLES SMART (b. 1778; d. London, Jan. 4, 1849), was a chorister of the Chapel Royal under Dr. Ayrton. On arriving at manhood he became the possessor of an unusually fine alto voice. On June 14, 1808, he was admitted a gentleman of the Chapel Royal. He was the composer of some anthems (two of them printed), and of many excellent glees and other pieces of vocal harmony, most of which have been published. In 1811 the Glee Club awarded him a prize for his cheerful glee 'Beauties have you seen a toy,' and in the following year a second for his 'Fill all the glasses.' In 1817 he carried off the prize offered by the Catch Club for the best setting of William Linley's 'Ode to the Memory of Samuel Webbe,' the eminent glee composer. In 1821 he obtained another prize for his glee 'Great Bacchus.' He also produced several motets for the use of the choir of the Portuguese Ambassador's chapel in South Street, Grosvenor Square (of which he was a member), some of which are printed in Vincent Novello's Collection of Motets. He was for some years organist of St. Paul's, Covent Garden.

W. H. H.

EVANS, (1) EDWIN (b. 1844; d. London, Dec. 21, 1923), was an organist and the writer of several meritorious books on music, of which a *Handbook to the Vocal Works of Brahms* is valuable as a work of reference for English readers. This was issued in 1912 as volume i. of an 'historical, descriptive and analytical

account of the entire works of Johannes Brahms' to be completed in three volumes with the instrumental works. Two volumes on *Beethoven's Nine Symphonies* were published in 1923-24. His son (2) EDWIN (b. London, Sept. 1, 1874) is also a writer on music and has specially devoted himself to propaganda on behalf of modern types of composition. His campaign has been almost entirely carried on through lecturing and journalism. His series of articles in the *Musical Times* (1919-1920) on modern British composers are full of valuable information and he has been a contributor both to the second and present editions of this Dictionary. In Jan. 1923 his services to the cause of the younger British composers were acknowledged by the presentation to him of his portrait subscribed for by a group of composers.

C.

EVE (HEVE), ALPHONSE D' (b. near Courtrai, mid-17th cent.), became choirmaster at St. Martin's, Courtrai, then at St. Walburga's, Oudenarde; and on Nov. 5, 1718, at Notre Dame, Antwerp, where he is traceable in documents only until Oct. 1719; but Fétis says that he was pensioned in 1725 on account of his great age, and succeeded by Wm. De Fesch. Of his numerous masses and church compositions only a few are still in existence. (See Q.-L.)

EVEN TEMPERAMENT, see EQUAL TEMPERAMENT.

EVERS, (1) CARL (b. Hamburg, Apr. 8, 1819; d. Vienna, Dec. 31, 1875), pianist and composer, made his first appearance when 12, and shortly after went on long professional tours. Returning to Hamburg in 1837 he studied composition under Carl Krebs. On a visit to Leipzig in 1838 he made the acquaintance of Mendelssohn, whose influence affected him greatly, and started him in instrumental compositions on an extended scale. In the following year he went to Paris, and was kindly received by Chopin and Auber, where he remained for some time working hard. In 1841 he was appointed Kapellmeister at Grätz, where he started a music business in 1858, taught, and otherwise exercised his profession. From 1872 until his death he resided in Vienna. His compositions comprise four pianoforte sonatas, of which those in B minor, B \flat and D minor were much esteemed; twelve 'Chansons d'amour' for piano; fugues; fantasias; solo and part-songs, etc. Haslinger of Vienna and Schott of Mayence were his publishers. His sister (2) KATINKA (b. 1822) was favourably known as an opera singer in Germany and Italy.

M. C. C.

EVOVAE (or EUOVAE), a technical word, formed from the vowels of the last clause of the Gloria Patri—*seculorum. Amen*; and used, in mediæval Office-Books, as an abbreviation, when, at the close of an Antiphon, it is neces-

¹ *A Plain and Easy Introduction*. Annotation at the end of the volume, referring to p. 9.

sary to indicate the Ending of the Tone adapted to the following Psalm, or Canticle.

The following example, indicating the Second Ending of the First Tone, is taken from an Office-Book printed at Magdeburg in 1613.

F. M. Böhme¹ mistook the vowels E.V.O.V.A.E. for a familiar Greek word, and was greatly exercised at the admission of a 'Bacchanalian shout' into the Office-Books of the Church! 'Statt *Amen* der bacchische Freudenruf, *evovae!*' W. S. R.

EWER & CO. John Ewer & Co. were in trade as 'importers of foreign music' at 1 Bow Church Yard, Cheapside, in or before the year 1824. The firm afterwards became Ewer & Johanning at the same place, with another address at Tichbourne Street, Piccadilly. In 1848 they were at 72 Newgate Street, in 1853 their address was 390 Oxford Street, and in 1865, 87 Regent Street, where William Witt is advertised as 'sole proprietor.' They held copyright of some of Mendelssohn's work, and did an important business.

In 1867 they became incorporated into the house of Novello, Ewer & Co., and removed to 1 Berners Street. (See NOVELLO.) F. K.

EXAUDET (EXAUDÉ), JOSEPH (b. Rouen, c. 1710; d. Paris, c. 1763), first violinist at the Rouen Academy concerts. From thence he went to Paris, where he was engaged for the Opéra in 1749. He composed 2 books of sonatas, opp. 1 and 3 (MS.), for violin and bass, and a book of trios for 2 violins and bass, op. 2. He is known at present by his beautiful minuet. E. V. d. S.

EXHIBITIONS OF MUSIC. The idea of bringing before the public the art treasures of private collectors under the form of a loan exhibition is essentially English, the Special Exhibition of Ancient Musical Instruments held at South Kensington in 1872 being acknowledged as the prototype of the many similar collections which have since been made in Europe and America. Although musical exhibitions for trade purposes only do not fall within the scope of the present article, students of musical history will find much information in the reports on the musical instruments in the two earliest London exhibitions (the Great Exhibition of 1851 and the International Exhibition of 1862) by Dr. William Pole, and the accounts by Clay and Pontécoulant of the musical section in the Paris Exhibition of 1867, whilst many recent exhibitions, though not arranged with this particular object in view, have afforded unusual opportunities of hearing the music of extra-European peoples performed

by native artists. In the following list are included the names of the most important exhibitions, in which there have been loan collections of musical instruments and literature, those of marked value from an antiquarian standpoint being denoted by an asterisk. Official catalogues of exceptional interest, and treatises which have been published bearing on these exhibitions, are mentioned under the special occasion which produced them.

1872. LONDON. *Special Exhibition of Ancient Musical Instruments, South Kensington. Catalogue with introductions, notes and photographs by Carl Engel, 1873. (Cremosa Violins and Variants, by Charles Roede, 1873. Some account of the Special Exhibition, being Appendix 2 to Catalogue of the Musical Instruments in S. Kensington Museum, by C. Engel, 1874.

1878. PARIS. *Historical Exhibition, Trocadéro. Report by Gustave Chouquet.

1880. BRUSSELS. National Exhibition.

1881. MILAN. *Musical Exhibition. Official Catalogue with short notes.

1885. LONDON. *Loan Collection of Musical Instruments, Books, etc., Albert Hall. A very fine collection held in connexion with the Inventions Exhibition. Guide to the Loan Collection with notes and preface by A. J. Hopkins. 1886. A Brief Description of Spinets, and other Keyboard Instruments in the Loan Collection, by William Dale (privately printed). Notes on Siamese Musical Instruments (Siamese Embassy, London). 1885. Musical Instruments, Historic, Rare and Unique, by A. J. Hopkins, with illustrations in colour by W. Gibb. 1886.

1886. EDINBURGH. International Exhibition.

1887. MANCHESTER. Royal Jubilee Exhibition (Musical autographs).

1888. BOLOGNA. *International Exhibition of Musical Instruments. Official Catalogue with short notes.

BRUSSELS. Industrial Art Exhibition.

1889. PARIS. *Universal Exhibition. Report on the Musical Instruments by Thibouville-Lamy. La Façure instrumentale (wind instruments), with illustrations by Constant Pierre. 1890.

1890. LONDON. *Military Exhibition, Chelsea (no stringed instruments, but in all other respects very complete). Official Catalogue with short preface to the musical section. Descriptive Catalogue of the Musical Instruments with prefaces, illustrations and appendices, by Captain C. R. Day. 1891 (Evre & Spottiswoode).

EDINBURGH. International Exhibition.

1892. VIENNA. *International Exhibition of Music and the Drama. The most extensive exhibition at present held. Illustrated Catalogue with notes, issued in 'National' sections. Musical History in the International Exhibition at Vienna, by R. A. Marr. 1893. The International Exhibition of Music and the Drama, edited by Hopkins, Steinert and Schneider, translated from the German. 1894. Musical Art Exhibition, Royal Aquarium. Catalogue with short preface and notes.

1893. CHICAGO. The World's Columbian Exhibition. Illustrated and annotated Catalogue of the Meinel Collection of Keyed and Stringed Instruments. 1893.

1894. EDINBURGH. Loan Exhibition of the Society of Musicians.

1897. LONDON. Victorian Era Exhibition, Earl's Court (especially Musical Literature).

BRUSSELS. Universal Exhibition.

1898. BRUSSELS. Musical Exhibition. Official Catalogue with short notes.

1900. LONDON. *Musical Exhibition, Crystal Palace. The first Exhibition in which the whole collection was systematically arranged to show classification and development. Annotated Catalogue with prefaces and Lectures. 1900. Musical News Office.

PARIS. *Universal Exhibition. Musée rétrospectif, illustrated Report of the Committee on the Musical Instruments. 1906 (privately printed).

1901. BRUSSELS. Bach Exhibition. Official Catalogue of Musical Instruments.

1902. BOSTON, U.S.A. Historical Musical Exhibition. Illustrated Catalogue with notes by Chickering.

1904. LONDON. *Tercentenary Exhibition of the Musicians' Company, St. Dunstons. An important feature was the system of Daily Lectures. Official Catalogue with prefaces and notes. 1904. The Lectures with illustrations. 1906 (Walter Scott Publishing Co.). Illustrated and Annotated Catalogue (Novello), 1909.

Owing to Continental complications no Musical Exhibitions have been held for many years.

F. W. G.

EXIMENO, ANTONIO (b. Valencia, Sept. 26, 1729; d. Rome, June 9, 1808), Spanish Jesuit. Having studied mathematics and music at Salamanca he became professor of both sciences at the military academy of Segovia. On the expulsion of the Jesuits from Spain he settled in Rome. His work, *Dell' origine e delle regole della musica, colla storia del suo progresso, decadenza, e rinovazione* (1774; Spanish translation, 1796), contains the germ of the theories afterwards elaborated by Wagner, and at the time raised a

¹ Böhme, *Das Oratorium*, Leipzig, 1861.

most of polemical writings, to which even Padre Martini contributed his share. He proposed to abolish the strict laws of counterpoint and harmony, and apply the rules of prosody to musical composition. He was the first scientific exponent of the doctrine that the aim of music is to express emotion, and thus exercised considerable influence on musical aesthetics. His contemporaries stigmatised his book as an 'extraordinary romance, in which he seeks to destroy music without being able to reconstruct it'—a verdict which curiously anticipates that often passed upon Wagner in later days.

His other works include *Don Lazarillo Vizcardi*, a musical novel in the manner of *Don Quixote*, describing the adventures of a musician whose mind has been deranged not by books of chivalry but by the study of counterpoint. Besides the plan of the book, the author has something of the admirable prose style of his model. It was edited by Barbieri (Madrid, 1872-73), while chapters taken from it and other writings of Eximeno were reprinted by Pedrell in 1921. Eximeno was one of the first exponents of the theory of nationalism in music: it was (he said) on the basis of its national song that the music of a country should be founded. J. B. T.

EXPERT, HENRY (b. Bordeaux, May 12, 1863), French 'musicologist,' came to Paris in 1881 and entered the École de Musique Classique founded by Niedermeyer (École Niedermeyer), in which he afterwards taught. He subsequently completed his musical studies under C. Franck and E. Gigout. For many years professor at the École des Hautes Etudes Sociales in the musical department, he founded with Ed. Maury a Société d'Études Musicales et de Concerts Historiques, and the choral society, La Chanterie de la Renaissance, which he himself conducts. From 1909 he was second librarian at the Paris Conservatoire Library, replacing J. Tiersot as senior librarian in 1920. Irresistibly attracted by the music of the French Renaissance, he has devoted himself heart and soul to the study of music of this period and to the publications of its achievements. Under the general title of 'Les Maîtres Musiciens de la Renaissance française,' now continued as 'Monuments de la musique française au temps de la Renaissance' (Loduc, Sénart, Paris), he has published since 1894 a great quantity of examples of Franco-Flemish art of the 15th and 16th centuries in a manner which is a model of scrupulous erudition. The work is divided into 6 sections as follows:

I. 25 volumes (*Maîtres Musiciens*) containing works of Lassus, Goudimel, Costeley, Claudin de Sermisy, Constans, Courtois, Deslignes, Dulot, Gascongne, Headlin, Jacotin, Janneguin, Lombart, Scholer, Vermont, Brumel, P. de la Rue, Mouton, Pévin, Mauduit, Le Jeune, Regnart, E. du Caurroy, Claude Gervaise, F. du Tertre. The sequel (*Monuments de la musique*) comprises (1924-26) 3 vols. (Le Jeune, Caron Didier le Blanc).

II. *Bibliographie thématique* (catalogue of French and Flemish works of the 15th and 16th century (2 vols.)).

III. *Théoriciens de la musique au temps de la Renaissance* (1 vol.), Michel de Menchou.

IV. *Source du Corpus* (authorities). Not yet published.

V. *Commentaires* (in preparation).

VI. *Extraits des Maîtres Musiciens de la Renaissance* (Anthologie Chorale), separate examples of sacred and secular music.

To these publications must be added reprints of instrumental music of the same period (Le Jeune, du Caurroy), and a special selection of pieces written on poetry of P. de Ronsard, under the title of *La Fleur des musiciens de P. de Ronsard, Sonnets, Odes et Chansons à 4 voix . . .* etc. (Paris, Cité des Livres, 1923). Besides these works, he has written a remarkable book on the Huguenot Psalter of the 16th century (Paris, Fischbacher). Specially dedicated to the music of the 16th, 17th and 18th centuries are the following collections: 'Chants de Franco et d'Italie' (3 series), 'Répertoire classique de musique religieuse et spirituelle,' 'Les Maîtres français du clavecin,' 'Amusements des maîtres français du XVIII^e siècle' (Sénart). He has contributed to the *Encyclopédie de la Musique et Dictionnaire du Conservatoire* (article: *Musique vocale*, 16th century), and has written the analytical notes of the 'Édition Nationale' (Sénart). M. L. P.

EXPOSITION is the putting out or statement of the musical subjects upon which any movement is founded, and is regulated by various rules in different forms of the art.

In fugue the process of introducing the several parts or voices is the exposition, and it ends and passes into EPISODE (*q.v.*) or counter-exposition when the last part that enters has concluded with the last note of the subject. Counter-exposition is the reappearance of the principal subject or subjects, after complete exposition, or such digressions as episodes. (See FUGUE.)

In forms of the harmonic order the term Exposition is commonly used of the first half of a movement in Binary form, because that part contains the statement of the two principal subjects. This use of the word is evidently derived from the incomplete and superficial view which was the legacy of theorists of some generations back, that a Binary movement was based on two tunes which for the sake of variety are put into two different keys. Hence it is not so apt in this sense as it is in connexion with fugue. But it may be defended as less open to objection when it is used as the obverse to Recapitulation, so as to divide Binary movements into three main portions, the Exposition, Development and Recapitulation; and though it leaves out of count the vital importance of the contrast and balance of key, it is likely to be commonly accepted in default of a better. (See also FORM.) C. H. H. P.

EXPRESSION (Ger. *Ausdruck*). When we speak of 'playing with expression' we imply the exercise of judgment as to more or less in matters of pitch, duration and tone (both qualitative and quantitative). Thoroughness still left CHORDING (*q.v.*) in the hands of the

executant; that, and the graces, ornaments and cadenzas of voice and instrument, were the last remnants of the executant's discretion in matters of pitch. Duration he may still control in RUBATO (*q.v.*). The volume of tone—the dynamics, as it is sometimes called—is in great part left to him.

The composer began in the 18th century to give directions as to fast and slow, loud and soft. Bach would write an occasional 'Largo' or mark an echo effect, *f* and *p*. The autograph of 'Messiah' confines itself to 'forte,' 'pian,' and 'pianiss,' as directions to the strings, and only at places where there could be any doubt. Of these Mozart gave a reading in his additional accompaniments. Beethoven wrote *fff* in the finale of his 7th Symphony. Schumann diminished the number of his dynamic marks after his early works. Tchaikovsky saw some advantage in ornamenting his string quartets with *fff* and *ppp*, and later composers have gone further; but such minutiae have their place in students' editions rather than in the literature of music.

With the executant must always rest the final decision. His difficulty is to acquire enough control over fingers or bow to be sure of maintaining a level of strength from which every divergence, even the slightest, will immediately tell. Clara Schumann and Teresa Carreño, conspicuously among pianists, had this power, but no great player has ever been without it. The gamut of strengths must vary with the player; the lower limit is that at which the instrument will speak, and the upper that at which it will produce a round, penetrating tone. Whether it should approach these limits depends chiefly on the character of the piece; much of the best playing keeps well within them. It is a common thing to play ascending passages crescendo on the analogy of the voice, though there is often something to be said for refraining from, or even reversing, this practice. The scale in the fourth bar of Beethoven's concerto in G is a test of skill and good taste. A *sforzando* in a quiet passage, such as that in the second bar in the finale of Beethoven's C \sharp minor sonata, should be kept down. In any case crescendos and diminuendos, however the composer may have marked them, should be considered in relation to the piece as a whole.

A. H. F. S.

EXPRESSION STOP, see HARMONIUM.

EXTEMPOREISATION or IMPROVISATION is the art of thinking and performing music simultaneously. It is therefore the primitive act of music-making, existing from the moment that the untutored individual obeys the impulse to relieve his feelings by bursting into song.

Accordingly, therefore, amongst all primitive peoples musical composition consists of extemporisation subsequently memorised, and the

process can proceed no further until some method of notation is devised to record the composer's musical thoughts independently of his musical performance. The folk-music of all countries, so long as it has existed without notation, has been developed in this way. The composer extemporises a melody either to a poem (possibly also extemporised) or to the movements of the dance, and memorises it for repetition later. Where memory is imperfect the power of extemporisation is called in again, either by the original composer or by some other, and so the melody is gradually moulded in the passage of time. Notation of any sort stereotypes the composition once for all. That is the difference between folk-song and plain-song. The Christian Church fixed its traditional melodies by NOTATION (*q.v.*) comparatively early, while folk-song remained unnoted and therefore subject to perpetual variation by extempore additions. Much of our English folk-song has been noted for the first time in our own generation.

But the standardisation of the church's song (plain-song) by notation merely turned the impulse to extemporise in another direction. The contrapuntal art of church music was developed primarily by the persistent desire of singers to extemporise additions, ornaments and contrasting melodies (see DESCANT), on and around the prescribed plain-song. Experiments made extemporaneously were passed into writing; they then became codified and reduced to rule. The conflict between ecclesiastical authority and the exuberant fancy of singers in extemporisation, existing from the famous edict of Pope John XXII.¹ (1322) to the Council of Trent (1545-63), has been noted by all historians; another and a more purely artistic conflict has not been so generally recognised, that is, the conflict between the composer who writes, and the impulse of the performer to embellish by extemporisation. That, which began in the Middle Ages, was carried on at any rate to the beginning of the last century. The whole history of composed music from John Dunstable to Beethoven may be described as the process of making the composer's defences sure against the incursions of the extemporer. The polyphonic composers of the 16th century had won the battle as far as concerted vocal music, either sacred or secular, was concerned. The masses of Palestrina and the madrigals of William Byrd alike leave no room for the inspiration of the moment beyond the possible addition of an occasional vocal embellishment.

But extemporisation played a large part in the two forms most characteristic of the 17th century, the opera and the sonata. The singer of an aria was expected to show his skill in extemporised ornamentation, especially at

¹ See *Oxf. Hist. Mus.* II. 89.

cadences,¹ and the composer left him free to do so; Corelli,² and other founders of the Italian sonatas for strings, frequently made their written parts a mere sketch of what the player should do. C. P. E. Bach's comments in his *Versuch* (see for examples ORNAMENTS and TURN) show that he regarded extemporised ornamentation as a legitimate part of the harpsichord-player's interpretation.

For two centuries (17th and 18th) ACCOMPANIMENT (*q.v.*), both in the opera and in concerted chamber music, was generally left to the extemporising skill of a harpsichord-player guided by the indications of a bass-part figured (see THOROUGH-BASS). Gradually the autocracy of composers curtailed these liberties. Handel wrestling physically with his singers,³ Bach pursuing a course of peaceful penetration by so elaborating his instrumental *obbligati* that neither singer nor harpsichordist could indulge in independent action, are alike evidential of the general process of strengthening the composer's defences. By Mozart's day the singer of an aria and the player of a solo concerto alike had to submit to discipline, and both were only, as it were, let out on sufferance in passages marked cadence or CADENZA (*q.v.*), where the orchestra was brought to a halt generally on the ♯ chord preceding the final dominant to tonic ending. The cadenza of the concerto was still frequently extemporised at the beginning of the 19th century, and sometimes later. Even Brahms in his violin concerto (1879) allowed for it, but by that time the custom of writing even cadenzas had become so general that his friend Joachim promptly supplied written cadenzas to the work. Thus the divorce of extempore from written composition was made absolute.

Meantime extemporisation had had a distinguished history as an independent art; it had exerted at times a powerful influence on written composition, and had in turn been influenced by the rules which, crystallising round instrumental composition, produced works in distinguishable forms. This history was more especially bound up with the perfecting of keyboard instruments, organ, harpsichord, etc., towards the end of the 16th century, for they gave to the single player complete control of harmony. The European reputation which the English virtuoso of these instruments, John BULL (*q.v.*), enjoyed, was evidently founded largely on his power of extemporisation at the keyboard, especially that of the organ. In the 17th century the organists of Germany developed the great school of organ music which culminated in J. S. Bach largely on the basis of extemporisation. Such rhapsodic forms as the Toccata and Fantasia were created in this way, and many existing specimens of the more

loosely constructed kind seem to justify the suggestion that they may have been extemporised first and noted afterwards. Of even greater importance was the organists' extempore prelude on Chorals or hymn tunes. What the singers of descant had done with the plain-song in the 14th century German organists did with the Lutheran melodies in the 17th, and with at least equally important results (see CHORAL). If the efforts of the descanters may be said to have evolved the counterpoint which made the Missa Papae Marcelli possible, the organists equally put tools into the hands of the greatest master of them all with which to fashion the 'St. Matthew Passion.' Reincken's commendation of Bach's own extemporisation on a Choral is sufficient evidence of this (see REINCKEN).

In the 18th century the debt which written composition owed to the extempore player was repaid. All the accounts bear witness to the fact that what impressed listeners in that classic age most profoundly was the ability of the masters to extemporise in the strict forms, from the fugue to the sonata, which the written art had evolved. Their triumph was to show that they could do without premeditation⁴ at the keyboard what they did in their studies on paper. Handel playing between the parts of his oratorios in London, Bach accepting themes from Frederick the Great at Potsdam (1747), Mozart and Clementi competing at Vienna (1781), are particularly salient instances among the many which crowd the pages of 18th century history. Their admirers never tired of the marvel: the more subtle the art of instrumental composition became, the more they could wonder at the masters' command of its subtleties of form and style in extempore playing, until the story is rounded off by Czerny's explicit account⁵ of Beethoven's extemporisation in three ways, namely, first movement sonata form, variations and free fantasia (see Vol. I. p. 265).

Many eminent composers of later times have been masters of extemporisation, from Mendelssohn and Hummel to César Franck and Saint-Saëns, yet undoubtedly in the 19th century the art retired rather into the background. Several causes contributed to this. Romanticism, which set comparatively little store by perfection of form and niceties of style, killed that wonder at the capacity to produce fugues and sonatas extempore which brought fame to the performances of earlier masters. Moreover, specialisation reached a stage hitherto unheard of in which great composers appeared, like Wagner and Berlioz, who were scarcely able to play their own works on the piano, much less improvise in their manner. Such men thought in terms of the orchestra, not in terms of their

¹ See Henderson, *Early History of Singing*.

⁴ The German term, *Auf dem Steigreife*, 'from the stirrup,' is significant.

⁵ Thayer, II 347.

hands on a keyboard. Again, the conventionalising of all music-making by the spread of public concerts and the premium set on personal interpretation of famous works tended to banish extemporisation. There have been pianists from time to time who introduced it into their recitals, but with only very partial success.

Not unnaturally it has flourished most conspicuously among organists, since the organist's duties in church favour, if they do not absolutely demand, it. The two French composers mentioned above were organists, and the French use of the organ in churches to provide interludes between various parts of the Mass and Vespers is peculiarly favourable to organ extemporisation. Recently the education of the Paris Conservatoire has specially fostered it, and the performances of Marcel DUPRÉ (*q.v.*), now famous in Europe and America, may be taken as typical of what a number of young French organists can do. The record of English organists is by no means insignificant, though the English cathedral service practically only allows a place to it in voluntaries before and after the office, and sometimes as an introduction to the anthem. S. S. Wesley (1810-76) was a great master of extemporisation. As he sat at the organ extemporising after service he appeared to be like a man in an hypnotic trance. His playing would include the most daring modulations and harmonic effects which anticipated those of modern music.¹ It is recorded that the beautiful opening passage of his anthem 'Thou wilt keep him in perfect peace' was originally improvised as a voluntary. E. J. Hopkins (1818-1901), for fifty-five years organist of the Temple Church, London, was famous for his extemporised introductions to anthems, and his successor, Walford Davies, carried further the tradition. Edwin Lemare, W. G. Alcock, Alfred Hollins and W. Wolstenholme, the last two stimulated in this direction by the fact of their blindness, have been other worthy representatives of the art in England.

Extempore playing is now recognised as an important factor in musical education even in the most elementary stages. Systems of mental training and 'aural culture' for children and young musicians, such as those of JACQUES-DALCROZE (*q.v.*) and YORKE TROTTER (*q.v.*), rely on it to a considerable extent. As a means of teaching the simple principles of form, the balance of rhythmic phrases in the structure of melodies, the current figures of speech in harmony and the contrasts producible by modulation, it has proved invaluable. It brings reason to the support of instinct and quickens the intelligence. Fifty years ago it was said to be doubtful whether 'the art of improvisa-

tion could ever be satisfactorily taught,'² but the statement would hardly stand to-day. It has been realised that not only can it be taught just so far as, and no further than, written composition can be taught (that is, you cannot create genius but you can impart technique), but it is one of the most direct ways of teaching music itself. It is the most natural means of approach.

BIBL.—F. J. SAWYER, *Extemporisation* (Novello's Primer); A. MADELEY RICHARDSON, *Extempore Playing*, New York, 1922; HARVEY GRACE, *The Complete Organist*. C.

EXTRAVAGANZA, a work which depends for its interest on extravagant fancy of one kind or another.

(1) It has been applied to instrumental works which either violate the conventions of contemporary style purposely or are designed in the spirit of caricature. Mozart's 'Ein musikalische Spass' (Köchel 522) has been quoted as the classical instance of instrumental extravaganza. In an age which disowns all conventions extravaganza of this type is scarcely possible. Stanford's 'Ode to Discord' may be recalled, however, as an attempt to caricature the liberties of the modern composer.

(2) The word is most frequently met with in connexion with the theatre, but there the extravagance is more usually in the part of the playwright than in that of the musician. Thus W. S. Gilbert used it more than once as a subtitle, *e.g.* 'Trial by Jury, an Extravaganza.' (See SULLIVAN.) C.

EYBLER (EIBLER), JOSEPH EDLER VON (*b.* Schwechat, near Vienna, Feb. 8, 1765; *d.* Vienna, July 24, 1846), took lessons (1777-79) from Albrechtsberger. In 1793 the master gave the pupil a testimonial in which he places Eybler as second only to Mozart (*Q.-L.*). Both Haydn (1787) and Mozart (1790) testified to his ability as a composer and his fitness for the post of Kapellmeister. Eybler nursed Mozart during his last illness, and after his death it was to him that the widow at once committed the task of completing the Requiem. He accepted the charge in a letter dated Dec. 21, 1791, and began the work, but soon gave it up. He was appointed choirmaster to a church in the suburbs in 1792, and in 1794 to the Schotten monastery in Vienna itself. About this time his first work, three string quartets, dedicated in Italian to Haydn, was published by Traeg. In 1804 he was appointed vice-Kapellmeister, in 1810 music-master to the imperial children, and, on Salieri's retirement in 1824, chief Kapellmeister. In 1834 he was ennobled by the Emperor, whose meetings for quartet practice he had regularly attended. A year before he had been obliged to give up the exercise of his profession owing to a paralytic stroke while conducting Mozart's Requiem. His opera 'L'Épée enchantée' was performed at the Leopoldstadt Theatre in Vienna in 1790, and some other operas are in

¹ This statement is made on the authority of Mr. C. Lee Williams, a pupil of Wesley and sometime organist of Gloucester Cathedral.

² Franklin Taylor on 'Extempore playing' in former editions of this Dictionary.

the possession of the Gesellschaft der Musikfreunde. For the 'Tonkünstler-Societät,' of which he was many years president, he wrote the cantata 'Die Hirten bei der Krippe' (1794); and for the Emperor 'Die vier letzten Dinge,' an oratorio first performed at court (1810) and afterwards by the Tonkünstler-Societät. His printed works—chamber music, pieces for

pianoforte and other instruments, vocal music, and several symphonies—were favourites in their day, but his church music is of greater value. His best work is the 'Requiem in C minor.' Haslinger published the Requiem, seven masses, two Te Deums, thirteen offertoriums, graduales, and Vespers, of which some are still in use.

C. F. P.

F. (1) The name of the fourth degree of the natural scale of C both in English and German, the French and Italian name being *Fa*.

Further nomenclature is as follows :

ENGLISH.	FRENCH.	GERMAN.	ITALIAN.
F flat.	Fa bémol.	Fes.	Fa bemolle.
F double flat.	Fa double bémol.	Fesses.	Fa doppio bemolle.
F sharp.	Fa dièse.	Fis.	Fa diesis.
F double sharp.	Fa double dièse.	Fisis.	Fa doppio diesis.

In the modal system F is the final of modes V. and VI., Lydian and Hypolydian, and the dominant of mode II., Hypodorian.

The F clef is the bass clef. See CLEF.

(2) *f* and *ff* are the abbreviations for *forte* and *fortissimo*.

(3) The holes cut in the belly (table) of violin, etc., are called the *f* holes from their shape.

Sir George Grove remarked that a note from

Beethoven to Steiner is signed

FA, the fourth note of the major scale in the nomenclature of France and Italy. See F; HEXACHORD; SOLMISATION; TONIC SOL-FA.

FAA, ORAZIO, 16th-century composer, calls himself 'Gentil' huomo di Casale di Monferrato.' He wrote 'Salmi di Davit' . . . (1573, 2nd ed. 1587), 2 books of madrigals (Venice, 1569 and 1571); 1 Motet and Domine in collective volumes. E. v. d. s.

FABER, (1) HEINRICH (*b.* Lichtenfels; *d.* Oelsnitz, Feb. 26, 1552), studied at Wittenberg University in 1542. He was rector of the monastery school of St. George at Naumburg, from whence he was expelled in 1549 for writing derisive songs against the Pope. In 1551 he was lecturer on music at Wittenberg University, and thence went to Oelsnitz as rector of the school. He wrote *Compendiolium musicae pro incipientibus*, which appeared in numerous editions and translations between 1552 and 1665 (some undated); and *Ad Musicam practica introductio*, several editions between 1550 and 1571 (*Riemann*).

(2) BENEDIKT, teacher and choir singer under Melchior Franck at Coburg, 1602-31, composed psalms (8 v.), cantiones sacrae (4-8 v., 1604), and some cantatas (*Q.-L.*).

FABRI, ANNIBALE PIO (called BALINO) (*b.* Bologna, 1697; *d.* Lisbon, Aug. 12, 1760), one of the most excellent tenors of the 18th century.

Educated musically by the famous PISTOCCHI (*q.v.*), he became the favourite of the Emperor Charles VI., and other Princes sought to engage him in their service. He was also a composer, and member of the Accademia Filarmonica of Bologna. Received into that society in 1719, he was named its *Principe*, or president, in 1725, 1729, 1745, 1747 and 1750. In 1729 he came to England and sang, with Bernacchi, his fellow-pupil under Pistocchi, in Handel's

'*Tolemeo*,' taking the part of *Araspe*, formerly sung by Boschi. As the latter was a bass, the part was probably transposed for Fabri for want of a bass to sing it. In the same year he performed the tenor part in '*Lotario*,' as also in '*Partenope*' (1730), and in '*Porò*' and a *reprise* of '*Rinaldo*' (1731), all by the same master. He was appointed to the Royal Chapel at Lisbon a few years later. J. M.

FABRICIUS, WERNER (*b.* Itzehoe, Holstein, Apr. 10, 1633; *d.* Leipzig, Jan. 9, 1679),¹ an organist and composer of note. As a boy he studied music under his father, Albert Fabricius, organist in Flensburg, and Paul Moth, the cantor there.

He went to the Gymnasium in Hamburg, where Thomas Selle and Heinrich Scheidemann were his teachers in music. In 1650 he went to the Leipzig University, studying philosophy, theology and law; in the latter he became a fully qualified 'Notar.' He was appointed Musik-Director of the Paulinerkirche, Leipzig, in 1656, and in 1658 was also appointed organist to the Nicolaikirche. Although he tried for the post of cantor to the Thomakirche in Mar. 1658, he was not elected. He was married July 3, 1665, and one son survived him, Johann Albert Fabricius.

LIST OF WORKS

1. *Deliciae harmonicae oder musikalische Gemüths-Ergötzung, von allerhand Paduanen, Alemanden, Couranten, Balletten, Sarabanden, von 5 Stimmen nebst ihrem Basco Continuo, auß Violon und andern Instrumenten füglich zu gebrauchen.* Leipzig, Joh. Bauern. 1656. 4to. 64 compositions. Four partbooks (the Bassus missing) in the public library.
2. *Trauer-Trost-Nachmens Ode, dem . . . Herrn Joh. Bauern . . . über dem allzufrühesten Abschleiden Ihres . . . Wohllebens David welches . . . den 28 Febr. 1656, entschlafen . . . in folgende Melodey gesetzt von Wernero Fabricio.* Text: 'Du Blut von unserem Blute,' for five voices, in score. Leipzig, folio sheet.
3. *Gedoppelte Frühlings Lust . . . bey erfreulichem Hochzeits-Feste des . . . Herrn Nigls. Ruperti Saltzbergers . . . den 15 Apr. 1656. In einer Art entworfen von Wernero Fabricio Holstato.* Druckte, Quirin Bauch. Text: 'Schöner Frühling laß dich küssen,' in score, folio sheet. Both in the Zwickau Stadtbibl.
3. E. C. Homburgs geistlicher Lieder erster Theil, mit zweystimigen Melodeyen gezeichnet von W. F., jetziger Zeit Musik-Directoren in der Paulinerkirchen zu Leipzig. Jena. Bengenwalden. 1659. 8vo. pp. 528. Contains 100 melodies with figured bass; Zahn gives 22 of them which became part of the church song. In the Augsburg Stadtbibl., etc.
4. *Werneri Fabricii Holstati [Notarii] [Publici] [Caesareus] Academiae & ad D. Nicolai Lipsiensium music. Geistliche Arien, Dialogen und Concerten, so zu Heiligung hoher Fest-Tagen mit 4, 5, 6, und 8 Vocal-Stimmen sampt ihrem gedoppelten Basco continuo, auß unterschiedliche Arten, nebst allerhand Instrumenten füglich können gebraucht und musicirt werden.* Leipzig, Joh. Bauern. 1662. 4to. Contains complimentary Latin verses addressed to him by the aged Heinrich Schütz. 35 compositions. Nine partbooks in the Berlin Museum, etc.
5. *Vier-stimmige Motette: 'Vater in deine Hände' . . . auf Herrn Wentzel Buhlens Namens-Tage.* Leipzig, 1671. 4to.
6. *Werneri Fabricii Manuductio zum General Bass bestehend aus lauter Exempeln.* Leipzig, 1675. This work is mentioned in *Mattheson's Grosses General Bass Schatz*, 1731, p. 13.
7. *Werneri Fabricii, ehemaligen Organisten zu St. Nicolai in Leipzig, Unterricht, wie man ein neu Orgelwerk, ob gut und beständig sey, nach allen Stücken, in- und auswendig examiniren und so viel möglich, probiren soll.* Frankfurt und Leipzig, 1736. 1 vol. 8vo. pp. 87. No preface or dedication. In British Museum, etc. It is curious that this work should have been published nearly 80 years after Fabricius's death, for no earlier edition is known. It has been suggested that the date is a misprint for 1658, but the title states 'formerly organist of St. Nicolai, Leipzig,' and he held that post until his death.

His music is also to be found in :

1. *Passionale melicum . . . Martino Jano, Görlitz. 1663. Three melodies.*

¹ According to the contemporary account of him in *Musica Davidica, oder Davids Musik, bei der Leichbestattung des . . . Herrn Werneri Fabricii . . . durch Joh. Thilman, ad S. Nicolaum Ecclesiam* (Leipz., 1678, p. 150), but *Einiger (Q.-L.) correcte* the date of death to Apr. 9, 1679.

2. Johann Crügers . . . praxie pleletis mellos. Frankfurt. 1678 and 1693 editions. Six melodies with figured bass.
 3. Nürnbergisches Gesangbuch. 1676, 1677 and 1690 editions. Five melodies with figured bass, from the *Geistliche Lieder* of Ebnburg, 1659.
 4. Geistlicher Harffen-Klang auf zehen seytzen . . . Joh. Quirseldens. Leipzig. 1679. Five melodies.
 5. Musikalischer Vorschmack . . . von Peter Sohren. Hamburg. 1683. One melody with figured bass.
 6. Lüneburgisches Gesangbuch. 1686 and 1694 editions: one melody. 1695 and 1702 editions: two melodies.
 7. Das grosse Cantional oder Kirchen-Gesangbuch. Darmstadt. 1687. Three melodies.
 8. Choral Gesangbuch . . . von Daniel Speeren. Stuttgart. 1692. Three melodies.
 9. Meinigenisches Gesangbuch. Editions 3 and 4, 1693 and 1697. Two melodies with figured bass.
 10. Darmstadtisches Gesangbuch. 1699. One melody.
 11. Canticum spirituale. 5ème édition. Frankfurt. 1702. One melody with figured bass.
 12. König's Liederschatz. 1738. Eight melodies.
 Winterfeld (*Der evang. Kirchengesang*. 11. Musikbelle, Nos. 173-4) repeated two of Fabricius's best-known chorales from the 1659 *Geistliche Lieder*: 'Lasset uns lachen' and 'Jesus du, du bleibst,' voice part with figured bass, in the Upsala Library, in Gustaf Düben's Collection of 'Motetti e concerti, libro 5, 1665, are two compositions by W. Fabricius. Eitner (*Quellen-Lexikon*) gives the following MSS.: in the Berlin Königl. Bibl. MS. Z. 40. No. 2 'Istlich und schöne sein,' and No. 4 'Herr, wenn ich nur dich hab,' both for eight voices.

C. S.

FABRITIUS (FABRICIUS), ALBINUS (fl. 1580-1595), is said to have lived in Görlitz, Prussia. The one work known of his was published at Grätz, Styria (Steiermark), in Austria: 'Cantiones sacrae sex vocum iam primum lucem aspicientes. Authore Albino Fabricio. Graecii, quae est metropolis Styriae, exudebat Georgius Widmanstadius.' 1595. Obl. 4to. Twenty-five motets. Six partbooks in Wolfenbüttel Herzogl. Bibliothek.

Contents: 1. Caudent in coelis; 2. O sacrum convivium; 3. Quare tristis es anima; 4. Non vos relinquam; 5. Hodie rex colorum; 6. Ave Regina; 7. Salve festa dies; 8. Christus resurgens; 9. Aurea lux roseo; 10. Tu solus qui facis; 11. Scio quod redemptor; 12. Cantate Domino; 13. Hodie Christus natus; 14. Sus praecor Deus; 15. Ad te levavi; 16. Convertit planctum; 17. Vulnerasti cor meum; 18. Exultet omnium; 19. Ascendit Deus; 20. Alma redemptoris; 21. Sancta Maria; 22. Levavi oculos meos; 23. Benedictus Deus; 24. Deus canticum novum; 25. Exaudiat te Dominus.

Five motets from this work, Nos. 1, 4, 41, 24 and 25, were included in the Bodenschatz Collection 'Florilegium select. cant.' Lipsiae, 1603, and again in 1618. A motet for four voices, 'Estote fortes in bello,' by 'Fabricius,' is in the 'Theatri musicae selectissimae Orlandi de Lassus,' etc., Lib. 2, 1580, No. 7 (Vogel. *Cat. Wolfenbüttel Herzogl. Bibliothek*).

MSS.—Q.-L. mentions six motets in the Proske Bibl. MS. 775, and one, 'O sacrum convivium' (No. 2 in A. F.'s *Cant. Sac.*), in the Dresden Königl. Bibl. MS. mus. q. 89 a-f. No. 37.

In the Breslau Stadtbibliothek (see Bohn's *Cat.*) the MSS. 15, 18 (dated on cover 1580) and 30 contain 'Haec est dies quam fecit Dominus' for six voices; and fourteen of the motets in A. F.'s *Cant. Sac.*, Nos. 1, 3, 4, 7, 8, 11, 12, 13 (two copies), 14, 15, 16, 23, 24 and 25. 'Non vos relinquam' (No. 4, *Cant. Sac.*) is also in the Zwickau Ratsschulbibl. MS. 53, No. 78 (see Vollhardt's *Cat.*). In the library at Freiberg, Saxony, are 26 motets for 6 voices, Nos. 1-25 the same as those published in A. F.'s *Cant. Sac.* 1595, and placed in the same order: No. 26, 'Quam pulchra es' (Cant. cantic), is also headed 'Albini Fabricii a 6 vocib.' (see Kade's *Altäre Musikalien*).

C. S.

FACCIO, FRANCO (b. Verona, Mar. 8, 1840¹;

¹ Palochi and Riemann. Pugin gives the date as 1841. Various articles in the *Gazzetta musicale di Milano* support either date indifferently.

d. Biffi Sanatorium, Monza, July 23, 1891), conductor and composer. He was born of parents in humble circumstances, who deprived themselves almost of the necessities of life in order to give their son a musical education. In Nov. 1855 he entered the Conservatorio di Milan, where he made remarkable progress in composition under Ronchetti. An overture by him was played at one of the students' concerts in 1860. In the following year he left the institution, and on Nov. 10, 1863, he had the good fortune to have a three-act opera, 'I profughi Fiamminghi,' performed at La Scala. Before this a remarkable work, written in collaboration with his friend BORTO (*q.v.*) and entitled 'Le sorelle d' Italia,' had been performed at the Conservatorio. The same friend, for whom he had formed a warm attachment during the time of their studentship, wrote him the libretto of 'Amleto,' which was given with success at the Teatro Carlo Fenice, Genoa, May 30, 1865 (not at Florence, as Pugin states), but which was unfavourably received at La Scala in Feb. 1871. In 1866 he fought, together with Boito, in the Garibaldian army, and in 1867-68 undertook a tour in Scandinavia. A symphony in F dates from about this time. In July 1868 he succeeded Croff as professor of harmony in the Conservatorio, and after acquiring great experience as a conductor at the Teatro Carcano, was made conductor at La Scala. A Cantata d'inaugurazione was performed in 1884, and two sets of songs by him have been published by Ricordi. Faccio held an important position among the advanced musicians of Italy, and as a composer his works commanded attention by their originality. It was, however, as a conductor that he made his greatest success, and he was rightly considered as the greatest Italian conductor of his time. He directed the first European performance of Verdi's 'Aida' in 1872, and the production of his 'Otello' in 1887, both at Milan. He visited England and conducted the performances of 'Otello' at the Lyceum Theatre in July 1889.

M.

FACHIRI, MME., see ARANYI, Adela.

FACIO, ANSELMO, a 16th-century Augustinian monk of Castro (Giovanni, Sicily, who composed a book of motets (5 v., Messina, 1589²); a book of madrigals (5 v., Messina, 1589); a book of madrigals (6 v., Venice, 1601); 2 songs in collective volumes, and an Ave Maria in MS. (Q.-L.).

FACKELTANZ, or *Marche aux flambeaux*, a torchlight procession—a survival from the mediæval tournaments—which took place at some of the German courts on occasion of the marriage of members of the royal family.³ The music—for military band—is a polonaise, usually with a loud first and last part, and a soft trio. Meyerbeer wrote four—one for the

² Fétis and Eitner were unable to trace this work.

³ *The Times*, Feb. 19, 1878.

marriage of the Princess Royal (the Empress Frederick), (Jan. 25, 1858). Spontini, Flotow, and others, also wrote them. G.

FA FICTUM. In the hexachordal system of Guido d'Arezzo B \flat , the third sound in the *Hexachordum durum*, was called B *Mi*: i.e. *ut* = G, *re* = A, *mi* = B; and B \flat , the fourth sound in the *Hexachordum molle*, B *Fa*: *ut* = F, *re* = G, *mi* = A, *Fa* = B \flat . And because B \flat could not be notated without the accidental sign B *rotundum* (b), it was called *fa fictum*. For this reason the term *Fa fictum* was applied to note B \flat whenever it was introduced into the F mode; and, by analogy, to the E \flat which represented the same degree of the scale in the transposed mode. See **HEXACHORD**; **MUSICA FICTA**. S. T. W.

FAGE, JUSTE ADRIEN LENOIR DE LA (b. Paris, Mar. 30, 1805¹; d. Charenton, Mar. 8, 1862), composer and writer on music, grandson of the celebrated architect Lenoir. After education for the Church and the army, he settled to music as a pupil of Perne for harmony and counterpoint, devoting himself especially to the study of plain-song.

Perne recommended him to Choron, who took him first as pupil and then as répétiteur, or assistant-master. In 1828 he was sent by the government to Rome and studied for a year under Baini. While in Italy he produced a comic opera, 'I creditor,' but comic opera was not to be his road to distinction. On his return to Paris, in Dec. 1829, he was appointed maître de chapelle of St. Étienne du Mont, where he substituted an organ (built by John Abbey) for the harsh out-of-tune serpent hitherto used to accompany the voices. The years 1833-36 he spent in Italy, and lost his wife and son. He returned to Paris, and there published the *Manuel complet de musique vocale et instrumentale* (1836-38), the first chapters of which had been prepared by Choron; *Séméiologie musicale* (1837); *De la chanson considérée sous le rapport musical* (1840); *Miscellanées musicales* (1844); *Histoire générale de la musique* (1844); and many biographical and critical articles collected from periodicals. He again visited Italy after the Revolution of 1848, and during this trip took copies of MSS. never before consulted. He also visited Germany and Spain, and during the Exhibition of 1851 made a short excursion to England. He then settled finally in Paris, and published the works which place him in the first rank of 'musicists'—to use a favourite word of his own—of his time. In 1853 he published three books on ancient music—*Nicolai Capuani presbyteri compendium musicale*; *De la reproduction des livres de plain-chant romain* and *Lettre écrite à l'occasion d'un mémoire pour servir à la restauration du chant romain en France, par l'abbé Céleste Alix*—and in

¹ On the authority of his biographer, Dieudonné Denne-Baron, Fétis gives Mar. 27, 1805; Mar. 28, 1801, was given in the last edition of this Dictionary.

1859 he brought out *De l'unité tonique et de la fixation d'un diapason universel*. Over-work as an author, and as editor-in-chief of *Le Plain-Chant*, a periodical which he founded in 1859, brought on a nervous affection, which ultimately led to his removal to the asylum for the insane at Charenton.

La Fage composed much music of many kinds, both vocal and instrumental, sacred and secular, but it is as an historian and didactic writer that his name lives. His *Cours complet de Plain-chant* (Paris, 1855-56, two vols. 8vo) is a book of the first order, and fully justifies its title. It was succeeded in 1859 by the *Nouveau Traité de Plain-chant romain*, with questions, an indispensable supplement to the former. His *Histoire générale de la musique et de la danse* (Paris, 1844) is incomplete, treating only of Chinese, Indian, Egyptian and Hebrew music, but it is a careful and conscientious work, and has been largely used by Fétis. His learning and method appear conspicuously in his *Extraits du catalogue critique et raisonné d'une petite bibliothèque musicale* (Rennes, undated, 120 pp. 8vo, 100 copies only), and in his *Essais de diphthérogaphie musicale* (Paris, 1864, two vols. 8vo, one containing very curious musical examples). He left a valuable library (the catalogue was published, Paris, 1862, 8vo), afterwards dispersed by auction; but his unpublished works and materials are in the Bibliothèque Nationale, to which he bequeathed all his papers, with the MSS. of Choron and Baini in his possession.

BIBL.—DIEUDONNÉ DENNE-BARON, *Adrien de La Fage* (Paris 1863). G. C.; addns. M. L. P.

FAGGE, ARTHUR (b. Milton, Kent, 1864), conductor, was a chorister under the Rev. Thomas Helmore. He became organist of St. Barnabas, Soho, in 1878; St. Philip's, Battersea, 1885-87; and St. Paul's, Forest Hill, 1887-1901. From 1884-87 Fagge acted as musical director and organist of the Albert Palace, Battersea. He became known to the general public as a choral conductor through the LONDON CHORAL SOCIETY (*q.v.*), which he founded in 1903, having had a good deal of experience as conductor to various South London choral societies, including the Dulwich Philharmonic Society, which he conducted from 1898-1905, and again from 1923. Fagge has also conducted opera for the Carl Rosa and other companies. N. C. C.

FAGO, NICOLA (called IL TARANTINO) (b. Taranto, 1674; d. Naples, 1740), pupil of Alessandro Scarlatti at the Conservatorio dei poveri, Naples, and of Provenzale at the Conservatorio de' Turchini, succeeded the latter as teacher, and counted among his pupils Leonardo Leo and Jomelli. He composed operas, an oratorio, cantatas, masses and other church music (4-10 v.). The MSS. are in various Italian and German libraries; also in the British Museum and

R.C.M. and the Paris Conservatoire (*Riemann; Q.-L.*).

FAGOTGEIGE (BASSOON FIDDLE), a small bass viol with sympathetic strings. (See *VIOLA DI FAGOTTO; VIOLA BASTARDA.*) F. W. G.

FAGOTTO, **FAGOTTINO**, the Italian names for Bassoon and Tenoroon respectively. See **BASSOON**.

FAIGNIENT, **NOË**, a Belgian composer of the 16th century. His first book of *Chansons, Madrigales & Motet à Quatre, Cinq & Six Parties, Nouvellement composees par Noë Faignient, was published at Antwerp in 5 part-books in 1568; Yongo's *Musica Transalpina* (1688) contains 2 madrigals, and 32 other compositions are noted in Eitner's *Bibl. d. Musik-sammelwerke* (*Q.-L.*).*

FAIRCHILD, **BLAIR** (b. Belmont, Massachusetts, U.S.A., June 23, 1877), an American composer. He studied music at Harvard College with Paine and Spalding, later with Buonamici in Florence. In 1901-03 he was in the diplomatic service of the United States. Since 1903 he has lived in Paris. In 1919 he was made chevalier of the Legion of Honour. His compositions include the following:

LIST OF WORKS

STAGE

Dame Libellule, op. 44, ballet-pantomime in 1 act, produced at the Opéra-Comique, 1921.

ORCHESTRA

'East and West,' op. 17, a poem in 1 movement, for orchestra—also for PP, 4-hrds.
Symphonic Poem, 'Zal,' op. 38, after a Persian legend. (1918, Paris.)
Symphonic Poem, 'Shah Feridoun,' op. 39, after a Persian legend.
'Légende,' op. 31, for vin and orch.—also with PP.
'Tannich,' sketch for orch., after a Persian legend.
Étude symphonique, op. 45, for vin. and orch.

CHAMBER MUSIC

Arrangement of Schumann's Adagio and Allegro (op. 76), for v'cl. and orch.
Two Noctettes, op. 10, for string-quartet—also for piano-trio or v'cl and PP.
Three Pieces, op. 11, for v'cl. and PP. or orch.
Three Pieces, op. 12, for clarinet and PP. or orch.
Sonata, op. 16, for vin and PP.
Quintet, op. 20, for PP. and strings.
Rhapsody, op. 21, for PP. and strings.
Trio, op. 24, for PP., vin. and v'cl.
Concerto, op. 26, for vin. and PP.—also for vin. and PP.
Quartet, op. 27, for strings.
Two Duos, op. 32, for vin. and v'cl.
'ix 'Esquisses,' op. 36, for vin. and PP.
Sonata, op. 43, for vin. and PP.
'Mélodie,' for vin. and PP.

VOCAL

Six Psalms, op. 33, for soli and chorus a cappella.
Two 'Bible Lyrics,' op. 29, for soprano, chorus, and orch.
In Memoriam, for chorus a cappella.
Requiem, for tenor and men's voices, with PP. or organ.
Six series of 'Stornelli Toscani,' opp. 5, 14, 23, 28, 30, settings of Tuscan folk-poems.
Twelve Purdian Folk-songs.
'A Baghdad Lover,' op. 25, cycle of nine songs for baritone.
Vireo 'Greek Sea-Prayers,' op. 35.
'Les Amours de Hafiz,' op. 38, seven songs.
'Les Quatrains d'Al-Ghazali,' op. 40, eight songs in French.

R. A.

FAIR MAID OF PERTH, see **JOLIE FILLE DE PERTH, LA.**

FAISST, **IMMANUEL GOTTLÖB FRIEDRICH** (b. Esslingen, Württemberg, Oct. 13, 1823; d. Stuttgart, June 5, 1894), organist and composer.

He was sent to the seminary at Schöthal in 1836, and in 1840 to Tübingen, in order to study theology, but left it for music. In 1844 he went to Berlin and showed his compositions to Mendelssohn, who advised him to work by him-

self rather than attach himself to any teacher.

In 1846 he appeared in public as an organ player in many German towns, and finally took up his abode in Stuttgart. Here in 1847 he founded an organ school and a society for the study of church music. He undertook the direction of several choral societies, and in 1857 took a prominent part in the foundation of the Conservatorium, to the management of which he was appointed two years later. Some time before this the University of Tübingen bestowed upon him the degree of D.Ph., in recognition of the value of his *Beiträge zum Geschichte der Clavier-sonate*, an important contribution to the musical periodical *Cicilia* (1846), and the title of Professor was given him a few years afterwards. In 1865 he was appointed organist of the Stiftskirche, and received a prize for his choral work 'Gesang im Grünen' at the choral festival in Dresden. His setting of Schiller's *Macht des Gesanges* was equally successful in the following year with the Schlesische Sängerbund, and a cantata 'Des Sängers Wiederkehr' has been frequently performed. Several quartets for male voices, and organ pieces, were published collectively, and the Lebert and Stark 'Pianoforteschool' contains a double fugue by him. With the latter he published in 1880 an 'Elementar- und Chorgesangschule,' which has considerable value. He undertook the editing of the great edition of all the pianoforte solo works of Beethoven with Lebert, for the firm of Cotta, for which edition von Bülow edited the sonatas from op. 53 onwards. M.

FA-LA, a common English name for the 'ballets' with refrain sung to these syllables founded on the Italian *BALLETTI* (*q.v.*). See also **GASTOLDI**, **MORLEY**, **SAVILLE**, **WEEKES**.

FALCON, **MARIE CORNELIE** (b. Paris or Monestier near Le Puy, Jan. 28, 1814; d. Feb. 27, 1897), opera singer, received vocal instruction at the Paris Conservatoire from Henri Pellegrini, and Poldogni, and learnt dramatic action from Nourrit; she gained in 1830-31 first prizes for vocalisation and singing.

On July 20, 1832, she made her début at the Opéra as Alice in 'Robert,' with brilliant success. She remained at the Opéra until 1838, when ill-health and loss of voice compelled her to leave for Italy. Her parts included Donna Anna on the production of 'Don Juan,' Mar. 10, 1834; Julie in 'La Vestale' at Nourrit's benefit, May 3, 1834; the heroines in 'Moïse' and 'Siège de Corinthe.' She also created the parts of Mrs. Ankarstroem ('Gustave III.'), Morgiana in Cherubini's 'Ali Baba,' Rachel ('La Juive'), Valentine ('Huguenots'), the last two her best parts, the heroine in Louise Bertin's 'Esmeralda,' and Léonor in Niedermeyer's 'Stradella.'

'Richly endowed by nature, beautiful, possessing a splendid voice, great intelligence, and profound dramatic feeling, she made every year remarkable by her progress and by the development of her talent' (Fétis).

After an absence of two years, and under the impression that her voice was restored, on Mar. 14, 1840, she reappeared at a benefit given on her behalf in the first two acts of 'La Juive,' and in the fourth act of the 'Huguenots.' But her voice had completely gone, and it was with difficulty she could get through the first part—indeed she fainted in the arms of Duprez.¹ After this she retired altogether from the Opéra, where her name still survives to designate dramatic soprano parts. Mme. Falcon afterwards married M. Malançon.

A. C.

FALCONI (FALCONO, FALCONIUS), PLACIDO (b. Asola, c. 1530; d. Monte Cassino after 1600), an important church composer. He entered the Order of St. Benedict at Brescia in 1549. In 1580 he calls himself 'Monacho Cassinensi Euphemiano' (Monte Cassino). A list of his existing works is in *Q.-L.*; others are given by Fétis without stating whether or where he found them.

F. v. d. s.

FALCONIERI, ANDREA (b. Naples, latter part of 16th cent.). In a letter from Florence dated 1615, written to the Duke of Mantua, he offers to send him some female singers and some of his compositions. He wrote a book of 1-3 part 'Villanelle' (accompaniment in guitar tablature, Rome 1616); 2 books of 'Musiche a 1-3 voci' (1619); a book of valuable instrumental pieces (1650). Some of the latter are in a modern edition by Torchi (*Riemann; Q.-L.*).

FALLA, MANUEL DE (b. Cadiz, Nov. 23, 1876), Spanish composer. He received his first instruction from his mother, a talented pianist, with whom he made his first public appearance at an early age, in a performance of Haydn's 'Seven words from the Cross' (arr. for 4 hands), a work still performed in the city for which it was originally composed. The exertions of a local amateur gave him a thorough knowledge of the best chamber music; afterwards at Madrid he studied composition with PEDRELL (*q.v.*) and pianoforte with Tragó, the teachers who may be said to have created the modern Spanish school. Falla won a prize for piano-playing and the prize in an open competition for a national opera, with 'La vida breve' (1905). He lived in Paris from 1907-14, on terms of friendship with Debussy, Dukas and Iavel, and published 'Quatre pièces espagnoles pour le piano' (1909), 'Trois mélodies' to words by Théophile Gautier (1910). 'La vida breve' was first performed at Nice (1913), and afterwards in Paris (Opéra-Comique, 1914). Falla refused the suggestion that he should adopt French nationality as a means to success. On the outbreak of war he returned to Madrid, where 'La vida breve' was performed in 1915, as well as early versions of the ballets 'El sombrero de tres picos' (The Three-cornered Hat, produced in its final form in London, 1919) and 'El amor brujo' (Wedded by Witchcraft).

His three pieces for orchestra and piano, 'Noches en los jardines de España' (Nights in the Gardens of Spain), were finished in 1916 (London, 1921, with the composer at the piano). Falla eventually retired to Granada, where (1922) he organised a festival of CANTE HONDO, the traditional popular song of Southern Spain. His puppet-opera 'El retablo de Maese Pedro' (Master Peter's Puppet-show, an adventure of Don Quixote) was performed in Paris in 1923, at Clifton in 1924, New York and Zürich, 1926. In Southern Spain in 1925, there were concert performances with a chamber orchestra (Orquesta Bética de Cámara) founded by Falla and conducted by HALFFTER.

Falla's music is extremely individual, and is distinguished from that of Granados, Albéniz, Turina and other Spanish composers by its concision, rapid logic and sense of form. Andalus (S.W. Spanish) on his father's side, and Catalan (E. coast) on his mother's, Falla seems to combine the imagination of the Spaniard with the sense of formal perfection of the man of the Mediterranean. To a power of obtaining the subtlest orchestral effects with the simplest means, of seeing where the point is and going straight towards it, is added a power of what Spaniards call *evocación*—a sense of poetry or suggestiveness (not always a Mediterranean quality), something which can be felt rather than explained. It is also present in Debussy's 'La Soirée dans Grenade,' and in some of the pieces in the 'Iberia' of Albéniz; and may be the impression which remains with the hearer when the so-called 'Spanish idiom' has become so familiar as to be no longer noticeable.

In pianoforte writing Falla somewhat resembles Domenico Scarlatti (who spent many years in Spain, and is regarded as the founder of Spanish style in keyboard music). Examples of Falla's treatment of the piano are to be seen in the 'Quatre pièces espagnoles' (especially the last, 'Andaluza'), the 'Fantasia bética,' the piano part of 'Noches en los jardines de España,' and the accompaniments to arrangements of folk-songs, 'Siete canciones populares españolas.' In his 'Concerto' (as in the puppet-opera, 'El retablo de Maese Pedro') the piano is replaced by a harpsichord.

In his works for orchestra Falla shows clearly that he thinks of music in terms of instrumental texture; a melody or a rhythm is not a thing in itself but something individual, belonging to a particular instrument. His mental background is strongly influenced by the dance, by the conflicting rhythms of the castanets and the harmonic peculiarities of the guitar, both treated seriously as serious instruments. How seriously he treats the guitar may be realised from his 'Homenaje' to the memory of Claude Debussy, a work of intense emotion and yet written for guitar solo. Indeed the whole of his music shows that passionate

¹ Clément, *Histoire de Musique* p. 749.

sincerity which is the characteristic of all genuine Spanish art.

OPERAS

La vida breve (Life is Short). 2 acts.
El retablo de Maese Pedro (Master Peter's Puppet-show).

BALLETS

El sombrero de tres picos (The Three-cornered Hat).
El amor brujo (Wedded by Witchcraft).

PF. AND ORCHESTRA

Noches en los jardines de España: (3) Impresiones sinfónicas.

HARPSICORD

Concerto, for harpsichord and small orch.

Homenaje, pour le tombeau de Claude Debussy.

SONGS

3 Mélodies (Théophile Gautier).
Psyche (mezzo-sopr.; fl., harp, vib., vla., v'cl.).
7 canciones populares españolas.

J. B. T.

FALSE RELATION is a term used in the analysis of harmony in two connexions. It denotes (1) the occurrence of a chromatic contradiction between two notes of the same chord, such as is shown between D natural and D sharp in chord (a) of Ex. 1. It also describes (2) a chromatic contradiction of similar character in two adjacent chords, as in Ex. 2.

Anthem—'If ye be risen.'

1. O. GIBBONS.

(a)

'Sed tu, Domine.'

2. W. BYRD

False relations must be both semitonic and chromatic. The semitones which belong to the accepted scale or mode are therefore not capable of a false relation. It is also essential to the definition that the chromatic alteration should take place in another part, and this usually means at another pitch. The *falsity* of the relation is thus derived from the rule, common to most systems of classical harmonic theory, that chromatic changes should be melodic; i.e. developed and resolved within one and the same part. The harshness of progressions such as Ex. 2 above is due to the persistence in the mind of the B flat in the first chord, which is thus part of a general tonal or modal impression which the B natural in the second chord contradicts rather than resolves.

Yet the very acuteness of this conflict of sensations has undoubtedly attracted the deliberate attention of composers. The English madrigal school in particular is notorious for its frank acceptance of false relations of exceptional violence. See Ex. 3.

Songs of sundry natures: 'Penelope that longed.'

2. (a) (b) W. BYRD.

There would seem indeed to be but one consistent qualification to which the technique of that period gave assent in this matter. The parts which were thus falsely related were always, in themselves, melodically coherent. Clashes arose normally through the simultaneous pursuit of two distinct and conflicting melodic idioms. False relations are thus outstanding examples of the evolution of harmonic values from melodic sources. And this derivation is equally clear in the following later examples:

4. St. Matthew Passion. BACH.

5. Quartet (Köchel, No. 465). MOZART.

Symph. No. 3 in F. BRAHMS.

6.

The effectiveness of such devices of expression must always be in inverse proportion to their frequency. When, as in the more extreme harmonic experiments of the 20th century, there ceases to be any precise tonal or modal consistency, the term false relation loses its meaning, for there may be no recognisable relations to which any particular idiom can be deemed to be false. (See HARMONY; CHROMATICISM.)

G. D.

FALSETTO. By falsetto is meant a particular form of sound production at the larynx, sometimes adopted by male singers, and in the majority of cases employed only when it is desired to reach a note above the ordinary range of the individual voice.

By some singers falsetto is habitually adopted, as in singing alto, and in such cases tones of wide range, extending to a compara-

tively low pitch, and of powerful volume, may be produced. But in most instances the tones of this mechanism are high-pitched, of feeble volume, of short duration, and of poor quality.

It has been shown by stroboscopic observations that during the ordinary mechanism of phonation in a man the vocal cords are in absolute contact at one moment during each vibration; at this moment the current of escaping air is shut off. When the air pressure in the trachea rises as the result of this obstruction, the membranous vocal cords are blown apart, while the vocal processes of the arytenoid cartilages remain in apposition. An oval aperture appears between the cords, and some air escapes, thus lowering the intra-tracheal pressure. Rhythmical repetition of the movement interrupts the current of air a certain number of times per second; and a tone of a certain pitch is produced.

When falsetto voice is brought into use, the vocal cords—when viewed with a stroboscope—are seen to be blown apart, whereby a permanent oval orifice is left between the edges; through this aperture a certain volume of air escapes. The arytenoid cartilages are held in firm apposition. Either a short length or the whole of the membranous vocal cords may be separated; the size of the aperture varies, and is found to increase as the pressure of air expelled from the lungs is raised.

In ordinary phonation the vocal cords vibrate as a whole; the vibratory masses appear to be made up of a layer of elastic and fatty tissue, covered superficially by the laryngeal mucous membrane, and supported on the deep surface by the innermost fibres of the thyro-arytenoid muscle.

In falsetto, the extreme membranous edges of the vocal cords appear to be the only parts in vibration; the mass corresponding to the inner part of the thyro-arytenoid muscle remains motionless.

The difference in mechanism between the ordinary—or as it is usually called the chest voice—and falsetto voice appears to depend on the relation between contraction of the thyro-arytenoid and posterior crico-arytenoid muscles.

Some singers feel a sense of muscular relief when they change from chest voice to falsetto; the vocal cords appear to increase in length, possibly because of partial relaxation of the thyro-arytenoid muscle and consequent changes in the elasticity of the margins of the glottis.

Other mechanisms of falsetto have been described, but the explanation given above fits in with practical observation. V. E. N.

FALSTAFF. (1) Opera in 2 acts; words by Maggioni, music by Balfe. Produced Her Majesty's Theatre, July 19, 1838. (2) Opera in 3 acts; libretto by Boito, music by Verdi; produced Scala Theatre, Milan, Feb. 9, 1893;

Covent Garden, May 19, 1894; Buenos Aires, July 19, 1893; New York, Metropolitan Opera House, Feb. 4, 1895. (See MERRY WIVES, AT THE BOAR'S HEAD.) For a 'symphonic study' on 'Falstaff' see ELGAR.

FAMITSIN (FAMINTSIN), ALEXANDER SERGEVICH (b. Kalouga, Oct. 24 (O.S.), 1841; d. St. Petersburg, July 6, 1896), composer.

He was of aristocratic descent, educated in St. Petersburg, and, on leaving the University, spent two years in Leipzig, where he studied theory under Hauptmann, Richter and Moscheles. On his return to Russia he was appointed professor of musical history and aesthetics at the newly opened Conservatoire. He resigned in 1872, in order to devote himself to composition. As a critic he made himself notorious by his attacks upon the new national school of music. Famitsin composed two weak but pretentious operas: 'Sardanapalus,' given in St. Petersburg in 1875, but with so little success that he made no effort to produce his second opera, 'Uriel Acosta.' His instrumental works include three quartets, a pianoforte quintet, and a 'Russian Rhapsody' for violin and orchestra. Two books of 'Songs for Russian Children' have outlived his more ambitious attempts. As a musical antiquary he did his best work in the following publications: *Russian Mimmers and Gleemen* (1889); *The Ancient Indo-Chinese Scale in Europe and Asia, and its appearance in the Russian Folk-Songs* (1890); *The Gusslee: a Russian National Instrument* (1890); and *The Dombra and Kindred Instruments* (1891).

R. N.

FANCELLI, GIUSEPPE (b. 1835; d. Florence, Jan. 22, 1888), Italian tenor.

Fancelli was a valuable member of Mapleson's company at Drury Lane soon after 1870. One of the least-instructed musicians who ever earned distinction on the operatic stage, he had no charm of personality and no gifts as an actor, but his voice was superb in quality and his truth of intonation unflinching. It was his privilege on many occasions to sing Raoul in 'Les Huguenots' to the Valentina of Tietjens. He was heard first in London at Covent Garden—in or about 1867—but he made little mark there, and transferred his services from Frederick Gye to Mapleson. The event of Fancelli's life was his appearance as Rhadames, in company with Madame Stolz and Madame Waldmann, at La Scala in 1872 when 'Aida' was heard for the first time in Italy. He had made his début at La Scala in Sept. 1866. S. H. P.

FANCIULLA DEL WEST, LA, opera in 3 acts, text by C. Zangarini and G. Civini after David Belasco's play. Produced Metropolitan Opera House, New York, Dec. 10, 1910; Covent Garden, May 29, 1911; Costanzi Theatre, Rome, June 1911; in English (Quinlan Opera Co.), Royal Court Theatre, Liverpool, Oct. 1911; Berlin, 1913.

FANCY, FANTASIE, FANTASY (PHANTASY), (1) the English term corresponding to the Italian FANTASIA (*q.v.*), and meaning a piece of music unrestricted by any prearranged formal conditions and independent of words; consequently it belongs to instrumental rather than to vocal music.

It is found in the Mulliner Book (c. 1560),¹ where 'Fansye of Master Newmans' appears as title of a piece for a keyboard instrument. In the VIRGINAL MUSIC (*q.v.*) of the late 16th century the name 'Fancy' (or its Italian equivalent Fantasia²) is given to any piece not in a dance form, or defined by purely musical structures such as variations, the 'Ground,' or a descriptive title. (See IN NOMINE.)

Fancies were composed for every kind of CONSORT (*q.v.*), whole and broken, in the Elizabethan era, and were specially developed in connexion with the consort of viols. Thomas Morley³ speaks of the Fantasie as 'the chiefest kind of music made without a ditty' (*i.e.* without words), and says that 'for them that practise instruments' it is 'in great use.' He also gives it the following description:

'When a musician taketh a point at his pleasure, and wresteth it and turneth it as he list, making either much or little of it according as shall seem best in his own conceit. In this may more art be shown than in any other music, because the composer is tied to nothing, but that he may add, diminish or alter at his pleasure. And this kind will bear any allowances whatsoever tolerable in other music except changing the ayre or leaving the key, which in Fantasie may never be suffered.'

It is not easy to see what Morley meant by these last restrictions beyond the necessity for preserving tonality according to the madrigalian conception which stood half-way between the melodic idea of the modes and the harmonic one of the key system. The importance of his description, however, lies in the evidence it brings that to English musicians at the end of the 16th century the Fancy was music which based its interest solely on thematic development, it was in fact what a later age came to regard as purely symphonic music.

The Fancy for viols continued to hold this place throughout the first half of the 17th century, surviving beyond its vocal counterpart, the madrigal, and developing a characteristic string technique on polyphonic lines. Among its famous composers were BYRD,⁴ Orlando GIBBONS,⁵ John COOPER (Coprario), Martin PEERSON and John JENKINS.

The publication by the last-named in 1660 of 'Twelve Sonatas for two Violins and a Base' (his Fancies remained in manuscript) marks the end of the Fancy's reign. Similarly a little

later (1680) Henry Purcell wrote his youthful Fantasias for strings and followed them with the publication in 1683 of 'Twelve Sonatas of 3 parts,' admittedly⁶ in the Italian manner. Thus the Fancy, which had developed a type without establishing a form, was superseded.

(2) The term, especially in the form 'Phantasy' (Phantasie), was consciously revived in English music in connexion with the Cobbett competitions (see COBBETT), begun under the auspices of the Worshipful Company of Musicians in 1906. These were designed to encourage the composition by the younger group of British composers of short chamber works in a single movement. (See CHAMBER MUSIC.) The first of the prizes offered was won by W. Y. HURSTONE (*q.v.*) with a Phantasy string quartet. Largely as a result of these competitions a fairly wide repertory of works for various combinations of strings, with or without piano, was created, which has proved very acceptable in the concert room. Among the many composers who have contributed successfully to the new Phantasy literature may be named Frank BRIDGE, Thomas DUNHILL, John IRELAND, R. VAUGHAN WILLIAMS (*q.v.*). These compositions have something more than the name in common with the old, for of them it may equally be said that they have developed a type without establishing a form. Morley's description, without his restrictions, might even be applied to them. C.

FANDANGO, a Spanish dance in triple time to a lively tune, accompanied by guitar and castanets, with violin and other instruments *ad lib.* It seems to have been introduced into Spain from South America, and is first mentioned in an anonymous *entremés*, 'El novio de la aldeana' (A village maiden's lover), at the beginning of the 18th century. The original words are a grotesque parody of a serenade. The fandango in 'Figaro' is taken from Gluck's ballet 'Don Juan,' and resembles the Basque form. (It is printed as an appendix to Jahn's *Mozart*.) The Southern Spanish type is different, and has given rise to many modern popular songs and dances (*e.g.* 'Granadinas,' 'Malagueñas,' 'Murcianas,' 'Rondeñas,' etc.) ending on the dominant, to which the accompaniment descends by a semitone, with the cadence a-g-f-e. J. B. T.

FANDANGUILLO, see SONG, subsection SPAIN (4).

FANFARE, a French term of unknown origin—perhaps Moorish, perhaps onomatopoeic—denotes in strictness a short passage for trumpets, such as is performed at coronations and other state ceremonies. (1) In England they are known as 'Flourishes,' and are played by the Trumpeters of His Majesty's Household Cavalry to the number of eight, all playing in unison on

¹ B.M. Add. MSS. 38,513. See Davey's *History of English Music* (ed. 1921), p. 119.

² Used throughout the 'Fitzevilliam Virginal Book,' where other foreign titles such as Toccata and Praeludium are resorted to. In Benjamin Coeyn's Virginal Book pieces with the title 'Fantasia' at the head are called 'Fancy' in the index.

³ *A Pleasure and Basis Introduction to Practical Musike*. 1597.

⁴ See 'Psalms, Songs and Sonnets' (1611), Eng. Mad. Sch. vol. xiv., where two are included among the vocal pieces.

⁵ *Fantasias* . . . edited by E. H. Fellowes.

⁶ See Purcell's preface to these Sonatas, Purcell Society's edition vol. v.

E♭ trumpets without valves. The following, believed to date from the reign of Charles II., is the Flourish regularly used at the opening of Parliament, and was also performed at the announcement of the close of the Crimean War, the visit of Queen Victoria and the Prince of Wales to St. Paul's after the Prince's recovery, and on other occasions :

(2) So picturesque and effective a feature as the Fanfare has not been neglected by opera composers. No one who has heard it can forget the effect of the two flourishes announcing the arrival of the Governor, in 'Fidelio,' both in the opera and in the two earlier overtures. True to the fact, Beethoven has written it in unison (in the opera and the later overture in B♭, in the earlier overture in E♭, with triplets). Other composers, not so conscientious as he, have given them in harmony, sometimes with the addition of horns and trombones. See Spontini's 'Olympie'; Meyerbeer's 'Struensee,' Act 2; Ambrose Thomas's 'Hamlet,' and many more. A good example is that in 'Tannhäuser,' which forms the basis of the march. It is for three Trumpets in B.

Weber has left a short one—'kleiner Tusch'—for twenty Trumpets in C (Jähns's *Verzeichniss*, No. 47 A). (See TUSCH.)

(3) The word is also employed in a general sense for any short prominent passage of the brass, such as that of the Trumpets and Trombones (with the wood wind also) near the end of the fourth movement in Schumann's E♭ Symphony, or of the whole wind band in the opening *Andante* of the Reformation Symphony.

G.

(4) In 1921 a monthly paper called *The Fanfare* was started in London to voice contemporary views on music. A number of prominent composers were invited to write fanfares for publication in the first number. Several of their productions were performed at Eugène Goossens's concerts of contemporary music in Queen's Hall (Oct. 1921). The paper soon died.

C.

FANING, EATON (b. Helston, Cornwall, May 20, 1850), teacher, choral conductor and composer, is the son of a professor of music.

He received his first instruction on the pianoforte and violin from his parents, and performed at local concerts before he was 5 years old. In

Apr. 1870 he entered the R.A.M., where he studied under Sterndale Bennett, Steggall, Ciabatta, Sullivan and others, and carried off several medals as well as the Mendelssohn Scholarship (1873). In 1874 Faning joined the staff of the R.A.M. as sub-professor of harmony, and in 1878 became professor of the pianoforte. On July 18, 1877, Faning's operetta, 'The Two Majors,' was performed at the R.A.M., which event led to the establishment of the Operatic Class at the institution. A comic operetta, 'Mock Turtles,' was produced at the Savoy Theatre in 1881, and another, 'The Head of the Poll,' at the German Reed Entertainment in 1882. At the same date Faning occupied the posts of professor and conductor of the choral class at the National Training School, and professor of the pianoforte at the G.S.M.; the latter post he resigned in July 1885, when he was appointed director of the music at Harrow School. He filled this post with much credit and important musical results until 1901, when he retired. He examined for the Associated Board of the R.A.M. and the R.C.M. in South Africa in 1901. From the opening of the R.C.M. until July 1885 he taught the pianoforte and harmony, and until Easter 1887 also conducted the choral class at that institution. For a good many seasons he conducted a 'Select Choir' at Boosey's Ballad Concerts. Faning was for some time conductor of the London Male Voice Club and of the Madrigal Society. He took the degree of Mus.B. at Cambridge in 1894, and of Mus.D. in 1900. For this last his exercise was a Mass in B minor. His compositions include two operettas, a symphony in C minor, two quartets, an overture, a Magnificat and Nunc Dimittis for full orchestra (performed at St. Paul's at the Festival of the Sons of the Clergy), besides anthems, songs, duets and partsongs, among which the 'Song of the Vikings,' for four-part chorus with pianoforte duet accompaniment, has attained wide popularity. (See *Mus. T.*, 1901, p. 513.)

W. B. S.

FANISKA, opera in 3 acts; words by Sonnleithner; music by Cherubini; producer Kärnthnertheater, Vienna, Feb. 25, 1806.

FANTASIA (Ital.), a piece of instrumental music owning no restriction of formal construction, but the direct product of the composer's impulse. Hence the central development of a movement in classical sonata form, from its freedom of modulation and other procedure, is often referred to as 'free fantasia.'

(1) The Fantasia, after an early history in Continental music more or less parallel with that of the FANCY (q.v.) in England, entered on a new lease of life in the hands of that school of German organists which attained eminence in Buxtehude and surpassed itself in J. S. Bach. The organ with its opportunities for EXTEMPORISATION (q.v.) naturally favoured composition in this style, and the practice arose of

coupling the Fantasia with the Fugue, producing the effect of contrast by the passage from the freest manner of preluding to the strictest form of composition. Bach's Fantasia and Fugue for the organ in G minor, shows the highest use to which the Fantasia of this kind could be put, while his early Fantasia in G major (without Fugue), a piece of brilliant and youthful virtuosity, is more typical of the style inherited from his predecessors. Bach, too, identified the Fantasia with the harpsichord, and that known as the 'Chromatic Fantasia' is his masterpiece in harpsichord music. From Bach the Fantasia as a style (though it could not be called a form) passed by way of his sons, especially Carl Philip Emmanuel, to Mozart, and was thus received into the canon of the German classics. Famous examples in piano music are Mozart's in C minor (Köchel 475), Beethoven's op. 77 and Schumann's op. 17. Beethoven's Choral Fantasia, in which piano, orchestra and voices are joined, is an unique treatment of the style.

(2) The term is also applied to works built on already existing musical themes. Fantasias of this kind include a great mass of ephemeral arrangements such as pot-pourris of airs from popular operas put together for orchestra or military band. They also include arrangements of similar material for the display of the pianist's virtuosity on the piano in the manner promulgated by Liszt in his 'Fantaisies sur des motifs des soirées musicales de Rossini.' The Fantasia of this kind, however, that is the reverie on some pre-existing musical idea, may also be traced from the German organ school which produced Bach. It is found there in the 'Choralfantasia,' a type of composition in which 'the phrases of their loved chorales were introduced boldly with infinite adornment of expressive polyphony.'¹

Vaughan Williams's 'Fantasia on a theme by Tallis' for stringed orchestra may be named as an instance of a similarly serious treatment of the Fantasia in modern music. C.

FANTASIE, see FANCY.

FANTASIESTÜCK, a name adopted by Schumann from Hoffmann to characterise various fancy pieces for pianoforte, alone and with other instruments (PF. solo, op. 12, 111; with clarinet, op. 73; with violin and violoncello, op. 88).

FĀRĀBĪ (AL-), ABU NAṢR MUḤAMMAD (b. Fārāb, Transoxania, 897; d. Damascus, 950 or 966), a philosopher and Ṣūfī, author of a celebrated treatise on the theory of Arab music. He was of Turkish origin, but acquired a thorough knowledge of Greek musical theory, which he preferred to describe rather than the practice of his contemporaries. After studying the works of Plato and Aristotle at Baghdad he moved to Aleppo, where he lived at the

court of Sayfu 'l Dawla. His wants were modest, and he contented himself with a pension of 4 dirhems (about 2s.) a day. His best known musical work, 'Kitāb al-mūsīqī' (MSS. Leyden, Madrid, Milan), was translated by J. P. N. Land (*Actes du 6^me Congrès int. des orientalistes*, Leyden, 1885). His conclusions were adopted 300 years later by ṢAFĪ ED-DĪN (q.v.). Al-Fārābī was also a practical musician and virtuoso performer; dervishes are said still to use chants attributed to him.

J. B. T.

FARAJ (ABU 'L), 'ALĪ AL-ISFAHĀNĪ (b. Isfahan, 897; d. Baghdad or Aleppo, 967), a writer on music and author of the Arabic equivalent of this Dictionary. He was descended from the Umayyad caliphs of Baghdad, and kept in touch with musicians and poets in Spain after members of his family had become rulers in Córdoba. His chief work is 'The Great Book of Songs' (*Kitābu 'l-Aghānī el-kebir* (partly translated by Kosegarten, 1840). Besides a quantity of anecdotes and biographical notices relating to musicians, the book includes a history and anthology of the Arabic poetry which had been set to music down to his own times. It was based on a collection made originally for Hārūn ar-Rashīd (786-809), the favourite caliph of the *Arabian Nights*. The names of the tunes are given with the words; but the music itself was not written down, since Arab musicians had no practical system of notation and were accustomed to memorise the melodies which they learnt from their masters. Examples of his style in musical biography will be found translated in the *Journ. Asiatique* (1873 and 1891), and in *Les Penseurs de l'Islam: La Musique* (iv. pp. 343 ff.), by B. Carra de Vaux, and elsewhere.

J. B. T.

FARANDOLE, a national Provençal dance. No satisfactory derivation has been given of the name. Diez² connects it with the Spanish Farandula, a company of strolling players, which he derives from the German *fahrende*. A still more unlikely derivation has been suggested from the Greek φάλαγξ and δόλος, because the dancers in the Farandole are linked together in a long chain. The dance is very probably of Greek origin, and seems to be a direct descendant of the Cranes' Dance, the invention of which was ascribed to Theseus, who instituted it to celebrate his escape from the Labyrinth. This dance is alluded to at the end of the hymn to Delos of Callimachus: it is still danced in Greece and the islands of the Aegean, and may well have been introduced into the South of France from Marseilles.

The Farandole consists of a long string of young men and women, sometimes as many as a hundred in number, holding one another by the hands, or by ribbons or handkerchiefs. The

¹ Parry, *Johann Sebastian Bach*, p. 182.

² *Etymologisches Wörterbuch der romanischen Sprachen*.

leader is always a bachelor, and he is preceded by one or more musicians playing the *galoubet* and the *tambourin* (see PIPE AND TABOR). With his left hand the leader holds the hand of his partner; in his right he waves a flag, handkerchief or ribbon, which serves as a signal for his followers. As the Farandole proceeds through the streets of the town the string of dancers is constantly recruited by fresh additions. The leader (to quote the poet Mistral)

'makes it come and go, turn backwards and forwards . . . sometimes he forms it into a ring, sometimes winds it in a spiral, then he breaks off from his followers and dances in front, then he joins on again, and makes it pass rapidly under the uplifted arms of the last couple.'¹

The Farandole is usually danced at all the great feasts in the towns of Provence, such as the feast of Corpus Christi, or the 'Coursos de la Tarasquo,' which were founded by King René on Apr. 14, 1474, and take place at Tarascon annually on July 29. In the latter the Farandole is preceded by the huge effigy of a legendary monster—the Tarasque—borne by several men and attended by the gaily dressed 'chevaliers de la Tarasque.' The music of the Farandole is in 6-8 time, with a strongly accentuated rhythm. The following is the traditional 'Farandoulo dei Tarascaire' of Tarascon:

The Farandole has occasionally been used for less innocent purposes than that of a more dance: in 1815 General Ramel was murdered at Toulouse by the infuriated populace, who made use of their national dance to surround and butcher him.

The Farandole has been introduced on the stage in Gounod's 'Mireille' and in Daudet's 'L'Arlésienne' (with Bizet's music), but the dance is not suited for the purposes of a ballet. Further information concerning it will be found in

Larousse's *Dictionnaire*, Vidal's *Lou Tambourin*, Désanat's *Coursos de la Tarasquo*, Mistral's *Mireille*, *Fêtes de la Tarasque*, and introduction to Mathieu's *Le Farandoulo*, and in the works of Hyacinthe Morel. A good description of the dance occurs in Daudet's *Numa Roumestan*. W. B. S.

FARCE (FARSE), from Lat. *farcire*, to stuff. Originally the term denotes an interpolation. Liturgical farsing became common in the 9th century. (See TROPE.) On a more extensive

scale, alien elements were introduced into religious drama, especially to bring in a comic effect. Hence the modern use of the term farce as an extravagant kind of comedy. W. H. F.

FARDING (FARTHING), THOMAS (b. circa 1475; d. circa 1520), mentioned by Morley in his list of authors whose works he either cited or used in his *Plaine and easie Introduction*, was a gentleman of the Chapel Royal whose career can be traced in several warrants for goods delivered to him. For details of these see W. H. Grattan Flood, *Early Tudor Composers*, and *Mus. T.*, Dec. 1, 1920, p. 814.

FARINA, CARLO (b. Mantua, end of 16th cent.). He was engaged about 1625 as violinist at the court at Dresden, where he remained until about 1632. In 1636 and 1637 he was engaged by the Council (Rathsmusik) of Danzig. Nericci says that he returned to Italy. Carlo Farina may be regarded as the first virtuoso on the violin whose importance, not only in the development of the technique of his instrument but also in that of the solo sonata, cannot easily be overrated (see VIOLIN-PLAYING). In the latter he adopted the form employed by Gabrieli while dispensing with the polyphonic treatment. His *Capriccio Stravagante* or 'Kurtzweiliges Quodlibet,' from 'Ander Teil newer Gagliarden,' etc. (1627), although a piece of the most childish programme music,² contains the first specimens of harmonics, staccato, pizzicato, col legno, etc., which more than a hundred years later appeared as legitimate parts of violin technique. Farina wrote 5 books of pavans, galliards, courantes, etc., which were all published at Dresden between 1626 and 1628. E. v. d. s.

FARINELLI, CARLO BROSCHI, DETTO (b. Naples,³ Jan. 24, 1705; d. July 15, 1782), the most famous singer (castrato) of his day. Various reasons have been adduced for Carlo Broschi's adoption of the name Farinelli when he went on the stage. If, however, his uncle had already made the name more or less famous in musical circles, and acceptable in several European courts, the reason seems obvious. Sacchi declares that he saw in Farinelli's possession the letters of nobility which he was required to produce when admitted, by the favour of the King of Spain, into the orders of Calatrava and St. Iago. It seems scarcely credible that noble parents should have consented to the peculiar preparation necessary to make him a soprano; but this, as usual, is explained by the story of an accident having happened to the boy while riding, which rendered necessary the operation by which he retained his treble. The voice, thus manufactured, became the most beautiful ever heard.

He entered the school of Porpora, of whom he was the first and most distinguished pupil.

¹ E. van der Straeten, *The Romance of the Fiddle*.

² According to his own statement made to Dr. Burney, who saw him at Bologna in 1770, though Padre G. Sacchi, his biographer fixes his birthplace at Andria.

³ Anastome Mathieu, *Le Farandoulo*, published with a translation and notes by F. Mistral. Avignon, 1862.

In spite of his explicit statement to Dr. Burney, it is not possible that Farinelli could have made his début at Naples in 1720, at the age of 15, in Metastasio's 'Angelica e Medoro'; for the latter did not leave Rome till 1721, and 'Angelica e Medoro' was not written before 1722 (*Fétis*). In that year Farinelli, already famous in southern Italy under the name of *il ragazzo* (the boy), accompanied Porpora to Rome, and made his first appearance there in 'Eumene,' composed by his master for the Teatro Aliberti. There was a German trumpet player at that time in the capital, who excited the admiration of the Romans by his marvellous powers. For this artist Porpora wrote an obbligato part to a song, in which his pupil vied with the instrument in holding and swelling a note of extraordinary length, purity and volume. Although the virtuoso performed this in a wonderful manner, Farinelli excelled him in the duration, brilliance and gradual crescendo and diminuendo of the note, while he carried the enthusiasm of the audience to the highest pitch by the novelty and spontaneity of the shakes and difficult variations which he introduced into the air. It is probable that these were previously arranged by Porpora, and not due to the impromptu inspiration of the singer. Having remained under the instruction of his master until 1724, Farinelli made his first journey to Vienna in that year. A year later he sang for the first time at Venice in Albinoni's 'Didone abbandonata,' the libretto by Metastasio; and subsequently returned to Naples, where he achieved a triumph in a Dramatic Serenade by Hasse, in which he sang with the celebrated *cantatrice*, Tesi. In 1726 he appeared in Fr. Ciampi's 'Ciro' at Milan; and then made his second visit to Rome. In 1727 he went to Bologna, where he was to meet the famous Bernacchi, the 'King of Singers,' for the first time. Meeting this rival in a grand duo, Farinelli poured forth all the beauties of his voice and style without reserve, and executed a number of most difficult passages, which were rewarded with tumultuous applause. Nothing daunted, Bernacchi replied in the same air, repeating every trill, roulade or cadenza which had been sung by Farinelli. The latter, owning his defeat, entreated his conqueror to give him some instruction, which Bernacchi, with equal generosity, willingly consented to bestow; and thus was perfected the talent of the most remarkable singer, perhaps, who has ever lived.

After a second visit to Vienna in 1728, Farinelli went several times to Venice, Rome, Naples, Piacenza and Parma, meeting and vanquishing such formidable rivals as Nicolini, Faustina and Cuzzoni, and being everywhere loaded with riches and honours. In 1731 he visited Vienna for the third time. It was at this point that he modified his style, from one of mere brilliance

and *bravura*, which, like a true pupil of Porpora, he had hitherto practised, to one of pathos and simplicity. This change is said to have been suggested by the Emperor Charles VI.

Returning once more to Italy, he revisited Venice, Rome, Ferrara, Lucca and Turin. In 1734 he made his first journey to England. Here he arrived at the moment when the opposition to Handel, supported by the nobles, had established a rival Opera, with Porpora for composer, and Senesino for principal singer. The enterprise, however, did not succeed, but made debts to the amount of £19,000. At this juncture Porpora naturally thought of his illustrious pupil, who made his first appearance at the Theatre in Lincoln's Inn Fields, in 'Artaserse,' the music of which was chiefly by Riccardo Broschi, his own brother, and Hasse. The most favourite airs were 'Pallido il sole,' set by Hasse and sung by Senesino; 'Per questo dolce amplesso,' by the same, and 'Son qual nave,' by Broschi, both the latter being sung by Farinelli. He sang also in 'Onorio,' 'Polifemo' and other operas by Porpora; and excited an enthusiastic admiration among the dilettanti, which finally culminated in the famous ejaculation of a lady in one of the boxes (perpetuated by Hogarth in the *Rake's Progress*) -- 'One God and one Farinelli!'

On June 11, 1737, Farinelli set out for Spain, staying a few months in France by the way; where, in spite of the prejudice against foreign singers, he achieved a great success. Louis XV. heard him in the Queen's apartments, and applauded him to an extent which astonished the court (Riccoboni). The King gave him his portrait set in diamonds, and 500 louis d'or. Though the singer, who had made engagements in London, intended only a flying visit to Spain, his fortune kept him there nearly twenty-five years. He arrived in Madrid at a critical moment. Philip V., a prey to melancholy depression, neglected the affairs of the state, and refused even to preside at the council. The Queen arranged a concert in the next room to that which the King occupied, and invited the singer to perform there a few tender and pathetic airs. The success of the plan was complete: Philip, overcome with pleasure, sent for the artist, thanked him with effusion, and bade him name his reward. Farinelli, duly prepared, answered that his best reward would be to see the monarch return to the society of his court and to the cares of the state. Philip consented, allowed himself to be shaved for the first time for many weeks, and owed his cure to the powers of the great singer. The Queen, alive to this, succeeded in persuading the latter to remain at a salary of 50,000 francs, and Farinelli thus separated himself from the world of art for ever. He related to Burney that during ten years, until the death of Philip V., he sang four songs to the King every night without change of any

kind. Two of these were the 'Pallido il sole' and 'Per questo dolce amplesso' of Hasse; and the third, a minuet on which he improvised variations. He thus repeated about 3600 times the same things, and never anything else: he acquired, indeed, enormous power, but the price paid for it was too high. It is not true that Farinelli was appointed prime minister by Philip; this post he never had; but under Ferdinand VI., the successor of Philip, he enjoyed the position of first favourite, superior to that of any minister. Farinelli received the cross of Calatrava (1750), one of the highest orders in Spain. Seeing the effect produced on the King by music, he easily persuaded him to establish an Italian opera at Buen-retiro, to which he invited some of the first artists of Italy. He was also employed frequently in political affairs, was consulted constantly by the minister La Enseñada, and was especially considered as the agent of the ministers of those European courts which were opposed to the family treaty proposed by France. (Bocous.)

While still at Madrid he heard of the death of his former rival, teacher and friend, Bernacchi. In a letter¹ dated Apr. 13, 1756, he speaks with deep regret of the loss of one 'for whom he had always felt esteem and affection,' and concedes with his correspondent, Padre Martini.

Shortly after the ascent of Charles III. to the throne (1759), Farinelli received orders to leave the kingdom, owing probably to Charles's intention to sign the family pact with France and Naples, to which the singer had ever been opposed. He preserved his salary, but on condition that he should live at Bologna and not at Naples. Once more in Italy, after twenty-five years of exile, Farinelli found none of his friends remaining. Some were dead; others had quitted the country. New friends are not easily made after middle age; and Farinelli was now 57 years old. He had wealth, but his grandeur was gone. Yet he was more addicted to talking of his political career than of his triumphs as a singer. He passed the twenty remaining years of his life in a splendid palazzo, a mile from Bologna, contemplating for hours the portraits of Philip V., Elizabeth and Ferdinand, in silence, interrupted only by tears of regret. He received the visits of strangers courteously, and showed pleasure in conversing with them about the Spanish court. He made only one journey during this period, to Rome, where he expatiated to the Pope on the riches and honours he had enjoyed at Madrid. The Holy Father answered, 'Avete fatta tanta fortuna costà, perche vi avete trovato le gioie, che avete perdute in quà.'

When Burney saw him at Bologna in 1771, though he no longer sang, he played on the viola d'amour and harpsichord, and composed for those instruments. He had also a collection of

keyed instruments in which he took great delight, especially a piano made at Florence in 1730, which he called *Rafael d'Urbino*. Next to that, he preferred a harpsichord which had been given to him by the Queen of Spain; this he called *Correggio*, while he named others *Titian*, *Guido*, etc. He had a fine gallery of pictures by Murillo and Ximenes, among which were portraits of his royal patrons, and several of himself, one by his friend Amiconi, representing him with Faustina and Metastasio. The latter was engraved by I. Wagner at London (fol.), and is uncommon; the head of Farinelli was copied from it again by the same engraver, but reversed, in an oval (4to), and the first state of this is rare: it supplied Sir J. Hawkins with the portrait for his *History of Music*. C. Lucy also painted Farinelli: the picture was engraved (fol.) in mezzotint, 1735, by Alex. Van Haecken, and this print is also scarce.

Fétis falls into an error in contradicting the story of Farinelli's suggesting to Padre Martini to write his *History of Music*, on the ground that he only returned to Italy in 1761, four years after the appearance of the first volume, and had no previous relations with the learned author. The letter quoted above shows that he was in correspondence with him certainly as early as April 1756, when he writes in answer to a letter of Martini, and, after adverting to the death of Bernacchi, orders twenty-four copies of his work, bound in red morocco, for presents to the Queen and other notabilities of the court. It is therefore quite possible that their correspondence originated even long before this. They remained in the closest intimacy until death separated them by the decease of Farinelli.

GIAMBATTISTA MANCINI, a great master of singing, speaks of Farinelli's art thus:

'His voice was thought a marvel, because it was so perfect, so powerful, so sonorous and so rich in its extent, both in the high and the low parts of the register, that its equal has never been heard in our times. He was, moreover, endowed with a creative genius which inspired him with embellishments so new and so astonishing that no one was able to imitate them. The art of taking and keeping the breath so softly and easily that no one could perceive it began and died with him. The qualities in which he excelled were the evenness of his voice, the art of swelling its sound, the *portamento*, the union of the registers, a surprising agility, a graceful and pathetic style and a shake as admirable as it was rare. There was no branch of the art which he did not carry to the highest pitch of perfection. . . . The successes which he obtained in his youth did not prevent him from continuing to study; and this great artist applied himself with so much perseverance that he contrived to change in some measure his style and to acquire another and superior method, when his name was already famous and his fortune brilliant.'

FARINELLI (FARINEL), a French musical family whose name, in its Italianised form,

¹ This letter was in the possession of the writer, Julian Marshall.

reached fame through two brothers, violinists, reputed to have been uncles of the great singer who adopted the name of Farinelli.

The family has been traced back as resident in Grenoble¹ to (1) FRANÇOIS FARINEL, originally of Auvergne, who married Anne Chapaty (June 27, 1620), and is described as 'maître joueur d'instruments.' His son (or brother) Robert was the father of the violinists (2 and 3).

(2) MICHEL (*bapt.* Grenoble, May 23, 1649) travelled to Spain and Portugal, was Intendant of Music to the Queen of Spain, and eventually retired to become singing-master to the nuns of Montfleury, near Grenoble. For them he issued a volume of sacred music in 1696. He married Marianne, the daughter of CAMBERT (*q.v.*), the composer. In a register of 1690 he is described as a 'gentleman pensioner of the King of England' and signs 'Michel Farinelly.' His personal reputation as a violinist stood high, but his name survives in history as the composer or arranger of 'Les Folies d'Espagne' (see FOLIA), known as 'Farinel's Ground.'

(3) JEAN BAPTISTE (GIOVANNI BATTISTA) (*b.* Jan. 15, 1655²) was Konzertmeister to the Elector of Hanover about 1680, and according to Chrysander³ was still in that service when the Elector became George I. of England (1714).

Jean Baptiste was ennobled by the King of Denmark, and, according to Hawkins, was appointed by George I. his resident in Venice. He was the composer of concertos for the flute and some stage music. c.

FARINELLI, GIUSEPPE (*b.* Este, May 7, 1769; *d.* Trieste, Dec. 12, 1836), composer.

In 1785 he entered the Conservatorio de' Turchini at Naples, where he studied accompaniment under Fago, and composition under Sala and Tritto. In 1808 he was in Venice, and 1810-17 at Turin. In 1819 he was appointed Kapellmeister at Trieste. He composed an immense number of operas (*Fétis* enumerates 40, and *Riemann* gives the number as 20 serious and 38 comic operas) in avowed imitation of Cimarosa, which, however, were more successful than the majority of imitations. A duet he introduced into the 'Matrimonio segreto' has been mistaken for Cimarosa's own composition. He also wrote Masses, a Stabat in two parts and other church music.

M. C. C.

FARJEON, HARRY (*b.* Hohokus, New Jersey, May 6, 1878). Of English parentage, he came to England in infancy, and studied music, at first privately, with Landon Ronald and Dr. John Storer. In 1895 he entered the R.A.M., where he was a pupil of Battison Haynes and Corder for composition, and of S. Webbe for piano. An opera, 'Floretta,' to a libretto by his sister, Eleanor Farjeon, was produced at the

¹ J. G. Prod'homme, *Les Musiciens dauphinois. Sammelb. Int. Mus. Ges.*, 1905-06, p. 73.
² *Riemann*.

³ *Händel*, I. 418.

Academy in 1899, and he gained various prizes and academic distinctions in the same year. He left the institution in 1901, but returned to it as a teacher of harmony and composition in 1903. Two operettas, 'The Registry Office' and 'A Gentleman of the Road,' were performed at St. George's Hall in 1901 and 1902; and in 1903 the performance at a Promenade Concert of his pianoforte concerto in D minor gave him his first important opportunity. A 'Hans Andersen' suite for small orchestra was played with great success at a Patron's Fund concert of the R.C.M. in 1905, and given at Bournemouth and elsewhere. A string quartet in G was performed by Hans Wessely and his colleagues, and another quartet in B \flat , as well as a violin sonata in F \sharp minor, represent the composer's chamber music. Two song cycles, 'Vagrant Songs' and 'The Lute of Jade,' show skill in writing for the voice, and the composer has achieved much success as a writer of pianoforte pieces. Among these there is a suite called 'Night Music' and many popular pieces. A series of Impression Studies, 'Four Winds,' and a set of Preludes must also be mentioned; three of the latter were introduced by Fanny Davies in May 1908. It is in these smaller forms that Farjeon has more particularly made his mark, but the piano concerto was played twice at Bournemouth in 1919. (See *B.M.S. Ann.*, 1920.) G. S. K. B., with addns.

FARMER, JOHN (fl. 1591-1601), an important madrigalian composer of the Elizabethan period, and also known to us by his skilful settings for four voices of the old church psalm tunes. He was the author of a little treatise entitled:

'Divers and sundry waies of two parts in one, to the number of fourie, upon one playn Song; sometimes placing the ground above and two parts beneath, and otherwhile the ground betwixt and two parts above, or againe, otherwise the ground sometimes in the midst betwixt both, and likewise other Conceites, which are plainlie set downe for the Profit of those which would attaine unto Knowledge. Performed and published by John Farmer in fawoure of such as love Musicke, with the ready way to Perfect Knowledge. Imprinted at London by Thomas Este the Assigne of William Byrd, and are to be sold in Broad Streete neere the Royal Exchange at the Author's house. 1591.'

The only known copy now extant of this tract, which is dedicated to 'Edward de Vere, Earle of Oxenford,' is in the Bodleian Library. It consists of a series of examples of three-part counterpoint in different orders, and seems to have attained considerable success. Hawkins (*Hist.* iii. 373) says, 'Before Bevin's time the precepts for the composition of Canon were known to few. Tallis, Bird, Waterhouse and Farmer were eminently skilled in this more abstruse part of musical practice.'

In 1599 was published:

'The first set of English Madrigals to Foure Voices. Newly composed by John Farmer, practicioner in the art of Musick. 4to. Printed at London in Little Saint Helen's by William Barley, the Assigne of Thomas Morley, and are to be sold at his shoppe in Gracious-streete, Anno Dom. 1599.'

This work also is dedicated to the 'Earle of Oxenford,' whom Farmer calls his 'very good Lord and Master.' In the address to the reader he claims to have 'fitly linkt Musicke

to Number, as each give to other their true effect, which is to make delight, a virtue so singular in the Italians, as under that ensign only they hazard their honour.' The collection consists of seventeen madrigals, sixteen of which are for four, and the seventeenth for eight voices. It is reprinted in *ENGLISH MADRIGAL SCHOOL*, vol. viii.

Farmer's madrigals are of an unpretentious character, but several of them are melodious and attractive. 'Fair Phyllis I saw sitting all alone' is perhaps the best of the set and will always be a favourite. Almost equally good is 'A little pretty bonny lass,' often sung in the past with Oliphant's lamentable alteration of the words beginning 'To take the air.' 'You pretty flowers,' in a sadder vein, is also charming. Farmer's contribution to 'The Triumphes of Oriana' was a 6-part madrigal, 'Fair Nymphs, I heard one telling.' The Library of Christ Church, Oxford, and the Music School contain some MS. music of his, and there are a few of his hymn tunes in MS. at the British Museum.

Farmer was one of the most important contributors to Thomas East's 'Whole Booke of Psalmes,' 1592. (See *EAST*.) He not only set all the canticles, hymns, etc. (twelve in number), which are there prefixed to the Psalms proper, but also five of the psalm tunes themselves. Burney, speaking of these settings (*Hist.* iii. 54), says, 'The counterpoint is constantly simple, of note against note, but in such correct and excellent harmony as manifests the art to have been very successfully cultivated in England at that time.' The following interesting example will show that Farmer was not

Cheshire Tune—Psalm 146.

My God I will

My soul praise thou the Lord al-ways, My God I will

con- fess, While breath and life pro- long my days

My tongue no time shall cease.

unworthy of Burney's encomium. It may be mentioned that in all these settings the melody or 'playnsong' is invariably given to the voice immediately above the bass; generally the tenor, but in this example the counter-tenor, as this tune is set for two trebles, counter-tenor and bass. The rule by which the old writers introduced the major third into the final chord of all compositions in the minor mode (see *TIERCE DE PICARDIE*) is rigidly observed by Farmer and the other contributors to East's collection, not only at the end of each psalm tune, but also at the end of every line in each tune.

Nothing is known as to either the dates or places of Farmer's birth and death; and until recently nothing has been known of his life, except that he was living in London at the date of the publication of his madrigals in 1599. From an inspection, however, of the Chapter Acts of Christ Church Cathedral, Dublin (kindly afforded to the writer by the Dean), it appears that Farmer preceded Thomas Bateson as organist of that Cathedral. The following are the only Chapter Acts which refer to him:

'1595. Feb. 16.—Yt is ordered ye said daie by the Deane and Chapter that Mr. John Ferner shall have as Mr. of the children & organist for this year fifteen pounds Currant money of England from (andelmas daie last (viz.) of the Vicars 10s. and of Mr. Deane 20s. and of every Dignitie 10s. ster. and the rest the Proctor of the Church is to make upp.

'1596. Aug. 10.—The said daie Robert Jordan resigned his Vicars Rowme in the Chapter house, and the same daie John Farmer was sworn Vicar Corral in his place.

'1597. July 18.—It is ordered that if Mr. John Ferner doe not return by the first of August 1597 that then all Excuses sett a-part:—His place to bee voyd in this Church for deptyng the land without lycence.'

Farmer seems to have obeyed this last injunction and to have returned. On leaving Dublin in 1599 he was permitted to appoint a deputy to do his cathedral work, but at the end of that year his vicar choralskip was declared vacant. He was living in Broad Street, London, in 1599.

L. M'C. L. D.; addns. E. H. F.

FARMER, JOHN (*b.* Nottingham, Aug. 16, 1836; *d.* Oxford, July 17, 1901), was eminent as music master of Harrow.

He received his musical education at the Leipzig Conservatorium, and subsequently under Andrae Spaeth at Saxe-Coburg.

He first taught music at Zürich, then was at Harrow School from 1862–85, where he obtained great popularity, and became organist in Balliol College in 1885. Here he instituted in the College Hall a series of Sunday and Monday evening concerts for the performance of glee, part-songs, etc., as well as the Balliol College Musical Society. He edited two volumes of Bach for the use of high schools. For some years before his death he had been examiner for the Society of Arts. In a warmly appreciative article on him in the *Musical Gazette* for

Dec. 1901, his successor at Balliol, Dr. Ernest Walker, wrote :

'He struck out a line for himself, and spent himself royally and with absolute self-sacrifice in the popularisation of good, and only good, music among the naturally more or less unmusical.'

His compositions, of no great intrinsic importance, but directed toward this end, include

'Christ and His Soldiers,' oratorio, 1878 : a 'Requiem in memory of departed Harrow friends,' 'Cinderella,' a fairy opera, 1882; 'Nursery Rhymes Quadrilles,' for chorus and orchestra, four sets; 'Hunting Songs Quadrilles,' for same; songs, etc. He edited 'Hymns and Tunes for High Schools'; the 'Harrow Glee Book,' 'Harrow School Marches,' 'Harrow School Songs,' etc.

A. C.

FARMER, THOMAS, Mus.B. (d. before 1695), was originally one of the Waits of London, and graduated at Cambridge in 1684. He was one of the King's Band of Music (1671-80). He composed instrumental music for the theatre, and contributed some songs to the second edition of Playford's *Choice Ayres*, 1675, to *The Theater of Music*, 1685-87, and to D'Urfey's *Third Collection of Songs*, 1685. In 1686 he published 'A Consort of Musick in four parts, containing thirty-three Lessons, beginning with an Overture,' and in 1690 'A Second Consort of Musick in four parts, containing eleven Lessons, beginning with a Ground.' In *Apollo's Banquet* is 'Mr. Farmer's Magot for violins'; Farmer also wrote music for 'The Princess of Cleve' in 1682 (B.M. Add. MSS. 29,283-5). Purcell composed an elegy, written by Nahum Tate, upon his death (printed in *Orpheus Britannicus*, ii. 35), from which it is certain that he died before 1695.

W. H. H.

FARNABY, (1) GILES (b. circa 1560; d. circa 1600), composer of madrigals and virginal music. Nothing is known of the origin or early life of this composer, and there is no evidence to prove any relationship to Thomas Farnaby the philologist or the Cornish Farnabys. The statement that he was a native of Truro was first made by Anthony Wood (*Fasti*, ed. Bliss, i. 257). He married Katherine Roane at St. Helen's, Bishopsgate, on Mar. 28, 1587, and the churchwardens' accounts show that he was living in that parish in 1589. On July 7, 1592, he graduated Mus.B. at Oxford. One of his sons was baptized at St. Mary-le-Bow in 1598. His set of 'Canzonets to Fowre Voyces' (ENG. MADR. SCH. vol. xx.) was published in 1598, and as he was not a contributor to 'The Triumphes of Oriana' in 1601 it seems reasonable to suppose that he died about the year 1600. He was a contributor in 1592 to East's 'Whole Booke of Psalmes,' and some of his tunes were also included in Ravenscroft's *Psalter* in 1621.

There are twenty canzonets for four voices in Farnaby's set, and to these was added one for eight voices; this is one of the rare examples of an eight-part madrigal in the English school; it ends with a very fine cadence. In his canzonets Farnaby showed a very distinct individuality of style. 'Construe my meaning'

is remarkable for the originality of the chromatic harmonies. Another feature is the complexity of the rhythmic texture; and sometimes he seems to have sacrificed smoothness and clearness for the sake of ingenuity of imitative device. He also deliberately disregarded the conventional laws of composition, and not infrequently wrote consecutive fifths and other 'forbidden' progressions. But many of these canzonets are found by practical experience to be very pleasant to sing.

The set was dedicated to Ferdinando Heaburn, groom of Her Majesty's privy chamber, and commendatory verses were inserted by Anthony Holborne, John Dowland, Richard Allison and Hubert Holland. A madrigal by Farnaby, 'Come, Charon,' is in manuscript at the R.C.M. The altus part of a 5-part setting of 'O my son Absalom' is in B.M. Add. MSS. 29,427. As a writer for the virginals Farnaby takes very high rank, and his work is only second to that of Byrd at this period. More than fifty of his virginal pieces were included in the 'Fitzwilliam Virginal Book' (see VIRGINAL MUSIC). Among these is a composition for two virginals and an arrangement of his canzonet 'Daphne on the rainbow riding.' Some other of these pieces have the appearance of being adaptations of canzonets, though no more are in his printed set. Charming examples of Farnaby's work in the Fitzwilliam book are 'Quodling's Delight' and 'Rosa Solis.'

(2) RICHARD, composer of virginal music, son of Giles Farnaby, being so described in connexion with his virginal piece 'Nobodies Gigge' in the Fitzwilliam book. Only four of his pieces were included in that collection, and no others are known.

E. H. F.

FARNAM, W. Lynnwood (b. Sutton, Quebec, Jan. 13, 1885), received his musical education at the R.C.M., where he held a scholarship (1900-04), and returning to Canada made a reputation as an organist in Montreal. From 1913-18 he was at Emmanuel Church, Boston, and thence moved to New York, where he became organist of the Church of the Holy Communion. He is a solo player of exceptional ability, and has made a conspicuous reputation as a recitalist.

FARRANT, JOHN, of Salisbury (fl. c. 1600), composer of church music. It is likely that Hawkins was right in supposing that there were two musicians named John Farrant who were working in the latter years of the 16th century, but the available evidence is insufficient to enable any definite conclusion to be reached on the point. One of this name was certainly organist of Salisbury Cathedral, 1598-1602, and it seems unlikely that he is to be identified with the John Farrant who was organist of Christ Church, Newgate, and was described by Adrian Batten (Tenbury MS. 791 fo. 310) as 'Mr. John Farrant of Christ Church in London,' for

Batten's MS. was written c. 1638, and Farrant's cathedral appointments would almost certainly have been mentioned at that date rather than this minor one, unless it were to distinguish this composer from John of Salisbury. There was a John Farrant organist of Ely, 1567-72; and again of Hereford, 1592-93, when he was 'sconced for railing and contumelious speeches to Mr. Custos in the hall at supper-time' (Havergal's *Fasti Herefordienses*).

John Farrant of Salisbury was the composer of the service in D minor described in the Durham books as 'Mr. Farrant's short service in D sol re'; in the Peterhouse books it is variously called his 'second' or 'short' service, and it is attributed to John Farrant of Salisbury; there is an early text of it also at York Minster and Wimborne. Besides the morning and evening canticles this service includes the Venite and, a very unusual feature at that date, the Jubilate in place of the Benedictus.

The anthem 'O Lord Almighty' (B.M. Harl. MS. 7340) is probably by this composer.

E. H. F.

FARRANT, JOHN (of Christ Church, Newgate) (fl. c. 1600), composer of church music. Adrian Batten's organ-book (Tenbury MS. 791) contains a Magnificat and Nunc Dimittis for verses in G minor. It is ascribed by Batten to 'Mr John Farrant of Christ Church in London.' The Magnificat opens with verse for '2 meanes and 2 counters,' and is an entirely different work from Richard Farrant's A minor service, so commonly misnamed 'Farrant in G minor.'

E. H. F.

FARRANT, (1) RICHARD (d. Nov. 30, 1580), composer of church music, etc. In the reign of Edward VI. he was a gentleman of the Chapel Royal, but the record of his appointment has perished. In Apr. 1564 he resigned his office in the chapel and became master of the choristers at St. George's chapel, Windsor, and also a lay-clerk and organist. On Nov. 5, 1569, he was reappointed to the Chapel Royal, continuing his work at Windsor until his death.

He is best known by his cathedral service in A minor and by two beautiful little anthems, 'Call to remembrance' and 'Hide not thou Thy face.' The anthem 'Lord, for thy tender mercies' sake,' was in the 18th and 19th centuries commonly ascribed to Farrant, although all the early MSS. agree in giving Hilton as the composer. It is difficult to discover how Farrant's name first became associated with it. There seems little reason to doubt that the elder of the two John Hiltons composed this anthem. Batten's organ book (Tenbury MS. 791) contains the anthem 'When as we sate in Babilon,' by Richard Farrant, but none of the voice parts has been discovered. Farrant's A minor service is variously styled his 'high' or 'short' or 'old'

service; all early authorities, including those of Durham, York and Peterhouse MSS., give it in A minor, but the Wimborne MSS., which are of somewhat late date, have it in G minor and describe it as 'Mr. Farants of Winsor in G.' There is no room for any doubt that this service is by Richard and not John Farrant. Boyce printed it in G minor, and his text has some curious errors, notably in the verse of the Benedictus, 'that we being delivered.' This passage in Boyce's text has proved a stumbling-block to many cathedral singers who have not questioned its correctness. The morning canticles of this service fall much below the level of the Magnificat and Nunc Dimittis, which are of great beauty. At Durham Cathedral there is an organ score and a single bass part of a Magnificat and Nunc Dimittis in F 'with verses to the organ' (Durh. MSS. A 6, C 18). There is no means of determining which of the Farrants wrote this, the ascription being simply 'Mr. Farrant.' The 'short' D minor service is certainly by John Farrant of Salisbury; this service was wrongly published in the 19th century under the name of Richard Farrant. Two keyboard pieces entitled 'Voluntarye' and 'Felix namque' are in the B.M. (Add. MS. 30,513).

As master of the Windsor choristers Farrant, like Edwards and Hunnis of the Chapel Royal, controlled one of the important companies of choir-boy actors. This subject is dealt with at some length by G. E. P. Arkwright.¹ From 1567 until his death Farrant was responsible for presenting a play before the Queen every year. Only two of his stage songs can now be identified with any certainty; one begins 'O Love from stately throne,' which Arkwright suggests may be out of 'Xerxes,' a play presented by Farrant in 1575. The other song is 'Alas, ye salt sea gods,' from a play called 'Panthea and Abradatas'; Arkwright expresses no hesitation in ascribing this play to Farrant, following the Ch. Ch. MS., although the B.M. MS. assigns it to Robert Parsons. Both these songs are for treble solo with string quartet accompaniment.

(2) DANIEL, a son of Richard, was a viol-player and one of the King's musicians c. 1606-1625. A book of organ pieces by him is among the manuscripts at Durham Cathedral. He is said to have been one of the first to set 'lessons' for the viol in 'the lyra way' after the manner of those for the lute and bandora. E. H. F.

FARRAR, ERNEST BRISTOW (b. Blackheath, July 7, 1885; killed in action, France, Sept. 18, 1918), was an English composer of promise, some of whose works have secured posthumous recognition through publication by the Carnegie Trust.

The son of the Rev. C. W. Farrar of Mickle-

¹ See *Proc. Mus. Ass.*, 1913-14, p. 117, 'Elizabethan Chorboy Plays and their Music.'

field, near Leeds, Farrar was educated at the Leeds Grammar School and obtained (1905) an open scholarship at the R.C.M. There he studied under Stanford and Parratt and won the Arthur Sullivan prize (1906) and the Grove scholarship (1907). He was at Dresden for a time as organist of the English church, and afterwards held organistships at South Shields and Harrogate. His suite for orchestra 'English Pastoral Impressions' (three numbers) and three choral songs, 'Out of doors,' have been published by the Carnegie Trust. Other published works include a setting for solo, chorus and orchestra of 'The Blessed Damozel,' preludes for the organ, piano pieces and songs (for list see *B.M.S. Ann.*, 1920).

C.

FARRENC, (1) JACQUES HIPPOLYTE ARISTIDE (b. Marseilles, Apr. 9, 1794; d. Paris, Jan. 31, 1865). He was 2nd flautist in the orchestra of the Théâtre Italien (1815) and a pupil of Guillon and Vogt at the Paris Conservatoire (flute and bassoon). He was a music publisher until about 1841, and a music teacher. He composed some pieces for the flute, but is best known as a writer on music.

He took an important part in the second edition of Fétis's *Biographie universelle*, and wrote the biographical notices in the 'Trésor des pianistes' (1861-72), collected and published by himself, which his wife continued after his death. He also contributed critiques to *La France musicale* and *La Revue de Musique ancienne et moderne* (Rennes, 1858). Some of his valuable notes and unpublished articles are among the MSS. in the library of the Paris Conservatoire.

His wife (2) LOUISE (b. Paris, May 31, 1804; d. there, Sept. 15, 1875) was a sister of the sculptor Auguste Dumont, and aunt of Ernest REYER (q.v.). She studied under Reicha, and at an early age composed both for the orchestra and piano, and had the advantage of advice from Hummel and Moscheles for the pianoforte. She married in 1821, and made several professional tours in France with her husband, both performing in public with great success. Madame Farrenc's ability as a teacher is shown by the many excellent pupils she trained during the thirty years she was professor of the piano at the Conservatoire (Nov. 1842-Jan. 1873). Besides some remarkable études, sonatas and pieces for the pianoforte which Schumann noticed, she composed sonatas for piano and violin or violoncello, trios, two quintets, a sextet and a nonet, for which works she obtained in 1869 the prize of the Académie des Beaux Arts for chamber music. She also wrote two symphonies and three overtures for full orchestra, and several of her more important compositions were performed at the Conservatoire concerts. More than by all these, however, her name will be perpetuated by the 'TRÉSOR DES

PIANISTES' (q.v.), an anthology of music containing chefs-d'œuvre of the classical masters of the harpsichord and pianoforte from the 16th century down to Weber and Chopin, as well as more modern works of the highest value. Her *Traité des abréviations* was published in 1897.

(3) Her daughter, VICTORINE LOUISE (b. Paris, Feb. 23, 1826; d. there, Jan. 3, 1859), was a successful pianist. G. C.; addns. M. L. P.

FARWELL, ARTHUR (b. St. Paul, Minnesota, U.S.A., Apr. 23, 1872), an American composer. He studied with Norris in Boston, Humperdinck in Berlin and Guilmant in Paris. In 1901 he established the *Wa Wan Press* for the publication of American music, especially of that founded on the native Indian themes. He has made various investigations of the music of the American Indians and several of his compositions are based on Indian themes. R. A.

FASCH, (1) JOHANN FRIEDRICH (b. Buttstedt, Weimar, Apr. 15, 1688; d. Zerbst, Dec. 5, 1758), was a chorister at Weissenfels in 1699, a scholar of the Thomasschule in Leipzig from 1701-07, where he studied law as well as music, the latter under Kuhnau.

He founded a 'Collegium musicum,' which seems to have been the ancestor of the 'Grosse Concert' and so of the Gewandhaus concerts; he wrote overtures for the society in the style of Telemann, and composed three operas for the Naumburg fair and elsewhere. In 1714, after leading a wandering life for some years, he was an official secretary at Gera, and in 1719 went to Zeitz as organist and 'Rathschreiber,' where he remained for two years. In 1721 he took service with Count Morzin (see HAYDN, Franz Joseph) at Lucaveč in Bohemia, and in 1722 was appointed court Kapellmeister at Zerbst. He was invited to compete for the post of cantor at the Thomasschule against Bach, but apparently refused to do so.¹ Bach held Fasch's music in high esteem, and copied out five orchestral suites of his. In the collection of music left by C. P. E. Bach was a whole set of church cantatas by Fasch. Several masses, a Requiem, eleven church cantatas and motets, one Passion-setting, various overtures, trios, sonatas, etc., are preserved in MS. at Leipzig, Dresden, Berlin and Brussels. (See *Q.-L.*; *Riemann.*) Fasch's son,

(2) CARL FRIEDRICH CHRISTIAN (b. Zerbst, Nov. 18, 1736; d. Berlin, Aug. 3, 1800), composer, accompanist to Frederick the Great and founder of the Berlin Singakademie, was a delicate child and much indulged.

He made rapid progress on the violin and clavier, and in the rudiments of harmony. After a short stay at Cöthen, where he made his first attempts at composition in church music, he was sent to Strelitz. Here he continued his studies under Hertel, in all branches of music,

¹ Spitta, *J. S. Bach* (Engl. transl.), II. 181.

but especially in accompaniment from the figured bass. In 1751 Linicke, the court clavierist, having declined to accompany Franz Benda, Fasch offered to supply his place at the harpsichord, and Benda's praises incited him to still greater efforts. After his return to Zerbst he was sent to complete his education at Klosterbergen, near Magdeburg. Benda had not forgotten their meeting, and in 1756, when just 20, Fasch was appointed on his recommendation accompanist to Frederick the Great. His coadjutor was C. P. E. Bach; they took it in turns to accompany the King's flute concertos, and as soon as Fasch had become accustomed to the royal amateur's impetuous style of execution, his accompaniments gave every satisfaction. The Seven Years' War put an end to Frederick's flute-playing, and as Fasch received his salary (300 thalers) in paper, worth only a fifth part of its nominal value—a misfortune in which he anticipated Beethoven—he was compelled to maintain himself by giving lessons. For his lessons in composition he made a collection of several thousand examples. About the same time he wrote several most ingenious canons, particularly one for twenty-five voices containing five canons put together, one being in seven parts, one in six, and three in four parts. After the battle of Torgau the King granted him an addition of 100 thalers to his salary, but the increase covered the direction of the opera, which was put into his hands from 1774–76. After the war of the Bavarian succession Frederick gave up his practice, and Fasch was free to follow his natural inclination for church music. In 1783, incited by a 16-part Mass of Benevoli's which Reichardt had brought from Italy, he wrote one for the same number of voices, which, however, proved too difficult for the court singers. He retained his post after Frederick's death, but occupied himself chiefly with composition and teaching. In the summer of 1790, as he himself tells us, he began choral meetings in the summerhouse of Geheimrath Milow, which resulted in the famous Singakademie. (See BERLIN.)

Before his death Fasch was twice visited by Beethoven (1796), who on June 21 extemporised on a theme from Fasch's Psalm cxix., and again on the 28th reappeared and extemporised, to the delight of Fasch's scholars.¹ The Academy at that date was about ninety strong, but at the time of Fasch's death it had increased to 147. In accordance with a wish expressed in his will, the Academy performed Mozart's Requiem to his memory—for the first time in Berlin. The receipts amounted to 1200 thalers, an extraordinary sum in those days, and were applied to founding a Fund for the perpetual maintenance of a poor family. In 1801 Zelter published his *Life*—a brochure of sixty-two pages 4to, with a portrait. In 1839

the Academy published Fasch's best sacred works in six volumes. A seventh, issued by the representatives of Zelter, contains the Mass and the canon above alluded to. Of his oratorio 'Giuseppe riconosciuto,' performed in 1774, one terzetto alone remains, Fasch having destroyed the rest, together with several other works composed before the 16-part Mass. (For list of extant works, see *Q.-L.*) F. G.

FASOLO, GIOVANNI BATTISTA (*b.* Asti). In 1645 he was a Franciscan monk, and in 1659 became maestro di cappella to the Archbishop of Monreale, Palermo. He composed a book of cantatas and ariettas (1627); a book of songs and guitar pieces (1628); a book of 'Arie spirituali'; sacred and secular songs in collective volumes; and an important collection of organ pieces (1645), a number of which have been republished in F. Riegel's 'Praxis organoedi in ecclesia' (Brixen, 1869); also four in Ritter's 'Geschichte des Orgelspiels,' Nos. 18–21. E. v. d. s.

FATTORINI, GABRIELE (*b.* Faenza, second half of 16th cent.), was maestro di cappella at S. Maria delle Carceri (? Venice) about 1600. He composed 'Sacri concerti a 2 voci' (Venice, 1600; further enlarged editions in 1602, 1604, 1608, 1615); a 2nd book of motets, 8 v. (1601); 2 books of madrigals (1598 and 1604); some songs in collective volumes and in MS. (*Q.-L.*).

FAUGUES (FAUQUES, FAGUS, LA FAGE), GUILLAUME (15th cent.), mentioned by Tinctoris as an immediate successor of Dufay, Binchois, etc., and contemporary of Obrecht, Regis and others. Several masses, etc., belonging to the latter part of the 15th century are enumerated in *Q.-L.* One Mass, 'L'homme armé' (MS. in Papal Chapel), bears the name of 'Vincent Faugues,' whether erroneously or referring to another composer is undecided so far. In a copy in the archives of St. Peter's, Rome, this Mass is attributed to Caron. E. v. d. s.

FAURÉ, GABRIEL URBAIN (*b.* Pamiers, Ariège, May 13, 1845; *d.* Paris, Nov. 4, 1924), was distinguished as a leading French composer and teacher. He studied at Paris with Niedermeyer, the founder of the École de Musique Religieuse; also under Dietsch and Saint-Saëns.

His first appointment on leaving the school in 1866 was that of organist at St. Sauveur, Rennes; in 1870 he returned to Paris, and after holding the posts of accompanying organist at St. Sulpice and principal organist at St. Honoré, became maître de chapelle at the Madeleine, where he became organist in 1896. In the same year he was appointed a professor of composition in the Conservatoire. In 1892 he had succeeded Guiraud as Inspecteur des Beaux-Arts, and in June 1905 he became director of the Conservatoire in succession to Dubois. This latter post he retained until his resignation in

¹ See Vol. I. p. 272; also Thayer's *Beethoven*, II. 13.

1920, and here his great work as a teacher was accomplished. Its importance may be measured by the fact that he was the master of Louis Aubert, Nadia Boulanger, Roger Ducasse, Enesco, Grovlez, Raoul Laparra, Maurice Ravel and Florent Schmitt.

He became known as a composer by his touching and original songs, of which a selection of twenty was published by Hamelle, and 'Le Poème d'amour' by Durand and Schoenewerk, but his compositions in this class are very numerous. Among the most remarkable of his later lyrics may be mentioned 'Après un rêve,' 'En Prière' and 'Les Roses d'Ispahan.' He also published many pianoforte pieces; at the Société Nationale de Musique he produced a 'Cantique de Racine,' duets for female voices, and a violin sonata, afterwards played at the Trocadéro, on July 5, 1878, which last became popular in Germany. Among the most remarkable works of his earlier years are a Berceuse and Romance for violin and orchestra, a beautiful Elégie for violoncello, two quartets for piano and strings (1882 and 1887), two for strings alone, a violin concerto, an orchestral suite (Salle Herz, Feb. 13, 1874), a 'Chœur des Djinnis' (Trocadéro, June 27, 1878), a symphony in D minor (Châtelet, March 15, 1885), a Requiem (Madeleine, Jan. 16, 1888) and a choral work, 'La Naissance de Vénus' (Colonne Concerts, 1895, Leeds Festival, 1898).

To a later period belong 'Madrigal,' op. 35, for vocal quartet and orchestra; 'Pavane,' op. 50, for orchestra and chorus *ad lib.*; five Mélodies, op. 58, to Verlaine's poems; a piano quintet, op. 60; 'La Bonne Chanson,' op. 61; nine songs to Verlaine's words. Music to various plays had been written from time to time, such as that to Dumas's *Caligula* (Odéon, 1888), Ed. Haraucourt's *Shylock* (adapted from Shakespeare, Odéon, 1889), Maeterlinck's *Pelléas et Mélisande* (English version produced at the Prince of Wales's Theatre, June 21, 1898), and Lorrain and Hérold's *Prométhée* (Béziers, 1900).

Next to his songs it is on his concerted chamber music that his reputation mainly rests. To the works already mentioned in this class must be added a second sonata for violin and PF., two sonatas for violoncello, a trio (PF., violin and violoncello), a quartet for strings published posthumously and two quintets for PF. and strings. These are reckoned among the highest things of their class. A 'Fantaisie' for PF. and orchestra and numerous solo pieces for the piano must also be named. For the voice he published several further collections: 'La Chanson d'Ève,' 'Le Jardin clos,' 'Mirages,' 'Horizons chimériques'; for the lyric stage, 'Pénélope,' which was given for the first time at Monte Carlo, Mar. 4, 1913.

As a composer Fauré constantly progressed with a suppleness of style and an easy mastery

of technique which often disguised the almost revolutionary boldness of his harmonies. His acceptance by the general public came slowly even in France. Elected to the Académie des Beaux-Arts in 1909, he was promoted to the highest class in the order of the Légion d'Honneur, a national homage paid to him through the Sorbonne in 1922 (see *PLATE XXI.*)

BIRL.—OCTAVE SÉRÉ, *Musiciens français d'aujourd'hui*, 6th ed., 1915, contains an excellent bibliography up to 1910. There are useful studies in A. COCTEAU, *La Musique française moderne*, 1922; R. VILLERMOZ, *Musiques d'aujourd'hui*, 1923; Journal of I.M.G., 1905-6 (J. Tiernot); *Revue musicale*, 1922. Obituary notices in *L'Orgue et les organistes*, Nov. 15, 1924 (J. Huré); *Courrier musical*, same date (L. Aubert); *Monde musical*, same date (A. Mungont); *Mus. T.*, Dec. (M. D. Calvocoressi); *The Chesterian*, Dec. 1924 (Florent Schmitt).

FAURE, JEAN-BAPTISTE (b. Moulins, Jan. 15, 1830; d. Paris, Nov. 9, 1914), famous baritone, was the son of a singer in the cathedral at Moulins.¹

When he was 3 the family removed to Paris, and when he was 7 his father died. In 1843 he entered the solfeggio class in the Conservatoire, and soon after the *maîtrise* of the Madeleine, where he was under Trévaux, an excellent teacher, to whom he owed his sound knowledge of music. After the breaking of his voice he took up the piano and double bass, and was for some time a member of the band at the Odéon theatre. When his voice had recovered he joined the chorus of the Théâtre Italien; in Nov. 1850 again entering the Conservatoire, obtained (1852) first prizes for singing and for opéra-comique. He made his début Oct. 20, 1852, at the Opéra-Comique, in Massé's 'Galathée,' after which he advanced steadily through various rôles until his creation of the parts of Justin in Grisar's 'Chion du jardinier'; the Duke of Greenwich in Auber's 'Jenny Bell' in 1855; the Marquis d'Hérigny in Auber's 'Manon Lescaut'; the Marquis de Valbreuse in Clapisson's 'Sylphe' in 1856; Crèvecoeur in Gevaert's 'Quentin Durward' in 1858; Hoël in Meyerbeer's 'Pardon du Ploermel' in 1859 placed him in the front rank.

On Sept. 28, 1861, he made his first appearance at the Opéra as Julien de Medicis in Poniatowski's 'Pierre de Medicis,' and remained there as principal baritone for nearly seventeen years. His new parts were in Massé's 'La Mule de Pedro' in 1863; Nelusko in 'L'Africaine,' Apr. 26, 1865, chosen for this part by Meyerbeer himself; the Marquis de Posa in Verdi's 'Don Carlos' in 1867; the title part in Thomas's 'Hamlet,' 1868; Mephistopheles on the first performance of 'Faust' at the Opéra, Mar. 3, 1869; Paddock in Diaz's 'Coupe du Roi de Thulé,' and Charles VII. in Mermet's 'Jeanne d'Arc' in 1876. He made his final appearance there on May 13, 1876, in his great part Hamlet, in which his acting was founded

¹ Allier.

² First produced at Baden-Baden. Faure achieved a notable *tour de force* therein, singing baritone on the stage and tenor behind the scenes.

³ He had previously played this part in London, during four seasons, 1863-66.

on his boyish recollections of Macready¹ in that part in Paris.

In London he first appeared at Covent Garden, Apr. 10, 1860, as Hoël, and returned there every season until 1866, excepting 1865. His parts included Don Juan, Figaro in 'Le Nozze,' Tell, Assur, Fernando in 'La Gazza Ladra,' Alfonso XI., Pietro in 'Masaniello,' Rudolph in 'Sonnambula,' St. Bris, Peter the Great, and, on July 2, 1863, Mephistopheles on production of 'Faust,' in which he has never been surpassed.

In 1870 he played, at Drury Lane, Iago in the revival of Rossini's 'Otello'; Lotario on the production in England of 'Mignon,' etc. From 1871-75 inclusive he was again at Covent Garden, for the first time there as Hamlet, Caspar, and the Cacique on the production of Gomez's 'Guarany.' In 1876 he sang at Drury Lane; and in 1877 at Her Majesty's for the first time in England as De Nevers, and Alfonso in 'Lucrezia,' which part he played, May 19, 1877, on the occasion of the last appearance on the stage of Thérèse Tietjens. From 1857-60 he taught singing at the Paris Conservatoire. In 1870-72 he sang with great success in opera at Brussels, and on Jan. 27, 1872, was appointed inspector of the singing classes at the Conservatoire there.² In 1861 he appeared at Berlin at Meyerbeer's request, but the tremolo in his voice did not please the Germans. In 1878, however, he sang in Italian at Vienna with the greatest success in two of his best parts, Don Juan and Mephistopheles, and was appointed by the Emperor of Austria 'Imperial Chamber Singer.' In 1859 he married Mademoiselle Lefebvre (1828-1905), the chief actress of Dugazon rôles at the Opéra-Comique. He published two books of songs (Heugel) and *La Voix et le chant, traité pratique* (1886); *Aux Jeunes Chanteurs* (1898).

(2) His son, Maurice (b. May 11, 1862; d. Feb. 7, 1915), was a landscape painter.

FAUST. (1) Opera in 5 acts; words, after Goethe, by Barbier and Carré, music by Gounod; produced Théâtre Lyrique, Paris, Mar. 19, 1859; Her Majesty's Theatre, June 11, 1863 (selections had previously been sung at Canterbury Music Hall, Westminster); in Italian, Covent Garden, July 2, 1863; in English (Chorley), Her Majesty's, Jan. 23, 1864; New York, Academy of Music, Nov. 26, 1868. In Germany known as 'Margarethe.'

(2) Opera in 2 acts, words by Bernhard, in no respect connected with Goethe, music by Spohr; produced Frankfurt, Mar. 1818; in German, Prince's Theatre, May 21, 1840; in Italian, Spohr conducting, Covent Garden, July 15, 1852.

(3) Boito's version of 'Faust' is entitled 'MEFISTOFELE' (q.v.).

¹ Musical World.

² Inardon's *Théâtre de la Monnaie*.

(4) LA DAMNATION DE FAUST of Berlioz, though not an opera, has been put on the stage (Monte Carlo, Feb. 18, 1903; New York, Metropolitan Opera House, Dec. 7, 1906). It is entitled 'dramatic legend in four parts'; the words partly adapted from Goethe (translated by Gérard de Nerval) and partly written by M. Gandonnière and Berlioz himself; produced (concert form) Opéra-Comique, Dec. 6, 1846; 2 parts, under Berlioz, Drury Lane, Feb. 7, 1848, and selections, New Philharmonic, June 9, 1852 (Chorley's translation). Produced complete, under Hallé, Manchester, Feb. 5, 1880; New York, Feb. 12, 1880.

(5) DOKTOR FAUST, opera by Busoni, produced Dresden, May 21, 1925. The text is Busoni's own version of the legend and has no connexion with Goethe. The final scene, left unfinished, was composed by P. Jarnach.

For other 'Faust' music, incidental music, overtures, symphonic poems, etc., see under LASSEN, LINDBAINTNER, LISZT, PIERSON, RADZIWILL, SCHUMANN and WAGNER.

FAUSTINA BORDONI, see HASSE (1).

FAUXBOURDON (O. Fr. *faulxbourdon*; Mid. Eng. *faburden*; Ital. *falsobordone*), a system of vocal harmony which, in its simplest form, is nothing more or less than a chain of first inversions, beginning and ending with a chord in root position consisting of bass, fifth and octave.

The history of Fauxbourdon in the earlier centuries, before 1500, is of some interest, for (1) it provides the earliest form of harmonised music which is at all tolerable to the ordinary modern hearer; (2) it is supposed to be of English origin, though this statement has hitherto been disputed by some; (3) examples of the old English Fauxbourdon (or Faburden, as Shakespeare spelt it) have been discovered since the last edition of this Dictionary was published; (4) it is used by composers of the first classical epoch, e.g. by DUFAY (q.v.), c. 1400-74; (5) the name is applied, though in an altered sense, to a type of music which has been revived in the English Church and elsewhere during the last ten or fifteen years, for which see the later part of DESCANT.

This is not the place in which to enter into a long discussion as to the controversy about the English or French origin of this style of harmony, with that of GYMEL (q.v.—the two questions are practically one), but it will not be amiss shortly to indicate the points at issue. Witnesses from early times are subpoenaed in support of the English practice: Giraldus Cambrensis (c. 1400); Guilielmus Monachus, writing about the same time at Venice, though probably an Englishman; Leonel Power and Simon Tunstede and Chilton (or Cutell) half a century later; Walter de ODINGTON (q.v.) and an Anonymus of the British Museum, usually distinguished as 'Anonymus IV.'

from his position in vol. i. of Coussemaker's *Scriptores*, about 1300. Contra, it is alleged, e.g. by Wooldridge (*Oxf. Hist. Mus.* vol. i.), that the quotations before 1400 are of doubtful relevancy, and that the practice, if it was existing in England in 1400, had been borrowed from the Continent. In support of his view he points out the non-existence of actual evidence, and brings forward the French derivation of the word 'Faburden.' On the Continent, however, Combarieu, Riemann and Wolf seem quite certain that Fauxbourdon is of English origin, and the evidence that has recently come to light at Worcester¹ bears out their contention. A specimen is quoted here, together with a short extract from a British Museum MS. (Sloane 1210) which comes probably from Lincolnshire.

About 1300.

XIVth Century.

British Museum, MS. Sloane, 1210.

For the origin of the term *faulx* (false), it has been customary to bring out a picturesque story of uncertain origin, to the effect that the singers, as a reply to one of the frequent charges made by high ecclesiastics against too much complication and overlaying of the plain-chant in Divine Service (namely the pronouncement of John XXII. in 1322), devised a

¹ See *Laudate*, Sept. 1923, and *Proceedings of the Musical Association* for 1924-25.

method of writing which looked like an old orthodox Organum, i.e. a succession of common chords in root-position, and then turned it, in singing, into a first inversion by transposing the written bass an octave upwards at sight. What is more probable is that the French singers, seeing a form of harmony in which the melody, instead of being in the bass, as always hitherto, was in the treble, described the bourdon or bass as false, because it did not carry the authentic chant. For this carrying of the melody in the highest part was, in fact, the most radical of the differences between Fauxbourdon and the other styles of harmony then in vogue. In free compositions other than those founded on a plainsong theme, however, in which the fauxbourdon style of harmony was used, the melody and text remained in the lowest or tenor voice, cf. examples 1 and 2 above.

The developments of the form as found in the theoretical work of Guilielmus Monachus, written at Venice somewhere about 1400, need not detain us here. His 'treatise' is printed in the third volume of Coussemaker's *Scriptores*, and his examples are reproduced, with one exception, in *Oxf. Hist. Mus.* vol. ii. The most interesting of his new ideas is that which brings in a fourth voice, or *contratenor bassus*, below the tenor, the appearance of which is strongly reminiscent of the simple orchestral bass-viol style known from its tonic-dominant motif as 'spectacles.' In default of any other competitor, the Guilielmus Monachus Fauxbourdon is the earliest appearance of a bass as distinct from a tenor. Unfortunately, his descriptions of the *modi Anglicorum* bear little close relation to the theory or practice of the periods preceding and following, so far as these are known at present; and the MS. is not an author's treatise at all, but a student's notebook, the accuracy of which we must always treat with reserve.

Of far greater importance is the treatment of Fauxbourdon by Dufay and the Flemish masters; it will best be demonstrated by the following extract from a Magnificat in the sixth tone by Dufay.

3. Trent MS. 92 (No. 1373).

Dufay was a member of the Papal Chapel, and from his time onwards *Falsobordoni* (as they came to be called in Italy) formed part of the repertory of the Sistine Choir. But the term has from now on a changed meaning; it has come to denote a setting of Psalms or Canticles in homophonic style with polyphonic cadences, following the plainsong with more or less strictness; sometimes retaining the Mode of the original melody alone, without any of the melodic contour. And the plain-song, where remaining, is usually in the tenor, with a bass below it, so that by a curious turn of history's wheel the name which once denoted 'melody in the highest part' now means 'melody in the tenor.'

A. H.

FAVART, (1) CHARLES SIMON (b. Paris, Nov. 13, 1710; d. Belleville, Paris, May 18, 1792), author of French comedy, was the son of a pastry-cook, and made his début at the Opéra-Comique with 'Les Deux Jumelles' in 1734, producing 'La Chercheuse d'esprit' in 1741. He was *régisseur* (not director) of Monnet's Theatre, and after its suppression in 1745 was called by the Maréchal de Saxe to direct the Brussels theatre and to give performances to the armies in Flanders, 1745. After the Opéra-Comique reopened in 1752, Favart gave, until 1779, at that theatre, at the Comédie-italienne and at the court 100 pieces, parodies, etc., often in collaboration with his wife (2), with Fagan, Panard, Laujon and especially the Abbé Voisenon. He succeeded (1757) Monnet with Corby and others. He was in correspondence (1759-70) with the Count Durazzo, *intendant* of the Imperial Theatre at Vienna. The latter charged him with the task of engraving the score of the Italian version of Gluck's 'Orfeo' (1764). After 1759 he supplied to Gluck the libretto of 'Cythère assiégée,' produced, but without success, at the Opéra, 1775. Favart's other principal musical collaborators are Ciampi ('Ninette à la cour,' 1755), Duni ('La Fée Urgèle,' 1765), 'Les Moissonneurs,' 1765), Philidor ('Le Jardinier supposé,' 1769), Blaise ('Annette et Lubin,' 1762, 'La Rosière de Salency,' 1789), Grétry ('L'Amitié à l'épreuve,' 1771).

Favart helped to modify the style of opéra-comique. Voltaire wrote to him (Oct. 3, 1775):

'Vous embellissez tout ce que vous touchez. C'est vous qui le premier formâtes un spectacle régulier et ingénieux d'un théâtre qui, avant vous, n'était pas fait pour la bonne compagnie. Il est devenu, grâce à vos soins, le charme de tous les honnêtes gens.'

Favart, contrary to the opinion of Petit de

Julleville (*Histoire de la langue et de la littérature française*, vi. p. 632), was not a partisan of 'ariettes' (new airs), but he had to follow the taste of about 1760, without ceasing altogether to preserve the 'vaudevilles' (known airs) in his works.

The Italian comedians accorded Favart a pension of 800 livres in 1769, then of 1400 after the death of his wife. The name of 'Salle Favart' has remained at the Opéra-Comique, built in 1780, burnt both in 1838 and 1887, and rebuilt in 1840 and 1897.

(2) MARIE-JUSTINE-BENOISTE DURONCERAY (called Mlle. CHANTILLY) (b. Avignon, Vaucluse, June 15, 1727; d. Paris, Apr. 21, 1772), daughter of André René Cabaret du Ronceray and Perrette Claudine Bied, musicians of the chapel of the King of Poland. She was a French dancer and singer. She appeared in 1744 at the Opéra-Comique as 'première danseuse du Roi de Pologne.' After the suppression of this theatre she married Charles Simon Favart, Dec. 18, 1745, and went with him to Flanders. She went to the Comédie-italienne (May 3, 1751), and appeared for twenty-one years in the majority of the pieces produced at that theatre. She played the rôles of soubrettes, lovers, peasants, simple parts and character parts. She was the first to give local colour to the parts in her costumes, and her example was followed at the Comédie-française. She obtained her greatest success in 'La serva padrona' (Pergolesi) in 1754, in 'Bastien et Bastienne,' a parody of Rousseau's 'Devin du village' (1753, in collaboration with Harny), 'Annette et Lubin' (1762, the true authors of which were Favart and Lourdet de Santerre), and in her husband's works (see above).

In contrast to Collé and Grimm, who are very severe on her, Mme. Favart was judged very favourably by all her contemporaries as

'une actrice sans rivale, qui des moindres rôles savait faire une création charmante . . . au point d'exciter par ses succès la jalousie de Voltaire, qui reprochait aisément à ce peuple de se passionner pour une actrice de la Comédie-italienne.' (Ad. Jullien.)

Two portraits of Mme. Favart by Vanloo represent her in peasant dress (Bastienne and Annette); also a little monument which the 'Abbé' Voisenon and Lourdet de Santerre had sculptured by Coysevox (Louvre), with the inscription

'Grâces, tendre Amitié, Talens, Favart n'est plus.'

(3) CHARLES NICOLAS JOSEPH JUSTIN (b. Paris c. 1748; d. Belleville, Paris, Feb. 2, 1806), son of the above, was a vaudeville actor. He first appeared at the Comédie-italienne, Sept. 2, 1779, where he remained until 1796.

(4) ARMAND PAUL (b. Paris, June 8, 1770; d. in the French provinces, date unknown), was 'sous-inspecteur de la salle' at the Opéra (1816), employment which he lost for 'motifs graves,'

1825. He was still living in 1848. Marandet supposes that he was the grandfather of the celebrated actress Pierrette Pingaud (called Marie Favart) (b. Beaune, Feb. 16, 1833; d. Paris, Nov. 11, 1908). She entered the Théâtre Français 1848, and retired in 1880.

(5) ANTOINE PIERRE CHARLES (b. Paris, Oct. 6, 1780; d. Mar. 23, 1867), son of Justin (3), painter, writer and diplomat, published with Dumolard the *Memoirs* of his grandfather. He wrote several vaudeville pieces (1808–10), notably 'La Jeunesse de Favart' with Gentil. He was a pupil of the painter Suvée. J. G. P.

MARANDAT, *Manuscrits inédits de la famille Favart*, 1922 (from the new acquisitions of the Bibliothèque Historique de la Ville de Paris).

FAVORITE, LA, opera in 4 acts; words by Royer and Waëtz, music by Donizetti; produced Académie Royale, Dec. 2, 1840; in Italian, Her Majesty's, Feb. 16, 1847; New York, Park Theatre, Oct. 4, 1848.

FAWCETT, (1) JOHN (b. Wennington, Lancs, Dec. 8, 1789; d. Bolton, Oct. 26, 1867), was originally a shoemaker, but abandoned that calling to follow the profession of music, at Bolton-le-Moors.

He composed three sets of psalm and hymn tunes, published at various periods under the titles of *The Voice of Devotion*, *The Harp of Zion*, *The Cherub Lute* and *Miriam's Timbrel* (1862), which became very popular in Lancashire. In 1840 he edited and arranged the accompaniments to a collection of psalm and hymn tunes and other pieces selected by Joseph Hart, the music publisher, entitled 'Melodia Divina.' An oratorio of his composition, called 'Paradise,' was published in 1853. His third son,

(2) JOHN, Mus.B. (b. circa 1824; d. Manchester, July 1, 1857), when only 11 years old obtained the appointment of organist at St. John's Church, Farnworth.

Seven years later he succeeded an elder brother as organist of the parish church, Bolton. In 1845, leaving a sister to discharge his duties at Bolton, he came to London and entered the R.A.M., where he studied under Sterndale Bennett. During his stay in London (about twelve months) he officiated as organist of Curzon Chapel. On Nov. 4, 1852, he was admitted

to the degree of Bachelor of Music at Oxford, his exercise, a cantata entitled 'Supplication and Thanksgiving,' performed on the previous day, being highly commended by the Professor of Music, Sir H. R. Bishop. W. H. H.

FAY, see DUFAY.

FAYA, DON AURELIO LA (d. before 1579), priest and maestro di cappella at Lanciano, Naples, wrote 2 books of madrigals (a 5; 1564 and 1579).

FAYDIT, GAUCELM (b. Uzerche, Limousin, c. 1150), a troubadour who followed Richard Cœur de Lion to the Holy Land. Fétis says that about 50 of his songs still exist, 11 with the melodies. Either only knows one which has been republished (Q.-L.).

FAYOLLE, FRANÇOIS JOSEPH MARIE (b. Paris, Aug. 15, 1774; d. Ste. Perrine, a house of refuge, Paris, Dec. 2, 1852), was a writer on music.

After a brilliant career at the Collège de Juilly, he entered the Corps des Ponts et Chaussées in 1792, and became 'chef de brigade' of the École Polytechnique on its foundation in 1794. Here, under the instruction of Prony, Lagrange and Monge, he studied the higher mathematics, but without neglecting literature, and with Fontane's assistance translated a great part of the *Aeneid*. Of his verses the following line has alone survived:

'Le temps n'épargne pas ce qu'on a fait sans lui.'

Though forgotten as a mathematician and a poet, Fayolle has acquired a solid reputation for his services to musical literature. He studied harmony under Perne, and the violoncello under Barni, but abstained from printing his compositions; and contented himself with publishing *Les quatre saisons du Parnasse* (Paris, 1805–09), a literary collection in 16 vols. 12mo, for which he wrote many articles on music and musicians. He also furnished the greater part of the biographical notices in the *Dictionnaire historique des musiciens*, etc., published under the names of CHORON (q.v.) and himself (2 vols. Paris, 1810–11); and a compilation of Gerber's *Dictionary*. In 1813 he published *Sur les drames lyriques et leur exécution*. He collected materials for a history of the violin, of which, however, only fragments appeared, under the title *Notices sur Corelli, Tartini, Gaviniès, Pugnani, et Viotti, extraites d'une histoire du violon* (Paris, 1810). After the fall of Napoleon, Fayolle came to England, where he taught French, and wrote for the *Harmonicon*. On the eve of the Revolution of 1830 he returned to Paris, and resumed his old occupation as a musical critic. Among his later works may be mentioned a pamphlet called *Paganini et Bériot* (Paris, 1830), and the articles on musicians in the supplement to Michaud's *Biographie universelle*. G. C.

. FAYRFAX, ROBERT, Mus.D. (d. Oct. 24,

1521), is believed to have been descended from the ancient Yorkshire family of that name. He is said to have been of Bayford in Hertfordshire, and was probably born in the last half of the 15th century. Anthony Wood is no doubt correct in saying that he was organist or 'informator chori' at the Abbey of St. Albans, with which place he was evidently closely connected. He was at St. Albans, Mar. 28, 1502, when he received 20s. from Queen Elizabeth of York, 'for setting an Anthem of oure lady and Saint Elizabeth.' At the beginning of this year (1501-02) he took his degree of Doctor of Music at Cambridge. The words of the Grace for the degree,

'conceditur Magistro Fayerfax erudito in musica quod post gradum bacallariatus sua erudicione possit stare,' etc.

may imply that he was already a member of the University; they certainly show that he had made his reputation as a musician at that date.¹ The exercise 'for his forme in proceedinge to bee Doctor' was a 5-part Mass, 'O quam glorifica,' which is still in existence (Lambeth, Cod. 1). He was incorporated at Oxford in 1511, being the first recorded Doctor of Music there.

Fayrfax seems to have enjoyed the favour of Henry VIII., after whose accession he was granted an annuity of £9 : 2 : 6 (June 22, 1509), being described as 'gentleman of the Chapel.' At Christmas, 1510, and the two following years, he was paid for the board and instruction of two choir-boys, 'the King's scholars.' On Mar. 6, 1512/13, John Frysher, gentleman of the Chapel, received a Corrody in the Monastery of Stanley, on its surrender by Robert Fayrfax. In Nov. 1513, Fayrfax resigned his annuity of £9 : 2 : 6, which was granted afresh 'in survivorship' to Robert Fayrfax and Robert Bythesee. On Sept. 10, 1514, he was appointed one of the Poor Knights of Windsor, with 12d. a day. Other entries in the State Papers between 1516 and 1519 relate to sums paid to Fayrfax 'for a book' (£13 : 6 : 8); 'for a book of anthems' (£20); 'for a pricke songe book' (£20); 'for a balet boke limned' (£20); showing that he found employment as a writer and illuminator of MSS.: the celebrated Fayrfax MS. (B.M. Add. MSS. 5465) may well have been one of these.² In 1520 Fayrfax, with the rest of the Chapel, attended the King to the Field of Cloth of Gold, being named at the head of the singing men. His death took place on Oct. 24, 1521, and letters of administration were granted to his wife in the following November. A brass, now disappeared, in St. Albans, to himself and his wife Agnes, is figured in the *Home Counties Magazine*, on the St. Albans Brasses, p. 161. He was buried in St. Albans Abbey, his tombstone being afterwards covered by the Mayor's seat, according to the Fayrfax MS.

¹ Abdy Williams, *Degrees in Music*.
² See *D.N.B.* for reference to State Papers.

Fayrfax was in his day (as Anthony Wood says) 'in great renowne and accounted the prime musitian of the nation.' He is the chief representative of the school of music which prevailed in England from the time of Edward IV., and which may be said to have culminated in him. His music was soon superseded by that of the succeeding generation of composers headed by Tye, and is now for the most part of purely antiquarian interest.³

The following is a list of his chief compositions, mostly in MS.:

Masses \mathfrak{a} 5 : (1) 'Regalla'; (2) 'Albanus'; (3) 'Tecum principium'; (4) 'O bone Jhesu'; all in the Oxford Music School Collection and elsewhere. (5) 'O quam glorifica,' Lambeth and Cambridge. (6) 'Sponsus amat sponsam,' lute arrangement in Brit. Mus. Add. MS. 29,246. An unnamed Mass at Peterhouse, Cambridge, may be identical with one of these.

Motets: (1) 'Ave Dei Patria,' \mathfrak{a} 5 : Bodleian, etc. (2) 'Maria plena virtute,' \mathfrak{a} 5 : Bodleian, etc. (3) 'Salve Regina,' \mathfrak{a} 5 : Eton MS. (4) 'Lauda vivi Alpha et O,' Peterhouse, etc. (5) 'Eternae laudis illium,' \mathfrak{a} 5 : Peterhouse, etc. (6) 'O Maria Deo Grata,' Peterhouse, (7) 'Ave lumen gratiae,' \mathfrak{a} 4 : Brit. Mus. Add. MS. 6054. (8) 'In Deo,' R. Coll. Music. 'Ave summe eternitatis,' printed by Hawkins (*Hist.* ii. 516), is an extract from No. (1) 'Ave Dei Patria.' (9) 'Dona nobis'; (10) 'Et exultavit,' 'In Deo,' 'Salsari mo,' 'Et in secula'; (11) 'Et in unum Deum'; (12) 'Et resurrexit'; (13) 'Gratias agimus'; (14) 'O gloriosissima'; (15) 'O Maria Deo Grata,' in the Library, St. Michael's College, Tenbury (354-8). (16) 'Ave summe eternitatis,' Commonplace Book of John Baldwin.

A Magnificat \mathfrak{a} 5, called 'Regalla,' is at Peterhouse, and (without composer's name) at Lambeth; a second Magnificat is at Lambeth. Magnificats at Calus Coll. and St. Michael's Coll., Tenbury, may be identical with one or other of these. In the Eton MS. were formerly 'Quid cantemus Innocentes,' 'Stabat Mater,' 'Ave lumen gratiae,' and 'Ave cunus conceptio.' Late versions of three of the above-named compositions are in Brit. Mus. Add. MS. 29,246. An instrumental piece \mathfrak{a} 3, apparently a canon, is in Add. MS. 31,922.

Two songs by Fayrfax were printed in Wynkyn de Worde's *Song-book*, 1539: 'O ut reit fa sol la,' \mathfrak{a} 4, and 'My heartes lust,' \mathfrak{a} 3. A fragment of a song, 'Welcome fortune,' is preserved at Ely Cathedral. In the Fayrfax MS. Brit. Mus. Add. MS. 5465, are (1) 'That was my woo,' \mathfrak{a} 2; (2) 'Most clere of colour,' \mathfrak{a} 3; (3) 'I love, loved and loved wolde I be,' \mathfrak{a} 3; (4) 'Alas for iak of her presence,' \mathfrak{a} 3; (5) 'Sumwhat nuyring,' \mathfrak{a} 3. The title-page also indicates two other songs as being by Fayrfax, though his name is not written against them. (6) 'Benedicite, what dremyd I,' \mathfrak{a} 3; (7) 'To complayne me, alas,' \mathfrak{a} 3.

Burney printed 'That was my woo,' which he thought (for no good reason) may have been addressed to Henry VII. after the battle of Bosworth (*Hist.* ii. 547); also extracts from some of the masses. The songs numbered 2, 3, 4, 5 and 7 were printed by Stafford Smith in *A Collection of English Songs*. No. 3 is also printed by the Plain-song and Mediaeval Music Society in *Songs and Madrigals of the 15th Century*. G. E. P. A.; addns. J. M^a.

FAZZINI, GIOVANNI BATTISTA, a contralto in the Papal Chapel, 1775-99, temporary maestro di cappella at S. Cecilia, S. Marguerita, S. Apollinari, Trastevere. He composed masses and other church music (Q.-L.).

FEBURE, JEAN LE, Kapellmeister of the Cardinal Andreas of Austria at Constance, 1596-1600; Kapellmeister at Mayence Cathedral, 1600-07. He composed a book of madrigals; also motets, hymns and other church music (Q.-L.).

FEDELI, RUGGIERO (d. Cassels, 1722), was composer to the court at Berlin in 1691; court Kapellmeister in 1701. He went in 1705 to Cassels as court Kapellmeister. He composed the funeral music for Queen Sophia Charlotte in

³ Nevertheless there has been recently a partial revival of Fayrfax's music as part of the repertory of St. Albans Abbey choir. A notable commemoration of him was held in the Abbey in Nov. 1921, and the Albanus Mass (English translation) has been sung at the Eucharist. (See *The Times*, Nov. 2, 1921.)

. 1705; also two operas ('Almira,' given at Brunswick, 1703; Pastoral opera MS. Schwerin), cantatas, masses and other church music.

E. v. d. s.

FEDERICI, VINCENZO (b. Pesaro, 1764; J. Milan, Sept. 20, 1827), was accompanist at the Italian opera in London c. 1790-93, where he produced 4 of his own operas. He wrote in all 14 serious and one comic opera; also cantatas. In 1808 he was teacher of harmony at Milan Conservatoire, where he succeeded Asioli as censor in 1814 (Q.-L.).

FEDORA, opera in 4 acts, words by L. Colautti (after Sardou); music by Giordano; produced 1898; Covent Garden, Nov. 5, 1906; New York, Metropolitan Opera House, Dec. 16, 1906.

FEEN, DIE, opera in 3 acts: words and music by Wagner. Written at Würzburg in 1833 (the plot adapted from Gozzi's 'Donna Serpente'), excerpts tried in the following year, but never performed complete until it was produced at Munich in 1888.

FEINBERG, SAMUEL EVGENIEVICH (b. Odessa, May 26, 1890), Russian pianist and composer, student of the Moscow Conservatoire until 1911, and a disciple of Scriabin and Miaskovsky. His sixth pianoforte sonata was played at the International Festival for Contemporary Music, Venice, Sept. 1925. His works, many of which are still in MS., include:

6 PF. sonatas (opp. 1, 2, 3, 6, 10, 13); 2 PF. fantasies (opp. 5, 9); piano pieces (opp. 8, 11, 15); songs (opp. 4 and 7) (The Russian State Musical Publishing Dept.).

R. N.

FEIS CEOIL, Irish Musical Festival. Founded in 1897 with the following objects: (a) to promote the study and cultivation of Irish music; (b) to promote the general cultivation of music in Ireland; (c) to hold an annual festival or Feis Ceoil consisting of prize competitions and concerts similar to that held in Dublin in May 1897; (d) to collect and preserve by publication the old airs of Ireland. The Feis Ceoil has firmly established itself in the musical life of the country. The founders and first Executive Committee were:

Walter Bapty, W. H. Vipond Barry, Henry Bast, George Coffey, James C. Culwick, W. O'L. Curtis, Melfort D'Alton, Miss Pauline Elmer, Miss Alex Elmer, Miss Madeline Gordon, A. P. Graves, Mrs. Harte, T. R. G. Jozé, Charles Kelly, Surg.-Gen. King, J. O. Lindsay, Mrs. J. O. Lindsay, Owen Lloyd, P. J. McCall, John McGrath, George M'Sweeney, J. J. M'Sweeney, W. R. Molloy, Sir Christopher Nixon, The O'Donoghue, D. J. O'Donoghue, William P. O'Neill, Miss Edith Oldham, Dr. Annie Patterson, Miss Caroline Percival, Count Plunkett, Countess Plunkett, Madame Jeanie Rosse, Brendan Rogers, T. O'Neill Russell, Mrs. Scott-Pfennell, Joseph Seymour, George Sigerson, Joseph Smith.

The first hon. secretaries were Miss Edith Oldham and Joseph Seymour.

With the exception of the years 1898 and 1900 (when the festival was held in Belfast) the Competitions have been held in Dublin.

In the early years concerts were given, at which prize cantatas and orchestral works

were performed; latterly the large number of entries received for the various competitions have prevented any concerts (except that of the prize winners) being included in the events of the week. In 1897 the total number of entries was 417 and in 1924, 949. The entries for solo competition very much predominate, and it is to be regretted that the choral competitions (which are such an important feature of English competition festivals) are in Dublin very poorly supported, either by choirs or audience. In the earlier years the Feis Ceoil owed much to the liberality of the late Edward Martyn and W. P. Geoghegan, whose generous aid enabled the Association to continue its work when there were deficits on the yearly festivals. Happily in later years there has been a profit, even though small, and a legacy of £100 from Miss Frances Geoghegan was the foundation of a small capital sum now in the possession of the Association. In 1924 the Feis Ceoil was able to offer prizes for Civilian Bands at the Tailltean Games, to give a donation to the Irish Folk-Song Society of London, and to finance a movement for the provision of a concert hall in Dublin.

C. W. W.

FEL, (1) MARIE (b. Bordeaux, Oct. 24, 1713; d. Chaillot, Paris, Feb. 2, 1794), was a French singer, the daughter of Henry Fel, organist, and of Marie Devacle. She came to Paris, 1733, and worked with Mme. Van Loo (Christine Somis), and made her début at the Opéra, Oct. 29, 1734, and at the Concert Spirituel, Nov. 1. Marie Fel had to retire owing to bad health in 1758. She had sung about 120 parts at the Opéra, where she was first entrusted with a principal part in 1739. Her best-known interpretations were with Jélyotte, 'Le Devin du village,' by J. J. Rousseau (1753), and 'Daphnis et Alcimadure,' by Mondonville, a *Pastorale*, sung in Langue d'Oc (1755) (see JÉLYOTTE). Her contemporaries have lauded in verse and prose her 'voix de rossignol,' and Collé himself, who criticised her as an actress, and who thought her only suitable for light opera (*ariettes*), admitted that her high voice was perfect of its kind. Sophie Arnould was her pupil. She retired from the Opéra in 1759 with a pension of 1500 livres, but continued to sing at the Concert Spirituel till 1769-70, and at the 'Musique du Roi' until 1763. She sang at Lyons without success in 1771. She was much esteemed by Voltaire, and the pastellist, La Tour, exhibited a celebrated portrait of her at the Salon of 1757. (He called her his 'Celeste.')

Her niece, (2) MARIE ANTOINETTE FRANÇOISE, a singer at the Concert Spirituel, was her heir, and it was she and not Marie Fel who was a second in the famous *duel de femmes* in the Bois de Boulogne, between the singer, Mlle. Beaumais, and the dancer, Mlle. Théodore, in 1780.

(3) ANTOINE FEL, the father of the last named (b. 1694; d. Bicêtre, June 27, 1771), who retired from the Opéra in 1752, left two collections of 'Cantatilles.' Marie Fel also published an 'Air italien de Porpora' (1737); there are also at the Bibliothèque nationale two MS. 'Airs italiens,' dated 1753. She died mad.

Bibl.—Fétille, III. and Sup. 1; Q.-L.; *Grande Encyclopédie* (art. A. POUSSIN); J.-G. PROUD'HOMME, *Marie Fel* (Sammléband of Int. Mus. Ges., Apr. 1903); *A pastel by La Tour* (*Musical Quarterly*, Oct. 1923); cf. *Revue Pleyel*, Sept. 1924. J. P.

FELDLAGER IN SCHLESIEEN, EIN, opera in 3 acts, words by Kellstab, music by Meyerbeer; produced on reopening of Berlin Opera-house, Dec. 7, 1844; some of the music was afterwards used up in the 'Etoile du Nord.'

G.

FELICIANI, ANDREA (b. Siena), maestro di cappella at Siena Cathedral (c. 1579-86), composed masses and other church music, also madrigals, between 1575 and 1599 (Q.-L.).

FELIS, STEFANO (b. Bari, c. 1550), was maestro di cappella at Bari Cathedral in 1579 and at Naples in 1591. From 1602-03 he was canon at St. Nicolas, Bari. He wrote masses, 4 books of motets and 9 books of madrigals; also songs. (For list see Q.-L.)

FELIX MERITIS (founded 1777; dissolved 1889) was an institution in Amsterdam which included with the performance of music the cultivation of letters, art and science. It occupied a building architecturally important, with a large concert-room, library and observatory, situated on the Keizersgracht, one of the larger canals. Orchestral concerts took place in the winter. The usual number was ten, and the subscription was equivalent to £5. The early history of Felix Meritis has been narrated by Professor Jorinsson on the occasion of the Centenary, Nov. 2, 1877. Beginning its existence on the Leliegracht of Amsterdam, the founders intended it to be

'for the furtherance of laudable and useful arts and sciences; the augmentation of reason and virtue; the increase and prosperity of trade, navigation, agriculture and fishery,' etc. etc.

But a beginning was made at once with music and fine art, adding literature to the scheme two years later. The original locale soon proved to be too small, and in May 1782 the members removed to the Vorburgwal. In 1785 continued increase determined the erection of the building on the Keizersgracht, completed three years after, and with 400 members, instead of, as at first, 40. (On May 1, 1876, the number of members of all classes was 324.) The wave of disturbance caused by the French Revolution washed over Felix Meritis, and in 1792, through want of funds, the concerts ceased. However, the leaders of the institution would not allow it to sink in the vortex of political speculation; and, in the abolition of societies throughout Holland this one was exempted. In 1800 the complement of members was again full, and in

1806 the reading-room, long closed during the prohibition of newspapers, opened again. In that year Louis Bonaparte, made King of Holland, offered his protection, which was declined, as was also the proposal that the public business of the country should be carried on in the building. Napoleon I. and Marie Louise, were, however, later received in it. In these troubled times the music of Felix Meritis tended to soften the feelings of distress and almost despair of the Amsterdam patriots; yet that solace ceased once more towards the close of 1813, the country being in a state of insurrection against the French. After 1815 came peace and the gentle arts again, and during a great part of the 19th century great was the spiritual harvest of the 'happy through their deserts'!

The name Felix Meritis was more than once applied by Robert Schumann to Felix Mendelssohn; see *Gesammelte Schriften* (Leipzig, 1854), i. 219; also i. 191, 192 and 193. A. J. H.

FELLOWES, REV. EDMUND HORACE, Mus.D. (b. London, Nov. 11, 1870), has made a vital contribution to the revival of old English music by his scholarly editorship of the ENGLISH MADRIGAL SCHOOL (q.v.), the ENGLISH SCHOOL OF LUTENIST SONG-WRITERS (q.v.), and has done other work on similar lines.

Educated at Winchester and Oriel College, Oxford (B.A. 1892, M.A. 1896, B.Mus. 1896), Fellowes was ordained Deacon 1894, Priest 1895, and was appointed Minor Canon and Precentor of Bristol Cathedral 1897. In 1900 he became Minor Canon of St. George's Chapel, Windsor, and on the death of Sir Walter Parratt (1924) he was given charge of the choir of St. George's until such time as the rebuilding of the organ should make a permanent appointment desirable. Always a keen amateur of music, Fellowes early became an excellent violinist, taking part in the musical meetings of the Oxford University Musical Club in quartets and other chamber music. He devoted considerable study to old instruments and became a good judge of violins and of the craft of the luthier generally. His experience in the madrigal societies of Bristol, Windsor and elsewhere, showed him the urgent need for a reliable text of the Elizabethan madrigals, and also brought home to him the fact that only a very small proportion of the treasures of that period were available to modern singers in any form. He therefore embarked on the brave project of transcribing the whole series from the original partbooks and editing them with prefatory notes in an edition at once critical and practical. To this he devoted years of work, since besides the actual editorship of the music he expended much care on the poetic sources of the English madrigal, and also discovered certain important biographical facts concerning the composers. These studies produced from him besides the 'English Madrigal School' itself (36 vols.

published 1913-24) a volume of *English Madrigal Verse* (1920), *The English Madrigal Composers* (1921), a critical study of the works. *William Byrd* (1923), and *Orlando Gibbons* (1925) were published for the tercentenary celebrations.

While the 'English Madrigal School' was still in the press, Fellowes undertook a similarly comprehensive work with regard to the school of lutenist song-writers of whom John Dowland was the leader. 'THE ENGLISH SCHOOL OF LUTENIST SONGWRITERS' is still in progress, but the volumes which have appeared show the same reliable scholarship, the same determination to use only firsthand sources of information, which has distinguished Fellowes's earlier work. Fellowes is librarian to St. Michael's College, Tenbury, and has been a valued contributor to this Dictionary. He is a member of the editorial committee of the Carnegie Trust's *TUDOR CHURCH MUSIC* (q.v.), and in the course of his work thereon he brought to light the missing parts of Byrd's 'Great Service,' which his edition has restored to the repertory of the Church. He has also edited the three Masses of Byrd and two Fantasies for stringed orchestra in practicable performing editions and arranged a series of madrigals for male voiced choirs. His work in the preparation of gramophone records of madrigals and other Elizabethan music has helped to further the popular appreciation of these masterpieces. (See *ENGLISH SINGERS*.)

C.

FELTON, REV. WILLIAM (b. 1713; d. Dec. 6, 1769), B.A. Cambridge, 1738, M.A. 1745, vicar-choral and sub-chantor of Hereford Cathedral in 1741, custos of the vicars-choral in 1769, and chaplain to the Princess-Dowager of Wales. He was distinguished in his day as a composer for, and performer on, the organ and harpsichord.

He published three sets of concertos for those instruments in imitation of those of Handel. Burney, in the life of Handel prefixed to his account of the 'commemoration, relates (p. 32), on the authority of Abraham Brown, the violinist, a droll anecdote of Felton's unsuccessful attempt, through Brown, to procure the name of Handel as a subscriber to the second set of these concertos. Felton also published two or three sets of lessons for the same instruments. He was one of the stewards of the Meeting of the Three Choirs at Hereford 1744, and at Gloucester 1745. He was vicar of Norton Canon, 1751-69. 'Felton's Gavot' was long highly popular; it was introduced into Ciampi's 'Bertoldo' in 1762. He died suddenly and was buried in the vestibule of the Lady Chapel in Hereford Cathedral.

W. H. R.; addns. *D.N.B.*

FENAROLI, FEDELE (b. Lanciano, Apr. 25, 1730; d. Naples, Jan. 1, 1818), a pupil of Durante and Porpora at the Conservatorio

Loreto, Naples, became teacher at the Conservatorio La Pietà dei Turchini. Apart from a large number of sacred compositions he wrote a work on figured bass (many editions) and other instructive works (solfeggi, scales, etc.). (See *Q.-L.*)

FENELL (FFINELL), THOMAS (d. Sept. 21, 1709), was an Irish musician. A relative of Henry Purcell the elder, he was a singer in Westminster Abbey, 1663-65. In the latter year he was appointed violinist in the King's Band of Music, a post retained till 1676. He was vicar-choral of St. Patrick's Cathedral, Dublin, in 1677, and organist there 1689-94, with the exception of the year 1691-92, when William Isaac took his place. Dr. Cummings says that there are some MS. works by Thomas Fenell of Dublin, dated 1689, in the music library of Chester Cathedral. From 1694-98 he was organist and vicar-choral of Christ Church Cathedral. In 1698 he resigned. He was buried in St. Patrick's Cathedral, Sept. 23, 1709.

W. H. G. F.

FENNEY, WILLIAM J. (b. Handsworth, Birmingham, May 21, 1891), composer, had early leanings to music and studied the classics assiduously, but was otherwise self-taught until he entered the Midland Institute School of Music and studied composition with Granville Bantock. His style is admittedly influenced by Elgar, for whom he has a warm admiration. All his works have been written at Birmingham, where he still resides, except the piano trio and sonatina which were written in London. The most representative of them are the trio, op. 20, and the three works respectively for violin, viola and violoncello, with piano, grouped as op. 26.

ORCHESTRA

Avon Romance, Dawn, In Shadow, Vision of Ancient Empire (MS.). Suite (Prelude, Aria and Tarantella) for stringed orch.

CHAMBER MUSIC

Trio in G for v'ln., v'cl. and PF. Op. 20.

Two String Quartets.

Sonatina for v'ln. and PF.

Air for v'ln. and PF. Op. 26, No. 1.

Romanst. for v'ln. and PF. Op. 26, No. 2.

Rhapsody for v'cl. and PF. Op. 26, No. 3.

Numerous piano pieces, notably:

Op. 13, No. 1. 'In Early Spring' (also small orch.).

" No. 2. 'In the Wood.'

Also songs and partongs.

E. E.

FENTON, LAVINIA (real name BESWICK) (b. London, 1708; d. West Combe Park, Greenwich, Jan. 24, 1760), was an actress and singer who first appeared in 1726 at the Haymarket Theatre as Monimia in Otway's 'Orphan,' and afterwards at Lincoln's Inn Fields Theatre, July 15, 1726, as Lucilla in Sir W. Davenant's comedy, 'The Man's the Master.'

She attracted no particular attention until she appeared as Polly Peachum in THE BEGGAR'S OPERA (q.v.) on the first night of its performance, Jan. 29, 1728, when she 'became all at once the idol of the town; her pictures were engraven and sold in great numbers; her life written; books of letters and verses to her published; and pamphlets made of even her

very sayings and jests.' This success led to her being entrusted with more important parts than had before been assigned to her. At the end of the season, after she had played Polly upwards of sixty times, she withdrew from the stage and went to live with Charles, third Duke of Bolton. On Oct. 21, 1751, his wife, from whom he had been separated many years, having died, the Duke married Lavinia Beswick at Aix, in Provence. She became a widow in 1754. She was buried in Greenwich Church, Feb. 3, 1760.

W. H. H.

FEO, FRANCESCO (*b.* Naples, *c.* 1685), one of the masters of the Neapolitan school.

The traditions of Greco and Scarlatti were still fresh there, and it was at the suggestion of the last named that Domenico Gizzi had opened the private school at which Feo learnt the art of singing and the principles of composition. His bent was essentially dramatic, as indeed was that of nearly all the Neapolitans of his epoch, with the exception of Durante, whose colder and gloomier temperament predisposed him towards the ecclesiastical severities of the Roman style. Feo, like Durante and Leo, passed some time at the Vatican as the pupil of Pitoni, but the influence of his master was not sufficient to divert him from opera. His 'Ipermestra,' 'Ariana,' and 'Andromache' were all published at Rome itself, and apparently during his residence there. The MSS. in the Real Collegio di Musica at Naples include two other operas, 'L' Amor tirannico' (1713) and 'Siface' (1723). Various oratorios, masses, etc., are mentioned in *Q.-L.* In 1730 he was director of the Conservatorio de' Poveri di Gesù Cristo at Naples, and did much to establish the school as a nursery of great singers. Though addicted to the stage, Feo did not altogether neglect church music, and his work is distinguished by elevation of style and profound scientific knowledge. But a certain sensuousness, even in his sacred pieces, is suggested by the fact that Gluck borrowed the subject of a Kyrie by him for a chorus in one of his operas. According to Florimo he was living in 1740.

E. H. P.

FERAMORS, see LALLA ROOKH (5).

FERLENDIS, SIGNORA (*b.* Rome, *c.* 1778), contralto singer, daughter of an architect named Barberi. She studied with a teacher called Moscheri, and made her début at Lisbon. Here she had the advantage of some lessons from Crescentini, and here also (1802) she married Alessandro Ferlendis, the oboist. She appeared at Madrid in the next year, at Milan in 1804, and in 1805 at Paris (Théâtre Louvois) in Fioravanti's 'Capricciosa pentita.' She achieved there, however, no success in any other rôle but that one. Soon after this, she made her first appearance in London with Catalani in Cimarosa's 'Orazi e Curiazi.' She was

'a pretty good actress, and at that time first buffa; she was less liked than she deserved, for she had a

very good contralto voice, and was far from a bad buffa. She would have been thought, too, to have acted the part of Orazia well, had it not been for the comparison with Grassini, and for Catalani's then eclipsing everybody.'

She accompanied her husband to Italy in 1810.

J. M.

FERMATA, see PAUSE.

FERNAND CORTEZ, OU LA CONQUÊTE DU MEXIQUE, opera in 3 acts; words by Esménard and De Jouy, after Piron; music by Spontini. Produced Académie Impériale, Nov. 28, 1809; at Dresden, Mar. 1812; after revision by the composer, Paris, May 28, 1817; Berlin, Apr. 20, 1818.

FERNÁNDEZ, MARIA ANTONIA, see CARAMBA, LA.

FERNANDEZ DE CASTILLEJA, PEDRO (*b. circa* 1490; *d.* Seville, 1574), the 'Master of the Spanish Masters,' whose pupils included MORALES and Francisco GUERRERO. He was maestro de capilla at Seville from 1514-74, and left a number of motets, to be seen in MS. partbooks and large illuminated choir-books at Seville Cathedral. These show him to have been a competent if uninspired composer, inclined to keep his voices working hard the whole time.

J. B. T.

FERRABOSCO. A numerous family of Italian origin, who exerted an important influence on English music of the 17th century.

(1) DOMENICO MARIA (*b.* Bologna, Feb. 14, 1513; *d.* there, Feb. 1574), was first maestro di cappella at St. Petronio, Bologna; then at the Basilica Vaticana, Rome, 1546; singer in the Papal Chapel, 1550-55. He composed a book of madrigals (1542) and several motets and madrigals, in collective volumes.

(2) ALFONSO (*d.* Turin, 1588), generally known in England as Master Alfonso, was one of the sons of Domenico (1).

He was already settled in England in 1562, at which date he was in receipt of a pension of 100 marks a year, payable during the Queen's pleasure. It is possible that he had arrived some years earlier, for in 1564 he speaks of 'his long service' and of 'his youth and health spent in the Queen's service,' but it would probably be a mistake to attach much importance to phrases of this kind. In a letter to the Earl of Leicester he states that he had left Bologna without the necessary licence from the Inquisition, which had consequently confiscated the property which his father had left him. His father, however, was alive for some years afterwards, and it is probable that his letters (of which many exist written to Leicester, Sussex, and Sir William Cecil) were rather intended to excite the interest and generosity of his patrons than to contain an exact narrative of facts. These letters (dating from Oct. 1564), besides excuses for non-attendance at court on account of ill-health, etc., are chiefly taken up with

¹ Lord Mount-Edgcumbe.

reasons why the Queen's bounty should be further extended to him. On Sept. 10, 1567, he heard that the Queen had granted him a pension for his life so long as he remained in her service, and wrote to ask that this might be secured to him in case of her death by the insertion into the Patent of the words 'heredibus et successoribus nostris.' Perhaps partly on this account, but also on account of the unfriendly construction which his enemies put upon a visit paid by him to the French Ambassador, on Sept. 23 he was in disgrace, and the Queen refused to see him. To add to his troubles, a young foreign musician of Sir Philip Sidney's household was murdered as he was going to court to exhibit his skill, and court gossip accused Ferrabosco of killing him out of jealousy. He indignantly wrote to Sussex to protest his innocence (Oct. 13, 1567), saying that the young man was a friend of his, and that he was in the country when the affair happened. In a later letter (Dec. 28) he complains that until the Queen consented to receive him, it was generally supposed abroad, as well as in England, that he was guilty of the murder. After some delay the matter was settled, and in Mar. 1568-69, Ferrabosco, in writing, bound himself to the Queen's service for life, and received a pension of £100 a year. The Patent dated Mar. 26, 1569, contains the words 'heredibus et successoribus nostris.' At the same time Alfonso obtained leave (after pledging himself to return) to visit Italy in order to settle his affairs. Accordingly, on June 25, he writes from Paris where he was delayed, partly by business which he was arranging with a brother who was to accompany him to Italy, and partly through having been robbed of all his property by his English servant. He writes from Bologna on Oct. 30 of this year, promising to return with as little delay as possible, but in September of the following year he is still making excuses from Bologna; besides ill-health and business, he is delayed by the difficulty in obtaining the Pope's licence, without which he did not dare to travel in prohibited places, for fear of leaving his family at the mercy of the Inquisition. He did, however, eventually return to England, and in June 1572 was concerned in a masque presented before the Queen and the French Ambassador. He appears to have remained in England (probably living at Greenwich, where his son Alfonso was born) till the year 1578, when he finally quitted the country, and (in spite of having bound himself never to enter any other service than that of the Queen) entered the service of the Duke of Savoy, at whose court he was given some appointment, for he describes himself as 'Gentil' huomo dell' Altezza di Savoia.' He left his two children in England, where they remained in the charge of Gomer van Austerwyke, one of the Queen's Musicians. Six years later he sent for them, but the Queen refused to let them go (perhaps

regarding them as hostages for the return of their father), and Austerwyke was still unpaid for their keep at the date of Ferrabosco's death.

The eldest Alfonso Ferrabosco was the most important of the Italian musicians who lived in England in the 16th century, and was held in high estimation among his contemporaries.

'For judgment and depth of skill,' says Peacham in 1622, 'he was inferior to none: what he did was most elaborate and profound, and pleasing enough in Aire, though Master Thomas Morley censured him; otherwise. That of his *I saw my Ladie weeping*, and the *Nightingale* (upon which Dittie Master Bird and he in a friendly aemulation exercised their invention) cannot be bettered for sweetness of Aire or depth of judgement.'

Morley tells us of another 'vertuous contention' between him and Byrd 'made upon the plaine song *Miserere*, which contention of theirs (specially without envie) caused them both to become excellent in that kinde, and winne such a name, and gaine such credit, as will never perish so long as Musick endureth.' The results of this contention, in which each composer set the plain-song in forty different ways, were printed by East in 1603, under the title of 'Medulla Musicke'; no copy of it, however, is now known to exist.

His other printed works are: a 5-part madrigal 'Tu dolc' anima,' contributed to Pevernage's *Harmonia Celeste* (Antwerp, 1583); 2 Sets of 5-part madrigals which appeared at Venice in 1587; the first set containing 20 madrigals, dedicated to the Duke of Savoy; the second set containing 19 madrigals, dedicated to the Duchess of Savoy.

Many of his madrigals found their way into English collections: 'Musica transalpina' (1588) contains 14 by him; 'Musica transalpina' (1597) contains 6; 5 are in Morley's collection of 1598. Many of these are taken from the two Sets of 1587.

Two pieces for the lute 'by the most Artificiall and famous Alfonso Ferrabosco of Bologna' were printed by Robert Dowland in his 'Varietie of Lute-lessons,' 1610.

A large number of MS. works by him, chiefly motets, are in the British Museum; Bodleian and Music School, Oxford; St. Michael's College, Tenbury; B.M. Roy. Lib.; and R.C.M.

(3) ALFONSO (b. Greenwich, buried there, Mar. 11, 1627/28),¹ son of Alfonso (2), was, no doubt, one of the children left behind in England when their father returned to Italy in 1578. He seems to have lived at Greenwich at any rate after 1619. Entries relating to members of his family are to be found in the Greenwich parish registers.² 'He was trained up to Musick,' says Anthony Wood, apparently at the Queen's expense; at any rate, after Oct. 11, 1592, he was in receipt of an annuity of £26: 13: 4, which was paid up to Midsummer

¹ An entry appears in C. H. de LaFontaine's *The King's Musick*, p. 63, to the effect that he died in the previous year (1627), but it is clear that the entry is wrongly placed, and should be a year later so as to agree with the evidence of the Greenwich Registers.

² Printed in the *Musicalian*, Sept. 20, 1897.

1601. After James I.'s accession he appears as one of the King's Musicians for the Viols, a year's salary of £50 being paid him at Michaelmas 1604. He held his place as one of the violins until his death, by which time his salary was £40.¹

'At man's estate he became an excellent composer for instrumental musick,' says Anthony Wood, 'he was most excellent at the Lyra Viol, and was one of the first that set lessons Lyraway to the Viol, in imitation of the old English Lute and Bandora. The most famous man in all the world for Fantazias of 5 or 6 parts.' 'The lyre is in high favour with them,' writes André Maugars from Rome in 1639, 'but I have heard none who could be compared with Farabosco in England.' But it is chiefly as composer of the music to some of Ben Jonson's Masques that he is now remembered. Those for which he is known to have written music were 'The Masque of Blackness' (Twelfth Night, 1604-05), 'Hymenæi' (1605-06), 'The Masque of Beauty' (1607-08), 'The Masque for Lord Haddington's Marriage' (1607-08) and 'The Masque of Queens' (1608-09). The printed description of the 'Hymenæi' (in which Ferrabosco appeared as singer as well as composer) contains a testimony to the friendship existing at that date between him and Jonson, in a warm eulogy of the composer, which, however, was omitted in the folio edition of 1616. In 1604 (Nov. 27) he was entrusted with £20 to buy two viols for Henry, Prince of Wales, to whom he was appointed music-master, with a pension of £50 a year for life (dating from Christmas, 1604); on the death of Henry in 1612 his services were transferred to Charles, the new Prince of Wales. To these sources of income was added in 1619 a share in a valuable property, a grant for twenty-one years to him, Innocent Lanier and Hugh Lydiard 'for cleansing the Thames of flats and shelves' with power to sell the sand and gravel; with, in addition, 'an allowance to them of one penny per ton of strangers' goods and merchandises imported or exported into or out of the Port of London.' Ferrabosco is said to have sold his share 'for a great sum of money.'

On the accession of Charles I. Ferrabosco retained his former appointments, and was also made Composer of Music in Ordinary to the King, with a salary of £40, from the death of John Coprario (COOPER, *q.v.*) in 1626/27. He was also Composer of the King's Music, with an additional salary of £40. Ferrabosco published two volumes of music in 1609. The first, a book of 'Ayres' dedicated to Prince Henry, contains 28 songs with accompaniment for lute and bass viol, of which a large proportion are from Jonson's Masques. The other is a book of 'Lessons for 1, 2, and 3 Viols,' dedicated to the Earl of Southampton.

¹ Audit Office, Declared Accounts.

They consist of short pieces, dances, etc., for the lyra viol, and are printed in lute tablature. Each of these volumes contains (amongst others) commendatory verses by Ben Jonson; the first has also some verses by Campian, addressing Ferrabosco as

'Musick's maister and the offspring
Of rich Musick's Father
Old Alfonso's Image living.'

He also contributed three compositions to Leighton's 'Teares or Lamentacions' in 1614. Compositions in MS. (chiefly Fancies for the viols) are in the libraries of the R.C.M.; the Music School and Ch. Ch., Oxford; and the British Museum.

(4) ALFONSO (*d.* before 1660), son of Alfonso (3), succeeded on his father's death to the pension of £50 which he had enjoyed as former music-master to the Prince of Wales; and also to his place as Musician for the Viols and Wind Instruments. The latter double appointment entitled the holder to two liveries of £16 : 2 : 6 each, which were secured to Ferrabosco by a deed dated Feb. 7, 1627/28. His name occurs as one of the musicians in 1635, and again in 1641. He must have died before the re-establishment of the King's Musicians in 1660, when Child succeeded to 'Ferrabosco's place—Alphonso composer of Wind M.,' and Hingeston 'for a viol place of Alphonso Ferrabosco.'

(5) HENRY (*d. circa* 1658), son of Alfonso (3), and brother of Alfonso (4), succeeded his father as Composer of the King's Music, and as one of the King's Musicians, receiving a salary of £40 for each place.

On Feb. 7, 1627/28, he secured his double livery as Musician for the Voices and for the Wind Instruments. His name appears as one of the Musicians at different dates up to 1645, when he signed receipts on behalf of the Musicians, the court being then at Oxford.

His daughter Elizabeth (baptized at Greenwich, Dec. 3, 1640) may possibly have been the Mrs. Ferrabosco whom Pepys thought of engaging as gentlewoman for his wife, who 'sings most admirably' (*Diary*, Sept. 4, 1664). She was afterwards in the suite of the Duchess of Newcastle (*Diary*, May 30, 1667). Henry Ferrabosco may be identified with the Captain Henry Ferribosco who took part in the expedition to Jamaica where he was killed. The committee appointed to report on the arrears of pay, etc., due to relatives of those who fought there recommend (June 10, 1668) that a sum of £240 should be paid 'for five small children of Capt. Henry Ferribosco, lately slayne by the Enemy in Jamaica, his wife being also dead since his departure from England.' His place as Musician was filled by Thomas Bates at the Restoration.

(6) JOHN (*b.* 1626; *d.* Oct. 1682), probably the son of Alfonso (3), was baptized at Greenwich, Oct. 9, 1626. There is a warrant dated Jan. 17, 1631, for delivery of Chamlett and

other necessities yearly to John Ferrabosco, one of His Majesty's Musicians for the wind instruments, in the room of Henry Ferrabosco, during His Majesty's pleasure. As Henry was still holding his place as Musician for the Wind Instruments in 1634, this must have been a temporary arrangement, made solely with a view to providing for the child of a favourite musician; it is possible, however, that there were two musicians of this name. John Ferrabosco was appointed organist of Ely Cathedral in 1662; many anthems and services by him still exist there in MS. In 1671 he took the degree of Mus.B. at Cambridge 'per literas regias' (Dickson's *Catalogue of Music at Ely*). The registers of Holy Trinity Church, Ely, show that he married Anne Burton on June 28, 1679; their child John was baptized in the following August, and was buried May 8, 1682.

G. E. P. A.

BIBL.—See *R.M.J.*, 1897; *Journal of Int. Mus. Ges.* viii. p. 271; *Mus. Ant.* iii. p. 70, where a 'Fancy' is printed; iv. pp. 42, 119, 121, 189, 200, 263. Notes on the Ferrabosco family.

FERRARESE DEL BENE, the sobriquet of Francesca Gabrielli, an Italian singer, native of Ferrara. When Burney was in Venice, in Aug. 1770, he heard at the Ospedaletto an orphan girl *la Ferrarese* with an 'extraordinary compass' and a 'fair natural voice.' She sang in London from 1784-87 in Cherubini's 'Giulio Sabino' and other parts, but without much success. In 1789 she was prima donna in Vienna. Mozart wrote for her the Rondo 'Al desio,' introduced into the part of the Countess in 'Figaro' on its revival Aug. 1789, and she played Fiordiligi in 'Così fan tutte' at its production, Jan. 26, 1790. Mozart did not think much of her, for in speaking of Allegrandi he says, 'she is much better than the Ferrarese, though that is not saying a great deal.' She probably owed her good fortune to her pretty eyes and mouth, and to her intrigue with da Ponte, with whom she lived as his mistress for three years. In the end she quarrelled with the other singers, and was sent from Vienna by the Emperor.

G.

FERRARI, BENEDETTO, called 'dalla Tiorba' (b. Reggio, c. 1597 d. Oct. 22, 1681), an Italian musician, and composer of words and music for the species of Italian dramas called 'dramme per musica.' According to a portrait prefixed to his 'Andromeda' (printed 1637) he was forty years old at that time.

From a letter, now in the archives of Modena, written by him to the Duke of Modena in 1623, we learn that his reputation as a musician, and especially as a player on the theorbo, was by that time considerable. It was largely owing to him that the 'dramma musicale' took such deep root in Italy and Germany, and herein lies his chief interest for us. His opera 'Andromeda,' set to music by Manelli and brought out at the Teatro San Cassiano at Venice in 1637, was the first opera performed before a mixed audience. In 1639 followed his 'Adone,' set

by Monteverde, and 'Armida,' of which he wrote both words and music. Its success induced Ferrari to devote himself more to composition than before. He remained in Venice till 1645, when he was in the court band at Modena: in 1651 he was invited to Vienna by the Emperor Ferdinand, and remained in his service till 1653. A ballet by him was performed at the Diet of Ratisbon in 1653. In the same year he was appointed maestro di cappella to Duke Alfonso of Modena, on whose death in 1662 he was dismissed, but he was reappointed in 1674, and died in possession of the post. His librettos were collected and printed at Milan and Piacenza, and passed through several editions; none of these collections, however, are complete. The library at Modena contains several of his MSS., including the ballet 'Dafne in alloro' (Vienna, 1651). This is not mentioned in *Q.-L.* as still extant, but an oratorio 'Sansone' is noted as at Modena. We have not sufficient materials to form any opinion on the style of his music. He published at Venice in 1633, 1637 and 1641, three books of 'Musiche varie a voce sola,' in which, according to Burney, the term 'Cantata' occurs for the first time, although the invention of this kind of piece was claimed by Barbara Strozzi twenty years later.

F. G., with addns.

FERRARI, CARLO (LE BOTTEUX) (b. Piacenza, c. 1730; d. Parma, c. 1789), a famous violoncellist who played at the Concert Spirituel, Paris, 1758, and entered the service of the Duke of Parma in 1765. He composed sonatas for violoncello, quartets, etc. (See *Q.-L.*; also E. v. d. Straeten, *History of the Violoncello*.)

E. v. d. s.

FERRARI, DOMENICO (b. Piacenza, beginning of 18th cent.; d. Paris, 1780), an eminent Italian violin-player.

He was a pupil of Tartini, and lived for a number of years at Cremona. About the year 1749 he began to travel, and met with great success at Vienna, where he was considered the greatest living violin-player. In 1753 he became a member of the band of the Duke of Würtemberg at Stuttgart, of which Nardini was at that time the leader. If Ferrari was a pupil of Tartini, he certainly, according to contemporary critics, did not retain the style of that great master in after life. He had an astonishing ability in the execution of octave-runs and harmonics, and appears altogether to have been more a player than a musician. He twice visited Paris, at first in 1754, and played there with great success. He died there, it was said, by the hand of a murderer. Ferrari published sets of six violin-sonatas (Paris and London), and some for two violins and bass which, however, are now forgotten.

P. D.

FERRARI, GIACOMO GOTIFREDO (b. Roveto, 1759; d. London, Dec. 1842), a cultivated and versatile musician, son of a merchant.

He learned the pianoforte at Verona, and the flute, violin, oboe and double-bass at Roveredo, and studied theory under Pater Marianus Stecher at the convent of Mariaberg near Chur. After his father's death he accompanied Prince Lichtenstein to Rome and Naples, and studied for two years and a half under Latilla on Paisiello's recommendation. Here also he made the acquaintance of M. Campan, Marie Antoinette's master of the household, and went with him to Paris, where he was appointed accompanist to the new Théâtre Feydeau. In 1793 the company was dispersed, and Ferrari shortly afterwards left France. Having travelled for some time he finally settled in London, where he composed a very large number of works, including 4 operas and 2 ballets. In 1804 he married Miss Henry, a well-known pianist. From 1809-12 he suffered from loss of sight. In 1814 he went to Italy with Broadwood the pianoforte-maker, and visited Naples, Venice, etc., returning in 1816. He was an active teacher of singing, and published a *Treatise on Singing* in 2 vols., of which a French translation appeared in 1827. His *Studio di musica pratica e teorica* (London) is a useful treatise. Two of his French songs, 'Qu'il faudrait de philosophie' and 'Quand l'amour naquit à Cythère,' were extremely popular in their day. His acquaintance with almost every contemporary musician of importance gives a historical value to his book *Aneddoti . . . occorsi nella vita di G. G. Ferrari*, 2 vols., London, 1830. Besides the operas, ballets and songs already named, Ferrari composed an extraordinary quantity of music for the voice, pianoforte, flute and harp. (See *Q.-L.*)

F. G.

FERRARI, GUSTAVE (b. Geneva, 1872), composer, pianist and writer, was educated at Geneva and Paris and settled in London 1901. He is best known as the skilful accompanist of Mme. Yvette Guilbert and editor of her collection of old French chansons. He contributed largely to the second edition of this Dictionary (1904, etc.), wrote incidental music for H. B. Irving's production of *Hamlet* (1905), and other works among which his songs have made the most mark.

O.

FERREIRA (FERREYRA), MANUEL (18th cent.), Spanish composer of theatrical music. He belonged to a company in Madrid directed by José Parra, to which he acted as composer and conductor, and was one of the first to realise the possibilities of the TONADILLA, which became popular in Spain in the latter half of the 18th century. His works in that form are preserved in large numbers in the Bibl. del Ayuntamiento, Madrid. The National Library contains the MS. score of a serious opera entitled 'El mayor triunfo de la mayor guerra' (M. 1336). Of greater interest is his incidental music for 18th-century revivals

of the great plays of the Spanish theatre, by Calderón, Moreto and others (Bibl. del Ayuntamiento, Madrid). His music for the Don Juan play of Antonio de Zamora (d. 1740) is notable for the use made of wind instruments to herald the approach of the statue—a procedure which recalls Purcell's 'Libertine' and Mozart's 'Don Giovanni.'

J. B. T.

FERREL, JEAN FRANÇOIS (middle of 17th cent.), a musician in Paris who wrote a small pamphlet, *A savoir que les maîtres de dance, qui sont de vrais maîtres larrons à l'endroit des violons de France, n'ont pas royale commission d'incorporer es leur compagnie les organistes et autres musiciens, comme aussy de leur faire paier redevance, démontré par J. F. Ferrel, praticien de musique à Paris, natif de l'Anjou* (Paris, 1659). This was the signal for a contest lasting for 100 years, between the French musicians and the dancing-masters, whose chief, the 'roi des ménétriers,' claimed jurisdiction over all musicians. After several law-suits, a decree of the Paris Parliament in 1750 settled the question in favour of the musicians. Some of the pamphlets had curious titles; for example, *La cloche fêlée, ou le bruit fait par un musicien qui ne veult être maître de dance parce qu'il ne sait sur quel pied se tenir, et Discours pour prouver que la danse dans sa plus noble partie n'a pas besoin des instrumens de musique, et qu'elle est en toute indépendante du violon*. (See *Fétis*.)

M. C. C.

FERRER, MATEO (b. Barcelona, Feb. 25, 1788; d. there, Jan. 4, 1864), Spanish composer, choirmaster and organist of Barcelona Cathedral. Nim prints a specimen of his work.

J. B. T.

FERRETTI, GIOVANNI (b. Venice, c. 1540), lived in Ancona from 1569, where he was maestro di cappella at the cathedral from 1575-1585; composed 5 books of 'Canzoni' in 6 parts (Venice, 1567-91), 2 books in 6 parts (Venice, 1573-86), and another of 5-part madrigals (Venice, 1588), all excellent examples of their kind.

M. C. C.

FERRI, BALDASSARE (b. Perugia, Dec. 9, 1610; d. there, Sept. 8, 1680), owed to an accident in his boyhood the operation by which he became a soprano.

At the age of 11 he entered the service of the Bishop of Orvieto as a chorister, and remained there until 1625, when Prince Vladislav of Poland, then on a visit at Rome, carried him off to his father's court. In 1665 he was transferred to Ferdinand III., Emperor of Germany, whose successor, Leopold I., loaded him with riches and honours. This prince had a portrait of Ferri, crowned with laurels, hanging in his bed-chamber, and inscribed, 'Baldassare Perugino, Re dei Musici.' At the age of 65 he received permission to retire to his native country, with a passport, the terms of which indicated sufficiently the consideration in

which he was held. He reached Italy in 1675.

Ferri was made a knight of S. Mark of Venice in 1643, and, therefore, probably revisited Italy at that time. He is said also to have visited London, and to have sung here the part of Zephyr; but this is uncertain. The visit has been identified as occurring in 1669 when he sang at Whitehall on June 3.

His voice, a beautiful soprano, had an indescribable limpidity, combined with the greatest agility and facility, a perfect intonation, a brilliant shake, and inexhaustible length of breath. Although he seems to have surpassed all the evirati in brilliance and endurance, he was quite as remarkable for pathos as for those qualities. (Bontempi, *Historia musica*.)

J. M.

FERTÉ, PAPILLON DE LA, see PAPILLON.

FERVAAL, opera in 3 acts, words and music by Vincent d'Indy. Produced Théâtre de la Monnaie, Brussels, Mar. 12, 1897; Opéra-Comique, Paris, May 10, 1898; Opéra, Paris, Jan. 8, 1913.

FESCA, (1) FRIEDRICH ERNST (b. Magdeburg, Feb. 15, 1789; d. Carlsruhe, May 24, 1826), composer. His father was an amateur, and his mother a singer, pupil of J. A. Hiller.

Having completed his elementary studies, he went through a course of counterpoint with Pitterlin, conductor of the Magdeburg theatre. On Pitterlin's death in 1804 he became a pupil of August Eberhardt Müller at Leipzig. Here he played a violin concerto of his own with brilliant success. In 1806 he accepted a place in the Duke of Oldenburg's band, but in the following year became solo violinist under Reichardt at Cassel, where he passed six happy years and composed his first seven quartets and first two symphonies, interesting works, especially when he himself played the first violin. In 1814, after a visit to Vienna, he was appointed solo violin, and in the following year Konzertmeister to the Duke of Baden at Carlsruhe. During the next eleven years he wrote two operas, 'Cantemir' and 'Leila,' overtures, quartets, quintets, chorales, psalms and other sacred music. He died of consumption, after many years' suffering, which, however, had not impaired his powers, as his last works contain some of his best writing. His *De Profundis*, arranged in four parts by Strauss, was sung at his funeral. Fesca's rank as a composer has been much disputed. There is a want of depth in his ideas, but his melodies are taking and his combinations effective. His quartets and quintets, without possessing the qualities of the great masters, have a grace and elegance peculiar to himself, and are eminently attractive. His symphonies are feebly instrumented, but his sacred works are of real merit. In richness of modulation he approaches Spohr. A complete edition of his quartets and quintets (20

and 5 in number) has been published in Paris (Rimbault). His son, (2) ALEXANDER ERNST (b. Carlsruhe, May 22, 1820; d. Brunswick, Feb. 22, 1849), was a pupil of Rungenhagen, Wilhelm Bach and Taubert, and composer of trios for pianoforte, violin and violoncello, and other chamber-music popular in their day. The best of his four operas was 'Der Troubadour' (Brunswick, 1854).

M. C. C.

FESTA, COSTANZO (b. end of 15th cent.; d. Apr. 10, 1545), one of the earliest composers of the Roman school, was elected a member of the Pontifical Choir in 1517, and eventually became maestro at the Vatican. His nomination was so far singular that he was at that time the only Italian in a similar position throughout the Peninsula. Burney, who had been at the trouble of scoring a great number of his madrigals, was astonished at the rhythm, grace and facility of them. He calls one of Festa's motetti, 'Quam pulchra es, anima mea,' a model of elegance, simplicity and pure harmony, and says that 'the subjects of imitation in it are as modern, and that the parts sing as well, as if it were a production of the 18th century.' Festa, according to Baini, fell in his motets into a fashion too prevalent in his day, of setting distinct words to each voice.¹

Festa's position in the historical development of the Italian school of madrigalists is discussed under MADRIGAL (q.v.). His first book of madrigals for three voices was published in 1537, and various editions appeared down to 1568. Two masses are in the Sistine Chapel, a four-part Magnificat was published in 1554, and a book of Litanies for double choir in 1583. The archives of the Pontifical Chapel are rich in his MSS., and a celebrated *Te Deum* of his (published 1596) is still sung by the Pontifical Choir at the election of a new pope. Burney, in his *History* (iii. 245, 6), prints a motet and a madrigal of Festa; and a *Te Deum* and motet are given in Bock's collection (vi. 31, 40). His madrigal 'Down in a flow'ry vale' ('Quando ritrovo la mia pastorella') long enjoyed the distinction of being the most popular piece of this description in England.

E. H. P.; rev. with addns.

FESTING, (1) MICHAEL CHRISTIAN (d. July 24, 1752), an eminent performer on, and composer for the violin, was the son of a flautist of the same names, who was a member of the orchestra of the King's Theatre in the Haymarket about 1727. Festing was at first a pupil of Richard Jones, leader of the band at Drury Lane, but subsequently studied under Geminiani. He first appeared in public about 1724. He became a member of the king's private band in 1735 and first violin at an amateur association which met at the Crown and Anchor Tavern in the Strand, under the name of the Philharmonic Society. In 1737 he was appointed

¹ *Life of Palestrina*, vol. I. pp. 95-108.

director of the Italian Opera. On the opening of Ranelagh Gardens in 1742 he was appointed director of the music as well as leader of the band.

Festing was one of the originators of the Society of Musicians (see ROYAL SOCIETY OF MUSICIANS), and for many years performed gratuitously the duties of secretary to this institution. In Sept. 1752 (after his death), his goods, books and instruments were sold at his house in Warwick Street, Golden Square. He left an only son, the Rev. Michael Festing, rector of Wyke Regis, Dorset, who married the only child of his father's friend, Dr. Greene. From this union sprang many descendants to perpetuate the name.

Festing's compositions consist of several sets of solos for the violin; sonatas, concertos and symphonies for stringed and other instruments; part of the third chapter of Habakkuk, paraphrased; Addison's Ode for St. Cecilia's Day; Milton's Song on May morning; an Ode on the return of the Duke of Cumberland from Scotland in 1745; an Ode 'For thee how I do mourn'; and many cantatas and songs for Ranelagh. Sir John Hawkins says that 'as a performer on the violin Festing was inferior to many of his time, but as a composer, particularly of solos for that instrument, the nature and genius whereof he perfectly understood, he had but few equals.' Festing had a brother, (2) JOHN (*d.* 1772), an oboist and teacher of the flute, whose success in his profession was such that he died worth £8000, acquired chiefly by teaching. W. H. H.

FESTIVALS, see COMPETITION FESTIVALS; INTERNATIONAL SOCIETY FOR CONTEMPORARY MUSIC; NIEDERRHEINISCHE MUSIKFESTE; SONS OF THE CLERGY; THREE CHOIRS, and names of several towns.

FÊTE GALANTE, opera in one act, words by Edward Shanks after a story of Maurice Baring, music by Ethel Smyth; produced Repertory Theatre, Birmingham, June 4, 1923.

FÉTIS, (1) FRANÇOIS JOSEPH (*b.* Mons, Mar. 25, 1784; *d.* Brussels, Mar. 26, 1871), the most learned, laborious and prolific musical litterateur of his time. He was the son of an organist at Mons, and early learned to play the violin, piano and organ, completing his studies at the Paris Conservatoire, which he entered in Oct. 1800. He was a pupil of Rey for harmony, who taught it according to the principles of Rameau. Boieldieu and Pradher were his masters for the piano, but he only succeeded in gaining the harmony prize in 1803, and the second 'second prix' for composition in 1807, scarcely as much as might have been expected from one who delighted to style himself the pupil of Beethoven. He married in 1806 Adelaide Catherine Robert (*b.* Paris, Sept. 23, 1792; *d.* Beaufort, June 3, 1866), who translated into French William C. Stafford's *History*

of Music (Paris, 1832), and in 1811 pecuniary difficulties, caused by the loss of his wife's fortune, compelled him to retire to the Ardennes, where he remained till his appointment as organist of St. Pierre, Douai, and professor of music there in Dec. 1813. In 1818 he returned to Paris, and in 1821 he succeeded Eler as professor of counterpoint and fugue at the Paris Conservatoire, becoming librarian of that institution in 1827. For an account of the historical concerts he inaugurated see PARIS. In 1828 he was for three months in England. (See the *Harmonicon* for July 1829.) He came to England in 1829 for the purpose of giving a course of lectures on musical history. The season was too far advanced to allow of his doing so, and the plan was abandoned, a single lecture being given at Sir George Warrender's on May 29, when illustrations were given by Camporese, Malibran, Mme. Stockhausen, Donzelli, Begrez, Labarre, De Bériot, etc. In Mar. 1833 he was appointed director of the Brussels Conservatoire and maître de chapelle to the King of the Belgians, two important posts, which, besides ensuring him many gratifying distinctions, obliged him to take part in the labours of the Belgian Académie Royale, for which he wrote several interesting memoirs.

Fétis must be considered separately in his various capacities of composer, author of theoretical works, historian and critic. As a composer he wrote much pianoforte music for two and four hands, chamber-music, duos, a quartet, quintets, and a sextet for piano (four hands) with string quartet, overtures and symphonies for orchestra, operas and sacred music. His operas, 'L'Amant et le mari' (1820), 'Marie Stuart en Écosse' (1823), 'La Vieille' (1826) and 'Le Mannequin de Bergame' (1832), were produced at the Opéra-Comique with some success, though they now seem feeble and antiquated. Among his sacred compositions we will only specify his 'Messes faciles pour l'orgue,' and his 'Messe de Requiem' composed for the funeral of the Queen of the Belgians (1850). The greater part of his church music is unpublished.

Fétis's fame, however, rests not upon his compositions, but upon his writings on the theory, history and literature of music. His *Méthode élémentaire . . . d'harmonie et d'accompagnement* (1824, 1836, 1841), which has been translated into English (Cocks & Co.) and Italian; his *Solfèges progressifs* (1827); *Manuel des principes de musique* (1837); *Traité élémentaire de musique* (Brussels, 1831-32); *Traité du chant en chœur* (1837)—translated by Helmore (Novello); *Manuel des jeunes compositeurs* (1837); *Méthode des méthodes de piano* (1837); *Méthode des méthodes du chant* (1840); and *Méthode élémentaire de Plain Chant* (1843) have been of great service to teachers, though some of them bear traces of having been written in

taste for the publishers. Far above these must be ranked his *Traité de l'accompagnement de la partition* (1829); his *Traité complet de la théorie et de la pratique de l'harmonie* (1844), which has passed through many editions and been translated into several languages; and his *Traité du contrepoint et de la fugue* (1824), a really classical work. These two last Fétis considered his best original productions, and looked to them for his permanent reputation. They were the more important in his eyes because he believed in the infallibility of his doctrines. Outside his own peculiar system of harmonic generation—the 'omnibonic' system, whose main principle is that harmonic combinations exist by which any given sound may be resolved into any key and any mode—he saw nothing but error and confusion.

As an historian he was equally systematic and equally impatient of contradiction. Nevertheless, in his *Biographie universelle des musiciens* (see DICTIONARIES OF MUSIC), and in his *Histoire générale de la musique* (see HISTORIES OF MUSIC), errors of detail and mistakes in chronology abound, while many of the opinions he advances are open to question. Easy as it may be, however, to find fault with these two standard works, it is impossible to do without them. The first edition of the *Biographie* (Paris, 1835-44) is especially defective, but it contains a remarkable introduction founded on the writings of Forkel, Gerber, Kieselwetter, Hawkins and others. Fétis intended to use this introduction as material for a *Philosophie de la musique*, but had not time to accomplish it. The second edition of the *Biographie* (Paris, 1860-65), though more complete and more satisfactory than its predecessor, should still be consulted with discretion; its dates are still often wrong, and there are mistakes, especially in the articles on English musicians, which are almost ludicrous, and might have been avoided. The two supplementary volumes edited by Arthur Pougin in 1878 and 1880 added much to the value of the book. Fétis unfortunately allows his judgment to be biased by passion or interest. It is a pity that in his *Histoire générale de la musique* (Didot, 5 vols. 1869-76) he is not more just to some of his predecessors, such as Villoteau and Adrien de la Fage, whom he quotes freely but never without some depreciatory remark, thus forgetting the poet's words:

'Ah ! doit-on hériter de ceux qu'on assassine ?'

In spite of this defect, and of a strong tendency to dogmatism, the *Histoire générale de la musique*, although a fragment—for it ceases at the 15th century—exhibits Fétis at his best. Another useful work is *La Musique mise à la portée de tout le monde* (Paris, 1830, 1834, 1847), which has been translated into German, English, Spanish and Russian. The same elevation and clearness appear in his innumerable articles

and reviews, which were all incorporated in the *Biographie*, the *Curiosités historiques de la musique* (Paris, 1830), the *Esquisse de l'histoire de l'harmonie* (Paris, 1840, now very scarce) and other works already named. The *Revue musicale*, which he started in 1827 and continued till 1833, was the foundation of the musical press of France. Among his other works may be mentioned biographies of Paganini (1851) and Stradivari (1856), *Mémoires sur l'harmonie simultanée chez les Grecs et les Romains* (1858); catalogues of the musical exhibits in the Paris Exhibitions of 1855 and 1867. This short résumé of Fétis's labours will suffice to show the immense services he rendered to musical instruction and literature. Had he been a little less one-sided and a little more disinterested and fair, he would have been a model critic and littérateur. After his death his library was bought by the Belgian Government, and is now in the Brussels Bibliothèque Royale.

His eldest son, (2) ÉDOUARD LOUIS FRANÇOIS (b. Bouvignes, near Dinant, May 16, 1812; d. Brussels, Jan. 31, 1909), at an early age assisted his father, and edited the *Revue musicale* from 1833-35. In 1836 he entered the Royal Library of Belgium, becoming 'conservateur' of the Department of Prints. He was art critic of the *Indépendance Belge*, edited the 5th vol. of *Histoire générale de la musique* and published *Légende de Saint Hubert* (Brussels, 1847), *Les Musiciens belges* (Brussels, 1849), a useful work, *Les Artistes belges à l'étranger* (1857-65) and a *Catalogue raisonné* (1877) of his father's valuable library purchased by the Government. He was also professor of æsthetics to the Brussels Académie des Beaux-Arts, and was a member of the Académie Royale in Brussels. A younger son of the historian, (3) ADOLPHE LOUIS EUGÈNE (b. Paris, Aug. 20, 1820; d. there, Mar. 20, 1873), was a pupil of Brussels Conservatoire and that of Paris, where his professors were H. Herz and Halévy. He was a clever and successful pianist and teacher, and composed a good deal of music of little value—comic operas, operettas, etc., of which one, 'Le Major Schlagmann,' was performed in 1859; also pianoforte pieces, etc.

(4) His brother, ADOLPHE (d. Liège, Aug. 22, 1871), an official of the Belgrave state, did not take up any musical work, though he had studied music and even composed.

FEUILLET, RAOUL AUGER, a dancing-master of Paris, was the author of an ingenious system by which dance steps could be noted down in diagrams showing the position and movement of the feet corresponding to each bar of the music. Something of the sort had been previously attempted by Charles Louis

Beauchamp (1636-1705), but Feuillet carries out the idea with a degree of elaboration which tends to defeat itself owing to the bewildering complexity of the diagrams which result. His book was first published in 1701, and is entitled *Chorégraphie, ou l'art de décrire la danse par caractères, figures et signes démonstratifs*. It was translated into English by John Weaver in 1706 with the title *Orchesography or the Art of dancing by characters and demonstrations* (published by J. Walsh). Signor Gallini, who wrote on the Art of Dancing in 1772, speaks of *chorégraphie* as 'an inextricable puzzle or maze of lines and characters, hardly possible for the imagination to seize or for the memory to retain,' and concludes that diagrams such as those of Feuillet can only be intelligible to dancing-masters, who are just the persons who have no need of them.

Feuillet published several collections of dances in this curious notation, and notably a 'Recueil de contredances mises en chorégraphie' (1706), which is of the highest value as establishing the English origin of the French contredanse. Such well-known English tunes as 'Green Sleeves' and 'Christchurch Bells' appear here as 'Les Manches Vertes' and 'Le Carillon d'Oxford' (see *Mus. T.*, Feb. 1901).

J. F. R. S.

FEVIN, (1) ANTOINE DE, was a distinguished composer of the early years of the 16th century, one of the younger contemporaries of Josquin des Prés. From the designation Aurelianusis found appended to his name, it is inferred that he was a native of Orleans. Esclava, however, and other authorities have claimed him as a Spaniard, though apparently on no other ground than that some of his works are found in a valuable MS. belonging to the Cathedral of Toledo. But the full contents of the MS. in question have now been made known by F. Rubio Piqueras in his book 'Musica y músicos toledanos' (Toledo, 1923), and it appears that only three works of Fevin are contained in it in conjunction with others by French and Flemish masters as Josquin, Mouton, Richafort, so that there is nothing in this to show that Fevin was Spanish by birth or had ever visited Spain. Moreover, Piqueras gives full lists of all the musicians associated with Toledo from the earliest times, and the name of Fevin does not appear among them. Another MS. emanating from Spain is referred to by Van der Straeten,¹ but as little from this as from the other can any conclusion be drawn as to Fevin's birth or presence in Spain. From Glarean's mention of him as 'egregius juvenis' it is inferred that he died comparatively young, and as Ambros was able to fix approximately the date of his death as 1514 or 1515, by reference to some MSS. of his masses in the Vienna library written in 1516, which bear the inscription 'Antonius de Fevin

polae memoriae,' his birth has been conjectured to have been not much earlier than 1490. In his compositions Glarean describes him as 'felix Jodoci aemulator,' the happy or successful emulator or imitator of Josquin. He did not, however, attempt to emulate Josquin in the solution of difficult problems in proportion or canonic device, but rather sought to imitate him and may even be thought sometimes to surpass him in the feeling for beautiful flowing melody and simple expressive harmony. Those of his works known to us in modern reprints have a peculiar charm resulting from the very simplicity of the means employed. We may specially refer to the beautiful motet 'Descende in hortum meum' given in Kade's Supplement to Ambros, also to the two short extracts from the Mass 'Sancta Trinitas' given by Burney. But as Ambros says, all his works have the stamp of genius and the full ripeness of master-ship.² Glarean was evidently a great admirer of Fevin, and says that he knows nothing more graceful than the Mass Ave Maria from which he quotes a short extract. The list of Fevin's works is as follows:

- (1) In the Motetto de la Corona of 1514, 6 motets a 4.
- (2) In 1515 Petrucci published 3 Masses a 4: 'Sancta Trinitas,' 'Mente tota,' Ave Maria.
- (3) In 1516 Andreas de Antiqua included in his 'Liber quindecim missarum' the Ave Maria and 'Mente tota,' also a De Forla a 5. (From this edition H. Expert has reprinted the Mass 'Mente tota' in his series 'Les Maîtres Musiciens de la Renaissance française'.)
- (4) In 1534 Attaingnant in a miscellaneous collection of Lamentations included 3 by Fevin, which were also published again by Montanus in 1549.
- (5) 3 Magnificats appeared in collections 1534 and 1544.
- (6) In 1540 Kriesteln published the motet 'Descende in hortum meum' and 'Quae est ista,' this latter described as a Fuga 4 vocum.
- (7) Esclava's *Lira-Sacro-Hispana* includes from the Toledo MS. the motet 'Ascendens Christus in altum,' a 6, and some extracts from masses.
- (8) A few other works, chiefly Bicinia, are noted in Q.-L.
- (9) In MSS. at Vienna there are a Mass 'O quam glorifica luce' and a Requiem, besides some of the others already mentioned.
- (10) A MS. in Munich contains the Mass 'Salve sancta parens.'
- (11) In the archives of the Sistine Chapel there are 4 masses, including two not elsewhere found, one entitled 'Dites-moi toutes vos pensées,' and another *Missa Parva*, both a 4, also a setting of the hymn 'Lauda Sion' and a motet.

All this seems to show that not only in his brief lifetime, but for a considerable time after his early death, he had secured a great reputation, and was reckoned as one of the best masters of the time.

J. R. M.

(2) ROBERT DE (b. Cambrai), a French musician of the end of the 15th century, was maestro di cappella to the Duke of Savoy at the beginning of the 16th century. A Mass, on the chanson 'Le vilain jaloux' (Le vilain jalou), was printed among those of Antoine de Fevin, by Petrucci in 1515; this and other masses are in the Sistine Chapel in MS. and a Mass on 'La sol fa mi' in the Munich library. It is uncertain whether he was a relation of Antoine de Fevin. (Q.-L. and Riemann.)

Compositions by both the Fevins are in a MS. in the Papyrus Library, Magdalene College, Cambridge.

FFRANGCON-DAVIES, (1) DAVID THOMAS (b. Bethesda, Carnarvon, Dec. 11, 1856; d. Hampstead, Apr. 5,¹ 1918), a distinguished baritone singer.

He was educated at Friar's School, Bangor, and at Jesus College, Oxford. He took holy orders, which he subsequently relinquished. He had sung tenor as an amateur for years, but the true character of his voice was discovered by Edwin Holland during his undergraduate days. He received vocal instruction at the Guildhall School of Music from Richard Latter, and later from Shakespeare and Randegger. His compass extended to over two octaves, from E to b' flat, of pure baritone quality. On Jan. 6, 1890, he made his first appearance in public at a 'De Jong' concert, Manchester. On Apr. 26 he made his début on the stage as the Herald in 'Lohengrin' at Drury Lane with the Carl Rosa Company. On Jan. 31, 1891, he was the original Cedric on the production of Sullivan's 'Ivanhoe' at the English Opera House. Ffrangcon-Davies confined himself almost entirely to concerts. Between 1896 and 1898 he sang at all the principal concerts and festivals in America and Canada. From 1898-1901 he resided at Berlin, and sang with great success in the various cities of Germany and Switzerland. On Mar. 10, 1900, on a visit to England, he sang at the Symphony Concerts, Queen's Hall. In 1901 he returned permanently, and made a very great success in the part of Elijah at the Queen's Hall; and his rendering of that music may be said to have been the turning-point in his career. He sang at all the principal concerts and festivals, notably in the new works of Elgar and other British composers. He also earned celebrity for his fine lieder singing.

At the end of 1903 he was appointed a teacher of singing at the R.A.M. In 1906 he published *Singing of the Future*, a work on vocal training. In 1907 he suffered from a nervous breakdown, which prevented his resuming public singing. 'He will be long remembered as one of Wales's finest and most artistic singers' (*Mus. T.*). His daughter, (2) GWENN, a soprano, is now well known by her fine performance of Etain in Boughton's 'Immortal Hour' at the Regent Theatre (1922-23), and as an actress by her performance as 'Juliet' (1924).

A. C.

FIALA, JOSEPH (b. Lobkowitz, Bohemia, 1751; d. Donaueschingen, 1816), eminent oboist. He taught himself the oboe, for which he had a perfect passion, but being a serf was compelled to menial labour in the Schloss. He ran away, and was recaptured, upon which his

mistress, the Countess Lobkowitz, ordered his front teeth to be pulled out that he might be incapable of playing: but some of the nobility of Prague interceded for him with the Emperor, who commanded him to be set free. He first entered Prince Wallerstein's band, and in 1777 that of the Elector at Munich. He was afterwards in that of the Archbishop of Salzburg, where he made the intimate acquaintance of the Mozarts. In 1785 he was suddenly discharged by the Archbishop, with a loss of 200 florins, on which Mozart not only urged him to come to Vienna, but offered him a good engagement. After a residence of some years in Russia he became in 1792 Kapellmeister to Prince Fürstenberg at Donaueschingen. He published two symphonies (MS. in the Royal Library at Berlin) two sets of quartets (Frankfort and Vienna, about 1780-86), 'Six duos pour violon et violoncelle' (Augsburg, 1799), and two sets of trios for flute, oboe and bassoon (Ratisbon, 1806), besides MS. concertos for flute, oboe, bassoon and violoncello. He played several other instruments well, especially the violoncello and double bass.

M. C. C.

FIBICH, ZDĚNEK (b. Šebořice, near Časlav, 1850; d. Prague, Oct. 10, 1900), was son of the head forester in his birthplace. Together with Smetana and Dvořák, he was one of the most prominent representatives of the renaissance of Bohemian music in the 19th century.

His op. 1, a song called 'Le Printemps,' dates from childhood, and at 14 he conducted in public a movement from a symphony of his own composition. After attending preparatory schools in Vienna and Prague, he entered the Leipzig Conservatorium in 1865, where his uncle, Raymond Dreyschock, was professor of the violin. Fibich studied the piano with Moscheles, harmony with Carl Richter and counterpoint with Jadassohn. From Leipzig he went to Paris for a year, and afterwards to Mannheim, where he worked under Lachner. His musical studies completed, he returned to Prague in 1870. He went next to Vilna, Poland, as a teacher, where he remained until 1874, when he was offered the post of second conductor at the National Theatre, and choir-master of the Russian Church in Prague. Soon after his thirtieth year he relinquished all his appointments in order to devote himself to composition. This was perhaps a mistake. The fact that he wrote some 700 works in the course of thirty-five years suggests that the compulsion to labour in other directions might have proved a salutary check on his fluency.

Fibich started his creative career under the influence of the already decadent school of German romanticism, but fortunately it was to Schumann, rather than to the languishing band of his imitators, that he was most attracted in youth. We see Schumann's influence clearly in his early chamber music, his pianoforte

¹ Dates from *Mus. T.*, May 1913, p. 214.

pieces and overtures; while later, the working of Liszt's spell is evident in the first symphonic poems. The best example of his chamber music dating from these years is the pianoforte quartet, in E minor, op. 11, a work in cyclical form, somewhat discursive, but possessing charm and colour. It was introduced to England at a Saturday Popular Concert by the Bohemian violinist, Mme. Norman Neruda, Charles Hallé, Strauss and Piatti. The quintet in D, op. 42, written sixteen years later (1894), is an interesting experiment in instrumental combination. The addition of horn and clarinet to the piano, violin and violoncello gives it a romantic atmosphere; but the form is on the whole true to type. It seems to have suffered unmerited neglect. Apart from the sonata, op. 28, Fibich attempted nothing on a large scale for the piano. His collected pieces published from time to time under the title of 'Moods, Impressions and Memories' number 350. Though not equal to Schumann's short pieces for piano, they are superior to the Lilliputian swarms engendered by Reinecke and others during the seventies of last century.

In Fibich's songs we may follow the various stages of his development. The early lyrics are imbued with the folk spirit, while the later albums (opp. 36 and 45) show that he had learnt much from the songs of Schumann and Brahms. In choral music he is not the equal of his contemporaries in Bohemia. He only found himself when it came to the union of choral music with the drama.

Fibich wrote three symphonies. He belonged to the period and the school which had begun to doubt the immutable value of the symphonic form, which may account for the lack of conviction and vitality shown in these essays. Moreover, the two earlier works were composed before he had acquired a full mastery of orchestration. A group of overtures are more interesting, the one suggested by Vrchlický's comedy *A Night at Karlstein* (op. 26, 1886), a clear and animated work with a touch of national colour, is the most popular, but the 'Komenský Festival Overture,' composed for the third centenary celebration of the educational reformer (1892), is the more solid piece of work. It is built upon a chorale theme taken from Komenský's *Cancional* (Amsterdam, 1659), and without being programme music in the concrete sense, it reflects in its three main sections the militant spirit of the reformer, the mild and contemplative side of the sage, and the ultimate triumph of his far-sighted ideals. Fibich composed seven symphonic poems, of which four at least seem to be inspired by national sentiment, while others are based on Shakespearean subjects, 'Othello,' op. 23, and 'Bouře' ('The Tempest'), op. 46; or upon a purely subjective poetic basis, as in 'Vigílie,' op. 20.

The opening of a provisional National

Theatre, to be followed shortly by the establishment of the permanent 'Národní Divadlo,' awoke in Fibich, as in other young Czechs, an ambition to follow Smetana in the field of dramatic music. His first opera, 'Bukovín,' begun at 16 and completed at 20, was an immature and indefinite work greatly influenced by Weber. It was produced in 1874. His second effort, 'Blaník' (1875-77), has the emotional glow and freshness of youth, and on the structural side shows by a greater firmness of design and the consistent use of the Leitmotiv that Fibich had become the observant disciple of Wagner. Individuality is submerged in Wagnerism in 'The Bride of Messina' (1883). Perhaps Fibich realised that he was in danger of being drawn out of his own orbit by the powerful attraction of the master spirit, for there followed a long break between this opera and his next work for the stage. In this interval he carried to a logical conclusion the ideas derived from the study of Wagner, and decided that they led him convincingly in the direction of melodrama.

Melodrama, aesthetically condemned by the majority of arbitrators, had been, as it were, legitimised in Bohemia since the days of Benda, and had become an accepted form among modern Czech composers. Nešvera, Foerster, Kovařovic and others wrote melodramas on a modest scale, usually for one voice only, with pianoforte accompaniments. Fibich made his first experiments on these simple lines before he moved on to his culminating effort, the Trilogy 'Hippodameia' in Vrchlický's version. Fibich's music which accompanies the text throughout is a continuous orchestral commentary, never drowning the words, but clothing them in a flexible garment upon which the various leading motives, traced in a succession of clear designs, help to elucidate the ever-changing emotions of the protagonists. There is no doubt that Fibich came very near to the solution of his problem: to attain to complete equality between the two co-operating elements—the poetry and the music. Unhappily the unwieldy form of the work—three separate dramas intended for performance on three consecutive evenings—hindered the success of this melodrama. Its first production at the National Theatre was piecemeal, each section being presented as it was completed: 'Pelop's Wooing' (1890), 'The Atonement of Tantalus' (1891) and 'The Death of Hippodameia' (1892).

That the composer himself was not entirely satisfied with the result of his gigantic experiment may be assumed from the fact that, having brought melodrama to a climax in 'Hippodameia,' he never reverted to the form. He blended much of what he had learnt from Wagner with the mastery of orchestral colour, and the sensitiveness to the rapid emotional

changes of the spoken word which were the outcome of his studies in melodrama, in the three operas which now followed: 'The Tempest' (after Shakespeare, 1895), 'Hedy' (Haidée, from Byron's *Don Juan*, 1896) and 'Šarka' (on a national legend, 1897). The last named is the complete palinode of his long adherence to Wagnerian theories, and is certainly his finest achievement in dramatic lyricism. His last opera, 'Pad Arkuna' (The Fall of Arkun, 1898, produced 1900), although it survives in the repertory of the National Opera, is an anti-climax to its immediate predecessors. Fibich died in Prague at the age of 50. He left a few distinguished pupils, among them Kovařovic and Karel Weiss; but the weight of his influence on contemporary Czech music is inconsiderable compared with that of Smetana and Dvořák.

His works amount to 622, including many which have never been published. The following is a list of his most important mature compositions:

DRAMATIC MUSIC

OPERAS.—'Bukovin' (1870-71); 'Blank' (1877, Fr. A. Urbánek, Prague); 'The Bride of Messina' (1883, Fr. A. Urbánek); 'The Tempest' (1894, Fr. A. Urbánek); 'Hedy' (1895, Fr. A. Urbánek); 'Šarka' (1897, Fr. A. Urbánek).

MELODRAMAS.—'Christmas Eve' (1875); 'Eternity' (1879, Fr. A. Urbánek); 'The Water-sprite' (1883, Fr. A. Urbánek); 'Queen Emma' (1885, Vilémek, Prague); 'Hakon' (1901, with orchestra (1888, Fr. A. Urbánek); the Trilogy 'Hippodamia' ('Pelop's Wooing', op. 33, 1889; 'The Atone-ment of Tantalus', op. 32, 1890; 'The Death of Hippodamia', op. 33, 1891), Fr. A. Urbánek, Prague.

ORCHESTRAL MUSIC

OVERTURES.—'The Jew of Prague' (1871); Overture in E major (unpublished, 1872); Comedy Overture, op. 3 (1873); Comedy Overture, 'A Night at Karlstein', op. 26 (1886, Fr. A. Urbánek); Komenský Festival Overture, op. 34 (1892, Fr. A. Urbánek).

SYMPHONIES.—F major, op. 17 (P.F. 4 hands, Fr. A. Urbánek); in E, op. 38 (1892, P.F. 4 hands, Fr. A. Urbánek); in E minor (1898, MS.).

SYMPHONIC POEMS.—'Othello', op. 6 (1873, Fr. A. Urbánek); 'Zaboj, Slavoj and Ludek', op. 37 (1873); 'Tomán and the Wood-nymph', op. 49; 'The Tempest', op. 46 (1880); 'Spring', op. 13; 'Vigilance', op. 22 (1883)—all five works published as P.F. duets by Fr. A. Urbánek, Prague.

CHAMBER MUSIC

Pianoforte Trio, F minor (1872, MS.). Pianoforte Quartet, in E minor, op. 11 (1874, Fr. A. Urbánek, Prague); String Quartet in A (MS.); String Quartet in G, op. 8 (Fr. A. Urbánek); Quintet for P.F., violin, violoncello, clarinet and horn (or viola), op. 42 (Fr. A. Urbánek, 1894).

A great number of songs, ballads, vocal duets and pianoforte pieces; the majority of the latter appeared in the 'Moods, Impressions and Memories' mentioned above. A considerable number of Fibich's compositions are still in MS., but most of his published works were brought out by the firm of Fr. Urbánek, Prague.

BIBL.—CARL LUDWIG RICHTER, *Zdenko Fibich. Eine musikalische Skizze* (Prague, 1900); ZDENEK NEJEDLIK, *Zdenko Fibich*, Prague, 1901; and *Moderní Zpěváci na Smetanovi*, Prague, 1911; JOSEF BARTOŠ, *Zdenko Fibich*, 1914.

R. N.

FIDDLE, the old English word, before 'viol' came in, and still more idiomatic than VIOLIN (*q.v.*). Both are possibly derived from the same root—*vitula*, a calf, from the springing motion of dancers (Murray, *Oxford Dictionary*, and Littré); and compare the connexion of Geige and jig). FIDDLESTICK is the violin-bow, as in the Epigram on a Bad Fiddler:

'Old Orpheus play'd so well he mov'd Old Nick,
Whilst thou mov'st nothing—but thy fiddlestick.'

The Germans have three terms for the instrument—*Fidel*, *Geige* and *Violine*. G.

FIDELIO, ODER DIE EHELICHE LIEBE, Beethoven's single opera, op. 72, the words by Sonnleithner, after Bouilly's 'Léonore, ou

l'Amour conjugal.' Produced, in 3 acts, Theater an der Wien, Nov. 20, 1805; in 2 acts, Imperial private theatre, Mar. 29, 1806; again revised, Kärnthnerthor Theatre, May 23, 1814; Théâtre Lyrique, Paris (Barbier and Carré), May 5, 1832; King's Theatre (in German), May 18, 1832; Covent Garden (in English), June 12, 1835; Her Majesty's (in Italian, recitatives by Balfe), May 20, 1851; New York, Park Theatre, Sept. 9, 1839. As a centenary celebration it was given in Berlin in its original form, Nov. 20, 1905. For the overtures see LEONORA.

FIEDLER, AUGUST MAX (b. Zittau, Dec. 31, 1859), orchestral conductor, studied the pianoforte under his father, a well-known music teacher, then entered the Leipzig Conservatorium (1877-80). He joined the staff of the Hamburg Conservatorium, became its Director (1904) and conductor of Philharmonic concerts there. He visited England in 1907 and conducted several concerts with the London Symphony Orchestra. He next went to America to conduct the Boston Symphony Orchestra (1908-12), after which he returned to Germany. In 1916 he became musical director to the town of Essen (*Riemann*). His compositions include an early symphony (Hamburg, 1886), a 'Lustspiel' overture and some chamber music. C.

FIELD, HENRY LEBOT, called 'Field of Bath' (b. Dec. 6, 1797; d. May 19, 1848), a pupil of Coombs of Chippenham. Beyond these facts, and that he was a careful pianist and greatly esteemed as a teacher, there is nothing to explain why he should require to be distinguished from his greater namesake, unless his appearance at the Philharmonic Concerts in 1822 and 1840, both times in concertos by Hummel, be accepted as a reason. G.

FIELD, JOHN (b. Dublin, July 26, 1782; d. Moscow, Jan. 11, 1837), pianist and composer, has been known as 'Russian Field' to distinguish him from Henry Field.

Field came of a family of musicians. He was the son of a violinist engaged at a theatre in Dublin, who again was the son of an organist. His grandfather taught him the rudiments of music and grounded him in the piano. He told Fétis that both his father and grandfather forced him to practise so unmercifully that he attempted to run away from home—to which, however, abject misery soon brought him back. The elder Field, who was subsequently engaged as violinist at Bath, and afterwards at the Haymarket Theatre, brought young John to London and apprenticed him (for a premium of 100 guineas) to Clementi, with whom he became a sort of musical salesman in the pianoforte shop of Clementi & Co., and from whom, up to his 22nd year, he received regular instruction in pianoforte-playing. He made his début in London in 1794.¹ He had appeared at Giordani's concert at the Rotunda, Dublin,

¹ Stated by W. H. G.

in 1792, playing a new concerto by Giordani.¹ In 1802 Clementi took Field to Paris, where his admirable rendering of Bach's and Handel's fugues astonished musicians, and where his first book of sonatas was published; thence to Germany, and thereafter to Russia. Here he was encountered by Spohr, who gives a graphic account² of him. Clementi kept him to his old trade of showing off the pianos in the warehouse, and there he was to be found, a pale melancholy youth, awkward and shy, speaking no language but his own, and in clothes which he had far outgrown; but who had only to place his hands on the keys for all such drawbacks to be at once forgotten.

On Clementi's departure in 1804 Field settled at St. Petersburg as a teacher, where his lessons were much sought after and extraordinarily well paid. He married Mlle. Percheron in 1808, and his first three nocturnes were issued in 1814. In 1823 he went to Moscow and gave concerts with even greater success than in St. Petersburg. After further travelling in Russia he returned to London and played at the Philharmonic—a concerto of his own in E♭—Feb. 27, 1832. From thence he went to Paris, and in 1833 through Belgium and Switzerland to Italy, where—at Milan, Venice and Naples—his playing did not please the aristocratic audiences and his concerts did not pay. Habits of intemperance had grown upon him; he suffered from fistula, and his situation at Naples became worse and worse. He lay in a hospital for nine months in the most deplorable condition, from which at last a Russian family named Raemanow rescued him, on condition that he should consent to return with them to Moscow. On their way back Field was heard at Vienna, and elicited transports of admiration by the exquisite playing of his nocturnes. But his health was gone. Hardly arrived at Moscow he succumbed, and was buried there in Jan. 1837.

To a modern pianist the name of John Field recalls little or nothing beyond 'Field's nocturnes'—not the seven concertos so much admired in their day, nor the three sonatas dedicated to his master Clementi, nor the pianoforte quintet with strings, nor the 'Airs variés' or 'Polonaise en rondeau.' And here again, not the entire set of twenty little sentimental effusions bound up into a nocturnal sheaf, but about half-a-dozen delicate little lyrics—the nocturnes in A, E♭, C minor, A♭ and B♭ (Nos. 4, 7, 2, 3 and 5 in Liszt's edition), the very essence of all idylls and eclogues, 'Poésies intimes' of simple charm and inimitable grace, such as no undue popularity can render stale, no sham imitation nauseous. Both as a player and as a composer Chopin, and with him all modern pianists, are much

indebted to Field. The form of Chopin's nocturnes—the kind of emotion embodied therein, the type of melody and its graceful embellishments, the peculiar waving accompaniments in widespread chords with their vaguely prolonged sound resting on the pedals, all this and more we owe to Field.

Field's method of playing, as was to be expected from Clementi's best pupil, was distinguished by the most smooth and equable touch, the most perfect legato, with supple wrists and quiet position of the hands, a suave and singing tone, capable of endless modifications and delicate shades of expression. He is reported to have played his nocturnes with an inexhaustible variety of embellishments, and, like Chopin after him, is said to have preferred the smaller square and upright pianofortes to grands. Schuberth & Co.'s edition of his nocturnes is prefaced by a charming essay in French on Field and his musical ways, by Franz Liszt, well worth reading. (See *PLATE XVI.*)

Field's printed compositions for the piano are as follows:

Seven concertos (No. 1, E♭; No. 2, A♭; No. 3, E♭; No. 4, E♭; No. 5, C; 'L'Incendie par l'orage'; No. 6, C; No. 7, C minor); two divertimenti, with accompaniment of two violins, flute, viola and bass; a quintet and a rondo for piano and strings; variations on a Russian air for four hands; a grand valse; four sonatas, three of which are dedicated to Clementi; two 'Airs en rondeau'; 'Fantaisie sur le motif de la polonaise', 'Ah, quel dommage'; 'Rondeau écossais'; 'Polonaise en forme de rondo'; 'Deux airs anglais and 'Vive Henry IV' variés; and twenty pieces to which in recent editions the name of nocturnes is applied, though it properly belongs to not more than a dozen of them.

E. D., with addns.

FIELTIZ, ALEXANDER VON (b. Leipzig, Dec. 28, 1860; d. Chicago, 1905), composer. His father was half Polish and his mother a Russian. He studied in Dresden under Edmund Kretschmer for composition, and Julius Schlehoff for pianoforte. In 1886 and 1887 he conducted under Nikisch, and then went to Italy for ten years, owing to delicate health, where he composed piano pieces, songs, two suites for orchestra and two operas. One, 'Vendetta,' was given at Lübeck, 1891; the other, 'Das stille Dorf,' was produced at Hamburg, Mar. 13, 1900, and has been played in Bremen, Lübeck, Ulm, etc. Von Fielitz became professor in the Stern Conservatorium at Berlin, and was appointed conductor at the Theater des Westens in 1904. He went to America in 1905, held a teaching post at Chicago and conducted a symphony orchestra there. This was not, however, the famous Theodore Thomas Orchestra, now the Chicago Symphony Orchestra (BAKER). He returned to the Stern Conservatorium in 1908. He is chiefly known in England by his songs, of which the most important is a cycle called 'Eliland.'

W. R. C., with addns.

FIERRABRAS, opera in 3 acts by Schubert, words by Kupelwieser; commissioned by Barbaja, but owing to his failure was never performed, and remains in MS. in the Library of the Gesellschaft der Musikfreunde at Vienna.

G.

¹ G. E. F. Arkwright gave the date as Apr. 14, but Gratian Flood, in *John Field of Dublin* (1920), gives Mar. 24, and quotes an advertisement of a second concert on Apr. 4.

² Spohr, *Selbstbiographie*, I. 48.

FIESCO, GIULIO (b. Ferrara, c. 1519; d. ? Modena c. 1586), lutenist in the service of the Dukes Ercole II. and Alfonso II., d'Este, Modena. He composed 2 books of madrigals (4 v., 1554), a book of madrigals (5 v., 1567), *Musica Nova* (5 v., 1569), and some madrigals and songs in collective volumes (*Q.-L.*).

FIFE, see **FLUTE** (3).

FIFTEENTH is a stop or set of pipes in an organ sounding two octaves, or fifteen notes, above the Open diapason.

FIFTH. A Fifth is the perfect consonance, the ratio of the vibrational numbers of the limiting sounds of which is 2 : 3. It is called fifth because five diatonic notes are passed through in arriving from one extreme of the interval to the other, whence the Greeks called it *διά πέντε*, Diapente. The interval consists of three whole tones and a semitone.

FIGARO, see **NOZZE DI FIGARO**, LE.

FIGLIA DI REGGIMENTI, see **FILLE DU RÉGIMENT**, LA.

FIGULUS (TÖFFER), WOLFGANG (b. Naumburg¹; d. Meissen, c. 1591), was cantor of St. Thomas, Leipzig, 1549-51, then of the Princes-school, Meissen, 1551-88, when he was pensioned. His son-in-law, F. BIRCK, became his deputy until 1591, probably the year of his death. He composed *Precationes* (1553), cantiones sacrae (4-8 v., 1575), and published collections of songs, 'Amores Filii Dei' (4 v.), 2 books of Christmas songs, hymns with figured bass (1594 and 1605), and *Elementa musica* (1550; several later editions) (*Q.-L.*; *Riemann*).

FIGURANTE, a ballet-dancer who takes an independent part in the piece; also, in France, a subordinate character in a play, who comes on but has nothing to say.

FIGURE is any short succession of notes, either as melody or a group of chords, which produces a single, complete and distinct impression. The term is the exact counterpart of the German *Motiv*, which is thus defined in Reissmann's continuation of Mendel's *Lexikon*:

** Motiv, Gedanke, in der Musik, das kleinere Glied eines solchen, aus dem dieser sich organisch entwickelt. **

It is in fact the shortest complete idea in music; and in subdividing musical works into their constituent portions, as separate movements, sections, periods, phrases, the units are the figures, and any subdivision below them will leave only expressionless single notes, as unmeaning as the separate letters of a word.

Figures play a most important part in instrumental music, in which it is necessary that a strong and definite impression should be produced to answer the purpose of words, and convey the sense of vitality to the otherwise incoherent succession of sounds. In pure vocal music this is not the case, as on the one hand the words assist the audience to follow and

understand what they hear, and on the other the quality of voices in combination is such as to render strong characteristic features somewhat inappropriate. But without strongly marked figures the very reason of existence of instrumental movements can hardly be perceived, and the success of a movement of any dimensions must ultimately depend, to a very large extent, on the appropriate development of the figures which are contained in the chief subjects. The common expression that a subject is very 'workable,' merely means that it contains well-marked figures; though it must be observed, on the other hand, that there are not a few instances in which masterly treatment has invested with powerful interest a figure which at first sight would seem altogether deficient in character.

As clear an instance as could be given of the breaking up of a subject into its constituent figures for the purpose of development is the treatment of the first subject of Beethoven's Pastoral Symphony, which he breaks up into

three figures corresponding to the first three bars. As an example of his treatment of (a) may be taken—

(b) is twice repeated no less than thirty-six times successively in the development of the movement; and (c) appears at the close as follows:

Examples of this kind of treatment of the figures contained in subjects are very numerous in classical instrumental music, in various degrees of refinement and ingenuity; as in the first movement of Mozart's G minor Symphony; in the same movement of Beethoven's Eighth Symphony; and in a large number of Bach's fugues, as, for instance, Nos. 2, 7, 16 of the *Wohltemperiertes Clavier*. The beautiful little musical poem, the eighteenth fugue of that series, contains as happy a specimen of this device as could be cited.

In music of an ideally high order, everything should be recognisable as having a meaning; or, in other words, every part of the music should be capable of being analysed into figures, so that even the most insignificant instrument in the orchestra should not be merely making

¹ Riemann says Lützen.

sounds to fill up the mass of the harmony, but should be playing something which is worth playing in itself. It is of course impossible for any but the highest genius to carry this out consistently, but in proportion as music approaches to this ideal, it is of a high order as a work of art, and in the measure in which it recedes from it, it approaches more nearly to the mass of base, slovenly or false contrivances which lie at the other extreme, and are not works of art at all. This will be very well recognised by a comparison of Schubert's method of treating the accompaniment of his songs and the method adopted in the large proportion of the thousands of 'popular' songs which annually make their appearance in this country. For even when the figure is as simple as in 'Wohin,' 'Mein,' or 'Ave Maria,' the figure is there, and is clearly recognised, and is as different from mere sound or stuffing to support the voice as a living creature is from dead and inert clay.

Bach and Beethoven were the great masters in the use of figures, and both were content at times to make a short figure of three or four notes the basis of a whole movement. As examples of this may be quoted the truly famous rhythmic figure of the C minor Symphony (*d*), the figure of the Scherzo of the Ninth Symphony (*e*), and the figure of the first movement of the last Sonata, in C minor (*f*). As a beautiful example from Bach may be quoted the Adagio from the harpsichord Toccata in D minor (*g*), but it must be said that examples in his works are almost innumerable, and will meet the student at every turn.

A very peculiar use which Bach occasionally makes of figures, is to use one as the bond of connexion running through a whole movement by constant repetition, as in Prelude No. 10 of the *Wohltemperirtes Clavier*, and in the slow movement of the Italian Concerto, where it serves as accompaniment to an impassioned recitative. In this case the figure is not identical on each repetition, but is freely modified, in such a way however that it is always recognised as the same, partly by the rhythm and partly by the relative positions of the successive notes. This manner of modifying a given figure shows a tendency in the direction of a mode of treatment which became a feature in later music: namely, the practice of transforming figures in order to show different aspects of the same thought, or to establish a connexion between one thought and another by bringing out the characteristics they possess in common. As

a simple specimen of this kind of transformation, may be quoted a passage from the first movement of Brahms's PF. Quintet in F minor. The figure stands at first as at (*h*), then by transposition as at (*i*). Its first stage of transformation is (*j*); further (*k*) (*l*) (*m*) are progressive modifications towards the stage (*n*),

which, having been repeated twice in different positions, appears finally as the figure immediately attached to the Cadence in D \flat , thus—

A similar very fine example—too familiar to need quotation here—is at the close of Beethoven's Overture to 'Coriolan.'

The use which Wagner makes of strongly marked figures is very important, as he establishes a consistent connexion between the characters and situations and the music by using appropriate figures (*Leitmotiven*), which appear whenever the ideas or characters to which they belong come prominently forward.

That figures vary in intensity to an immense degree hardly requires to be pointed out; and it will also be obvious that figures of accompaniment do not require to be so marked as figures which occupy positions of individual importance. With regard to the latter it may be remarked that there is hardly any department in music in which true feeling and inspiration are more absolutely indispensable, since no amount of ingenuity or perseverance can produce such figures as that which opens the C minor Symphony, or such soul-moving figures as those in the death march of Siegfried in Wagner's 'Götterdämmerung.'

As the common notion that music chiefly consists of pleasant tunes grows weaker, the importance of figures becomes proportionately greater. A succession of isolated tunes is always more or less inconsequent, however deftly they may be connected together, but by the appropriate use of figures and groups of figures, such as real musicians only can invent, and the gradual unfolding of all their latent possibilities, continuous and logical works of art may be constructed; such as will not merely tickle the hearer's fancy,

but arouse profound interest, and raise him mentally and morally to a higher standard.

FIGURED BASS, see THOROUGH-BASS.

FIGURED MELODY (Ital. *figurato*), see FLORID.

FIGUŠ-BYSTRÝ, VILIAM (b. Baňska Bystrica, Slovakia, Feb. 28, 1875), a representative of the younger school of Slovak composers.

His parents, who were of the artisan class, sent him to a preparatory school for teachers at Baňska Stavnice, which he left in 1893, having taken his diploma. For eight years he lived and taught first at Piliš, near Buda-Pest, then at Ostra Luka and Vel'ka Slatina, in the midst of a folk much given to singing, and became deeply interested in the purest forms of the national Slovak melodies, in which this district, beneath the heights of Pol'ana, is particularly rich. In 1903 he moved to Padina, near Belehrad, where he came in contact with another rising Slovak composer, Schneider-Trnavsky. In 1907 he returned to his native town, where he teaches in the Protestant School and is also organist. Through all vicissitudes and difficulties (Slovakia was then under Magyar rule and the Slavonic population in evil plight) Figuš-Bystrý continued to cultivate music, and succeeded in following a course at the Academy in Pest with such excellent results that he was offered a professorship there. This he declined, out of attachment to his native place, situated in the most beautiful region in Slovakia.

Like his compatriot Lichard, Figuš-Bystrý made a holocaust of his early works; but he arranged his valuable collection of folk-songs with pianoforte accompaniments. The first book came out in 1906 (*The SS. Cyril and Methodius Printing Press, Prague*), and was shortly followed by four further numbers. His compositions, some of which have been heard in Prague, include: 'Svižok a svätajanská muška' (*The Cricket and the Glow-worm*), words by the poet Sládek, for two solo sopranos and piano accompaniment (afterwards arranged for four-part chorus for women's voices and string orchestra); 'Pieseň pokoja, lásky a mieru' (*Songs of Rest and Love and Peace*), words by the most famous of the Slovak poets, Hviezdoslav, for soprano solo, women's chorus and piano accompaniment; a few violin pieces: three sonatinas; a pianoforte quartet in E flat; and a cantata of some length, a setting of Hviezdoslav's poem 'Slovenská Pieseň' (*Slovak Songs*) for solo quartet and mixed chorus, given at a Slovak concert in Prague, in Mar. 1920. A. K.; trans. R. N.

FILIPPI, FILIPPO (b. Vicenza, Jan. 13, 1830: d. Milan, June 25, 1887), studied law at Padua, and took his degree there in 1853. He had already taken up the cudgels on behalf of

Verdi's 'Rigoletto,' and soon afterwards devoted himself entirely to music and musical criticism. He was editor of the *Gazzetta Musicale* of Milan, and critic of the *Perseveranza*, from 1859. His influence was strongly exerted on behalf of Wagner, and the early acceptance of Wagner in Italy must be ascribed in part to his writings; his pamphlet, *Riccardo Wagner*, was translated into German and published in 1876; a series of musical essays, as *Musica e musicisti*, appeared in 1879, and a monograph on the life and works of Fumagalli is of some value. He composed chamber-music, pianoforte pieces and songs. (*Riemann; Baker*). M.

FILIPPI, GASPARE, was maestro di cappella at Vincenza Cathedral, c. 1637-53. He composed *Concerti ecclesiastici* . . . 1-5 v. (1637); 'Musiche,' 17 Italian songs (2-6 v.), 12 madrigals (5 v., 9 sonatas, 3-5 parts, 2 violins, alto viola, tenor viola, basso viola and continuo, 1649); *Sacrae Laudes* (1651); vesper psalms for 2 choruses (1653); masses for 2 choruses (1653); motet in Magni's collection (1645) (Q.-L.).

FILIPPINI, PADRE STEFANO DETTO L'ARGENTINA. In his printed works, published between 1652-85, he calls himself 'bacilieri' (bachelor of theology), and maestro di cappella at S. Giovanni Evangelista Rimini. According to Fétis he held a similar position at S. Stefano, Venice, and Florido says he was organist and maestro di cappella at San Agostino (? Rome) c. 1643-45. He composed 2 books of concerti sacri (2-5 v.), 2 books of masses, 3 books of psalms, 1 book of motets, etc. (see Q.-L.).

FILIPUCCI, AGOSTINO (b. Bologna; d. there, c. 1679), priest and organist at La Madonna di Galiera. From 1647 he was also at S. Giovanni in Monte Bologna. He was the first member of the Accademia dei Filarmonici, founded there in 1666; president in 1669 and 1675. He composed a Mass, 5 psalms, and a Magnificat, op. 1, all in 5 parts with instruments (1665); also a book of masses (4 v., op. 2, 1668) (Q.-L.).

FILLE DU REGIMENT, LA, opera in 2 acts; words by Bayard and St. Georges; music by Donizetti. Produced Opéra-Comique, Feb. 11, 1840; in Italian, 'La figlia di reggimento,' Her Majesty's, May 27, 1847; in English (Fitzball), Surrey Theatre, Dec. 21, 1847; New Orleans, Mar. 7, 1843.

FILLUNGER, MARIE (b. Vienna, Jan. 27, 1850), a fine singer of German Lieder, studied in the Vienna Conservatorium from 1869-73 under Mme. Marchesi. On the advice of Brahms she went to the Hochschule in Berlin in 1874, remaining there until 1879, when she went to Frankfort, following Mme. Schumann. While still a student of the Hochschule, she appeared with great success in public, singing mainly in oratorio, in North Germany, Holland and Switzerland. Early in 1889 she made her first appearance in London at a Popular Concert,

where her singing of Schubert's songs stamped her at once as a great interpretative artist, while the exquisitely beautiful quality of her soprano voice gave peculiar charm to all she sang. Soon after her début, she sang Beethoven's 'Ah, perfido!' and Schubert's 'Die Allmacht,' at the Crystal Palace (Feb. 25), and at the same place undertook the soprano solo in the Choral Symphony (Mar. 4, 1889), for which engagements she had in the first instance come to England. In 1891 she went with Sir Charles and Lady Hallé to Australia and took part with them in forty-eight concerts; in 1895 she accompanied these artists to South Africa, singing in twenty-four concerts. From 1904-1912 she taught at the Royal College of Music, Manchester; since when she has lived in retirement in Switzerland. M.

FILTZ (FILS, FILZ, FIELTZ), ANTON (b. (?) Bohemia, c. 1725; d. 1760), was a violoncellist of great renown, and as a composer ranks with the best of the Mannheim symphonists. He entered the court band at Mannheim as violoncellist in 1754. A collection of his symphonies, together with some by Stamitz, was published in Paris soon after his death, another set was published at the Hague, 'The Periodical Overture' in London, and two books of trios in Amsterdam. A Mass for four voices and orchestra is in MS. in the Royal Library at Berlin, and other MS. compositions exist in various libraries (see *Q.-L.*). The themes of thirty-nine symphonies are given in the volume of the *D.D.T.* (2nd series, *Bayern*), iii. 1, which also contains three of the symphonies—one called 'symphonie périodique'—in score. See also *D.D.T.* (2) vii. 2.

BIAL.—R. NONDEHEIMER, *Die formale Entwicklung der vorklassischen Sinfonie*; *A.M.*, Jan. 1922, pp. 93, 94.

FINAL, see *MODES*, ECCLESIASTICAL.

FINALE. The last movement of any work, instrumental or vocal, designed on the plan of several distinct movements grouped together. The most important of these are (1) instrumental works based on sonata-form for whatever combinations of instruments, and (2) opera of the classical era.

(1) The idea that the finale should be of a light character was transferred to the earlier sonatas from the suites which usually ended with a gigue or some equally buoyant dance form. C. P. E. Bach relied on the rondo form principally for his finales; Haydn and Mozart sometimes used the air with variations, but their most typical finales are more or less similar in form to their first movements but of brighter character. The finales of Mozart's 'Jupiter' and Haydn's 'Drum roll' symphonies are outstanding for their combination of fugue with first movement form. With Beethoven came the idea of making the finale not a recreation from the more serious aspects of

thought, but their apotheosis. Brahms and Franck both followed him in this: the latter particularly emphasised this by his habit of reintroducing themes from earlier movements (e.g. symphony in D minor) an example followed by later composers, notably Elgar.

(2) The finale to each act of an opera had its origin in the Italian *Opera Buffa* of the mid-18th century, and was an important feature as long as acts were constructed out of separate movements linked by recitative, or separated by spoken dialogue. From the moment that the finale of the act began the music became a continuous web of airs, concerted numbers and recitative (accompanied by orchestra). Mozart shows the method in its highest development in 'Figaro.' With the adoption of continuous music throughout the act, a method particularly promulgated by Wagner, the finale as a distinct feature disappeared. It remained, however, in all forms of opera with spoken dialogue, and in the two-act form favoured by Sullivan the finale to the first act is always an elaborate structure, while that to the second act is generally a brief recollection of some salient musical idea leading to a quick curtain.

C.

FINAZZI, FILIPPO (b. Bergamo, c. 1710; d. Hamburg, Apr. 21, 1776), a male soprano who appeared at Breslau in 1728, and was until 1737 at the court of Modena. He returned with the impresario Pietro Mignotti from Prague to Hamburg, where he bought an estate, and became the intimate friend of the poet Hagedorn and Baron von Ahlefeld. In 1758 he broke both legs and was nursed by the widow of a smith with such devotion that he married her and left her his fortune. He composed arias, songs, cantatas, symphonies for string quartet, etc. (*Mendel*; *Q.-L.*).

FINCH, HON. AND REV. EDWARD (b. 1664; d. Feb. 14, 1738), fifth son of the first Earl of Nottingham, took the degree of M.A. in 1679, became a Fellow of Christ College, Cambridge, represented the university in Parliament in 1689-90, was ordained deacon in 1700, and became rector of Wigan. He was appointed prebendary of York in 1704, and of Canterbury 1710. He composed several pieces of church music. Of these a Te Deum and an anthem, 'Grant, we beseech Thee,' are included in Tudway's collection of church music (B.M. Harl. MSS. 1337-42). A MS. *Grammar of Thorough-Bass* is in the Euing Library, Glasgow. *Brit. Mus. Biog.* W. H. H.

FINCK, HEINRICH (d. Benedictine Schottenkloster, Vienna, June 9, 1527), passed the earlier years of his life in Poland, and received his education as one of the choristers of the Warsaw Hofcapelle. There is a strong probability of his being the 'Henricus Finck de Bamberg,' a 'bonus cantor,' who is entered as a student at Leipzig, in the Universitäts-Matrikelbuch

(ff. 146) in 1482.¹ He must have returned to Poland, for he held the position of musicus, perhaps also of director in the Hofcapelle under Johann Albert (1492), Alexander (1501) and Sigismund (1506). Soon after he went to Württemberg, as the records of Duke Ulrich's Capelle at Stuttgart for the years 1510-11 state that Kapellmeister Henricus Finck, called the 'Singermeister,' received a yearly salary of sixty gulden, etc. His name appears only until 1513, but he probably remained there until 1519, when Joh. Siess was appointed Kapellmeister² (E. Bienenfeld, *Sammelband* of the *Int. Mus. Ges.* vi. 96).

In Hermann Finck's *Practica musica*, 1556, there are the following references to his great-uncle, Heinrich :

'Extant melodiae, in quibus magna artis perfectio est, compositae ab Henrico Finckio, cuius ingenium in adolescentia in Polonia excolutum est, et postea Regia liberalitate ornatum est. Hic cum fuerit patruus meus magnus, gravissimam causam habeo, cur centem Polonicam praecipue veneri, quia excellentissimi Regis Polonici Alberti, et fratrum liberalitate hic meus patruus magnus ad tantum artis fastigium pervenit.'

'Circa annum 1480 et aliquanto post alii existerunt praecedentibus (musics) longe praestantiores. Illi enim in docenda arte non ita immorati sunt, sed erudite Theoricam cum Practica conjunxerunt. Inter hos sunt Henricus Finck, qui non solum ingenio, sed praestanti etiam eruditione excelluit, durus vero in stylo.'

Heinrich Finck's compositions were printed only twenty years before *Practica musica*, with the title :

'Schöne ausserleue lieder, des hochberühmten Heinrich Finckens, sampt andern neuen liedern, von den fürnemenst dier kunst gesetzet lustig zu singen, und auff die instrument dienstlich. Vor nie im druck ausgegangen. 1536. (In the Tenor partbook only) Gedruckt zu Nuremberg durch Hieronymum Formschneider.'

Four partbooks, obl. 4to, in the Munich Hofbibl. and in Zwickau Ratschschulbibl. Of the fifty-five compositions, the first thirty are by Heinrich Finck ; only six are to sacred words. No. 1, 'Christ ist erstanden,' is for five, the others for four voices. In vol. 8 of the *Publ. älterer prak. u. theoret. Musikwerke*, 1879, Eitner reprints these compositions in score, with the exception of No. 2, 'In Gottes Namen faren wir' (publ. in score by R. Schlecht, *Gesch. der Kirchenmusik*, 1871, Musikbeilage, No. 44) ; No. 11, 'Freu dich du werte Christenheit' (publ. in score by C. v. Winterfeld, *Der evang. Kirchengesang*, 1843, I. Musikbeilage, No. 12) ; and No. 18, 'Ich stund an einem morgen' (publ. in score by R. v. Lilienron, *Die historischen Volkslieder*, 1865, IV. Beilage 7). Eitner notes that there is no Cantus firmus in Finck's secular songs, he composed his own Tenor, only in 'Ich stund an einem morgen' and 'Greiner,

zanner,' does he use the melodies of folk-songs. The German songs, of which 'Ach hertzigs hertz' is a characteristic example, are marked by great freedom of expression, sympathy, and feeling. The motets are more fettered by their century ; although the 'Christ ist erstanden' for five voices is one of Finck's finest pieces of work, as a rule in his sacred music, ingenious handling of the counterpoint outweighs harmonious beauty. This perhaps accounts for Hermann Finck's stricture in *Practica musica* 'durus vero in stylo.'

Compositions in printed works :

1. Ein neu geordnet künstlich Lautenbuch. In zwey Theil getheyilt. Nürnberg. Hansen Newswider. 1536. H. F.'s music in the second part includes 'Ich stund an einem morgen.' (Vogel, Eitner.)
2. Secundus tomus novi operis musici, 6, 5 & 4 vocum. 1538. (Johannes Otio civis Noribergensis.) No. 40. (1.) Magnus es tu Domine, (11.) Tu pauperum refugium, for four voices. Although the music is here attributed to Finck, it is printed in Glareana's *Dodecachordon*, 1547, p. 221, as the work of Josquini des Prés. It was also published by Petrucci in 1504, p. 25, but without the composer's name. Eitner includes it in vol. 8 of the *Publication*, etc., 1879, but says the authorship is doubtful.
3. Trium vocum. Trinius a diversis musicis composita. Nürnberg. Hieron. Formschneider. 1538. No. 22, for three voices, without words.
4. Ein ausszug guter alter und newer Teutscher Liedlein (G. Forster). Nürnberg. Johan Petreli. 1539. No. 7, 'Ach hertzigs hertz' (no composer's name), and No. 87, 'Kuntschaft mit dir' (with composer's name P. Hoffmeyer). They are Nos. 8 & 29 in Finck's *Schöne ausserleue Lieder* for four voices.
5. Der ander Theil, kurzweilliger guter frischer Teutscher Liedlein, Nürnberg. Petrelium. 1540. No. 65, 'Der Ludei und der Heusel' (with composer's name L. Heidenhamer), is No. 10 in *Schöne ausserleue Lieder*.
6. Sacrorum hymnorum Liber primus. Vitebergae. Georg Rhaw. 1542. Twenty-two motets, in which ancient church melodies form the Cantus firmus. Eitner reprinted five of them in *Publication*, etc., 1879, vol. 8.
7. Coenatus 8, 6, 5 & 4 vocum omnium jucundissimus. (Sigis. Salibinger) Augustae Vindellorum. Ph. Uihardus. 1545. No. 23, 'O Domine Jesu Christe,' in seven movements, for four voices. Ambros describes this as an exceptionally beautiful work, the 'seven greetings of the suffering Redeemer' are in fact seven short motets full of deep devotion and feeling ; in the last part two more voices join in a canon in 'Epiphiasan post duo tempora.'
8. Officiorum (ut vocant) de nativitate, etc. Tomus primus. Vitebergae. G. Rhaw. 1545, f. 51, 'Puer natus est nobis' ('Cantate Domino'—Grates nunc omnes reddamus—'Noli oportet ut canamus,' for four voices).
9. Erolemata musices practicae... collecta ab Ambrosio Wilphingero. Noribergae. Chr. J. Neubauer. 1543, p. 160. One musical example from the mass 'Sub tuum praesidium,' for two voices.
10. Suavisimae et jucundissimae harmoniae : 8, 5 & 4 vocum, ex duobus vocibus... Clemente Stephan Buchanense. Noribergae. Th. Geitznerus. 1547. No. 12, 'Dies est laetitia,' for four voices. Reprinted by Eitner in *Publication*, etc., 1879, vol. 8. In MS. : Augsburg Bibl. Codex 142a, one motet for four voices. (Schletterer's Cat. p. 3.)
11. Ein Buch, das stund an einem morgen, for four voices.
12. Berlin konigl. Bibl. Codex Z 21, motets for four voices : 1. Misereatur Dominus, 2. Ave Jesu Christe, 3. Deo dicamus, 4. Gloria laus, 5. Lieber her santh peter. (Eitner.)
13. Breslau Stadtbibl. MS. 94, Introit in four movements : Puer natus est nobis, etc., for four voices (Bohn's Cat.). See above, No. 7.
14. Königsberg Bibl. MS. 4, 24. Four motets, Nos. 43, 63, 89 and 90, for four voices. (Eitner.)
15. Leipzig Universitätsbibl. Codex MS. 1494, Der Mensuralcodex des Magister Nikolaus Aysel von Königshofen. 1504. Described by Dr. Hugo Riemann, *Kirchenmusikliches Jahrbuch*, 1897. Music by Heinrich Finck :—two copies of 'Et adhuc tecum sum' (2nd part), 'Domine probasti me,' for four voices ; and 'Wer yeh ayn falck' for four voices, identical with music in the Berlin MS. Z 21. No. 95, without name of composer, to the last words 'Invicto regi jubilo.' Also five songs for four voices, without text, all intitled H. F.
16. Lübeck Stadtbibl. *Hymni* : No. 91, Fit porta Christi, for four voices, tenor part missing (Stieh's Cat. p. 9). In *Sac. Hym.* 1642, No. 30.
17. Munich Hofbibl. MSS. 42 and 65, two copies of a Missa Dominicalis for four voices ; in MS. 42 a motet for four voices. (Eitner.)
18. Pina Stadtkirche Bibl. MS. Chorbuch, Codex IV., 'Puer natus est : Cantate Domino' and 'Te manent semper' (intituled H. F.) ; Codex V., 'Gee devent' (intituled H. F.), and 'Korarte coeli' ; all for four voices. (Eitner.)
19. Prokeie blachöf. Bibl. 'Missa de beata virgine,' for three voices (publ. in score in Ambros's *Geschichte der Musik*, v. 247, No. 35). Motets for four voices : 1. O Domine Jesu Christe, in seven movements (printed in *Concordia*, 1540, No. 29) ; 2. Nid Dominus, in two movements. For five voices : 1. 'Christus resurgens, 2. Et valde magna, 3. Illuminare Hierusalem, 4. Ite in orbem, 5. Petre amas me, 6. Verbum caro. For five and six voices : Beati ecclesii, and, in four movements. For seven voices : Reple tuorum corda. (Eitner.)
20. Vienna (Hofbibl.) MS. 19, 242, No. 58 'O Domine Jesu Christe,' motet for four voices ; MS. 18, 810, No. 24, 'Greiner, zanner,' for five voices. (Mantuan's Cat.)
21. Zwickau Ratschschulbibl. MS. 4. Motets for five voices : 1. Apparuerunt apostoli, in two movements ; 2. Felix natusque, in three

¹ Monatshefte, 1890, p. 139.

² Bittard, *Zur Gesch. der Musik am Württemb. Hofe*, 1890, p. 8.

³ P. 4 of dedication : 'There are melodies composed by Heinrich Finck which show great skill. As a youth he received his education in Poland, and by royal liberality was afterwards enabled to continue it. Since Heinrich Finck was my great-uncle, I have very great cause to venerate the Polish nation, for the height to which he attained in his art was owing to the liberality of the most excellent Polish King Albert and his brothers.'

⁴ Ch. l. p. 3 : 'About and soon after 1480 musicians appeared far superior to their predecessors, who did not give so much time to teaching the art, but skillfully combined theory with practice. Among these were (others) and Heinrich Finck, who excelled not only in talent, but in learning. He was, however, hard in style.'

movements; 3. *Illuminare Hierusalem*, in three movements; 4. *“erbum caro*, in three movements. *M.S. 16*. For four voices (altus part missing); 5. *De Evangelista* (an Alleluia and Prose in ten sections); 6. *Apparuit gratia dei*, in two movements; 7. *Ave praeclara maris stella*, in six movements; 8. *Discubuit Jesus*, in three movements; 9. *Salve rex misericordie*, in nine movements; 10. *Veni creator spiritus*. For four and six voices: O Domine Jesu Christe, in seven movements (see above). For five voices: *Ecco Maria genuit*, in two movements. For six voices: *(Grates nuno omnes reddamus, Hic oportet ut canamus.* (Vollhardt's *Out.*)

C. S.

FINCK, HENRY THEOPHILUS (b. Bethel, Missouri, U.S.A., Sept. 22, 1854), American critic and essayist. He graduated in 1876 at Harvard College, where he was a pupil of John Knowles Paine in musical subjects, and gained honours in philosophy. He studied psychology in Berlin, Heidelberg and Vienna, and while in Europe corresponded for several American periodicals, among other things giving an account of the first Wagner Festival in Bayreuth in 1876. On his return to America he became musical critic of the *Evening Post* of New York, resigning in 1924. In this capacity he was a strong supporter of Wagner and of many other modern composers when there was conflict over their place in art. He has written numerous books on musical and other subjects (including primitive love, foods and diet). Among his musical books are:

Chopin and other Musical Essays. (1899.)
Wagner and his Works. (2 vols., 1893.)
Padewski and his Art. (1895.)
Songs and Song Writers. (1900.)
Grieg and his Music. (1909.)
Success in Music. (1909.)
Messnet and his Operas. (1910.)
Richard Strauss. (1917.)

R. A.

FINCK, HERMANN (b. Pirna, Saxony, Mar. 21, 1527; d. Dec. 28, 1558), probably received his early education as a member of the Hofcapelle of King Ferdinand of Bohemia. He is entered as a student at Wittenberg University, Sept. 1545, in the Album Academiae Vitebergensis, 1502-60, edited by Förstemann, 1841.¹ On June 1, 1554, the Rector of the University formally announced that Hermann was at liberty to give instruction in music to the University students.² That he remained there, and was appointed organist in 1557, may be gathered from a statement made by Nicolas Selnecker in a work published in 1581.³ Selnecker explains that in 1557, the organistship being vacant, at the request of the Praeceptores, he filled it for a month. Then through court influence Hermann Finck was appointed to the post, 'der bald hernach elendiglich und jemerlich zu Wittenberg gestorben' (who soon after miserably died in Wittenberg). He may have stated this on the authority of Johannes Garcaeus, *Astrologiae methodus Basiliae*, 1570, 'Hermannus Finckius Pirnensis. Insignis hic fuit Musicus et Organista, miserrime subitanea morte extinctus est. Nascitur 21 mart. 1527, etc.' But the suggestion is negated by the discovery of the date of Hermann's death made by Förstenau, in the Wittenberg Uni-

versity records,⁴ where it states that he died peacefully on Dec. 28, 1558, 'auf fromme Weise aus diesem Leben geschieden ist.'

The important theoretical work by which Hermann Finck's name is best known is entitled:

Practica musicae Hermannii Finckii, exempla variorum signorum, proportionum et canonum, Judicium de tonis, ac quaedam de arte suaviter et artificiose cantandi continens. Vitebergae excudebant Haeredes Georgii Rhaw. 1556.

In one volume, 4to. In British Museum, etc. The dedication is to the Count Gorca, and shows that Hermann must have visited Poland and been hospitably received by the Gorca family, to whom he expresses a warm sense of gratitude:

'Itaque in editione huius operis, praecipue ad Celitudinem vestrum scripsi, ut ostenderem me beneficiorum memoriam, quae in meam familiam a Regibus et Principibus Polonicis collata sunt, perpetua gratitudine et retinere et celebrare. Fuit eximia erga me quoque liberalitas Celitudinis tuae Illustris Domine Stanislae. Quare et fratrum et tui nominis mentionem hic feci, et vobis hoc opus dedico, ut gratitudinem meam et observantiam erga vos perpetuum ostendam.'

The work is divided into five books. The first book 'De musicae inventoriis' is of some historical interest owing to its mention of contemporary musicians (see Heinrich Finck) and to the light it throws on the musical taste of that time. A long quotation from pp. 2, 3, 4 is given in the *Dict. Hist.* (Choron et Fayolle) with a French translation. In the third book 'de canonibus' are numerous examples of canons: 'Clama ne cesses,' four voices: 'Misericordia & Veritas,' Bassus & Tenor; 'Justicia et pax,' Discant & Altus; 'Gaude cum gaudentibus,' four voices; 'Qui se humiliat, exaltabitur'—'Languir me fais,' four voices; and 'Le désir croist quant et quant l'esperance'—'Amour parfaict m'a donné hardiesse,' four voices, with the French words. A German translation of the fifth book 'De arte eleganter et suaviter cantandi,' with music, was published in *Monatshefte*, 1879, p. 129, etc. Finck was a composer of some note. Few of his works are in existence, but they show that he was distinctly in advance of his time, both in form and in expression. Eitner included three compositions in the *Publication älterer prakt. und theoret. Musikwerke*, 1879, vol. 8: 'Pectus ut in sponso' in three sections, for four voices; 'Semper honorabile' in two sections, for five voices, both wedding hymns; and the motet for five voices, 'Christ ist erstanden,' part 1, which it is interesting to compare with that composed by Heinrich Finck at a much earlier date. The score was carefully reconstructed by Otto Kade from a very defective MS. Chorbuch in the Pirna Stadtkirche Bibl. Codex VII. (date, 1556); the last two movements of the motet were almost entirely destroyed.

Compositions:

1. Melodia epithalamii . . . Johanno Friderico II Ducl Saxoniae . . . composita ab Hermanno Finck Pirnensi. Quinque vocum.

⁴ *Scriptorium publico*, Vitebergae, 1559-62; See *Monatshefte*, 1879, p. 68.

¹ See extract in *M. f. M.*, 1878, p. 54.

² Förstenau, *Monatshefte*, 1879, p. 11.

³ Erk, *Monatshefte*, 1879, p. 68.

Vitebergae exonus, typis haeredum Georgii Rhaw. 1555. Five part-books, obl. 4to. Text: 'Amore flagrantissimo sponsam,' and—Melodia epithalamii . . . Henrico Faxmanno . . . composita ab Herm. Finck Pimencil. Quatuor vocum. Vitebergae. 1555. Four part-books obl. 4to. Text: 'Pectus ut in sponsa,' by Philip Melancthon. In the Liegnitz königl. Ritter-Academie Bibl. (Pfudel's Cat.).

2. *Melodia epithalamii . . . Johannis Schrammli . . . composita a Herm. Finck. Quinque vocum. Vitebergae. Haeredes J. Rhaw. 1557. Text: 'Semper honorabile.' Five part-books, obl. 4to. In the Brief Gymnasialbibl. (Kuhn's Cat.).*

3. *Ein schöner geistlicher Text: 'Was mein Gott wil: das gewelicht allezeit,' etc., von . . . Albrechten Marggraven zu Brandenburg . . . selber gemacht. Und, wie folget, auff vierley Art componiret durch Herm. Finck Muscun. Discantus primus, anno 1558, 4to. This is, so far as is known, the only voice part in existence; it is in a miscellaneous volume in the Weimar grossherzogl. Bibl. The Dedication is signed by Finck, Muscun, 'Wittenberg, den 25 Dec. anno 1557.' (Eitner, *Publication*.)*

Eitner mentions that in the Proske bischöfl. Bibl. *MS. 940* (1557), four part-books, obl. 4to, there is a student's drinking-song for four voices by Herm. Finck, No. 169, 'Sauff aus und machs nit lang,' etc. C. S.

FINE (Ital. 'end') is generally placed above the stave at the point where the movement ceases after a 'Da Capo' repetition. Its place is occasionally taken by a pause (see FERMATA). It is often found, too, at the end of works which finish on the right-hand page (*recto*), and is placed there, apparently, in order to warn imperfectly trained musicians that it is not worth while to turn over the last page.

FINE, ORONCE (*b. Briançon, 1494; d. Paris, Oct. 6, 1555*), studied at the Collège de Navarre, was appointed professor of mathematics at the Royal College by Francis I. in 1530, and remained in that position until his death. He deals with music in his works *Protomathesis* (1532) and *De rebus mathematicis* (1556). He was an excellent lutenist and wrote *Tres breve et familiere introduction par entendre et apprendre par soy mesmes a jouer toutes chansons reduictes en la tablature de luthie . . .* (1529); *Epithema musica instrumentalis . . .* 1530 (*Fétis; Q.-L.*).

FINGER, GOTTFRIED (GODFREY), a native of Olmütz in Moravia, came to England about 1685, and enjoyed the patronage of James II. In 1688 he published 'Sonatae XII. pro diversis instrumentis. Opus primum,' and in 1690 'Six Sonatas or Solos, three for a violin and three for a flute.' In 1691, in conjunction with John Banister, he published 'Ayres, Chacones, Divisions and Sonatas for Violins and Flutes,' and shortly after joined Godfrey Keller in producing 'A Set of Sonatas in five parts for flutes and hautboys.' He subsequently published other sonatas for violins and flutes. In 1693 Finger composed the music for Theophilus Parsons' Ode for the annual celebration of St. Cecilia's Day. In 1696, in conjunction with John Eccles, he composed the music for Motteux's masque, 'The Loves of Mars and Venus,' and in the same year for Motteux's comedy, 'The Anatomist, or, The Sham Doctor,' and (with D. Purcell) that for N. Lee's 'Rival Queens.' In 1701 he set to music Elkanah Settle's opera, 'The Virgin Prophetess, or, The Siege of Troy.' In the previous year he was awarded the fourth prize for the composition of Congreve's masque, 'The Judgment of Paris,' the others being given to

John Weldon, John Eccles and Daniel Purcell. Finger was so displeased at the ill reception of his composition that he quitted England and returned to Germany, where in 1702 he obtained the appointment of chamber musician to Sophia Charlotte, Queen of Prussia, and lived for some years at Breslau. Whilst at Berlin he was said to have composed two German operas, 'Sieg der Schönheit über die Helden' and 'Roxane,' both performed in 1706. The latter is very possibly by Telemann. (See *D.N.B.*) In 1717 he became Kapellmeister at the court of Gotha, and in Mar. 1718 is mentioned by Walter as part-composer of the opera 'L'amicizia in terzo.' His name occurs in a list of 1723. Nothing is known of his subsequent career. Besides the above-mentioned compositions Finger wrote instrumental music for the following plays—'The Wives' Excuse,' 1692; 'Love for Love,' 1695; 'The Mourning Bride,' 1697; 'Love at a Loss,' 'Love makes a Man,' 'The Humours of the Age,' and 'Sir Harry Wildair,' 1701. Some concertos and sonatas are mentioned in *Q.-L.* W. H. H., with addns.

FINGERBILDNER, the invention of Christian Friedrich Seeber, is in some sort an improvement on the Chiroplast (see LOGIER), its chief peculiarity being a small apparatus worn on each finger in order to fix its joints in the right position. M.

FINGER-BOARD, that part of the violin and other stringed instruments over which the strings are stretched, and against which the fingers of the left hand of the player press the strings in order to produce sounds not given by the open string.

(1) VIOLIN.—The finger-board of the violin is best made of ebony, as harder and less easily worn out than any other wood. Its surface is somewhat curved—corresponding to the top line of the bridge, but not quite so much—in order to allow the bow to touch each string separately, which would be impossible if bridge and finger-board were flat. On an average-sized violin it measures 10½ inches in length, while its width is about 1 inch nearest to the head of the violin and 1½ inch at the bridge-end. It is glued on to the neck, and extends from the head to about three-fourths of the distance between the neck and the bridge. At the head-end it has a slight rim, called the *NUT* (*q.v.*).

The finger-board, getting worn by the constant action of the fingers, must be renewed from time to time. The modern technique of violin-playing requires the neck, and in consequence the finger-board, to be considerably longer than they were at the time of the great Cremona makers. For these reasons we hardly ever find an old instrument with either the original finger-board, bridge, sound-post, or bass-bar, all of which, however, can be made just as well by any good violin-maker now living as by the ancient masters.

(2) VIOLONCELLO.—The finger-boards of the Violoncello and Double-bass are made on the same principle as that of the violin, except that the side of the finger-board over which the lowest string is stretched is flattened in order to give sufficient room for its vibration. Spohr adopted a somewhat similar plan on his violin by having a little scooping-out underneath the fourth string, which grew flatter and narrower towards the nut.

In the instruments of the older viola-, gamba-, and lyra-tribe, the finger-board was provided with FRETTS (*q.v.*).

P. D.

FINGERING (Fr. *doigte*; Ger. *Fingersatz*, *Applicatur*), the method which governs the application of the fingers to the keys of any keyed instrument, to the various positions upon stringed instruments, or to the holes and keys of wind instruments, the object of the rules being in all cases to facilitate execution. The word is also applied to the numerals placed above or beneath the notes, by which the particular fingers to be used are indicated.

(1) FINGERING OF THE PIANOFORTE (that of the organ, though different in detail, is founded on the same principles, and will not require separate consideration).

In order to understand the principles upon which the rules of modern fingering are based, it will be well to glance briefly at the history of those rules, and in so doing it must be borne in mind that two causes have operated to influence their development—the construction of the keyboard, and the nature of the music to be performed. It is only in comparatively modern times, in fact since the rise of modern music, that the second of these two causes can have had much influence. The form and construction of the keyboard, on the other hand, must have affected the development of any system of fingering from the very beginning, and the various changes which took place from time to time are in fact sufficient to account for certain remarkable differences which exist between the earliest rules of fingering and those in force at the present time. Until the latter half of the 16th century there would appear to have been no idea of establishing rules for fingering; nor could this have been otherwise, for from the time of the earliest organs, the keys of which were from three to six inches wide, and were struck with the closed fist, down to about the year 1480, when, although narrower, the octave still measured about two inches more than on the modern keyboard, any attempt at fingering in the modern sense must have been out of the question. The earliest marked fingering of which we have any knowledge is that given by Ammerbach in his *Orgel oder Instrument Tabulatur* (Leipzig, 1571). This, like all the fingering in use then and for long afterwards, is characterised by the almost complete avoidance of the use of the thumb and little finger,

the former being only occasionally marked in the left hand, and the latter never employed except in playing intervals of not less than a fourth in the same hand. Ammerbach's fingering for the scale is as follows, the thumbs being marked 0 and the fingers with the first three numerals:

Right Hand.

Left Hand.

This kind of fingering, stiff and awkward as it appears to us, remained in use for upwards of a century, and is even found as late as 1718, in the third edition of an anonymous work entitled *Kurzer jedoch gründlicher Wegweiser*, etc. Two causes probably contributed to retard the introduction of a more complete system. In the first place, the organ and clavichord not being tuned upon the system of equal temperament, music for these instruments was only written in the simplest keys, with the black keys but rarely used; and in the second place the keyboards of the earlier organs were usually placed so high above the seat of the player that the elbows were of necessity considerably lower than the fingers. The consequence of the hands being held in this position, and of the black keys being but seldom required, would be that the three long fingers, stretched out horizontally, would be chiefly used, while the thumb and little finger, being too short to reach the keys without difficulty, would simply hang down below the level of the keyboard.

But although this was the usual method of the time, it is highly probable that various experiments, tending in the direction of the use of the thumb, were made from time to time by different players.¹ Thus Praetorius says (*Syn-tagma musicum*, 1619):

Many think it a matter of great importance, and despise such organists as do not use this or that particular fingering, which in my opinion is not worth the talk; for let a player run up or down with either first, middle or third finger, aye, even with his nose if that could help him, provided everything is done clearly, correctly and gracefully, it does not much matter how or in what manner it is accomplished.

Couperin, in *L'Art de toucher le clavecin* (Paris, 1717), gives numerous examples of the employment of the thumb. He uses it, however, in a very unmethodical way; for instance, he would use it on the first note of an ascending scale, but not again throughout the octave; he employs it for a change of fingers on a single note, and for extensions, but in passing it under the fingers he only makes use of the first finger, except in two cases, in one of which the second finger of the left hand is passed over the thumb,

¹ The evidence of picture and sculpture makes this certain, particularly with regard to playing on the small portable organs. Luca della Robbia's bas-relief in the musicians' gallery at Florence (early 15th cent.) shows a child playing such an instrument with his whole hand over the keyboard, and apparently in the act of using the thumb. An angel carved on the choir stalls of Lincoln Cathedral is playing a similar instrument in exactly the same way, and is clearly represented using the little finger. c.

and in the other the thumb is passed under the third finger, in the very unpractical fashion shown in the last bar of the following example, which is an extract from a composition of his entitled 'Le Moucheron,' and will serve to give a general idea of his fingering.

About this time also the thumb first came into use in England. The instructions for fingering in Henry Purcell's *Choice Collection of Lessons for the Harpsichord*, published 1696-99, employ it in a very tentative manner, using it only once throughout a scale of two octaves, as follows :

Right Hand (thumb numbered 1).

Left Hand (thumb numbered 5).

Contemporary with Couperin we find J. S. Bach, to whose genius fingering owes its most striking development, since in his hands it became transformed from a chaos of unpractical rules to a perfect system, which has endured in its essential parts to the present day. Bach adopted the then newly invented system of equal temperament for the tuning of the clavi-chord, and was therefore enabled to write in every key ; thus the black keys were in continual use, and this fact, together with the great complexity of his music, rendered the adoption of an entirely new system of fingering inevitable, all existing methods being totally inadequate. Accordingly, he fixed the place of the thumb in the scale, and made free use of both that and the little finger in every possible position. In consequence of this the hands were held in a more forward position on the keyboard, the wrists were raised, the long fingers became bent, and therefore gained greatly in flexibility, and thus Bach acquired such a prodigious power of execution as compared with his contemporaries, that it is said that nothing which was at all possible was for him in the smallest degree difficult.

Our knowledge of Bach's method is derived from the writings of his son Emanuel, who taught it in his *Versuch über die wahre Art das Clavier zu spielen*. But it would not be safe to conclude that he gave it literally and without omissions. At any rate there are two small pieces extant, the marked fingering in which is undoubtedly by J. S. Bach himself, and yet differs in several respects from his own rules as given by his son. These pieces are to be found in the 'Clavierbüchlein,' and one of them is also published as No. 11 of 'Douze petits préludes,' but without Bach's fingering. The other is here given complete :

In the above example it is worthy of notice that although Bach himself had laid down the rule that the thumb in scale-playing was to be used twice in the octave, he does not abide by it, the scales in this instance being fingered according to the older plan of passing the second finger over the third, or the first over the thumb. In the fifth bar again the second finger passes over the first—a progression which is disallowed by Emanuel Bach.

The discrepancies between Bach's fingering and his son's rules, shown in the other piece mentioned, occur between bars 22 and 23, 34 and 35, and 38 and 39, and consist in passing the second finger over the first, the little finger under the third (left hand), and the third over the little finger (left hand also).

From these discrepancies it would appear that Bach's own fingering was more varied than the description of it which has come down to us, and that it was free in the sense not only of employing every possible new combination of fingers, but also of making use of all the old ones, such as the passing of one long finger over another. Emanuel Bach restricts this freedom to some extent, allowing for instance the

The image displays six musical staves, each representing a different bar of music. Each staff is divided into two parts: the right hand (treble clef) and the left hand (bass clef). Fingerings are indicated by numbers 1 through 5 above the notes. Bar 22 shows a sequence of notes with fingerings 1, 2, 3, 4, 5 in the right hand and 5, 4, 3, 2, 1 in the left. Bar 23 continues this pattern. Bar 34 and 35 show more complex fingerings, including some with 'x' marks indicating a thumb position. Bar 38 and 39 show further variations in the fingering patterns across the staves.

passage of the second finger over the third, but of no other long finger. Thus only so much of Bach's method has remained in practical use as Emanuel Bach retained, and as was absolutely essential for the performance of his works.

Emanuel Bach's fingering has been practically that of all his successors until almost recent times; Clementi, Hummel and Czerny adopted it almost without change, excepting only the limitation caused by the introduction of the pianoforte, the touch of which requires a much sharper blow from the finger than that of the clavichord or harpsichord, in consequence of which the gentle gliding of the second finger over the third, which was allowed by Emanuel Bach, has become unsuitable, and is now rarely used.

In the teaching of all the above-named masters, one principle is particularly observed, —the thumb is not used on a black key except (as Emanuel Bach puts it) 'in cases of necessity,' and it is the abolition of this restriction which forms the latest development of fingering. Chopin and Liszt, by their invention of novel passages and difficulties, did once more for the thumb what Bach did for it, and just as he redeemed it from a condition of uselessness, so they freed its employment from all rules and restrictions whatsoever. (Cf. CHOPIN'S TEACHING, Vol. I. p. 634.) Hummel, in his *Art of Playing the Pianoforte*, says:

'We must employ the same succession of fingers when a passage consists of a progression of similar groups of notes. . . . The intervention of the black key changes the symmetrical progression so far only as the rule forbids the use of the thumb on the black keys.'

But the modern system of fingering would employ absolutely the same order of fingers throughout such a progression without considering whether black keys intervene or no.

Many examples of the application of this principle may be found in Tausig's edition of Clementi's 'Gradus ad Parnassum,' especially in the first study, a comparison of which with the original edition (where it is No. 16) will at once show its distinctive characteristics. That the method has immense advantages and tends greatly to facilitate the execution of modern difficulties cannot be doubted, even if it but rarely produces the striking results ascribed to it by Von Bülow, who says in the preface to his edition of Cramer's Studies, that in his view (which he admits may be somewhat chimerical), a modern pianist of the first rank ought to be able by its help to execute Beethoven's 'Sonata Appassionata,' as readily in the key of F# minor as in that of F minor, and with the same fingering!

There are two methods of marking fingering, one now used in England alone (though not by any means exclusively), and the other in all other countries. Both consist of figures placed above the notes, but in the 'English' system the thumb is represented by a \times , and the four fingers by 1, 2, 3 and 4, while everywhere else the first five numerals are employed, the thumb being numbered 1, and the four fingers 2, 3, 4 and 5. This plan was probably introduced into Germany—where its adoption only dates from the time of Bach—from Italy, since the earliest German fingering (as in the example from Ammerbach quoted above) was precisely the same as the present 'English' system, except that the thumb was indicated by a cypher instead of a cross. The same method came into partial use in England for a short time, and may be found spoken of as the 'Italian manner of fingering' in a treatise entitled *The Harpsichord Illustrated and Improv'd*, published about 1740. It was adopted in Purcell's *Choice Collection* quoted above, but with the bewildering modification that whereas in the right hand the thumb was numbered 1, and so on to the little finger, in the left hand the little finger was called the first, and the thumb the fifth. The system (1, 2, 3, 4, 5) which is, rightly or wrongly, known as the 'continental,' has now been widely adopted by English publishers, so that there is more unanimity in the present day than formerly.

F. T.

(2) FINGERING OF STRINGED INSTRUMENTS

VIOLIN.—Before dealing with the fingering of the violin it is necessary to explain that the four strings on a violin are numbered from right to left, the highest string E always being known as the 1st string, the second string A, the 3rd string D and the 4th string G, descending by a perfect fifth from one string to another. A string is said to be 'open' when no finger is used to 'stop' it.

In the case of the stringed instruments, then, fingering means the exact placing of the fingers

upon the strings in the order that musical notes are to be made. This order first suggests a scale, as the fingers follow from first to second, second to third, third to fourth, and so on. In violin-fingering, the position and carriage of the hand are of the greatest importance; the thumb should be underneath the violin neck below the first and second fingers, the tip bent outwards, the neck resting on the thumb near its first joint; the thumb will then give the necessary counter-pressure to the force of the fingers. The violin should be held between the chin and the collar-bone, firmly, but without too much pressure, and gripped enough to allow the left hand perfect freedom of movement when moving from one position to another.

If the left hand is in the correct position it ought to be possible to place the fingers in order 1, 2, 3 and 4, the 1st finger on the 1st string, the 2nd on the 2nd string, the 3rd on the 3rd string and the 4th on the 4th string, and then reverse them, i.e. the 1st on the 4th string, the 2nd on the 3rd string, the 3rd on the 2nd string and the 4th on the 1st string, without any movement of the hand beyond a finger movement.

There are seven positions in which the fingers travel across the four strings. In the 1st position the fingers begin (not counting the open G string) with the 1st finger on the low A, the highest note being B, the 4th finger on the E string. If we move the hand forward the distance of a whole tone, the 1st finger will now be on B on the G string, and the highest note belonging to this position will be C on the E string. This is called the 2nd position. Then, if we advance the note from B to C on the G string and proceed as before to the highest note D on the E string, it will be in the 3rd position. Similarly, if the 1st finger travels to D, E, F and G, the position of the hand will now be called the 4th, 5th, 6th and 7th positions respectively.

It is of course necessary constantly to move from one position to another for a more convenient or more effective disposition of the fingers in a passage. This movement is called the 'shift,' and when making a shift, i.e. changing the position, the entire hand should go in one movement, and to avoid an unpleasant glissando it is necessary to arrange that the finger that is going to play the note in the new position should strike the string and not slide to it; the finger that has already played the last note is the one which finds the new position. If this movement is managed correctly it should be possible to play a scale

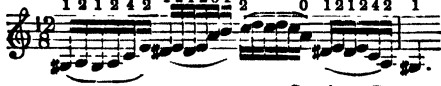

from the bottom of the violin to the top and back without the ear detecting any change of position whatever. One important rule in fingering is to avoid making a shift or change of position on two consecutive notes. However involved or complicated a passage may be, it is nearly always possible to play at least two notes in a position before proceeding to another (except in playing scale passages in octaves).

For the same reason it is advisable in scale playing not to leave all the changing of the positions until the fingers arrive at the E string. It is better to make the first change of position before leaving the A string.

The difficulty of the beginner in the early stages of violin-playing is so to train the fingers as to ensure accurate intonation. This difficulty arises from the fact that in all diatonic scales the distances from one note to another (i.e. intervals) are not exactly the same but consist

or even three notes beyond its natural place in that position. These extensions are used to save unnecessary shifting. There is one other position of the hand which it is necessary to describe. This is the position that lies behind the 1st position, known as the half position. It is used to avoid the unnecessary forward and back movement of the first finger in passages that contain the two lowest semitones on each string.

$\frac{1}{2}$ position..... 1st position $\frac{1}{2}$ position....

 Caprice. RODE.

 1st position.

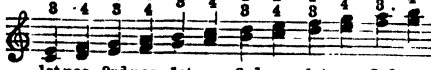

In changing positions the usual method is to proceed from the 1st to the 3rd, to the 5th to the 7th, etc., or from the 2nd to the 4th to the 6th, as this is the natural movement of the hand. At the same time it is necessary to know any position change, as 1st to the 2nd, 2nd to the 3rd, 3rd to the 4th, etc.; 1st to the 4th, 1st to the 5th, or 1st to the 7th or anything beyond that, as many higher positions than the 7th are used constantly up individual strings. In extremely high positions, 11th or 12th, it would not be practicable to play across the four strings without descending to a lower position as the passage descends.

Double Stopping.—This means the simultaneous stopping of two strings as in scales in thirds, sixths, octaves and tenths. It will be seen that it is necessary to change the position more frequently when playing a scale in thirds than when playing a scale in single notes. In C major the first and third fingers on the lower strings are played simultaneously, and the second and fourth; it is then necessary to proceed to the third position and play the first and third and second and fourth again; then return to the first position on the two middle strings and proceed as before. In scales in sixths we have a new movement, as the fingers must proceed from one string to another without lifting (lateral movement).

Observe that the finger that stops the upper note of the 6th proceeds by the interval of a 5th to the string below to stop the lower note of the succeeding Cth.

In the scale in octaves the ordinary method employed is to change the position for each octave played by the first and fourth fingers

 0 1 2 1 2 1 2 1 2

Octaves can also be played with the 1st and 3rd, and 2nd and 4th fingers alternately. This, however, necessitates a considerable stretch and is difficult; when mastered, however, it is possible to play passages in octaves with great rapidity. By the use of this method of fingering it is possible to play the 'Moto Perpetuo' of Paganini throughout in octaves, as has been done as a *tour de force* by virtuosi.

Tenths are difficult to execute, because the fourth finger must make a double extension, the fourth finger being required to stretch two more notes than an octave, which is the natural position of that finger. The chief difficulty in playing double stopping, apart from the simultaneous movement of the fingers, is to play the two notes perfectly in tune in spite of the constant change in a scale passage of the size of the interval; e.g. major and minor thirds, major and minor sixths, perfect or augmented fourths, and in fact all chromatic intervals. All these necessitate adjustment. In chord playing on three or four strings it is necessary to find simultaneously three different spacings by three different fingers, or in the latter case of four different fingers in any order. This requires a great deal of practice to attain accuracy.

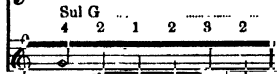

From Violin Concerto. ELGAR.

 con forza.

Harmonics.—In all fingerings already dealt with, the finger that stops the string does so by pressing firmly upon it. To obtain a harmonic, however, it is necessary to adopt an extremely light touch of the finger touching the string. If we touch the string at exactly half-way between the nut and the bridge we obtain the octave of the string's natural pitch; if at the quarter (lightly), we get a double octave of the fundamental note; if at the third, we get the twelfth of the fundamental note; if at the fifth or two-fifths, we get a third higher than the double octave in both cases. If we touch it at a sixth we get a fifth higher than the double octave. These are all the natural harmonics for practical use. It is possible, however, to play any note on a violin as a harmonic higher than the octave G, though the low A, B, C are all extremely difficult, as they require an abnormal stretch of the fourth finger. Artificial harmonics are produced by one finger stopping the string normally (with pressure) while another one touches the same string at the interval or a third, fourth, fifth or octave respectively to produce a harmonic of the required pitch.

3rd position.....

..... 1st position.....

The passage above from a study by Sauret can be played throughout in the *first* position by the use of the various kinds of harmonics, with the astonishing results seen in the upper line.

The interval of an octave as stated above is extremely difficult to stretch on one string in the lower positions, but quite practicable in the higher positions. The following are a few passages to illustrate the different methods of fingering. W. H. R.

VIOLA.—As far as technique is concerned the viola is simply a larger violin, with four strings tuned a fifth lower than those of the violin, thus:

Its method of fingering is precisely similar to that of the violin.

VIOLONCELLO.—Besides the differences in size and length of hands and fingers, there are some other influences which modify the fingering in general use, such as: the strength of the fingers; their stretching capacity, as gained by practice; the example of the teacher; the course adopted as to the kind of studies; and the inevitable tendency towards what gives the least trouble. All complicated fingering, therefore, will be more or less individual, and will vary according to the ability, the experience and taste of the player. The fingering of the violoncello was originally taken from that of the violin, as that of the viola da gamba was obviously not suitable, owing to the smaller intervals between the pitch of its seven strings. The principle of the present system is the normal distance of a semitone between two adjacent fingers. The interval of a whole tone is taken, either by leaving out one finger, which is kept in reserve for the semitone, or by the first and second fingers only (as in the A flat and E major scales, see below), very seldom by the second and third, or third and fourth fingers. The first and fourth fingers, therefore, take the interval of either a minor or a major third, in the 'normal' and 'extended' positions of the hand respectively. Large hands may even take a fourth.

According to the oldest school, Corrette, 1741, the fingering for the diatonic scale was—

1st position	1 2 4	3rd position	1 2 3 4
2nd "	1 2 4	4th "	1 2 3

The thumb acts as a moveable saddle in the higher positions, being placed across two strings. It was early in use for this purpose, but up to the end of the 18th century the fourth finger was not employed in the thumb-positions, being considered too weak. With the help of the thumb, thirds and octaves, fifths, sixths, and even tenths can be easily played, as the thumb affords a firm hold on the strings. It could be as easily used in the lower positions.

The positions, as shown in the following table, contain of course in each case either a normal position of the hand or an extended position, as referred to above.

THE SEVEN POSITIONS WITH THE HALF-POSITIONS.

This generally recognised table of the positions is based on the principle that each step of the C major scale on the first string, beginning with A, is a full position, and each accidental a half position. Davidov and Schroeder place the positions in accordance with the major scale of each string, the principle being uniformity of all positions on all four strings, the positions of the C major scale on the lowest string forming the basis.

The fingering of the scale of C is as follows:

Higher up, in some scales (G, D, A, F, B \flat) from the fourth position upwards, the first and second fingers are used alternately, each scale of three or four octaves closing with 1 2 3. This system applies to all scales starting from the first position. Scales starting from another position have their fingering based on the three-finger system.

the thumb being reinforced by the weight and muscles of the whole hand; (2) the fingers fall more naturally into the normal position to play the four notes of the tetrachord (example above); (3) the fingers have more hitting power without the need of raising them high. This position is somewhat modified in very high and very low thumb positions. In descending scale

passages such as

greatly improved articulation can be obtained by slightly pulling the string with each finger (left hand *pizzicato*). Many instances of this device occur in brilliant solos, e.g. the 'Airs Baskyr' of Piatti. In the sonata in E minor, first movement by Brahms, the passage

is executed by

sliding up to the E flat on the second string and 'pulling' the string violently (*pizzicato* left hand) for the open D. Another instance in illustration of this occasional device of 'pulling' the string is in the 'Stücke in Volkston' of Schumann, No. 4 in D.

etc. The open

A string is plucked through the entire passage, which gives it clearness and quick speech, otherwise unobtainable.

Many fine violinists and violoncellists have suffered from what may be called a too sensitive nerve in the finger tips (usually produced by over-practising), which causes a pain like toothache in the finger when it presses, or even touches, the string. Lady Hallé, Caesar Thompson, Piatti and many others suffered from it. The best cure at present known is to put the fingers into water as hot as can be borne for a few minutes and then immediately to plunge them into cold water—several times a day.

W. E. W.

DOUBLE BASS.—In modern double-bass playing the instrument is tuned in 4ths

thus

actual sounds

The 3-string double bass has entirely gone out of use, but the 5-string bass is used in some orchestras. The 5th string is tuned to C, a major 3rd below the 4th string, on the Continent, but in England it is more often tuned to B, a semitone lower, thus keeping the tuning of the instrument in 4ths throughout.

With regard to the fingering, the French and German methods are not unlike, the German method having 7 positions with a half position and 4 intermediate positions, and the French method 8 positions or 14 degrees.

Major second intervals (1 tone) are fingered in the first 5 positions from the 1st to the 4th finger. The space between these two fingers is very wide in the 1st positions and diminishes in each successive position.

From the 6th position major seconds are fingered from the 1st to the 3rd finger.

Minor second intervals ($\frac{1}{2}$ tone) are fingered till the 5th position from the 1st to the 2nd finger and from the 6th position from the 1st to the 2nd finger and from the 2nd to the 3rd.

FRENCH METHOD

A major second from the 1st to the 4th finger constitutes a degree of the division of the neck, and it is impossible to perform a position without displacing the hand a semitone; a position occupies in consequence two degrees thus:

1st degree.

2nd degree.

18th degree.

and so on to the 18th and 14th degree, 8th position.

14th degree.

GERMAN METHOD

**Intermediate position between
2nd and 3rd positions.**

7th position.

The thumb is brought into use for the high positions at the 7th position thus :

The following is an example of the fingering of a chromatic scale :

The best-known masters of the French method are C. Labro and E. Nanny of the Paris Conservatoire.

The best-known German method is by Franz Simandl, professor of the Vienna Conservatoire, and this is the one most used in England, although there are players who favour the French method. C. H.

(3) FINGERING OF WIND INSTRUMENTS.—The fact that the natural harmonic scale, or series of notes (referred to below as H.S.), although utilised in different ways, must be regarded as the basis of the intonation of all wind instruments, is briefly dealt with under WIND INSTRUMENTS, but a slightly more extended, although necessarily limited view of the scale fingering of all such instruments as have side-holes is here given. (For the scale schemes of brass instruments generally, see HORN, TROMBONE and VALVE.)

The simplest basis for consideration is an instrument bored with six finger-holes as the common fife or flute without keys. Since the prevalence of the modern major diatonic scale, the holes have been placed in such positions as to give the six degrees of this scale which lie between the tonic and its octave, or second note in H.S. by the successive raising of the six fingers, the fourth fingers not being used. The tonic sounds from the full length of the tube, but with exceptions to be subsequently noticed. By over-blowing on the flute, all these notes are repeated an octave higher, and the production of the octave of the tonic can be facilitated by lifting the finger from the sixth hole.

These six holes, therefore, supply all that is required for the production of a diatonic scale of two octaves in instruments of the flute class, and also in conical instruments played either with a reed, as the oboe, or with a cup mouth-piece, as the old CORNETT (*q.v.*). In the oboe, and similar conical instruments, the production of the notes of the second octave is greatly facilitated by the opening of one or more small tubular holes or 'pipes' in the upper part of the instrument.

On an instrument with six finger-holes, scales other than that in which it is set, and therefore requiring semitones foreign to the original scale, can be rendered only with a rough approximation to accuracy by partly closing, and so flattening the speaking hole, or by closing one or more holes below it. For a complete chromatic scale, or the cycle of twelve diatonic scales, five extra holes controlled by keys have been introduced; these, with the six finger-holes, giving the eleven different lengths of tube required in addition to the total length for the twelve degrees of the chromatic scale. On instruments which cannot be overblown, however, whether conical, as the chaunters of the various bagpipes, or cylindrical, as the rudimentary chalumeaux, a seventh hole is required for the completion of the scale of one octave, and this hole is usually controlled by the thumb of the left hand.

In the ordinary flute-scale, as described above,

the fundamental note of the tube is used; and as the next note to this in the H.S. is the octave, the whole of the intermediate notes have to be obtained by means of variations in the length of tube. If, however, the fundamental note were not required, the original length with three variations would give the diatonic scale, as the second, third and fourth notes of the H.S. are the octave, twelfth and double octave of the prime. A diatonic scale in the second harmonic octave requires, therefore, only three finger-holes, giving the super-tonic, mediant and subdominant, the dominant or third note in H.S. being derived from the full length of the tube, and this was the usual arrangement in the tabor-pipe and galoubet.

Returning to the bagpipe chaunter, the six normal holes of the flute are supplemented not only by the seventh, or thumb-hole, to give the octave, but by an eighth hole closed by the fourth finger of the right hand. This is required by a prolongation of the tube sufficient to give a note one tone lower than its keynote, the keynote itself now sounding from this eighth hole, instead of from the full length of tube. This simple case of extension of the scale downwards is typical of many; the point to be observed is that such extension does not affect the general scheme of fingering, and the natural, or characteristic scale established by the six finger-holes. In the same sense that the natural scale of the pianoforte is C, and is not altered by the extension of the compass downwards from CC to AAA, so the natural scale of a wind instrument is that determined by the six finger-holes, and is not altered by the extension of its compass. From this point of view the key or scale of the modern concert flute is D, although having downward extension to *c'*, and in some cases to *b₂* or even *b₁*; the oboe is also in D, with extension to *b₂* or *b₁*. The bassoon with its six finger-holes closed sounds G a twelfth lower than the oboe, but its natural scale is C major, the highest finger-hole sounding *f* and not *f₂* as required in the scale of G. The holes for the left hand only being closed, the instrument gives *c*; *d*, *e* and *f* sound as the fingers are successively raised, and on the closing of the holes for the three fingers of the right hand, *g* is obtained, followed, on raising the fingers, by *a*, *b* and *c'* all as octaves of their respective primes G, A, B and C. The extension downwards from G to BB₁ is obtained chiefly by key-work.

As the octave harmonic has no existence on instruments with cylindrical bore, no repetition of the scale in the octave, on such instruments, can be obtained. Therefore extra holes beyond the normal six or seven are imperatively called for if the scale is to comprise more than eight notes. On some of such instruments, as the racket, much ingenuity was displayed in the doubling of the tube, so as to bring more than

one hole under the control of a single finger or thumb. On others, as the sordine and krummhorn, key-work was used long before the evolution of the modern clarinet. The distinctive feature of this instrument is not so much the addition of keys to extend the fundamental compass from an octave to a twelfth, as the peculiar use of the thumb or pipe-key, as a means of ensuring the production of notes, speaking as the fundamental notes do from the different lengths of the instrument as determined by side-holes, but in each case a twelfth higher than the fundamental.

The foregoing remarks give a general indication of the fundamental principles and development of fingering from a diatonic basis; but as the free use of all scales necessitates working from a chromatic basis, modern improvements have been influenced by this principle. The most important of these is that known as the Boehm system (see BOEHM, Theobald), the basis of which is that every speaking-hole is vented by the hole giving the semitone immediately below it. To attain this result key-work of a somewhat elaborate description is required, but is justified by the equality of tone and power obtainable in all keys. The system is seen at its best and simplest on the flute, but the use of it on the clarinet is increasing.

This general summary of the scheme of fingering, common to all instruments with side-holes, is given here rather than under the name of any one instrument, but certain details peculiar to each are, when possible, noticed under their several articles.

D. J. B.

FINK, CHRISTIAN (*b.* Dettingen, Württemberg, Aug. 9, 1831; *d.* Esslingen, Sept. 5, 1911), organist, studied at the Leipzig Conservatorium (1853) and at Dresden under Schneider. From 1856-60 he appeared as organist at many concerts and oratorio performances in Leipzig, and in 1863 was appointed head of the seminary at Esslingen and organist of the principal church of that place. He published many excellent works for the organ, some of which have appeared in the *Organist's Quarterly Journal* (Novello), besides psalms for chorus and orchestra, songs, choruses, etc. (*Mendel's Lexikon.*)

M.

FINK, GOTTFRIED WILHELM (*b.* Sulza, Thuringia, Mar. 7, 1783; *d.* Halle, Aug. 27, 1846), theologian and musical critic, was educated at Naumburg, where he was chorister, and Leipzig (1804-09). He began writing for the *A.M.Z.* in 1808, and in 1827 succeeded Rochlitz as editor, a post he held till 1841. In 1842 he became for a short time professor of music to the University of Leipzig. Fink's only musical works of value were the 'Musikalischer Hausschatz, a collection of Lieder, etc. (Leipzig, 1843), and 'Die deutsche Liedertafel' (*ibid.* 1846). Besides the *A.M.Z.*, he was a prolific contributor to the *Conversations-Lexicons* of

Ersch and Gruber, and of Brockhaus, and to Schilling's *Lexicon der Tonkunst*. He left in MS. a history of music, upon which he had been engaged for twenty years.

M. C. C.

FINTA GIARDINIERA, LA, opera buffa in 3 acts, author of libretto unknown; music by Mozart; produced Munich, Jan. 13, 1775.

FINTA SEMPLICE, LA, opera buffa in 3 acts; libretto by Coltellini, music by Mozart; composed at Vienna in 1768, when he was only 12.

FIOCCO, the name of a family of some distinction who flourished in Brussels in the 18th century. They may have been related to a Domenico Fiocco, a mass of whose composition, for four voices (with added parts by Brossard), is in the Bibl. Nationale in Paris; the head of the Brussels family was (1) PIETRO ANTONIO (*b.* Venice, c. mid-17th cent.; *d.* Brussels, Nov. 3, 1714), a Venetian, who was in the court band at Brussels about 1696, and conductor of it from 1706; also at Notre Dame du Sablon. Van der Straeten states that he was the first director of the musico-dramatic 'Accademie' in 1704. A volume of *Sacri concerti*, op. 1, was printed at Antwerp in 1691, a cantata, 'Le Retour de printemps,' is dated Brussels, 1699, and various masses and motets are mentioned in *Q.-L.* His elder son, (2) JEAN JOSEPH (GIOVANNI GIOSEFFO), succeeded his father as conductor at Brussels in 1714, but the younger son, (3) GIOSEFFO HECTORE, the third in succession in the conductor's place, seems to have been the most important of the three. He was sub-conductor at Brussels in 1729, from 1731 master of the chorists at Antwerp Cathedral, and master of the music at Stc. Gudule, in Brussels in 1737. He was a distinguished harpsichord-player, and in his first book of 'Pièces de clavecin' are many things of value, some of which were reprinted by van der Straeten and in Elewyck's selections from the Netherlandish masters (*Q.-L.*).

FIORÁVANTI, (1) VALENTINO (*b.* Rome, 1764; *d.* Capua, June 16, 1837), composer, studied under Sala at the 'Pietà de' Turchini' at Naples. His first opera, 'L'avventure di Bertoldino,' produced in Rome, 1784, was followed by at least fifty others, all comic, the last of which, 'Ogni eccesso è vizioso,' was produced at Naples in 1823. He was invited to Paris in consequence of the success of 'Le cantatrici villane' (1806), and there wrote 'I virtuosi ambulanti' (1807). These two were on the whole his best operas, though all possessed a genuine vein of comedy, a freshness and an ease in the part-writing which made them very popular in their day. He was again in Naples in 1807, and in June 1816 he succeeded Jannaconi as maestro di cappella to St. Peter's at Rome, and while in that post wrote a quantity of church music very inferior to his operas.

His son, (2) VINCENZO (*b.* Apr. 5, 1799; *d.* Mar. 28, 1877), also composed operas with ephemeral success. M. C. C.

FIORE, (1) ANGELO MARIA, lived at Turin in the early 18th century. Burney and Hawkins speak of him as an excellent virtuoso on the violoncello. He composed sonatas for violoncello and for violin (*Q.-L.*; *Fétis*).

(2) STEFANO ANDREA (*b.* Milan, latter part of 17th cent.; *d.* Turin, 1739), possibly the son of Angelo Maria, was maestro di cappella to the King of Sardinia and a member of the Philharmonic Society there c. 1726. He composed a number of operas between the years 1707–1730; 'Sinfonie da chiesa' for 2 vlns., v'cl. and continuo, op. 1, in 1699, when he was living at Milan; cantatas and arias (*Q.-L.*; *Riemann*).

FIORILLO, FEDERIGO (*b.* Brunswick, 1753), violin-player and composer. His father, Ignazio, a Neapolitan by birth, lived as conductor of the opera at Brunswick. He appears to have been originally a player of the mandoline, and only afterwards to have taken up the violin. In 1780 he went to Poland, and about the year 1783 we find him conductor of the band at Riga, where he stayed for two years. In 1785 he played with much success at the Concert Spirituel at Paris, and published some of his compositions, which were very favourably received. In 1788 he went to London, where he played the viola part in Salomon's quartet-party. His last appearance in public in London took place in the year 1794, when he performed a concerto on the viola at the Antient Concert. He went from London to Amsterdam, and in 1823 was in Paris. His numerous compositions are duos for violins, for piano and violin, and violin and violoncello; trios for flute, violin and tenor, for two violins and bass; quartets and quintets for stringed instruments; concertos for the violin; concertantes for two violins, etc. (See *Q.-L.*) There is, however, one particular work which has brought his name down to our time, and will probably long remain a standard. His thirty-six Caprices or Études rank with the classical studies of Kreutzer and Rode, and, apart from their usefulness, are not without merit as compositions. They have been edited over and over again, notably by Ferdinand David (Leipzig, Senff). Spohr wrote and published an accompanying violin-part to them. F. D.

FIORILLO, IGNAZIO (*b.* Naples, May 11, 1715; *d.* Fritzlar, Hesse, June 1787), pupil of Leo and Durante. His first opera, 'Mandane,' was performed at Venice, 1736. He was court Kapellmeister at Brunswick in 1754, and at Cassels in 1762. He retired with a pension to Fritzlar in 1780. He composed 14 operas, an oratorio, a Requiem, 3 Te Deums, symphonies, sonatas, etc. (*Q.-L.*; *Riemann*).

FIORITURE (Ital.), literally 'flourishes,' that is, those ornamental figures, either ex-

temporised by performers or written by the composer to decorate the outline of a melody (cf. FLORID). Fioriture belong especially to the art of the singer and reached their height in the Italian opera of the 18th century. (See CADENZA; EXTEMPORISATION; ORNAMENTS.)

C.

FIORONI, GIOVANNI ANDREA (*b.* Pavia, 1704; *d.* Milan, Dec. 14, 1778), pupil of L. Leo, Naples; maestro di cappella at Bergamo Cathedral, and (1747–78) at Milan Cathedral. He was an important church composer of the classical school. (For list of works see *Q.-L.* and *Mendel*.)

FIPPLE FLUTE. The designation Flute, as applied to modern European instruments, includes broadly all those in which the tone is produced by the breath without the use of either a reed or a cup-shaped mouthpiece. In the more limited modern use the term is applied to those instruments only in which the current of air proceeds directly from the lips across the mouth-hole or embouchure. (See FLUTE.) In a large class of flutes, however, now rapidly disappearing, the wind was blown through a tube into a cavity from which it issued in a flat stream against a sharp lip opposite. This flat form was given to the air-reed or stream by a block in the chamber or cavity, and this block was called the fipple. The instruments variously called recorders, flûtes-à-bec, and flûtes douces (*flauti dolci*), the tone of which is produced by an air-reed, are therefore all fipple flutes, as also are flageolets and whistles generally.

The common 'penny whistle' with six side-holes or ventages closed by the fingers may be regarded as the elementary type of the family. By raising the fingers successively the diatonic scale is produced; by over-blowing this scale can be repeated in the octave as in the ordinary lip-blown fife or flute, and by certain cross-fingerings other notes can be produced.

(1) THE RECORDER (Ger. *Blockflöte*), from the important place it held for some centuries before the general adoption of the cross-blown flute or flûte-à-traversière, must be regarded as the most important of the fipple flutes. It stands distinguished from the flûtes-à-bec generally by having eight holes, one of which is duplicated. Six holes, three for the first, second and third fingers of each hand, are in one line on the top; a seventh hole nearer the upper end is closed by the thumb; and the eighth hole near the lower end was placed somewhat on one side, so as to be convenient for the little finger. As some performers placed the left hand below the right, the eighth hole was duplicated, making nine holes in all, eight being effective, as the hole not required by the player was stopped with wax. This ninth hole accounts for the French name 'flûte à neuf trans.'

The recorder is the member of the flûte-à-bec family which is specially known as the flûte

douce, flauto dolce and English flute, the last designation (or flûte d'Angleterre) serving to differentiate it from the German or cross-blown flute. As late as 1740 it is described in Jas. Grassineau's *Musical Dictionary* as the 'common flute' to distinguish it from the 'German flute,' while at the present time the 'common flute' is the 'cross-blown' flute.

Recorders were commonly used in sets of four, discant, alto, tenor and bass, each having a compass of two octaves, or rather more, but Praetorius describes eight of different pitches, from the little flutelet to the great-bass flute, and states that as many as twenty-one were used together. On the larger instruments key-work was used to close the lowest hole, as the spacing of the holes was too great for the unaided finger. The tone of the recorder as being remarkable for solemnity and sweetness is much referred to by old writers, Bacon, Milton, Pepys and others. (See *PLATE XXV*. Nos. 6-9.)

(2) **FLAGEOLET.**—The difference between this instrument and the recorder is one of detail rather than of principle. Like the 'penny whistle,' it has six finger-holes, but only four of these are on the top, and two, closed by the two thumbs, are on the under-side. The invention of the instrument is ascribed by Burney to the Sieur Juvigny, who played it in the famous 'Ballet comique de la Roynne,' 1581. In its modern form as the French or quadrille flageolet, the original six holes are supplemented by others covered by keys, adding much to the convenience of fingering. (See *PLATE XXV*. No. 4.) The flageolet survives only in dance music, and that only in a limited and diminishing use. It is rarely found in orchestral scores, but Handel used the flageolet in 'Acis and Galatea,' 'Hush, ye pretty warbling quire,' and there is a tradition of some authority that it was intended for the solo (marked in the score 'Flauto'), and now usually played on the piccolo, in 'O ruddier than the cherry'; Gluck wrote for it in 'Die Pilgrime von Mekka,' and Mozart in 'Il seraglio.' Sullivan introduced it into his 'The Sorcerer.'

(3) **BIRD FLAGEOLET.**—This was a small flageolet of delicate quality used for the training of singing birds.

(4) **DOUBLE AND TRIPLE FLAGEOLETS.**—The technique of the double flageolet was described by one Bainbridge¹ about 1800, and his Method for the instrument is supplemented after about twenty years by his son-in-law. It consists of two 'patent Flageolets, the sides close to each other; the one has seven holes in front and one behind; the other only four in front. The seven-holed Flageolet is played with the left hand, the four-holed Flageolet is played with the right hand; and in playing duets you will in general have the same number of holes covered on the

second Flageolet as on the first.' From the examples it appears that in this case the two instruments play in thirds, intervals larger than this being possible in a few cases. The two tubes were set in a single block and blown by one mouthpiece. Contrivances were added for silencing one of the two pipes when required, but they seem to have been often blown in unison to a single note. Triple flageolets (*PLATE XXV*. No. 3) were also made by Bainbridge. These instruments have entirely and most deservedly gone out of use. No music of importance seems to have been composed for them.

(5) **GALOUBET.** See PIPE and TABOR.

For many interesting particulars see *Six Lectures on the Recorder*, by the late C. Welch.

D. J. B.

FIREWORK MUSIC, a series of pieces—Overture, Allegro, Lentement, Bourrée, Largo alla siciliana, Allegro, and two Minuets, all in the key of D—written by Handel and performed at the Fireworks given in the Green Park, Apr. 27, 1749, on the occasion of the Peace of Aix-la-Chapelle. The band—100 in all—contained 24 oboes, 12 bassoons, 9 trumpets, 9 horns, 3 drums, besides strings.

G.

FIRING is ringing the bells of a peal so that they all strike simultaneously. It is practised on specially joyful and mournful occasions—on the latter with the bells muffled.

W. W. S.

FIS, FISIS, see F.

FISCHER, a family of singers of the 18th and 19th centuries. The founder was **LUDWIG** (b. Mayence, Aug. 18, 1745; d. Berlin, July 10, 1825), a bass, of whom Otto Jahn (*Mozart*, 2nd ed. i. 661, 630) speaks as 'an artist of extraordinary gift, for compass, power, and beauty of voice, and artistic perfection both in singing and playing, probably the greatest German bass singer.' He was well known at the theatres of Munich (1778), Vienna (1779), Paris (1783), Italy (1784), Berlin (1788), etc., and was the original Osmin in the 'Entführung,' possessing a compass of two octaves and a half 'all round, even, and in tune' (Reichardt).

Fischer was a great ally of Mozart, who wrote for him 'Non sò d'onde viene,' and often mentions him with affection—'A truly splendid voice, though the Archbishop told me he sang too low for a bass, and I assured him he should sing higher next time' (Sept. 26, 1781); 'A man whose loss is irretrievable' (Feb. 5, 1783); 'I went to see the Fischers; I cannot describe their joy, the whole family desire to be remembered to you' (Mar. 17, 1781). The others of the family were his wife **BARBARA**, a more than respectable singer and actress; his son **JOSEPH** (1780–1862), also a bass of renown, but more known as an

¹ Bainbridge has been credited with the invention, but *PLATE XXV*. No. 5 shows that double flageolets existed at an earlier date.

impresario than a singer; his daughters FISCHER-VERNIER — who in 1835 founded a singing-school of great repute for girls in Vienna — and WILHELMINE, and Joseph's adopted daughter, FISCHER-MARAFFA, all good, efficient, intelligent artists. M. C. C.

FISCHER, JOHANN (b. Augsburg, Sept. 25, 1646; d. Schwedt, Pomerania, c. 1721), violinist and composer, was a musician whose career presents remarkable features. A thorough cosmopolitan, a writer and performer of what is known to-day as virtuoso music, and composer of at least one example of 'programme music,' he possessed a combination of qualities we are accustomed to look upon as essentially modern. His instructor in violin-playing is unknown, but it is recorded that he was taught harmony by Capricornus at Stuttgart, and sent in early youth to Paris, where he became copyist to Lully, whose music he is said to have introduced subsequently into Germany. In any case, traces of that composer's influence are to be found in his compositions. After leaving Paris he led a wandering life, remaining for a time at Augsburg (in the Barfüsser Kirche) and at Schwerin, where he held an appointment as Kapellmeister. He also visited Denmark and Sweden, finally settling down in Schwedt in Pomerania as Kapellmeister to the Markgraf.

He composed 'Tafelmusik,' overtures, dances, madrigals, minuets and solos for violin and viola. In a list of his compositions given by Fétis are also to be found various vocal pieces and the primitive example of programme music, already alluded to, entitled:

'Feld und Helden Musik, über die 1704 bei Höchstadt geschehener Schlacht, worin die Violine der Marlborough, und die Klobee der Tallard vorstellen.'

It is interesting to note that Fischer wrote and performed violin pieces in which the device of special tunings (see SCORDATURA), found in latter days in the works of Paganini and others, was occasionally employed. These are even found in pieces written by him for the viola, an instrument for which he had a marked predilection. W. W. C.

BIBL.—BRONIKŁAWA WOJCIKOWNA, *Johann Fischer von Augsburg (1646–1721) als Sultenkomponist* (Z. M. W., Dec. 1922, pp. 125–50).

FISCHER, JOHANN, a 16-17th century organist of Morungen in the district of Königsberg, Prussia, organist at Angerburg from 1595. He compiled between 1594–1604 a volume of 150 motets, etc., by 16th-century masters in organ tablature, containing pieces by some of the lesser-known masters of that period. This important and interesting work is now in the Council Library at Thorn, Prussia.

E. v. d. s.

FISCHER, JOHANN CASPAR FERDINAND (b. 1660–70; d. circa 1738¹), a composer whose clavier and organ music is interesting as the work of an immediate forerunner of Handel and Bach.

¹ Ernst von Werre.

He was Kapellmeister to the Markgraf Ludwig of Baden at the Schloss Schlackenwerth in Bohemia. Markgraf Ludwig had been obliged to take up his residence at this Bohemian Schloss in consequence of the destruction of the Residenz at Baden by the French in 1688. Fischer's op. 1 appeared at Augsburg in 1695 with the title *Le Journal du printemps consistant en airs et balets à 5 parties et les trompettes à plaisir*. In 1696, op. 2, 'Les Pièces de clavessin,' appeared at Schlackenwerth, but was republished at Augsburg in 1698, with the title *Musicalisches Blumen-Büschlein*, etc. This work consists of eight short suites for clavier, each introduced by a prelude. Fischer, however, does not adhere to the German order of dance-forms in the suite as established by Froberger, viz. Allemande, Courante, Sarabande, Gigue, but follows the French fashion in substituting, *ad libitum*, Gavottes, Menuets, Bourrées, Passepieds, etc. Suite v. consists only of a prelude and aria with eight variations. Suite viii. consists of prelude with chaconne only. In 1701 appeared op. 3, *Vesper Psalms a 8* with *ad libitum* accompaniment of two violins and basso continuo for organ and violone. In 1702 appeared op. 4 (republished in 1715 without opus number) entitled 'Ariadne musica neo-organœdum,' etc. This work is a direct foreshadowing of *Das Wohltemperirte Clavier*. Its title points it out as intended to be a clue to budding organists to guide them through the mazes of all the newer modern keys, major and minor. It consists of twenty preludes and fugues in as many different keys, only the key of E minor occurs twice, once without signature, as if in the Phrygian mode, and then with two sharps as if in the Dorian. Of the twenty-four modern keys only five are unrepresented, C sharp and F sharp major, E flat minor, B flat minor and G sharp minor. C sharp minor and F sharp minor are both written with four sharps signature, B minor with three sharps, A flat with three flats, etc. Both preludes and fugues are very short, and the pedals are only required for the Preludes. Many of the themes have a remarkable resemblance to those afterwards made use of by Bach. The E major fugue, for example, begins with precisely the same theme *alla breve* as that in the second part of *Das Wohltemperirte Clavier*. See also the beginning of the F major fugue. Max Seiffert points out many other striking resemblances.² To these preludes and fugues the composer has subjoined five ricercari on the church melodies: 'Ave Maria klare,' 'Der Tag der ist so Freudenreich,' 'Da Jesus an dem Kreuze stund,' 'Christ ist erstanden,' and 'Komm Heiliger Geist.' Two other works of Fischer appeared later without date, one entitled 'Musicalischer Parnassus,'

² *Geschichte der Clavier-Musik*, Bd. I.

consisting of a series of nine suites for clavier named after the Nine Muses. These suites are of a more solid German character, with fewer concessions to French taste in the use of *agrément*s. The remaining work is entitled *Blumenstrauß*, and would seem to have been published after Fischer's death. It is arranged according to the eight Church Tones, each tone having a prelude followed by eight very short fugues, concluding with a finale. Although no mention is made of the fact, it would seem as if these pieces were intended to accompany the plain-song singing of the Magnificat in the fashion which became common in the 17th century; that is to say, while in the 16th century it was usual to sing alternate verses of the Magnificat in vocal harmony, with the other verses sung to the simple plain-song, in the 17th century the custom grew up for the organist to substitute his own playing in place of the vocal harmony of the alternate verses. Very dignified examples of this kind of work may be seen in Frescobaldi's *Fiori musicali*, 1635, also in Scheidt's *Tabulatura nova*, 1624. Pachelbel also left some very florid and less ecclesiastical specimens of these Organ Magnificats. The short movements of Fischer hold a mean between the earlier simplicity and the later more florid style, and although they have so little development, the themes themselves and the modulations have much of the spirit of Bach in them. The clavier and organ works of Fischer have been republished in one volume by Ernst von Werre, and the orchestral work *Le Journal des printemps* in *D.D.T.* x. (i.).

J. R. M.

FISCHER, JOHANN CHRISTIAN (*b.* Freiburg, Breisgau, 1733; *d.* London, Apr. 29, 1800), distinguished oboist. He was for some years in the court band at Dresden from 1764 to about 1771, then in the service of Frederick the Great, and after a successful concert tour by Mannheim, Holland and Paris, came to London, and made his first appearance at the Thatched House, June 2, 1768; J. C. Bach playing the 'pianoforte' for the first time at the same concert. Fischer was for many years a great attraction at the Bach-Abel and Vauxhall concerts, and as a member of the Queen's band played frequently before the court. He was in Dublin May-Oct. 1771 and again in 1776. His playing of Handel's fourth oboe concerto at the Handel Commemoration in 1784 so delighted the King that he expressed his satisfaction in a note on his book of the words.¹ His tone must have been very powerful, since Giardini the violinist characterised it as 'such an *impudence* of tone as no other instrument could contend with'; and according to the *ABCDario* 'it was very fine and inexpressibly well-managed.' On the death of Stanley, master of the King's band (1786), Fischer competed with

Burney and others for the vacant post, but Parsons was appointed, and Fischer soon after went abroad, probably in disgust at his failure. Mozart in 1766 as a boy had been enchanted with his playing in Holland, and on hearing him again in Vienna, severely criticises him,² and condemns alike his tone, his execution and his compositions. From 1790 he remained in London. While playing at court he was struck with paralysis and died.³ Fischer was very intimate with Gainsborough, whose pretty daughter Mary he married (Feb. 21, 1780), though the father gave a very unwilling consent, foreseeing the short duration of the marriage.⁴ There is a fine portrait of Fischer by Gainsborough at Buckingham Palace. Thicknesse mentions a second in full uniform—'scarlet and gold like a colonel of the Foot Guards.'

Zuck and Kellner were his best-known pupils in London. J. C. Bach wrote for him a quartet for two oboes, viola and violoncello, which he often played. His own compositions (of which Fétis and Gerber give a partial list) consist of solos, duets, concertos, quartets, etc. On this point the *ABCDario* says, 'As a composer his desire to be original often makes him introduce whimsical and outré passages, which nothing but his playing could cover.' Mozart, in spite of his unfavourable opinion of him, immortalised his minuet by writing variations for it (1773), which he often played to display his bravura (Köchel, No. 179). 'This minuet was then all the rage,' as Kelly writes,⁵ after hearing Fischer play it in Dublin, and it continued to be the rage for many years.

G. F. F.

FISCHER, MICHAEL GOTTHARDT (*b.* Albach, near Erfurt, June 3, 1773; *d.* Erfurt, Jan. 12, 1829), a famous organist and composer, a pupil of Kittel at Erfurt. He was organist at the 'Baarfüßler' Church; teacher of music at the seminary; from 1792 conductor of the winter concerts and organist at the Prediger-Kirche. He composed numerous works for the organ (some still in use), symphonies, a string quintet and some quartets, concertos for various instruments, sonatas for pianoforte, sacred and secular songs, motets, etc. (See *Q.-L.* and *Riemann*.)

FISCHIETTI, DOMENICO (*b.* Naples, 1729). He was still living at Salzburg in 1810, where he was appointed Kapellmeister to the Archbishop in 1765. He had studied at the Conservatorio di S. Onofrio, Naples. In 1766 he went to Dresden as court Kapellmeister and composer but was dismissed as unsatisfactory in 1772, when he returned to Salzburg where Burney met him. From 1779–83 he was Kapellmeister and singing-master at the seminary. He composed operas, an oratorio, masses, etc., which remained mostly in MS. (*Q.-L.*).

FISHER, JOHN ABRAHAM, Mus.D. (b. Dunstable (or London), 1744; d. probably London, May 1806), violinist and composer. He became a student of the violin under Pinto, and made his first appearance in public in July 1765 at the King's Theatre, in a concert for the benefit of the Musical Fund. About 1770 he married a daughter of Powell the actor, and became, in her right, proprietor of a sixteenth share in Covent Garden Theatre. He composed for that and other theatres the music for the following pantomimes, viz., 'The Court of Alexander,' 1770; 'Zobeide,' 1771; 'The Monster of the Wood,' 1772; 'The Sylphs,' 1774; 'Prometheus,' 1776; and 'The Norwood Gipsies,' 1777; and also music for the opening of 'Macbeth.' On July 2, 1777, an oratorio by Fisher, entitled 'Providence,' was performed in the Sheldonian Theatre at Oxford, and on the 5th of the same month the composer (as a member of Magdalen College) accumulated the degrees of Bachelor and Doctor of Music. His oratorio was performed in Freemasons' Hall, London, on May 28, 1778, for the benefit of the Middlesex Hospital, and again in 1780. On the death of his wife Fisher disposed of his interest in Covent Garden Theatre, and started on a professional tour through Russia and Germany. In 1784 he reached Vienna, where he induced the youthful Anna Selina Storace to become his second wife (see BRAHAM; STORACE). It is said that the Emperor was so angered by Fisher's ill treatment of his wife that Fisher was ordered to quit the Imperial dominions. He then went to Dublin and gave a few successful concerts in the Rotunda. He was in Ireland from 1786-88 (see Lady Morgan's *Memoirs*), and left it before 1798. Besides the above-mentioned compositions Fisher published some symphonies for orchestra, and other works. (See *Q.-L.*)

W. H. H., rev.

FISTULA ANGLICA, FISTULA GERMANICA, 16th and 17th century names of FIFTEEN FLUTE (*q.v.*) and FLAUTO TRAVERSO (see FLUTE).

FITELBERG, GRZEGORZ (b. Dinaburg, Livonia, Oct. 18, 1879), conductor and composer, made his name in the former capacity as conductor of the Warsaw Philharmonic concerts (1908) and conducted later at the Vienna Hofoper (1912) and at St. Petersburg (1919-21). But he has identified himself with Polish music, has made Warsaw his headquarters and taken part in the national movement in composition of which Szymanowski is the leader. His works include a symphony in E minor (op. 16), and a Polish Rhapsody for orchestra, chamber music and many songs. C.

FITZWILLIAM, EDWARD FRANCIS (b. Deal, Aug. 1, 1824; d. Jan. 20, 1857), composer, son of Edward and Frances Fitzwilliam—both actors and singers. He was educated for the musical profession, and devoted himself especi-

ally to the study of composition. In 1853 he published a set of twelve songs which were much admired, and in the same year was appointed director of the music at the Haymarket Theatre, where he produced an operetta called 'Love's Alarms' (1854) and music for some minor pieces. About 1855 he married Miss Ellen Chaplin, a member of the Haymarket Company, well known as Mrs. E. Fitzwilliam. His compositions were distinguished by an intelligence which gave promise of great excellence, a hope disappointed by his early death. Besides the songs above mentioned, he wrote music for 'The Green Bushes,' 1845; 'Anything for a Change,' 1846; 'Queen of a Day,' comic opera; and published a *Te Deum*, and a hymn, 'O incomprehensible Creator.'

W. H. H.

FITZWILLIAM COLLECTION, THE. In the year 1816 Viscount Fitzwilliam died, leaving to the University of Cambridge, of which he was a member, the annual interest on £100,000 in money, and a large number of valuable paintings, books, engravings, and other works of art. Of these a valuable collection of music, MS. and printed, forms a portion. See LIBRARIES and COLLECTIONS OF MUSIC; also VIRGINAL MUSIC.

A portion of the collection was published by Vincent Novello in 1825 with the title, 'Fitzwilliam Music,' as follows:

Bonno, Cum Sancto.	Colonna, Gloria Patri.
Bononcini, Eternas fac.	Paratum cor.
In te Domine. Orch. ¹	Sicut erat.

FLACCOMIO, DON GIOVANNI PIETRO, of Milazzo, Sicily (d. Turin, c. 1617), a 16th-century maestro di cappella of Ferdinand III. of Spain; later almoner of the Duke of Savoy. He composed 'Concentus in duos distincti choros . . .'; vespers, masses and songs for the festivals of the Virgin Mary (1611); a book of madrigals (3 v., with continuo, 1611); a collection of madrigals by various masters (1598). Some of his songs and motets are in collective volumes (*Q.-L.*).

¹ 'Orch.' implies with orchestral accompaniment.

FLADT, ANTON (*b.* Mannheim, 1775), eminent oboist, studied under Ramm, succeeded Lebrun in the orchestra at Munich (1790). He travelled much, visiting Vienna (1793), Italy, the Tyrol, the Rhine, Saxony, Prussia, England (1798), Bohemia, Hungary and France. When in London the Prince of Wales made him liberal offers to remain in England. After 1810 he resided entirely at Munich. He composed three concertinos for oboe and orchestra, and some pieces for two flageolets. M. C. C.

FLAGEOLET (1), see **FIPPLE FLUTE**.

(2) The French and Italian term for the harmonic notes in the violin and other instruments of that tribe; doubtless so called because in quality they resemble the flageolet. (See **HARMONICS**.) M. C. C.

FLAM, the name given to a certain kind of stroke used on the side-drum. (See **DRUM**, 3).

FLAT (Fr. *bémol*; Ger. *Be*; Ital. *bemolle*), *b*, the sign for lowering a note by a semitone. Placed immediately after the clef they govern every occurrence of the note they affect throughout the composition; thus the keys with one flat or more in the signature are known as the flat keys. When introduced in the course of the music they hold good until the end of the bar in which they occur, unless cancelled by a natural.

B, *E*_♭, etc. are termed in French *si bémol*, *mi bémol*, etc.; in German musical nomenclature *s* or *es* is added to the letter (*Es* = *E*_♭, *As* = *A*_♭), with this exception: *B*_♭ is *B*; or occasionally, since the Germans use *H* for our *B*, *Hes*.

In Germany the *b* was at one time used to express the minor key: *G*_♭ for *G* minor, i.e. *G* with the minor third and sixth.

The term 'flat' and its derivatives are also applied to a lowering of the pitch, intentional or otherwise. See **ACCIDENTALS**; **INTONATION**; **SIGNATURE**. S. T. W.

FLATTÉ (**FLATTEMENT**), another name for *pincé*. (See **ORNAMENTS**.) E. B¹.

FLAUTO DOLCE, see **FIPPLE FLUTE**.

FLAUTO MAGICO, *IL*, see **ZAUBERFLÖTE**, *DIE*.

FLAUTO PICCOLO, see **FLUTE** (2).

FLAUTO TRAVERSO (Ital.; Fr. *flûte traversière*). The distinguishing name of the flute with a lateral mouthpiece, held across the performer, as opposed to the *flûte-à-bec* or flageolet, held straight in front. (See **FLUTE**.) W. H. S.

FLECHA (**FLECCIA**), **MATEO**, the name of two Spanish composers (uncle and nephew) of the 16th century.

(1) **MATEO**, the elder (*b.* Prades, Tarragona, 1481; *d.* Poblet, 1553-54), was a pupil of Juan Castelló at Barcelona, subsequently appointed maestro de capilla to the Infantas of Castille. He became a Carmelite monk at Valencia, and died in the monastery of Poblet.

(2) **MATEO**, the younger (*b.* Prades, c. 1520;

d. Solsona, Lérida, 1604), a pupil of his uncle, was in the service of the Emperor Charles V. (*d.* 1558) and Philip II. (*d.* 1598), for whom he is said, on very doubtful authority (Soriano Fuertes), to have written a dramatic work, 'El Parnaso,' performed at the Alcázar, Madrid, in 1561. (The burlesque madrigals, or *Ensaladas*, like the 'Amfiparnasso' of Orazio Vecchi, are dramatic in conception, without ever having been intended for the stage.) Flecha spent some time in Prague in the reign of the Emperor Maximilian II. (1564-1576). In 1581 he was still there, and describes himself as 'chaplain to their imperial majesties.' The Empress Maria evidently knew a good musician when she met one, for she afterwards encountered VICTORIA in Rome and brought him with her to Madrid. Flecha was appointed to the benefice of the abbey of Tyhan; he had also professed as a monk of the Franciscan order. In 1599 he returned to Spain, and spent the rest of his life in the abbey of Solsona, on the south side of the Pyrenees. There is a portrait of him in the Royal Library, Madrid.

It is difficult to distinguish the compositions of the uncle from those of the nephew. The title-page to the collection of *Ensaladas* definitely states that some are by the nephew and also by other composers. In chronological order the works of the Flechas are as follows:

PRINTED WORKS

Madrigal a 4 et 5 voci con uno a 6 et un dialogo a 8. . . Venice, Gardane, 1568. (Munich, Venice.)

Las Ensaladas de Flecha . . . recopiladas por F. Matheo Flecha su sobrino . . . con algunas suyas y de otros autores. Prague, Negrino, 1581. (Barcelona, Bibl. Diputación; has part only. Several are to be found, however, in the lute-book of FUENLLANA printed 27 years earlier, and in 3 MSS at Barcelona. V. Pedrell's 'Catalach' of this library, with examples.)

Divinarum completarum Psalmi, Lectio brevis et Salve Regina, cum aliquibus motetis. Prague, Negrino, 1581. (Breslau; incomplete.)

MSS.

Harmonia a 5 (Vienna; Ges. f. Musikfreunde. Ded. to Emp. Maximilian II.).

Ensaladas, in Barcelona MSS. 961, 968 and 969.

J. B. T.

FLEM, PAUL LE (*b.* Lézardrieux, Côtes-du-Nord, Mar. 18, 1881), composer, chorus-master and musical critic. After solid classical studies (*Le Flem* is *licencié en philosophie*) he completed his study of harmony with Lavignac, of counterpoint with Ganaye and Roussel, and of composition with Vincent d'Indy. He teaches counterpoint at the Schola Cantorum.

He has written some chamber music (*sonata* for PF. and vln.; quintet, etc.) and various works intended for the piano, for voice and for choir. His most extensive works are 'Aucasin et Nicolette,' 'Chantefable' in a prologue and 3 parts; a symphony, a 'triptyque symphonique'; a fantasia for PF. and orch.

Le Flem was chorus-master at the Opéra-Comique. At the present time he is head of the 'Chanteurs de St. Gervais.' He has brought this celebrated choir to a very high artistic level. As a critic his articles in *Comoedia* are much appreciated. M. F.

FLEMMING, FRIEDRICH FERDINAND (b. Neuhausen, Saxony, Feb. 28, 1778; d. Berlin, May 27, 1813), studied medicine at Wittenberg from 1796–1800, and subsequently at Jena, Vienna and Trieste. He practised in Berlin, where he took a keen interest in all musical matters, composing many partsongs, especially for male voices, for the society founded by Zelter. His claim to notice here is based upon his excellent setting of Horace's ode beginning 'Integer vitae,' which is still universally popular in English schools and universities, as well as in Germany. The curious resemblance in style and structure between this and Webbe's 'Glorious Apollo' is certainly fortuitous, since the latter was written in 1787, and Flemming can hardly have become acquainted with the Englishman's work. M.

FLEURY, LOUIS FRANÇOIS (b. Lyons, Rhône, May 24, 1878; d. Paris, June 10, 1926), French flautist, pupil of Taffanel at the Paris Conservatoire, obtained the first flute prize in 1900. After having played for a short time in various orchestras, he became member of the Société Moderne des Instruments à vent (1901), which he directed from 1905 till his death (replacing G. Barrère). In 1906 he founded the Société des Concerts d'Autrefois. His career as soloist began in 1905, with a series of concerts given in England, which he afterwards frequently visited. In London he took a prominent part in the concerts of the CLASSICAL CONCERT SOCIETY. He showed, both alone and with his Society, the greatest musical activity in his incessant travels over Europe, and endeavoured to propagate English modern music on the Continent.

Greatly interested in the study of old music (specially that of his instrument), he published reprints of sonatas and pieces by Blavet, Naudot, Purcell, J. Stanley, L. Vinci, etc., and contributed to French and English musical reviews. M. L. P.

FLICORNO, an Italian make of FLÜGEL-HORN (q.v.).

FLIEGENDE HOLLÄNDER, DER, opera in 3 acts, words and music by Richard Wagner. Produced Dresden, Jan. 2, 1843; Drury Lane (in Italian), July 23, 1870; Lyceum (Carl Rosa Co.), Oct. 3, 1876; Drury Lane (in German), May 20, 1882; New York, Academy of Music (in English), Jan. 26, 1877; Paris, Opéra-Comique, May 17, 1897.

The scenario was sold by Wagner to the manager of the Opéra in 1841, set by Dietsch as 'Le Vaisseau fantôme,' and brought out there, Nov. 9, 1842. G.

FLIGHT, BENJAMIN (b. circa 1767; d. 1847), an eminent organ-builder, was the son of Benjamin Flight, who, in the latter part of the 18th century, carried on, in partnership with John Kelly, under the style of 'Flight & Kelly,' the business of organ-building at

Exeter Change. Young Flight learned the art of constructing organs from his father. About the year 1800 he began business, in partnership with Joseph Robson in Lisle Street, Leicester Square, under the style of 'Flight & Robson. They afterwards removed to St. Martin's Lane, where they constructed and for many years publicly exhibited the APOLLONICON (q.v.). The partnership was dissolved in 1832, after which Messrs. Gray and Davison bought Robson's share of the business, while Flight, in conjunction with his son, J. Flight, who had long actively assisted him, carried on business in St. Martin's Lane as 'Flight & Son.' Flight invented many improvements in organ-building which prepared the way for still superior mechanism. Amongst them was an apparatus for steadying the wind, added to the bellows during a repARATION of Father Schmidt's organ at Trinity College, Cambridge, which preceded and possibly suggested, the concussion bellows. W. H. H.

FLINTOFT, REV. LUKE (d. Nov. 3, 1727), a native of Worcester, took the degree of B.A. at Queen's College, Cambridge, in 1700, and was appointed gentleman of the Chapel Royal in 1715, having been Priest-Vicar of Lincoln Cathedral from 1704–14. In July 1719 he was appointed reader in Whitehall Chapel. He was also a minor canon of Westminster Abbey from 1719. He was buried in the South Cloister of Westminster Abbey. He has been credited with the invention of the double chant form, his beautiful chant in G minor being the earliest known, but his authorship of that specimen is disputed. Dr. Grattan Flood declares that it is to be found in Allison's Psalter of 1599. (See *Notes and Queries*, 3rd ser. x. 206; xi. 267, 391 and 445.) W. H. H.

FLONZALEY QUARTET, a string quartet party established in New York by Edward J. De Coppet of that city, which has acquired an international reputation. DE COPPET (b. New York, May 28, 1855; d. there, Apr. 30, 1916), was a banker of Swiss descent. The Flonzaley Quartet was organised in 1902, at first for private performances in his own house, with the stipulation that the members should devote themselves entirely to rehearsing and playing quartets together. The original members were Adolfo Betti, Alfred Pochon, Ugo Ara and Iwan d'Archembeau. The name 'Flonzaley' was that of De Coppet's summer estate near Lake Geneva in Switzerland, where the first rehearsals were held. In 1904 the Quartet made a European tour with great success, and since then has given public concerts regularly in the United States and in Europe, the finish, brilliancy and beautiful tonal quality of its playing being everywhere recognised. In 1917 Ara left the Quartet to join the Italian army and his place was taken by Louis Bailly, who left it in 1924, being succeeded by Felicien

d'Archambeau, brother of Iwan. Since Edward J. De Coppet's death, his support of the organisation has been continued by his son, André De Coppet.

R. A.

FLOOD, CHEVALIER WILLIAM HENRY GRATTAN, Mus.D. (b. Lismore, Co. Waterford, Nov. 1, 1859), organist of Enniscorthy Cathedral since 1895, is well known for his research in several branches of musical learning.

Educated at Mount Melleray Roman Catholic University, All Hallows College and Carlow College, Flood was at first intended for the priesthood. As an organist at Belfast pro-Cathedral, Thurles Cathedral and Enniscorthy he has devoted himself to raising the standard of church music, and he has written many church compositions which include two masses, numerous motets, services and hymns. He has also made a close study of the musical history of Ireland, his many-sided research ranging from the traditional folk-music of the country to the biographies of musicians, the visits of musical celebrities and the productions of works in the Dublin theatres. He has also brought to light details of many early English composers and of English traditional songs. His numerous contributions to this Dictionary include many dates and other corrigenda in addition to his signed articles. He received decorations from Popes Leo XIII. and Pius X. and the cross 'Pro Ecclesia et Pontifice' (1917), is Vice-President of the Irish Folk-Song Society, Council Member of the Catholic Record Society of Ireland and Foundation Member of the National Academy of Ireland. The following are his principal literary publications relating to music:

History of Irish Music. (3rd ed., 1913.)

Story of the Harp.

Story of the Bagpipe.

W. Vincent Wallace. (Memoir.)

Introductory Sketch of Irish Musical History. (1921.)

John Field of Dublin, inventor of the Nocturne. (Memoir.)

Moore's Irish Melodies. (Edited.)

Selected Airs of O'Carolan.

Catholic Hymnal for Ireland. (Musical editorship.)

Early Tudor Composers. (Founded on articles in *Mus. T.*, 1924.)

C.

FLORENCE. If Florence cannot claim to have seen like other Italian cities the foundation of a school of musicians, she can boast to have been the cradle of opera. It is true that opera, as Romain Rolland affirms, 's'élaborait obscurément dans l'esprit de la nation.' But it is also true that the artists who translated the general feeling into action lived and worked in Florence. Opera was founded by the 'Camerata dei Bardi,' a meeting-place of poets, musicians and ardent amateurs who gathered in the house of Count Giovanni Bardi di Vernio, and later at the house of Jacopo Corsi to discuss artistic problems and, above all, theories of ancient Greek art.

Even before the creation of the new form of entertainment, music and song were highly prized in Florence. Miracle plays, in which all performers sang, pastoral plays, musical

'Intermedi,' etc., were forms which enjoyed great popularity in the days of the Medici. Music, moreover, played a considerable part in all festivals as can be gathered from contemporary chronicles describing the gorgeous ceremonies of the time.¹ A memorable event was the wedding of Ferdinando de' Medici with Cristina di Lorena, in which the entertainments were organised by Emilio dei Cavalieri, a Roman nobleman who occupied at the court of Florence the position of 'Intendente per le Belle Arti, and may be considered in a way a precursor of the reformers of Casa Bardi. Peri then wrote music for the *Dafne* of Ottavio Rinuccini which also appealed to Jacopo Corsi, who set to music parts of it. After a few private performances (1594-97) the opera was produced before the court in 1597 with great success. On Oct. 6, 1600, another work of Peri and Rinuccini was given at Palazzo Pitti on the occasion of the marriage of Maria de Medici with Henri IV. Giulio Caccini—another singer and composer—produced then his 'Euridice,' and Emilio dei Cavalieri wrote his 'Rappresentazione di anima e di corpo.'²

Later on the main current of opera ran north and south, but Florence welcomed in her theatres the most notable productions of Venice and Rome. This was due to the 'Accademie' which were then numerous and, some of them, important. First of these was the Accademia degli Immobili which resided at first in the Palazzo Corsini, and later in the Via della Pergola, where it caused a theatre to be built named Della Pergola after the street in which it was situated. The theatre was constructed on the plans of Ferdinando Tacca, and inaugurated in 1657 with 'Tancia o il Podestà di Colognole,' the work of Jacopo Melani from Pistoia, generally considered the first composer of Italian comic opera. At the same time there flourished another theatre in the Via del Coccomero (now known as the Teatro Niccolini), which was the property of the Accademia degli Infuocati.

In the following century the Teatro della Pergola became a still more important centre. Guglielmi, Paisiello, Salieri, and others saw their works performed there for the first time. Musical performances were also given then in the 'Teatro di via Santa Maria' (now Teatro Alfieri) of the Accademia dei Risoluti; in the 'Teatro della Pallacorda' (later Teatro Nuovo) of the Accademia degli Intropidi; the Teatro di Borgognissanti of the Accademia dei Solleciti; the theatre of Piazza Vecchia di S. Maria Novella of the Accademia degli Arrischiati, and others.

¹ See A. Solerti, *Musica, ballo e drammatica alla corte Medicea dal 1600 al 1637*, Florence, 1905.

² For this important period of musical history see Rolland, *L'Opéra au XVII^e siècle en Italie* in *Encyclopédie de la musique*, by A. Lavigueur, 1st part, p. 685, and *Histoire de l'Opéra en Europe avant Lully et Scarlatti*, Paris, 1895; A. Solerti, *Gli albori del melodramma*, 3 vols., Palermo, 1904, and *Le origini del melodramma*, Torino, 1908.

One of the most important institutions of the time is the Cappella Musicale di Corte which lived for more than three centuries (1539-1859). Of its directors the most celebrated were Francesco Corteccia (the first), Marco da Gagliano, Jacopo Peri. Of the singers and instrumentalists of note who performed there we still remember Antonio and Vittoria Archilei, Settimia Caccini (daughter of Giulio Caccini), Pietro Sammartini, Antonio and Francesco Veracini, Pietro Nardini, and many another. After the 18th century the Cappella Musicale lost its eminence in the musical life of the city and was abolished in 1859, when Florence became part of the kingdom of Italy.¹

The Schools of Music were at first controlled by the municipality of Florence. In 1813 they were handed over to the Accademia di Belle Arti, and in 1849 became the Istituto Musicale ('Regio' in 1860; inaugurated in 1862) with Giovanni Pacini as its first director. The Accademia controlled the artistic life of the Istituto by means of a council of censors, consisting of the three resident Academicians who represented the President of the Academy. To-day the whole responsibility rests with the director appointed by the Minister of Education. The Institute is now called after the Florentine composer Cherubini. Until 1923 the post was held by Ildebrando Pizzetti, who did much to improve the standard of the school, and raised it to the first rank amongst Italian musical institutions.

As for the present, if performances of opera are not always of the first quality, concerts have been a regular feature of Florentine musical life. Florence was one of the first Italian cities to establish a concert society. The Società del Quartetto in 1869 and the Società Orchestrale in 1873 attempted to popularise classical music without, however, obtaining adequate support. Some years later the Società degli Amici della Musica began to undertake chamber concerts and orchestral concerts with better fortune. Amongst minor societies to be noted are the old Filarmonica and the Lyceum—both concerned with concerts of chamber music. (See also LIBRARIES.) G. M. G.; trans. F. B.

FLORENCE, EVANGELINE, originally EVANGELINE FLORENCE HOUGHTON² (b. Cambridge, Mass., U.S.A., Dec. 12, 1873). Soprano singer, first created a sensation in America and England by reason of her unusually high compass *g* to *c'''*, then became very popular in London and at the English provincial festivals.

She was first taught singing at Boston by the late Mme. Edna Hall (well known at London concerts in the early 'seventies), and made her début in public at Boston at the age of 18 as the heroine in Flotow's 'Martha.'

¹ See R. Gandolfi, *La cappella musicale della corte di Toscana* in *R.M.I.* xvi. 506.

² She dropped the surname of Houghton to prevent confusion with another singer of that name in London.

In London she received further instruction from Henschel, Blume, Randegger, and gratuitously from the late Mrs. Rudolph Lehmann, the well-known amateur. On May 11, 1892, as Miss E. Florence, she made her début at St. James's Hall at a concert given by herself in conjunction with Miss Marguerite Hall, the daughter of her first teacher. On Dec. 1 she sang 'Elsa's Dream' at Henschel's Symphony Concerts; on Jan. 16, 1893, she sang in the first production in London of Parry's 'Job' by the Highbury Society; on Mar. 6 she sang at the Popular Concerts; the London Ballad Concerts; Feb. 17, 1894, at the Crystal Palace—at all which concerts she frequently sang subsequently. In 1894 she sang at the Hereford Festival; in 1897 and 1900 at Birmingham. She sang at the Philharmonic, May 18, 1899, in the Choral Symphony; on Feb. 25, 1903, in 'The Light of the World,' and on Apr. 1, 1904, in the 'Messiah' with the Royal Choral Society. She was married to Alexander Crerar, at Boston, U.S.A., on Oct. 17, 1894.

A. C.

FLORENTINE QUARTET, see BECKER, Jean.

FLORENZIO (FLORENTIUS), a 15th-century Italian priest and writer on music, who wrote shortly before 1492 a treatise on music in books, subdivided into various chapters, dealing with 'the virtues, uses and effects of music, the voice, the Guidonian hand, signs and notes, ligatures, modes, composition,' etc. The MS. is beautifully written on 95 folio sheets of parchment, with a title-page richly ornamented with exquisite miniatures of the school of Leonardo da Vinci, one being a portrait of that great master himself who was then living at Milan. The figures of the Guidonian hand, and others occurring in the text, are nearly all gilded. Lichtenthal in his musical bibliography (vol. iv. p. 467) gives a description of the MS. which in 1823 was in the library of the Marquis Gian Giacomo Trivulzio, Milan (*Mendel; Q.-L.*).

FLORID, music in rapid figures, divisions or passages, the stem of the simple melody, bursting forth, as it were, into leaves and flowers. The image is the same as that in *Figurata*. The Italian term is *Figurato*. Examples are hardly necessary; but the genesis of florid passages is highly interesting, and an instance or two, from the simplest form to the very highest art, may be forgiven.

BACH, Christmas Oratorio.

HAYDN, Quartet 1.

MOZART, G minor Symphony.

BEETHOVEN, Ninth Symphony (*Adagio*).

Such florid passages are essential to Variations, and the last of these examples is taken from the finest set of variations existing. (See COUNTERPOINT AND ORNAMENTS.) G.

FLORIDO, R. (*b.* Barbarano, Lombardy, c. 1600; *d.* Rome, after 1672), a bass singer who calls himself 'Canonicus de Silvestris a Barbarano.' From 1647-54 he was at Santo Spirito in Sassia at Rome, and in 1664 at Giacomo degl' Incurabili, where he is buried. He was a composer of songs contained in various collective volumes, and published between 1643 and 1672 a considerable number of books of vocal compositions by contemporary masters. (See list in *Q.-L.*)

FLORILEGIUM PORTENSE, a collection of sacred vocal music of the 16th century, in separate parts, published in 2 vols. by BODENSCHATZ (*q.v.* for full catalogue) in 1618 and 1621, and containing in all 265 pieces.

FLORIMI, PADRE FRA GIOVANNI ANDREA, a Servite monk of Siena, was vice-maestro di cappella, Siena Cathedral, in 1673, and maestro di cappella at Pistoja Cathedral in 1682. He was an important church composer. (For list of works see *Q.-L.*)

FLORIMO, FRANCESCO (*b.* San Giorgio Morgeto, Calabria, Oct. 12, 1800; *d.* Naples, Dec. 18, 1888), librarian, writer and composer, was taught music at the Real Collegio di Musica at Naples, where he learnt counterpoint and composition from Zingarelli, Furno, Elia and Tritto. He was appointed in 1826 Librarian of the College of Music (afterwards incorporated with that of San Pietro di Majella), where, finding the archives in a state of chaos and disorder, by his energy and perseverance he gradually made the Library one of the most interesting and valuable in Europe. He added a number of important works, besides a collection of autographs and manuscripts, of all the masters of the Neapolitan school.

Florimo's compositions include a Cantata, op. 1, in honour of the Duke of Noja, Director of the College of San Sebastiano; a Dixit; a Credo; a Te Deum; a Funeral Symphony

composed on the death of Bellini, afterwards performed at Zingarelli's funeral; a Chorus and Fugal Overture on the unveiling of Zingarelli's portrait at the College; 'Ore musicali,' a setting of 10 songs, vocal duet and quartet (Girard, Naples), 1835; 12 songs published under the same title by Boosey (London, 1845), 6 of which were included in the first collection; 3 popular Neapolitan songs in a collection published by Lonsdale, 1846; 24 Songs (Ricordi, Milan), etc.

Florimo was Bellini's dearest friend, and in 1876 took that composer's remains from Perc-la-Chaise, Paris, to Catania; he wrote a pamphlet, *Trasporto delle ceneri*, etc., on the event. He also founded the 'Bellini' prize at the College, a competition only open to Italian composers not over thirty, and wrote *Bellini: memorie e lettere* (1885). He wrote a Method of Singing (Ricordi), 3rd edition, 1866; *Cenno storico sulla scuola musicale di Napoli*, Naples, 2 vols., 1869-71, enlarged into 4 vols. and republished 1880-84; a *History of the College San Pietro*, Naples, 1873; *Riccardo Wagner ed i Wagneristi*, 1876, 2nd edition, Ancona, 1883, with a supplement containing letters from Verdi and Bülow, from Frau Wagner 'to the most amiable of librarians, and the juvenile octogenarian,' expressing the satisfaction of herself and her husband at a performance of a Miserere of Leo by the students of the College on the occasion of their visit there in 1880; also a lithograph copy of a letter from Wagner himself to the Duke of Bagnara the President, from the Villa d'Angri, Naples, dated Apr. 22, 1880. A. C.

FLORIO, GIORGIO, maestro di cappella, Treviso, in 1589, was for many years in the service of the Emperor Maximilian. Of his compositions, '1^o lib. de madrigali' (6 v. op. 1, 1589) only is known.

FLORIO, GIOVANNI, a 16th-century composer of masses, madrigals and songs, between 1564-1600 (*Q.-L.*).

FLORY, JEAN (*b.* Maestricht, c. 1550), was a choir-boy in the chapel of Charles V. from 1559-1562. At the time of mutation he was sent from Brussels to the school of Douay at the expense of Philippe II. He composed masses and canzone. (See *Q.-L.*)

FLOTOW, FRIEDRICH, FREIHERR VON (*b.* Apr. 27, 1812; *d.* Darmstadt, Jan. 24, 1883), operatic composer, two of whose works, 'Stradella' and 'Martha,' are famous, son of a landed nobleman of the grand duchy of Mecklenburg-Schwerin, was educated with a view to the diplomatic service.

In 1827 he went to Paris. The brilliant artistic life into which he was thrown aroused him to a consciousness of his own talent for music, and he devoted himself to a course of study under Reicha. The Revolution of 1830 drove him away for a time, but he soon

returned, and produced his first dramatic attempts at the private houses of some of the aristocracy. 'Stradella' was brought out at the Palais Royal as a short *pièce lyrique* in 1837 and Flotow wrote many numbers for the operas 'Lady Melvill' and 'L'Eau merveilleuse,' performed in 1838 and 1839 as the work of A. Grisar. His first public success was at the Théâtre de la Renaissance, where was produced, May 31, 1839, 'Le Naufrage de la Méduse' (music by Flotow, A. Grisar and Pilati), which was given fifty-three times in twelve months, and at once established his position. He afterwards rewrote the piece, and produced it at Hamburg in 1845 as 'Die Matrosen,' whence it spread to the other theatres of Germany. Meantime he had composed for the Paris theatres several other operas, such as 'La Duchesse de Guise' (1840), 'L'Esclave de Camoëns' (1843), and 'L'Âme en peine' (1846), known in London as 'Leoline' (Princess's Theatre, Oct. 16, 1848). 'Stradella' was rewritten as an opera, and brought out at Hamburg, Dec. 30, 1844, and had extraordinary success throughout Germany. In Paris, though published, it has never been produced. In London it was brought out in English at Drury Lane, June 6, 1846—a dead failure—and in Italian in 1864 at Covent Garden, when it lasted two nights only, killed by a joke of Ronconi's. It was followed by 'Martha' (Vienna, Nov. 25, 1847), which was remodelled from a ballet written in conjunction with Burgmüller and Deldevez and produced, Feb. 21, 1844, as 'Lady Henriette,' and in its new form quickly spread all over the world (London, Drury Lane, 1849). These two works Flotow never surpassed, and of his many later dramatic works the only ones which attained any general popularity were 'Indra,' 'La Veuve Grapin,' and 'L'Ombre,' which last was enormously successful not only in Paris (Opéra-Comique, July 7, 1870), but in Italy and Spain, and has been produced in London (Her Majesty's, Jan. 12, 1878), as 'The Phantom.' His 'Alma l'incantatrice' ('L'Enchanteresse'), a revised version of 'Indra,' was produced in Paris (Théâtre Italien), Apr. 9, 1878, and his 'Rosellana' was left unfinished at his death.

In 1856 he was appointed Intendant of the court theatre at Schwerin, a post which he retained till 1863. The most important works he produced during this period, when he had so many inducements to compose, were a 'Fackeltanz' and some charming music to Shakespeare's 'Winter's Tale,' composed for Weimar and produced there, Oct. 23, 1859. After giving up the management of the theatre in 1863 he returned to Paris, and in 1868 removed to the neighbourhood of Vienna. His remaining compositions, overtures, songs and chamber music, are little known, and call for no remark. In 1864 Flotow was elected

corresponding member of the Institut de France.

BIBL.—*Flotows Leben von seiner Witwe*, etc., 1892.

FLOWER, ELIZA (b. Harlow, Essex, Apr. 19, 1803; d. Dec. 12, 1846), composer, was the elder daughter of Benjamin Flower, the political writer. She published a set of 'Fourteen Musical Illustrations of the Waverley Novels' in 1831; a once popular chorus, 'Now pray we for our country,' in 1842; and a set of Hymns and Anthems, the publication of which began in 1841; a selection from them was reissued in 1888. Among them is the original musical setting of 'Nearer, my God, to Thee,' the words of which were written by the composer's sister, Mrs. Sarah Flower Adams. (D.N.B.)

FLOWERS, GEORGE FRENCH, Mus.D. (b. Boston, June 28, 1811; d. London, June 14, 1872), son of the Rev. Field Flowers, Rector of Partney, Lincolnshire, studied music in Germany under C. H. Rinck and Schnyder von Wartensee, and was organist of the English Chapel in Paris in 1836-37, of St. Mark's Church, Myddelton Square, and St. John's, Paddington, and afterwards of Beverley Minster, and St. Marie (R.C.), High Barnet. He founded a Contrapuntists' Society in 1843, and about the same time was the music critic of the *Literary Gazette*. In 1851 he established the British School of Vocalisation for teaching singing on new principles. He wrote an *Essay on the construction of Fugue, with an Introduction containing new Rules of Harmony* (1846), and a *Pictorial Representation of the Science of Harmony* (translated from Basler, 1850).

W. H. H.

FLUD (FLUDD), ROBERT (b. Milgate, Bearsted, Kent, 1574; d. London, Sept. 8, 1637), a physician whose writings have some bearing on music, was the son of Sir Thomas Flud, Treasurer of War to Queen Elizabeth in France and the Low Countries. At the age of 17 he became a student of St. John's College, Oxford, where he studied physics. After a short time of residence he went abroad for a few years, at the end of which he returned and took the degree of B.A. in 1596, and of M.A. in 1598. In 1605 he received the M.B. and M.D.

degrees, and in 1609 was made a Fellow of the College of Physicians. From 1616 until his death he was engaged in the composition of various philosophical treatises, in which he refuted the theories of Kepler and Mersennus, and advocated those of the Rosicrucian and other mystics. In the history of philosophy his name is of some importance, since his writing exercised a powerful influence over Jacob Behmen. In musical literature he holds a far less prominent position, his chief connexion with the art being found in a treatise printed at Oppenheim in 1617-24, entitled *Utriusque cosm̃ majoris, scilicet et minoris metaphysica, physica atque technica historia*. The following sections treat of musical phenomena: Tract I. Book iii. and Tract II. Part i. Book vi. and Part ii. Book iv. His *Monochordon mundi symphonicum*, written in reply to Kepler (Frankfort, 1622), contains a curious diagram of the universe, based on the divisions of a string. M.

FLÜGEL, a wing, the German appellation of a grand pianoforte or a harpsichord, from the wing shape common to both. (See Goethe's pun on *geflügelte Geister* in *Goethe and Mendelssohn*, p. 24.) Stutz Flügel is a short grand pianoforte. (See HARPSICHORD; PIANOFORTE.) A. J. H.

FLÜGEL HORN (Ital. *flicorno*), a brass instrument, the modern equivalent of the keyed bugle and practically identical with the alto saxhorn. (See BUGLE; KLAPPENHORN; SAXHORN.) It has a cup mouthpiece and a conical bore somewhat larger than that of the original saxhorn, with a corresponding difference in tone quality. The alto flügel horn, commonly known in England simply as the 'alto,' is in B flat, cornet pitch. Its tone may be said to be more mellow, less incisive, than that of the cornet. It is used in military bands, chiefly on the Continent, and has a distinct and generally accepted place in the instrumentation of brass bands. A soprano flügel horn has been made in E flat, a fourth higher, and a tenor, also in E flat, but sometimes in F, a fifth or fourth lower than the alto. The tenor has been used in Germany to play the two highest so-called 'tuba' parts in the 'Ring.' (See TUBA.) This last-named instrument is also called althorn—there is great confusion in the nomenclature of these and other horn instruments—but, strictly speaking, 'flügel horn' is used when the bell is forward, as on the bugle, and 'althorn' or 'saxhorn' when the bell is directed upwards.

The name is said to have originated in a hunting-horn (*Waldhorn*, *Jagdhorn*) used by the huntsmen whose duty it was to watch in the *Flügeln* or paths cut through the woods and give the signal on the approach of game.

D. J. B.

FLUE-WORK. Organ-stops, in regard to the manner in which their sound is generated, are grouped in two great classes—REED-WORK

and FLUE-WORK. All organ stops in which the sound is produced by the wind passing through a fissure, *flue*, or wind-way, and striking against an edge above, belong to the Flue-work, whatever may be the shape, make or tone of their pipes. The peculiarities of shape or proportion, make and tone, lead, however, to a subsequent division into PRINCIPAL-WORK, GEDACT-WORK and FLUTE-WORK. (See ORGAN.)

E. J. H.

FLUTE (1) (Fr. *flûte*, *flûte traversière*; Ger. *Flöte*, *Querflöte*; Ital. *flauto*, *flauto traverso*), a wind instrument characterised by the way the sounds are produced, the air-column being set in vibration by blowing across an embouchure, or mouth-hole, cut in the wall of the wooden (or sometimes metal) tube. See WIND INSTRUMENTS, Division I.

It sounds as an open tube, that is to say its length is approximately that of the half-wave of its lowest note, and it is capable of giving the natural harmonics in full sequence in the same way as other 'open' tubes. The tube is plugged with a cork or stopper at one end, and the 'open' condition at this end is restored by the cutting of the embouchure or mouth-hole through the wall of the tube, at a distance from the cork of about one diameter of the tube. The mouth-hole in modern flutes is usually elliptical and about half an inch in its long diameter, but in old flutes was much smaller and circular in form. The lower lip of the player partly covers the embouchure, and the stream of air is directed so as to strike the opposite edge. The exact action of this stream or air-reed has not been fully investigated, but it is tolerably certain that it vibrates, and so maintains the alternate condensations and rarefactions of the air-column. The area of the mouth-hole being less than the cross-section of the tube causes a departure from the correctness of the harmonics of the theoretical open tube (see FIRE, below), and in the history of the flute two modifications of form have been introduced with a view to restoring the desired correctness. The older of these resulted in the 'cone' flute, in which the head-joint is cylindrical, and the lower three-fourths of the instrument is slightly conical in bore, the diameter decreasing towards the foot. In this way the necessary correction was obtained. (See PLATE XXV. No. 15.) The second modification was introduced by Theobald BOEHM (*q.v.*) about the middle of last century, and consisted in a modification of the bore of the head-joint, by a coning on approximately the lines of the parabola, the main body of the flute being restored by him to its cylindrical form. (See PLATE V. No. 1.) Thus designed, we have the 'cylinder' flute of the present day, which for solo and orchestral purposes is now generally preferred, although in military bands the 'cone' flute is chiefly used.

The representative cone flute is the eight-keyed instrument, with six finger-holes, six closed keys, and two open-standing keys, one to close the normally open *d'* hole, on which the true scale of the flute begins, and so give *c♯'*, and the other to close this *c♯'* hole and give *c'*, which is the lowest note on this, the usual instrument. (For the general scheme of fingering, see FINGERING, *ante*, p. 246.) The five closed keys (the sixth or long F key being merely an alternative) give the five semitones necessary to convert the diatonic scale of *d'*, in which the flute is set, into a chromatic scale. The flute being held to the right from the lips, and slightly sloping downwards, the first, second, and third fingers of the left hand close the three upper holes, and the similar fingers of the right hand the three lower ones. The fingers being successively raised, the scale of D is produced, and by slight modification of the embouchure to increase the pressure of the lips, is repeated in its second octave. For the third octave, cross fingerings, sometimes of a complicated nature, are used, the general principle in these being the opening of holes in such positions as facilitate the subdivision of the primary sound-waves. The chief defects of the eight-keyed cone flute are the inequality in the power and in the quality of the notes. These defects are due to the necessity of placing the holes in positions which suit the natural action of the fingers, and can only be lessened, and not altogether eliminated, by the addition of extra key-work. Many players and makers worked in this direction, among them being Siccama, Clinton, Carte and Pratten.

The design of the cylinder flute as now generally adopted is chiefly due to Boehm, although, according to Rockstro, Boehm was in some measure indebted to Captain Gordon of Charles X.'s Swiss Guards. In this flute the necessity for considering the natural limits to the extension of the fingers is obviated by covering every speaking-hole (with the exception of certain shake-keys) by an 'open-standing' key, and as the thirteen holes have to be operated by eight fingers and a thumb, the other thumb being used merely to support the instrument, certain keys are coupled by ingenious mechanism. The holes are as large as is practicable in proportion to the bore of the flute, with the result that there is an equality of tone and power throughout the compass which is unattainable on the old conical model with six finger-holes supplemented by closed keys and two 'open-standing' to give the low C and C sharp. These two keys, whether on the cone or the cylinder flute, may be regarded as supplementary, as they do not exist on the normal flute with six finger-holes. Although the cylinder flute is now usually fitted with key-work on Boehm's system, as described above, this is not universal, for some players,

desiring to have the advantage of the cylinder bore and large holes adopted by Boehm without departing widely from the eight-key fingering, have introduced extra key-work to secure the result. (See FINGERING.)

The practical compass of the ordinary orchestral flute (which sounds D as its prime) is from

Wagner has written a low

B natural in 'Lohengrin' and Strauss requires the top *c♯'* and *d'''*.

In military bands, flutes in F, E flat and B flat are used. See FIRE, below, where will be also found described other members of the Transverse Flute family.

The peculiar characteristics of the flute are the beautiful mellowness of its tone, and the facility it offers for the rapid and 'vocal' execution of runs and shakes. Its tone-quality at its best is well described by Rockstro in his work, *The Flute*, as lying between the somewhat nasal tone of the oboe and the hollow sound of the cooing of a dove. This latter quality is due to a deficiency in the number or strength of harmonic partials, and is characteristic of a tube closed at one end. The diminishing of one open end by the mouth-hole, already noticed, and the presence of the small chamber or extension of length between the mouth-hole and the cork, are largely influential in giving the true flute quality, and the exact position of the cork has a very distinct influence. Helmholtz (Ellis's trans. 2nd ed. p. 205) appears to have considered that the octave and twelfth were the only upper partials heard, but the present writer found that when *d'* on the flute was sounded, the seventh partial was discernible, but with *a'* no partial higher than the fifth was detected. (*Proceedings Mus. Assoc.* 1879-80, p. 84.) In any case, it is tolerably certain that the high partials which give the peculiarly brilliant or even cutting tone to some instruments are absent, or at least indistinguishable. The cylinder flute is more powerful than the cone instrument, and has a somewhat bolder tone-quality, approaching a little towards the reedy character of the clarinet.

HISTORY.—The Greek name *Aulos* was much more comprehensive than our word *Flute*, by which it is generally translated. It usually signified an instrument with a reed,¹ either single or double, these varieties being respectively represented, in their modern developments, by the clarinet and oboe, rather than by any instrument that would now be classed with flutes. In the same way, the ancient Egyptian instruments discovered by Professor Flinders Petrie in 1890, though commonly

¹ M. V. Mahillon, after a close study of the subject, was convinced from representations in painting and sculpture that the instrument, like the Roman *flûta*, was played with the double reed. See *Catalogue of the Brussels Conservatoire of Music*, vol. i. p. 432; iii. p. 294.

referred to as flutes, were in all probability played with reeds. The ancient Egyptian *Náy*,¹ however, of which two interesting specimens were found by John Garstang in 1903, was a rudimentary flute, the tone of which was excited by blowing directly across the cut end of a reed. (See *PLATE XXV.* No. 1.) Hence there is clear evidence that, after eliminating, from the many instruments called flutes in translations, all those which are strictly reed instruments, there remain, of very ancient date, certain kinds which with strictness may be called flutes. Whether a lip-blown instrument, such as the *Náy*, or a flute with whistle mouthpiece (see *FIFPLE FLUTE*) is really the older, it is impossible to say. Some authorities contend that the cross-blown flute can be traced back to Greek and Roman times. There is in the British Museum a flute about twelve inches long with an orifice in the mouth-hole position with raised protuberances, and this orifice may have served the purpose of the modern mouth-hole. Other evidence has been adduced derived from statuary and paintings, but some at least of these instruments may have been either reed flutes or fipple flutes blown from the side (see *PIPES, EVOLUTION AND DISTRIBUTION OF MUSICAL*).

(2) *PICCOLO* (Fr. *petit flûte*), an abbreviation for *FLAUTO PICCOLO* (little flute), usually applied to the Octave Flute, otherwise called *OTTAVINO*, from its tonal relation to the larger flutes, in D, E \flat and F, compared with which it stands one octave higher in pitch. The Piccolo in D is the one in general use in the orchestra, those in E \flat and F being used almost exclusively in military bands. The instrument in D, or 'concert piccolo,' sounds the notes as written (disregarding the transposition of an octave), and therefore by writers who define the pitch of instruments by the method of notation adopted, rather than by their characteristic scales, it is sometimes referred to as being in C, and by analogy the instruments in E \flat and F as being in D \flat and E \flat respectively. The Piccolo as usually made is a small flute of conical bore with six keys, the extra keys by which the compass of the concert flute is extended downwards to c \sharp ' and c', and sometimes to b and b \flat , being very seldom used on the octave instrument. Piccolos with the Boehm fingering are, however, also made, both with the conical and the cylindrical bore. (See *FLUTE* (1) above and *FINGERING, WIND INSTRUMENTS*.) Its compass is from d'' within the treble stave to at least a''' (two octaves and five notes), but a good player can produce b \flat ''' and even c'''''. To avoid unnecessary ledger lines parts are written an octave lower than the sound really produced.

It is, with the exception of the higher har-

monic notes of the violin, by far the most acute instrument used in orchestral music.

(3) *FIFE*, the name commonly given to the chief instrument, or B \flat flute, in the Drum and Fife Band. More particularly considered, the designation signifies an early and simple form of small transverse flute (see *PLATE XXV.* No. 13), the bore of which was cylindrical throughout and the intonation in consequence very faulty. This form of the instrument, however, is practically obsolete, and the name now signifies a flute of the 'conical' type, intermediate in pitch between the 'concert' flute and piccolo. This modern instrument has, in addition to the usual six finger-holes, four, five or six keys.

(4) *FLÛTE D'AMOUR* (Ger. *Liebesflöte*), an old form of flute, standing in the key of A, and corresponding in pitch with the oboe d' amore. Both were supposed to possess a smooth and fascinating quality of tone, whence the name is derived. The bore of this variety of the flute was but very slightly larger than that of the 'concert instrument,' and therefore narrow in proportion to its length, and to this its peculiar quality was in some measure due. Although commonly said to stand in key of A, its pitch was a minor third below the concert flute in D. The key of the instrument was therefore B, and could only be said to be in A in the same sense that the concert flute is sometimes said to be in C, from the fact that its notes sound as written. Strictly speaking, the key in which an instrument stands has no connexion with notation, or with the custom of treating it as in the transposing or non-transposing class.

(5) *ALTO FLUTE* (Fr. *flûte alto*; Ger. *Altflöte*; Ital. *flautone*). This flute stands in G, a fourth lower than the concert flute, from which it differs in appearance only, inasmuch as the head-joint is turned back upon itself in  form to facilitate fingering, and the calibre is somewhat greater than that of the concert flute.

(6) *BASS FLUTE*, a name sometimes, but rather inappropriately, given to the alto flute. True bass flutes, an octave lower than the concert flute, have been made, but their adoption has not been found practicable. (See *PLATE XXV.* No. 17.)

The name is also given to a flute in B \flat , an octave lower than the military B \flat fife or flute.

FLYING DUTCHMAN, THE, see *FLUE-GENDE HOLLÄNDER, DEB*.

¹ This curious instrument is still used by the peasants about the Nile. The original of the figure was brought from Egypt by F. Grillestone, Esq., of the Charterhouse. See an admirable cut in *Lane's Modern Egyptians*.

'*Mortuis fratibus*,' op. 108 (1918); also a great number of compositions for male, female and mixed voice choirs. He has also written a large number of songs for solo voice and piano accompaniment.

The literary works of Förster began to be published in Prague from 1920; the first volume is entitled *Table of Life*.

BRU.—ZD. NEJEDLÍ, J. B. Förster (in Czech, Prague, 1909); JOA. BAKRŮŠ, J. B. Förster (in Czech, Prague, 1922).

J. B.; transl. R. N.

FÖRSTER, KASPAR (b. Danzig, 1617; d. there, end of Feb. 1673), a highly gifted musician of a roving disposition. As a singer he went from Warsaw to Venice, thence to Copenhagen as Kapellmeister. In 1655 he returned to Danzig as Kapellmeister of St. Mary's. On Sept. 15 of that year he went again to Venice and joined the war against the Turks, returning as a captain decorated with the cross of St. Mark. In 1660 he was again Kapellmeister at the Danish court, but left for Dresden in 1661 and settled later at Hamburg. Mattheson speaks in 1663 of a sonata of his for 2 violins and viola da gamba 'in stilo phantastico' as an exceptionally fine work. He was also greatly admired as a bass singer, his powerful voice going down to a full-sounding contra A. He became finally a Roman Catholic and entered the monastery of Oliva, near Danzig. A list of his still existing compositions appears in *Q.-L.*

FÖRTSCH, JOHANN PHILIPP (b. Wertheim, Franconia, May 14, 1652; d. Eutin, Dec. 14, 1732), was a tenor singer in Hamburg Council Chapel in 1678; Kapellmeister to Duke of Gottorp in 1680; took his M.D. at Kiel in 1681; was body physician to the Duke of Schleswig in 1689; and Privy Councillor to the Bishop of Lübeck at Eutin in 1694. He composed 12 operas for Hamburg, cantatas, etc. His work was greatly praised by Mattheson. (See *Q.-L.*)

FOGG, ERIC (b. Manchester, Feb. 21, 1903), composer, became a chorister at Manchester Cathedral at the age of 10, and remained there until his voice broke five years later. His musical studies were directed exclusively by his father, a well-known Manchester musician, until 1920, when he came for a time under the tuition of Prof. Granville Bantock.

At an early age Fogg composed with remarkable facility and with a certain aptitude for grasping the difference between academic rules and modern means of expression. Not unnaturally, his immature efforts were by no means free from the influence of his older contemporaries, that of early Stravinsky being predominant. The only published work among those written before the age of 15 is a 'Phantasy' for violoncello and piano.

It was in 1918 that Fogg wrote his first two important works: the ballet 'Hänsel and Gretel,' and the 'Scenes from Grimm' for orchestra. The following year came a Chinese suite for orchestra, entitled 'The Golden Valley,' and (in June) a second ballet, 'The Golden Butterfly,' on a scenario by Leigh Henry, composed in the short space of three weeks. The year 1919, moreover, brought the youthful

composer some official recognition, his 'Dance Phantasy' for piano and string quartet being awarded the prize offered by W. W. Cobbett for the best British work of that kind. In 1920 followed the 'Three Chinese Songs' (Leigh Henry), the high opus number (59) of which gives some idea of the productivity of a composer who was then but 17 years of age. The suite for violin, violoncello and harp belongs to the same year. The year 1921 saw the completion of the 'Songs of Love and Life' (Tagore) for voice and piano, and of 'The Hillside,' a setting of words by the same poet, for soprano, baritone, chorus and orchestra.

Other works are:

'Sea-shen' for orchestra; Overture to 'The Comedy of Errors' for small orchestra (1922); Poem for violoncello and piano (1922); String Quartet in A flat (1922-23). In addition to several of the works already mentioned, a number of piano pieces, songs, part-songs and a Caprice for violin are published.

E. B.

FOGGIA, FRANCESCO (b. Rome, 1604; d. there, Jan. 8, 1688), the last Italian church composer who preserved the traditions of Palestrina, studied under Cifra, Nanini and Agostini. He then entered the service of the Elector of Cologne, the Elector of Bavaria and the Archduke Leopold of Austria, in turn. After his return to Italy he was appointed maestro di cappella successively at Narni, Montefiascone and the following churches in Rome: Santa Maria in Aquiro, Santa Maria in Trastevere, St. John Lateran (1636-61), San Lorenzo in Damaso and Santa Maria Maggiore (1677), which last post he retained till his death, when he was succeeded by his son ANTONIO. He is buried in the church of S. Prassede. He published much church music for from two to nine voices (see list in *Q.-L.*), and most of the churches in Rome possess some works by him in MS. Martini has analysed some of his motets in the 'Saggio di contrappunto.' Liberati calls him 'il sostegno e il padre della musica e della vera armonica ecclesiastica.'

F. G.

FOGLIANO, LODOVICO (b. Modena; d. there, 1539), wrote *Musica theorectica* (1529), in which the laws concerning fifths and thirds were finally fixed (Ellis, *Hist. of Mus. Pitch*; *Riemann*).

FOLI (FOLEY), ALLAN JAMES (b. Cahir, Tipperary, Aug. 7, 1835; d. Southport, Oct. 20, 1899), opera and concert singer, went in early life to America. He was taught singing at Naples by the elder Bisaccia, and in Dec. 1862 he made his début at Catania as Elmiro in 'Otello.' He played successively at Turin, Modena, Milan, and in 1864 at the Italiens, Paris. On June 17, 1865, Foli made a successful début at Her Majesty's as St. Bris ('Huguenots'); on July 6 as the Second Priest on the revival of 'Zauberflöte,' and on Oct. 28 as the Hermit in 'Der Freischütz.' From that time he sang frequently in Italian at the three 'patent' theatres in upwards of 60 operas, viz. as Sarastro, Commendatore, Marcel, Caspar, Mephistopheles, Sparafucile, Basilio, Assur and

Oroe ('Semiramida'), Rodolfo ('Sonnambula'), Bide the Bent ('Lucia'), Bertram, and Daland on the production of 'Der fliegende Holländer,' at Drury Lane, July 23, 1870, etc., in addition to the parts previously named, in which his fine voice—a rich powerful bass of more than two octaves from E below the line to F—was heard to full advantage.

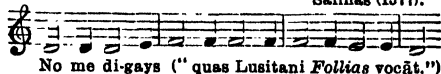

'Signor Foli' was equally well known as an oratorio and concert singer at all the important festivals. He made his first appearance in the former on Apr. 25, 1866, in 'Israel' at the National Choral Society, but his first success was on Feb. 22, 1867, in 'The Creation' at the Sacred Harmonic. His new parts in this class included Jacob, on the production of Macfarren's 'Joseph' at the Leeds Festival, Sept. 21, 1877, and Herod, on production of Berlioz's 'L'Enfance du Christ' under Hallé at Manchester, Dec. 30, 1880, and in London, Feb. 26, 1881. He played in America, at St. Petersburg, Moscow, Vienna, etc. In Russia he made a conspicuous success as Caspar, Moses (which part he sang with success at the Sacred Harmonic), and as Pietro in 'Masaniello.' He died at Southport, and was buried in the cemetery there. A. C.

FOLIA (FOLLIA) ('Folies d'Espagne'), an ancient Portuguese dance, made famous by Corelli's variations. Far from being the solemn melody which modern violinists make it, it was originally a noisy dance accompanied by tambourines, and performed by men dressed as women, who behaved so wildly that they appeared to be out of their senses, whence the name *folia*. The earliest tune described as being that of the *folia* is found in Salinas ('De musica libri septem,' 1577), who gives two versions. The words, which have a picaresque intention, are also found in the 'Cancionero musical' (c. 1500), set to a similar tune.

Salinas (1577).

No me di-gays, ma-dre, mal del pa-dre fray An-ton, etc.

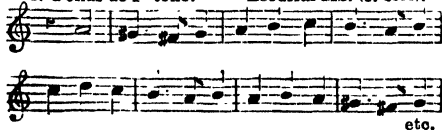

A hundred years later the term *folias* seems to have been used for several lively dance measures in triple time. The 'Cancionero de Sablonara' (early 17th century) contains three, arranged for three and four voices, e.g.:

2. *Folias*. Cancionero de Sablonara (c. 1600).

Ro-me-ri-co fo-ri-do co-ge la ni-fia, etc.

while several sets of *folias* (possibly for the organ) are found in a MS. in the Escorial (beginning: *Las especies de contrapunto*).

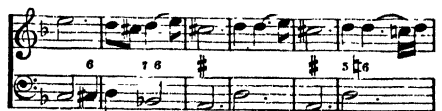

3. *Folias de 1º tono*. Escorial MS. (c. 1650).

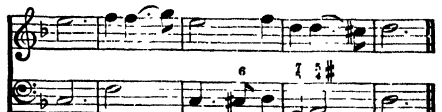

etc.

This is already a tune on the ground bass afterwards used by Corelli:

and the same is the case with the *folias* in the guitar-books of Ruiz de Ribayaz (1672) and Gaspar Sanz (1674 and 1697). The tune first appeared in England in 'The Division Violin' (1685) as 'Faronell's Division on a Ground' (see FARNELL). It has been used by a number of composers, including Vivaldi, Lully, Pergolesi, Keiser ('Der lächerliche Prinz Jodelet'), J. S. Bach ('Peasants' Cantata'), Grétry ('L'Amant jaloux'), and Cherubini ('L'Hôtellerie portugaise'). J. B. T.

FOLK-SONG, see ENGLISH FOLK-SONG, IRISH, SCOTTISH, WELSH MUSIC; SONG, etc.

FOLK-SONG SOCIETY. The English Folk-song Society was founded June 16, 1893, its purpose being the preservation, by publication, of British folk-song. The first president was Lord Herschell, and the following distinguished musicians were actively associated with it: Sir Alexander Mackenzie, Sir Hubert Parry, Sir Charles Stanford, Sir John Stainer, Sir Ernest Clarke, Miss Lucy E. Broadwood, J. A. Fuller Maitland and several others.

The members at the beginning numbered over a hundred, and Mrs. Kate Lee took the post as hon. secretary, and at her death in 1904 Miss Lucy Broadwood took over the position, which she held for four years, Mrs. Walter Ford succeeding. In 1911 Frederick Keel was hon. secretary, and during his war imprisonment in Germany Miss Lucy E. Broadwood took over the office. Iolo Williams was

for a short time hon. secretary, and the office is now held by Miss E. Lyida John.

The members of the Society have contributed largely to the different *Journals*, which have been published yearly (save for a slight hiatus during the war) with folk-songs noted in different parts of England, and much valuable folk-melody has been rescued which otherwise would have been lost. A valuable contribution was made in 1911 of Gaelic songs and tunes collected in the Hebrides by Miss Frances Tolmie. Another contribution of interest was a large number of Irish airs with their songs in the Irish language collected chiefly in Ballyvourney, County Cork, by A. Martin Freeman. No. 28 (the *Journal* published in 1925) contains a large collection of Manx songs and airs with valuable notes contributed by Miss A. G. Gilchrist. The Society is in a flourishing condition.

The formation of the English Folk-song Society led to the establishment on similar lines of the Irish and the Welsh Folk-song Societies.

THE IRISH FOLK-SONG SOCIETY was founded in 1904, and at intervals has published songs collected in different parts of Ireland, all of which have much interest.

THE WELSH FOLK-SONG SOCIETY was started in Jan. 1909, and a number of valuable *Journals*, containing Welsh traditional songs, have been issued. F. K.

FONTAINE, PIERRE, a singer in the Papal Chapel c. 1420, a number of whose songs of great historical interest are preserved in MS. codices at Oxford (Bodl. MS. 213), Paris, Bologna and Madrid (*Riemann*; *Q.-L.*).

FONTANA, GIOVANNI BATTISTA (*b.* Brescia; *d.* there, 1630), one of the first virtuosi on the violin, and one of the first composers of violin sonatas. He left his compositions to the Church delle Grazie at Venice for publication, which G. B. Reghisi undertook in 1641. He died of the plague. Two of Fontana's violin sonatas appear in Wasielewski's *Die Violine im 17ten Jahrhundert*. (See also J. S. Shedlock, *The Pianoforte Sonata*; E. v. d. Straeten, *The Romance of the Fiddle*.)

E. v. d. s.

FONTANELLI, CONTE ALFONSO, was in the service of Alfonso II., d' Este, at Modena from Apr. 1586 as 'gentiluomo,' 1598 as 'maestro di camera.' On June 15, 1605, he settled in Rome, where he was still living in 1608. His contemporaries held him in high esteem as a composer, and Orazio Vecchi re-edited in 1603 his first book of madrigals (5 v.; first published in 1595). The second book, published in 1604, had two more editions in 1609 and 1619. A few single songs are in collective volumes (see *Q.-L.*).

FONT Y DE ANTA, MANUEL (*b.* Seville, 1895), a pupil of Turina and Sibelius, who

in addition to a quantity of light music has written serious chamber music. His works include 'Perchel' (symphonic variations), a sonata for pianoforte and violin, a suite for pianoforte, a Mass and music for 'La viuda astuta' (the 'Vedova scaltra' of Goldoni).

J. B. T.

FOOTE, ARTHUR WILLIAM (*b.* Salem, Massachusetts, U.S.A., Mar. 5, 1853), an American composer. He studied with Stephen A. Emery at the New England Conservatory of Music, Boston. After graduating from Harvard College in 1874 he studied with B. J. Lang and John Knowles Paine. He became a church organist in Boston, where he has lived ever since. From 1909-12 he was president of the American Guild of Organists. He has published *Modern Harmony* (1905) with W. R. Spalding, and *Modulation and Related Harmonic Questions* (1920). His compositions include:

'In the Mountains,' overture for orch.
Prologue to 'Francesca da Rimini,' for orch.
Three orchestral suites.
Concerto for v'cl.
Quintet for PF. and strings.
Two PP. trios.

Cantatas: 'The Farewell of Hiawatha,' 'The Wreck of the Hesperus,' 'The Skeleton in Armour.' R. A.

FORBES, (1) HENRY (*b.* London, 1804; *d.* there, Nov. 24, 1859), studied music under Sir George Smart, Hummel, Moscheles and Herz. He was an excellent pianist and organist, and conductor of the Società Armonica. He for some years held the appointment of organist of the parish church of St. Luke, Chelsea. His published compositions comprise several songs and a collection of psalm tunes for four voices called 'National Psalmody' (1843). He also composed 'The Fairy Oak,' an opera produced at Drury Lane Theatre in 1845, and 'Ruth,' an oratorio, performed at Hanover Square Rooms in 1847. He gave concerts with his brother (2) GEORGE (1813-83), organist of St. Mary's, Bayswater Square, and author of many pianoforte pieces. W. H. H.

FORCER, FRANCIS (*c.* 1650-1705), composed songs (published by Playford, 'Choice Ayres and Dialogues,' 1679); 'The Theatre of Music,' 1685-87; also MS. pieces in the Fitzwilliam Library at Cambridge; a MS. overture and 8 tunes at Ch. Ch.; and a MS. of instrumental trio and organ pieces (B.M.). In 1684 he was one of the four stewards of the St. Cecilia's Day celebrations. About 1697, after the decease of Sadler, he acquired, in partnership with James Miles, the lease of the famous Wells and the Music-house (*D.N.B.*, vol. 19, p. 414; Hawkins, ii. 701 n.). E. v. d. s.

FORD, ERNEST (*b.* Warminster, Wilts, Feb. 17, 1858; *d.* June 1919), conductor and composer, was the son of the vestry clerk and organist of the Minster there. From 1868-73 he was a chorister in Salisbury Cathedral. In 1875 he won the first Goss Scholarship at the R.A.M., where he studied under Sullivan. Later Ford spent some time in Paris studying under

Lalo, whence he went to America, where, in celebration of the 250th anniversary of the foundation of Harvard University, a motet by him, a setting of the Psalm 'Domine Deus,' was the chief musical work performed. At one time Ford was official accompanist at the Saturday Popular Concerts, St. James's Hall, London, and on the opening of the Royal English Opera House he was selected with F. Cellier to conduct Sullivan's 'Ivanhoe.' Later he became conductor of the Trafalgar (now the Duke of York's) Theatre, where the comic opera 'The Wedding Eve' was produced in London with music revised and mainly composed (as regards the second and third acts) by Ford; and of the Empire Theatre, where much of the music to the ballets produced there between 1894 and 1897 was composed by him. In 1897 he became conductor of the Royal Amateur Orchestral Society. For the Empire he composed the ballets 'La Frolique,' 'Brighton Pier,' 'Faust' and 'La Danse'; there exists a volume of beautiful settings of poems by Shelley; while his operas and operettas include 'Daniel O'Rourke' (1884); 'Nydia' (a duologue by Justin H. McCarthy, 1889); 'Joan' (Robert Martin, 1890); 'Mr. Jericho' (operetta by H. Greenbank, 1893); 'Jane Annie' (libretto by J. M. Barrie and Sir A. Conan Doyle), produced at the Savoy, May 13, 1893; a cantata, 'The Eve of the Festa.'

R. H. L.

FORD, THOMAS (b. circa 1580; d. Westminster, Nov. 1648), lutenist and composer. Nothing is known of his personal history before 1607, in which year he published his 'Musicke of Sundrie Kindes.' (See ENG. SCH. OF LUTENIST SONG-WRITERS.) In 1611 he was one of the musicians of Henry, Prince of Wales, with a salary of £30. In 1614 he contributed two short anthems to Leighton's 'Teures or Lamentaciouns.' In 1626 he was appointed one of the musicians to Charles I. at £80 per annum. He was buried at St. Margaret's, Westminster, on Nov. 17, 1648.

Ford was one of the great group of lutenists who followed John Dowland in that particular type of composition which was termed the 'Ayre.' The first section of 'Musicke of Sundrie Kindes' contained eleven Ayres; the last of these is a dialogue and is of little interest, but the remaining ten are admirable examples of the 'Ayre.' They were all set for alternative methods of performance, either as solo songs with lute accompaniment or as unaccompanied songs of four parts. 'Since first I saw your face' is very widely known in the latter form, but it is quite as beautiful when sung as a solo song. The most important of Ford's songs is the first of the set, which is highly impassioned and laid out on more elaborate lines than the rest; it may be ranked with some of the finest of Dowland's songs. The remaining songs are of simple design and

are characterised by the freshness and beauty of their melodies. The second section of 'Musicke of Sundrie Kindes' contains a number of dances for instruments. Some catches and rounds by Ford were included in the younger Hilton's 'Catch that catch can,' published in 1652, and a few anthems of his are to be found in manuscript at the British Museum and elsewhere. In a fine set of 16th-century manuscript partbooks in the Fellows' Library at Winchester College there are added in a later hand (c. 1600-20) a few short madrigals described in the manuscripts as 'Mr. Ford's three parts'; these may be the work of Thomas Ford, although they are much inferior to the 'Ayres' in 'Musicke of Sundrie Kindes.' There is an important collection of Ford's in MS. at Ch. Ch. (see Arkwright, *Cat.*)

E. H. F.

FORKEL, JOHANN NICOLAUS (b. Meeder, in Saxe-Coburg, Feb. 22, 1749; d. Göttingen, Mar. 17, 1818), a writer on the history and theory of music, famous as the first biographer of J. S. Bach.

The son of a shoemaker, he educated himself by the study of Mattheson's *Vollkommener Capellmeister*. Having a fine voice he was appointed chorister at Lüneburg in 1762, and four years later 'Chorpräfect' at Schwerin. In 1769 he entered the university of Göttingen to study law, but soon occupied himself exclusively with music, and became organist of the university church. In 1778 he was appointed director of music to the University and graduated as doctor of philosophy in 1780. He conducted the weekly concerts of the Akademie from 1779 to 1815. On the death of Emanuel Bach he hoped to have been appointed his successor at Hamburg, but Schwenke obtained the post, and Forkel remained at Göttingen till his death.

Forkel's first literary work, *Über die Theorie der Musik*, etc. (Cramer, Göttingen, 1774, republished in 1777), a pamphlet urging the foundation of lectures on music at Göttingen, was followed by many others, notably *Musikalisch-kritische Bibliothek*, 3 vols. (Gotha, 1778), containing violent attacks on Gluck's 'Iphigénie in Aulide'; *Über die beste Einrichtung öffentlicher Konzerte*, 1779; *Genauere Bestimmung*, etc., 1780; the *Mus. Almanach für Deutschland* for 1782, 1783, 1784 and 1789, containing particulars (not always trustworthy) as to novelties in music; his *Allgemeine Geschichte der Musik*, 2 vols. (Leipzig, 1788 and 1801), founded on Hawkins, Burney and Marpurg, interesting as a literary¹ curiosity; *Geschichte der italienischen Oper*, 2 vols. (Leipzig, 1789), a translation of Arteaga's book; and *Allgemeine Literatur der Musik* (Leipzig, 1792), his most ambitious work. This book, which shows the amount of his knowledge and reading, is the

¹ After Forkel's death, Schwickert, the publisher, offered the materials for completing the third volume to Fétis and Choron, but they declined the task.

foundation of Becker's *Systematisch-chronologische Darstellung der musikalischen Literatur*.

Forkel was the first to attempt a biography of Bach, *Über J. S. B.'s Leben, Kunst, und Kunstwerke* (Leipzig, 1802),¹ translated into English under the title *Life of J. S. Bach, with a critical review of his compositions* (London, 1820). It was newly translated as *Johann Sebastian Bach, his Life, Art and Work* a hundred years later (London, 1920) by Charles Sanford Terry, with an introduction, notes and appendices (see BACH, J. S., Bibliography). In his introduction (p. xx) Terry quotes a letter from Samuel Wesley which shows that the former *Life* was not translated by Wesley himself as had been supposed, but by 'Mr. Stephenson, the Banker.' As Forkel knew little of Bach's great sacred vocal works, he treats him mainly from the point of view of the organ and clavier, but the book will always remain as the foundation of all subsequent Lives of the great musician. Among Forkel's musical compositions may be mentioned the oratorios 'Hiskias,' 1789, and 'Die Hirten bey der Krippe,' four cantatas for chorus and orchestra, clavier concertos, and many sonatas and variations for harpsichord (Q.-L.).

The State library at Berlin contains an interesting specimen of Forkel's labours. This is a large volume of church music of the 16th century, scored by himself, and, though printed, unique. It was intended to form the first volume of a series of examples illustrating the history of music, and was undertaken at the instance of Sonnleitner of Vienna. The plates were engraved in Leipzig, and the proofs were already in Forkel's hands, when the French took the city in 1806, and seized everything in the shape of metal to be converted into bullets. His plates having been thus destroyed Forkel had the proof-sheets bound, and this is the copy now at Berlin. The masses it contains are taken from 'Missae tredecim . . . Norimbergae . . . arte Hieronymi Graphei, 1539,' and 'Liber quindecim Missarum . . . Norimbergae apud Joh. Petreium, 1539.' F. G., with addns.

FORKS, see TUNING-FORKS.

FORLANA, an Italian dance, a favourite with the Venetian gondoliers. It is in 6-8 or 6-4 time, but possesses no special characteristics. An example of this dance may be found in J. S. Bach's suite for orchestra in C major. The following quotation of the opening bars of a forlana of the 17th century is from F. L. Schubert's *Die Tanzmusik*.

¹ A new German edition was published in 1925 by the Bärenreiter-Verlag, Augsburg.

FORM. Every attribute of music, relationships of pitch and rhythm in succession (melody) and concurrently (polyphony and harmony), plays its part in establishing the form of a musical work by creating a series of identities and differences which the ear can recognise. As long as musical sound consists solely of repetition, the monotone; it remains formless. On the other hand, when music goes to the other extreme and refuses to revert to any point, either rhythmic, melodic or harmonic, which recollection can identify, it is equally formless. Repetition and contrast, therefore, are the two twin principles of musical form. They are found asserting themselves in the most primitive examples of the folk-tunes of all nations, and are not to be escaped from by the most daring innovators in modern music. The simplest illustration of them in purely melodic music is that frequently represented by the formula A B A, that is, the placing side by side of two ideas, melodic phrases or rhythmic figures, followed by the repetition of the first. Certain mediæval hymn-tunes, e.g. 'Jesu dulcis memoria' ² (Mode I.) and 'Jesu Redemptor omnium' ³ (Mode VIII.), are well-defined instances. Their first and fourth lines are identical (A); their second and third together make an elongated contrast (B). A natural modification is that in which A receives repetition for the surer establishment of its identity, before the contrast is indulged in; result, A A B A, a form of which 'O Lux beata Trinitas' ⁴ (Mode VIII.) is an example. More elaborate variants of the same process, some in the nature of a rondo form, A B, A C, A D, etc., are found in more extended tunes of the same period. The Christmas sequence, 'Lætabundus,' ⁵ which repeats the first line of the melody four times between succeeding lines, is typical. A further principle of Form, that of variation, is found here, for the later repetitions of the first line receive slight alteration and extension, of a kind which does not destroy the identity as a recognisable repetition of the first idea.

These church tunes are legitimate examples of the sense of musical Form asserting itself, because the principal phrases (A) make their recurrences independently of any verbal suggestion. Moreover, they illustrate the existence of this sense of Form in composition of the preharmonic era. Each is written in a mode devised for purely melodic composition (see MODES, ECCLESIASTICAL).

This sense of Form was, if not lost, at any rate clouded in the later mediæval period in which the principles of polyphony and of harmony were evolved, and the modes were gradually altered by harmonic necessities. All those devices of imitation and canon which DUFAY

² *English Hymnal*, 238.
³ *Ibid.* 164.

⁴ *Ibid.* 189.
⁵ *Ibid.* 22.

(*q.v.*) and his followers developed, and which, having become an integral part of polyphonic vocal style, ultimately led to the instrumental *FUGUE* (*q.v.*), were essentially efforts to apply the principles of repetitions and contrasts to produce a sense of orderliness, that is, *Form*, in polyphonic music. It is worth noting, by the way, that while 'the majority of the poems [of Dufay's secular songs] are either in *Rondel* or *Rondeau* form,'¹ the composer does not apply to them the method of the musical *rondo* (as described above), which would naturally make musical repetitions, with or without variations, accord with verbal ones. Rather he confines his sense of *Form* to such unity as occasional imitation between the parts may produce. Broadly speaking, this practice prevailed throughout the madrigalian period.

A third period of musical form was entered on when, near the end of the 16th century, the growth of harmony and of harmonic instruments, particularly the lute and the keyboard instruments, had practically reduced the modes to two (major and minor) and brought the recognition of a fresh source of contrast. This was the transposition of a mode to a new pitch, involving modulation. The key system thus produced brought all those developments of form associated with the sonata which are analysed by Sir Hubert Parry in the succeeding article. They are together by far the most important expansion of the simple principles just outlined, and they embrace the whole period of composition from the end of the 16th century to Beethoven and his followers.

The only further question to be met is whether *Form* can now be considered to have entered on a fourth period. Later composers of the 19th century brought innumerable personal modifications of Beethoven's formal method; the most potent in their influence on others were those of Liszt (see the discussion of his pianoforte sonata in *B minor* under *SONATA*) and CÉSAR FRANCK (*q.v.*). The one made the general plan of first movement *Form* contain in itself the several moods of the usual group of four movements; the other, while retaining the group of separate movements, sought to give them greater continuity by a process of accumulating the thematic material. Moreover, the experience gained by these composers and their contemporaries in moulding the principles of *Form* to the requirements of works of the symphonic-poem type has rendered all modern handling of it more malleable. The symphonic poems of Richard Strauss, for example, will be found to illustrate very fully, despite their apparent freedom, the principles of exposition, development and restatement. Harmonic developments (see *HARMONY*) have naturally reacted on *Form*, particularly the widespread acceptance of the idea that two or

more tonalities or keys may be maintained simultaneously. But these are only fresh illustrations of the fertility of the sonata type based on the contrasts of themes and keys, and recent examples, such as the chamber music of Debussy and Ravel and the symphonies of Vaughan Williams, afford proof that the type is by no means exhausted. In such different manifestations as the series of ten pianoforte sonatas of Scriabin and the early chamber works of Schönberg, the gradual supersession of the older tonal principles by new ones devised by the individual composer is clearly traceable.

There is now a group of composers which rejects the tonal premises which have led to the logical conclusion of sonata form. With the remodelling of scales and all the regrouping of sounds implied by the abandonment of tonality, new concepts of identities and differences must arise. So far as may be judged by the later works of Stravinsky, the acknowledged leader of this group, the maintenance of a continuous rhythmic movement takes the place of recurring features, and tone-colour (*timbre*), in addition to its more obvious use as a source of variety, can become a prime factor in the preservation of unity. While this new technique remains in its present inchoate state, it is impossible even to suggest what its outcome in *Form* may be. We can only recognise that between it and the forms we have known there is a gulf as wide as that existing between the early polyphonic and the preharmonic melody. c.

EVOLUTION OF SONATA FORM

The means by which unity and proportion are arrived at in musical works are the relative distribution of keys and harmonic bases on the one hand, and of 'subjects' or figures or melodies on the other; and this distribution is called the *Form* of the work. The order of distribution varies greatly with the conditions. Music set to poetry with a 'burden' to each verse would naturally adopt the form of repeating the same melody to each recurrence of the burden; and when the words implied similar circumstances and feelings would adopt repetition of similar or allied phrases. In dramatic works the order of distribution must vary with the development of the emotional crises, and in such cases will be rather a distribution of culminations and gradations of intensity of passion and emotion than the more obvious one of key and figure; though, if the relation between important figures of melody and the special circumstances to which they are appended be observed, the notion of form as defined by subjects will still continue to be perceptible. Analogously, in music which is supposed to represent some story or idea, such as is now known by the name of *PROGRAMME MUSIC* (*q.v.*), the

¹ Stainer, *Dufay and his Contemporaries*, p. 17.

form must be developed with the view of interpreting that programme truly and consistently. Such music may be compared in this to the work of a painter who trusts rather to the stirring nature of his subject than to the perfection of its composition to engage and delight the beholders, while in a portrait or picture of less vivid interest the element of composition, following generally and easily recognised principles, would be of vital importance. Similarly in programme music the composer may choose to follow the established so-called classical models, but it can hardly be doubted that a genius deeply impregnated with the spirit of his subject would seek to create a form of his own which should be more in consonance with the spirit of his programme—even as Beethoven did without programme, expressing some marvellous inner workings of his emotions, in the first movement of the sonata in E, op. 109. But even with Beethoven, in the case of music without either programme or words to explain its purpose, such irregularity is rare. It is here especially that the nature and capacity of the minds of the auditors play an important part. Their attention has to be retained for a space of time, sometimes by no means insignificant; and connection has to be established for them without the aid of words or other accessories between parts of the movement which appear at considerable distance from each other, and the whole must be so contrived that the impression upon the most cultivated hearer shall be one of unity and consistency. In such a case Form will inevitably play an important part, becoming more and more complex and interesting in proportion to the development of readiness of comprehension in the auditors. The adoption of a form which is quite beyond the intellectual standard of those for whom it is intended is a waste of valuable work; but a perfect adaptation of it to their highest standard is both the only means of leading them on to still higher things, and the only starting-point for further progress. From this it will be seen that in musical works which are connected with words or programme — whether choruses, songs, arias or ballads, etc.—Form is dependent on the words; and such works, as far as they are reducible to any definable system, are reducible only to the simplest, and such as admits of infinite latitude of variation within its limits. But in instrumental music there has been a steady and perceptible growth of certain fundamental principles by a process that is wonderfully like evolution, from the simplest couplings of repeated ideas by a short link of some sort, up to the complex but consistent completeness of the great instrumental works of Beethoven.

There can hardly be any doubt that the first attempts at Form in music were essentially unconscious and unpremeditated. Therefore if any conformity be observed in the forms of

early music derived from various sources, it would seem to indicate a sort of consensus of instinct on the part of the composers which will be the true starting-point of its posterior development. It must be remarked by way of parenthesis that even as late as 1600—apart from ecclesiastical music—the instrumental and vocal orders¹ were not nearly so distinct as they are now, for the tendency to strongly and clearly marked distinction in kind is notoriously a matter of slow growth. Hence examples may be drawn with perfect safety from both kinds wherever they can be found.

PRIMITIVE RONDOS.—The first basis of true Form, apart from the balance of groups of rhythms, is essentially repetition of some sort, and what is most vital to the question is the manner of the repetition. The simplest and most elementary kind is the repetition of a phrase or bit of melody with a short passage in the middle to connect the two statements. As an example may be taken an ancient German Choral, 'Jesus Christus unser Heiland, Der den Tod überwand' (1535), which is as follows:

In this the bars bracketed are the same, and the phrase which connects them is very short; and the whole presents about as simple and unsophisticated a specimen of Form as could well be conceived.² The simple basis of which this is a type is the origin of the rondo-form, which has survived with great variety and modification of treatment till the present day. The first advances upon the above example which offer any points of interest seem to be in cases where we find either a contrast aimed at in the passage which forms the link, or a number of repetitions succeeding one another, with differences in the passages connecting them. These two constitute the two great branches through which this primitive idea diverged into thousands of Arias, Lieder, Nocturnes, Romances, Scherzos and other lyrical pieces on the one hand, and the movement which still retains its name of rondo on the other. As an early example of the first we may take the song 'Roland courez aux armes' from Lully's opera 'Roland,' which is too long for insertion here, but will be found in the 136th chapter of Hawkins's *History of Music*. In this there are twelve bars of melody in C, concluding in that key; followed by twelve more bars, in which there is modulation first to

¹ For instance, many English madrigals were published as 'apt for Viols and Voices.'

² Compare the plain-song melodies referred to above.

the relative minor A and then to the dominant key G major, in which key this portion concludes; after which the first twelve bars are resumed precisely as at first, and so the whole concludes. Here the employment of modulation in the connecting passage is a strong element of contrast, and indicates a considerable advance in musical ideas on the obscure tonality of the preceding example. On the other hand, almost contemporary with Lully, there are, in the works of Couperin, numerous specimens of the rondo, consisting of a number of repetitions, with differences in the connecting passages. In these the passage with which the movement begins is repeated over and over again bodily and without disguise, and separate short passages, of similar length but varying character, are put in between. Couperin was particularly fond of the rondo-form, and examples may be found in profusion in his works. The one which is perhaps best known and most available for reference is the 'Passacaille en Rondeau'.¹ A point specially observable in them is the rigidity and absence of any attempt at sophistication in the process. The sections are like crude squares and circles fitted together into a design, and no attempt, or very little at best, is made to soften off the outlines by making the sections pass into one another. The chief subject is distinct and the episodes are distinct, and the number of repetitions seems to depend solely on the capacity of the composer to put something in between. Still it is clear that the virtue of contrasts both of style and of key is appreciated, though the range of modulation is extremely limited. It is noticeable, moreover, as illustrating the point of view from which Form at that time was regarded, when recognised as such, that the divisions of the rondo are marked with extra emphasis by a *Fermata* or pause. From this to such a rondo as we find in the Partita in C minor of Bach is a great step. Here there are no strongly marked divisions to stiffen the movement into formality, but it flows on almost uninterruptedly from first to last. The episodes modulate more freely, and there is not such a rigid regularity in the reappearance of the main subject. It appears once outside of the principal key and (which is yet more important) is brought in at the end in an extremely happy variation, which is prophetic of Beethoven's favourite practice of putting identical ideas in different lights. The next stage of development of this form—and that probably rather a change than an improvement on the above beautiful little specimen of Bach—is the Rondo of Haydn and Mozart. Their treatment of it is practically the same as that of Couperin, but in many cases is strongly modified by the more important and elaborate 'First-movement-form,' which by their time had grown

into clearness of system and definition. The rondo-form, pure and simple, has remained till now much as it was in Couperin's time, gaining more in expansion than in change of outline. Even the great rondo of Beethoven's 'Waldstein' sonata (op. 53) consists of the repetition of a subject of some length interspersed with episodes; with modifications in the length of the episodes and the repetition of one of them, and a great coda founded on the principal subject to conclude with. The further consideration of the rondo as affected by the 'first movement' form must be postponed till after the examination of the latter.

KEY DISTRIBUTION.—By the side of the primitive rondo above quoted a form more complex in principle is found. In this form the relations of harmonic roots come largely into play, but its most striking and singular feature is the manner of the repetition by which it is characterised. And in this case examples drawn from various early sources which agree in the peculiar manner of the repetition will be of value, as above indicated. In this form the movement is divided into two halves, and these again into two sections. The first half, or complete period, comprises a sort of rough balance between the amount which tends to the tonic and the amount which tends to the dominant, thereby indicating the division into two sections; and the second half begins with passages which have more freedom in the distribution of their roots, which constitutes its first section, and ends with a quotation of the last bars or figures of the first half, which constitutes its second section. This will be best understood from an example. The following is a specimen of the dance tune called a 'Branle' or 'Brawl,' from the 'Orchésographie' of Thoinot Arbeau (Langres, 1589):

In this it will be observed that the first half of the little tune is divided at (a) by the strong emphasis on the dominant, from which point it returns to the tonic, and so closes the first half. The second half, beginning at (b), can easily be perceived to have a freer harmonic basis than either of the first sections, and so leads the mind away from the tonic and dominant centres in order that they may come in fresh again for the conclusion; and having carried the figure on to an apparently disproportionate length (which serves the excellent purpose of breaking the monotony of constant pairs of bars), finally, at (c), resumes the little

¹ Published in the complete edition of Brahms and Chrysander, vol. I. p. 152.

tailpiece of the first half and thereby clenches the whole into completeness. The manner in which this answers the requirements of artistic construction is very remarkable, and it will be found hereafter that it does so throughout on a precisely similar scheme, in miniature, to that of a 19th-century symphony movement. It would be natural to suppose that this was pure accident if there were not other ancient examples of the same form coming from the most opposite sources. The above branle is a French dance tune; if we turn from it and take the most famous German Choral, 'Ein feste Burg' (1529), the principles of its construction will be found to be identical. It is so well known that it is needless to quote it. It will be sufficient to point out that the first half of the tune ends at the conclusion of the second line; and of this half the first line ends on the dominant and the second on the tonic, precisely as in the branle; and it is then repeated for the third and fourth lines. The music to the fifth, sixth, seventh and eighth lines answers to the passage between (b) and (c) in the branle, and like it presents a variety of harmonic bases; and to clench it all together the music of the second line is quoted to conclude with, precisely as is the little tailpiece of the first half in the branle. It is impossible not to feel the force of this as a point of musical form when it is once realised; it has the effect of completeness for a short tune which is unrivalled. If we turn to far other sources we shall find an English specimen in Thomas Ford's song, 'Since first I saw your face' (1607), in which the second and last line will again be found to be identical, and the other points of the scheme to conform in like manner. Even in Italy we find a little 'Sinfonia' for flutes in Giacomo Peri's 'Euridice' (1600), which at least has the one important feature of repeating a little characteristic figure of the cadence of the first half to conclude the whole. It must not be supposed that this form was by any means universal so early as the middle of the 16th century—a time when notions of harmony proper, as apart from polyphony, were but dawning, and the musical scales and keys as we now know them were unsettled. It is wonderful enough that there should be any examples of Form at all in such a state of musical language; for Form as now recognised depends greatly upon those two very elements of harmonic bases and relation of keys; so that what was then done in those departments must have been done by instinct. But by the middle of the 17th century musical knowledge in these respects was much more nearly complete, and the scope of composers proportionately widened. Accordingly we find a greater freedom in the treatment of forms; but the outline of the same form on a larger scale is found to predominate in the instrumental

works of the time, especially such as pass under the names of dances; though it is probable that those sets of them which were called 'Suites,' or 'Sonatas,' or 'Ordres,' were rather purely musical than terpsichorean. In the ecclesiastical sonatas (Sonate da Chiesa) the style still continues fugal and polyphonic.

It would be impossible to give even a faint idea of the number of examples of this form which are to be found in these dance-tune suites, but it will be well to take some typical specimens and indicate the points in which they show development. In Corelli's chamber sonatas there are many clear instances. Thus in the giga of Sonata IV. of the 'Opera Quarta' there is the usual division into two halves. Of these the first is again divided into two phrases, the first phrase all in the tonic key, D; the second then modulating to the key of the dominant and closing in it. The second half begins with a sort of development of the figures of the first part, then modulates to nearly related keys, and after passing back to the original key concludes with a quotation of the last few bars of the first half. In this scheme there are two points of advance on the previous examples; the first part concludes in what we will henceforward call the complementary key, or key of the dominant, instead of merely passing to it and back and closing in the principal key—by that means establishing more clearly the balance between it and the principal key; and secondly, the first part of the second half of the movement presents some attempt at a development of the features of the subjects of the first part, and real free modulation. The corrente and giga of the seventh sonata of the 'Opera Seconda' are also remarkably clear specimens of repetition of the end of the first part as a conclusion to the whole, since full six bars in each are repeated. Both examples are, however, inferior to the above-quoted giga in respect of the conclusion of the first part being in the principal key—like the older examples first quoted as typical—though like that giga they are superior to the older examples in the free modulations and reference to the conspicuous figures of the subjects in the first section of the second half of the movements.

Domenico Scarlatti (1683–1757) was a contemporary of Handel and Bach, being but two years their senior; nevertheless he must be considered as historically prior to them, inasmuch as the very power of their genius would make them rather the prophets of what was to come than representatives of prevalent contemporary ideas. Domenico Scarlatti left many examples of studies or sonatas which are essentially expansions of the plan of the original branle. In some the first part concludes in the principal, and in some in

the complementary key, either dominant or relative major. A very extended example is found in a study in D minor, allegro.¹ In this there is first a section chiefly in D minor, which modulates to F, the relative major, and concludes in that key—altogether twenty-two bars; and then another section, of twenty-one bars, all in F major, and closing in that key. This concludes the first half, which corresponds with the first half of a modern sonata movement. The second half sets out with a reference to the first subject in F, and then modulates freely to various keys, ultimately closing in the original key of D minor, and there taking up the thread of the latter section of the first half of the movement, and giving the whole twenty-one bars almost identically, transposed from the original key of F into the principal key of D. The descent of this movement from the dance type is sufficiently clear without again going over the ground. Its most conspicuous advance is in its relative extension, twenty-two bars corresponding to two in the original example, and the other divisions being in proportion. The free modulation of the second half of the movement is the strict counterpart on a large scale of the changing harmonic basis in the branle, and this is an advance due to the great increase of musical knowledge and resources. In other respects the similarity between the typical progenitor and its descendant is sufficiently clear. D. Scarlatti's works are almost universally a great advance on Corelli in the clear definition of the subjects and the variety of the rhythms, which enables him to approach much more nearly to modern ideas in what is called the 'development' of the subjects; though it is true that a mere patchwork of short subjects stated one after another often serves the purpose with him of the more continuous and artistic development. It will also be noticed that Scarlatti generally abandons the names of the dance tunes while retaining their forms.

There were other contemporaries of Bach and Handel who must be noticed before them for the same reasons as Scarlatti. Their works generally present the feature of extensive repetition of the last section of the first part as a conclusion to the whole, in a very marked manner. Thus in a corrente from a suite by Domenico Zipoli (b. 1685) precisely the same system is observable as in the example by Scarlatti. And in a sonata by Wagenseil (b. 1715) in F, op. 1, the first movement is a very extended specimen of the same kind; and the last movement, a minuetto, is remarkable for the great length of the phrase repeated. The first half of the movement is but sixteen bars, of which the latter twelve are all in the dominant key; and the whole of these twelve

bars are repeated at the conclusion, the first four having been disposed of at the beginning of the preceding 'development,' as in the study of Scarlatti.

THE FORMS OF BACH AND HANDEL.—Bach and Handel present an extraordinary variety of forms in their works. Some are identical with the form of the branle and 'Ein' feste Burg'; others are like the primitive rondo on a very extended scale; and many exhibit various stages of progressive development up to the perfect types as used by Mozart.

A very large number of the movements in the suites of both Bach and Handel are in the same form as the previous examples. The first half is divided, not very strongly, into two sections, in which the principal key and the complementary key alternately predominate. The second half sets out with development and free modulation, and concludes with a quotation of the concluding bars or features of the first half. To take Bach's 'Suites françaises' as examples, the following, among others, will be found to conform to this simple scheme: Gigue of No. 1, in D minor; Courante of No. 2, in C minor; Gigue of No. 3, in B minor; Courante of No. 4, in E♭; the Allemande and the Courante of No. 5, in G; and the Courante and the Bourrée of No. 6, in E. As examples of the same from Handel's suites the following may be taken: Courante of No. 1, in A; Allegro of No. 2, in F; Courante of No. 4, in E minor; Allemande of No. 5, in E major; and the Giggues of the 5th, 7th, 8th and 10th suites. In many of these there is a systematic development of the figures of the subject in the first section of the second half of the movement; but a tendency is also observable to begin the second half of the movement with a quotation of the theme which began the whole, which answers practically to the first subject. This was also noticed in the example quoted from Scarlatti. Bach not unfrequently begins the second half with an inversion of the characteristic figure of the commencement, or treats it in a free kind of double counterpoint, as he sometimes does in repeating the conclusion of the first half at the conclusion of the whole. (See the last four bars of the Allemande in the Partita No. 2, in C minor.) How the subject reappears is, however, a matter of subsidiary importance. What is chiefly important is the fact that the first subject gradually begins to make its appearance clearly and definitely in the second part as a repetition from the first part; and it is very interesting and curious to note that there was a long hesitation as to the position in the second half which this repetition should occupy. The balance for a long time was certainly in favour of its appearing at the beginning of the second half, and in the complementary key of the movement. A very

¹ No. 7 of a set of 'Pièces pour le clavecin' published by Cramer.

clear and easily recognisable instance of this is the opening 'pomposo' movement of the overture to Handel's 'Samson,' which differs in form from the first movement of a modern sonata or symphony in this one particular only. But there are specimens of form in both Bach and Handel which are prophetic of the complete system of Mozart.

The fact is so interesting and instructive that it will be worth while to give an analysis of the shortest example of Bach, in order that it may be compared with the scheme of Mozart's form, which will be given later. A little air in the 'Suite française' No. 4, in E \flat major, sets out with a clearly defined figure which may be called the 'first subject,' and modulates in the fourth bar to the key of the dominant, in which the figure which may also be called by analogy the 'second subject' appears, and with this the first half of the movement concludes. The second half sets out with modulations and hints at the figures of the first half, after ten bars comes to a pause on the dominant of the original key, and from thence recommences the first subject; and the latter part of the section being deftly altered by a device of modulation—of which Mozart made great use in the same position in the movement—enables the whole of the last four bars of the first half of the movement to follow also in E \flat , so concluding the air.

There is no need to give a like detailed analysis of the allegro in Handel's Suite No. 14, in G. It will suffice to point out that its form is identical with the preceding on a large scale; and that it is clearer and easier to recognise, inasmuch as the sections do not flow so closely into one another, and the subjects are more definite. These two examples are, however, exceptional as regards both Bach and Handel and their immediate successors. The tendency was still for a time to adopt the form of reproducing the first subject at the beginning of the second half of the movement¹; and in point of fact it is not difficult to see why it was preferred, since if nothing else could be said for it, it certainly seemed to keep the balance of the keys more equal. For by this system the subject which appeared in the principal key in the first half came in in the complementary key in the second half, and the second subject *vice versa*, whereas in the later system the first subject always appears in the principal key. Moreover, the still older system of merely repeating the ending of the first half still lingers on the scene after the time of Bach and Handel, for in a sonata by Galuppi (1706-85) in D² there is a charming little opening adagio which seems to look both forwards and backwards at once; for its form is a clear specimen of the mere repetition of the concluding phrase of the first part at the conclusion of the whole, while its soft

melodious manner and characteristic definition of sections by cadences and semi-cadences (tending to cut it up into so many little tunes) make it in spirit a very near relation of Mozart's. And one might take this little movement, without much stretch of imagination, as the final connecting link between the movements which look back towards the primitive form as displayed in the original branle, and those which look on towards the Mozart and Haydn epoch. The other movements of Galuppi's sonata are in the more developed form, in which the first subject is quoted at the commencement of the second half of the movement.

In Galuppi's contemporary, P. D. Paradieu, we find even a closer relationship to Mozart in many respects. The first movement of his sonata in A, for instance, is on an extended scale. His subjects are clearly defined, and the growing tendency to cut the movement up into sections is still clearer than in Galuppi. The subjects are definitely restated, but after the earlier manner, with the first subject reproduced at the beginning of the second half. It is, however, noticeable that in the lively finale to this sonata the subjects both reappear at the end of the whole.

THE PREDECESSORS OF HAYDN.—If we turn to the distinguished German composers of this epoch we find ourselves as it were among the immediate exemplars of Haydn. In them both the manner and form of their great successors are prefigured, and there is no longer any doubt about the basis of construction of the movement; the first part being as it were the thesis of the subjects, and the second part their discussion and restatement; but there is still an uncertainty with regard to the respective positions of the restatements. In a sonata of Johann Christian Bach, op. 17,³ we find a very clear and extended specimen of the older system. The first half has a very long section in the principal key (B \flat), and another section, also long, in the dominant key (F)—all of which is as usual repeated. The second half begins with a clear statement of the first section in the dominant key, followed by development and modulation, and pausing on the dominant of the original key of B \flat , in which all the second section of the first part is reproduced with an exactness which is almost tiresome. It is worthy of remark that the last movement is in the gigue time and style without being so named, and is a happy instance of the gradual complete merge of the old dance suite in the sonata. As a reverse to this picture there is a bourrée in a suite by Johann Ludwig Krebs—a contemporary of Johann Christian Bach, and one of the most distinguished of his father's pupils—which, though called by the old dance name, is in perfect modern form, and shows so aptly the transition of the repeated ending of the first

¹ The slow movement of Beethoven's Quartet in D major, op. 18, No. 3, is an example of this form.

² Published in Pauer's *Alle Cister-Musik*.

³ *Ibid.*

part into a second subject that it is worth quoting in outline.

This is followed by seven more bars of development after the manner of this beginning, modulating to C minor and A \flat and thence back to E \flat , in which key the first subject is resumed as follows :

In this the passage from (a) to (b) constitutes the first subject and section ; and that from (b) to (c) the second, in the dominant key, corresponding to a 'second subject' ; then follow the development and modulation, from (c) to (d) ; and then the repeat of the first section in the principal key, with the little cadence figure (e), which is treated in precisely the manner that a second subject would be treated in a more extended movement, being given complete, transposed from the dominant key to the original tonic. That Krebs had well defined his own objects in these matters is clear from the fact that the polonaise from the same suite, and an allemande from another in B \flat , are constructed after precisely the same system.

There remains yet the most important predecessor of Haydn, namely Emanuel Bach, in whose sonatas form reached a very remarkable pitch of development. Many of them stand in a very peculiar relation both to the old order and to the new which was destined to supplant it on the principle of the survival of the fittest ; for they present examples of the reappearance of the first subject at the beginning of the second half of the movement, *as well as* after the section devoted to development and modulation—in other words, both in its older position and in its recognised place in modern instrumental works. This is the case in the sonata in G in the first collection published at Leipzig in 1779, and in Bülow's little selection of six. The same also in the last movement of the sonata in A (which is both in Bülow's collection and in Pauer's *Alte Meister*), and in the first movement of the

sonata in F minor from the third set of clavier sonatas, also edited by Bülow. The sonata in D minor approaches more nearly to modern ways in the position of the repetition of the first subject in the second part ; but offers a marked instance of independent thought in reproducing the second subject in the key of the third below the tonic (that is, in B \flat relative to D) and afterwards passing back to the principal key, and reproducing the rest of the materials of the section after the usual manner—thus in some respects anticipating Beethoven.

A great deal more might be said on the individual and thoughtful use of Form which is observable in the works of Emanuel Bach ; but it will be merely necessary to point out that the study of them as works of art, by those who are as yet unacquainted with them, will throw quite a new light on Haydn and Mozart. He has been called¹ their forerunner, and he thoroughly justifies the title not only by the clearness and distinctness of his form, but by certain indefinable qualities of style and sentiment. Something of this may be due to his view that music should be interpreted as *vocally* as possible,² which is also a very distinguishing trait of the Mozart school. It must also be noted that in him the continuous fugal manner seems finally to have yielded before the growing predominance of the essentially distinct harmonic style. The forms of the fugal style, such as they were, were rather relative than positive, and depended upon certain laws—not very clearly defined or consistently observed—as to the modes of recurrence of the subjects ; whereas the forms of the harmonic style are positive and systematic. The forms of the fugal style may be compared to the composition of lines and curves in a drawing, in which they are not pre-conceived, but grow into completeness by the attention which is bestowed by the artist on their relations to one another. Whereas the forms of the harmonic style are architectural, and are governed by certain necessary prior considerations as vital as that of roof and walls to the architect, whereby the movement comes to be divided into sections chiefly based upon the succession of keys, in which the various subjects are rather indicators of outline than positive elements of construction. In Emanuel Bach we find a number of figures and subjects characteristic of each of the primary sections, as we do in Beethoven ; and the spirit of his great father, though attenuated enough, is yet perceptible in his manner of treating short and pregnant figures, and in some peculiarities of phraseology. These are probably the chief points of connexion between the spirit of the great giant and the graces of the less austere style of Haydn and Mozart.

¹ Von Bülow Preface to his selection of pieces.

² See Burney, *Hist.* vol. iv. chap. 2.

FULFILMENT OF HARMONIC (TONAL) FORM.—

It can hardly be doubted that the realisation of this practically new discovery of the element of positive harmonic or tonal form in music must have acted like many other fresh discoveries in the realms of art, and tended to swamp the other elements of effect; making composers look to form rather as ultimate and pre-eminent than as inevitable but subsidiary. It seems not improbable that the meaningless commonplace which often offends the sensitive musician in the works of Haydn and Mozart, and appears like just so much rubbish shot in to fill up a hole, was the result of this strong new feeling for form as paramount, and that it remained for Beethoven to re-establish definitely the principle of giving equal intensity to every part of the piece in proportion to its importance. With Haydn and Mozart it is common to find very sweet tunes, and sometimes very serious and pregnant tunes, in each of the primary sections, and then a lot of scurrying about—'brilliant passages' as they are often called—the only purpose of which is to mark the cadence, or point out that the tune which is just finished is in such or such a key. Haydn's early quartets are sometimes very little more than jingle in one key and more jingle in another, to fill up his recognised system of form, without ever rising to the dignity of a tune, and much less to a figure with any intensity of meaning: and some of Mozart's instrumental productions are but little better.

That Haydn studied the works of Emanuel Bach is well known, for he himself confessed it; and the immediate connexion between him and his predecessors is nowhere more clear than in the similarity of occasional irregularities of construction in the second half of his movements. There is more than one instance of his first subject reappearing clearly at the beginning of the second half of a movement instead of in its latter portion (quartet in F major, op. 2, No. 4; No. 67 in Trautwein): and further than this, and corroborative of the continuous descent, is the fact that when the first subject reappears in what we should call its right place, there are conspicuous irregularities in the procedure, just as if Haydn were halt apologising for a liberty. For the section is often prolonged and followed by irregular modulations before the second subject reappears, and is then far more closely followed than the first subject and the materials of the first section. Another point illustrating a lingering feeling for the old practice of repeating the conclusion or cadence-figures of the first part at the conclusion of the whole, is that a sort of premature coda is occasionally inserted after the earlier figures of the second section on its repetition in this place, *after* which the concluding bars of the first part are exactly resumed for the finish. Of this even Mozart

gives a singular and very clear instance in the first movement of his G minor symphony.

Of the minor incidental facts which are conspicuous in Haydn's works the most prominent is his distribution of the subjects in the first part. He conforms to the key-element of Form in this part with persistent regularity, but one subject frequently suffices for both sections. With this principal subject (occasionally after a short independent introduction in slow time) he begins operations; and after concluding the first section and passing to his complementary key for the second, he reproduces it in that key, sometimes varied and sometimes quite simply—as in the well-known symphony in D, No. 7 of Salomon's set (first movement), or in that in Eb, No. 9 of the same series (also first movement), or in the quartet in F minor, op. 55, or the finale of the quartet in C, op. 75 (No. 1 in Trautwein). And even where the second section has several new features in it the first subject is often still the centre of attraction, as in the first movement of the quartet in C (No. 16, Trautwein), and the same movement of the quartet in F (No. 11, Trautwein). On the other hand, Haydn is sometimes profuse with his subjects, and like Beethoven gives several in each section; and again it is not uncommon with him to modulate into his complementary key and go on with the same materials for some time before producing his second subject, an analogous practice to which is also to be met with in Beethoven.

Far more important in Haydn's development of Form is the use of a feature which subsequently became very conspicuous in instrumental compositions, namely the coda, and its analogue, the independent episode which usually concludes the first half of the movement.

Every musician is aware that in the early period of purely formal music it was common to mark all the divisions of the movements clearly by closes and half closes; and the more vital the division the stronger the cadence. Both Haydn and Mozart repeat their cadences in a manner which to modern ears often sounds excessive; and, as already pointed out, they are both at times content to make mere 'business' of it by brilliant passages or bald chords; but in movements which were more earnestly carried out the virtue of making the cadence also part of the music proper, and not a mere rigid meaningless line to mark the divisions of the pattern, was soon recognised. There were two ways of effecting this; either by allusion to the figures of the subjects adapted to the form of the cadence, or by an entirely new figure standing harmonically on the same basis. From this practice the final episode to the first part of the movement was developed, and attained at times significant dimensions. But the coda proper had a somewhat different

origin. In the days before Haydn it was almost invariable to repeat the second half of the movement as well as the first, and Haydn usually conformed to the practice. So long as the movements were of no great length this would seem sufficient without any addition, but when they attained to any considerable dimensions the poverty and want of finish in ending twice over in precisely the same way would soon become apparent; and consequently a passage was sometimes added after the repeat to make the conclusion more full, as in Haydn's well-known quartet in D minor, op. 76, the first movement of the quartet in C (Trautwein, No. 56), the last movement of the quartet in E, No. 17, and many others. It seems almost superfluous to point out that the same doctrine really applies to the conclusion of the movement, even when the latter half is not repeated; since, unless an addition of some sort is made, the whole concludes with no greater force than the half; the conclusion being merely a repetition of the cadence figure of the first half of the movement. This case, however, is less obvious than the former, and it is probable that the virtue of the coda was first observed in connexion with movements in which the second half was repeated, and that it was afterwards found to apply to all indiscriminately.

A coda in both cases is to be defined as the passage in the latter part of a movement which begins at the point where the substance of the repeated first part comes to an end. In Haydn codas are tolerably plentiful, both in movements in which the latter half is repeated and in movements in which it is not. They are generally constructed out of materials taken from the movement, which are usually presented in some new light, or associated together in a fresh manner; and the form is absolutely independent. Modulation is rarely to be found, for the intention of the coda was to strengthen the impression of the principal key at the conclusion, and musicians had to be taught by Beethoven how to do this without incessantly reiterating the same series of chords in the same key. As an instance of the consideration and acuteness which characterise Haydn's very varied treatment of forms may be taken the coda of the first movement of the symphony in C, No. 1 of the Salomon set. In this movement he misses out certain prominent figures of the first section on its repetition in the second half, and after passing on duly through the recapitulation of the second section he takes these same omitted figures as a basis whereon to build his coda. Many similar instances of well-devised manipulation of the details of form are scattered throughout his works, which show his remarkable sagacity and tact. They cannot be brought under any system, but are well worth careful study to see

how the old forms can be constantly renewed by logically conceived devices, without being positively relinquished.

Haydn represents the last stage of progress towards clear and complete definition of abstract Form, which appears in its final technical perfection in Mozart. In Mozart Form may be studied in its greatest simplicity and clearness. His marvellous gift of melody enabled him to dispense with much elaboration of the accepted outlines, and to use devices of such extreme simplicity in transition from one section to another that the difficulty of realising his scheme of construction is reduced to a minimum. Not that he was incapable of elaborating his forms, for there are many fine examples to prove the contrary; but it is evident that he considered obviousness of outline to be a virtue, because it enabled the ordinary hearer as well as the cultivated musician to appreciate the symmetrical beauty of his compositions. Apart from these points of systematic definition Mozart was not an innovator, and consequently it will not be necessary to point out his advances on Haydn. But inasmuch as he is generally recognised as the perfect master of the formal element in music it will be advisable to give an outline of his system.

The first section, which tends to mark clearly the principal key of the movement, sets out with the principal subject, generally a tune of simple form, such as eight bars divided into corresponding groups of four (e.g. piano sonata in C minor, Köchel 457). This is either repeated at once or else gives place to a continuation of less-marked character of figure, generally beginning on the dominant bass; the order of succession of this repetition and continuation is uncertain, but whichever comes last (unless the section is further extended) usually passes to the dominant key, and pauses on *its* dominant; or pauses without modulation on the last chord of a half close in the original key; or, if the key of the whole movement be minor, a little more modulation will take place in order to pass to the key of the relative major and pause on *its* dominant. The second section—which tends to define clearly the complementary key of the movement, whether dominant or relative major to the original—usually starts with a new subject somewhat contrasted with the features of the first section, and may be followed by a further accessory subject, or derivative continuation, or other form of prolongation, and so passes to the frequent repetition of the cadence of the complementary key, with either brilliant passages, or occasionally a definite fresh feature or subject which constitutes the cadence episode of the first part. These two sections—constituting the first half of the movement—are usually repeated entire.

The second half of the movement begins with a section which is frequently the longest of all; it sometimes opens with a quotation of the first subject, analogous to the old practice common before Haydn, and proceeds to develop freely the features of the subjects of the first part, like a discussion on theses. Here cadences are avoided, as also the complete statement of any idea, or any obvious grouping of bars into fixed successions; modulations are constant, and so irregular that it would be no virtue to find the succession alike in any two movements; the whole object being obviously to produce a strong formal contrast to the regularity of the first half of the movement; to lead the hearer through a maze of various keys, and by a certain artistic confusion of subject-matter and rhythm to induce a fresh appetite for regularity which the final return of the original subjects and sections will definitely satisfy. This section Mozart generally concludes by distinctly modulating back to his principal key, and either pausing on its dominant, or passing (perhaps with a little artistically devised hesitation) into the first subject of the movement, which betokens the beginning of the fourth section. This section is usually given without much disguise or change,¹ and if it concludes with a pause on the dominant chord of the original key (*i.e.* the final chord of a half close), will need no further manipulation, since the second subject can follow as well in the original key as in that of the dominant, as it did in the first part. If, however, the section concludes on the dominant of that dominant key in the first half of the movement, a little more manipulation will be necessary. Mozart's device is commonly to make some slight change in the order of things at the latter part of the section, whereby the course of the stream is turned aside into a sub-dominant channel, which key standing in the same relation to the principal key that the principal key stands to the dominant, it will only be necessary to repeat the latter part of the section in that key and pause again on the dominant of the original key, in which the second section of the first half then follows simply in the same order as at the first. If the principal key of the movement happens to be minor, and the second section of the first part to be in the relative major, its reappearance in either the major or minor of the principal key depends chiefly on its character; and the passage that led to it by modulation would be either omitted altogether or so manipulated as not to conclude out of the principal key.

With this simple order of reproduction of the first two sections Mozart is generally contented, and the little alterations which he does occasionally make are of a straight-

forward nature, such as returning to the second subject before the first (as in a sonata in D major, Köchel 311), or reintroducing the second subject in the dominant key first and repeating it in the principal key (as in a sonata in C, Köchel 330). The whole of the latter half of the movement is frequently repeated, and in that case generally followed by a coda—as in the last movements of quartets in G minor No. 1, and A, No. 5, and D, No. 10; first movements of quartets in B \flat , No. 2, and D, No. 10; slow movement of quartet in F, No. 8; first movement of sonata in C minor, and of quintets in G minor, D, and E \flat ; and last movement of the 'Jupiter' symphony. The coda is generally constructed out of prominent features of the movement, presented in some new light by fresh associations and fresh contrasts. It is seldom of any great length, and contains no conspicuous modulation, as that would have been held to weaken the impression of the principal key, which at the conclusion of the movement should be as strong as possible. In a few instances there are codas without the latter half of the movement having been repeated. Of this there is at least one very beautiful instance in the short coda of the slow movement of the quartet in B \flat , which is constructed out of ejaculatory fragments of the first subject, never touching its first phrase, but passing like a sweet broken reminiscence. It must be borne in mind that this scheme is but a rough outline, since to deal with the subject completely would necessitate so much detail as to preclude all possibility of clearness.

THE STANDPOINT OF BEETHOVEN.—It is commonly held that the influence of Mozart upon Beethoven was paramount in his first period; but strong though the influence of so great a star must inevitably have been upon the unfolding genius, his giant spirit soon asserted itself; especially in that which seems the very marrow of his works, and makes Form appear in an entirely new phase, namely the element of universally distributed intensity. To him that byword 'brilliant passages' was as hateful as 'cant' to Carlyle. To him bombast and gesticulation at a particular spot in a movement—just because certain supposed laws of Form point to that spot as requiring bustle and noise—were impossible. If there is excitement to be got up at any particular point there must be something real in the bustle and vehemence; something intense enough to justify it, or else it will be mere vanity; the cleverness of the fingers disguising the emptiness of the soul, a fit accompaniment to 'the clatter of dishes at a princely table,' as Wagner says, but not music. Such is the vital germ from which spring the real peculiarities and individualities of Beethoven's instrumental compositions. It must now be a Form of spirit as well as a Form in the frame-

¹ In the first movement of the 'Jupiter' symphony so exact is the repetition, that in one of the editions a passage of twenty-one bars is not repeated, but a reference 'Da Capo' is made to its occurrence at the beginning of the allegro.

work; it is to become internal as well as external. The day for stringing certain tunes together after a certain plan is past, and Form by itself ceases to be a final and absolute good. A musical movement in Beethoven becomes a continuous and complete poem; or, as Dannreuther¹ says, 'an organism' which is gradually unfolded before us, marred by none of the ugly gaps of dead stuffing which were part of the Form of his predecessors. Moreover, Form itself must drop into the background and become a hidden presence rather than an obvious and pressing feature. As a basis Beethoven accepted the forms of Mozart, and continued to employ them as the outline of his scheme. 'He retained,' as the same writer has admirably said, 'the triune symmetry of exposition, illustration, and repetition,' which as far as we know at present is the most perfect system arrived at, either theoretically or empirically; but he treated the details with the independence and force of his essentially individual nature. He absorbed the principle in such a fashion that it became natural for him to speak after that manner; and greatly as the Form varies it is essentially the same in principle, whether in the trio in E \flat , opus 1, No. 1, or the quartet in F, opus 135.

In estimating the great difference between Mozart and Beethoven in their manner of treating forms it must not be forgotten that Mozart, as has been before observed, wrote at a time when the idea of harmonic form was comparatively new to the world of music, and to conform to it was in itself a good, and to say the merest trifles according to its system a source of satisfaction to the hearer. It has been happily suggested that Mozart lived in an era and in the very atmosphere of court etiquette, and that this shows itself in the formality of his works; but it is probable that this is but half the cause of the effect. For it must not be forgotten that the very basis of the system was clear definition of tonality; that is to say, the key must be strongly marked at the beginning and end of a movement, and each section in a different key must be clearly pointed out by the use of cadences to define the whereabouts. It is in the very nature of things that when the system was new the hearers of the music should be but little apt at seizing quickly what the key was at any given moment of the highest importance; and equally in the nature of things that this faculty should have been capable of development, and that the auditors of Beethoven's later days should have been better able to tell their whereabouts with much less indication than were the auditors of Mozart. Hence there were two causes acting on the development of Form. On the one hand, as the system grew familiar, it was inevitable that people should lose much of the satisfaction which was derived from the

Form itself as such; and on the other hand their capacity for realising their whereabouts at any time being developed by practice, gave more scope to the composer to unify his composition by omitting those hard lines of definition which had been previously necessary to assist the undeveloped musical faculty of the auditors. Thus Mozart prepared the way for Beethoven in those very things which at first sight seem most opposed to his practice. Without such education the musical poems of Beethoven must have fallen upon deaf ears.

Beethoven then very soon abandoned the formal definition of the sections by cadences, and by degrees seems rather to have aimed at obscuring the obviousness of the system than at pointing it out. The division of the movements becomes more subtle, and the sections pass into one another without stopping ostentatiously to indicate the whereabouts; and, last but not least, he soon breaks away from the old recognised system, which ordained the dominant or relative major as the only admissible key for the complementary section of the first part. Thus as early as his second and third sonatas the second sections begin in the dominant *minor* key, and in the slow movement of the sonata in E \flat (op. 7) the dominant is discarded in favour of the key of the third below the tonic—A \flat relative to the principal key C. In the first movement of the sonata in G (op. 31, No. 1) he begins his second subject in the key of the major third, and that major—i.e. B, relative to G; and the same key (relatively) is adopted in the 'Waldstein' sonata and the Leonora overtures called II. and III. The effect of such fresh and unexpected transitions must have been immense on minds accustomed only to the formal regularity of Mozart. Moreover, Beethoven early began the practice of taking one principal key as central and surrounding it with a posse of other keys both related and remote. Every one is familiar with the opening passages of the 'Waldstein' and 'Appassionata' sonatas, in both of which a new key is introduced in less than half-a-dozen bars, and then passes back to the principal key; and this practice is not done in the vague way so often met with in Mozart and Haydn, where their excessive use of rapid transitions in the third section of the movement has the effect of men beating about in the dark. True it is that there are instances of this in Beethoven's early works while he wrote under the same order of influences as they did; but in his maturer works these subsidiary modulations are conceived with large breadth of purpose founded on certain peculiarities in the affinities of the keys employed, which makes the music that is heard in them produce the most varied feelings in the mind of the auditor. It is most important to avoid the hasty conclusion from insufficient observation that to modulate much is to be free

and bold, for it is nothing of the sort. Irregular purposeless modulation is sheer weakness and vapidly. Strength is shown in nothing more conspicuously than in the capacity to continue long in one key without ceasing to be interesting; and when that is effected a bold stroke of well-defined modulation comes with its proper force. For when keys are rapidly interlaced the force of their mutual contrasts is weakened and even destroyed: their vital energy is frittered away to gratify an unwholesome taste for variety, and is no longer of any use for steady action. In Beethoven action is always steady, and the effects of the changing keys come with their full force. A new key is sought because it gives additional vitality to a subject or episode, or throws a new light upon an idea from a strange and unexpected quarter, as in the wonderful stroke of genius at the outset of the 'Appassionata.' As other instances may be quoted the first movement of the sonata in G, op. 31, No. 1; scherzo of quartet in F, op. 59, No. 1; first movement of quartet in F minor, op. 95.

The episode which concludes the first part of the movement is almost invariably of some importance in Beethoven's works. Very generally he reproduces figures of his first subject, as in the Prometheus and Leonora overtures, the first movements of the quartets in F major (op. 59, No. 1) and E \flat (op. 127), the symphonies in D, Eroica, C minor, and A, the sonata in E (op. 14, No. 1) and the last movement of the 'Appassionata.' But more frequently he produces a new subject, often of quite equal importance and beauty to either the first or the second—to quote but one instance out of many take the first movement of the sonata in G (op. 14, No. 2)—and very often does so besides referring to his first subject. The chief thing to notice from this is that the episode in question has grown into important dimensions in his hands, and is so clear, and its distinction as a separate section from what precedes it so marked, that it is not uncommon to hear it spoken of as the coda of the first part.

In the part devoted to the development of the features of the subjects, which commonly begins the second half of the movement, Beethoven is especially great. No musician ever had such a capacity for throwing an infinite variety of lights upon one central idea; it is no 'business' or pedantry, but an extraordinary genius for transforming rhythms and melodies so that though they be recognised by the hearer as the same which he has heard before, they seem to tell a totally different story; just as the same ideas working in the minds of men of different circumstances or habits of thought may give them the most opposite feelings. As was pointed out with reference to Mozart, no system is deducible from the order of this division of the movement, than which none shows more

infallibly the calibre of the composer. As a rule Beethoven avoids the complete statement of any of his subjects, but breaks them up into their constituent figures, and mixes them up in new situations, avoiding cadences and uniformity of groups of bars and rhythms. As far as possible the return to the original key is marked in some more refined way than the matter-of-fact plan of baldly passing to its dominant, pausing, and restarting operations. The *reprise* of the first subject is sufficient indication to the hearer as to what part of the movement he has arrived at, and the approaches to it require to be so fined off, that it may burst upon him with the extra force of a surprise. Sometimes a similar effect is obtained by the totally opposite course of raising expectation by hints of what is to come, and then deferring it in such a manner that the suspended anticipation of the mind may heighten the sense of pleasure in its gratification, as in the last movement of the 'Waldstein' sonata. Again the return is not unfrequently made the climax of a grand culmination of increasing force and fury, such as that in the first movement of the 'Waldstein' sonata (where the return is *pp*) and the fourth and eighth symphonies, a device which is as moving to the hearer as either of the former ones, and equally intense and original.

In the recapitulation of his subjects, as might be anticipated from his intensity in all things, there is a growing tendency to avoid the apparent platitude of repeating them exactly as at first. Sometimes they appear with new features, or new orders of modulation, and sometimes altogether as variations of the originals. As instances of this may be taken the recapitulation of the first subjects in the first movements of the Eroica symphony, D minor sonata (op. 31, No. 2), the 'Waldstein,' the 'Appassionata,' and the B \flat sonata, op. 106, the first movement of the quartet in E \flat , op. 127, and of the 'Kreutzer' sonata, the slow movements of the violin sonata in C minor, op. 30, No. 2, and of the great B \flat sonata just named, all which present the various features above enumerated in great perfection. No system can be defined of the way in which Beethoven connects his first and second subject in this part of the movement, as he particularly avoids sameness of procedure in such matters. As a rule the second subject is given more simply than the first; no doubt because of its being generally of less vital importance, and less prominent in the mind of the hearer, and therefore requiring to be more easily recognisable. With regard to the key in which it appears, he occasionally varies, particularly when it has not appeared in the first part in the orthodox dominant key. Thus in the first movement of the great quartet in B \flat , op. 130, the second subject, which had appeared in the first part in the key of the third below (G \flat relative to B \flat), appears

in the recapitulation in the key of the minor third above—D \flat . And in the sonata in G major, op. 31, No. 1, the second subject, which appeared in the key of the major third in the first part, appears in the *reprise* in that of the minor third below. These and other analogous instances seem to indicate that in the statement and restatement of his subjects, when they did not follow the established order, he held the balance to be between the third above and the third below, major and minor. The reason for his not doing so in the B \flat sonata (op. 106) is no doubt because in the very elaborate repeat of the first section he had modulated so far away from the principal key.

The last point to which we come in Beethoven's treatment of the sonata-forms is his use of the coda, which is, no doubt, the most remarkable and individual of all. It has been before pointed out that Mozart confines himself chiefly to codas after repetition of the second half of his movements, and these are sometimes interesting and forcible; but codas added for less obvious reasons are rare; and as a rule both his codas and Haydn's remain steadily in the principal key of the movement, and strengthen the cadence by repetition rather than by leading the mind away to another key, and then back again up to a fresh climax of key-definition. That is to say, they were added for formal purposes and not for the sake of fresh points of interest. Beethoven, on the other hand, seemed to look upon the conclusion of the movement as a point where interest should be concentrated, and some most moving effects produced. It must have seemed to him a pure absurdity to end the whole precisely as the half, and to conclude with matter which had lost part of its zest from having been all heard before. Hence from quite an early period (*e.g.* slow movement of D major sonata, op. 10, No. 3) he began to reproduce his subjects in new and interesting phases in this part of the movement, indulging in free and forcible modulation, which seems even from the point of pure form to endow the final cadence with fresh force when the original key is regained. The form of the coda is evidently quite independent. He either begins it from an interrupted cadence at the end of the preceding section, or passes on from the final chord without stopping—in the latter case generally with decisive modulation. In other cases he does not conclude the preceding section, but, as it were, grafts the coda on to the old stock, from which it springs with wonderful and altogether renewed vigour. As conspicuous instances may be quoted the coda of the sonata in E \flat , op. 81a ('*Les Adieux, l'absence, et le retour*'), which is quite the culminating point of interest in the movement; the vehement and impetuous coda of the last movement of the '*Appassionata*' sonata, which introduces quite a new feature, and the coda to the last movement of the '*Wald-*

stein' sonata. The two climacteric codas of all, however, are those to the first movements of the *Eroica* and the ninth symphonies, which are sublime; the former chiefly by reason of its outset, for there is hardly anything more amazing in music than the drop from the *piano* tonic E \flat which concludes the preceding section, to a *forte* D \flat , and then to the chord of C major *fortissimo*. But the whole coda of the first movement of the ninth symphony is a perpetual climax and a type of Beethoven's grandest conceptions, full of varied modulation, and constant representation of the features of the subjects in various new lights, and ending with a surging, giant-striding specimen of '*Tonic and Dominant*,' by way of enforcing the key which is quite without rival in the whole domain of music.

There can be no object in following the development of the system of Form farther than Beethoven, for it can hardly be said that there is anything further to trace. His works present it in its greatest variety and on the grandest scale; and his successors, great as many of them have been, have not even approached him, far less added to his final culmination. The main tendency observable in later instrumental works is to develop still further the system above discussed of taking one key as central in a group comprising many subsidiary transitions. Schumann's works present remarkable instances of this; Mendelssohn adopts the same practice, but with more moderation; Brahms again is extremely free in the same direction; as may be observed, for instance, in the first section of the first movement of the pianoforte quartet, op. 25, which is nominally in G minor. This is apparently a recognition of the hypothesis above proposed, that the mind is capable of being more and more educated to recognise the principal key in a chain of transitions which to the audiences of Mozart's day would have been quite unintelligible. (For the contributions of later composers, however, see the article SONATA.)

SUBSIDIARY FORMS OF THE SONATA

(1) THE RONDO.—It is now time to return to the consideration of the rondo-form as found in the works of Haydn and Mozart, in which it was frequently affected by the more important and interesting first-movement-form. It will be obvious that its combination with that form does not offer much difficulty. For that alternation of subject and episode which is the very basis of the rondo opens the way to the adoption of a second subject in the complementary key as the fittest antithesis to the first statement of the principal subject; and the main point of distinction of the rondo-form from the first-movement-form pure and simple, is that the first subject reappears after the second in the original key, instead of bringing the first half of the movement to a conclusion in the

complementary key. After this deviation the form again follows the system of the first movement; for—as we have already sufficiently pointed out—no fitter place is found to develop the figures and features of the subjects and to modulate freely. In the simpler system of the rondo this again takes the place of an episode; in both systems the first subject would here recur, and nothing could more fitly follow it than the recapitulation of that subject which occupied the place of the first episode. It is worthy of remark that in the rondo of the 'Waldstein' sonata Beethoven has in this place reproduced the subject which opens the first episode, though the movement is not cast on the system of a first movement. Finally, the subject may reappear yet again in the original key without deviating strongly from that system; so that, as just mentioned, the only marked point of deviation is the return to the principal key after the appearance of the second subject. This complete adaptation is more commonly abbreviated by replacing the 'Development' by a short episode (as in Beethoven's sonata in E minor, op. 90); and even further (as in the finale of Mozart's quartet in E \flat , No. 4), by passing immediately from the second subject to the recapitulation of both subjects in the principal key, and ending with one further final quotation of the real rondo-subject. This latter in point of fact is to be explained rather as a simple method of establishing the balance of keys by giving an episode in a complementary key, than as based on any preconceived notion of amalgamation with the first-movement-form.

One of the most prominent features in the rondos of Haydn and Mozart is the frequent rigidity of the subject. It is common to meet with a complete dance-tune divided into two halves, each repeated after the accepted system, and closing formally in the principal key. So that it is in fact a complete piece in itself, and stands out as markedly as Couperin's subjects do with *fermatas* over the concluding chords. In these cases the tune is not given *in extenso* at each repetition, but is generally fined and rounded off so as not to affect the continuity of the movement so conspicuously as in its first statement.

The angularity and obviousness of outline which often mark the rondo-form in works before Beethoven, were to a certain extent alleviated by the use of ingenious playful treatment of the figures of the chief subject by way of episode; but nevertheless the formality remains, and marks the rondo of Haydn and Mozart as a thing of the past, and not to be revived in their particular manner in the present day without perpetrating an artistic anachronism. Beethoven's treatment of the rondo offers great differences, but they are chiefly in point of sentiment, and difficult to define. Before his

day there had evidently been a persistent tradition that final rondos were bound to be gay, jaunty, light, or even flippant. With Beethoven such a dogma was impossible; and he therefore took the line of developing the opportunities it offered, either for humorous purposes, in the persistent repetition of a quaint phrase (sonata in D, op. 10, No. 3), or in the natural and desirable recurrence of a melody of great beauty (sonata in E minor, op. 90, and 'Waldstein'). In every case the system is taken out of the domain of mere observance of formula, and its basis vitalised afresh by making it the vehicle of thoughts which can appear in such an order without losing their true significance. In point of fact the rondo-form is elastic enough notwithstanding its simplicity, and if the above sketch has not sufficiently indicated that fact, the study of the movements mentioned, and those in Beethoven's E \flat and G concertos and B \flat trio, will lead to the perception of the opportunities it offers to the composer better than any attempt at reducing the various features to a formula.

(2) MINUET AND SCHERZO.—The minuet and trio survive as pure and undeveloped examples of the original source of the larger movements, in immediate contact with their wonderfully transformed descendants. They offer no systematic difference whatever from the dances in the suites which preceded the perfected sonata. The main points of form in the two are similar (see MINUET). Short as the form is, it admits of a great amount of variety, and it is one of Haydn's triumphs to have endowed his innumerable specimens with ever-changing freshness. The alternation of minuet and trio (which are in fact two minuets) is obviously in itself an element of form, and derives some force from the contrast of the keys in which the two are written, as well as from the contrast of their styles. In Haydn's early quartets—in which he still closely followed the order of the suites—the two are frequently in the same key, or in major and minor of the same key; but in his later works he takes advantage of contrasts of key and puts his trio in the subdominant, or even in the third below, as in the quartet in G, op. 77. It is chiefly in this respect that we can still trace the relation of the minuet and trio to the modern scherzo, which is its legitimate successor, though in other respects it has not only changed its characteristic rhythms and time, but even its style and form.

The scherzo is in fact the most free and independent of all the movements of a modern instrumental work, being characterised rather by its sportive and playful style than by any fixed and systematic distribution of subjects and keys. Occasionally it falls into the same order of distribution as a first movement, but there is no necessity whatever that it should do so, and its whole character—happiest when based upon

the incessant repetition in varying lights and circumstances of a strongly rhythmic figure—is headlong *abandon* rather than the premeditated design of the serious first movement. Beethoven was the real creator of the modern scherzo, for all that a few examples exist before him; for these are essentially in unsophisticated dance form, and belong to the old order of things, but Beethoven's infinitely various scherzi are all marked by a certain intimate quality of style, which has been the real starting-point of his successors, rather than any definite formal basis (see SCHERZO).

(3) SLOW MOVEMENTS.—The form of the slow movement in sonatas and symphonies is decidedly variable. It is more commonly based on the same system as a first movement, but owing to the length of time necessary to go through the whole series of sections in the slow tempo, it is common to abbreviate it in some way, as by omitting the portion usually devoted to 'development' and modulation, and passing by a short link only from the presentation of the subjects to their recapitulation—as in the slow movement of Beethoven's sonata in B \flat , op. 106, and that of Mozart's quartet in B \flat , No. 3. There are a few instances of slow movements in rondo-form—as in Mozart's sonatas in C minor, C major (1778) and D (1777); Beethoven's 'Sonate pathétique,' and that in G (op. 31, No. 1)—and several in the form of a set of variations. Another happy form of this movement is a species of aria or melody, cast in the old rondo-form, like the example of Lully quoted at the commencement of this article. Of this the beautiful cavatina in Beethoven's B \flat quartet (op. 130) is a very fine example, its form being simply a section consisting of the aria or melody continuously developed, followed by a section consisting of impassioned recitative, and concluding with a return to the original section somewhat abbreviated. This form resolves itself practically into the same formal basis as the minuet and trio or scherzo, though so different in character; for it depends almost entirely on the repetition of a long complete section with a contrasting section in the middle. And the same simple basis will be found to predominate very largely in music,¹ even in such widely different classes as the nocturnes of Field and Chopin, and arias of the time of Handel, of which his 'Waft her, Angels' is a very clear example. C. H. H. P.

(4) VARIATIONS.—The development of variations both as a feature of the sonata and as a self-contained type was originally treated here by Sir Hubert Parry at some length. The same ground, however, is more exhaustively covered by his article VARIATIONS (*q.v.*). It will suffice therefore to remind the student here that variations on a theme have been fre-

¹ This form is often called the *Lied-form*, a term originated by Dr. Marx; but being clearly a misnomer it has not been adopted by the writer.

quently used as a substitute for sonata-form in first allegros, slow movements and finales by composers of all periods from Haydn onward.

c.

GENERAL CHARACTERISTICS

It will be best to refer the consideration of the particular construction of symphonies, overtures, concertos, sonatas, etc., to their respective heads, merely pointing out here such things as really belong to the general question.

The practice of prefacing the whole by an Introduction probably originated in a few preliminary chords to call the attention of the audience, as is typified in the single *forte* chord which opens Haydn's quartet in E \flat (No. 33 in Trautwein). Many examples of more extensive and purely musical introductions are to be found in Haydn's and Mozart's works, and these not unfrequently contain a tune or figure of some importance; but they seldom have any closer connexion with the movement that follows than that of being introductory, and whenever there is any modulation it is confined within very small limits, generally to a simple alternation of tonic and dominant. Beethoven has occasionally made very important use of the introduction, employing free modulation in some instances, and producing very beautiful tunes in it, as in the symphony in A. The most important feature in his use of it is his practice of incorporating it with the succeeding movement; either by the use of a conspicuous figure taken from it as a motto or central idea, as in the sonata in E \flat , op. 81a; or by interrupting the course of the succeeding movement to reintroduce fragments of it, as in the quartet in B \flat , op. 130; or by making it altogether part of the movement, as in the ninth symphony, where it has an immediate and very remarkable connexion with the first subject.

The order of succession, and the relation of the keys of the different movements of which each complete work is composed, passed through various stages of change similar to those which characterised the development of the form of the several movements, and arrived at a certain consistency of principle in Mozart's time; but contrast of style and time is and has been, since the early suites, the guiding principle in their distribution. In the suites and early examples of instrumental music, such as some of Haydn's early quartets, all the movements were in the same key. Later it became customary to cast at least one movement in another key, the key of the subdominant predominating. No rigid rule can be given, except that the key of the dominant of the principal key seems undesirable, except in works in which that key is minor; and the use of very extraneous keys should be avoided. In sonatas before Beethoven the interest generally seems to centre in the earlier movements passing to the lighter reflection at

the conclusion. Beethoven changed this, in view of making the whole of uniform interest and equal and coherent importance. Before him the movements were merely a succession of detached pieces, hitched together chiefly with consideration of their mutual contrasts under the name of sonata or symphony—such as is typified even in Weber's A₇ sonata, of which the last two movements were written full two years before the first two, and in the similar history of some of Mozart's works. With Beethoven what was a whole in name must be also a whole in fact. The movements might be chapters, and distinct from one another, but still consecutive chapters, and in the same story. Helmholtz points out the scientific aspect of a connexion of this kind in the sonata in E minor, op. 90, of which he says:

'The first movement is an example of the peculiar depression caused by repeated "Doric" cadences, whence the second (major) movement acquires a still softer expression.'

In some cases Beethoven connected the movements by such subtle devices as making disguised versions of an identical figure reappear in the different movements, as in the sonatas in B₇, op. 106, and in A₇, op. 109, and the quartet in B₇. Such a device as this was not altogether unknown to Mozart, who connects the minuet and trio of the quintet in G minor, by making a little figure which appears at the finale cadence of the minuet serve as the basis of the trio—the minuet ending

and the trio beginning

In a little symphony of Haydn's in B major part of the minuet reappears in the finale; and the same thing is done by Beethoven in the C minor symphony. In his sonata called 'Les Adieux, l'absence, et le retour' (which is an instance of programme music), the last two movements, slow and fast, pass into one another; as is also the case in the sonata 'Appassionata.' In his quartet in C₇ minor all the movements are continuous. The same device is adopted by Mendelssohn in his Scotch symphony and concertos, by Schumann in the D minor symphony—the title of which expressly states the fact—and by Liszt in concertos. Schumann also in his symphonies in C and D minor connects his movements by the recurrence of figures or phrases.

C. H. H. P.

FORMÉ, NICOLAS (*b. Paris, Apr. 26, 1567*¹; *d. there, May 28, 1638*). A deed of gift, 1624, qualifying this composer as 'noble homme,' makes it probable that he had received his musical education in some princely household.

¹ The epitaph identifies the exact date and place of birth.

It was certainly excellent; writers of the time praise him as 'très docte musicien,'² his style of singing and his counter-tenor voice 'd'une justesse admirable.'³ At 20 years of age, July 4, 1587, his remarkable talents gained him a post as clerk and chanter in the 'Sainte-Chapelle' of the Palace. But he submitted with difficulty to the discipline of the choir and his life was somewhat irregular. After having been reprimanded several times by his superiors he left the 'Sainte-Chapelle,' 1592, to become counter-tenor in the Chapel Royal. A court musician, whilst remaining a church musician, he had a very brilliant career, both under Henri IV., who singled him out, and more especially under Louis XIII., whose favourite musician he was. On the day of Eustache du Caurroy's death, Aug. 7, 1609, Formé succeeded this celebrated contrapuntist (whose epitaph he composed), as 'sous-maitre' and musical composer to the Chapel. He retained the post until his death. In 1624 he received a benefice from Louis XIII., the Abbey of Notre Dame de Reclus, in the diocese of Troyes, and two years later, Nov. 11, 1626, he returned to the Sainte-Chapelle, which he had left thirty-four years before. He returned by the great door, and was made a canon. He found occasion during this last part of his life to do services to his confrères which his situation at the court and his high connexions fitted him to render; but fresh difficulties arose between him and the Chapter, caused by the lack of taste for religious life which he continued to show. He refused, to the end, to inhabit the canon's house which belonged to him, lodging always in the town, first, near the cloister of St. Germain l'Auxerrois, then in the Rue Bertin Poirée. He was too powerful to have the ecclesiastical rule imposed upon him, and it was in the Rue Bertin Poirée that he died, tended by his relatives, but also by a woman with whom he had lived for a long time. He was buried on the following day at St. Germain l'Auxerrois. His epitaph, engraved on a marble plaque and placed on one of the pillars, could be read until the revolution. He made a will, Dec. 15, 1631, making his sister Elisabeth Formé his sole legatee. She was the widow of a merchant and citizen of Paris, Antoine de la Croix. All the goods of the deceased, except a house at Passy, were ceded by the heiress, June 14, 1638, in consideration of a life annuity, to Paul Auger, 'surintendant' of the music, and a friend of Nicolas Formé. This deed of gift shows that the composer of the Chapel Royal died a very rich man.

Mersenne (1636) asserts the celebrity of Formé, but says that he had not had occasion to hear anything by him. At the court, at least, his motets made a sensation, and it was said that he had inaugurated an original style. Perhaps this style was too new to be appreciated

² l'Estotel.

³ Sauval.

widely, but he had enthusiastic admirers amongst the court; the Queen, Cardinal Richelieu, the King, Louis XIII. The King indeed so admired the works that at Formé's death he sent a sergeant of guards to claim the manuscripts and put them in a cupboard, specially made, of which he always held the key, and from which these precious manuscripts were never taken out unless he wished them to be played.

Quite at the end of his life, Formé, believing that his renown would be strengthened by his works being made public, began to print them, but the edition was stopped by his death. Thus we have only a very small part of them, for his manuscripts went, after the death of Louis XIII., into the hands of the 'sous-maitre' of the Chapel, Jean Veillot, and are now lost. The few which remain suffice, however, to enable us to affirm that his friends were right in recognising a curious novelty of form and of spirit in his work. Formé was the creator of the classical French motet, a piece of great development, and composed of soli and ensembles contrasting with one another. Leaving the ancient polyphonic style which his predecessor Du Caurroy had still practised so rigorously, Formé approached religious music from another point. His immediate successor, Thomas Gobert, then Du Mont and Robert, followed in his steps, and Lully and Lalande pursued it to its conclusion. In his Mass for two choirs, especially, the vocal groups are hardly ever superimposed; they alternate and make a dialogue with each other; one of them is formed of four solo voices, of which one, very melodic, dominates without ceasing, accompanied by the others; and in the second group, although the polyphony remains more compact, the figured style of the past scarcely reappears, and the points of imitation are reduced to a few short entries which are not pursued. The grouping of the voices into great choir and little choir is already there, and it is the new style of writing, the same that is found in Du Mont's works, appropriate to the tendencies henceforth more picturesque than constructive in music. Thus Formé's works, new in style, but also expressive of true religious feeling, have considerable historic interest.

WORKS

- * *Missa duobus choris ac quatuor vocibus* ('dedicated to the memory of Henri IV.'), Paris, Ballard, 1638, in folio, 4 parts separately, Library Mte. Geneviève.
A catalogue shows in 1707 two masses pub. by Ballard, the one above mentioned, and another for four voices, of which no copy has yet been found.
(*Cantique de la Vierge Marie* (Magnificat), a 4 v. MS., Paris, National Library, Ms. Fr. 1870.

FORMES, (1) KARL JOHANN (b. Mühlheim, Aug. 7, 1816; d. San Francisco, Dec. 15, 1889), bass singer, son of the sexton at Mühlheim on the Rhine, first attracted attention at the concerts for the benefit of the cathedral fund at Cologne in 1841. He made his début on the stage at Cologne as Sarastro in the 'Zauberflöte,' Jan. 6, 1842, with the most marked success. He sang at Mannheim from 1843-48; his next appearance was at Vienna. In 1849 he came to London, and sang first at Drury Lane in a German company as Sarastro on May 30. He made his appearance on the Italian stage at Covent Garden, Mar. 16, 1850, as Caspar in 'Il franco arciero' ('Der Freischütz'). At the Philharmonic he sang first on the following Monday, Mar. 18. From that time for some years he was a regular visitor to London, and filled the parts of Bertram, Marcel, Rocco, Leporello, etc. In 1857 he went to America. He obtained great success at Berlin in 1874 and in London in 1888, when he sang at Manns's Benefit Concert, and elsewhere.

His brother (2) THEODORE (b. Mühlheim, June 24, 1826; d. Enderich, near Bonn, Oct. 15, 1874), the possessor of a fine tenor voice and great intelligence, made his début at Offen in 1846, and in 1851-66 was engaged at the Berlin Opera. He went to America with his brother, who was ten years his senior, and afterwards sang second-rate parts at small German theatres. He died insane.

G.

FORMICHI, CESARE (b. Rome, 1887), operatic baritone. He studied in his native city under Vincenzo Lombardo, and made his début in 1911 at the Teatro Lirico, Milan, during a notable season promoted by the publisher, Sonzogno, for the performance of works by young Italian composers. His exceptional vocal gifts and warm artistic temperament secured him immediate prominence, and he quickly became a favourite, not only in Milan but at all the principal Italian theatres. He was especially successful in dramatic parts like Iago, Rigoletto, Tonio and Gerard ('Andrea Chénier'), which afforded scope for a voice of extraordinary volume and resonant timbre, capable of filling the amplest spaces. He also won high praise as an interpreter of several Wagnerian rôles, and in 1918 increased his fame by triumphs in Spain at the Teatro Reale of Madrid and the Liceo at Barcelona. He made his first appearance at Covent Garden on June 4, 1924, in 'Rigoletto,' when his powerful voice and expressive singing, coupled with his highly coloured portrayal of the jester, won for him an enthusiastic reception. Later he was heard

with equal favour as Scarpia and Tonio. During a special season in Paris he made his mark in all these characters and also as Amonasro. H. K.

FORNASARI, LUCIANO, a bass singer, who made his appearance about 1828 in Italy. In 1831 he was singing at Milan; the next three years he passed at New York. He sang at the Havana in 1835, and in 1836 in Mexico. Returning to Europe he obtained an engagement at Lisbon in 1840, and remained there two years. After this he made a tour in his native country, singing with success at Rome, Modena, Palermo, Turin and Trieste. In 1843 (Fétis is wrong in fixing it in 1845) Fornasari appeared in London, where he continued to sing till 1846. Fétis says he had a good voice and sang with method. J. M.

FORNSETE, JOHN DE, see SUMER IS IUCUMEN IN.

FORQUERAY (FORQUEROY, FORCROIX), (1) ANTOINE (b. Paris, 1671; d. Nantes, June 28, 1745), a famous viola da gambist, pupil of his father. At the age of 5 he played before Louis XIV., who called him his 'little wonder.' On Dec. 31, 1689, he became a member of the royal chamber music.

(2) JEAN BAPTISTE ANTOINE (b. Paris, Apr. 3, 1700), son of Antoine, was, like his father, a prodigy who played at the age of 5 before the same monarch, and was afterwards appointed as gambist in the royal chamber music. He was considered the greatest gambist of his time, and composed a book of fine pieces for his instrument which was published by his son.

(3) JEAN BAPTISTE (b. Paris, c. 1728), also a viola da gambist, though less distinguished than his father. He contributed some pieces to his father's book. Marpurgh speaks of him in 1750 as organist of the church of St. Mary (E. v. d. Straeten, *History of the Violoncello*). E. v. d. s.

FORSTER, GEORG (b. Amberg, c. 1514; d. Nürnberg, 1568), a physician by profession, but also a musician of considerable attainments, deserves notice here chiefly as being the editor of a comprehensive collection of German secular songs for four voices, which appeared in five Books published at Nürnberg from 1539-56. The best composers of the time are represented, including Isaac and Senfl, and of the 380 numbers contained in it Forster himself contributes 37. Many of the songs are Volkslieder, contrapuntally treated in the earlier German and Flemish manner. In the first Book, 1539, Forster has handed down to us Isaac's beautiful setting of 'Inspruck, ich muss dich lassen.' (See CHORAL.) Forster also edited two volumes of sacred works, 1540 and 1542. The second is a collection of Psalms, which opens with Josquin's 'Qui habitat' for 24 voices, and concludes with a 'Deo Gratias' for 36, which Eitner conjectured to be the piece by Okeghem referred to by

Ornithoparcus and Glarean. A few other sacred works by Forster himself are contained in other collections. Winterfeld gives Forster's setting of 'Vom Himmel hoch' for five voices. The second part of Forster's collection of *Weltliche Lieder* was reprinted in score by Eitner in 1904.

J. R. M.

FORSTER, (1) WILLIAM (b. Brampton, Cumberland, May 4, 1739; d. Westminster, Dec. 14, 1808), eminent violin-maker, son of William, and grandson of John Forster, makers of spinning-wheels and violins. He was taught both trades by his father, and also learned to play on the violin. He came, as a cattle-drover, to London in 1759, took up his abode in Prescott Street, Goodman's Fields, and for a time endured much privation from inability to obtain suitable employment. Ultimately he was engaged by a music-seller on Tower Hill named Beck, and the violins made by him being much improved and quickly sold, he started in business on his own account in Duke's Court, St. Martin's Lane, whence he shortly removed into St. Martin's Lane, and speedily attained great reputation. Forster afterwards added to his business that of a music-seller and publisher, and in that capacity in 1781 entered into an agreement with Haydn for the purchase and publication in England of that master's compositions, and between that date and 1787 published 83 symphonies, 24 quartets, 24 solos, duets and trios, and the 'Seven Last Words.' About 1785 he removed into the Strand (No. 348), where the business was carried on until the pulling down of Exeter Change. In 1795 he issued a copper medal or token, halfpenny size, bearing—

Obverse, 'Wm. Forster, Violin, Tenor and Violoncello Maker, No. 348, Strand, London.' *Prince of Wales's feathers* in the field. *Reverse*, the melody of 'God save the King' in the key of G. A crown in the field, above it 'God save the King,' beneath it '1795.'

Forster died at the house of his son, 22 York Street, Westminster. W. H. H.

(2) WILLIAM (b. 1764; d. 1824), son of the above-mentioned, and generally known as 'Royal' Forster, from his title 'Music Seller to the Prince of Wales and the Duke of Cumberland.' Like his father, he made large numbers of violins which once enjoyed a high reputation. By making the bellies of their instruments thin, and increasing the weight of the blocks and linings, the Forsters obtained, while the instrument was still new, a strong and penetrating tone, which found high favour with Lindley and his school. Being well made and finished, and covered with excellent varnish, their instruments have much that commends them to the eye. The Forsters copied both Stainer and Amati. 'Royal' Forster had two sons: (3) WILLIAM (1788-1824), the eldest, devoted himself to other pursuits, and made but few instruments; but the second, (4) SIMON ANDREW

(b. 1801; d. Feb. 2, 1870), carried on the business, first in Frith Street, afterwards in Macclesfield Street, Soho. Simon made instruments of high model and no great merit. He is best known as the author (jointly with W. Sandys, F.S.A.) of *The History of the Violin and other Instruments played with the Bow*, 1864. E. J. P.

FORSTER & ANDREWS have been established at Hull as organ-builders since 1843. Amongst many instruments from their factory may be quoted the organs in the Kinnaid Hall, Dundee; St. Mary's, Leicester; Holy Trinity, Hull; and the City Temple, London.

v. de p.

FORSYTH, CECIL (b. Greenwich, Nov. 30, 1870), educated at Edinburgh University and at the R.C.M. (under Parry and Stanford), a man of versatile attainments, is particularly noteworthy as the author of several important books on music.

Forsyth played the viola in the Queen's Hall Orchestra for some years, and was active as a composer, producing in London two comic operas (with C. Scott-Gatty) at the Savoy and Aldwych theatres. In 1914 he removed to New York, where he entered the music publishing firm of H. W. Gray, through whom many of his later compositions have been issued. Forsyth's important literary work begins with *Music and Nationalism* (1911), a close study of the chequered history of English opera, a treatise on *Orchestration* (1914), the most thorough work on its subject in the English language, and a *History of Music* (1914) written in conjunction with Stanford. Further, *Choral Orchestration* followed in 1920. c.

FORSYTH BROTHERS, a firm founded at Manchester for the sale of pianos, by the brothers HENRY (d. July 1885) and JAMES FORSYTH in 1857. They had been brought up, and represented the third generation of the name, in the establishment of John Broadwood & Sons. Forsyth Brothers began engraving music in 1872, with Hallé's 'Practical Pianoforte School,' the first numbers of which were published by them in Jan. 1873, and at the same time they opened a London publishing business in Oxford Circus. An appendix to the 'School,' entitled the 'Musical Library,' was begun some time after, and a catalogue was formed which includes several compositions by Stephen Heller as well as important works by other composers. They have also added to the instrumental part of their business an agency for American organs, from the manufactory of the Dominion Organ Company, Ontario, Canada. James Forsyth, in connexion with the business in Manchester, maintained an important share in the management of the leading concerts of that city. Since 1901 the firm has been a limited company. A. J. H.

FORTE, loud: an Italian word, usually abbreviated into *f*. A lesser degree of loudness is

expressed by *mf*—*mezzoforte*; a greater one by *più f* and *ff*, *fortissimo*, and the greatest of all by *fff*, *fortississimo*, as in Beethoven's Seventh Symphony (Finale) and other works. Four and more *f*'s have been used by later composers, until the additions have sometimes become meaningless.

Fortepiano—afterwards changed to *Pianoforte*—was the natural Italian name for the new instrument which could give both loud and soft sounds without mechanical aid. G.

FORTI, ANTON (b. Vienna, June 8, 1790; d. July 16, 1859), distinguished baritone singer. He made his début at Presburg with so much success that towards the end of 1807 Prince Esterhazy engaged him almost at the same time as the tenor Wild for his celebrated band. Forti soon forfeited the favour of the Prince, who suddenly enrolled him as a soldier, and only released him at the intercession of several of the nobility. He next appeared (June 29, 1811) at the Theatre 'an der Wien' as Don Juan, a part for which his very sonorous voice, commanding presence, and elevated refined style of acting eminently fitted him. In Apr. 1813 he was engaged at the court theatre, and speedily became a favourite. Besides Don Juan he specially excelled in Figaro (Mozart and Rossini), Telasco ('Ferdinand Cortez'), etc., and in French dialogue-operas. He sang Pizarro at the revival of 'Fidelio' in 1814: and Lysiar at the first performance of 'Eury-anthe' (1823). When Count Gallenberg undertook the direction of the court theatre in 1829 Forti was pensioned, and made starring tours to Prague, Hamburg and Berlin, where he also took a short engagement. On his return to Vienna his voice had lost its charm, and his increasing corpulence spoiled his acting. He retired finally from the stage after winning the first prize in one of the public lotteries.

C. F. P.

FORTUNATI, FRANCESCO (b. Parma, Feb. 24, 1746), a pupil of Padre Martini at Bologna. He returned to Parma c. 1769, where he produced his first opera, was appointed maestro di cappella at the court and music-master to the Archduchess Amalia. He composed several operas, church music, symphonies, quartets, etc. (see *Q.-L.*). He visited Dresden, Berlin, etc., but remained in the service of the Duke until the death of the latter in 1802. In 1810 he became a member of the newly founded Academy at Parma. E. v. d. s.

FORZA DEL DESTINO, LA, tragic opera by Verdi, libretto by Piave, in 4 acts. Produced St. Petersburg, Oct. 30 (Nov. 11), 1862; Her Majesty's Theatre, June 22, 1867; New York, Feb. 2, 1865; in English, Carl Rosa Co., Kennington, Sept. 2, 1910.

FOSSA, JOHANN DE (d. Munich, before Whit-sun 1603), musician at the court of Bavaria in 1570. In 1571 he became second Kapell-

meister, and in 1590 (after the death of Lassus) Kapellmeister. His masses, litanies, etc., are in MS. in the Munich State library; also in the Cathedral library, Ratisbon. E. v. d. s.

FOSTER, JOHN (d. Apr. 1677), an English church composer of the 17th century. He became organist at Durham Cathedral in 1661 and held this post until his death. The following entry is in the Burial Registers of the cathedral under the date Apr. 21 of 1677:

'Joh^{es} Foster, Organista, naturæ concessit vicesimo die mensis Aprilis, et die sequente sep^{ta} est.'

A good deal of his music is in the choir books and organ books at Durham; the tenor cantoris parts of his anthems are in B.M. Add. MSS. 30,478-9. These latter originally belonged to a set of Durham choir books made in 1664 and 1670, when John Cosin was bishop there. MS. 30,478 belonged to George Davenport, Cosin's chaplain, and bears the following on its title-page:

'A Booke of Selected Church Musick consisting of full Anthems and Anthems with Verses Used in the Cathedrall Church of Durham Anno Domini 1664.'

Three services and eleven anthems are identified from these sources. J. M^c.

FOSTER, MURIEL (b. Sunderland, Nov. 22, 1877), English mezzo-soprano singer, whose European reputation was founded primarily on her interpretation of the part of the Angel in Elgar's 'Dream of Gerontius' at Düsseldorf, 1902 (see ELGAR).

From 1896-1900 Muriel Foster was the pupil of ANNA WILLIAMS (q.v.), at the R.C.M., where she gained a Council Exhibition in 1896 and a scholarship in 1897. On Nov. 6, 1896, she made her début in oratorio at Bradford in Parry's 'King Saul.' On Mar. 25, 1899, she first appeared at the Popular Concerts (St. James's Hall, London) in duets by Brahms, Cornelius and German, in conjunction with her twin-sister and fellow-student Miss Hilda Foster (who retired from public life in July 1900 on her marriage with Mr. F. C. Bramwell). On Mar. 15, 1900, she sang some of Elgar's 'Sea Pictures' with great success at a students' concert in the same hall. From 1899 until her marriage in 1906 with Mr. L. Goetz,² Muriel Foster was constantly engaged at principal London concerts and provincial festivals. She also sang in Germany, Holland, Russia and the United States. She particularly excelled in oratorio and in such works as Brahms's Alto Rhapsody and classical arias, which displayed the richness of a voice of singularly even quality through a range of over 2 octaves (g to b^b flat). Since her marriage her appearances have been intermittent. She has occasionally given recitals in London and taken part in festivals, notably Birmingham, 1912, and Leeds, 1913.

A. C.; rev. C.

FOSTER, MYLES BIRKET (b. St. John's Wood, London, Nov. 29, 1851; d. Bedford Park, London, Dec. 18, 1922), composer and organist, the eldest son of the late Birket Foster, the artist. Upon leaving school he was articled to Hamilton Clarke for two years. He subsequently entered the R.A.M., where he studied under Sullivan, Prout and others. Foster held organistships at St. James's Church, Marylebone, and St. George's, Campden Hill; from 1880-92 he was organist of the Foundling Hospital, during which period he was also organist at Her Majesty's Theatre, and choirmaster of St. Alban's, Holborn.

Foster composed a symphony in F sharp minor ('Isle of Arran'), overtures, a string quartet, a pianoforte trio, etc., numerous cantatas for children, and a great quantity of church music, popular in its day, but of slight permanent value. His *History of the Philharmonic Society* (London, 1913) is a valuable record of that Society's proceedings through 100 years. c. (material from F. G. E.).

FOSTER, STEPHEN COLLINS (b. near Pittsburgh, Pennsylvania, U.S.A., July 4, 1826; d. New York, Jan. 13, 1864), an American popular composer. He graduated at Jefferson College, near Pittsburgh, and had little musical training, though he showed a liking for the German classics. His first composition, as a schoolboy, was a waltz for four flutes. In 1842 appeared his first published song, 'Open the Lattice, Love.' From that time he produced a large number of songs, a few of which reached and have retained a very great popularity, not only in America but also elsewhere; songs of a truly popular character, often on negro subjects, and with words in negro dialect. Of almost all of them he himself wrote the words.

There are American critics who demand, in defiance of any reasonable and useful definition of the term 'folk-song,' that these songs of Foster's be regarded as the only true American folk-songs. They are, of course, not folk-songs, but they have the character, and have retained the place of, what the Germans call the 'volkstümliches Lied.' The most widely known are 'Swanee Ribber' (properly 'Old Folks at Home'), 'My Old Kentucky Home,' 'Old Dog Tray,' 'Massa's in de Cold, Cold Ground,' and 'Old Black Joe.' Most of the other songs of Foster, some 175 in number, chiefly sentiments! ditties, have been forgotten. It has been said that he was indebted for some of his themes to untutored plantation negroes; but it is more probable that the themes are entirely his own, and that he adopted the negro dialect to meet the demands of the negro minstrel companies who first sang his songs. The appearance of the name of Christy, the negro minstrel, as the author of 'Swanee Ribber' is explained by the fact that Foster consented thereto for a

¹ West's *Cath. Org.* p. 27.

² At a later date Mr. and Mrs. Goetz adopted the latter's maiden name of Foster.

stipulated sum of money, but for the first edition only.

Foster's life was not passed in poverty as has sometimes been said; his songs brought him a good income (though small compared with the publishers' gains). But the last years of his life were made miserable and squalid by his intemperance. He had the genius to enable him to touch the hearts of his fellow-countrymen as few or no others have ever done. His was an untutored genius; but it has tasted of immortality. Memoirs of Foster have been published by his brother, Morison Foster (1896), and by Harold V. Milligan (1920). A bibliography of his compositions by Whittlesey and Sonneck appeared in 1915.

R. A.

FOUGT, HENRY, a printer and publisher of sheet and other music from metal type in which he claimed to have made improvements. A patent for these was obtained in 1768, in or about which year Fougst set up shop at the sign of the 'Lyre and Owl' in St. Martin's Lane. He submitted specimens of his work to the Society for the Encouragement of Arts, and obtained a resolution from that body to the effect that 'his method of printing was superior to any that had been before in use in Great Britain, and that it could be performed much cheaper.' He was the pioneer of cheap music, for he sold his sheet music at 'one penny per page or eighteen for a shilling.' The typography is excellent, and undoubtedly was a great advance in the art. He appears to have aroused some ill feeling among the rest of the trade. Hawkins states that Fougst was a native of Lapland, and that the 'music sellers of London copied his publications on pewter plates, and by underselling drove him out of the kingdom.' This is of course obviously wrong, for while sheet music was on an average sixpence per page, Fougst sold his sheets at a penny.

Besides sheet song-music he issued collections of Sonatas by Croce, Sarti, Uttini and Sabatini. On most of these he prints an artistic and boldly engraved woodcut design—an owl sitting over a rocky cave, with a torch and pair of scales, forming part of the subject. About 1770 he sold his plant and type to R. Falkener, who, at 3 Peterborough Court and afterwards at 45 Salisbury Court, both in Fleet Street, issued sheet songs in similar style, and at the same low price.

F. K.

FOUNDLING HOSPITAL. The connexion of Handel with this charitable institution (founded by Captain Coram in 1739) forms a pleasant episode in the composer's life in England, and gives a signal illustration of his benevolence. Following the example of the masters of the sister art of painting, who organised an exhibition on its behalf, and of Hogarth and others, who presented paintings for its decoration, Handel, on May 4, 1749, attended a committee at the Hospital and offered a performance

of vocal and instrumental music in aid of the fund for finishing the chapel.¹ The *Gentleman's Magazine* records that:

'Saturday 27th [May] the Prince and Princess of Wales, with a great number of persons of quality and distinction, were at the chapel of the *Foundling's Hospital* to hear several pieces of vocal and instrumental music, compos'd by *George Frederick Handel, Esq.*, for the benefit of the foundation: 1st, the music for the late Fire Works and the anthem on the Peace; 2nd, select pieces from the oratorio of *Solomon* relating to the dedication of the Temple; and 3rd, several pieces composed for the occasion, the words taken from Scripture, applicable to the charity and its benefactors. There was no collection, but the tickets were at half-a-guinea, and the audience above a thousand.'

The music specially written was the anthem 'Blessed are they that consider the poor.' The governors, under a misapprehension, imagined that he intended to present them with the copyright of his oratorio 'Messiah,' and prepared a petition to Parliament praying that a bill might be passed to secure to them the right in perpetuity; but Handel indignantly repudiated any such intention, and the petition never reached the House. On the completion of the chapel Handel presented it with an organ,² built by a Dr. Morse of Barnet, which he opened on May 1, 1750, when the attendance was so large that he was compelled to repeat the performance. For his generosity Handel was in 1750 enrolled as one of the governors and guardians of the Hospital, and during every subsequent year, while his health permitted, he directed the performance of the 'Messiah' in the chapel, which yielded to the charity a net result of £7000 in all. The composer by his will bequeathed 'a fair copy of the score and all the parts of the Messiah' to the Hospital, and on his death a dirge and funeral were performed in the chapel on May 26, 1759, under the direction of his amanuensis, John (Christopher Smith, who, with his full concurrence, had been appointed the first organist, and who had conducted the performance of the 'Messiah' on May 3, three weeks after the composer's death. The artistic value of the bequest was not quite fully realised until the parts were examined by H. Davan Wetton, organist from 1892, and proved to be of great importance.

In July 1774 Dr. Burney proposed to the governors a scheme for forming a Public Music School at the Hospital for the training of the children; but strong opposition was raised to it, and it was never proceeded with. The chapel services were for many years noteworthy for their music, in which the professional choir was assisted by the children.

C. M.

FOUQUET, PIERRE-CLAUDE, became one of the four organists of the Chapelle-Royale, Paris, in 1758, being employed for the 4th quarter, Oct. - Dec., succeeding François Dagincourt.

¹ The historic building facing Guilford Street was vacated in 1925, when the Hospital was removed to the country. The fate of the building for a time remained undetermined.
² For specification and other interesting particulars see *Mus. T.* for May 1902, p. 308.

Three books of harpsichord pieces (c. 1750), as well as some single pieces for harpsichord and one for pianoforte, signed Fouquet, are probably by him (Q.-L.).

FOURNEAUX, (1) J. B. NAPOLEON (b. Léard, Ardennes, May 21, 1808; d. Aubanton, Aisne, July 19, 1846), originally a watchmaker, improved the Accordion. In 1830 he settled in Paris; in 1836 bought Chameroy's organ factory, and introduced great improvements in the manufacture of all reed instruments blown by wind. At the exhibition of 1844 he received a silver medal for his 'orgues expressives.' He originated the idea of the percussion action in harmoniums.

His son (2) J. L. NAPOLEON (b. 1830) improved the construction of the 'orgues expressives,' and invented the melodina (1855).

FOURNIER, PIERRE SIMON (b. Paris, Sept. 15, 1712; d. there, Oct. 8, 1768), engraver and type-founder, was the son of Jean Claude Fournier, director of the type foundry of Le Bé. He greatly improved the engraving of music in France, which up to his day was still effected by punches on the model of those cut by Hantin in 1525. He replaced the lozenge-shaped notes by round ones, and made music altogether easier to read, although his notes were still thin and poor compared with those of later times. He published *Essai d'un nouveau caractère de fonte pour l'impression de la musique*, etc. (Paris, 1756), and a *Traité historique et critique sur l'origine et les progrès des caractères de fonte pour l'impression de la musique* (Paris, 1765), which, though incomplete and occasionally incorrect, contains interesting information on music printing in France. Giacomo Falconi of Venice seems to have attained a similar result almost simultaneously with Fournier. Falconi published at Venice in 1765 *Manifesto d'una nuova impresa di stampare la musica*, etc.; and Paolucci's *Arte pratica di contrapunto* (1765) was printed in the new characters.

M. C. C.; addn. M. L. F.

FOURTH is an interval comprising two whole tones and a semitone. It is called a fourth because four notes are passed through in going from one extreme of the interval to the other, for which reason the Greeks called it *διὰ τεσσάρων*—Diatessaron. The ratio of the vibrational numbers of its limiting sounds is 3 : 4. It is in fact a perfect consonance, though regarded as a discord in the old diatonic style.

C. H. H. P.

FOX STRANGWAYS, ARTHUR HENRY (b. Norwich, Sept. 14, 1859), is a writer on musical subjects, whose most distinctive service has been the foundation of *Music and Letters*, a quarterly publication devoted to music.

He was educated at Wellington College and Balliol College, Oxford (M.A., 1882), and

studied music for two years (1882-84) at the Berlin Hochschule. He did not, however, enter the musical profession but became an assistant master at Dulwich College (1884-86) and at Wellington College (1887-1910). He went to Wellington as a form master, but took over the music mastership in succession to Alan GRAY (q.v.) (1893-1901). He relinquished the musical direction to become tutor (House Master in College) (1901-10). During that time he had paid a vacation visit to India (1903) and, his interest in Indian music being aroused, he determined on a more extensive tour when he resigned his mastership at Wellington. From Oct. 1910 to May 1911 he travelled in Hindostan studying the theory of this music from native sources and making many phonographic records of its performance. The result was a treatise, *The Music of Hindostan* (1914), which remains by far the most important work on the subject in the English language. While engaged on this, Fox Strangways settled in London and undertook (1911) some concert criticisms for *The Times*, a little later becoming a regular member of its staff. In 1925 he left *The Times* to become musical critic to the *Observer*.

After the war (1919) he determined to found at his own risk and under his own editorship a quarterly journal, in which musicians rather than professed critics should discuss at length matters concerning their art. The first number of *Music and Letters* was published in Jan. 1920, and a double number devoted to Beethoven celebrated the centenary of the composer in March 1927. The several numbers deal with innumerable aspects of music by writers of standing, most of whom are specialists in their subjects. Fox Strangways's personal contributions have been specially concerned with the problems of translating German songs into English verse. *Music and Letters* has published a whole series of such translations, including many by Fox Strangways. He has also lectured on this subject before the Musical Association and other bodies. C.

FRA DIAVOLO, OU L'HÔTELLERIE DE TERRACINE, opéra-comique in 3 acts; words by Scribe, music by Auber. Produced Opéra-Comique, Jan. 28, 1830; in English, adapted by Rophino Lacy, Drury Lane, Nov. 3, 1831; in Italian, Lyceum, July 4-11, 1857.

FRÄNZL. Two violinists, father and son.

(1) IGNAZ (b. Mannheim, June 3, 1736; d. there, 1811/12) became a member of the Mannheim orchestra (1747) and its leader (1774). On the removal of the court to Munich (1778) he remained at Mannheim, where he became musical director of the 'Hoftheater' (1790-1803). He composed symphonies, violin concertos and chamber music. (*Riemann*.)

His son (2), FERDINAND (b. Schwetzingen, Palatinate, May 24, 1770; d. Mannheim, Nov.

19, 1833), was a pupil of his father, and performed, when only 7 years of age, a concerto at a court concert in Mannheim, where he entered the band of the Elector in 1782. From 1785 he began to travel with his father. During a prolonged stay at Strassburg he studied composition under Richter and Pleyel, and later under Mattei at Bologna. He appears to have been less successful at Paris than at Rome, Naples and Palermo. He went with the court of Mannheim to Munich in 1778, was made Konzertmeister in 1789, and was a conductor in the Frankfort theatre in 1792, in which year he returned to Munich; he took C. Cannabich's place as leader of the band, but in 1802 again started for a tour to Russia. At this period Fränzl was generally acknowledged to be one of the best of living violin-players, and his compositions enjoyed great popularity. Spohr heard him in 1802 at St. Petersburg, and gives an interesting account of him:

'Fränzl was at that time the foremost of violin players in St. Petersburg. He still follows the old method of holding the violin on the right side of the tail-piece, and is therefore obliged to play with his head bent down. (See VIOLIN.) He also lifts the right arm very high, and has a bad habit of raising his eyebrows whenever he plays something expressive. His execution is neat and clear. In the slow movements he performs a great many runs, shakes, and cadenzas, with rare precision and distinctness; but as soon as he plays *forte* his tone is rough and unpleasant, owing to his drawing the bow too slowly and too close to the bridge, and pressing it too much on the string. Quick passages he executes with good intonation and very clearly, but invariably in the middle of the bow, and consequently without light and shade.'

On a later occasion Spohr comments less favourably on him, and describes both his style and his compositions as old-fashioned; but this only shows that Fränzl had not kept pace with the progress made in violin-playing towards the end of the 18th and beginning of the 19th century, and could not stand comparison with the great masters of the Paris school, still less with Spohr himself.

In 1806 Fränzl returned to Munich, and was appointed conductor of the opera. He did not, however, give up travelling, and played at various times in Paris, Amsterdam, Vienna and Leipzig. In 1823 he made a second journey to Italy. He retired in 1826, and went to live at Geneva, but finally settled at Mannheim. Fränzl was a fertile composer. He published 9 concertos and 4 concertinos for the violin, 1 concertante and 3 duos for 2 violins, 9 quartets for strings, 3 trios for 2 violins and bass, several overtures, a symphony and a number of songs. He also wrote operas, which were performed with much success at Munich and elsewhere. (See list in *Q.-L.*)

P. D.

FRAMERY, NICOLAS ÉTIENNE (b. Rouen, Mar. 25, 1745; d. Paris, Nov. 26, 1810), author and musician. When quite young he was appointed 'Surintendant de la musique' to the Comte d'Artois. He wrote both words and music of 'La Sorcière par hasard' (1783), a

comic opera, and of 'Médée,' a prize libretto, which was to have been set by Sacchini, had not his death intervened. It was never performed. Framery was a skilful adapter of French words to Italian music in various 'parodies' of operas by Paisiello and Sacchini. As an author he published—A criticism on Gluck in the *Mercure* for Sept. 1776; *Le Musicien pratique* (Paris, 1786), a poor translation of Azopardi's *Il musico pratico*, rearranged by Choron in 1824; a 'discours' on *Les Rapports qui existent entre la musique et la déclamation* (1802); articles on Della-Maria (1800) and Haydn (1810). He edited, from 1770–78, the *Journal de Musique historique, théorique et pratique sur la musique ancienne et moderne*, founded by Mathon-de-la-Cour in 1764; the *Calendrier musical*, 1788–89, a continuation of Mathon de-la-Cour's *Almanach musical* (1775); and took part with Ginguéné and the Abbé Feytaud in the musical dictionary of *L'Encyclopédie méthodique* (1791), completed in 1811 by de Momigny; and in the *Dictionnaire des beaux arts* of the Académie. He was a Correspondant of the Institut. After copyrights had been recognised by law, Framery established an agency for enforcing the rights of authors throughout France. He died leaving MS. notices of Gavinies and various other musicians.

M. C. C.: REV. M. L. P.

FRANC (LE FRANC), GUILLAUME (d. Lausanne, June 1570), the son of Pierre Franc of Rouen, was probably one of the French Protestants who fled to Geneva as an asylum from the persecution to which those who embraced the doctrines of the Reformation were then exposed. He settled in that city in 1541, shortly before the return of Calvin from Strassburg, and obtained a licence to establish a school of music. In 1542 he became master of the children and a singer at St. Peter's at a salary of 10 florins. In 1543 the Council of Geneva resolved that 'whereas the Psalms of David are being completed,' and whereas it is very necessary to compose a pleasing melody to them, and Master Guillaume the singer is very fit to teach the children, he shall give them instruction for an hour daily.' His pay was increased from 10 to 50 florins, and afterwards raised to 100, with the use of part of a house, but on the refusal of the Council to grant a further addition to his salary Franc left Geneva in 1545 and joined the choir of the Cathedral of Lausanne, where he remained until his death.

Franc's name is chiefly known in connexion with the Psalter published at Geneva by Calvin for the use of the reformed churches. The first edition of this celebrated work appeared in 1542, containing 35 psalms, and was enlarged from time to time until its completion in 1562.

¹ This refers to the additional versions then being written by Maroz.

Of this Psalter Franc has been generally believed to be the musical editor; but later researches, especially those of M. O. Douen, show the claim set up for him to be devoid of foundation. (See *BOURGEOIS*.) He certainly had nothing to do with the Psalter after leaving Geneva in 1545, and although the resolution of the Council quoted above may appear to indicate an intention of employing him to adapt melodies to some of the psalms then newly translated by Marot, there is no evidence that this intention was ever carried into effect.

Franc, however, did edit a Psalter. The church of Lausanne had on several occasions shown a spirit of independence of that of Geneva and at the time of Franc's arrival sang the psalms to melodies by Gindron, a canon of the cathedral, which differed from those in use at Geneva. As early as 1552 Franc appears to have been engaged on a new Psalter, for in that year he obtained a licence to print one at Geneva, there being then no press at Lausanne. No copy of this book, if it was ever published, is known to exist, but the terms of the licence¹ show that it consisted of the psalms of Marot with their original melodies, and the 34 psalms translated by de Bèze the year before, to which Franc, probably in rivalry with Bourgeois, had adapted melodies of his own. At any rate, in 1565, three years after the completion of the Genevan Psalter, that of Lausanne appeared, under the following title:

'Les Pseaumes mis en rime françoise par Clement Marot et Theodore de Bèze, avec le chant de l'église de Lausanne [*sic*] 1565. Avec privilège, tant du Roy, que de Messieurs de Geneue.'

In the preface Franc disclaims any idea of competition with those 'who had executed their work with great fidelity,' or even of correcting 'what had been so well done by them.' He gives no intimation that he had himself taken any part in that work, and states, with respect to his own book, that, in addition to a selection of the best tunes then in use in the church of Lausanne as well as in other reformed churches, he had supplied new ones to such of the psalms, then recently translated, as had not yet been set to music, and were consequently sung to the melodies of psalms in the older editions of the Psalter. He adds that his object was that each psalm should have its proper tune, and confusion be thereby avoided.

Stress has been laid by some writers who attributed the Genevan melodies to Franc, on a letter written to Bayle by David Constant, professor of theology at Lausanne at the end of

¹ This important document, discovered in the registers of the Council of Geneva, deserves to be quoted in full:

Jendi 28 juillet 1552.

... Sur ce quil le dit maistre Jacques, ministre de Lausanne, a proposé que à Lausanne liz ne se sont peult entre d'accord de chanter les pseaumes changez icy par maistre Loyse Bourgeois, ny ceux quil a mis en chant du sieur de Beze, liz sont en propos de faire imprimer les pseaumes translatez par Marot en leur premier chant, et aussey ceux qu'a translate le sieur de Beze en vng chant que y a mis le chanta de Lausanne pour les chanter, ce quilz n'ont ausé faire sans licence. Pourquoi il a requis permettre les imprimer icy. Arrêté que, attendu que c'est chose raisonnable, il leur soit permis.

the 17th century, in which he states that he had seen a certificate bearing date Nov. 2, 1552, and given by de Bèze to Franc, in which de Bèze testifies that it was Franc who had first set the psalms to music. Constant adds that he himself possessed a copy of the psalms in which the name of Franc appeared and which was printed at Geneva under the licence of the magistrates of that city. Baulacre, however, writing in 1745 in the *Journal Helvétique*, after investigating the accuracy of Constant's statement, shows that the account he sent to Bayle of de Bèze's letter was erroneous, as that letter contained no reference to the authorship of the melodies. Even had it done so, we have seen above that in that very year Franc had obtained a licence to print a collection of psalms for Lausanne, and the Psalter to which Constant refers is that of 1565, also compiled for local use.

In this latter collection 27 melodies are composed or adapted by Franc to the psalms left without them in the Genevan Psalter of 1562 (51,² 53, 62, 63, 64, 65, 66, 67, 68, 70, 71, 76, 77, 78, 82, 95, 98, 100, 108, 109, 111, 116, 127,³ 139, 140, 142 and 144), 19 are selected from the tunes previously in use at Lausanne, and the rest are taken from the Genevan Psalter.

Before long, however, Lausanne followed the example of the other reformed churches, and the Psalter of Franc was superseded by that of Bourgeois.

Franc's tunes are of small merit. Some specimens of them are given by Douen in his *Clement Marot et le Psautier Huguenot*, 2 vols. (Paris, 1878-79), from which the materials for this article are chiefly derived.

FRANCESCA DA RIMINI, (1) tragic opera in 3 acts, by Hermann Goetz; the first two acts finished, and the third sketched, by the composer; completed by Ernst Frank, and produced Mannheim, Sept. 30, 1877: (2) grand opera in 4 acts, by Barbier and Carré, music by Ambroise Thomas; produced Opéra, Paris, Apr. 14, 1882: (3) opera, text by E. Ponomarier, after Stephen Phillip's play, 'Paolo and Francesca,' music by Napravnik; produced Nov. 1902: (4) opera in 4 acts, words by Tito Riccordi (after d'Annunzio), music by Zandonai; produced Reggio Theatre, Turin, Feb. 1, 1914; Covent Garden, July 16, 1914; New York, Metropolitan Opera House, Dec. 22, 1916.

² Psalms 51 and 127 had proper tunes in the Genevan Psalter, to which de Bèze's versions of 69 and 117 were respectively sung. Franc retained the Genevan melodies for the later psalms, and adapted distinct tunes to the older ones. Of these tunes, that which Franc set to 51 was its original melody, to which Bourgeois adapted it in 1542, but which he had replaced by another in 1551.

For the symphonic poem on this subject see under TCHAIKOVSKY.

FRANCESCO DA MILANO (*b. circa 1490*), a famous lute-player at the court of Mantua in 1510; in the service of Ippolito di Medici in 1530. He wrote 2 books 'Intavolatura di liuto' (1536 and 1546; both in several editions). In 1548 appeared the 7th book and in 1568 an unnumbered one. Many of the lute-books of the 16th century contain pieces by him (*Q.-L.; Riemann*).

FRANCESINA, ELISABETH DUPARC, a French singer, who sang for some years in Italy, where she acquired her sobriquet. In the autumn of 1736 she came to London, and 'had the honour to sing (with Merighi and Chimenti) before her majesty, the duke, the princesses at Kensington, and met with a most gracious reception; after which the *Francesina* performed several dances to the entire satisfaction of the court' (*London Daily Post*, Nov. 18.) The accomplishment of dancing, however, she does not seem to have kept up. Her name as a public singer is not found until Jan. 7, 1738, when she played Clotilda in Handel's 'Faramondo' on its first representation, the first part ever written for her by the great German. She seems to have had an easy, warbling style of execution, which Burney calls 'lark-like,' and pleased both composer and public. La Francesina appeared again in Pescetti's 'Conquista del vello d'oro' and in Handel's 'Serse' that same year; and in 1739 she took part in 'Acis,' 'Saul,' 'Israel' and 'Dryden's Ode.' In 1740 she reappeared in 'L' allegro,' and in 'Imeneco' by the same composer; the latter 'advertised for Nov. 29, but deferred for near a fortnight, on account of the indisposition of Francesina' (Burney). On Jan. 10, 1741, she sang in Handel's last opera 'Deidamia,' in which, according to Burney, 'Nascondi l'usignol, which finishes the first act, is a light, airy, pleasing movement, suited to the active throat of the Francesina.' In 1744 and 1745 she took part in Handel's 'Joseph,' 'Belshazzar' and 'Hercules'; she had quitted the stage, 'but constantly attached herself to Handel, and was first woman in his oratorios for many years' (Burney). She enjoys the doubtful honour of having sung the four Italian songs which Handel was compelled to 'intermix' in 'Israel in Egypt' in 1739, to carry it over a third performance. In 1737 her portrait was engraved by J. Faber in mezzotint from a painting by George Knapp. It is a half-length, and represents a pleasant, intelligent woman; she holds a book, on a page of which are the words, 'Ua sei amabile speranza,' the beginning, probably, of one of her favourite songs.

J. M.

FRANCHETTI, ALBERTO (*b. Turin, Sept. 18, 1860*), composer, was born of wealthy parents, and studied at first under Nicolò

Coccon and Fortunato Magi, subsequently under Draeseke at Dresden and at the Munich Conservatorium under Rheinberger. From his German teachers he seems to have acquired skill in the manipulation of masses of sound, such as are required for operas on a large scale; yet the thoroughness of his training has not secured him a very high position in the estimation of the best Italian critics, although his private means have enabled him to command the attention of the public, and to have his works produced under the most favourable conditions. The following operas have appeared: 'Asrael,' in 4 acts, produced Reggio d'Emilia, Feb. 11, 1888, and afterwards at La Scala, and elsewhere, had great success. His 'Cristoforo Colombo,' in 4 acts, produced at Genoa, Oct. 1892, contains an admirably worked ensemble in the first act, but appeals to the public rather by its scenic panorama of the voyage than by anything else. The 3-act 'Fior d'Alpe' (Verona, 1894) and the 3-act 'Signor di Pourceaugnac' (Milan, 1897) were less successful than 'Germania' (Milan, 1902).¹ This has had considerable vogue, and was even put on at Covent Garden in 1907. A symphony in E minor must be mentioned in the number of his works. Later productions at Milan have been 'La figlia di Jorio' (1906) and 'Notte di Leggenda' (1915). Franchetti collaborated with GIORDANO (*q.v.*) in the production of 'Giovane Pompei' (3 acts) (Rome, 1921). 'Glaucos,' text by Forzano, appeared at Naples (1922).

Some critics have called Franchetti the Meyerbeer of modern Italy, and there are certain points of resemblance between the two, besides the accident of their outward circumstances—circumstances, it may be hinted, that are not always entirely advantageous in the long run. It is true that Franchetti is at his best when there are many characters on the stage, or when inspired by some spectacular effect on the scene. His music is not profoundly emotional, not very often distinguished, but his workmanship is sound and scholarly, and the fact that he owes little or nothing to Wagner, and stood entirely apart from the hysterical school of Young Italy, in the ascendant during Franchetti's youth, should not be reckoned against him.

M., with addns.

FRANCHOMME, AUGUSTE JOSEPH (*b. Lille, Apr. 10, 1808; d. Paris, Jan. 21, 1884*), violoncellist, learned the rudiments of the violoncello from a player named Mas, entered the Paris Conservatoire in Mar. 1825, at once attracted the notice of Levasseur and Norblin the professors, and in his first year took the first prize for his instrument. He then joined the orchestra of the Ambigu-comique, in 1827 that of the Opéra, and in 1828 fixed himself at the

¹ See a detailed analysis in the *R.A.L.* ix. 377.

Théâtre des Italiens. In conjunction with Alard and Hallé he formed an annual series of classical quartets, which attained the highest rank. Franchomme was in Paris at the time of Mendelssohn's visit, in the winter of 1831, and is mentioned by Hiller (*Mendelssohn*, 1874) as one of the artists who most warmly appreciated him. They were just of an age, and knowing Mendelssohn's predilection for the violoncello it is not difficult to believe that they often played together. He was very intimate with Chopin, and was one of those who witnessed his last sufferings and received his latest words. Franchomme travelled very little, and a visit to England in 1856, when he played at the Musical Union, appears to be almost his only journey. He was professor at the Conservatoire from Jan. 1, 1846-84. Franchomme's playing was remarkable for a command over technical difficulties of all kinds, very pure intonation, and a beautiful and expressive singing tone. He was the possessor of the violoncello of Duport, said to be the finest Stradivarius in existence, for which he gave £1000. His compositions consist chiefly of potpourris and variations, with one concerto. He also published with Chopin a Duo on airs from 'Robert le Diable,' another with Bertini, and a third with Osborne. A comparison of the two versions of Chopin's Polonaise for pianoforte and violoncello, in C, op. 3, will show how great were the improvements in the violoncello part, which were due to Franchomme. G., with addns.

FRANCISCELLO, a great violoncellist of the early part of the 18th century, who would have left no trace of his existence but for the fact that he was heard by Quantz, Benda and Geminiani. He seems to have first appeared in Rome shortly after the death of Corelli (1713). He was at Naples in 1725; Quantz heard him there, and Geminiani, there or in Rome, was witness to the rapture with which the great Alessandro Scarlatti accompanied him on the harpsichord. In 1730 he was at Vienna, where F. Benda, then a young man, was so struck by his style as to say that it influenced him for ever after. He is heard of afterwards at Genoa, where he may have died about 1750. (See VIOLONCELLO-PLAYING.) G.

FRANCISI, MILOŠ (b. Debrecin, 1853), doctor of medicine, pianist composer, and the first Slovak to compose opera and operetta.

He is the son of a famous Slovak patriot and writer, Jan Francisi, who, condemned to death by the Magyar government, just managed to escape the gallows. Miloš Francisi, after attending the high schools of Vel'ka Revuce and Sopron (Slovakia), studied medicine in Vienna, where his musical gifts made him very popular in the Slavonic circle. Eventually he thought it expedient to emigrate to America, where the memories of his native land found expression

in a series of compositions in the national style: a set of Marches based on folk melodies (from 'The Three Falcons'), several choruses and partsongs, a Fantasia on Slovak Airs, the operettas 'Obšitošova dcera' (The Daughter of the 'Obšitoš'), produced in Pittsburg, Cleveland and other American towns, 'Bohatieri veselej družiny' (The Adventure of a Merry Party), 'Die Weiberbulle,' and 'Rea Silvia,' a romantic opera in two acts. His most important work is 'Travnice,' a collection of Slovak folk-songs (2 books, each containing 100 songs) published by the Turčiansky Sv. Martin Press, 1908, 2nd edition. Although his arrangements, with pianoforte accompaniments, are somewhat disfigured by gipsy influence, they were valuable at the time of their appearance, which preceded a more scientific and discriminating period in the cult of the folk-songs. Dr. Francisi revisited Slovakia after the Declaration of Independence in 1919, but soon returned to America, where he divides his time between dentistry and the fostering of Slovak national music.

R. N.

FRANCISQUE, ANTOINE (b. St. Quentin: c. 1570; d. Paris, 1605). The writers of the epoch hardly mention this lutenist; his name is certainly better known now than then amongst musical historians. He died very young, after a career of only a few years in Paris.

In 1596 Francisque was living at Cambrai, where he married, according to a contract made Feb. 23, Marguerite Bouhour (or Behour), daughter of an innkeeper in the town. The contract calls him 'Anthoine Francisque, natif de St. Quentin, jeune filz.' He went to live in Paris with his wife, two or three years later. In 1600 he published there 'Le Trésor d'Orphée,' which he dedicated, in a burlesque epistle composed for him by a wit of the time, to the Prince de Condé. On Sept. 28, 1601, before notaries, the couple made a mutual deed of gift, 'attendu qu'ilz n'ont à présent aucuns enfans vivans.' In this deed the musician is called by the name 'Anthoine François,' and qualified as

'maître joueur de luth à Paris, y demeurant rue Ste. Genevieve, paroisse St. Estienne du Mont, vis à vis le collège de Navarre.'

The marriage contract mentioned previously was registered at the Châtelet de Paris by Marguerite Bouhour, then a widow. The certificate of death of her husband is dated Oct. 5, 1605.

'Le Trésor d'Orphée,' which was methodically transcribed and re-edited by Henri Quittard, 1906, constitutes, together with the 'Thesaurus' of Jean-Baptiste Besard, one of the two principal documents which we possess of the first French school of the lute. The tablature is written with the old tuning of the instrument which was in use until about 1630.

before the perfecting of the instrument made a change in the tuning, and from which one may date the beginning of the second school. The compositions of Francisque are, for the most part, easy and popular dances, branles, pavaues, gaillardes, courantes and voltes, very melodious, and most often in modern tonality. Almost all are entirely the composition of the author, but there may be recognised in some the use of well-known songs and dances. This is the case with his 'Gaillarde faicte sur une volte de feu Perrichon.' The first and the last piece show, with some 'Fantaisies,' a style in which contrapuntal imitations are preserved with as much regularity as the technique of the lute permits: these are adaptations of the celebrated, anonymous song 'Cassandre' and of 'Suzanne un jour' by Orlande. Francisque's collection ends with an 'Instruction pour réduire toutes sortes de tablatures de luth en musique et réciproquement,' which Quittard did not republish, but which Besard reproduced, translated into Latin, in his 'Isagoge,' 1617, and which Léopold Fuhrmann also translated into German in 1615.

WORKS

'Le Trésor d'Orphée, Livre de Tablature de Luth contenant une Ruyne un Jour—plusieurs Fantaisies, Préludes, Passameises, Gaillardes, Pavaues d'Angleterre, l'auane Espagnolle, fin de Gaillarde, suites de Branles tant à cordes aulées qu'autres, Voltes et Courantes. Mises par Antoine Francisque' (Paris, 1600).

A. T.

FRANCK, CÉSAR AUGUSTE (b. Liège, Dec. 10, 1822; d. Paris, Nov. 8, 1890). On his father's side he was of Flemish stock, the family having for generations been established at Gemmenich, in the Walloon district. Among his ancestors were several painters, notably Jérôme Franck (b. 1540; d. Paris, 1610), who held the appointment of painter to Henri III. in Paris. César himself had a talent for drawing; and there is perhaps some connexion between his painter-ancestry and his strong chromatic tendencies. His father desiring that he and his brother Joseph should become professional musicians, he entered Liège Conservatoire at what must have been a tender age, for he was barely 11 years old when he finished his studies there, and was taken on tour as a pianist. A year later the family moved to Paris, in order that the boy might have a wider field for the development of his gifts. Here, after some months of private study with Reicha, he entered the Conservatoire (1837), where he became a pupil of Leborne for composition and of Zimmerman for pianoforte. His successes comprised a *proximo accessit* for fugue (1837), Grand Prix d'Honneur for pianoforte (1838), first prize for fugue (1840), and

second for organ (1841). The circumstances in connexion with the pianoforte and organ prizes are worth relating, for several reasons. In regard to the former, d'Indy tells us that Franck transposed the sight-reading test a third below, playing it without a slip. Cherubini (director at that time), so far from hailing the performance as an exploit, frowned on it as an irregularity, and refused to sanction the award of the first prize which the youth had won no less by his solo playing than by his sight-reading. A compromise was arrived at, however, Cherubini recommending that Franck be disqualified and given a special award, to be known as 'Grand Prix d'Honneur'—the first and only prize of the kind ever given at the Conservatoire, says d'Indy. Undeterred by this official attitude towards brilliance out of place, Franck accomplished a kindred feat when competing for the organ prize. Among the tests were two improvisations—a fugue and a sonata—on themes supplied by the examiners. Franck, perceiving that the subjects lent themselves to combination, proceeded to make the most of their possibilities in this way, developing them at such length that the examiners, annoyed and bewildered by the complexities, at first awarded him nothing. It was only on the intervention of Benoist, his organ teacher, that they gave him a second prize.

Franck now began to prepare for the Prix de Rome; but his father, anxious for him to shine as a piano virtuoso rather than as a composer, impatiently withdrew him from the Conservatoire (Apr. 22, 1842).

There followed two years spent in his native country—a period about which even d'Indy has no information to give us. We may surmise that Franck was (not too willingly) carrying out his father's wishes by working at piano-playing, and confining his composition mainly to showy pieces for concert use.

Evidently Belgium proved an unprofitable field, for in 1844 the family returned to Paris, where they lived in the Rue la Bruyère in straitened circumstances, with little resources beyond the earnings of the two sons. Even this income failed to a considerable extent during the political troubles of the next few years, when many of the families from which the brothers drew their pupils left Paris.

The Biblical elogue, 'Ruth,' was written soon after the Franks' return to Paris, and had its first performance at the Conservatoire in Jan. 1846. To this period belongs also an unpublished symphony, 'Le Sermon sur la montagne,' an essay in the style of Liszt's symphonic poems, and of interest because it was the genesis of 'Les Béatitudes,' written about thirty years later. The attraction this subject had for Franck is shown also in an organ piece (the manuscript of which has been lost), written at the beginning of his career as an organist, and

bearing the same title as the symphony. These works are worthy of note, because they show the composer breaking away from the groove of piano fantasias and other superficial works to which he had so far confined his output.

In 1848, while the Revolution was at its height, Franck married a daughter of the tragedian, Desmousseaux, the bridal party reaching the church (Notre-Dame de Lorette, where Franck was organist) only by climbing a barricade, with the help of the insurgents stationed thereat. Franck's relations with his father—already strained owing to his refusal to embrace the career of a second Thalberg—reached breaking-point as the result of his marriage. It was a double offence: it brought an actress into the somewhat strict family circle, and it withheld César's earnings from the common exchequer. The situation became so unhappy that Franck withdrew, made a home for himself, and settled down to the routine work that was to be his portion during the rest of his career. Winter and summer he rose at half-past five, beginning his long day of teaching two hours later. Most of his composition was done in the early morning and during his summer holiday.

Franck's second post as organist was at St. Jean-St. François au Marais; in 1858 he was appointed to St. Clotilde, where he was already choirmaster.

In 1872 he succeeded Benoist as organ professor at the Conservatoire. Although he was the obvious man for the post, he seems to have been so unpopular with his colleagues (owing to his disconcerting naiveté and candour, and his avoidance of official intrigue) that the appointment caused surprise, even to Franck himself.

He was now at work on 'Les Béatitudes,' breaking off, however, in this same year in order to write the first version of 'Rédemption,' which was produced by Colonne at a Concert Spirituel in Passion Week, 1873. He completed 'Les Béatitudes' in 1879, the first performance being given privately at his house by pupils. As a means of obtaining recognition for the composer, however, the occasion was a failure. Most of those invited—including the Minister of Arts and the Directors of the Conservatoire—failed to appear, and of the few guests present only two remained till the end. (The second complete performance of the work did not take place until fourteen years later—three years after the composer's death—when it was a triumphant success.)

A further fiasco took place in 1887, when his pupils and friends, nettled at the tardy bestowal of the ribbon of the Legion of Honour, and by the official designation of the recipient as 'Professor of Organ' instead of 'Composer,' arranged a Franck festival as a kind of protest against this disregard of the creative side of his work. The festival took place at the Cirque

d'Hiver, with Padeloup and the composer as conductors. The programme included 'Le Chasseur maudit,' the 'Variations symphoniques,' and the third and eighth Béatitudes. Owing chiefly to lack of rehearsal the performance generally was 'a deplorable affair,' says d'Indy.¹

The symphony was given its first performance in Feb. 1889, by the Société des Concerts du Conservatoire, and again a failure has to be recorded. The work was played against the wishes of most of the orchestra and subscribers, and was badly received by the musical elect, Gounod, for example, describing it as 'the affirmation of incompetence pushed to dogmatic lengths.'

Probably no composer of his rank met with so little recognition at the hands of his contemporaries. Almost until the end the record is one of neglect, or of performances badly organised or technically inadequate. In fact, Franck's first unqualified public success took place in the last year of his life, the occasion being the production of the String Quartet at one of the concerts of the Société Nationale de Musique at the Salle Pleyel (Apr. 19, 1890). 'The next day,' says d'Indy, 'filled with pride at this first success (in his sixty-ninth year!) he said to us quite naively: "There, you see, the public is beginning to understand me."' A second triumph came a few days later at Tournai, where he took part in a concert of his own works given by the Ysaÿe Quartet.

But Franck was to enjoy no more than this mere taste of popular favour. In the following month, while on his way to a lesson, he was knocked down by an omnibus, receiving an injury to his side. He continued his journey, fainted on arriving at his pupil's house, gave the lesson (which included two performances of the second piano part in his transcription of the 'Variations symphoniques'), and returned home exhausted.

Franck was of a robust habit, and, had his injury been properly treated, he would no doubt have lived to a great age. His creative power was at its height, and the future big with promise—a strange thing to be able to say of a composer in his sixty-ninth year! But a few months later he had a severe attack of pleurisy, and the lingering effects of his accident set up complications from which he died.

He was buried at Montrouge cemetery, but a few years later his remains were exhumed and taken to the cemetery of Montparnasse. The official coolness (d'Indy does not scruple to call it 'animosity') that had been shown him during his life did not cease with his death. Neither the Ministry of Arts nor the Conservatoire sent representatives to his funeral. But fourteen years later the Directors of both Ministry and

CÉSAR FRANCK

Conservatoire delivered orations in his honour to an enthusiastic crowd gathered to inaugurate the Franck monument hard by the church where for over thirty years the composer had served as organist.

GENERAL CHARACTERISTICS.—Franck's fame as a composer rests on a small proportion of his output. The difference in quality between his best and worst work is remarkably wide, and this inequality shows itself even in the details of some of his finest compositions. The fact suggests a lack of self-criticism, despite the anxious care with which he rewrote certain works. One cannot avoid the conclusion that, lofty as his ideals were, Franck was subject to some strange lapses of taste. His high opinion of a good deal of feeble contemporary music; the odd mixture of triviality and devotion in his composition for the Church; the occasional touch of banality that disfigures even such a work as '*Les Béatitudes*'; these and other signs indicate a too-accommodating standard. It seems to have extended even to performance, for we read that interpretations of his music so bad as to anger his friends often left him content. ('No, no; you are really too exacting, dear boys,' he said to his pupils after a wretched performance of some extracts from '*Les Béatitudes*'; 'for my own part, I was quite satisfied.')

No doubt this defect, like his slow development on the creative side, was partly due to his early training in the barren and uncongenial field of showy pianism. Moreover, the public taste in music was at a low ebb; Paris cared for little but opera, and that of the most superficial type. The decadence had spread even to church music, so that Franck, though an organist from his youth, failed to find in his work as church musician the countervailing influence of pure plain-song and the Palestrinian school.

A bird's-eye view of Franck's career as a composer is best taken by accepting d'Indy's division of his creative life into three periods (1841-52, 1858-74 and 1876-90). From the first period we find practically nothing surviving save trios Nos. 1 and 3 of op. 1. Indeed, of the works written during these early years all but a few are either unpublished or out of print—an unusual state of things in the case of a composer of standing. Later, apparently, Franck became conscious of the weakness of some of these efforts, for seven of the works produced during his second period (the '*Six Pieces*' for organ and the '*Mass for Three Voices*') bear opus numbers that had been used by some of the youthful piano pieces. (After op. 22, however, he ceased the use of numbers.)

The second period was concerned chiefly with church music. The disappointing quality of most of this has been alluded to above. It is but fair to add that the circumstances were all

against Franck doing himself justice in the one department where we might have expected so devout a son of the Church to shine. Not only was the prevailing standard of material and performance low; there was the further fact that at the time of his appointment to St. Clotilde the church funds were so meagre as to make the purchase of a regular supply of new music impossible. The authorities therefore looked to their organist to produce the bulk of what was needful. Franck met the demand, but he was overwhelmed with teaching and other work, and the writing of this church music—often merely occasional pieces produced at short notice—was apt to be hasty and perfunctory.

Even d'Indy, speaking of the best of Franck's church works—the '*Mass for Three Voices*'—admits its shortcomings, and quotes as 'not altogether unjust' the opinion of an Italian critic (Ricciotto Canudo):

'Full of inequalities, the *Mass*, like all Franck's church music, is a curious dream, half mystic, half secular, in which the flow of ecstatic sentiment is sometimes complete and superb, and sometimes interrupted by rhythms and affectations which are essentially theatrical.'

The one work of the second period that can be written down a complete success is the set of '*Six Pieces for Organ*.' It followed the '*Mass for Three Voices*,' and its sustained excellence is partly due to the fact that Franck's genius was instrumental rather than choral.

The organ pieces were followed by a relapse into a series of offertories and other incidental church works, and the second period closes with the revised version of '*Rédemption*.'

At this point, in his fiftieth year, Franck found himself: save for the organ pieces just mentioned, and one or two small numbers, all the works by which he is known to-day were produced during the next nineteen years. Probably no other composer's arrival at maturity can be dated so exactly.

This fact suggests that perhaps too much has been made of the contemporary neglect of Franck's music. The little circle of pupils and friends who heard his fine playing and improvising at St. Clotilde, and with whom he discussed his works during the processes of composition and revision, were well aware of his genius—though we may quite fairly assume that their critical judgment was affected by the simple goodness and personal charm that led to their nicknaming Franck '*Pater Seraphicus*.' But the public could know little or nothing of these gifts and graces, and as Franck's music was for the most part cast in forms that made little appeal to the musical public—such as it was—neglect seems to have been inevitable. To all but his small circle he was a mere teacher and organist, and, as we have seen, even the belated honour bestowed on him by the State was a recognition of his work, not as a composer, but as a member of the Conservatoire teaching staff.

PIANOFORTE WORKS.—Franck's early years, both as player and composer, were concerned with the pianoforte, and it therefore seems natural to begin a survey of his works with a glance at those written for that instrument. They fall into two classes—the rather long list of more or less trifling pieces that date from his first period, and the handful of great works produced late in life. It is worth noting that a break of nearly forty years separates the two groups. As most of the early works are no longer procurable, we draw on d'Indy for some account of their style. After describing in detail one of the best (the *Ballade*, op. 9), he says :

'It is interesting to note that all the master's early pianoforte works, without exception, be they called *Éclogue*, *Ballade*, *Caprice*, or *Fantasia*, are written on one and the same plan : an *Allegro* enclosed between two statements of the same theme, sometimes preceded by a brief introduction. They are, moreover, rendered rather monotonous by the entire lack of modulation ; but on closer examination we may discover in them the embryonic forms of the great works of the later years, and the anxiety to write brilliantly for the instrument is not so intense that it does not often give way to the pursuit of purely musical forms. Obviously at this period Franck, who was urged by his father to produce "saleable pieces" at any price, did not understand that art of composition which he afterwards taught so thoroughly ; therefore the future master of modern musical structure, being well aware of this inferiority, prudently restricted himself to a simple form which offered no pitfalls. Later on he took his revenge !'

Yet the paternal behest and young César's 'anxiety to write brilliantly for the instrument' were not entirely without fruit. We may safely give them some credit for the splendid keyboard writing of the later works. Not even Liszt himself can show Franck the way here. And it may be added that Franck's decorative writing has generally more *raison d'être* than Liszt's ; it either belongs to the scheme on thematic grounds, or it amply justifies itself as music. Rarely do we find the mature Franck writing mere bravura passages.

These late works have a special importance in the history of pianoforte music. They were written at a time when the repertory of the instrument was in a bad way, owing to its technical side having advanced beyond its æsthetic. It was but poetic justice that Franck, who had formerly taken the current superficial view of the instrument, should in his sixtieth year be 'struck by the lack of serious works' for piano, solo and concerto, and set to work to apply modern technique to classical forms. Perhaps it was his desire to avoid the element of keyboard display that led him in his first attempt in the concerto style, '*Les Djinns*,' to treat the piano as a mere constituent in the ensemble rather than as a solo instrument with orchestral background. A successful compromise was effected later in the '*Variations symphoniques*'—one of the very best of his works, and notable both for its fine use of the variation form and

for the skill with which the interest is shared between piano and orchestra.

The '*Prelude, Choral and Fugue*' was the outcome of an intention to write a prelude and fugue in the style of Bach. The choral was an afterthought. The subject is decidedly Bach-like, especially in the three-note leaning figure with which it opens. (Such thematic reminders of Bach in Franck's music are sufficiently rare to attract attention. The Bach spirit is often present, but so far as the letter is concerned we are more frequently reminded of Beethoven, Wagner, Liszt and some less worthy models.) Franck's marked interest in the constructional side of music showed itself even in his op. 1, so it is not surprising to find that what was intended to be a mere prelude and fugue developed into a work greater in bulk and more complex in form than the average sonata. It is a kind of epitome of the Franckian mood and method. Thus the fugue subject, which later proved to be the dominating factor in the whole, is foreshadowed as early as the eighth bar, and its opening motive is never absent for long. Its gradual emergence and final triumph was a favourite device of Franck. (He uses it, for example, with great effect in the '*Three Chorals*' for organ.) Characteristic too is the way in which the choral, on its announcement, is thrown up in relief from the groping troubled background, low in the keyboard, with the little leaning figure from the fugue subject almost always in evidence. (Was Franck thinking of a 4-ft. organ stop when he picked out the choral in high notes played by the left hand crossing over ?) Above all, the work gives us the customary Franck 'programme' of a struggle from darkness into light. Like so much of his music, it is over-chromatic in places—notably in the interludes of the choral on its first appearance—but that is a small blemish on a work which in construction, thematic development, polyphony, command of keyboard technique, and above all in sustained musical interest, is among the masterpieces of pianoforte literature.

In the '*Prelude, Aria and Finale*,' written a few years later, Franck tries a further experiment, and again with complete success. The work is practically a sonata, with the customary three movements, themes from the first and second being worked into the third. Here the dominating subject is that with which the prelude opens—a broad, richly harmonised tune of march-like character. It is so fully treated in the prelude that its possibilities in the way of complete delivery seem to be exhausted, but Franck brings it back again at the close of the *Finale*, and rounds off the work with a splendidly sonorous version (over a rolling bass that surely had its inception on the pedal-board at St. Clotilde), and follows it with yet another treatment, quiet in character, in order to pave the way for the *pianissimo* close.

CHAMBER MUSIC.—The sonata for violin and piano has a good deal in common with his other large instrumental essays. Its movements, like theirs, have thematic links, and it breaks away from traditional sonata form in other respects. Its principal movement comes second, the first being a graceful and quiet preamble. Instead of the usual *Adagio* or *Andante* there is a 'Recitativo-Fantasia,' and the finale is a kind of rondo, the recurring theme, however, being cast in the form of a canon at the octave, relief being provided by a couple of subjects from the 'Recitativo.' This original scheme is carried through with unflagging resource, and with a wealth of melodic charm that makes the early and constant success of the sonata easy to understand.

Perhaps no work gives us so much of the very essence of Franck as the quartet, especially in the opening movement, where the reflective mood, the beautiful polyphony, and the quiet fugal section remind us of the Beethoven of the later quartets. The scherzo is lightness and gaiety itself. Despite the beauty of its main theme, the *largetto* falls a trifle short, perhaps; it is inclined to squareness of phrase, and there are too many full closes. The finale is ushered in by a parade of themes from the preceding movements, after the manner of Beethoven in the Ninth Symphony. Franck uses the same device in the 'Grande Pièce symphonique' for organ. It must be confessed, however, that in neither case is the step fully justified by results. In the Ninth Symphony the situation is made dramatic by the vocal recitative, the no less eloquent passages for the bass strings, and the impatient gesture with which the themes are brushed aside. In the quartet the procedure is comparatively tame, as it does little more than show us Franck making up his mind. The process by which a composer arrives at his final choice of themes is a detail of the workshop, and unless it has dramatic significance, as in the Ninth Symphony, is as much out of place in the finished work as the preliminary sketches of the themes themselves. Apart from this hesitating start, the finale shows some lack of spontaneity. Franck seems to be over-concerned with the architectural problems of his own setting. But the quartet as a whole is a genuinely inspired work, and, page for page, it contains perhaps more sheer loveliness of sound than any other piece of its kind.

The quintet, fine though it be, is less convincing. The troubled questioning of the first movement persists until it comes very near to querulousness. A scherzo would have been a relief, but Franck follows on with a *lento* which continues the mood of the opening. The vigour and brilliance of the finale, however, are irresistible.

WORKS FOR ORCHESTRA.—The symphony

has established itself among the small group of modern examples that have by general consent been given a place in the classical succession. Once more we see Franck aiming at unity by quoting in the finale themes from the preceding movements. But is the unity so obtained the kind we want in a sonata or symphony? Is it worth the sacrifice of the clearly defined contrasts which the sonata form gives us—first, of movements, and second, of subjects within those movements? It is no far-fetched theory that Franck's leaning in all his instrumental works towards a method that savours of the monologue rather than the sonata (wherein the opposition of contrasted themes provides an element of drama) was due to the contemplative habit of mind that caused him to fail as an operatic composer. In the symphony finale the plan is less successful than it proved to be in the 'Prelude, Aria and Finale' and the sonata for violin and pianoforte. The themes seem to be merely dropped into the structure, rather than woven in or suggested. The movement itself suffers, because its energetic course is held up while the composer harks back to a couple of themes, both on the slow side, and one—the so-called 'faith motive'—too weak in melodic and rhythmic interest to hold its own in such vivid surroundings. The telescoping—so to speak—of the slow movement and scherzo is entirely successful. (Franck had tried the plan many years before in the 'Grande Pièce symphonique,' but with less success, the thematic material being inferior, and the connexion less skilful.) The whispering delicacy of the middle section of the *allegretto* is delightful. The symphony gives us the usual Franckian struggle from doubt to certainty. Perhaps it is not by mere chance that the interrogation with which its main theme opens is an echo of Beethoven's 'Muss es sein?' of the quartet in F. The question, whatever it be, has the most conclusive of answers in the vigorous tune with which the finale is launched.

'Le Chasseur maudit,' despite the use of somewhat conventional means of expressing terror, is not unsuccessful. But, like an opera with a poor libretto, it suffers from its *jeune* programme. Does any hearer feel the slightest concern in the fate of the wicked Count who goes a-hunting when he ought to be at church? Of far greater interest is the picture the work gives us of Franck himself, in an 'unbuttoned' mood that was all too rare with him.

'Les Éolides' is a symphonic poem on some lines by Leconte de Lisle beginning—

'O brises flottantes des cieux,
Du beau printemps douces halelnes,' etc.

It is a delicate piece of impressionism in a vein that Franck works successfully on other occasions—e.g. the 'Zephyr' interlude in 'Psyche,' the scherzo of the quartet, etc.

The other works that belong primarily to the orchestral side of Franck's output are 'Psyche' and 'Rédemption.' The former consists of a series of tone-pictures entitled 'The Sleep of Psyche,' 'Psyche carried away by the Zephyrs,' 'The Garden of Eros,' 'Love Scene,' 'Psyche's Sufferings' and 'The Pardon of Psyche.' These movements are separated by choral sections of so little interest that the work is heard to greater advantage as a purely orchestral suite, in which form it seems to be generally given. D'Indy and others claim as a merit Franck's watering-down of the pagan myth into a piece of Christian symbolism. Most hearers will probably feel that the process involves loss rather than gain.

'Rédemption' is entitled 'poem-symphony,' and is a setting of a poem by Edouard Blau. The choruses do not show Franck at his best, and the main interest lies in the long orchestral interlude, which was entirely rewritten after the work had been published. In its entirety 'Rédemption' is rarely heard, but the symphonic interlude—which contains some admirable music—sometimes appears in concert programmes.

CHORAL AND OPERATIC WORKS.—Here Franck's genius shows itself but intermittently. His strength, like Beethoven's, lay in variation and development—features that can have full play only in instrumental music. And whereas a text serves as a stimulus to most composers, it often did Franck disservice by exposing his weakness in characterisation. The part of Satan in 'Les Béatitudes' is the most familiar and marked example of this weakness, and it is not to be explained away by the ingenuous plea of d'Indy, namely, that

'evil was a conception so alien to Franck's nature that he never succeeded in giving it adequate expression. . . . Incapable, therefore, of drawing upon himself for the expression of emotions which he never felt but superficially, he falls back on Meyerbeer.'

Meyerbeer probably deserves most of the hard things said of him to-day, but he might ask to be spared this implication! If the artistic principle here suggested by d'Indy be granted, a composer who sets out to depict evil does so at his peril. Franck's failure in this respect must be ascribed rather to his lack of two important factors—a sense of drama, and a sense of humour.

So far as the technique of choral writing is concerned, Franck no doubt suffered from the scarcity of good models. Outside the church and opera there was little choral singing, and the church and opera styles were commonplace—in fact, not very dissimilar. The result is seen in the poor texture of most of Franck's choral works. Opening the best of them—'Les Béatitudes'—at random, we usually find the chorus delivering itself of short square chordal phrases, while the main interest lies in the orchestral part. In the first Beatitude, for

example, ninety out of the opening hundred bars show us the four voices singing in exactly the same rhythm, and in the few bars that provide the exceptions the variety is of the slightest. This defect seems to have aroused no adverse comment among French critics, but it is certainly a bar to the acceptance of Franck's choral music in this country. Choirs accustomed to the vigorous texture of Handel and Bach, and to the rhythmic subtleties of the madrigalians, would first smile, and later yawn and rebel over the elementary task set them by most of Franck's choral writing. 'Les Béatitudes' contains so many truly exquisite pages that its failings in this respect, the deficiencies of its libretto and its occasional lapses into theatricality are the more to be regretted. Moreover, its construction—each Beatitude being preceded by an antithetical chorus or choruses—is necessarily too much on the sectional side, and not without monotony.

Franck wrote three operas. An early effort, 'Le Valet de ferme,' remains unpublished, and 'Hulda' and 'Ghisele' have never secured a place in the repertory. The two latter contain much excellent music, but show little sense of the theatre, and, as d'Indy says, are 'mere attempts at dramatic music.' 'Hulda' is known in the concert-room by its ballet music, and it contains also a stirring 'Marche royale' which deserves to be popular.

ORGAN MUSIC.—This is important, not only on its merits, but also because it appeared at a time when the repertory of the instrument was at its poorest. Organ music in Paris at the time meant little more than the cheerful strains of Lefébure-Wély and Batiste and their like. Franck laid the foundation of the French school of organ music that has since shown such brilliance and vitality. His organ works are small in number and consist of three groups—the 'Six Pieces' (1862), 'Three Pieces' (1878) and the 'Three Chorals,' his last work. In addition there are two collections of short pieces, mainly for harmonium—very unequal in character, some delicious pages alternating with others that are as banal as any written by Batiste. Among the 'Six Pieces' two seem to have suggested important works written later. Thus the 'Grande Pièce symphonique' in several respects anticipates the symphony, not only in some details of its construction, but even in its main theme, with its preliminary question:

The 'Prelude, Fugue and Variation' is an early essay in the three-movement form with

which Franck was to do so much later ; it is, however, simpler in every way, and the variation is not a variation in the modern sense of the term, but an exact repetition of the prelude, save that the song-like theme is given a continuous semi-quaver accompaniment. The fugue is short and thoughtful, and both forms of the prelude are delightful examples of three-part writing. The ' *Prière* ' is one of the most intensely expressive organ pieces ever written. Its length and complexity (much of it is in five- and six-part writing) no less than its dark mood, make it impracticable for ordinary recital purposes. It is not merely ' musician's music ' ; the area is even narrower. It may be called ' organist's music,' and perhaps even then its strivings and intimacies are for the player rather than the hearer. The ' *Fantaisie in C* ' contains a charming canon and a delicately-coloured *Allegretto cantando*. The *Pastorale* has an unusual middle section—an attractive blend of scherzo and fugato—and a delicious close, with hints of bells. In the ' *Finale in B flat* ' we have a fine example of lengthy, vigorous development and brilliant keyboard writing. Its dedication to Lefébure-Wély accounts for its unusually dashing style, and it is interesting to see how Franck has combined a good deal of the Lefébure-Wély manner with some unmistakably Franckian matter.

Liszt's opinion of the ' *Six Pieces* ' should be quoted. Hearing them played by Franck himself, he exclaimed with enthusiasm, ' These poems have their place beside the masterpieces of Bach.'

Of the ' *Three Pieces* ' the ' *Pièce héroïque* ' is best known, though the beauties of the *Cantabile* in B are not unrecognised. The ' *Fantaisie in A minor* ' has its moments, but it suffers from an overdose of pauses and other haltings.

The ' *Three Chorals* ' are usually regarded as Franck's best organ essays, but, fine as they are, they lack something of the vigour and spontaneity of the earlier works. They are, however, full of interest on the structural side, being masterly developments of the large variation form of the later Beethoven : No. 1, in E, is over-chromatic in its opening, but makes amends by the dramatic way in which the choral theme, originally a mere pendant to several other subjects, struggles forth and ultimately holds the field ; No. 2, in B minor, is notable for some splendid treatments of its theme in *passacaglia* style, and for a characteristic quiet fugal passage ; No. 3, in A minor, has an exquisite *cantabile* section. A protest may be made here against the custom in recital programmes of describing these works as ' *Choral Preludes* '—a form with which they have nothing in common save that their chief subjects are of a hymn-like character.

FRANCK AND THE ORGAN.—Franck's con-

nexion with the organ influenced his work to such an extent that the subject deserves more attention than it usually receives. The greater part of his output was affected, for both good and ill, by his long service as organist ; and his organ music should be studied, not only for its own sake, but because of the insight it gives us into his personality and methods. Indeed, it is hardly an overstatement to say that organists who have thoroughly grasped the ' *Six Pieces* ' and the *Chorals* have a better knowledge of Franck than musicians who know only his other works.

It will be remembered that Franck's second period began at the time of his appointment to St. Clotilde in 1858 ; and for nearly twenty years (i.e. until his third period) he wrote almost exclusively church and organ music, the exceptions being one piano piece and three songs. And although, as we have seen, he widened his range during his third period to such an extent as to essay practically every important form, he still remained very much the church musician. ' In the organ-loft at St. Clotilde,' says d'Indy, ' he spent the best part of his life. Here he came every Sunday and feast-day, and, towards the end of his life, every Friday too.' A composer could not spend so much of his working life at the organ, and find it so congenial as Franck found it, without the experience having a powerful influence on his works, both in matter and manner.

In regard to certain details of manner, it proved a hindrance rather than a help. His organ, good as it was, possessed few facilities for registration. Rongier's well-known picture of Franck at the organ shows him all too plainly marking time with his left hand and pedals while with his right hand he manipulates the cumbrous stop-knobs. Now, his organ music, despite its excellence, frequently suffers from stagnant moments that suggest a pull-up for registration, and there can be no doubt that his long spell of organ-playing made him less and less susceptible to the irritating effect of purely utilitarian bridge-passages and pauses. Unfortunately this halting habit extended to works other than those written for the organ. For example, the slow movement of the string quartet contains several passages suggestive of an organist repeating a short phrase on a second manual while changing stops on the first. It would not be difficult to point out in almost all his works sections reminding us that Franck was an organist—and an organist constantly playing on an instrument in which the registration usually called for time and a spare hand.

His treatment of the orchestra, too, often has a suggestion of registration rather than instrumentation. He sometimes uses his forces like manuals or groups of stops. At this hesitating moment in the finale of the symphony, for example—

we seem to see him in his loft at St. Clotilde, dropping from his swell (strings) on to his choir (wood-wind) mainly because the choir is there to be dropped on, or as an easy way of obtaining variety, or breathing space, or both. And his use of the brass frequently sounds like an organist bringing on his great reeds.

Nor shall we go far wrong if we blame the organ, and his constant improvising thereon, or some of the cloying chromaticism that many of us feel to be a debilitating quality in his later works. There is little of it in the 'Six Pieces,' but pages of the 'Three Chorals' are heavy with it, so it is clear that the habit grew on him. Much of the blame for the defect must be laid at the door of the instrument that, with its age-long tradition of modulating over pedal-points and of providing short impromptu links between tonally unrelated details of a service, is constantly tempting the player from the diatonic path. And as a final example of the unhappy effect of his ecclesiastical calling may be mentioned his treatment of the story of 'Psyche,' alluded to above.

Nevertheless, when all is said as to the ill effect of the organ on Franck's work, the balance remains on the credit side of the instrument. Undoubtedly he owed to it much of his skill in polyphony; his fugal writing is small in bulk, but the influence of the organ is seen in its first-rate quality; and we may ascribe to the same source his frequent and unfailingly effective use of canon (always a special preserve of the organist, because his instrument is the one on which it can be shown most clearly and easily, owing to the contrasts in pitch, colour and power provided by the simultaneous use of several keyboards). But above all, Franck's music owes to the organ its quality of other-worldliness. The organ-loft is narrow, but not necessarily narrowing. Because its occupant is out of sight, and free from most of the temptations that go with popular applause, he may even end by seeing farther and higher than his brother of the concert-room. This was the case with Franck, and not without reason does d'Indy describe the organ-loft of St. Clotilde as 'that quiet and

fixed haven which was the starting-point of a new phase in his art.' No doubt Franck lost something by his entry into a long period of seclusion and routine, but the fact remains that practically all his greatest works were written during the last few years of his life, when he was more assiduous in his church work than at any other time in his long career. A maturity spent as a successful musician in the public eye might have produced music more varied in character and universal in appeal; it could hardly have given us much of greater depth and beauty. It might even have meant failure, for Franck lacked the pugnacious quality that enabled Handel, Beethoven, Berlioz and Wagner to compose with one hand while fighting and carrying on controversies with the other. It is no mere paradox to say of him that he never really found himself until he was lost in the dusk of St. Clotilde.

FRANCK AS TEACHER.—No discussion of Franck is complete without a word as to his importance as a teacher. Composers exert their influence in diverse ways. Bach, for example, closed an era, and his influence ceased with his life, only to revive a century later and to increase steadily until to-day. Handel swayed his contemporaries and immediate successors, and his power then began to wane. Franck differs from both in that his influence was intensive, and exerted through a little circle of pupils. His belated maturity was reached at a moment when French music was ready for a revival, and he had round him a band of disciples ready to preach the gospel according to Franck. The scope of his influence on modern French music is shown in the simplest way by a list of his most distinguished pupils: Duparc, d'Indy, Pierné, Repart, Chausson, Rousseau, Holmès, de Bréville, Leku, Benoît, Bordes and others. Two of these—d'Indy and Bordes—with Guilmant, founded in 1896 the Schola Cantorum, an institution which keeps alive Franck's memory and teaching, and also does valuable service by publishing fine editions of old works, as well as new music, vocal and instrumental, for liturgical use (see PARIS).

THE FRANCK IDIOM.—It was said above that the inequality that marks Franck's output as a whole shows itself also in certain details of some of his best works. The reason for this lies chiefly in the strongly personal nature of his idiom. Paul Dukas is quoted by d'Indy as saying:

'Franck's language is strictly individual, of an accent and quality hitherto unused and recognisable among all other idioms. No musician would hesitate as to the authorship of one of his phrases, even if it were unknown to him.'

This is true. Indeed, Dukas might have gone even further, and claimed that no composer's music can be so readily identified as that of Franck. The music of other great composers is often indistinguishable from that of the best

of their predecessors and contemporaries. For example, there is a good deal of work by early German composers that might have been signed by Bach, and that is, in fact, often attributed to him. This is because Bach used the musical speech of his contemporaries, the only difference being that he had infinitely more to say and said it infinitely better. But Franck used formulæ that were not only novel; they were individual to such a degree that, save for certain harmonic progressions, they have never been extensively adopted, even by his pupils. In implying that this exclusiveness of idiom is a merit, Franck's disciples merely draw attention to what is often a blemish. The expression of individuality by means of details leads to monotony rather than to variety. The formulæ have a dangerous likeness to tricks of speech; manner may degenerate into mannerism. The descent is all too easy, and it must be confessed that the Franck idiom is over-persistent. His melodies are often short-breathed, and too many of them, instead of progressing, merely revolve round, or work to and from, a central note. The 'Faith' motive, quoted above (Ex. 2), is a familiar example of both failings. (One cannot but feel, by the way, that the faith typified by a theme so unadventurous in shape and rhythm is not of the kind that moves mountains.) This habit of making his themes hang round a pivotal note stuck to Franck throughout; from his op. 1 to the 'Three Chorals' there is hardly an important work in which it does not show itself. A kindred trait is his fondness for starting a movement or section with a short figure repeated twice or thrice, thus :

We may almost describe as obsessions his fondness for keys with many sharps (in the 'Finale in B flat' for organ he has a long passage in A sharp major! and he clearly attached some mystic significance to their use, for, speaking of his 'Rédemption,' he said: 'In this score I have used only sharp keys, in order to express the luminous idea of Redemption'); his frequent use of a modulatory scheme with roots dropping a third, thus :

his subtly-shifting basses and ambiguous tonality; and the consecutive dominant sevenths and ninths that are now all-too-common property.

Fortunately we are able to identify his music no less easily by something far finer than mere

tricks of manner. The Franckian spirit is unmistakable. It is sometimes described as mysticism, but the word seems too suggestive of cloudiness to apply to a quality which is rather a kind of sophisticated naïveté; the expression 'serene anxiety' used by Jean-Aubry of the Franckists in general very well fits a good deal of Franck's own work.¹ This brooding spirit, so difficult to describe or explain, is a very rare thing in music; for its expression on any considerable scale we have to go to the most intimate of Bach's choral preludes. It is not for everybody—perhaps not for more than a few kindred spirits. Such leisurely, yet troubled, self-communing makes Franck's music difficult to appraise; the hearer who does not succumb is likely to be left with a slight feeling of hostility. This partly explains why Franck's reputation in this country seems likely to suffer—if, indeed, it has not already suffered—from a reaction against the uncritical adulation of his devotees in France.

Yet those of us to whom his music appeals can sympathise with the devotees. The record of his modest, earnest, industrious life, and the simple, lovable character revealed in his music, are so attractive that, in judging his work, we too find it difficult to avoid a bias in his favour. At his best, however, he needs little indulgence. Whatever the future of his music may be so far as popular appeal is concerned, Franck, as player, composer and teacher will remain one of the outstanding figures of his time.

LIST OF WORKS IN CHRONOLOGICAL ORDER

- 1841-42. Three Trios, for pf., vln. and v'cl. (op. 1).
 Fourth Trio, for pt., vln. and v'cl. (op. 2).
 Eclogue, for pf. (op. 3).
 Duo, for four hands, on 'God save the Queen' (op. 4).
 1842-43. Five songs.
 1843. Grand Caprice, for pf. (op. 5).
 Andante quietoso, for pt. and vln. (op. 6).
 'Souvenir d'Aix-la-Chapelle', for pf. (op. 7).
 1844. Four songs of Schubert, trans. for pf. (op. 8).
 Ballade, for pt. (op. 9).
 Solo, for pt., with acc. for string quintet (op. 10).
 First Grand Fantasia on Dalayrac's 'Gullistan', for pf. (op. 11).
 Second Grand Fantasia on an air from Dalayrac's 'Gullistan', for pf. (op. 12).
 Fantasia, for pf. (op. 13).
 Duet, for pf. and vln., on airs from Dalayrac's 'Gullistan' (op. 14).
 1845. Fantasia on two Polish airs, for pf. (op. 15).
 Three Bagatelles, for pf. (op. 16).
 1846. Duet, for pf., on Grets's 'Lucile' (op. 17).
 'The Sermon on the Mount' (symphony).
 1843-46. 'Ruth', Biblical eclogue, for soli, chor. and orch.
 1846. Song, 'L'Ange et l'enfant'.
 1851. 'Le Valet de ferme', comic opera.
 1852. 'Les Trois Exilés', national song, for baritone and bass.
 1858. Mass, for bass solo and organ.
 Andantino, for organ.
 Organ accompaniment and arrangement for voices of Gregorian services.
 'O Salutaris', duet for sop. and tenor.
 Three motets.
 1859. Three preludes for organ.
 'Le Gardien d'honneur', Hymn.
 1860. Mass, for three voices.
 1860-62. Six pieces for organ.
 Fantaisie in C (op. 16).
 Grande Pièce symphonique (op. 17).
 Prélude, Fugue and Variation (op. 18).
 Pastorale (op. 19).
 Prière (op. 20).
 Finale (op. 21).
 Quasi Marcha, for harmonium (op. 22).

¹ Such contradictions in terms seem inevitable when discussing the work of Franck—a Belgian who founded a French school, yet whose own music is Belgian and German rather than French; who was a classicist in form and an impressionist in harmony; and whose whole career was a curious blend of drudgery and idealism, hack-work and inspiration.

1863. Five pieces for harmonium.
Ave Maria, for sop. ten. and bass.
Forty-four short pieces for organ or harmonium.
1865. 'The Tower of Babel,' short oratorio, for soli, chor. and orch.
'Les Plantes d'une poupee,' for pf.
1870. 'Paris,' patriotic song for tenor and orch.
1871. Three Offertories:
'Le Mariage des roses,' song.
'Domine non secundum,' Offertoire for Lent.
'Quasi tremuerunt gentes,' Offertoire for F. of St. Clotilde.
Offertoire on a Breton air, for harmonium.
Redemption, symphonic poem for sop. solo, chor. and orch.
1872. 'Pavle angelicus,' for tenor, organ, harp and double bass.
'Passez, passez tout ours,' song.
'Roses et papillons,' song.
'Veni Creator,' duet for tenor and bass.
1873. Lied, song.
Prelude, Fugue and Variation, arrangement for harmonium and pf of op. 18.
1874. 'Redemption,' second version, with new symphonic movement and chorus for men added.
1876. 'Les Boides,' symphonic poem for orch.
1878. Three pieces for organ:
Fantaisie in A.
Cantabile.
Pièce héroïque.
1879. Quintet in E minor, for pf., two vlns., vla. and v'cl.
'Le Vase brisé,' song.
- 1893-79. 'Les Béatitudes,' oratorio for soli, chor. and orch.
1891. 'Rebecca,' Biblical scene, for soli, chor. and orch.
1892. 'Le Chasseur maudit,' symphonic poem for orch.
1894. 'Nocturne,' song.
'Les Djinns,' symphonic poem for pf. and orch.
Prelude, Choral and Fugue, for pf.
- 1892-85. 'Hulda,' opera in 4 acts and epilogue (libretto by Ch. Grandmougen after Bjørnstjerne-Björnson).
1885. 'Variations symphoniques,' for pf. and orch.
Danse lente, for pf.
1886. Sonata, for vln. and pf.
1896-87. Prelude, Aria and Fina, for pf.
1887-88. 'Psyche,' symphonic poem for orch. and chor.
1888. Rhythm, for 4 male voices.
'L'antique,' with chorus.
'La Procession,' song.
'Les Joies du soir,' song.
Psalm 150, for chor., orch. and organ.
Six two-part songs for equal voices.
- 1886-88. Symphony in D minor.
1888. 'Le Premier Sourire de mai,' chorus for 3 female voices.
1889. Andantino, for organ.
Preludes and Prayers by Alkan, arranged for organ.
Quartet in D major, for two vlns., vla. and v'cl.
- 1888-90. 'Ghisèle,' lyrical drama in 4 acts. (Libretto by G. A. Thierry.)
- 1880-90. 'L'Organiste,' fifty-nine pieces for harmonium.
1890. Three chorals, for organ, in E, B min. and A min.

M. L. P.

FRANCK, JOHANN WOLFGANG (b. circa 1641), court Kapellmeister at Anspach from 1673-78. Having, in Jan. 1679, killed a musician of the chapel, and wounded his wife in a fit of jealousy, he fled to Hamburg, where he produced 14 operas between 1679 and 1686. From 1690-95 he was in London,¹ where, in conjunction with Robert King, he gave concerts between 1690 and 1693, and in 1695 he wrote a song for Colley Cibber's *Love's Last Shift*. Apart from his operas he wrote several books of sacred songs, also a number of songs for *The Gentleman's Journal* (1692-94). E. v. d. s.

FRANCK, MELCHIOR (b. Zittau, Saxony, 1573²; d. June 1, 1639), prolific composer of church music and lieder, lived at Augsburg in 1601 and Nuremberg in 1602, and was Kapellmeister to the Duke of Coburg from 1603 until his death. Q.-L. contains a list of over seventy works by him, now become very scarce. For a summarised list of Franck's publications beginning 'Melodiae sacrae' (1601-4) (3 to 12 voices) and ending with 'Paradisus musicus' (1636) (4 voices) see *Riemann*. He did much to improve the instrumental accompaniment of songs, a point to which little attention was paid before his day. Döring (*Choralkunde*, p. 84) gives a list of 13 of his Chorals which survived him, among which 'Jerusalem, du hochgebaute Stadt' and 'Wenn ich in Todesnöthen bin' are still sung. He is also said to have written the words of several hymns, 'O Jesu, wie ist deine Gestalt,' 'Der Bräutigam wird bald rufen,' etc. A 4-part madrigal, 'Kein Lieb' ohn Leid,' is given in the first volume of *Arion*, from his *Musikalischer Bergkreyen*, 1602, and a selection of instrumental works in the *D.D.T.*, vol. xvi.

F. G., with adds.

FRANCO, MAGISTER (Franco de Colonia; Franco Leodiensis; Franco Parisiensis; Franco de Cologne; Franco de Liège; Franco de Paris), the first writer to deal with the notation of measured music, i.e. music in which the notes have an exact time-value or ratio among themselves, instead of the fluid time-values of plain-song.

His best-known work is the treatise *De musica mensurabili*,³ also known as the *Ars cantus mensurabilis*. He also wrote the treatise *Compendium de discantu, tribus capitibus*.⁴ There is some uncertainty as to the identity of the Franco who wrote these treatises, and as to his date. The earliest claimant is a certain Franco of Cologne, a learned writer of the 11th century, celebrated for his knowledge of mathematics, alchemy, judicial astrology and magic, who dedicated a tract *De quadratura circuli* to Herimanus, Archbishop of Cologne, some time before Feb. 1055, when Herimanus died.⁵ The same tract *De quadratura circuli*, together with another *De computo ecclesiastico, et alia plura (inter alia one De motu perpetuo)* is attributed by Trithemius,⁶ to Franco, *Scholasticus Leodiensis Ecclesiae*; who, he says, flourished under the Emperor Henry III., about the year 1080; and probably to a later date; for there is some evidence that he continued in office at Liège until 1083. Upon these, apparently conflicting, statements of Sigebertus and Trithemius as to

² According to Wetzler's *Lieder-Historia*.

³ *De musica mensurabili*. The earliest copy of this is said to be preserved at Vire, in Normandy. Other copies are in the Bodleian Library, Oxford (MS. Bodl. 542 f. 40), under the title *Magistri Francensis musica*, in the Ambrosian Library at Milan, in the Paris Library, and in the British Museum (Add. MS. 8860) a MS. of the 15th cent.

⁴ Copies in the Bodleian (MS. Bodl. 842 f. 80), in the Paris Library and in the Library of the Vatican.

⁵ Sigebertus Gemblacensis (d. 1113), *chron. ad anno 107*.

⁶ *De scriptis eccles.* (Lut. Pat. 1512).

the authorship of *De quadratura circuli* has been based the assumption that Franco of Cologne and Franco of Liège were two different persons. The schism seems needless, since there is no reason why the Franco of Cologne and the Franco of Liège should not have been one and the same writer, holding appointments first at one city and then at the other.

A passage from an anonymous treatise¹ has been quoted as evidence of the existence of two Francos. The writer is describing the choral-books of Perotin, and says the style of notation in which they were written was generally followed—

*Usque in tempus Magistri Franconis Primi et alterius Magistri Franconis de Colonia, qui inceptorum in suis libris aliter pro parte notare; qua de causa alias regulas proprias suis libris appropriatas tradiderunt.*²

This passage is interesting, but too much value should not be attached to it. In its recognition of two Francos, both of whom taught a system of notation, it is at variance with all tradition, and the vagueness of its wording suggests that the writer is trying to supply some gap in his knowledge by a general statement—a practice not uncommon in the early treatise-writers. In any case it is doubtful if it should be applied to the dis-identity of Franco of Cologne and Franco of Liège, since it places him of Cologne second, and this is contrary to the dates given by Siebertus and Trimethius.

But the 11th-century origin of *De musica mensurabili* was challenged by Kieselwetter, who in 1828 declared that it must be given a date 130 or 150 years later—i.e. towards the end of the 12th century. In his opinion the period which elapsed between GUIDO D'AREZZO (*q.r.*) and the traditional 11th-century Franco was not long enough for such a development of music as is indicated by the writings of the latter. Fétis opposed this theory, not unreasonably preferring the weight of historical evidence and tradition to a supposition based only on Kieselwetter's personal rendering of internal evidence; but de Coussemaker, Von Winterfeld and Perne agreed with Kieselwetter as to the necessity for a 12th-century Franco. De Coussemaker even went so far as to find one, identifying to his own satisfaction the author of *De musica mensurabili* with a certain Franco who existed at Dortmund in Westphalia about 1190.³ A Franco of an even later date than satisfied de Coussemaker might be deduced from the statement in one copy of the *Ars cantus mensurabilis*, which describes Franco as chaplain to the Pope and preceptor of the Hospital of St. John of Jerusalem at Cologne. The Vatican records do not go back to this early date, but it is

known that the Hospital of St. John at Cologne was not founded till 1263.⁴

A late 13th-century Franco is a patent impossibility, unless we are to abandon the tradition which makes him the earliest exponent of his system of measured notation; the 11th-century Franco of the 18th-century historians, though historically more probable, is not supported by any very convincing evidence; the two Francos of the anonymous treatise are only supported by this single mention: we are thrown back upon the 11th-century Franco, Franco of Cologne, whom Marchetto di Padova speaks of as the inventor of the first four musical characters (*Pomerium de musica mensurata*), whom Johannes de Muris speaks of as 'Magister Franco qui invenit in Cantu Mensuram figurarum'; and with whom we may, without undue rashness, identify Franco of Liège. Subsequent research may shed new light on the problem; but while we must choose between a theoretical 12th-century Franco of Dortmund and a traditional 11th-century Franco of Cologne, it seems wiser to choose him supported by tradition. The tradition is strong. The theorists of the 14th, 15th and 16th centuries only knew one Master Franco, and the quotations that they make from his works are with few exceptions to be found in the writings attributed to Franco of Cologne. Finally, it is not unworthy of consideration that the Francos, both of Cologne and Liège, were mathematicians. The music which has its place in the Quadrivium of the Seven Liberal Arts was akin to mathematics; and it would not have been a very long step from squaring the circle to laying down a system of mensural notation or codifying the rules of descent.

Franco is sometimes spoken of as the inventor of measured music, a misreading of the descriptions given of him by later writers. Actually they speak of him as the inventor of the characters of measured notation, or the inventor of the Time-Table. He himself in his treatise on the subject speaks of measured music as a thing already in existence, and when dealing with the modes—of which he acknowledges five only—says that other musicians used six or seven. It would be more fitting to speak of him as the organiser of measured music, for his great contribution to the subject was the gathering up and codifying of early experiments and tentative new usages of existing notational material into a regular and comprehensive system. How far he worked from a practical interest in the subject and how far from a theoretical—in other words, how much he was a musician and how much a mathematician—it is not possible to surmise. His authority is invoked by subsequent musical writers with invariable respect; and we may suppose that the two treatises left

¹ Printed in Coussemaker's *Scriptores*, I. 542.

² Translation.—'Down to the time of Master Franco the first and the second Master Franco of Cologne, who began in their books to use a somewhat different notation, and for that reason handed down different rules suited to their own books.'

³ For this controversy see Kieselwetter in *A.M.Z.*, 1828, Nos. 48, 49, 50; and 1838, Nos. 24, 25; Fétis, *Dictionnaire*; and de Coussemaker, *Histoire de l'harmonie au moyen âge*.

⁴ Coussemaker, I. 135, note; and *Notice sur un manuscrit musical de la Bibliothèque de Saint-Dié*.

us do not constitute all his teaching, though they may represent the basis of it. On the other hand, it is noteworthy that the system of notation called, after him, the Franconian notation, was not so swiftly nor so invariably adopted as by his fame and its merits would have seemed likely. Indeed, an argument for his later date might be drawn from the examples of MSS. of the 12th and early 13th centuries, where the old plain-song notation persists even for the expression of music for which the Franconian notation is obviously more fitted. This, however, may rather indicate that the Franconian system was considered by some notationers as a theoretical system too complicated and learned for general use. How well founded it was upon reason, how clear and well suited to the needs of measured music may be gauged from the fact that though in the course of time new signs have been added to it and old material (such as the ligatures) discarded, the principles of Franco's system have never been superseded, and underlie the notation of to-day. See *MUSICA MENSURATA* and *DESCANT*.
S. T. W.

FRANCŒUR, (1) FRANÇOIS (*b.* Paris, Sept. 28, 1698; *d.* there, Aug. 6, 1787), violinist and composer. He entered the band of the Opéra in 1710, was for many years a member of the King's private band, was composer to the King in 1733, from 1736 was manager of the Opéra conjointly with Rebel, and from 1760-78 he was 'surintendant de la musique du roi.' He published two sets of sonatas, which, according to Wasielewski, show considerable progress in form and in treatment of the instrument when compared with similar works by Rebel and other French composers of the period. It is worth mentioning as a peculiarity of his that he occasionally employs the thumb of the left hand on the finger-board for taking the bass note of a chord—a proceeding hardly in accordance with legitimate treatment. He also composed a number of operas conjointly with Rebel (the names of three, together with those of several ballets, etc., are given in *Q.-L.*), which, however, do not rise above the level of the period.

His nephew, (2) LOUIS JOSEPH (*b.* Paris, Oct. 8, 1738; *d.* there, Mar. 10, 1804), an eminent violinist and clever conductor, was first leader and afterwards conductor and manager of the Opéra (from 1792) and of the royal band, and composed a number of operas. He also published a treatise on instrumentation, which Fétis considers a meritorious work. (See *Q.-L.*)
P. D.

BIBL.—LIONEL DE LA LAURENCIE, *L'Ecole française de violon de Lully à Viotti*. (1922, 1923.)

FRANK, ERNST (*b.* Munich, Feb. 7, 1847; *d.* Oberdöbling, near Vienna, Aug. 17, 1889), a distinguished conductor and a meritorious composer, was educated at the Munich University; studied the piano under Mortier de Fontaine,

and composition under Franz Lachner, and obtained a position at the court opera as 'Chorrepetitor.' In 1868 he was Kapellmeister at Würzburg; in 1869, Chor-director of the Hof-Oper at Vienna, acting at the same time as conductor of two choral societies. From 1872-77 he was court Kapellmeister at Mannheim, where he befriended Hermann Goetz, bringing out his 'Widerspänstigen Zählung' in 1874. Frank's encouragement gave the composer a new lease of life, and without it the world would undoubtedly have been the poorer by many beautiful compositions, in the preparation and publication of which Frank's knowledge of the world and practical acquaintance with music stood Goetz in good stead. The latter's second opera, 'Francesca da Rimini,' was finished by Frank and produced at Mannheim in 1877, after the composer's death. In 1877 Frank went to Frankfort, where Otto Devrient had just been appointed Intendant; the two worked together with the best results, and when Devrient was dismissed in 1879, Frank also retired from his post, but was appointed in the same year to succeed Von Bülow at Hanover as Kapellmeister of the court opera there. He remained there until 1887, when his mental condition compelled him to retire; he died in the asylum of Oberdöbling. As a composer Frank failed to attain very high rank, although his works were scholarly in design, skilful in execution and thoroughly sound in artistic principle. He wrote three operas: 'Adam de la Halle' (produced at Carlsruhe in 1880), 'Hero' (Berlin, 1884), and 'Der Sturm,' after Shakespeare's *Tempest* (Hanover, 1887). He also wrote many songs of great merit, and partsongs, etc., as well as a set of very pretty duets to words from Kate Greenaway's *At the Window*. He made excellent German translations of Stanford's 'Veiled Prophet' (brought out under his direction in 1881), 'Savonarola,' and Mackenzie's 'Colomba.' An interesting article on Frank was written by Stanford in *Murray's Magazine* for May 1890.

BIBL.—ALFRED EINSTEIN, ed. *Briefe von Brahms an Ernst Frank*. *Mitgeteilt von Alfred Einstein*. *Z.M.W.*, Apr. 1922, pp. 385-416.

FRANKFORT-ON-THE-MAIN. The musical life of Frankfort is passing through an era of recovery and reconstruction. The city has always displayed devotion to music, though not of a kind calculated to exert an influence beyond the confines of a proud, exclusive and caste-ridden Free City. It is only in modern times that Frankfort has taken a prominent place among the musical centres of Germany. Until quite recently (1925) the opera, orchestra and music school, the three mainstays of the city's musical life, have passed through crises of finance and reorganisation.

As in other German cities the opera is the centre around which the musical interest of the city revolves. The municipal opera-house, one

of the finest in Germany, was designed by Lucae, who died (1877) while it was being built. It was completed in 1880. It had formerly the largest and best-equipped opera stage in Germany, but improvements elsewhere have rendered this no longer true. The house seats 1864 persons. Among the conductors have been Pitzner (father of Hans Pitzner), Dessoff, Weingartner and von Hausegger. The present chief Kapellmeister is Ludwig Rottenberg. After a somewhat long lapse into formalism and routine, due to a disastrous interregnum, an effort has been made—already attended by considerable success—to place the opera on a sounder artistic footing under the co-operation of Ludwig Rottenberg, as Kapellmeister, with Clemens Krauss as General Music Director. A concurrent settlement of difficulties within the orchestra has helped to consolidate the new movement. The Frankfort opera-house has given a first performance to new works only on rare occasions. It produced Schreker's three operas, 'Ferne Klang' (Aug. 18, 1912), 'Die Gezeichneten' (Apr. 25, 1918) and 'Die Schatzgräber' (June 20, 1920).

For many years the orchestra of the opera was also the only concert orchestra, with unsatisfactory results both to the performance of opera and the rehearsals of the concerts. The principal concert-giving society, the Museums Gesellschaft, was restricted to twelve symphony concerts a year. The need of further opportunity for the Frankfort concert-going public led to the foundation of the Frankfurter Symphonie Orchester (95 performers) by the Frankfurter Orchester Verein. Under the direction of Ernst Wendel it continues to give regular symphony performances. For a long time it appeared to compete with the concerts of the Museums Gesellschaft, then under the direction of Hermann Scherchen, and it was thought that the two might possibly amalgamate. But after the sudden resignation of Scherchen in 1924, the Museums Gesellschaft concerts were placed under the directorship of Clemens Krauss, the General Music Director of the opera. Of lesser importance are the orchestras of the Philharmonischer Verein (Kretschmar) and the Konzertvereins Orchester (Probst).

Chamber music in Frankfort is represented by the Amar quartet (Licco Amar, Walter Caspari, Paul Hindemith, Rudolf Hindemith), which has gained considerable renown both in Germany and abroad by its performance of modern music. It is, however, only rarely to be heard in its native city. There are two other quartets of creditable quality, that of the Frankfort Symphony Orchestra and the Lenzewski Quartet. The Frankfurter Bläser Kammermusik Vereinigung gives occasional chamber concerts.

There are in Frankfort over one hundred choirs of various kinds and varying quality.

Besides the Singakademie (Gambke) there are two first-class mixed choirs, the Caecilien Chor (Temesvary) and the Ruhlscher Gesangsverein (Scherchen). For the rest, choral singing in Frankfort lags behind the best choirs of the Rhineland in enterprise, the choirs being content to sing the old tried music. In the Stadtbibliothek (City library) there is an important collection of choral music. Frankfort lacks a suitable hall for the performance of large works. The Festhalle, designed for choir festivals, holds 18,000 persons, and is not only too vast but also its acoustic properties are unsatisfactory. Other halls are the Hippodrome (2000), Palmengarten (1500) and Conservatorium (400).

Through the Hoch'sche Conservatorium Frankfort has a historic place in musical education, lately augmented by the foundation of a Chair of Musical Sciences, at present held by Professor Moritz Bauer.

The Hoch'sche Conservatorium was founded in 1877 under the direction of Joseph Raff from the proceeds of a legacy left by Dr. Hoch, a prominent Frankfort citizen. The present (1926) director is Bernard Sekles. As lately reorganised it consists of four departments, preparatory school, high school, opera school and orchestra school, the last now under H. von Schmeidl. In the High School the subjects taught are theory, musical history, method, counterpoint and harmony, pianoforte, violin, singing, choral singing, orchestra playing and organ. The opera school and orchestra school are intended for professional students. Like the Frankfort opera and orchestra the Conservatorium has passed through vicissitudes. Lack of proper funds obliged it to conduct classes for amateurs in order that it might be able to finance its higher classes. After an interregnum had been overcome by the appointment of the present director, it was reorganised and is now approaching the high level which should be its proper place in German musical education. This success has been achieved by restricting its scope and appointing highly qualified teachers. Its main object now is to afford good ensemble-training for choir and orchestra, a scheme the benefit of which will no doubt in due time be reaped by the opera-house and its orchestra. The Mozartstiftung, founded in 1838 to assist poor but talented musicians in their studies, provides a number of scholarships nominally held for two years but usually in practice for four. Among the distinguished musicians who have held them are Max Bruch, K. J. Brannbach, A. Krug, F. Steinbach, Humperdinck, Paul Umlauf, Ludwig Thuille.

Other schools of music in Frankfort are the Frankfurter Musikschule (Director, Ludwig Schütz); Heinemann's Musikinstitut (A. Heinemann); Akademie für Kunstgesang und Musik

(C. Specht); and Seminar für Musiklehrerinnen (E. Binding).

The Musikgeschichtliches Museum is on the Untermainkai, No. 27.

H. G. D.

FRANKLIN, BENJAMIN (b. Boston, U.S.A., 1706; d. Philadelphia, 1790), claims mention here for his connexion with the HARMONICA (q.v.), or musical glasses, which he so far improved as to make the instrument practically available. The invention is described by him in a letter to Beccaria, dated London, July 13, 1762, and printed in Sparks's edition of his works (vi. 245). That Franklin had considerable musical faculty is evident from his letters on Scottish music and on the defects of modern music (vi. 263, 269), which are also full of his happy mother-wit.

M. G. C.

FRANZ, KARL (b. Langenbielau, Silesia, 1738; d. Munich, 1802), player on the French horn (Waldhorn) and the baryton. His first post was under the Archbishop of Olmütz in 1758; his next under Prince Nicholas Esterházy at Eisenstadt, where he remained from 1763 to the end of 1776. He was afterwards in the band of Cardinal Bathiany at Presburg until 1784. His adoption of so difficult an instrument as the baryton probably arose from the fact that the Prince himself played it, and that Haydn composed much for it for his use. At any rate Franz played it very finely, and on leaving the Presburg band made several tours, in which his performance on it excited the greatest enthusiasm. In 1787 we find him established in Munich as 'Kammermusikus.' That he was greatly esteemed by Haydn is proved by a cantata for voice and baryton, composed by that master for him; he performed it on his tours, singing and accompanying himself. The cantata was written à propos of the death of Frederick the Great, and begins 'Er ist nicht mehr! Tön' trauernd, Baryton!' C. F. P.

FRANZ, ROBERT (b. Halle, June 28, 1815; d. there, Oct. 24, 1892), one of the most important representatives of the German Lied, was the son of Cristoph Franz Knauth, who in 1847 adopted his second name as surname.

The son of a respectable citizen of Halle, Handel's birthplace, Robert Franz had fair opportunities of getting a good schooling, and might have gone through the regular university curriculum if it had not been for his strong musical predilections. He had to gratify his taste for music on the sly, and it was only after years of delay, and much against the grain, that his parents could be brought to see that he was destined to be a musician. As a lad he had contrived to play the pianoforte and organ enough to be able to act as accompanist in the choral works of Handel, Haydn and Mozart. In 1835 he obtained the consent of his parents to make a trial of his musical gifts as pupil of Schneider at Dessau. There he continued for two years, playing, studying harmony and

counterpoint, and making ambitious attempts at composition, all of which he afterwards destroyed.

On his return to Halle in 1837, Franz vegetated in a dreary manner for some six years, unable to get any sort of musical employment, yet obstinately unfit for anything else. But he made good use of his time, studying Bach, Beethoven and Schubert. In 1843 he published his first set of 12 songs, which at once attracted the attention of Schumann (*Neue Zeitschrift*, July 31), whose frankly expressed admiration was soon shared by Mendelssohn, Gade, Liszt and other eminent masters. At length the authorities at Halle thought fit to appoint Franz organist at the Ulrichskirche, and conductor of the Singakademie; and in due course of time he obtained the titles of 'Königlicher Musik-director' and doctor of music, which latter title was offered by the University of Halle, on his lecturing to its students on musical subjects. Unfortunately as early as 1841 his sense of hearing began to decline, his troubles were aggravated by serious nervous disorders in 1853, and became so grave that in 1868 he had to relinquish his employments, and give up writing altogether. The distressing pecuniary difficulties which arose in consequence were, however, effectually overcome by the generous exertions of Liszt, Joachim, Frau Helene Magnus and others, who in 1872 got up concerts for Franz's benefit, and realised a sum of £5000.

In his latter years Franz devoted much time to editing and arranging the works of Bach and Handel, by furnishing polyphonic accompaniments in cases where the composer's intentions are only indicated by a figured bass, rewriting the part sketched for the organ for a group of wind instruments, so as to facilitate performance in concert-rooms, supplying substitutes for parts written for obsolete instruments, etc. (See ADDITIONAL ACCOMPANIMENTS.) Detailed critical essays upon and about Robert Franz's songs and arrangements have been published by Saran, Schäffer, Ambros, Hueffer and Liszt, of which the first and last are the most important.

Franz's own contributions to the literature of music are: *Mittheilungen über J. S. Bach's Magnificat* (Halle, 1863); and *Offener Brief an Eduard Hanslick über Bearbeitungen älterer Tonwerke, namentlich Bach'scher und Händel'scher Vocalmusik* (Leipzig, 1871). His compositions and arrangements consist of 257 songs for a single voice with pianoforte accompaniment, in 45 sets; a Kyrie, a *cappella*, for 4-part chorus and solo voices; the 117th Psalm, a *cappella*, for double choir in 8 parts, and a liturgy for the evangelical service; 6 chorales; 4-part songs for mixed voices, and 6 ditto for male chorus. His arrangements are as follows:

Of Bach—'Passion according to St. Matthew': Magnificat in D; 'Tranquilo'; 10 cantatas; 6 duets and numerous arias.
Of Handel—'Messiah': Jubilate; 'L' allegro, il penseroso ed il moderato'; 24 operatic arias and 12 duets.
Astorja's Stabat Mater; and Durante's Magnificat.

Of Mendelssohn—a Hebrew melody for piano and violin; 6 two- and four-part songs arranged for one voice with piano.
Mozart's quintets in C minor and major, and Schubert's quartet in D minor, transcribed for piano duet (1878). E. D.

CHARACTER OF FRANZ'S SONGS

In estimating the value of Franz as a song-writer it is essential to consider the limitations which he prescribed for himself. He excluded all that was passionate or extreme in feeling. 'The ethical side in my songs,' he said, 'is the chief thing. They shall bring peace and reconciliation.' Realism of any kind was equally abhorrent to him. 'Beauty is truth, but a thing is not beautiful because it is true.' Even the dramatic element was ruled out. It brought him too close to the disturbing aspects of life, from which he strove to provide shelter in an ideal and tranquil world of beauty created by his art. No dramatic ballad appears among his songs. More curious is the limitation to a single kind of voice, the mezzo-soprano. It is characteristic of the reserve in his nature that he rarely allows even this voice to exhibit its full range or power. Further, in his conception of song his design was that the music should not go beyond a very faithful illustration of the poet's words. 'My music,' he wrote to Liszt, 'does not pretend to be much in itself.' He was content, that is, to re-clothe the poems he set in a musical garment; he did not seek through the power of imagination to transcend them. Hence even his best songs are never completely satisfying. Lastly, though the majority of his songs follow the strophic form of the folk-song, he rarely gives us the melodic freedom which is characteristic of it at its best, preferring to build up his melodies on one or two short phrases repeated at different levels, with some extension or variation at the conclusion (as, for instance, in 'Für Musik' op. 10, No. 1). The scheme is unsatisfactory both melodically and rhythmically. Mendelssohn, who, like Schumann, was warm in his praise of the first two Franz volumes that appeared in 1843, complained later of the lack of melody in Franz's songs.

Working thus in a field so circumscribed, he yet produced a considerable number of songs, albeit mostly on a small scale, that are interesting and valuable and in their own way of undoubted beauty and charm. Those to whom tenderness, purity, delicacy, naïveté, simple pathos and the like appeal will find plenty to delight them. There is, moreover, no affectation of simplicity, no suspicion of pose. His workmanship is admirable in every detail; 'here is no lack of fancy, of ingenuity or resource. The figures both in his accompaniments and his harmonies and modulations are well suited to the moods he found in his poems and sought to express. In the matter of declamation he is rarely at fault. He kept his songs by him for years, polishing, re-touching, altering till they

satisfied his fastidious taste. In a sense, as he remarked to a friend, 'Die sind alle gut.' But, in spite of all the praise that has been lavished upon him, it remains true that only the minor gifts were his. He had them all at his disposal, he was a master of his craft, but he never composed a great song. The larger qualities which belong to imagination and vision were denied him.

Among his best songs may be named :

- 'Schlummerlied.' Op. 1, No. 10.
- 'O säh' ich auf der Halde dort.' Op. 1, No. 5.
- 'Die Lotusblume.' Op. 1, No. 3.
- 'Mutter, O sing' mich zur Ruh.' Op. 10, No. 3.
- 'Mein Schatz ist auf der Wanderschaft.' Op. 40, No. 1.
- 'Stille Sicherheit.' Op. 10, No. 2.
- 'Wonne der Wehmuth.' Op. 33, No. 1.
- 'Es hat die Rose sich bekümmert.' Op. 43, No. 5.
- 'Im Rhein, im heiligen Strom.' Op. 18, No. 2.
- 'Die Widmung.' Op. 14, No. 1.
- 'Marie am Fenster.' Op. 18, No. 1.
- The settings to Lenau's Schillieder. Op. 2.

Weaker in sentiment, but characteristic, are :

- 'In meinem Auge.' Op. 5, No. 6.
- 'Da die Stunde kam.' Op. 7, No. 3.
- 'In meinem Armen wieg' ich dich.' Op. 7, No. 4.

ADD. BIRM.—Letters, R. Franz und Arnold Freiherr Soult von Pfalzgr. Ein Briefwechsel, 1861-88 (Berlin, 1907); HERMANN VON DER FORTDEN, Robert Franz (Leipzig, 1923), S. E. BARKMAN, Die Lieder von R. Franz (Vienna, 1923).

FRANZONI, AMANTE (b. Mantua, 15—), was maestro di cappella at Forlì Cathedral in 1611, and at S. Barbara, Mantua, in 1617. He composed 3 books of 'Fioretti musicali' (3 v., 1605, 1607, 1617); a book of madrigals, 1608; concerti ecclesiastici, 1611; vesper psalms (6 and 8 v.), 1619; also masses and motets (see Q.-L.).

FRASCHINI, GAETANO (b. Pavia, 1815; d. Naples, May 24, 1887), tenorsinger. Originally intended for the study of medicine, he soon found himself possessed of a most powerful tenor voice, and devoted himself to its cultivation. Having received some instruction from a master named Moretti, he made his first attempt (1837) in the cathedral of his native city, and was immediately engaged to sing the second tenor rôle in 'Belisario' at Pavia, and Rodrigo in 'Otello' at the fair at Bergamo. In 1840 he sang at Milan; and from thence went to Naples, where he remained several years attached to the Opera. Fétis heard him there in 1841, and admired his voice, and the bold style in which he attacked the most difficult notes; nine years later he heard him again at Bergamo, and found to his surprise not only that his energy and purity of tone were undiminished, in spite of the violence of the music which he had been executing during that period, but that he had learned to sing better than before. Fraschini visited Bologna, Venice, Turin, Padua, Vicenza, London and Vienna; and sang frequently at the latter place down to 1852 with constant success. In 1847 he made his début at Her Majesty's Theatre. He continued to appear for many years more, and afterwards retired and lived at Pavia, where the theatre is called after him, Teatro Fraschini. J. M.

FRASER, MARJORY KENNEDY-, see KENNEDY (2).

FRASI, GIULIA, a singer who appeared in London in 1743 with Galli, and remained in public favour for many years. She took part that year in the revival of Handel's 'Alessandro,' and in the first performance of Galuppi's 'Enrico.' Her instructor was a musician named Brivio; but she doubtless owed much more of the formation of her taste and style to Handel and his singers, than to her first master. In 1746 she was still in an inferior position, but in 1748 played a more important part in the pasticcio 'Lucio Vero,' in operas by Hasse, and in the comic operas instituted by Croza. In 1749 she sang in Handel's oratorios for the first time, taking part in 'Solomon' and 'Susanna'; she sang in 'Theodora' in 1750, in 'Jephtha' in 1752, in 'Joshua' at Oxford in 1756, in the 'Triumph of Time and Truth' in 1757, and in 'Messiah' at the Foundling Hospital, May 3, 1759. She did not, meanwhile, sever her connexion with the stage, but appeared in 1750 in Ciampi's 'Adriano in Siria' and Pergolesi's 'Serva Padrona.' In 1755 Frasi was called upon, in consequence of the indisposition of Mingotti, to perform her part in Jommelli's 'Andromaca,' as she had been twice in 'Ricciaro,' the preceding season. Smith's 'Fairies' in this year owed its success principally to Guadagni and Frasi. At her house Dr. Burney at that time 'attended her as her master.' In 1758 she appeared in 'Issipile' by G. Cocchi. She sang also in the City at both the Swan and Castle concerts.

Dr. Burney relates that 'when Frasi told him [Handel], that she should study hard, and was going to learn Thorough-Bass, in order to accompany herself: Handel, who well knew how little this pleasing singer was addicted to application and diligence, said, "Oh—vaat may ve not expect!"' There is a portrait of Frasi, in mezzotint (folio), in which she is turned to the left, singing from a sheet of music held in both hands, on which is engraved a song beginning with the words 'Voi amante che vedete' (Giardini). The portrait has neither name nor date, and is very rare. J. M.

FRAU OHNE SCHATTEN, DIE, opera: libretto by H. von Hofmannsthal, music by Strauss. Produced Vienna, Oct. 1919.

FREDDI, AMADIO (b. Padua, 1614), maestro di cappella at Treviso Cathedral in 1632, also at Vincenza Cathedral. He composed church music and 2 books of madrigals (see *Q. L.*).

FREDERICK THE GREAT (Friedrich II.), King of Prussia (b. Berlin, Jan. 24, 1712; d. Sans-Souci, near Potsdam, Aug. 17, 1786), was a considerable amateur of music. He passionately admired German music while detesting that of Italy and especially of France, which was the more remarkable from his well-known love of French literature. He said on one occasion, 'la musique française ne vaut rien.' His first musical instructor when Crown Prince

was Gottlob Hayn, the cathedral organist, for whom he always retained a regard, and who presented him with a composition every year on his birthday. In 1728 he began to learn the flute from QUANTZ (*q. v.*), who was a strict master, while Frederick was a docile pupil. He was afterwards, however, compelled to study in secret, as his father, Frederick William I., considered music an effeminate pastime, and declined to allow him instructors or musicians of any kind. He was therefore driven to engage musical servants, and often played duets with his valet Fredersdorf, until he was able in 1734 to have a private band at his own castle of Reinsburg. On his accession to the throne in 1740 he established a court band at Berlin, and sent GRAUN (*q. v.*) to Italy to engage singers. He also had designs made for a new opera-house, which was opened Dec. 7, 1742. An amusing account of his difficulties with Barberina the ballet dancer will be found in Carlyle (Bk. xiv. chap. 8). His expenditure on music was lavish, though it has been exaggerated. Quantz's salary amounted to 2000 thalers, besides 25 ducats for each of his compositions for flute solo, and 100 ducats for every flute he made for the king. According to Reichardt, Frederick practised perseveringly, playing the flute four times a day. It is in one of these eager practisings that Géroome has represented him in an admirable picture. Quantz died in 1773 while composing his 300th concerto for the king, who completed the work. Frederick's execution of an Adagio is said by Fasch¹ to have been masterly, but in quick movements he betrayed a want of practice, and in matter of time his playing was so impulsive and irregular, that to accompany him was an art in itself. In later years he again took up the clavier, not having sufficient breath, it is stated, for the flute. C. P. E. Bach was employed at the court of Frederick as cembalist from 1740 onwards. Frederick invited Sebastian Bach to Potsdam, and the visit, of which Forkel gives an account, and the result of which was Bach's 'Musikalisches Opfer,' took place on May² 7, 1747. (See BACH, Vol. I. p. 165.)

Frederick particularly admired Silbermann's pianofortes, and bought all he could hear of (see PRANOFORTE). He was also a composer. The 'Hohenfriedberg March' was nominally by him, as well as a march inserted in Lessing's play, 'Minna von Barnhelm.' He also composed a 'Sinfonia' for 'Galatea ed Acide' and portions of an opera 'Il rè pastore'; an Aria for 'Il trionfo della fedeltà'; another for Graun's 'Coriolano' (of which he wrote the libretto); and added fioriture for Hubert the singer to an air in Hasse's 'Cleofide.' In 1835

¹ See Zelter's biography of Fasch.

² See Spitta's *J. S. Bach*, Engl. tr., iii. 281, as correcting the date Apr., given in the first edition of the Dictionary on the authority of Thomas Carlyle.

a search was instituted by King Frederick William III., and 120 pieces composed by Frederick the Great were found; these were edited by Spitta, and published in 1889 by Breitkopf & Härtel. He had an eye to the improvement of the singing in the public schools, and an official decree of his, dated Oct. 18, 1746, contains the following passage:

'Having received many complaints of the decline in the art of singing, and the neglect of it in our gymnasiums and schools, His Majesty commands that the young people in all public schools and gymnasiums shall be exercised more diligently therein, and to that end shall have singing-lessons three times a week.'

FREE REED, see REED.

FREGE, MADAME (née LIVIA GERHARD) (b. Gera, June 13, 1818; d. Leipzig, Aug. 22, 1891), soprano singer, educated at Leipzig, and taught to sing by Pohlenz.

She made her first appearance in public on July 9, 1832, at a concert given at the Gewandhaus by the still more juvenile Clara Wieck, then only 13. She had at that time a cultivated voice of lovely quality, especially in the upper register, perfect intonation and good style. She was engaged for the next series of Gewandhaus Concerts, and began with a very large repertory, as is evident from the pieces ascribed to her in the reports of the concerts. She first appeared on the stage at Leipzig, in 'Jessonda,' Mar. 1833. A residence in Dresden enabled her to profit by the example and advice of Schröder Devrient. In 1835 she entered the regular company of the Theatre Royal at Berlin. After delighting the public by a large range of characters, in which her acting was equal to her singing, she made her last appearance, June 25, 1836 (as Elvira), and left the boards to be married to Dr. Frege of Leipzig. After that time she sang only at concerts. Her house was always a centre of the best music. She had a singing society there of fifty voices, with a select band, led by David, and conducted by Lange. Mendelssohn was her intimate friend, often consulted her on his music, and took her his songs to try before making them public. 'You don't know my songs,' said he to a friend in London; 'come to Leipzig and hear Mme. Frege, and you will understand what I intended them to be.' A letter to the 'Frau Doctorin Frege,' dated London, Aug. 31, 1846, and describing the first performance of 'Elijah,' is printed in the second volume of his *Letters*. It was at her house, on Oct. 9, 1847, in trying over the songs which form op. 71, that he was struck with the first of the attacks which ended in his death on Nov. 4.

Mme. Frege's characteristics were delicacy and refinement—not a large voice, but a great power of expression in singing her words, a

perfect style, and the highest musical intelligence. G.

FREISCHÜTZ,¹ DER, romantic opera in 3 acts, words by Kind, music by Weber. Produced Berlin, June 18, 1821; in Paris as 'Robin des Bois,' with new libretto by Castile Blazo and Sauvage, and many changes,² Odéon, Dec. 7, 1824, with accurate translation by Pacini, and recitatives by Berlioz, Académie Royale, June 7, 1841, as 'Le Franc Archer.' In London, as 'Der Freischütz, or the seventh bullet,' by Hawes, at English Opera-house (Lyceum), with many ballads inserted, July 23, 1824; in Italian as 'Il franco arciero,' Covent Garden, Mar. 16, 1850 (recitatives by Costa); in German, King's Theatre, May 9, 1832; New York, Park Theatre, Mar. 2, 1825. It was revived at Astley's Theatre with a new libretto by Oxenford, Apr. 2, 1866.

FREMSTAD, OLIVE (b. Stockholm, 1872), operatic mezzo-soprano. She first appeared in public as a piano prodigy in Sweden; accompanied her parents to America at the age of 10, and first studied singing in Minneapolis. In 1890 she became soloist at St. Patrick's Cathedral, New York, and in 1893 began a two years' course of training with Lilli Lehmann. Her voice now developed into a superb dramatic organ, well produced and of unusually high range; while her rare histrionic talent enabled her to lend great individuality to her various impersonations. In Germany, after a notable début as Azucena in 1895, she sang for three years at Munich, where her Carmen—an extremely picturesque and artistic delineation—won her especial popularity. She also sang at Bayreuth and, in 1897, made a mark at the Vienna Hofoper as Brangäne, which was perhaps her finest Wagnerian part. She made a highly favourable impression, however, as Venus in 'Tannhäuser,' on her début at Covent Garden in 1902, during which season she created the rôle of Iolanthe in Ethel Smyth's opera, 'Der Wald.' In 1903 she again appeared in London under Maurice Grau, who then engaged her for the Metropolitan Opera House, New York, where she sang with unvarying success for twelve years in succession, besides reappearing there in 1917. Her versatility was extraordinary, and she was equally at home in rôles so strongly contrasted as those of Brünnhilde, Fricka, Isolde, Elsa, Kundry, Selika, Tosca, Santuzza, Elisabeth, Salome and Armide, which last two she 'created' in America. She was twice married: in 1906 to Edson Sutphen, and in 1916 to Harry L. Brainard. She has toured extensively both in America and Europe; and in 1900–01 she was twice decorated

¹ Freischütz, say the dictionaries, = free-marksmen, one who shoots with charmed bullets. There is no equivalent English term.

² 'Assassiné' is Berlioz's word for this outrageous proceeding (no singularity in France, nor indeed in London, at that time), by which he states that Castile Blazo made more than 100,000 francs (*Mémoires de Berlioz*, 67, 61). There were *Diversissements* made up of the dance music in 'Preciosa' and 'Oberon,' and of the *Invitation to the Waltz* scored by Berlioz for the purposes.

by the French Government in recognition of services at the Paris Opéra.

FRENCH HORN, see HORN.

FRENCH SIXTH, see SIXTH.

FRERE, RIGHT REV. WALTER HOWARD, D.D. (b. Dungate, near Cambridge, Nov. 23, 1863), Bishop of Truro since 1923, has made important researches in Liturgical music.

Frere was a scholar of Trinity College, Cambridge (1st class classical Tripos, 1885) and was ordained (1887) to the curacy of Stepney. In 1892 he joined the newly founded Community of the Resurrection, Mirfield, and was its Superior for two periods, 1902-13 and 1916-1922. In 1893 he edited for the Plain-song Society the *Graduale Sarisburiense*, and among many later publications dealing with liturgical matters those of chief importance to musicians are, *Bibliotheca musica liturgica* (1901) a guide to mediæval musical manuscripts of Great Britain and Ireland, and *The Sarum Gradual and the Gregorian Antiphonale Missarum* (1896). He wrote an important introduction to the historical edition of 'HYMNS ANCIENT AND MODERN' (q.v.) (1909), tracing the development of English Church music and the growth of the hymn in church usage.

He contributed to the second edition of this Dictionary authoritative articles on plain-song which he has revised and extended in the present edition. c.

FRESCHI, PADRE GIOVANNI DOMENICO (b. Vicenza, 1640; d. there, 1690), composed masses (3-6 v.), psalms, 2 oratorios and 13 operas (*Riemann*; Q.-L.).

FRESCOBALDI, GIROLAMO (b. Ferrara, 1583¹; d. Mar. 1, 1643), the most distinguished organist of the 17th century. He studied under the cathedral organist, Luzzasco Luzzaschi. Quadrio tells us that he possessed a singularly beautiful voice; and it is certain that while still a youth he enjoyed a great reputation both as singer and organist. In 1608 he was at Antwerp, as he dates from there the preface to his first book of 5-part Madrigals (Antwerp, Phalesio) dedicated to Guido Bentivoglio, Archbishop of Rhodes; but in the same year he returned to Italy, as his second book of 'Fantasie a 4' was published at Milan in that year; and he was appointed organist at St. Peter's, Rome. His first performance there attracted, according to Baini, an audience of 30,000 persons. In 1628, dissatisfied apparently with his scanty pay at Rome, he sought leave of absence, and accepted an invitation to Florence from Ferdinand II., Grand Duke of Tuscany, who named him his organist. Social and political troubles in Tuscany obliged him to leave Florence in 1633; and, returning to Rome, he was reinstalled in his former post as organist of St. Peter's, which

he continued to hold till 1643. Froberger was his pupil from Sept. 30, 1637, to Apr. 1641, and thus the noble style of his organ playing was handed on to other schools.

Frescobaldi's compositions are important, and give us a high idea of his powers. His works comprise, besides the two named above: 'Ricercari e canzoni francesi' (Rome, Borboni, 1615); 'Toccate . . . e partite d'intavolatura' (1614-15-27-37); 'Secondo libro di toccate, etc.' (Rome, 1627-28-37); 'Primo libro delle canzoni a 1, 2, 3, 4 voci' (Rome, 1623-28); 'Primo libro, Arie musicali' (Florence, 1630); 'Fiori musicali,'² op. 12 (Rome, 1635); and 'Capricci sopra diversi soggetti' (Rome, 1624, Venice, 1626). An extract book of Dr. Burney (B.M. Add. MSS. 11,588) contains a copy of the first of these works. A Canzona for the organ will be found in Hawkins (chap. 130), and many other pieces in Commer's *Musica sacra*, and *Collection des compositions*, etc., and F. Riegl's *Praxis organædi* (1869). Five organ pieces are in the *Trésor des panistes*, and Torchi's *L'arte musicale in Italia* contains 23 compositions; 12 of the toccatas were published in Pauer's *Alte Meister*. F. Boghen has edited the following: 16 Ricercari, 24 Capricci; 15 Capricci; 25 Canzoni, Correnti, Partite; Sei Madrigali a 5 voci. An article by F. X. Haberl in the *Kirchenmusikalisches Jahrb. für 1887* (Regensburg) contains a careful bibliography, and the list in Q.-L. is even more complete. Haberl proposed a collected edition of his works to be published by subscription. Sixty-eight organ works were published (Breitkopf & Härtel) in 2 volumes.

F. G., with addns.

FRETS (Fr. *touches*; Ger. *Bunde, Bünde, Tonbunde, Bänder, Griffe, Bundsteg*; Ital. *tasto*). On stringed instruments that have finger-boards, like the lute or guitar, the small pieces of wood or other material fixed transversely on the finger-board at regular intervals are called frets. The object they serve is to mark off the length of string required to produce a given note. Pressure upon a string immediately above a fret makes at the point of contact of string and fret a temporary 'nut,' and the string, set in motion as far as the bridge on the sound-board by plucking with plectrum or finger, or bowing, gives a higher note in proportion to the shortening of the string. Frets therefore correspond in their use with the holes in the tube of a wind instrument.

The use of frets to give certainty to the fingers in stopping the notes required is of great antiquity, the Chinese in a remote age having had movable frets for the strings of their Chê. For the Hindu Vina, a finger-board instrument with nineteen frets, a divine origin is claimed, thus implying a remote origin. And the Egyptians, as may be seen in the British Museum, depicted

¹ register of baptisms in cathedral of Ferrara, Sept. 9, 1583.

² Modern reprint edited by J. Bonnet.

by themselves about the time of Moses, had either frets or coloured lines serving a like purpose on the finger-boards of their lutes. In the present day the Balalaika of the Russian country people has coloured lines that serve for frets. It is most likely that the use of frets came into Europe through Spain and Southern France from the Arabs. In the Middle Ages bow instruments had them, as well as those played with plectrum or finger. The Rebec, the Viola da gamba, da braccio, d' amore, the Italian Lire, Lirone, all had them. But the French Gigue of the 12th-14th centuries, like our modern fiddles, had none. In the modern highly-developed technique they would be an impediment, and the feeling for temperament has only been satisfied by their rejection. In lutes, guitars and zithers, however, they are retained. In performance, the end of the finger must be placed immediately above the fret, and not upon it, as vibration would be interfered with; while if too much above, the string would jar upon the fret.

The finger-board has been differently divided in different epochs and countries according to the scale-system prevailing. It has been generally accepted since the researches of Villoteau, a member of the expedition sent to Egypt by Napoleon Bonaparte,¹ that the octave on the finger-board of the Arabic lute or tamboura was divided into eighteen, or it may be seventeen intervals; but as the collection of instruments formed by Villoteau is not now in existence, we are unable to endorse his statement that they were equal intervals of three to the major tone, nor can we, on the other hand, give entire credit to the late Dr. Land's contention (*La Gamme arabe*, Leyden, 1884) that Al-Farabi's obviously Greek division of seventeen limmas and commas was the practical musician's Arab scale. In Persia and Arabia there would be smaller divisions than our chromatic, third tones as well as half. Although the third of a tone is almost a chromatic semitone, it does not appear that either Persian or Arab lutenists have used equal thirds of a tone. The Arabic (and Egyptian) division has been proved to be a succession of three intervals, smaller than an equal semitone, which are known as 'limmas,' or 'commas.' To mark off the hemitonic division, the eighteenth part of the length of the string to the bridge must be measured off from the nut or ledge at the top of the finger-board over which the strings pass—in Italian *CAPO TASTO* (*q.v.*), 'head fret.' This gives the place to fix the first fret. Another eighteenth from this fret to the bridge gives the place of the second, and so on until the division is complete. The method implies a nearly equal temperament and uniform tension, but in practice there is room for some modification by the finger. High frets demand a greater finger

pressure, and slightly sharpen the pitch of the notes. To correct this the frets must be shifted towards the nut. The Hindu uses finger pressure or, in other words, greater tension, to get his half-tones from a diatonic fret system, and in the Japanese koto the finger of the left hand is pressed upon the string on the opposite side of the movable fret to the side plucked by the finger of the right hand; thus semitones are produced in certain ornaments. To the instrument maker the disposition of the frets is a difficult task, requiring nice adjustment. On the side that the strings are thicker the frets should be higher, and the finger-board must be concave in the direction of its length to allow the thicker strings to vibrate. The frets are gradually lowered as they descend towards the bridge, the chanterelle, or melody-string, having often a longer series extending only partly across the finger-board. The personal peculiarity of the hand or touch finally modifies the adaptation of the frets.

Narrow slips of wood are generally glued up the sides of the finger-board to prevent the frets projecting. The convex finger-boards of bow instruments requiring convex frets, fretted viols had catgut bound round the finger-board and neck at the stopping distances. Hence the German 'Bunde'—binds. (See the cut of GAMB.) The French 'ton' indicates the note produced; the Italian 'tasto' the touch producing it. The English 'fret' perhaps implies the rubbing or friction of the string at the point of contact, but the derivation of the word is doubtful. Some take the original meaning of 'fret' to have been a note, and thence the stop by which the note was produced. Shakespeare puns upon the word in Hamlet, 'though you can fret me you cannot play upon me.' See Max Albert's article, 'Bunde,' in Mendel's *Lexikon*.

A. J. H.

FREZZOLINI, ERMINIA (b. Orvieto, 1818; d. Paris, Nov. 5, 1884), received her first lessons in singing from her father, a *buffo cantante*; and afterwards from Nuncini at Florence. She had further instruction from the elder Ronconi at Milan, and from Manuel Garcia; and completed her musical education under Tacchinardi at Florence. In this town she made her débuts in 1838, in 'Beatrice di Tenda' and in the 'Marco Visconti' of Vaccaj. She sang also in that year at Siena and Ferrara, and in 1839 at Pisa, Reggio, Perugia and Bologna. She played 'Lucrezia Borgia' at Milan in 1840 with brilliant éclat, and then went to Vienna. Returning to Turin, she married the tenor, Poggi; but continued to be known on the stage as Frezzolini. In 1842 (not 1841, as stated by Fétis) she came with her husband to London, during Grisi's temporary absence, but did not succeed in seizing the popular sympathy. She returned to Italy, and in 1848 was engaged for St. Petersburg. But the climate drove her

¹ *Description de l'Égypte*, tomes xiii. et xiv., Paris, 1823.

back to Italy in two years. In 1850 she reappeared in London at Her Majesty's Theatre, and in 1853 was at Madrid. In November of that year she made her first appearance in Paris, in the 'Puritani'; but notwithstanding her stage-beauty, and her nobility of style and action, she could not achieve any success; her voice had suffered too much from wear and tear, and showed signs of fatigue. She subsequently met with an enthusiastic reception in America; but her career was over, and she was not heard again in Europe. J. M.

FRIBERTH, KARL (*b.* Wullersdorf, Lower Austria, June 7, 1736; *d.* Aug. 6, 1816), tenor singer. His father was schoolmaster at Wullersdorf. He came early to Vienna, and studied singing under Bonno and composition under Gassmann. He had a fine tenor voice, and sang at St. Stephen's, at Prince Hildburghausen's concerts, and in Italian operas at court. In 1759 he was engaged by Prince Esterhazy, and while in his service formed an intimate friendship with Haydn, in whose operas he sang. He himself wrote several librettos. In 1768 he married Maria Magdalena Spangler, a singer in the Prince's company, and removed with her in 1776 to Vienna, where he was appointed Kapellmeister to the Jesuits and to the Minorites. During a visit to Italy in 1796 Pope Pius VI., 'on account of his services to music,' made him a knight of the Golden Spur—the order to which Gluck and Mozart also belonged. Friberth was an active member of the 'Tonkünstler-Societät,' and took Haydn's part warmly in the discussions there. As a composer he restricted himself almost entirely to church music (see *Q.-L.*). In the museum of the Gesellschaft der Musikfreunde, Vienna, there is a portrait of him in oils, showing a fine head and expressive countenance. C. F. P.

FRICHOT, L. A. (*b.* Versailles, 1760; *d.* Lisieux, Calvados, Apr. 9, 1825), a Frenchman, who settled in London about 1790, and published there in 1800 'A complete Scale and Gamut of the Bass-horn . . . invented by M. Frichot and manufactured by J. Astor.' This invention is the original of the ophicleide. He made the bass-trumpet between 1806 and 1810, a specimen of which is in the Instrumental Museum of the Paris Conservatoire; and a tromba in 1812. The bass horn supplied a new and powerful bass for wind instruments in aid of the bassoon, which was too weak, and the serpent, which was very imperfect. It is now generally superseded by the bombardon and euphonium.

BIBL.—CONSTANT PIERRE, *La Facture instrumentale à l'Exposition de 1889* (Paris, 1890); *Les Factures d'instruments de musique, les luthiers et la facture instrumentale* (Paris, 1893).

M. C. C.; addns. M. L. P.

FRICK (FRIKE), PHILIPP JOSEPH (*b.* near Würzburg, May 27, 1740; *d.* June 15, 1798), originally organist to the Margrave of Baden,

remarkable performer on the harmonica; travelled much from 1769, spending some years in Russia. He came to London about 1780, and played in public with brilliant success both on the pianoforte and harmonica. His health obliged him to give up the latter instrument in 1786, and he then maintained himself by teaching until his death. He published various treatises and some music, none of which is of any permanent value (see *Q.-L.*). The harmonica he used was one on Franklin's system. He tried in vain to adjust a keyboard to the instrument, an attempt in which Röllig succeeded. M. C. C.

FRICKENHAUS, FANNY (*b.* Cheltenham, June 7, 1849; *d.* Aug. 8, 1913), pianist. Her maiden name was Evans, and she married Augustus Frickenhaus. She received instruction in music from George Mount; afterwards at Brussels from Auguste Dupont; and later from William Bohrer. Her first important engagement was on Jan. 11, 1879, at one of the Saturday Evening Concerts, where she played with such success that she was engaged for the remainder of the series. She appeared at the Philharmonic, Mar. 4, 1886; at the Crystal Palace, Nov. 27, 1880, in Mendelssohn's 'Serenade and Allegro gioioso'; at Cowen's Concerts, Nov. 27, 1880, where she played the Pianoforte Concerto of Goetz for the first time in London, and at the Popular Concerts, Jan. 27, 1883. From 1884-87 Mme. Frickenhaus gave, in conjunction with Joseph Ludwig, several series of chamber concerts. Her recitals, at which she brought forward many new works, were long an important contribution to the musical life of London. A. C.

FRICKER, HERBERT AUSTIN (*b.* Canterbury, Feb. 12, 1868), made his reputation as a choir-master at Leeds, where he was city organist and choir-master to the Leeds Festival. The high reputation of the Leeds choir in the series of triennial festivals up to 1913 was largely the result of his training. He founded the Leeds Symphony Orchestra, and in many ways furthered musical development in Yorkshire. In 1917 he went to Canada and became conductor of the Mendelssohn Choir of Toronto, with whom he has achieved a similarly high standard of performance. C.

FRIDERICI (FRIDERICH), DANIEL (*b.* at or near Fisleben, before 1600), composer, settled at Rostock in Mecklenburg, where from 1617 to at least 1654 he was cantor at the St. Marien-Kirche. He was a prolific composer, chiefly of German secular songs for 3 to 8 voices, of which various collections appeared with fanciful titles. In 1624 he edited, with adaptation to German words, Thomas Morley's madrigals for 3 voices. One of Friderici's own madrigals for 4 voices, 'Einstmals das Kind Cupido,' has been edited with English words by Lionel Benson in the series 'Arion.' J. R. M.

FRIEDHEIM, ARTHUR (*b.* St. Petersburg, Oct. 26, 1859), a pianist, of German parentage, who was regarded for many years as one of the foremost exponents of Liszt's music.

He began the serious study of music at the age of 8, and appeared as a pianist at 9 in Field's A major concerto. After passing through the university, he became successively conductor of various small theatre orchestras in Germany, whereby he obtained much beneficial experience. For some years Friedheim was a pupil and fast personal friend of Liszt. He lived with him and studied in Rome in 1880-81 and 1881-82, and subsequently at Weimar. Later he lived in Leipzig; next, for some years as teacher and concert player in America (1894), where he was appointed Seidl's successor, but was unable to accept the post. He then came to London, where he appeared publicly on occasions from 1889 onwards, and subsequently was appointed pianoforte professor in the Royal College of Music, at Manchester. This latter post he resigned in 1904. He returned to America and settled again in New York (1915). (*Baker.*) His many tours in Europe and America earned him the reputation of a pianist of immense technical ability, and of real temperament, and a musician of wide knowledge and genuine gifts. An opera, written and composed by him, 'Die Tänzerin' (Carlsruhe, 1897), and a pianoforte concerto in B flat are his principal compositions. R. H. L. rev.

FRIEDL (FRIEDEL), SEBASTIAN LUDWIG (*b.* Neuburg, Feb. 15, 1768; *d.* Berlin, 1857/58). Mendel says that he was a pupil of J. Louis Duport, to whom he dedicated his three sonatas for violoncello and bass, op. 1. In 1776 he became violoncellist and contrabass-player in the Mannheim chapel and afterwards in the Royal Chapel, Berlin, where he was pensioned in 1826. He was a famous baryton-player and as such travelled over the greater part of Europe. E. v. d. s.

FRIEDLÄNDER, MAX (*b.* Brieg, Silesia, Oct. 12, 1852), a baritone singer, who studied singing under Manuel Garcia in London and Julius Stockhausen in Frankfurt, and subsequently devoted himself to musical research, especially with regard to the German Lied, on which matter he has become an eminent authority.

He sang at the Crystal Palace, Apr. 19, 1884, and elsewhere in London. He took the degree of D.Ph. at Rostock, 1887, offering as his thesis *Beiträge zur Biographie Franz Schuberts*, and in 1894 became a teacher of music at the University of Berlin. There the greater part of his life has been spent, but a visit to Harvard University (Cambridge, Mass.) as exchange professor in 1911 and an extensive lecture tour when he visited 20 American universities was an important interlude (*Riemann*).

His research has produced the edition of

Peters' collection of Schubert's songs with a supplement of variants; editions of Schubert's duets; Schubert's quintet, 'Nur wer die Sehnsucht'; Gluck's Odes; revised edition of the text to Schumann's songs; 100 Deutsche Volkslieder (not before published); Stockhausen's Gesangstechnik (with the author), and *Das deutsche Lied im 18. Jahrhundert* (3 vols.) in 1902. For many years he has devoted himself to the collection of materials for an exhaustive biography of Schubert, which, however, has still not appeared in 1926.

BRIE. — Festgabe zum siebzigsten Geburtstage Max Friedländer, forming part II. of the *Jahrbuch der Musikbibliothek* (Peters, 1921), containing a full list of Friedländer's works.

G., with addns.

FRIEDLÄNDER, THEKLA, a distinguished soprano singer, whose fame was principally established in London. According to the *Monthly Musical Record* (June 1, 1875), she was a pupil of Ferdinand Hiller, and Schneider of Cologne. On Dec. 11, 1873, she made a most successful first appearance in the soprano part on the production of Bruch's 'Odysseus' at the Gewandhaus, Leipzig. She made her début in England, May 8, 1875, at the New Philharmonic Concert, and sang on June 7 at the Philharmonic, Nov. 13, at the Popular Concerts, Mar. 18, 1876, at the Crystal Palace, and at all the Hallé recitals of the same year. On May 27, 1876, she sang with Frl. Redeker (Lady Semon) in duets of Rubinstein at the New Philharmonic on the latter's début in this country, and was frequently engaged with her in singing duets at the Popular Concerts and elsewhere before the marriage of the last named. Miss Friedländer sang also at the Richter and Henschel Concerts, and on Mar. 25, 1886, at the Bach Choir in the third part of Schumann's 'Faust,' and in the provinces, etc. About this time she returned permanently to Germany. The possessor of a sympathetic soprano voice of great delicacy and refinement, she excelled in old Italian airs, and the lieder of her own country, viz., Schubert, Schumann and Brahms. A. C.

FRIENDS OF MUSIC, see NEW YORK.

FRISCHENSCHLAGER, FRIEDRICH FRIEDWIG (*b.* Gross Florian, Styria, Sept. 7, 1885), was educated for the career of a schoolmaster. He soon, however, developed a profound sense of music and was sent to the Musikschule at Graz and later on to Berlin, where he studied under Juon and Humperdinck. His first success as a composer was achieved through his 'Symphonic Aphorisms' (first performance under Felix Weingartner with the Viennese Philharmonic Orchestra). His works include:

A ballad for chorus, 'Triumph of Life,' op. 2; an overture for orch., op. 9; an orchestral rhapsody, op. 13; a suite for small orch. and a P.P. trio, op. 3; a string quartet in A min., op. 21. Seven songs for bass voice, a P.P. quartet, seven maiden songs and seven dances constitute op. 7; opp. 1, 8, 18, 19, several songs; 'Elegische Interludien,' for P.P. trio; 'Felsenstimmen,' op. 10; works for chorus, soli, orch. and organ; canons for three voices and P.P.; six fugues for organ; a double fugue and chorale for 3 voices and organ, complete his published works. H. J. K.

FRISKIN, JAMES (b. Glasgow, Mar. 3, 1886), composer and pianist, won a pianoforte scholarship at the R.C.M. in 1900, and a composition scholarship there in 1905. He left the school in 1907, having studied the pianoforte with Dannreuther and Hartvigson, and composition with Stanford. While still at the college he competed for the 'Cobbett' phantasy-prize, and his string quartet was placed fourth in order of merit; in 1908 his 'phantasy-trio' was awarded the second prize in the same competition. Meanwhile his quintet for piano and strings in C minor had been played at a Broadwood concert in Oct. 1907, and elsewhere and has since been published by the R.C.M. Patron's Fund. An orchestral suite had been played at the College in 1904, and a couple of violoncello pieces at a Patron's Fund Concert in 1906. In Jan. 1909 a sonata for violoncello and piano was performed at a concert given by the composer and Gervase Elwes; and several piano pieces of remarkable merit and originality have been published. Two short motets, in which old Scottish psalm-tunes are treated as *canti fermi*, after the manner of Bach, display a very unusual degree of contrapuntal skill and devotional fervour.

M.

Friskin went to America in 1914 and settled in New York as a teacher on the staff of the Institute of Musical Art. A few other chamber works have come from him, notably a piano sonata (MS.) played by Harold Samuel in London in 1920 (see List in *B. M. S. Ann.*, 1920). His career as a composer, however, has not developed on any large scale.

C.

FRITZ, BARTHOLD (b. near Brunswick, 1697; d. there, July 17, 1766), a celebrated mechanician and maker of instruments, son of a miller. He had no education, but found out for himself the principles of organ-building, and made in all nearly 500 organs, clavecins and clavichords, beginning in 1721 with a clavichord of 4 octaves. The tone of all his instruments was good, especially in the bass. He published *Anweisung, wie man Claviere . . . in allen zwölf Tönen gleich rein stimmen könne*, etc. (Leipzig, 1758-57-80), a new system of tuning keyed instruments by means of fifths and octaves, which, though erroneous, had much success, having gone through three editions, and being translated into Dutch by no less a person than Hummel.

M. C. C.

FROBERGER,¹ JOHANN JACOB (b. Halle, Saxony²; d. Héricourt, near Montbelliard, May 7, 1667), eminent organist. His father was cantor in Halle. On the accession of the Emperor Ferdinand III. (Feb. 15, 1637) Froberger, jun., was appointed court organist at Vienna. There are entries of his salary in the accounts of the Hofcapelle, from Jan. 1 to

Sept. 30, 1637, from Apr. 1, 1641 to Oct. 1645, and from Apr. 1, 1653 to Oct. 30, 1657. The interval from 1637-41 was occupied by his stay in Italy as Frescobaldi's pupil, and a grant of 200 florins for his journey is entered in the accounts under June 22, 1637. In 1649 he was in Vienna again (see Huygens' *Correspondence*, 1882, p. cxcix). In 1657 he left the Emperor's service. In 1662 he journeyed to London, where he was twice robbed on the way, and arrived in so destitute a condition that he thankfully accepted the post of organ-blower at Westminster Abbey, offered him by Christopher Gibbons, then organist of the Chapel Royal and the Abbey. Gibbons was playing before the court on the occasion of Charles II.'s marriage, when Froberger overblew the bellows, and thus interrupted the performance, on which the enraged organist overwhelmed him with abuse and even blows. Froberger seized the opportunity a few minutes after to sit down to the instrument, and improvised in a style which was at once recognised by a foreign lady who had formerly been his pupil and knew his style. She presented him to the King, who received him graciously, and made him play on the harpsichord to the astonishment of all. This curious anecdote is not mentioned by English writers, but is given by Mattheson (*Ehrenpforte*) from Froberger's own MS. notes. Mattheson states that he became a Roman Catholic during his visit to Rome, but it is almost certain that he was already one when he entered the Emperor's service in 1637. The late Anton Schmidt, custos of the imperial library, maintained that he again became a Lutheran after his visit to London, and was dismissed from his post of court organist on that account. The contradiction has never been explained, but that he died a Roman Catholic we know, from an autograph letter of Sibylla, Duchess Dowager of Württemberg, who was his pupil, and who offered him an asylum in her house at Héricourt, near Montbelliard, where he died.³ His printed works—here first given accurately—are 1. 'Diverse ingegnossissime e rarissime Partite di Toccate, Canzone, Ricercari . . . Stampate da Lodovico Bourgeat . . . Mogont, 1693.' 2. 'Diverse . . . etc., Prima continuazione. Mog. 1696.' 3. 'Suites de clavecin, par Giacomo Frobergue,' Amsterdam, Roger (a copy of the first edition in the Fitzwilliam Museum, Cambridge). The second edition is in the library at Berlin, where are also several autograph volumes of Froberger's dated 1649 and 1656, containing, amongst others, some of the pieces in the above collections. The State library at Vienna also

³ See *Zwei Briefe über J. J. Froberger* . . . by Dr. Edmund Schebek (Prague, 1874).

⁴ Two copies were in possession of the writer, one with Italian title, the other with Italian and German. The copies quoted in other works with dates 1696, 1714, are printed from the same plates but with different titles.

¹ So, and not Froberger, is the name spelt by Dr. E. Schebek.

² According to Mattheson.

contains a MS. of 222 sheets of Toccatas, Caprices, etc. (see *Q.-L.*). A large selection of the clavier and organ works was published in the *D.T.O.* (see *DENKMÄLER*), edited by Guido Adler; they were afterwards republished alone, in two volumes (Artaria, and Breitkopf & Härtel). F. G.

FRÖHLICH, DR. JOS. (b. Würzburg, May 28, 1780; d. there, Jan. 5, 1862), was a member of the court chapel in 1801. He founded a student's orchestra which gradually developed into an institute and eventually became the Royal Conservatoire. In 1812 he became professor at the university, retiring in 1854. The conductorship of the orchestra he had laid down in 1844, and in 1858 he retired also from his position as director of the institute. He composed masses, a Requiem, an opera, choral songs, symphonies, sonatas, etc., and wrote a biography of Abbé Vogler, musical and critical essays, a work on musical theory, tutors for the voice and for a number of instruments (*Riemann*; *Q.-L.*)

FRÖHLICH. There were four sisters of this name, all natives of Vienna.

The eldest, (1) **NANETTE** (Anna) (b. Sept. 19, 1793), a pupil of Hummel for the piano, and of Hauss and Siboni for singing, became an excellent artist in both branches. From 1819–1854 she was teacher of singing at the Conservatorium of Vienna, where she trained many dramatic and concert singers, since celebrated. She will be always gratefully remembered for having induced F. Schubert to write the following pieces: 'Gott ist mein Hirt' (Psalm xxiii.), op. 132; and 'Gott in der Natur,' op. 133, both for four-part female chorus; 'Nachthelle,' op. 134, for tenor solo and four-part male chorus; the Serenade ('Zögernd, leise'), op. 135, for alto solo and four-part female chorus; the Song of Miriam, op. 136; and Des Tages Weihe ('Schicksalslenker'), op. 146, for soprano solo and chorus. Grillparzer wrote the words for the Serenade and the Song of Miriam also at her instigation.

(2) **BARBARA** (b. Aug. 30, 1797) excelled both as a contralto singer and a painter of portraits and flowers. She married Ferdinand Bogner, a government employé and eminent flute-player, who was honorary professor at the Conservatorium from 1821 until his death in 1845.

(3) **JOSEPHINE** (b. Dec. 12, 1803; d. May 7, 1878), a distinguished singer, pupil of her sister at the Conservatorium (1819–21), made her début at concerts so successfully that she was immediately engaged for the court theatre (1821–22). Shortly afterwards, however, she went to Copenhagen, and completed her studies under Siboni, who had settled there. As a concert singer she was very well received in Denmark, Norway and Sweden, and was appointed private singer to the King of Denmark.

Later she went to Italy, and sang in the operas of Venice (1829) and Milan (1831) with brilliant success. The Società Apollinea of Venice elected her an honorary member.

(4) **KATHARINA** (b. June 10, 1800; d. Mar. 3, 1879), not a musician, was the intimate friend and associate of the Austrian poet Grillparzer, who was deeply susceptible to music and passed the greater part of his life in the house of these sisters until his death in 1872. C. F. P.

FROMM, ANDREAS, cantor and professor at the 'Fürstliche Pädagogium,' Stettin, in 1649. Eitner considers it doubtful whether he can be identified with the church dignitary with whom Gerber connects him, and who died at Leitmeritz in 1685. He composed the first hitherto known German oratorio 'Vom reichen Mann und Lazarus' (Stettin, 1649); also a 'Dialogus Pentecostalis' (*Q.-L.*; *Riemann*).

FROTTOLA, a type of early Italian song, of which 9 books, containing each on an average 64, were published by Petrucci at Venice between 1504 and 1509. Many of them are by Tromboncino, who so far may be called the Gordigiani of his day. The frottola¹ was essentially a popular melody, or street song, treated with a certain amount of contrivance. It stood midway between the complicated MADRIGAL (*q.v.*) and the 'Villotta' or 'Villanella,' which was a mere harmonisation of a tune; and in fact as the use of counterpoint increased it disappeared—its better elements went into the madrigal, its lower into the villanella. The words of the frottole were often comic (in fact the word is a synonym for a joke), but still oftener extremely sentimental. Ambros² cites some in which the song of the cicada and the mewing of a cat are imitated. The poem was in verses, sometimes very numerous. The music was set almost exclusively for four voices. Besides those printed at Venice, a book of 22 was published at Rome by Junte in 1526. See Ambros, as below; Eitner's *Bibliographie*; and Vogel's *Bibliothek der gedruckten weltlichen Vocalmusik Italiens*. G.

FROVO (FROUVO), JOÃO ALVARES (b. Lisbon, Nov. 16, 1602; d. there, Jan. 29, 1682). A Portuguese musician and writer on musical theory. He was a pupil of Duarte LOBO, whom he succeeded in 1647 as choirmaster of Lisbon Cathedral. In 1650 he became a clerk in the Treasury; he also held the post of librarian to John IV., whose great musical collection was destroyed in the Lisbon earthquake of 1755. His 'Discursos sobre a perfeição de Diathesaron' (Lisbon: A. Craesbeck, 1662) includes a discussion of certain aspects in the work of Morales with contributions by John IV. himself, and the interesting remark that the only piece of 'old' music worth the consideration of 'modern' musicians of his time was a

¹ Ambros, *Geschichte*, III. 464–89.

² *Ibid.* p. 478.

villancico by JUAN DEL ENZINA (*Pues que jamás olvidaros*). It is printed in the 'Cancionero musical de los siglos XV y XVI' (Madrid, 1890). The version given by Frovo is full of misprints, and his other musical examples are not recognisable. J. B. T.

FRUYTIERS, JAN, Flemish poet and musician of the 16th century, living at Antwerp in 1565. He was a Lutheran, and author of the words and music of 'Ecclesiasticus of de wijse sproken Jesu des soonen Syrach,' etc. (Antwerp, Selvius, 1565), a metrical translation of the book of Ecclesiasticus. The music is printed in the fine type of Plantin. This scarce book is the more remarkable as it was published by permission of Margaret of Parma, Governess of the Netherlands, only a few months before she enforced the decrees against the heretics which brought about the War of the Gueux. The melodies are chiefly popular Flemish airs. The 35th Canticque (Ecclus. xxiv.) is set to a French dance of the 15th century, called 'L'HOMME ARMÉ' (*q.v.*)—not to be confounded with the celebrated song of the same name, so often used as a theme for entire masses by composers of the 15th and 16th centuries. The song is in 3-2 time, the dance in 2-4, and in the form of a round. M. C. C.

FUCHS, ALOYS (b. Raase, Austrian Silesia, June 23, 1799; d. Vienna, Mar. 20, 1853), bass singer in the Imperial Chapel from 1836, and government employé in the war department at Vienna, remarkable as an ardent collector of autographs. His collection of music, books, portraits, etc., purchased out of a small salary by dint of rigid economy, contained specimens from all nations, though the Italian and German masters were most fully represented, and especially Mozart. These materials were partly used by Otto Jahn in his *Life* of that master. Fuchs contributed articles to several musical periodicals, and took a keen interest in everything connected with the history and literature of music. Severe illnesses compelled him to part with his treasures one by one, and thus his whole collection was scattered. Thalberg bought the remaining autographs; the Mozarteum a fair copy of Mozart's works; Grasnick of Berlin the collection of portraits; the ecclesiastical institution of Göttweig the library; and Butsch, the bookseller of Augsburg, the rest of the papers and biographical articles. C. F. P.

FUCHS, CARL (b. Offenbach, 1865), violoncellist, a pupil of Cossmann at the Frankfurt Conservatoire until 1886, when he studied at St. Petersburg under Davidov. He is now settled at Manchester, where he is a professor at the Royal College, soloist at the Hallé concerts, and member of the Brodsky Quartet. He is an excellent chamber-music player, and has published a *Violoncello Method* (3 vols., 1906). W. W. C.

FUCHS, FERDINAND KARL (b. Vienna, Feb. 11, 1811; d. there Jan. 7, 1848), a popular song-writer; produced two operas at Vienna in 1842. W. W. C.

FUCHS, GEORG FRIEDRICH (b. Mayence, Dec. 3, 1752; d. Paris, Oct. 9, 1821), won considerable fame as a clarinettist in his day. He was a professor at the Paris Conservatoire and composer of various works for wind instruments. W. W. C.

FUCHS, (1) JOHANN NEPOMUK (b. Frauenthal, May 5, 1842; d. Böslau, near Vienna, Oct. 5, 1899), an accomplished, all-round musician, held the appointment of Kapellmeister in various towns (from 1880 at the Vienna Opera). In 1894 he was appointed a director of the Vienna Conservatorium. He composed in 1872 the opera 'Zingara.'

(2) ROBERT (b. Frauenthal, Feb. 15, 1847; d. Feb. 1927), brother of the above, was appointed professor of theory at the Vienna Conservatoire in 1875. He is chiefly known as composer of 5 serenades for string orchestra. Among his other compositions are a symphony (op. 37 in C), a piano concerto, a Mass, several works for the chamber, and 2 operas. W. W. C.

FUCHS, KARL DORIS JOHANN (b. Potsdam, Oct. 22, 1838; d. Danzig, Aug. 27, 1922), pianist, conductor and critic. He was a pupil of his father, an organist, and was compelled to give lessons on the pianoforte whilst yet a collegian. In 1859 he was a student at the University of Berlin, and at the same time took lessons on the pianoforte under Von Bülow. Henceforth his life was divided between music and literature. In 1869 he was organist at Stralsund, and in 1870 took the degree of D.Ph. at Greifswald, his thesis being *Präliminarien zu einer Kritik der Tonkunst*. In 1871-1875 he lived in Berlin as pianist, teacher and critic; in 1875-79 at Hirschberg, where he founded a musical society of which he was the conductor; and in 1879 moved to Danzig, where he held several appointments. His leaning was towards philosophical analysis, a tendency which reacted on his playing, which was of the intellectual order. In conjunction with Hugo Riemann he wrote a *Praktische Anleitung zum Phrasieren* (1886) of which an English translation appeared in New York. His *Takt und Rhythmus in Choral* appeared in 1911. W. W. C.

FÜHRER, ROBERT (b. Prague, June 2, 1807; d. Vienna, Nov. 28, 1861), organist and composer. In 1839 he succeeded his master Wittasek as organist to the Cathedral at Prague. His irregular life, however, lost him the post, and in 1843 he left the town. In 1853-55 he was organist at Gmunden and Ischl, and then settled in Vienna where he died in great distress in a hospital. His compositions, published from 1830 in Prague and

Vienna, are numerous and good. (For list see *Fétis*.) They comprise masses, graduales, offertories, preludes, fugues, a method for the pedal-organ, a handbook for choirmasters, a *Praktische Anleitung zu Orgelcompositionen*, etc. Whatever his merits as a musician, however, he was a dishonest man, for he actually published Schubert's Mass in G under his own name (Marco Berra, Prague, 1846), a fact which requires no comment. M. C. C.

FÜLLSACK, ZACHARIAS, lutenist and trombone player in the Hamburg Council chapel from 1600-12; afterwards in the court chapel, Dresden. He published, together with Christoph Hildebrand, an interesting collection of pavans, galliards, etc., including many pieces by English composers (Hamburg, 1607) (Q.-L.).

FUENLLANA, MIGUEL DE (b. Navalcarnero, Madrid, beginning of 16th cent.), a blind Spanish lutenist, who greatly enriched the repertory and the technical resources of his instrument. In 1554 he published 'Orphenica Lyra', a quarto volume in tablature containing a number of original compositions and transcriptions of sacred and secular polyphonic music of his day. The full title of this work is as follows:

'Libro de musica para vihuela intitulado Orphenica Lyra en el qual se contienen muchas y diversas obras. Compuesto por Miguel de Fuenllana. Dirigido al muy alto y muy poderoso Señor don Philippe príncipe de España, rey de Inglaterra, de Nápoles, de Sicilia, etc. Fue impresso en Sevilla, en casa de Martin Montedueca . . . 1554. (Brit. Mus.; Bibl. Nat. and Bibl. Cons., Paris; Staatsbibl., Vienna, Innsbruck; Wiesbaden; Bibl. Nat., Madrid; Escorial)'

The method of tablature employed is the Italian; the top line represents the bottom string of the instrument—the bottom line, the top string. The frets are indicated by numerals instead of the letters usual in the English and French systems; '1' signifies the first fret, 'o' the open string. The voice-part, when there is one, is distinguished from the lute-accompaniment by the figures being printed in red. The book contains settings of old Spanish ballads, including the famous 'Ay de mí, Alhama,' which was translated into English by Byron. It is a fine setting of a good tune, and is intended here for a 4-stringed guitar, and not for a 5-stringed *vihuela*, or Spanish lute. The *villancicos* given may all be found in their original form for 3, 4 or 5 voices in the partbooks of Vasquez (Medinaceli Library, Madrid). There are also transcriptions of madrigals by Pedro Guerrero and other Spanish composers, Italian *Strambotti* (4 and 5 v.) by Arcadelt and Verdelot, and a quantity of church music, including fragments of masses by Morales, and motets by him otherwise unknown. Fuenllana's original *Fantasias* are dealt with by Riemann in *M.f.M.* xxvii. (1895), vi. 81-91 (v. also Morphy, *Les Luthistes espagnols*, Leipzig, 1902). J. B. T.

FUENTES, PASQUALE (b. Albaida, Valencia, Spain, beginning of 18th cent.); d. Valencia,

Apr. 26, 1768), maestro de capilla at first at the church of St. Andrea, and from 1757 at the cathedral of Valencia. Fétis gives a list of sacred and secular compositions, one of which, a 'Beatus vir' a 10, is printed in Esclava's *Lira sacro-hispana*. (Q.-L.)

FÜRSTENAU, a family of distinguished flautists and good musicians.

(1) CASPAR (b. Münster, Feb. 26, 1772; d. Oldenburg, May 11, 1819), was early left an orphan under the care of A. Romberg, who tried to force him to learn the bassoon, as well as the oboe, which he had been already taught; but his preference for the flute asserted itself and he shortly became so proficient as to support his family by playing in a military band, and in that of the Bishop. In 1793-94 he made a professional tour through Germany, and settled at Oldenburg, where he entered the court band, and gave lessons to the Duke. In 1811 the band was dispersed, and Caspar again travelled with his son.

(2) ANTON BERNHARD (b. Münster, Oct. 20, 1792; d. Dresden, Nov. 18, 1852), a finer flautist than his father, first appeared at a court concert in Oldenburg when only 7. He remained with his father, the two taking long journeys together. In 1817 he was engaged for the municipal orchestra of Frankfurt, from whence he removed in 1820 to Dresden, where he remained in the service of the King of Saxony till his death. In 1826 he accompanied Weber on his last journey to London, tended him with anxious care, and assisted him to undress the night before his death.¹ He composed several pieces and two Methods for the flute.

(3) MORITZ (b. Dresden, July 26, 1824; d. there, Mar. 25, 1889) his son, also a flautist, at 17 entered the royal band. He made some valuable contributions to the history of music, such as *Beiträge zur Geschichte der königlichen sächsischen musikalischen Capelle* (1849); *Zur Geschichte des Theaters und der Musik in Dresden*, 2 vols. (1861); and *Die Fabrication musikalischer Instrumente in Voigtlande* (1876). In 1852 he was appointed custos of the royal collections of music, and received the order of Albert of Saxony. From 1858 he was flute professor at the Dresden Conservatorium. F. G.

FUGATO, a name given to an irregularly fugued movement, in which the fugue-form is not strictly followed (especially as to strettos and pedal-points), though the structure is fugal and contrapuntal. Fugato passages are often introduced in orchestral music with the happiest effect, as in first and last movements of the Eroica Symphony, in the Allegretto of No. 7, both by Beethoven, and in the first movement of Mendelssohn's Italian Symphony, immediately after the double bar, etc. F. A. G. O.

¹ See Max Maria von Weber's Life of his father, II. 708.

FUGÈRE, LUCIEN (*b.* Paris, July 22, 1848), a baritone singer. He first took up sculpture, but failed at the Conservatoire, and became a commercial traveller interested in the theatre.

He made his début, Mar. 3, 1870, at the Café Concert Ba-ta-clan, Paris, where he created the celebrated march, 'Le Régiment de Sambre-et-Meuse,' by R. Planquette. Engaged by the Bouffes-Parisiens, Jan. 20, 1874, he played Offenbach's 'Mme. L'Archiduc.' He made his first appearance at the Opéra-Comique, Sept. 5, 1877, in 'Les Noces de Jeannette.' He came to notice in the rôle of Girod in Hérold's 'Le Pré aux Clercs'; Papageno in Mozart's 'Magic Flute' in 1879, and again in 1909; Figaro in 'The Marriage of Figaro,' 1882; Bartolo in 'Barbier de Séville,' 1884. Amongst his rôles were the Count ('Manon,' Massenet, 1884), Duc de Longueville ('La Basoche,' Messager, 1890), Dicéphale ('Phryné,' Saint-Saëns, 1893), Schaunard ('La Vie de Bohème,' Puccini, 1898), the father ('Louise,' Charpentier, 1900), the Devil ('Grisélidis,' Massenet, 1901), Boniface ('Le Jongleur de Notre-Dame,' Massenet, 1902), 'Le Bonhomme Jadis' (Dalcroze, 1906), Maître André ('Fortunio,' Messager, 1907); Ulysse ('Le Mariage de Télémaque,' Cl. Terrasse, 1910). At the Gaiety: Sancho ('Don Quixote,' Massenet, 1910), and Bernard ('Carmosine,' Février, 1913). From 1914-19, Fugère sang at this theatre. He returned to the Opéra-Comique, Dec. 20, 1919, reviving 'La Basoche'; and there he celebrated his artistic jubilee, in 'La serva padrona' (Pergolesi, Mar. 5, 1920). The doyen of living French singers, Fugère is Chevalier of the 'Légion d'honneur' (1898), he holds the medal of 1870; he is member of the examining board of the Conservatoire.

BIBL.—H. DE CURZON, *Croquis d'artistes* (1897), with portrait and *Nouvelle Revue* June 1920; *L'Album comique, dramatique et musical*, Dec. 1908, the number devoted to Fugère by Ricou, with illustrations and photographs; complete list of Fugère's parts since 1874.

J. P.

FUGHETTA, a short condensed fugue—a miniature fugue—correct and complete as to form, but with all its dimensions curtailed. No. 10 of Bach's thirty Variations is a Fughetta, as is also No. 24 of Beethoven's thirty-three Variations (op. 120). Both are in two sections, each repeated.

F. A. G. O.

FUGUE, a musical movement in which a definite number of parts or voices combine in stating and developing a single theme, the interest being cumulative.

This definition immediately suggests two points:

(1) The main idea of a fugue is that of one voice contrasting with others; not, as in the first movement of a sonata, of one section contrasting longitudinally with other sections. Indeed the fugal form may be said to be 'a question of texture rather than of design,'¹ and it has

even been suggested that the term 'a fugue' is incorrect and that we should rather speak of a composition being written 'in fugue,' just as we speak of a poem being written in hexameters. This essential of fugue brings us to the second point in our definition.

(2) It is essential that a fugue be conceived in a definite number of parts or voices²: two parts at least are obviously necessary, so that one may contrast with the other. It is possible to imagine an entirely melodic sonata; an entirely melodic fugue is a contradiction. For similar reasons a texture of harmonic blocks of chords is quite alien to the fugal form.

From what has been said it is clear that the fugue is of more artificial and less primitive origin than the 'cyclical' forms. The sonata form can be traced directly back to the folk-song (see FORM); the fugue seems to be descended from the contrapuntal experiments of mediæval monks. For this reason perhaps, and partly because fugue writing is so excellent a scholastic training, the idea has grown up that a fugue is necessarily dull and pedantic, justifying the famous aphorism that 'a fugue is a composition in which one voice runs away from the others and the hearer from them all.' It is surely clear that a form which has inspired the most magnificent music of the greatest composers must be something more than an academic exercise or an arbitrary collection of scholastic regulations. Indeed just as the 'rules' of the sonata have been shown to be based on deep principles which underlie the whole of musical form, so the rules of fugue may be shown to be based on principles equally deep.

The fugue, like every other form of art, has had its origin and development. In the 16th century the word meant a movement in canonic form; indeed the name 'canon' is merely short for 'fuga per canonem,' a fugue according to rule. In these times there were two species of fugue, the limited fugue, which was what we now call a strict canon, and the unlimited fugue which started canonically and soon broke off into free passages, with occasional points of imitation. It was the text-book of Fux (1725) which placed the fugue on its present basis, though still in a very simple and undeveloped form. Thus the way was prepared for J. S. Bach, who took the fugue form as set forth in Fux's *Gradus ad Parnassum* and applied to it the new key-system with its endless possibilities of modulation, enriching it at the same time with his boundless wealth of melodic and harmonic imagination. Bach rose superior to all the rules and regulations with which Fux had hedged in the fugue, and evolved out of Fux's skeleton the living fugue, the quintessence of fugue, freed from all the impurities of pedantry. From the time of Bach the word 'fugue' has

¹ D. F. Tovey, Lecture on Beethoven's 'Missä Solennis.'

² The term 'voice' is used throughout this article as the equivalent of 'part,' not necessarily a vocal part.

connoted a very definite musical form which will now be described.

As this is not a text-book, no attempt will be made to enumerate all the rules which are found in primers.¹ Only those factors of a fugue will be described here which are essential to its nature as set out in the above definition. All the principles enunciated will be referable to the examples set by great composers; they, and not the theorists, will be taken as the criterion.² Writers on music have a tendency to divorce theory from practice, and in no branch of the art is this the case more than in the fugue. It is an extraordinary thing that hardly any of the well-known treatises on fugue so much as mention Bach³; and one modern teacher, it is understood, actually used to forbid the study of Bach's fugues because they are 'contrary to the rules.'⁴

DESCRIPTION OF SUBJECTS.—We can now proceed to a detailed description of the fugal form. It is obvious that the theme on which the whole work hangs must be clearly and unequivocally presented at the outset, and this cannot be done better than by giving it to the voice or voices sufficient to enunciate it entirely unaccompanied. This is, as a matter of fact, the way in which a fugue does invariably start, and the theme thus propounded is called the 'subject.'⁵ The subject of a fugue must be of a character to arrest and hold the attention whenever it is heard. Cherubini's somewhat oracular remark, 'the subject must neither be too long nor too short,' really contains the nucleus of the matter. The subject must be long enough to contain a definite idea, it must not be so long that the memory cannot retain it. Here follow examples of the longest and shortest fugue subjects in Bach's *Wohl. Clavier*.

(a) 'Wohl. Clav.,' No. 34.

(b) 'Wohl. Clav.,' No. 4.

Although the subject is always announced by itself yet this does not mean that only one voice is heard at the beginning. The subject may be in two, three or even four parts, and in these cases the subject should be described

as a double, triple or quadruple subject. As a matter of fact fugues with subjects in two or more parts are usually called fugues on two subjects, or even double fugues, but it is plain that there can be only one subject to a fugue,⁶ and this subject, when it is in two or more parts, almost invariably makes its various appearances as a whole and not in its separate parts. The name 'double fugue' seems better applied to those cases where a secondary theme appears during the course of the movement (this will be dealt with later).

(a) HAYDN, 'Achieved is the glorious work,'
from the *Creation*.

Subject in 2 parts.

(b) LEO, 'Dixit Dominus.'

Subject in 3 parts.

(c) CHERUBINI, 'Et vitam.'

Subject in 4 parts.

Fugue subjects can be divided roughly into three classes:

1. Those that are in themselves complete melodies usually of a very definite rhythmical nature. In fugues on such subjects the interest of the fugue depends chiefly on the intrinsic beauty of the subject itself at its various appearances. Such subjects are usually called 'andamenti.' (See *ANDAMENTO*.)

2. Those which consist of some short passage with perhaps a characteristic interval. Such a subject is not necessarily beautiful in itself but becomes so when treated and developed in the course of the movement. Such subjects come under the class of 'sogetti.' (See *SOGETTO*.)

3. Those which consist merely of a short figure and are usually called 'attacco' (*q.v.*).

⁶ Cherubini recognises this and refuses to use the nomenclature 'fugue on two subjects,' saying that a fugue 'cannot have more than one principal subject.' He proposes to call such fugues 'fugues on one subject with one, two or three counter-subjects.'

¹ See Bibliography at end of this article.
² Prof. Prout is one of the few writers on fugue who have deliberately taken the works of the great masters as their standard.
³ Marpurg is an honourable exception.
⁴ Quoted in the preface to Prout's *Fugues*.
⁵ There is an apparent exception in the case of an 'accompanied fugue,' in which case the announcement of the subject is heard simultaneously with a full harmonic accompaniment. This will be dealt with later.

The 'attacco' seldom forms the subject of a complete fugue; there is, however, an example in Bach's *Wohlt temperiertes Clavier*, No. 27.

(a) BACH, Organ fugue G Minor
(andamento).

(b) BACH, 'Wohlt. Clav.,' No. 26 (soggetto).

(c) BACH, 'Wohlt. Clav.,' No. 27 (attacco).

The subject having been stated, another voice enters with an 'answer' to this statement. In most text-books the answer is described as an 'imitation' of the subject, and, this definition having been given, it is found necessary to employ several paragraphs in explaining that the answer is not an imitation but a modification of the subject. The truth is that the answer is not in its essence an imitation of the subject. The answer is what its name implies, a *reply*. The subject alone is a 'broken arc'; it requires the answer to complete the 'perfect round.' The subject and answer may be compared to the obverse and reverse of a medal.¹

OF ANSWERS.—This answering of the subject can be brought about in more than one way:

1. The answer may be a repetition of the subject in a different key. This is called a 'real' answer. If the subject is entirely in the tonic, the real answer is usually in the dominant (occa-

Sub. in dom.

Ans. in tonic.

¹ Rockstro describes the answer very well as a 'fore-shortening' of the subject.

sionally in the sub-dominant). If the subject is in the dominant, the real answer is in the tonic.

2. Recourse is frequently had to the universal feeling which divides the octave into two unequal portions at its fifth note, so that the interval of a fifth from tonic to dominant is felt to have its exact correlative in the interval of a fourth from dominant to tonic. It was this feeling that led the early ecclesiastical musicians to add to each 'authentic' mode, which was divided into two parts at its fifth note, a corresponding 'plagal' mode, starting at that fifth note, and itself divided into two parts at its fourth note, that is, the final of the authentic mode. This analogy between plagal and authentic seems to be universally perceived in music. This can be shown by the two following examples drawn from very different sources, neither of which can be suspected of being influenced by fugal considerations, since one is from a comic opera and the other from a German chorale.

(a) From *Dorothy*, CELLIER.

(1) Introduction.

(2) Opening chorus.

(b) From hymn tune 'Eisenach.'

In the same manner the answer to a fugue-subject is often compressed into the plagal or extended into the authentic compass, inversely according as the subject is authentic or plagal. An answer conceived on this plan is called a 'tonal' answer. Many rules are given in the text-books for finding the correct tonal answer to a fugue. It will serve our purpose better to give several examples of tonal answers by great composers to show the various modifications which they adopt. These examples will also prove how very far from being a mere imitation of the subject a fugue answer generally is. (See TONAL FUGUE, below.)

(b) No. VI.

Ans. by inv. and dim.

(c) No. VII.

Ans. by inv. and aug.

OF COUNTER-SUBJECTS.—While the second voice announces the answer, the first voice goes on its way in counterpoint with it. Sometimes this counterpoint takes the shape of a definite theme of which further use is made in the course of the fugue; it is then called a 'counter-subject.' The counter-subject is usually in double counterpoint with the subject, designed, that is, to appear either above or below it as occasion requires. A counter-subject is by no means an inalienable factor in a fugue; for instance seventeen of the forty-eight fugues of Bach's *Wohltemperirtes Clavier* have no regular counter-subject.

BACH, 'Wohltem. Clav.,' No. 44.

When the subject and answer have been thus propounded, the other voices enter in turn with subject or answer alternately. Sometimes the duet between the first two voices is lengthened by a few bars before the entry of the third voice: this small digression is called a 'codetta.'

HANDEL, 'And with His stripes,' *Messiah*.

THE EXPOSITION AS A WHOLE.—The complete statement of subject or answer by all the voices employed is called the 'exposition.' The exposition usually consists of subject and answer entering alternately¹ and one or more

¹ This is not invariable.

short codette. If there is a counter-subject, it appears in that voice which last had the subject or answer.¹ This fugal exposition is in itself such a very definite and unmistakable mode of expression that it is often introduced into choral and instrumental works which are not fugues. Such a torso is called a *fugato* passage or merely 'fugato.' Beethoven was particularly fond of the *fugato*; good examples are found in the slow movements of his first and seventh symphonies.

Now it is necessary, before the subject, as the hero of the plot, sets out on its career of adventure, that its nature and characteristics should be thoroughly impressed on the attention. Sometimes the exposition alone suffices for this; but sometimes an 'extra entry' of the subject is added at the end of the exposition before any modulation takes place: this most frequently happens in those fugues where the relative positions of subject and counter-subject have been the same throughout the various entries of the exposition. The extra entry then presents the subject in a new aspect with regard to the counter-subject.

BACH, 'Patrem' from *B Minor Mass*
(inner parts omitted).

Sometimes this extra entry is not enough by itself and the exposition is followed by a whole series of extra entries, a sort of complement to the exposition; this is called the 'counter-exposition.' In the counter-exposition the answer usually leads off, followed by the subject; sometimes both subject and answer are inverted in the counter-exposition² (e.g. Bach, *Wohlt. Clav.* No. 15).

THE MIDDLE SECTION.—Up to now there have been no serious modulations in the fugue, but when the exposition and counter-exposition are over, there begins what is known as the 'middle section' of the fugue. This consists of a contrapuntal web gradually leading through some definite scheme of modulations to the final section or climax of the fugue. This contrapuntal web consists of a series of episodes (usually founded on the main subject and counter-subject) interspersed with entries of the subject in various new situations and guises. At the time when the rules of fugue were crystallised by Fux, modulations were of a very

mild nature and as a consequence the later theorists, regardless of musical progress, have strictly circumscribed the modulations which a fugue writer 'is allowed' to make. It need hardly be said that the rules for fugal modulation are of no more value than any of the other arbitrary rules of fugue. Not a single one of the fugues, either in the *Wohltemperiertes Clavier* or in the *Kunst der Fuge*, follows the scheme of modulation which was afterwards prescribed by Cherubini.³

The various ways in which the successive entries of subject, answer, and counter-subject are made to grow in interest during the middle section of a fugue have been codified into a scheme of *devices*, which may be summarised as follows:

(a) The subject and counter-subject may be themselves altered (i.) by AUGMENTATION, (ii.) by DIMINUTION, (iii.) by INVERSION, (iv.) by 'CANCRIZANS' motion (q.v.).

(a) R. STRAUSS, 'Also Sprach Zarathustra.'

(b) BACH, 'Wohlt. Clav.,' No. 33.

Sub. inv. and dim.

¹ The counter-subject originally appears as a counterpoint to the answer; therefore when it accompanies the subject it often has to be modified. This modified form bears the same relation to the original counter-subject as the subject bears to the answer, and might well be called the 'counter-answer,' but this term is never used.

² Sometimes exposition and counter-exposition are separated by an episode, e.g. *Wohlt. Clav.* No. 11.

³ Cherubini's rules for modulation are as follows: When the fugue is in a major key—dominant, relative minor, sub-dominant, super-tonic minor, mediant minor, dominant. When the fugue is in a minor key—mediant major, dominant minor, or sub-mediante major, or sub-dominant minor, or seventh major.

(c) BACH, 'Wohlt. Clav.,' No. 20.

(d) BEETHOVEN, Pf. Sonata, op. 106.
Subject.

Part of subject in 'caucrizans' motion.

(b) The subject with its various counter-subjects can be presented inverted in double counterpoint at various intervals (usually the octave, tenth or twelfth).

MOZART, 'Kyrie,' *Requiem*.

Parts inverted at the 12th.

(c) The device of STRETTO may be made use of. Stretto is defined by Cherubini as 'a device which consists in bringing the entrance of the response nearer to that of the subject'; to which it may be added that a stretto often consists in introducing a second entry of the subject instead of the answer at these close quarters. This 'hurried' introduction of the answer can often be introduced at more than one point of the subject, as the following examples will explain. When the entrance of the answer follows close on that of the subject, it is said to be a 'close' stretto. A stretto in which all the voices take part, and in which each voice takes up subject or answer in turn in their entirety and without any modification, is called a masterly stretto or 'stretto maestrale.'

BACH, 'Wohlt. Clav.,' No. 38.

The device of stretto may also be combined with the various other devices of augmentation, etc., just described. A good example of stretto combined with augmentation will be found in the fugue 'Cum Sancto' from Beethoven's 'Missa Solennis.'

The emotional effect of stretto is obvious, and the closer the stretto the greater the excitement produced. Therefore, where more than one stretto is employed in a fugue, the simpler is usually placed first, and the closest and most elaborate is kept till later, so that the fugue may grow in interest.

(d) Sometimes one or two subsidiary subjects are introduced in the course of the fugue. These may be introduced in one of two ways; (i.) by a regular fugal exposition in the middle of the fugue, as in Bach's organ fugue in C minor (Peters' edition, vol. iv.). (ii.) They can be imposed on the normal flow of the counterpoint as

in the fourth fugue (C \sharp minor) of the *Wohlttemperiertes Clavier*. Such fugues are very properly called double or triple fugues.

In the middle section of a fugue the composer is usually said to be 'free' to proceed as he likes: this is only true in so far as it means that no hard-and-fast regulations can be laid down for his guidance at this point; but it is just here that in reality the composer is most emphatically not free, except in so far as every composer is always free. If he wishes to make his fugue an organic and inevitable whole, then it is especially in these 'free' passages that he must keep the direction and tendency of the whole movement most clearly in his mind.

CLIMAX AND CODA.—After the wanderings of the middle section there follows a natural desire for home, but home under a new aspect, looked at with eyes which have witnessed all the wonderful developments of which the infant theme has become capable as it reaches maturity. This is the climax of the fugue, and is usually heralded by a return to the original key. The climax, then, is the place where the subject will be presented in its most exciting aspect. If there are several strettos in the fugue, the closest or most elaborate will be reserved for this point: if there is only one stretto, the composer will probably place it here. Indeed this portion of the fugue is often called the stretto, but a stretto is by no means universal in a fugue; in many of Bach's fugues the climax is marked by an emphatic entry of the subject in the principal key. In a double or triple fugue the climax is usually marked by the combination of all the subjects previously announced separately.

After the climax comes a peroration or coda. This very often contains a 'pedal' on the dominant and sometimes also on the tonic. In many cases, right at the close, the contrapuntal texture gives way to massive blocks of harmony (e.g. Mendelssohn, 42nd Psalm). Sometimes the end takes the form of an elaborate cadenza, as in Bach's organ fugue in C minor (Peters, vol. iv.).

Before ending this description of the fugal form two slight variants must be noticed:

(1) **THE FUGUE ON A CHORAL.**—There are two species of this form:

(a) Where the fugue pursues its normal course, the Choral being superimposed as a canto fermo or an episode during its development (e.g. Mendelssohn, 3rd organ sonata, 1st movement).

(b) Where each line of the Choral-melody is made the climax of a short fugal passage. The fugal matter being founded on the Choral (e.g. Bach's fugue on 'Durch Adam's Fall').

(2) **THE ACCOMPANIED FUGUE.**—A fugue is sometimes accompanied; that is to say, that besides the regular fugal exposition and development there are independent parts for other voices or instruments. The usual form of

accompanied fugue consists of a normal fugue sung by a choir of voices, while an orchestra plays a partly independent accompaniment. Examples are the 'Cum sancto Spiritu' from Schubert's Mass in F, and the last chorus of Parry's 'Judith.' In an accompanied fugue the texture of the fugal parts is often much looser than in the ordinary fugue. In many of Handel's accompanied fugues the first voice after giving out the subject is silent, while the second voice sings the answer, e.g. 'And He shall purify' ('Messiah').

This then is the construction of a fugue as generally understood. It will be noticed that it falls into three sections: exposition, middle section, and climax (or stretto). These three sections coincide with the design usually described by the formula A.B.A. under which nearly every piece of music may be said to fall. This has led some theorists to trace a connexion between the fugal and the sonata forms,¹ but in reality there is no more intimate connexion between them than the very vague similarity just mentioned, which applies equally to every other musical form. The fugue is essentially contrapuntal in its texture, while a sonata-movement is harmonic. In a fugue there is no break, a cadence is only the signal for a fresh start. The sonata-movement is, on the other hand, by nature broken up into sections. A sonata-movement may be said to be sewn together, a fugue to be woven. It is, however, quite true that the sonata form has been occasionally affected by fugal considerations, as in Beethoven's sonatas, opp. 101, 110 and 111.² In the same way the prelude to Wagner's 'Die Meistersinger' is a well-known instance of a movement where three subjects are at first presented separately and harmonically as in a sonata, and afterwards combined as if in the stretto of a triple fugue.

The art of fugue has found its greatest exponent in the works of J. S. Bach. Haydn and Mozart seem to have known little of Bach and his works. Moreover, their ideas seemed to shape themselves naturally in those cyclic forms which were developing into the great symphonic form of Beethoven. Their fugues, fine as they are, seem to have been written textbook in hand, and not to be a natural mode of expression. The result is that the fugues of Haydn and Mozart actually seem old-fashioned compared with those of Bach, and more academic in their feeling. The same may be said of Cherubini and, in spite of their splendour, of Beethoven's fugues. Perhaps Bach was attracted to the fugal means of expression because of its romantic possibilities. The definite decorative scheme of the sonata form, with its strongly contrasted sections, is eminently fitted for absolute music—music which stands for itself and by

¹ Prout, *Fugue*, chap. ix.
² Hadow, *Sonata Form*, chap. xi.

itself. Absolute music depends on contrast of mood; but the essence of romantic music is that some idea or mood from without is grafted on to the musical stem. Such a scheme as this demands unity of mood, some central idea running through the whole, surrounded by attendant episodes, the whole in a sort of chiaroscuro. This is certainly the principle which underlies the fugal form, and it is also the principle which underlies the various forms in which the romantic composers found it necessary to express themselves. Can we not trace an analogous emotional need and an analogous means of expression in the fugues of Bach on the one hand, and on the other in Schumann's piano-forte concerto with its single theme, in his C major fantasia with its 'leiser Ton,'¹ in the persistent melancholy figures of Chopin's preludes, in the 'idée fixe' of Berlioz, and above all in the 'Leitmotiv' of Wagner's music-dramas? Perhaps Wagner's Leitmotiv compares more closely with a canto fermo than with a fugue subject, and we can trace a most interesting parallel between the Leitmotiv of Wagner and the fugue-on-Choral of Bach. The introduction of a chorale as a canto fermo in a fugue only makes its due emotional effect when the chorale is well known to the hearers,² otherwise its introduction will be quite pointless. Thus the introduction of the Choral is to a certain extent dramatic in its emotional effect. In the same way a Leitmotiv imposed on the polyphonic web of Wagner's music makes its effect largely because of its dramatic power produced by force of association.

FUHRMANN, GEORG LEOPOLD, lutenist, engraver, bookseller and citizen at Nuremberg c. 1606-16. He published in 1615 a book of lute pieces 'Testudo Gallo-Germanica,' with pieces by J. and R. Dowland (*Q.-L.*).

FULDA, ADAM DE (b. circa 1450), a Franciscan monk, is chiefly celebrated for a famous Tract on Music, written in 1490, and printed by Gerbert von Hornan in his *Scriptores eccles.*

¹ The motto of Schumann's fantasia could be equally well illustrated by one of Bach's fugues.

² It may be objected that modern audiences do experience a decided emotional thrill at the introduction of the Choral, for instance in Mendelssohn's E minor fugue, without being at all familiar with the tune, but even in this case they do recognise that it is a chorale. It calls up associations of church worship and a great crowd singing, and the effect is to this extent dramatic.

de mus. sacr. vol. iii. p. 329. In this work Guilielmus Dufay is eulogised as the first composer who wrote in regular form; and mention is made of the fact that he overstepped the F ut, and e la, of Guido, by three degrees, below and above. The *Dodecachordon* of Glareanus contains a Motet a 4, by Adam de Fulda, of very advanced character for the period; and an *Enchiridion*, published at Magdeburg, in 1673, contains a Motet 'Ach hilf mich layd und senlich klag.' (See list of MS. compositions in *Q.-L.*, where it is pointed out that his reference to himself as 'musicus ducalis' indicates that he held a court position, possibly in the service of the Bishop of Würzburg.) W. S. R.

FULLER MAITLAND, JOHN ALEXANDER, F.S.A. (b. London, Apr. 7, 1856), editor of the second edition of this Dictionary, was for 22 years musical critic of *The Times*. He is the author of many important books on musical subjects, and his archæological research has borne fruit in sundry collections of old English music.

Fuller Maitland was educated at Westminster School and Trinity College, Cambridge. At the latter he came under the invaluable influence of Stanford, who then was creating a new musical life in the University. On leaving Cambridge (M.A. 1882) Fuller Maitland studied the piano with Dannreuther but more especially with W. S. Rockstro, who also directed his interest towards archæological matters. His journalistic career was begun as musical critic to the *Pall Mall Gazette* (1882-84). Five years on the *Guardian* (1884-89) followed before he succeeded Hueffer as musical critic to *The Times* (1889-1911). It is worth noting that throughout these busy years Fuller Maitland found time to keep up his playing both of the piano and the harpsichord. He made numerous public appearances as an amateur player of both instruments, and his known ability as an executant contributed to the position of authority which he gained as a critic. He was among the pioneers of the revival in English folk-song, and as early as 1893 published with Miss L. E. Broadwood 'English County Songs,' a collection which became exceedingly popular. In the following year he was one of the founders of the Folk-song Society (*q.v.*), and about the same time lectured on the subject at the Royal Institution.

Meantime his archæological work had begun with the preparation of the Catalogue of the music in the Fitzwilliam Museum at Cambridge, finished in 1887 though not published till 1893. A volume of 'English Carols of the 15th Century' in collaboration with W. S. Rockstro, appeared in 1893, and the 'Fitzwilliam Virginal Book,' the most valuable collection of English virginal music of the Elizabethan era, followed in 1899. This was done in col-

laboration with his brother-in-law, W. Barclay SQUIRE (*q.v.*). Much later, that is, since his retirement from *The Times*, Fuller Maitland, with Barclay Squire, has continued this line of activity in 'Twenty-five Pieces from B. Cosyn's Virginal Book,' and 'Fourteen Pieces,' by William Byrd (both 1923); he has also produced an album of Pieces by the contemporaries of Purcell, 8 Preludes by Couperin and numerous arrangements of old songs. As a member of the editorial committee of the PURCELL SOCIETY (*q.v.*) Fuller Maitland edited various volumes, and also arranged the vocal score of 'King Arthur' for the Birmingham Festival performance of 1897.

These publications, together with the list of books given below, sufficiently indicate the main lines of Fuller Maitland's musical interests. One may be drawn through English music from Byrd by way of Purcell to the 19th-century school of which Parry and Stanford are typical; the other through German music from Bach to Brahms. He translated with Mrs. Clara Bell, Spitta's monumental *Life of Bach*, and the fourth volume of *The Oxford History of Music* dealing with Bach's period was fitly placed in his hands. His book on Brahms is the most important critical study of that composer in the English language. His work in regard to all these masters, whether as editor or as critic, has very greatly enriched the resources of musicians.

His long association with this Dictionary indicates an even wider range of knowledge. His name first appears as a contributor to the second volume of the first edition (1880) and in 1889 he edited the important appendix to that edition. When a complete revision was called for after the death of Sir George Grove it was the natural course to place the whole matter in the hands of Fuller Maitland, and he produced (1904-10) an edition in five volumes, replacing the former one in four.

Fuller Maitland is a member of the Council of the R.C.M. and an Associate of the Belgian Académie Royale des Beaux-Arts. The following is a list of his literary works:

- 1884. *Schumann*.
- 1894. *Masters of German Music*.
- 1899. *The Musicians's Pilgrimage*.
- 1902. *English Music of the XIXth Century*.
- 1903. *The Age of Bach and Handel*. (*Oxf. Hist. Mus.* vol. iv.)
- 1905. *Joseph Joachim*.
- 1911. *Brahms*.
- 1915. *The Consort of Music*.
- 1924. *The Suites of Bach*.

c.

FULL ORCHESTRA. A term used to mean an orchestra containing the full complement of woodwind, brass with drums and strings. What constituted the full complement was always a little vague, especially with regard to brass and percussion, but the orchestra of Beethoven was accepted as the normal standard. It must, therefore, be distinguished from the German, *Grosses Orchester*, as used by Richard Strauss and others. Since the modern

enlargement of the orchestra the term 'Full Orchestra' has lost its definitive meaning. c.

FULL ORGAN. This term, when standing alone, generally signifies that the chief manual, or Great Organ, is to be used, with all its stops brought into requisition. Sometimes the term is employed in an abbreviated form, and with an affix indicating that a portion only of the stops is to be played upon—as 'Full to Fifteenth.' In the 18th century the expressions 'Full Organ,' 'Great Organ,' and 'Loud Organ,' were severally used to indicate the chief manual organ. (See ORGAN.) E. J. H.

FUMAGALLI (1) ADOLFO (*b.* Inzago, Milan, Oct. 19, 1828; *d.* Florence, May 3, 1856), pianist and composer, received instruction in music and the pianoforte from Angeloni at the Conservatorio, Milan, and in 1848 made his début in that town as a pianist. He made a great success afterwards as a brilliant fantasia player at Turin, Paris and Belgium, and in 1854 returned to Italy. He died quite suddenly, after a three days' illness, having played at a concert in Florence on the 1st. His compositions include fantasias, capriccios and other light drawing-room pieces, among which 'Les Clochettes,' op. 21 (with orchestra), was popular at the time. His brothers (2) DISMA (1826-93), (3) POLIBIO (*b.* 1830), and (4) LUCA (*b.* May 29, 1837; *d.* Milan, June 11, 1908) were also pianists; of these the best known is Luca. In 1860 he played in Paris. In 1875 an opera of his, 'Luigi XI,' was produced at the Pergola, Florence. A. C.

FUNDAMENTAL BASS is the root note of a chord, or the root notes of a succession of chords, which might happen to be the actual bass of a short succession of chords all in their first positions, but is more likely to be partly imaginary, as in the following example, which has its fundamental bass below on a separate staff:

Fundamental Bass.

Rameau was the first to develop the theory of a fundamental bass, and held that it might 'as a general rule proceed only in perfect Fourths or Fifths upwards or downwards.' Helmholtz defines it as 'the compound tone which represents the chord, as distinguished from its *bass*, that is, the tone which belongs to the lowest part.'

C. H. H. P.

FURIANT, a movement of a fiery, impulsive character, such as would be classed under the general name of scherzo. Like 'Dumka,' it has been introduced into the terminology of classical music by Dvořák, who uses both frequently in his chamber music.

FURNO, GIOVANNI (b. Capua, Jan. 1, 1748; d. Naples, June 20, 1837), teacher of composition at several Naples conservatoires and master of Bellini, Mercadante, Costa and other distinguished composers (*Riemann*; *Q.-L.*).

FURTWÄNGLER, WILHELM (b. Berlin, Jan. 25, 1886), has attained eminence as an orchestral conductor.

The son of Adolf Furtwängler, professor of archaeology in Berlin University, he began music study in Munich at the age of 8 years, was a pupil of Rheinberger and later of Max Schillings and gained his early experience with the orchestra at Zürich, Strassburg and Lübeck. In 1915 he got his first big opportunity as an operatic and concert conductor at Mannheim. He followed Bodanzky there when the latter migrated to New York. This was the beginning of Furtwängler's success in a series of important posts which included the 'Tonkünstler' Orchestra of Vienna (1919), the symphony concerts of the Berlin 'Staatsoper' orchestra (1920-22), as well as a season's concerts at Frankfurt (*Riemann*). The choice of Furtwängler to follow Nikisch as conductor of the famous 'Gewandhaus' concerts at Leipzig and of the Berlin Philharmonic (1922) marked him definitely as one of the leading artists in his generation. He began to visit England in 1924 and made his first appearance here with the orchestra of the Royal Philharmonic Society (Jan. 24) when his programme contained Strauss's 'Don Juan,' Brahms's first symphony and a Concerto Grosso of Handel. A second concert with the London Symphony Orchestra containing Strauss's 'Ein Heldenleben' followed on Feb. 4. He was subsequently engaged by both these societies to conduct certain of their concerts in the season 1924-25.

Furtwängler's eminence seems to rest on the completeness of his knowledge both of the orchestra and of the music he directs, by which he is able to adjust means to their end, the playing of individuals to an interpretative ensemble. His own assurance gives his players confidence, and the English players (by no means always amenable to newcomers) instantly accepted him in consequence. Control and balance are prominent characteristics of his conducting, his interpretations though full of vitality are not impulsive, and his personal manner at the conductor's desk is usually restrained. C.

FUSÉE, another name for the COULADE (*q.v.*). E. B.

FUX, JOHANN JOSEPH (b. Hirtenfeld, near Gratz, Styria, 1660; d. Vienna, Feb. 13, 1741), composer, whose modern fame rests primarily on the fact that in his *Gradus ad Parnassum* he formulated rules of contrapuntal composition which dominated the educational system for nearly two centuries. (See COUNTERPOINT; FUGUE.)

Fux came of a peasant family in the hamlet of Hirtenfeld. Nothing is known of his early life or studies, as he refused to give information on the subject even to Mattheson for his *Grundlage einer Ehrenpforte*.¹ From 1696, however, all is clear. In that year he was appointed organist to the ecclesiastical foundation 'Zu den Schotten' in Vienna; and married a Viennese, by whom he had no children. In 1698 he became court composer, in 1705 second, and in 1712 first, Kapellmeister to the cathedral of St. Stephen. In 1713 he was appointed vice-Kapellmeister to the court, and Kapellmeister to the Dowager Empress Wilhelmine Amalie. This post he resigned in 1718, as he had done that at the cathedral in 1715 upon his promotion to be head Kapellmeister to the court. He received many proofs of court favour. To the King of the Romans—Archduke, afterwards Emperor, Joseph I.—he dedicated his first opus, *Concentus musico-instrumentalis* in seven partitas (Felsecker, Nuremberg, 1701),² and the 'Missa Canonica' (1718); and to the Emperor Charles VI. his most important work *Gradus ad Parnassum* (1725). In 1723, when laid up with gout, the Emperor Charles had him conveyed in a litter to Prague, that he might be present at the performance of his opera 'Costanza e Fortezza,' written for the coronation. Fux was buried at St. Stephen's, Vienna. Among his best pupils were Zelenka, Muffat, Tuma and Wagenseil. An oil-painting of him in the costume of the period is in the museum of the Gesellschaft der Musikfreunde at Vienna.

Fux considered his art in a serious light, and was held in general respect. He was courteous to all, and eminently kind and just in his dealings with the musicians under him. As a composer he was most industrious; 405 works by him are still in existence: 50 masses; 3 Requiems; 57 vespers and psalms; 22 litanies and completoria; 12 graduals; 14 offertoriums; 22 motets; 106 hymns; 2 Dics irae; 1 Domine; 1 Libera (290 church-works in all); 10 oratorios; 18 operas (of which 6 were grand operas—'dramme per musica'—and the other 12 'componimenti per camera' and 'feste teatrali per musica'); 29 partitas and overtures; and 8 pieces for clavier (see also list in *Q.-L.*). The greater part of these compositions, either copied or in autograph, are in the State Library at Vienna; and the Gesellschaft der Musikfreunde also possesses a considerable number.

Of his works only few are printed: his *Concentus*, already mentioned, 'Elisa,' festa teatrale (Jeanne Roger, Amsterdam, 1719), and the 'Missa Canonica' (see below). Proske's *Musica divina*, vols. ii. and iii., contain seven church works. Specimens of his masses, motets and

¹ Hamburg, 1740; see p. 340, letter dated 1718.

² See H. Rietach, *Der 'Concentus' von J. J. Fux*. B. 2. *MW*, Heft 4, 1916.

instrumental compositions¹ are to be found in the *D.T.Ö.* (I. i., II. i., and IX. ii.). Thirty-six Trios for two violins and bass (published about 1700) are lost. His dramatic works in their day contributed much to the lustre of the court; the opera, 'Costanza e Fortezza,' has been republished (*D.T.Ö.*, xvii.) edited by Egon Wellesz. His oratorios, written for Lent, were quickly forgotten. Among his MSS. are thirty-eight sacred 'Sonate a tre,' which were often played in divine service, and are masterpieces of freshness, invention and variety. It is evident that Fux enjoyed 3-part writing, for in his *Gradus* he says 'the master's hand may always be detected even in 3-part writing,' and 'I have often written in three parts, and not unsuccessfully,' a statement which even Mattheson² endorses, though he was as a rule no friend to Fux.

In his church music he was always reverent, and though polyphonic writing was second nature to him, he usually abstained from unnecessary subtleties in sacred music. One exception to this must, however, be made. His 'Missa Canonica,' written throughout 'a cappella,' a masterpiece containing every species of canon, is unique in its way. Here Fux displays his marvellous knowledge of counterpoint, combined with the richest modulation; and, as Marpurg³ says, speaking specially of the double canon in the 'Christe eleison,' 'his harmony is gorgeous, and at the same time thoroughly in keeping with the sacredness of the occasion.' The Mass is dedicated to the Emperor as a proof 'that classic music, far from being extinct, has here gained one more step in advance' (see dedication in Italian). The Imperial Library at Vienna contains a copy of it by Michael Haydn (1757), and the

State Library at Dresden another by Zelenka, Fux's pupil. It has been printed at Leipzig by Peters and Kühnel. The frequent performances of this Mass at the cathedral and the court speak well for the efficiency of the singers.

The most convincing proof of Fux's ability as a teacher is his *Gradus ad Parnassum*, written in Latin in the form of a dialogue between master and pupil, and consisting of two parts, the first on the theory, and the second on the practice, of composition. It has passed through innumerable editions, and been translated into four languages. The dates of publication are as follows: the original, in Latin, Vienna, 1725; German edition, by Lorenz Mizler, Leipzig, 1742; Italian, by Alessandro Manfredi, Carpi, 1761; French, by Sieur Pietro Denis, Paris, 1773; and English, anonymous, London, 1791. Its usefulness has been attested by such men as Piccinni, Durante, P. Martini, the Abbé Vogler, Paolucci, Gerbert, Cherubini, and later by Heinrich Bellermann (*Der Contrapunct*, etc. Berlin, 1862). Mozart used it in his contrapuntal exercises, and Haydn repeatedly studied it, and founded his teaching upon it. An exhaustive biography of the master, with a thematic catalogue of his compositions, was drawn up with his usual accuracy by Dr. von Köchel from authentic information, with the title *J. J. Fux, Hof-compositor und Hofkapellmeister der Kaiser Leopold I., Joseph I., und Karl VI., von 1698 bis 1740* (Hölder, Vienna, 1872). C. F. P.

FZ, the abbreviation of the Italian word *forzando*, meaning that the note or chord against which it is placed should be *forced* beyond the normal sound of the passage. It is always proportionate; and thus a *fz* in a *piano* passage will be far less loud than in a *forte* passage. *sfz* or *sf* (*sforzando*) is more commonly used than *fz*. G.

¹ See Vita Halpern, *Die Suiten von J. J. Fux*. Vienna Dissertation, 1917.

² *Critica musica*, i. p. 131.

³ *Abhandlung von der Fuge*, p. 130.

G, the name of the fifth degree of the natural scale of C both in English and German, the name in French and Italian being Sol.

Further nomenclature is as follows:

ENGLISH.	FRENCH.	GERMAN.	ITALIAN.
G flat.	Sol bémol.	Ges.	Sol bemolle.
G double flat.	Sol double bémol.	Geses.	Sol doppio bemolle.
G sharp.	Sol dièse.	Gis.	Sol diesis.
G double sharp.	Sol double dièse.	Gisis.	Sol doppio diesis.

In the modal system G is the final of modes VII. and VIII., Mixolydian and Hypomixolydian, the dominant of mode XIII. (XI.), Ionian, and the theoretical dominant of mode XI., Locrian.

The G clef is the treble clef (see CLEF). The Greek *gamma* gives its name to the gamut or scale.

GABLER, JOHANN (*d. circa* 1784), of Ulm, built the celebrated organ in the abbey of Weingarten in 1750. It has 4 manuals, and 62¹ speaking stops, and is credited with 6666 pipes. It is also said that the monks were so pleased with it that they gave Gabler a florin per pipe over and above the contract price. v. de P.

GABRIEL (15th-16th cent.). 'Gabriel the musician' appears as the composer of 19 compositions for 3 and 4 v. in the 'Cancionero musical' of about 1500, published by Barbieri in 1890. He also appears as a poet in the 'Cancionero general de 1511,' where he is described as a singer in the Capilla Real under Ferdinand the Catholic (*d.* 1516). He afterwards passed to the service of the Admiral of Castille, D. Padrique Enriquez. His surname may have been Mena. J. B. T.

GABRIEL, MARY ANN VIRGINIA (*b.* Bantstead, Surrey, Feb. 7, 1825; *d.* Aug. 7, 1877), learned the piano from Pixis, Döhler and Thalberg, and harmony and construction from Molique. Her principal work was a Cantata named 'Evangeline,' founded on Longfellow's poem; she wrote many operettas, one of which, 'Widows bewitched,' was performed by the German Reed Company in 1867, and had a long run. Her cantatas 'Dreamland' and 'Evangeline' were performed at Covent Garden in 1870 and 1873. Many of her songs were very popular. Miss Gabriel was of Irish parentage. She married George E. March (author of most of her librettos) in Nov. 1874. G.

GABRIELI, a family of great Italian musicians.

(1) ANDREA (*b.* Venice, c. 1510; *d.* 1586), celebrated contrapuntist, born in the quarter of Venice called Canareggio. He was a pupil of Adrian Willaert, maestro di cappella of St. Mark's (1527-62). In 1536 he entered the Doge's choir; in 1566 succeeded Claudio Merulo as second organist of St. Mark's, and at the time

of his death was first organist. His fame spread not only throughout Italy, but also to Germany and the Netherlands. His three best-known pupils were his nephew Giovanni, Leo Hassler and Peter Sweelinck. In 1574 the Republic commissioned him to write the music to be performed at the reception of Henry III., King of France, for which occasion he composed several pieces, one being for 12 voices in two choirs, 'Ecco Vinegia bella,' printed in the *Gemma musicalis* (Venice, Gardano, 1588). His finest work is 'Psalmi Davidici, qui poenitentiales nuncupantur, tum omnis generis instrumentorum, tum ad vocis modulationem accommodati, sex vocum' (Venice, 1583). He edited a collection of 'Greghesche' by various composers, in 1564, under the pseudonym Manoli Blessi, and afterwards (1571) acknowledged his identity. Among his numerous compositions may be mentioned:

'Sacrae cantiones quinque vocum, liber primus' (1565); 'Madrigali, lib. 1, a b' (1566); 'lib. 2, a b, c e d' (1570); 'Missarum sex vocum, liber primus' (1572); 'Canzoni alla francese per l'organo' (1571); 'Madrigali a 6 voci' (1574); and 'a 3' (1578); 'Cantiones eclesiasticæ' (1576); and 'Canti concerti a 6, 7, 8, 10 e 16 voci' (1587).

In the last are ten pieces by his nephew. He wrote music to the choruses in 'Oedipus Tyrannus' in 1585, and they were printed in 1588; also a set of 'Mascherate' (1601). Six of his vocal works are in vol. ii. of Torchi's *Arte musicale in Italia*, and four organ pieces in vol. iii. An 8-part *Ricercate*, edited by H. Riemann, is published by Augener. (See Q.-L. for detailed list.) His organ music was printed with his nephew's in 3 vols. of *Ricercari* (1593-1596). Andrea seems to have felt strongly the necessity for executing vocal music on instruments. Proske's *Musica divina* contains a missa brevis and no fewer than ten motets of his, all for 4 voices.

(2) GIOVANNI (*b.* Venice, 1557; *d. circa* 1612²), pupil of his uncle Andrea, by 1575 already well known as a composer, succeeded Claudio Merulo as first organist of St. Mark's, Jan. 1, 1585. Although he seems never to have left Venice he was well known throughout the civilised world. The works of his pupils, Heinrich Schütz, Alois Grani and Michael Praetorius, testify to the deep respect they all entertained for him. His contrapuntal facility was extraordinary; his 'Sacrae symphoniae' (1597) contains motets for various numbers of voices, up to 16, and in the similar collection of 1615, 19 parts are employed. The first part of the *Symphoniae* is dedicated to Count George Fugger, in acknowledgment of his having invited Gabrieli to his wedding. The necessity for the orchestra is

¹ He died probably in 1612, as Gianpaolo Savii succeeded him on Aug. 12 of that year, but his monument in San Stefano gives Aug. 12, 1613, as the date of his death.

² This assumes that he was identical with the Giovanni d'Andrea Gabrieli who was one of the musicians of the Duke of Bavaria in that year. This identity is disputed by Eitner in Q.-L.

still more marked in Giovanni than in his uncle Andrea; his modulations are often so bold and difficult that we can scarcely believe they were ever intended for voices. For particulars of his times and contemporaries see Winterfeld's *Johann Gabrieli und seine Zeit* (1834), two vols. of text and one vol. of examples, containing 23 pieces for voices (from 4 to 16), one for organ, and one for quartet. Others will be found in Bodenschatz; Rochlitz; in *Musica sacra* (Schlesinger, 1834), etc. Rochlitz's Collection (Schott) contains an In Excelsis of his for soprano and tenor solo, and chorus (*a* 4), with violins, three horns and two trombones; also a Benedictus for three choirs. Five vocal works are in Torchi's *Arte musicale*, vol. ii., and an organ piece in vol. iii. (See VIOLIN-PLAYING.)

F. G., with addns.

GABRIELLI, CATERINA (*b.* Rome, Nov. 12, 1730; *d.* Apr. 1796), daughter of Prince Gabrielli's cook, one of the most beautiful, accomplished and capricious singers that ever lived.

At the age of 14, the Prince, walking in his garden, heard her singing a difficult song of Galuppi, sent for her, and after listening to her performance, promised her his protection and a musical education. She was placed first under Garcia, 'lo Spagnoletto,' and afterwards under Porpora. A great success attended her début (1747) as prima donna, at Lucca, in Galuppi's 'Sofonisba.' Guadagni gave her some valuable instruction in the style in which he himself excelled—the pure and correct cantabile. This she was therefore now enabled to add to her own, which was the perfection of brilliant bravura, with a marvellous power of rapid execution and an exquisitely delicate quality of tone. At other theatres in Italy she met with equal success, singing in 1750, at Naples, in Jommelli's 'Didone,' after which she went to Vienna. Here she finished her declamatory style under the teaching of Metastasio, and fascinated Francis I., who went to the opera only on her nights. Metastasio is said to have been not indifferent to the charms of this extraordinary singer, still known as *la Cochetta* or *Cochettina*, in memory of her origin; but she did not respond. Her capricious treatment of her numerous adorers gave rise to hundreds of stories. In 1765 she quitted Vienna, laden with wealth, and went to Sicily, where she excited the same furore, and exhibited the same caprices. She was imprisoned by the King, because she would not sing her part in the opera above a whisper. During the twelve days of her imprisonment she gave sumptuous entertainments, paid the debts of poor prisoners, and distributed alms in profusion. Each evening she assembled the other inmates of the gaol, to whom she sang her favourite songs in the most painstaking manner. The King was obliged to set her free, and her reputation with the public stood higher than ever. In 1767 she went to Parma, where

the Infant Don Philip fell madly in love with her, and persecuted her so far as sometimes to shut her up in a room of which he kept the key. Terrible scenes occurred between them, and she called him on one occasion *gobbo maladetto*. Having escaped from Parma in 1768 she went to Russia, where she astonished Catherine II. by demanding 5000 ducats as salary, a sum, as the Empress objected, larger than the pay of a field-marshal; to which Gabrielli simply replied, 'Then let your field-marshal sing for you'—as Caffarelli once replied in similar circumstances. She appeared in London in the season of 1775-76. Burney says of her that 'she had no indications of low birth in her countenance or deportment, which had all the grace and dignity of a Roman matron.' The public here was prejudiced against her by the stories current of her caprice; and she only remained during one season.¹ Burney extols the precision and accuracy of her execution and intonation, and the thrilling quality of her voice. She appeared to him 'the most intelligent and best-bred virtuosa with whom he had ever conversed, not only on the subject of music, but on every subject concerning which a well-educated female, who had seen the world, might be expected to have information.' She sang with Pacchierotti at Venice in 1777, and at Milan in 1780 with Marchesi, with whom she divided the public into two parties. After this, Gabrielli retired to Rome with her sister Francesca, who had followed her everywhere as *seconda donna*, and lived upon her savings, which amounted to no more than 12,000 francs per annum. She died of a neglected cold. A beautiful little portrait of her in mezzotint, now very rare, was engraved by D. Martin in 1766 from a painting by Pompeo Battoni.

J. M.

GABRIELLI (GABRIELI), DOMENICO (*b.* Bologna, *c.* 1640; *d.* July 10, 1690), dramatic composer and violoncellist, known as 'il Menghino del violoncello'; first in the band of San Petronio (from 1680), then in the service of the Duke of Modena (1688) and of Cardinal Pamfili (before 1691). In 1676 he became a member, and in 1683 President, of the Società Filarmonica in Bologna. Of his 11 operas, produced in Bologna, Padua and Venice, 'Cleobulo' (1683) was the most successful. An oratorio, 'S. Sigismondo re di Borgogna,' MS. dated 1687, is preserved at Modena. His instrumental compositions 'Balletti, gighe, correnti, sarabande, a due violini e violoncello con basso continuo,' op. 1 (Bologna, 1684), are interesting.

F. G., with addns.

GABRILOWITSCH, OSSIP SALOMONOWITSCH (*b.* St. Petersburg, Feb. 7, 1878), pianist and conductor. He was a pupil of the St. Petersburg Conservatory, where he studied the piano-forte with Anton Rubinstein and composition

¹ Fétis is mistaken in saying that she never came to England, and in the whole of his explanation of her reasons for refusing engagements in London. He also erroneously calls her sister Anne.

and theory with Navratil, Liadow and Glazounow. He was graduated in 1894 as winner of the Rubinstein prize, and spent the next two years studying the pianoforte with Leschetizky in Vienna. His first public appearance was made in Berlin in 1896, after which he made frequent successful tours in Europe. His first American tour was in 1900, followed by numerous others. From 1910-14 he lived in Munich as conductor of the Konzertverein. In 1918 he was appointed conductor of the Detroit (Michigan) Symphony Orchestra, which he has brought to a high standard of excellence. He still keeps up his public appearances as a pianist. His style is one of great finish, delicacy and restraint, not lacking in power or in depth of expression. Among his notable achievements has been a series of historical concerts, showing the development of the pianoforte concerto and other pianoforte forms. In 1906 Gabrilowitsch married Clara Clemens, soprano, daughter of Mark Twain; and has appeared with her in recitals. He has composed an 'Ouverture Rhapsodie' for orchestra, an 'Elegy' for violoncello, and pianoforte pieces.

R. A.

GABUSSI, GIULIO CESARE (*d.* before 1619), a Bolognese composer of the 16th century, pupil of Costanzo Porta, was maestro di cappella in Rome about 1580, and from 1582-1611 at the cathedral of Milan. He was for some time in the service of the King of Poland. Books of madrigals appeared in 1580 and 1598, Magnificats and other church music in 1589, 1619 and 1623. (See *Q.-L.*)

GABUSSI, VINCENZO (*b.* Bologna, early 19th cent.; *d.* London, Aug. 12, 1846), composer and teacher of singing, studied counterpoint under Padre Mattei. He brought out his first opera at Modena in 1825, and then came to London, and remained there for about fifteen years teaching singing and accompaniment. After this he retired to Bologna. In 1834 he produced 'Ernani' at the Théâtre des Italiens, Paris, and in 1841 'Clemenza di Valois' at the Fenice in Venice, without success. He composed chamber music for instruments, but is best known by his vocal duets.

M. C. C.

GADE, (1) NIELS VILHELM (*b.* Copenhagen, Feb. 22, 1817; *d.* there, Dec. 21, 1890), composer, the son of a maker of musical instruments.

His first instruction in music was obtained from a teacher who esteemed mechanical industry beyond talent, and it seems was not very well satisfied with the progress of his pupil. Gade learned a little about guitar, violin and pianoforte, without accomplishing much on either instrument. Later on he met with more able masters in Wexschall, Berggreen and Weyse, and entered the royal orchestra at Copenhagen as violinist, attaining in that practical school the rare degree of mastery in instrumentation which his publications show from the

first. Through his 'Ossian' overture, which, on the approval of Spohr and Schneider, was crowned in 1841 with the prize awarded by the Copenhagen Musical Union, he attracted the attention of the music-loving King, and at once received, like many other men of talent in Denmark, a royal stipend, intended to assist him in a foreign journey. Thus equipped, Gade turned towards Leipzig, where by Mendelssohn¹ he was introduced to the musical public at large.

After the production of his first symphony (Mar. 2, 1843) and the cantata 'Comala' at Leipzig (Mar. 3, 1846), Gade travelled in Italy, and on his return in 1844, Mendelssohn, who was then staying at Berlin and Frankfurt, entrusted him with the conducting of the Gewandhaus concerts. In the winter of 1845-46 he acted as sub-conductor to Mendelssohn at Leipzig, and after the death of the latter conducted alone till the spring of 1848, when he returned to Copenhagen for good, to occupy a post as organist and to conduct the concerts of the Musikverein. In 1861, on the death of Glaeser, he was appointed Hof-Kapellmeister, and received the title of Professor of Music. He visited England for the first time in 1876, to conduct his 'Zion' and 'The Crusaders' at the Birmingham Festival.

The intimate friend of Mendelssohn and Schumann, Gade was in some sense their disciple, his earlier works showing faint traces of the influence of the former, as his later works do that of the latter. Still Gade's distinguished and amiable musical physiognomy is far from a mere reflex of theirs; he always had something to say for himself, and from the first contrived to say it in a manner of his own. His musical speech is tinged with the cadences of Scandinavian folk-song, and almost invariably breathes the spirit of northern scenery. All his works show the same refined sense for symmetry, for harmonious colouring and delicate sentiment. His themes, if rarely vigorous or passionate, are always spontaneous as far as they go, and never without some charm of line or colour. As with a landscape painter, the fascination of his pieces lies in the peculiar poetical impression conveyed by the entire picture rather than by any prominent details; and as in a landscape this fascinating total impression is always the result of perfect harmony of colour, so in Gade's works it is traceable to the gentle repose and proportion of his themes and the suave perfection of his instrumentation. The following is a list of his compositions:

1. Nachklänge aus Ossian, Overture, orch.
2. Frühlingsblumen, three pieces for piano.
3. Sange af Agnete og Havemanden.
4. Nordiske Tonebilleder, pf. duet.
5. First Symphony, C minor.
6. First sonata for pf. and vin. in A.
7. Im Hochland, Overture, orch.
8. String quintet in E minor.
9. Nine Lieder in Volkston, for two soprano and pf.

¹ See Mendelssohn's Letters, Jan. 13, Mar. 3, 1843.

10. Second Symphony, in E.
 11. Six Songs for 4-part male choir.
 12. Comata, cantata, soli, choir and orch.
 13. Five Part-songs, S.A.T.B.
 14. Overture, No. 3, in C.
 15. 'Thiri' Symphony in A minor.
 17. String Octet in F.
 18. 'Three pianoforte pieces in march-form for four hands.
 19. Aquarellen, for pf. two books.
 20. Fourth Symphony, in B flat.
 21. Second sonata for pf. and vin. in D minor.
 22. Three Tonstücke for organ.
 23. Frühlingssinfade, cantata.
 26. Fifth Symphony in D minor.
 27. Arabeske for pf.
 28. Pianoforte sonata in E minor.
 29. Novelletten, pf. trio in A minor.
 30. Erl King's Daughter (Elverskud), cantata, for soli, choir and orch.
 31. Volkstänze, for pf.
 32. Sixth Symphony, in G minor.
 33. Five Lieder for male choir.
 34. Idyllen for pf.
 35. Frühlingshotchaft, cantata.
 36. Der Kinder Christabend, for pf.
 37. Hamlet, concert-overture.
 38. Five songs for male choir.
 39. Michel Angelo, concert-overture.
 40. Die heilige Nacht, cantata.
 41. Four Fantastische for pf.
 42. Pf. trio in F.
 43. Seventh Symphony, in F.
 46. Ved Solnedgang, cantata.
 47. Eighth Symphony in B minor.
 48. Kalamus, cantata.
 49. Zion, cantata, for baritone solo, choir and orch.
 50. Die Kreuzfahrer (The Crusaders), cantata.
 51. Bilder des Jahres, four part-songs for female choir with solos and pf. band accompt.
 52. Den Bjergstagne, cantata.
 53. Novelletten, four pieces for string-orchestra.
 54. Gesten, cantata.
 55. Sonntagsfest auf dem Lande, five pieces for orch.
 56. Violin concerto.
 59. Thiri Sonata, vin. and pf. in B flat.
 60. Psycho, cantata.
 61. Holbergiana, orchestral suite.
 62. Fourth Sonata for vin. and pf. in B flat. (Volkstänze im nordischen Charakter.)
 64. Der Strom (after Goethe's Mahomed), cantata, for soli, choir, pf. obbligato and orch.
- In addition to the above, a cantata, 'Baldurs Drom,' for soli, choir and orchestra, was written in 1858, but not published till 1897. In 1863 he wrote a funeral march for Frederik VII.; in 1869 a 'Festmarsch i Rosborg Have.' In 1872 he wrote a 'Festmusik' for the opening of the Northern Industrial Exhibition at Copenhagen; in 1879 a work for the Jubilee of the Copenhagen University; and in 1883 a composition for the northern 'Kunstnermode' (Artists' Congress) in the same city. From 1884 dates a 'Ulysses' march, and from 1888 a 'Festmarsch' for Christian IX.'s Jubilee. The opera 'Mariotta' seems not to have been performed, although an overture and several numbers were published. E. D.

BIBL.—W. BEHREND, *Niels W. Gade*, (Leipzig, 1917.) CHARLES KJØRULF, *Niels W. Gade i Hundredeåret*, pp. 334. (Copenhagen, 1917.)

(2) AXEL WILLI (*b.* May 28, 1860; *d.* Copenhagen, Nov. 9, 1921), son of the above, was a distinguished violinist. He studied under Tofte and Joachim, and pursued his career at Copenhagen, where he was in turn, leader of the orchestra, teacher of the violin at the Royal Conservatorium and director. His compositions include chamber music, a violin concerto and an opera, 'Venetian Night' (Copenhagen, 1918). (*Riemann.*)

GADSBY, HENRY (*b.* Hackney, Dec. 15, 1842; *d.* Putney, Nov. 11, 1907), composer, son of a musician. He entered St. Paul's choir in 1849, and remained till 1858. The instruction in harmony which he and Stainer, as an exception due to their musical faculty, received from W. Bayley, the then master of the boys, was virtually the only teaching that Gadsby received. He was organist of St. Peter's, Brockley, Surrey, for some time up to 1884, when he succeeded Hullah as professor of harmony at Queen's College, London. He was one of the original professors at the Guildhall School of Music, a member of the Philharmonic Society, and a fellow of the Royal College of Organists.

Gadsby's published works are :

Psalm cxxx.; a Cantata (1862); 'Alice Brand' (1870); 'The Lord of the Isles' (Brighton Festival, 1879); 'Columbus,' for male voices (Crystal Palace, 1881); 'The Cyclops'; Festival Services (1872); Overture, 'Andromeda' (1873); Organ Concerto in F; String Quartet (1875); Andante and Rondo piacevole, Pf. and Flute (1875); music to 'Alcestis' (1876), and to Tasso's 'Aminta' (1898).

In addition to these there were in MS. 3 Symphonies, in C, in A—portions of which have been played at the Crystal Palace—and in D (Crystal Palace, 1889); Overtures to the 'Golden Legend' and 'Witches' Frolic,' and an Intermezzo and Scherzo (Brit. Orchest. Soc., 1875); orchestral scene, 'The Forest of Arden' (Philharmonic, 1896). He also wrote many songs, partsongs, anthems and services, and musical treatises. G., with addns.

GADSKI, JOHANNA (*b.* Anclam, Prussia, June 15, 1873), operatic soprano, married in 1892 to Hans Tauscher.

She was educated at Stettin, where she sang at a concert when 10 years old, and also studied singing under Mme. Schroeder-Chaloupha. In 1889 she made her début as Agathe in 'Der Freischütz' at Kroll's Theatre, Berlin, and sang there until 1893, besides appearing as 'Gast' in other German towns. In 1896 she went to the United States and joined the Damrosch Opera Company, making her début as Elsa and creating the rôle of Hester Prynne in Walter Damrosch's opera, 'The Scarlet Letter,' on its production at Boston, Feb. 11, 1896. Having established a strong American reputation as a Wagnerian singer, she appeared for the first time at Covent Garden in 1899 as Elisabeth in 'Tannhäuser,' and later in the same summer at Bayreuth as Eva in 'Die Meistersinger.' She then sang in both these rôles with singular beauty of voice and purity of style, besides showing power and intelligence as an actress. She only sang another season at Covent Garden, and thereafter her brilliant operatic career was, until 1917, almost exclusively associated with the American stage. She took part in the Mozart and Wagner Festivals at Munich in 1905-6, and received from King Ludwig the Saxon Order for 'Kunst und Wissenschaft.'

H. K.

GÄNSBACHER, (1) JOHANN (*b.* Sterzing, Tyrol, May 8, 1778; *d.* Vienna, July 13, 1844), Kapellmeister of the cathedral at Vienna. At 6 years old he was a chorister in the village church of which his father was choirmaster. Later he learnt the organ, piano, violoncello and harmony at Innsbruck, Halle and Botzen. In 1795 he entered the University of Innsbruck, but on the formation of the Landsturm in 1796 served as a volunteer, and won the gold 'Tapferkeitsmedaille.' In 1801 he was in Vienna, studied under Vogler and Albrechtsberger, and was recommended as a teacher by Haydn, Gyrowetz and distinguished patrons. He next accompanied Count Firmian to Prague in 1807, and devoted himself entirely to composition. In 1809 he was at Dresden and Leipzig, revisited his home, and in the following year settled for a time in Darmstadt to renew his studies under Vogler. Weber and Meyerbeer were his fellow-pupils, and the three formed a lasting friendship. Weber especially retained a sincere affec-

tion for him, took him to Mannheim and Heidelberg, where Gänsbacher assisted in his concerts, and at a later time proposed to him to compete for the vacant post of court Kapellmeister in Dresden. Meantime Gänsbacher lived alternately in Vienna, where he became acquainted with Beethoven, and Prague, where he assisted Weber with his 'Kampf und Sieg.' He also served in the war of 1813, went to Italy as captain in military service, and was even employed as a courier. This unsettled life at length came to a satisfactory end. At the time that Weber was suggesting his settling at Dresden, the post of Kapellmeister of the cathedral at Vienna fell vacant by the death of Preindl (Oct. 1823); Gänsbacher applied for it, was appointed, and remained there for life. He was universally respected both as a man and an artist. As a composer he belongs to the old school; his works are pleasing, but betray their solidity the pupil of Vogler and Albrechtsberger. His compositions number 216 in all, of which the greater part are sacred—35 masses, 8 Requiems, 2 Te Deums, offertories, etc. He wrote also a symphony, several serenades, marches and concerted pieces; pianoforte pieces with and without accompaniment; songs accompanied by various instruments; music to Kotzebue's 'Die Kreuzfahrer'; a Liederspiel, etc. Two Requiems, two masses, and several smaller church works were published by Spina and Haslinger; three tertzetos for two soprani and tenor (op. 4) by Schlesinger; Schiller's 'Erwartung' by Simrock; and sonatas and trios by various publishers. A song of his is given in Ayrton's *Sacred Minstrelsy*.

His son (2) Dr. JOSEPH (b. Vienna, Oct. 6, 1829; d. there, June 4, 1911), was a valued teacher of singing in Vienna, and professor at the Conservatorium. Joseph (Josef) Gänsbacher was an intimate friend of Brahms, who dedicated his violoncello sonata op. 38 to him.

C. F. F., with addns.

GAFFI, BERNARDO, a 16th-17th century composer of the Roman school, was organist at the Church 'del Gesù,' Rome, c. 1700. He was a composer of oratorios and fine cantatas. (*Riemann: Q.-L.*)

GAFORI, FRANCHINO (FRANCHINUS GAFORIUS) (b. Ospitaletto, near Lodi, Jan. 14, 1451; d. Milan, June 24, 1522), a priest and a writer on music. His first instructor was Goodendag, or, as he Latinised his name, Bonadies, a Carmelite friar. Circumstances led him to Mantua, Verona, Genoa, and in 1478, in company with the fugitive doge Adorno, to Naples. There he found Tinctor and two other great Belgian musicians, Garnier and Hycart; and there he remained for more than two years till driven back to Lodi by war and the plague. He passed a short time as maestro di cappella at Monticello and Bergamo, and in 1484 became attached to the cathedral at Milan, where he died. Hawkins

has devoted chapters 72, 73, 74 and 75 of his *History* to him, and has given copious extracts from the *Practica Musicae*, his most important work, and the *Apologia*.

G.

The following is a short list of the various editions of the musical works of this writer:

A. 'Theoricum opus armonice discipline.' Franciscus de Dino. Naples, 1480. 4to. 115 leaves.
Gerber and Becker quote another work, 'De effectibus . . . musice,' as published in this year. The mistake arose from the title of the first chapter being taken as that of the whole work.

B. 'Theorica musicae.' Philippus Mantegatus. Milan, 1492. Fol. 64 leaves.

The 2nd edition of A.

C. 'Practica musicae.' Quillemus Signerre. Milan, 1496. Fol. 111 leaves.

Becker states that an Italian translation of this work was published by Giotardus de Ponte in 1500, but no copy is known. It is probably a mistake arising from a confusion with H, which is written in Italian.

D. 'Musice utriusque cantus practica.' Angelus Britannicus. Brescia, 1497. Fol. 111 leaves.

The 2nd edition of C.

E. 'Practica musice utriusque cantus.' Bernardinus Misinta de Ponte. Brescia, 1502. Fol. 111 leaves.

The 3rd edition of C.

F. 'Practica musice utriusque cantus.' Augustinus de Zannis de Portesio. Venice, 1512. Fol. 82 leaves.

The 4th edition of C.

G. 'Practica musicae,' etc. Venice, 1522. Fol. Mentioned in Brunet's *Manual* as the 6th edition of C, but otherwise unknown.

H. 'Angelicum ac divinum opus musice.' Giotardus de Ponte. Milan, 1496, 1508. Fol. 48 leaves. Hahn (7400) mentions an edition dated 1500, but this is probably a misprint.

I. 'De harmonia musicorum instrumentorum.' Giotardus Pontanus: Milan, 1518. Fol. 108 leaves.

Orlando, followed by Walker, Gerber and Becker, mentions a work called 'Practica musica' as published in 1518; but Fétis points out that this arises from a misdescription of I.

K. 'Apologia Franchini Gafuri . . . adversus Joannem Spararium.' A. de Vicomercato. Turin, 1520. 10 leaves.

The British Museum possesses copies of all these editions (excepting G, the existence of which is doubtful, and the 1496 edition of H); copies of A, B, C, D, H (1508) and I are in the University Library, Cambridge; of B, C, F, H (1508) and I, in Anderson's College, Glasgow; of B, E, H (1508) and I, at the Bodleian Library, Oxford; of C at Trinity College, Dublin; and of C and I in the R.C.M. W. B. S.

A copy of C (1496) is in the New York Public Library. A and H are in the John Rylands Library, Manchester. Copies of A, B and C are in the Fwng Library, Glasgow. W. H. G. F.

GAGLIANO, (1) MARCO DA (b. Gagliano, near Florence, c. 1575; d. Florence, Feb. 24, 1642), composer. Although 'Fiorentino' follows Gagliano's name on the title-pages of some of his books, this was only a way of showing respect to the town in which he lived from his youth, for he was born in the little village of Gagliano, a few miles north of Florence. His father Zanobi, when he moved into Florence, was known by the name of his village 'da Gagliano,' and not by his surname.¹

Marco was educated as a priest, and studied music under Luca Bati, maestro di cappella, 1595-1608, at S. Lorenzo, Florence, learning to play both organ and theorbo. In 1602 he replaced Bati as instructor in church music to the younger priests of S. Lorenzo, receiving two scudi a month. On the death of Bati, Gagliano became maestro di cappella of S. Lorenzo in Nov. 1608, and before 1611 he was also appointed maestro di cappella to the Grand Duke

¹ See Dr. Emil Vogel, *Zur Geschichte des florentiner Musiklebens von 1570-1650*, *Veröffentlichung für Musikwissenschaft*, 1889.

of Tuscany. On Jan. 26, 1609, he was made Canon of S. Lorenzo, under the designation of SS. Cosimo and Damiano, and later, on Jan. 2, 1614, a Protonotario Apostolico. In the meantime he had become the centre of the musical life of Florence. In June 1607 he inaugurated the 'Accademia degl' Elevati,' and singers, composers and music-lovers became members of it. From 1608 it was under the protection of Cardinal Ferdinando Gonzaga. As a member Gagliano took the name of 'l' Affannato' (the anxious one). The Accademia was still in existence in 1620; after that nothing more is heard of it.

A great deal of light is thrown on Gagliano's life at this period by his own letters,¹ twenty-nine of which are preserved in the Gonzaga Archives at Mantua. Written between 1607 and 1622 the larger number are addressed to Cardinal Gonzaga. They show that on the invitation of Prince Francesco he visited Mantua towards the close of 1607, and it was there that his opera 'Dafne' was first produced; probably the performance took place before the end of Jan. 1608, for Caterina Martinelli, who played 'Dafne' and 'Amore' in it, was taken ill early in February and died on Mar. 9. 'Dafne' was received with great enthusiasm and approval. Jacopo Peri, after seeing the score, wrote to the Cardinal that this was a finer setting of Rinuccini's words than any before made. To the present age 'Dafne' and other early operatic efforts represent 'the most primitive form of modern secular music,' but they were 'very effective to minds which were absolutely free from any experience whatever of theatrical representation accompanied by music throughout.'² It must not be forgotten that Gagliano had been trained by Luca Bati, who was a pupil of Francesco Cortecchia, in the narrow contrapuntal paths of virtue, but in Florence he was in the midst of a youthful band of reformers, determined to get away from old-fashioned formulae and to revive the old Greek idea of drama combined with music, under fresh conditions of expression. 'Dafne' shows unmistakable progress in this direction; the declamatory recitative especially has more life, a more emotional setting of the sense of the words. The work was published in 1608 with an original and entertaining preface by Gagliano, expressing his personal opinions on many points. He protests against the habit of adding 'gruppi, trilli, passaggi ed esclamazioni' (see ORNAMENTS, VOCAL) to music unless with some definite design or purpose, such as showing the grace and facility of the singer. He thinks every singer should articulate distinctly, so that the sense of the words may be understood. Turning to the origin of 'rappresentazioni in musica,' he passes rapidly in review Peri's setting of

'Dafne,' Peri's 'Euridice,' and Monteverdi's 'Arianna' with expressions of the warmest appreciation. He gives practical directions as to the performance of his opera; instruments accompanying solo voices should face the singers so that voice and instrument move in harmony; at the rising of the curtain, to arrest the attention of the audience, a sinfonia should be played by various instruments; the latter will also serve to accompany the chorus and play the ritornelli. It may be noted here that the only instrumental piece in the score of the opera is a short 'Ballo' at the end; the rest consists of voice-parts and bass. Finally, he states that the songs 'Chi da lacci d' Amor,' 'Pur giacque estinto al fine,' 'Un guardo, un guardo appena,' and 'Non chiami mille volte,' which shine like stars among the others ('lampeggiano tra l'altre mie come stelle'), were composed by one of the principal members of the Accademia, 'gran protettore della musica.' He gives no name, but it is fairly certain that the composer in question was Cardinal Ferd. Gonzaga (Vogel, *Vierteilj.* 1889). Later on 'Dafne' was performed in Florence, probably during the Carnival of 1610. Gagliano remained in Mantua for the wedding ceremony in May of the Duke of Mantua's son, receiving on his departure a present of 200 scudi from the Duke for his musical services. He returned in June to Florence, where Peri had been acting as his deputy at S. Lorenzo; while at Mantua he had found time to compose the music for the Holy Week services at S. Lorenzo at the beginning of Apr. 1608. Gagliano was buried in S. Lorenzo, Florence, on Feb. 26, 1642. A terracotta bust of him is placed in the chapter-house with the inscription:

'Marcus a Galliano Zenobii filius insignis hujus Collegiatae ex cappellano canonicus ser. magni Etruriae divitis musicae cappellae magister morum probitate et doctrinae praestantia celeberrimus obijt anno salutis MDCLXII.'

The comparatively small amount published by Gagliano is partly due to the fact that he severely criticised his own work, and only printed the music he thought worthy to survive him; but it is also known that a certain number of his compositions which were printed have now disappeared. For instance, the text exists of an opera written by Andrea Salvadori and set to music by Gagliano in 1619:

'Il Medoro, rappresentato in Musica nel Palazzo del Ser. Gran Duca di Toscana in Firenze per l'elezione all' Imperlo della S. C. M. dell' Imp. Ferdinando II. In Firenze per il Ceconcelli.'

During the Carnival of 1622 it was performed in Mantua, and Gagliano's own letters at that time prove him to have been the composer. On Jan. 31, 1622, he wrote from Florence:

'Invio a V. A. Sma. per il presente procaccio, due atti del Medoro, l'altro non ho avuto tempo di scriverlo, ma con prima occasione lo manderò. È parso all'autore di variare i cori per rappresentarla, stimando che l'opera potesse riuscire troppo grave, e perciò ha mescolato il ridicolo.'

¹ They may be read in the appendix to Dr. Vogel's paper *Vierteilj.* 1889.

² C. H. H. Parry, *Oxf. Hist. Mus.* vol. III., 1902.

Again, on Feb. 7: 'Mando a V. A. Sma. il restante del Medoro.' Only the text by Salvadori exists of an early attempt at oratorio or sacred drama ('azione sacra') by Gagliano, the 'Rappresentazione di Santa Orsola, Vergine et Martire,' first performed at Florence in 1624; and the music of many of the small works composed for especial occasions must have been lost in the same way. List of works:

1. Di Marco da Gagliano Fiorentino. Il primo libro de' madrigali a cinque voci. Novamente stampato. In Venetia, appresso Angelo Gardano. 1602. 4to, pp. 21. Dedicated to Ridolfo, Principe d'Anhalt. Also contains 'Luce soave' by Luca Bati; and 'Scherzo con l'aura' with the second part by the same su 'l'Idio' by Gio. del Turco. Five partbooks in Bologna Liceo Musicale.
2. The same. Novamente ristampato. Venetia, appresso Angelo Gardano & Fratelli. 1606. Five partbooks in the Bologna Liceo Musicale.
3. Di M. da G. Il secondo libro de' madrigali. A cinque voci. Novamente stampato. In Venetia, appresso Angelo Gardano. 1604. 4to, pp. 21. Dedicated to Gio. del Turco, Cavaliere di R. Stefano, who 'volle apparare da me gli insegnamenti del contrapunto, nel quale si cavavano cantato,' etc.: Firenze, 30 Aprile, 1604. Contains one madrigal by Luca Bati, one by Pietro Strozzi, and 'Coro hat di questa' by Gio. del Turco, which, with Gagliano's 'Puggi lo spirito' in the same volume, were written in memory of Jacopo Corsi, who must have died early in 1604. Five partbooks in Bologna Liceo Musicale.
4. Di M. da G. Il terzo libro de' madrigali. A cinque voci. Novamente stampato. In Venetia, appresso Angelo Gardano. 1605. 4to, pp. 21. Dedicated to Cosimo I. di Medici, 8 febbraio, 1605. Contains two madrigals by Luca Bati, one by Giovanni and one by Lorenzo del Turco. Five partbooks in Bologna Liceo Musicale.
5. Di M. da G. Il quarto libro de' madrigali. A cinque voci. Novamente stampato. In Venetia, appresso Angelo Gardano. 1606. 4to, pp. 20. Dedicated to Don Ferdinando Gonzaga, Priore di Bartolotta. Firenze, 1 Febbraio, 1606. Contains one madrigal by Luca Bati, one by Giovanni, and one by Lorenzo del Turco. Five partbooks in the Basel Stadische Landesbibl.
6. Offitium defunctorum quatuor paribus vocibus concendendum, una cum aliquibus funebribus modulationibus. Marco a Gagliano auctor. Venetia apud Angelum Gardanum et Patres. 1607. 4to, pp. 21. Dedicated to Cosimo I. di Medici, 15 gennaio, 1607. Sixteen numbers, twelve with Latin text, four (Madrigali spirituali) with Italian. The Tenor and Basses partbooks only are known, in the Bibl. Riccardiana, Florence.
7. La Daine di Marco da Gagliano n'è avvedimento degli elevati l'affannato, rappresentata in Mantova. In Firenze, appresso Cristofano Marescotti. 1608. Folio, pp. IV, 55. Dedicated to Vincenzo Gonzaga, Duca di Mantova e di Monferrato: Firenze, 20 Ottobre, 1608. In British Museum, etc.
8. Il quinto libro de' madrigali a cinque voci. Di Marco da Gagliano nell' accademia degli elevati l'affannato. Novamente stampato. In Venetia, appresso Angelo Gardano & Fratelli. 1608 (a misprint for 1606 which occurs in the title-page of each partbook, but is correctly printed on the inner leaf). 4to, pp. 21. Dedicated to Lodovico Arrighetti: Firenze, 25 Ottobre, 1608. Five partbooks in the British Museum, etc.
9. Missa et sacre cantiones, sex decantantes vocibus Marci a Gagliano Fiorentini ac musicis seren. max. Etrusque Duci Præfati. Florentiae, apud Zenobium Igonium. 1614. 4to, pp. 24. Dedicated to Seren. Cosmo, Magni Etrusque Duci. Florentiae die 26 Aprilis, 1614. Contains fifteen motets and one mass. Six partbooks in the Brecht Bibl. Regensbur.
10. Musiche a una, due e tre voci di M. da G. maestro di cappella del serenissimo Gran Duca di Toscana. Novamente composte e date in luce. In Venetia. 1615. Appresso Riccardo Anadino. One vol. in fol, pp. 43. Dedicated to Cos. Francesco Giannini: Firenze, 15 Ottobre, 1615. Includes 'Pur venisti cor mio' by L. Arrighetti. Contains the songs from the 'Ballo di donne tirche insieme con i loro consorti di schiavi fatti liberi' danced at the Palazzo de Pitti all' Altezze di Toscana. Il Carnèval dell' anno 1614. Is in the Bibl. adiale, Florence, etc.
11. Il sesto libro de' madrigali a cinque voci di M. da G. maestro di cappella del serenissimo Gran Duca di Toscana. Al molto lib. Sigr. e Patron mio collettivo, il Sig. Cosmo I. di Medici. Novamente stampati. Stampa del Gardano in Venetia. 1617. Appresso Bartholomeo Magni. 4to, pp. 20. Contains one madrigal by L. Arrighetti, three 'd' Inverno, whom Dr. Vogel thinks was probably Cardinal Ferd. Gonzaga. Five partbooks in Bologna Liceo Musicale.
12. The same. Novamente ristampati. 1620. Five partbooks in the Canal Bibl. Crespano.
13. Basso generalis sacrarum cantionum una ad sex decantantium vocibus. Marci a Gagliano, insignis et illustis Ecclesie Sancti Laurentii Canonici, et musicæ sereniss. magni Etrusque Ducis Præfati. Liber Secundus. Venetia, 1622. Sub signo Gardani apud Bart. Macinum. Folio, pp. 48. In British Museum. With the six other partbooks. publ. in the Brecht Bibl. Regensbur. Dedicated to Filippo del Nero: Firenze, 1 Agosto, 1622. 23 compositions. No. 6 'Salve Regina' for three voices is said to be by Gio. Batt. Gagliano. At the end of this volume, addressed 'ai benigni lettori,' is Gagliano's protest against Mich. Effrem's attacks on his madrigals, with the wish that they were more openly made, so that he could answer them. Effrem at once published 'Censure di Muto Effrem sopra il sesto libro de' madrigali di M. Marco da Gagliano.' Folio, pp. 30, in which he reprints Gagliano's letter with an impertinent reply (see Parinati, *Cat. della Bibl. del L. M. Bologna*, vol. I., and Vogel, *Viertelj.* 1889 app.), as well as fourteen of the madrigals in score, noting at the beginning of each the errors he or his pupils have been able to discover; he added a madrigal of his own to show what a madrigal should be!
14. La Flora del Sig. Andrea Salvadori. Posta in musica da M. da G. maestro di cappella del seren. Gran Duca di Toscana. Rap-

presentata nel Teatro del Seren. Gran Duca nelle reali nozze del ser. Odoardo Farnese, Duca di Parma e di Piacenza, e della seren. Principessa Margherita di Toscana. In Firenze, per Zanobi Pignoni, 1628. Fol. p. 141. Dedicated to Odoardo Farnese. Peri composed the part of Clori; 'le musiche furono tutte del Sig. M. da G., eccetto la parte di Clori, la quale fu opera del Sig. Jacopo Peri, e però sopra ciascuna sua aria si son poste le due lettere J. P.' In Modena Bibl. Estense, etc.

15. Responsoria Maiora hebdomada quatuor paribus vocibus decantanda Marci a Gagliano, Musicæ seren. Magni Etrusque Ducis Præfati. Venetia apud Bart. Magni. 1630. 4to, p. 40. Dedicated to D. Alessandro Medici. Florentine kalends Martii anno 1630. Thirty-one numbers. Four partbooks complete in the Canal Bibl. Crespano. This was the last work published in Gagliano's lifetime.

Other compositions: 'Bel pastor' (Dialogo di ninfa e pastore). Musiche di Pietro Benedetti Libro primo. Firenze, 1611.

'Ecco solinga' a una voce. The same. Libro secondo. Venetia, 1613. 'O dolce anima' a 5 voci. Secondo libro de' madrigali a 5 voci di Gio. del Turco. Firenze. 1614. 'Nave questo' a 5 voci. Terzo libro de' madrigali a 5 voci di Filippo Vitali. Firenze, 1629.

'Lauda Sion' a 8 voci. Secondo libro de' motetti a 6 e 8 voci di Gio. Battista da Gagliano. Venetia. 1643.

The madrigals attributed to Gagliano in 'De' fiori del giardino' 2da parte, Norimberga, P. Kaufmann, 1604, were composed by Gio. del Turco, and were included in Gagliano's first book of madrigals, 1602. MSS.—In the Bologna Liceo Musicale: 'Benedictus qui venit' for four voices, in score in the handwriting of the Abbé Santini. Folio score of the first (1606 ed.), fifth and sixth books of madrigals for 5 v. The score and separate parts of the Finale dell'atto IV., and the Coro di Nereidi e Napee in the opera 'La Flora.' In a MS. of the 18th century, a Messa a cinque voci con basso continuo; a Messa festiva a quattro voci pure col basso numerato; and a motet 'Viri Sancti' a cinque voci (the last, doubtful if by Gagliano). Dated 1594, Firenze. It is improbable that this early date is correct. In the Berlin königl. Bibl. (L. 190) an 18th century MS. with the same three compositions; the 5-part Mass is called 'Flores apparuerunt,' and on the 4-part Mass is noted 'unica e rara.' Also the Lauda Sion for 8 v., published 1643 (MS. W. 59, No. 812, in score). The Responsi per la settimana santa for 4 v., published 1630 (MS. L. 132). The Responsoria 'In monte Oliveti' for 4 v., with basso continuo (MS. 6910, in score). Recent reprints—Robt. Eitner: *Die Oper von ihren ersten Anfängen*, etc., vol. 10 of the *Publikation älterer prakt. u. theoret. Musikwerke*, Berlin, 1881. The first and last parts of 'Dafne.'

F. A. Gevaert: *Les Gloires de l'Italie*, 1868, vol. i. p. 116, 'Alma mia dove' a due voci; vol. ii. p. 116, 'Valli profondi' a una voce; both taken from Musiche a 1, 2 e 3 voci, 1615. The latter, arranged for the organ, was published in A. H. Brown's *Select Compositions*, 2nd series, No. 69, 1876.

Hugo Goldschmidt: *Studien zur Geschichte der ital. Oper*, 1901, App. D. From 'La Flora'; 1. Coro 'Bella Diva' a 5 voci; 2. Coro 'Taci Pane' a 2 voci; 3. Clori's air, composed by Peri; 4. Zeffiro's song 'Eccomi un quel'; 5. Coro 'delle grazie.'

Luigi Torchi included a song from 'La Flora' in the 'Raccolta' published by Ricordi, Milano, and inserted a Benedictus and two madrigals in the fourth vol. of his *Arte musicale in Italia*.

The preface to the opera 'Dafne' was pub-

lished separately soon after 1844 in Florence (Parisini, i. 45).

c. s.

(2) GIOVANNI-BATTISTA DA (b. Florence, c. 1585; d. circa 1650), younger brother of Marco, was educated as a priest and musician. In 1613 he succeeded to the post, formerly held by Marco, of musical instructor to the younger priests of S. Lorenzo. In 1634 he is entitled musician to the Grand Duke of Tuscany.

LIST OF WORKS

1. *Varie musiche di Giovan-Battista da Gagliano. Libro primo. Nouamente composto e dato in luce. In Venetia, appresso Alessandro Vincenti* 1623. Fol., pp. 38. In the Bibl. Nazionale, Florence. (Vogel.)

2. *Motetti per concertare a 2, 3, 4, 5, 6, e 8 voci. Venetia, Aless. Vincenti* 1626. 26 numbers. In the *Froese Bibl.*, Regensburg. (Kittner.)

3. *Psalmi vespertini cum Litanis Beatae Mariae Virginis quinque vocibus modularibus auctoris Joanne Baptista & Gagliano seren. mag. Ducis Etruscae musicus. Opus tertium. Venetiis apud Alex. Vincentium* 1634. 4to, 13 numbers. Five partbooks (the Altus missing) in the British Museum.

4. *Il secondo libro de' motetti a sei et otto voci per concertarsi nell' organo, ed altri strumenti. Di G. B. da G. musicus del seren. Gran Duca di Toscana. Dedicati all' Illus. Sig. Marchese (erbone dal Monte, Venetia, Aless. Vincenti* 1643. 4to. No. 17 'Lauda Rion' by Marco da Gagliano. Seven partbooks in the Breslau Stadtbibl. (Bohn.)

**Salve Regina* a tre voci, No. 6 in Marco da G.'s Sac. Cant. 1622. In the Berlin konigl. Bibl. M88. W 59 contains six motets in score (publ. 1643); and in W 35 Nos. 424-430 are songs from the 'Varie musiche,' 1623. (Kittner.)

c. s.

GAGLIANO, an important and numerous family of violin-makers at Naples. More than twenty of this family at different periods were engaged in this craft, but the first of them was (1) ALESSANDRO, who worked from c. 1695-c. 1730. He has been styled, but not by himself, 'alumnus of Stradivari'; in reality there is no reason to connect him either with Cremona or Stradivari. Instead of following the design of Stradivari, or of any of the other famous makers, he developed a style of marked originality. Many of his instruments are of very high quality. He ordinarily used a varnish of a red colour. His sons (2) GENNARO (c. 1730-c. 1788) and (3) NICOLÒ (c. 1740-c. 1785), though showing less originality than their father, had the wisdom to follow more closely the Stradivari model, and made a large number of excellent instruments. (4) FERDINANDO (1760-c. 1810), and (5) GIUSEPPE (c. 1760-c. 1790), both sons of Nicolò, made some good violins and violoncellos, but their work was, perhaps, less consistent than that of the earlier Gagliani. These five were followed by several other members of their family; at times they produced fairly good instruments, but as a whole their work was hasty and cheap. Up to the close of the 19th century descendants of Alessandro were living in Naples, but their interest in violins and violin-making had ceased.

E. H. F.; information from Alfred Ebsworth Hill.

GAILHARD, (1) PIERRE (b. Toulouse, Aug. 1, 1848; d. Paris, Oct. 12, 1918), opera singer and manager, first received instruction in singing at the Conservatoire at Toulouse, and in 1866 and 1867 at the Conservatoire of Paris, from Révial, where he gained the three first prizes for singing, opéra and opéra-comique.

On Dec. 4, 1867, he made his début, with great success, at the Opéra-Comique as Falstaff in Ambroise Thomas's 'Songe d'une nuit d'été,' and remained there until 1870 playing in the 'Châlet' and 'Toréador' of Adam, 'Mignon,' 'Haydée,' etc. On Mar. 25, 1868, he sang Ferdinand VI. in a revival of Auber's 'Part du Diable'; in 1869 in three new operas, viz. Mar. 10, as the Count d'Arlande in Offenbach's 'Vert Vert'; Sept. 11, Barbeau in Semet's 'Petite Fadette,' and Dec. 20, as the Chevalier de Boijoli in Auber's 'Rêve d'amour.' On Nov. 3, 1871, he made his début at the Opéra as Mephistopheles in 'Faust.' He remained a very successful member of that company until Dec. 1, 1884, when he was appointed manager of that theatre with Ritt, on the death of Vaucoirbeil. His parts in new operas included, July 17, 1874, Paulus in Membree's 'Esclave' (Salle-Ventadour); Apr. 5, 1876, Richard in Mermet's 'Jeanne d'Arc'; Dec. 27, 1878, Simon in Joncières's 'Keine Berthe'; Apr. 14, 1882, Guido da Polenta in A. Thomas's 'Françoise de Rimini,' and finally, Apr. 2, 1884, as Pythias in the revival of Gounod's 'Sapho,' wherein he gave an admirable presentation of a drunken debauchee (*Annales du spectacle*). He also sang with success at the various concerts, notably Nov. 19, 1874, in 'Judas Maccabaeus,' under Lamoureux. On leave of absence, from 1879-83 inclusive, he was a favourite singer at the Italian Opera, Covent Garden, where on May 10, 1879, he made a highly successful début as Mephistopheles, being, in the opinion of many connoisseurs, the best representative of the part since Faure. His parts in London included, June 26, 1880, Girod on the production in Italian of 'Le Pré-aux-Clercs'; June 9, 1881, Osmin on the revival of the 'Seraglio'; July 11, 1882, the title part in Boito's 'Mefistofele,' and July 5, 1883, the Podestà on the revival of 'Gazza ladra.'

The Ritt and Gailhard management of the Opéra ended Dec. 31, 1891, on the appointment as manager of Bertrand. In 1893 Gailhard joined the latter as manager, soon after the production, Feb. 24, of the successful ballet 'Malandetta,' scenario by himself, music by Paul Vidal, and on the death of his partner, Dec. 30, 1899, became sole manager until 1900, when he was joint manager with Capou' until 1905. From 1905-8 he was again sole manager, from which last date he was succeeded by Messager and Broussau. The chief features of his career were the production of Wagner's operas, included in the following list of his productions:

* Lohengrin, Sept. 16, 1891; 'Valkyrie,' May 12, 1893; revival of 'Tannhäuser,' May 13, 1895; 'Meistersinger,' Nov. 10, 1897; 'Siegfried,' Jan. 3, 1902; Verdi's 'Rigoletto' and 'Otello'; Leoncavallo's 'Pagliacci,' Bizet's 'Carmen' (1903). Of native composers, Gounod's 'Roméo' at the Opéra, Méhul's 'Joseph' (1899). Of more modern composers: Reyer's 'Sigurd' (1885); and 'La Statue' (1903); Massenet's 'Le Cid' (1888); 'Le Mage' (1891); 'Thaïs' (1894); Saint-Saëns's 'Acrata' (1890); Samson et Dalila' (1892); and 'Les Barbares' (1901);

Faladilhe's 'Patrie' (1886); Bourzault-Ducoudray's 'Thamara' (1891); Chabrier's 'Gwendoline' (1893); Maréchal's 'Bébé' (1893); Lefebvre's 'Djéina' (1894); Augusta Holmès's 'Montagne Noire' (1895); Duvernoy's 'Hailé' (1896); Bruneau's 'Messidor' (1897); Rousseau's 'Cloche du Rhin' and Vidal's 'Burgonde' (1898); Chabrier's 'Brécia' (1899); Joncières's 'Lancelot' (1900); Berlioz's 'Fête de Troie' (Nov. 16, 1900); Xavier Leroux's 'Astarte' (1901); Hillemecher's 'Orsola' (1902); D'Indy's 'L'Étranger' and Erlanger's 'Fils de l'Étoile' (1903).
Ballets: Messager's 'Deux Pigeons' (1886); Worrasser's 'L'Étoile' (1897) and Duvernoy's 'Bacchus' (1905), etc.

Besides the ballet mentioned above, Gailhard wrote the libretto with Gheusi, the librettos of Paul Vidal's 'Guernica,' produced at the Opéra-Comique in 1895, which met with no success, but obtained the Prix Monbinne in 1896, and 'La Maladetta'; of Hillemecher's 'Orsola' and L. Lambert's 'La Roussalka.' On July 6, 1886, he was appointed a chevalier of the Légion d'honneur. A. C.; rev. M. L. P.

(2) His son, ANDRÉ (b. Paris, June 29, 1885), obtained the Grand Prix de Rome in 1908. He was a pupil of Massenet, Leroux, P. Vidal and Leneveu at the Paris Conservatoire. Amongst his dramatic works may be mentioned 'La Fille du Soleil' (1908), 'Le Sortilège' (1913), 'Les Belles de Cadix' (1923), an oratorio and a symphonic poem. M. L. P.

GAL, HANS (b. Brunn, Lower Austria), July 7, 1890). A pupil of E. Mandyzewski, he showed extraordinary musical capacity and talent, and won the State Prize for composition at the Viennese University, where he also took a degree in Philosophy. Since 1918 he has been a lecturer on theory of music at the Viennese University. His compositions, though free from traditional influences, and with a tendency towards great harmonic eccentricities, remain withal tonal, precise and plastic. His works are:

'Von ewiger Freude,' chor. work; 'Vom Bäumlein, das andere Blätter hat gewollt'; Serbian tunes for 4 hands FF.; phantasy on poem by Tagore; Drei Skizzen; variations on Viennese Heurigen music; five Intermezzi for str. quartet; three songs for male chor. and orch.; three songs for women's voices with FF.; comic opera, 'Der Fischer'; opera, 'Der Arzt der Seebade' (lat. perf. Breslau, Nov. 2, 1923); opera, 'Ruth'; overture to Grillparzer's 'Weh dem der lügt'; phantasy for orch.; opera, 'Die heilige Ente' (Breslau, Nov. 25, 1923); opera, 'Das Lied der Nacht.'

H. J. K.

GALÁN, (CRISTÓBAL (17th cent.), one of the earliest Spanish composers to write for the stage after the invention of opera. No complete work of his has survived, but airs and choruses by him exist in MS. in the Bibl. Nac., Madrid. ('Música: Papeles Sueltos.') Sacred music, to Spanish words, and for large numbers of voices and instrument accompaniment (dated 1691), is preserved at Munich. J. B. T.

GALEAZZI, FRANCESCO (b. Turin, 1738¹; d. 1819),² a violin-player, and for many years leader of the band at the Teatro Valle at Rome. He deserves special notice, not so much as a composer of numerous instrumental works, as the author of one of the earliest methodical instruction-books for the violin, which bears the title of *Elementi teorico-prattici di musica, con un saggio sopra l'arte di suonare il violino malizzata*, Roma, 1791 e 1796. P. D.

¹ 1758 according to Fétis.

² Fétis.

GALENO, GIOVANNI BATTISTA: court chaplain 1590-94, and tenor singer in the Munich court chapel. He composed a book of madrigals *a 5* (1594), and one *a 7* (1598) (Q.-L.).

GALEOTTI, (1) SALVATORE, a mid-18th century violinist and composer who lived in London between 1760-70, where he composed concertos and sonatas for 2 violins and bass (Q.-L.).

(2) STEFANO (b. Velletri), a mid-18th century violoncellist and composer who lived in London, Amsterdam and Paris. He composed several books of solos and sonatas for violoncello, as well as sonatas, minuets and a divertimento for 2 violins and bass, published between 1760-85. E. v. d. s.

GALILEI, VINCENZO (b. Florence, c. 1533; d. there, end of June 1591).³ Among the little group of philosophic dilettanti who were accustomed to meet in the Palace of Giovanni Bardi at Florence during the closing years of the 16th century, no figure stands forth with greater prominence than that of Vincenzo Galilei, the father of Galileo Galilei, the great astronomer.

After studying music at Venice under Zarlino, Vincenzo attained, in later life, considerable reputation as a lutenist. He published two books of madrigals (4 and 5 v.) in 1574 and 1587, and 'Intavolatura di lauto' (Bk. i.) in 1563.

When the great question of the resuscitation of the classical drama, on the principles adopted by the Greek tragedians, was debated at the Palazzo Bardi, Galilei took an active part in the discussion; and, according to Giov. Batt. Doni, was the first who composed melodies for a single voice—i.e. after the manner of the then nascent monodic school. His first attempt was a cantata, entitled 'Il conte Ugolino,' from Dante's *Divina commedia*, which he himself sang, very sweetly, to the accompaniment of a viol. This essay pleased very much, though some laughed at it—notwithstanding which, Galilei followed it up by setting a portion of the Lamentations of Jeremiah in the same style. Quadrio also speaks of his intermezzi; but no trace of these, or of the cantata, can now be discovered.

Vincenzo Galilei's writings on subjects connected with art are, however, of great interest. One of these—a Dialogue, entitled *Il Fronimo* (Venice, 1568)—is especially valuable, as throwing considerable light on the form of tablature employed by the Italian lutenists, and their method of tuning the instrument, in the latter half of the 16th century. Another important work, entitled *Dialogo di V. G. . . della musica antica e moderna . . . contra Gius. Zarlino* (Florence, 1581), was produced by some remarks made by ZARLINO (q.v.), in his *Istitutioni*

³ Buried July 2, 1591. (Riemann.)

armoniche (Venice, 1558), and *Dimostrazioni armoniche* (Venice, 1571), concerning the Syn-tonous Diatonic Scale of Claudius Ptolemy, which he preferred to all other sections of the canon, and which Galilei rejected, in favour of the Pythagorean immutable system. It is impossible to believe that Galilei ever really tuned his lute on the Pythagorean system, which was equally incompatible with the character of the instrument and the characteristics of the monodic school. Moreover, Zarlino himself preferred that the lute should be tuned with twelve equal semitones to the octave. But Galilei, whose prejudices were strong enough to overthrow his reason, followed up this attack by another, entitled *Discorso di V. G. . . intorno all' opere di messer Gioseffo Zarlino da Chioggia* (Florence, 1589), and a second edition of the *Dialogo* (Florence, 1602). In these works he argues the subject with great acrimony: but the scale advocated by Zarlino represents the equal temperament now used for the pianoforte, the organ, and tempered instruments of every kind. The *Dialogo* contains, however, much interesting matter but very slightly connected with the controversy with Zarlino; for instance, the text and musical notation of the three apocryphal Greek Hymns, to Apollo, Calliope and Nemesis, which have since given rise to so much speculation and so many contradictory theories. BIBL.—OTTO FLEISCHNER, *Die Madrigale Vincenzo Galileis und sein Dialogo della musica antica e moderna*. Munich Dissertation, 1921–22.

GALIMATHIAS, a French term of very doubtful derivation (Littré), meaning a confused unintelligible discourse. 'Galimathias musicum' is a comic piece of music for orchestra with clavier and other instruments obligato, composed by Mozart in 1766 at the Hague, for the festivities at the coming of age of William of Orange the Fifth (Mar. 8). The piece is in thirteen short numbers ending with a variation on the Dutch national air of 'Wilhelmus von Nassau.' (Köchel, No. 32; O. Jahn, 2nd ed. i. 44.) In a letter of Feb. 5, 1783, Mozart speaks of a galimathias opera—'Gallus cantans, in arbore sedens, gigirigi faciens.' G.

GALIN, see CHEVÉ.

GALITZIN, (1) NICOLAS BORISSOVICH (b. 1794; d. on his estates, province of Kurski, 1866), a Russian prince who is immortalised by the dedication to him by Beethoven of an overture (op. 124) and three quartets (opp. 127, 130, 132).

In 1804–6 he was in Vienna, and doubtless made the acquaintance of Beethoven and his music at the house of Count Rasoumowsky, the Russian ambassador, for whom at that very date Beethoven wrote the three quartets (op. 59), and at that of the Count von Browne, an officer in the Russian service, for whom Beethoven had written several works (opp. 9, 10, 22, etc.). In 1816 Moscheles met him at Carlsbad,

and speaks of him as a practical musician.¹ In 1822 he was married and living in St. Petersburg in very musical society, his wife an accomplished pianoforte-player and he himself a violoncellist and an enthusiastic amateur. At this time, Nov. 9, 1822, he writes to Beethoven a letter full of devotion, proposing that he shall compose three new quartets at his own price, to be dedicated to the prince.² Beethoven accepts the offer (by letter, Jan. 25, 1823) and fixes 50 ducats (say £23) per quartet as the price. Feb. 19, the prince replies that he has 'given an order' for 50 ducats to his banker, and will immediately remit 100 more for the two others. May 5, 1823, he writes again:

'You ought to have received the 50 ducats fixed for the first quartet. As soon as it is complete you can sell it to any publisher you choose—all I ask is the dedication and a MS. copy. Pray begin the second, and when you inform me you have done so I will forward another 50 ducats.'

From this time the correspondence continues till Beethoven's death. Galitzin's further letters—in French, 14 in number—are full of enthusiasm for Beethoven, pressing money and services upon him, offering to subscribe for Mass, symphony and overture, and volunteering his willingness to wait for 'the moments of inspiration.' In fact he had to wait a long time. The first quartet (in E \flat , op. 127) was first played at Vienna, Mar 6, 1825, and is acknowledged by the prince on Apr. 29. The second (in A minor, op. 132) was first played Nov. 6, 1825, and the third (in B \flat , op. 130) on Mar. 21, 1826. These were received by the prince together, and were acknowledged by him Nov. 22, 1826. He also received a MS. copy of the Mass in D and printed copies of the ninth symphony, and of the two overtures in C, the one (op. 124) dedicated to him, the other (op. 115) dedicated to Count Radzivill. Thus the whole claim against him was—quartets, 150 ducats; overture (op. 115), 25 ducats; Mass, 50 ducats; loss on exchange, 4 ducats; total, 229 ducats, not including various other pieces of music sent. On the other hand he appears, notwithstanding all his promises, to have paid, up to the time of Beethoven's death, only 104 ducats. It should be said that in 1826 war and insurrections had broken out in Russia, which occupied the Prince and obliged him to live away from St. Petersburg, and also put him to embarrassing expenses. After the peace of Adrianople (Sept. 14, 1829), when Beethoven had been dead some years, a correspondence was opened with him by Hotschevar, Carl van Beethoven's guardian, which resulted in 1832 in a further payment of 50 ducats, making a total of 154. Carl still urges his claim for 75 more to make up the 150 for the quartets, which Galitzin in 1835 promises to pay, but never does. In 1852, roused by Schindler's statement of the affair (ed. i. pp. 162, 163), he

¹ *Leben*, i. 27.

² *Krabbiel*, III. 87.

writes to the *Gazette Musicale* of July 21, 1852, a letter stating correctly the sum paid, but incorrectly laying it all to the account of the quartets. For the payments of 50 and 25 ducats he had more than ample compensation in the copies of the Mass and the overture, the pleasure he derived from them, and the credit and importance they must have given him in the musical circles of Russia. For the copies of sonatas, overture (op. 115), terzet, and other works sent him by Beethoven, he appears to have paid nothing, nor can he justly demur to Beethoven's having sold the quartets to publishers, or performed them in public, after the *carte blanche* which he gives him in his third letter, where all he stipulated for was the dedication and a MS. copy.¹

The son of the preceding (2) Prince GEORGE (b. St. Petersburg, 1823; d. Sept. 1872), was not only a great lover of music, like his father, but was a composer of various works for orchestra, chamber and voices and an able conductor. In 1842 he founded in Moscow a choir of 70 boys, whom he fed, clothed and educated. It was for long one of the sights of the city. He also maintained an orchestra, with which he gave public concerts, and visited England and France in 1860.

A. W. T.

GALLENBERG, WENZEL ROBERT, GRAF VON (b. Vienna, Dec. 28, 1783; d. Rome, Mar. 13, 1839), of an old Carinthian family, has his place in musical history as a prolific composer and in virtue of his indirect connection with Beethoven.

His passion for music, manifested at a very early age, led him to forego the advantages of an official career and to devote himself to the art. His master in the science was Albrechtsberger. On Nov. 3, 1803, being then not quite 20, he married the Countess Julie Guicciardi, who had been the object of one of Beethoven's transient but violent passions.

During the winter following, young Gallenberg made his appearance in Würth's Sunday Concerts as author of several overtures, which made no impression. In 1805 we find the youthful couple in Naples, where at the great festival of May 31, 1805, in honour of Joseph Bonaparte, Gallenberg prepared the music, which was mostly of his own composition—3 overtures, 8 pieces for wind band and dances for full orchestra. It was greatly applauded, and was doubtless one cause of his being appointed a year or two later to the charge of the music in the court theatre. The ballet troupe was one of the finest in Europe, and Gallenberg embraced the opportunity of improving the Neapolitan school of instrumental music by giving frequent adaptations of the best German productions—complete movements from Mozart, Haydn, Cherubini and others, which opened new sources of delight,

and afforded young composers new standards of excellence. Thus what the Neapolitan school had done for opera in Germany during the 18th century was in some degree repaid by Gallenberg in the 19th.

When Barbaja undertook the management of the court theatre at Vienna (Dec. 21, 1821), he introduced Gallenberg to assist in the management—an arrangement which, however, existed but two years. In Jan. 1829 Gallenberg himself became lessee of this theatre, on a contract for ten years, which, though at first successful, soon came to an end from want of capital. From the autumn of 1816 to the spring of 1838 we again find him in Naples employed by Barbaja as ballet composer and director.

Gallenberg wrote from 40 to 50 ballets, but the local records alone retain even the names of most. We add the titles of a few which in their day were reported as of some interest to the general musical public:

'Samson' (Naples and Vienna, 1811); 'Arsinoe und Telemaco' (Milan, 1813); 'I riti indiani' (Do. 1814); 'Amleto' (Do. 1815); 'Alfred der Grosse' (Vienna, 1820); 'Joan d'Arc' (Do. 1821); 'Margherita' (Do. 1822); 'Ismaans Grab' (Do. 1823); 'La Caravana del Cairo' (Naples, 1824); 'Ottavio Finedi' (Vienna, 1826); 'Das betroffene Jerusalem' (Do. do.); 'Caesar in Egypten' (Do. 1829); 'Theodora' (Do. 1831); 'Orpheus und Eurydice' (Do. do.); 'Agnes und Fitz Henri' (Do. 1833); 'Blancas Wahl' (Do. 1835); 'Lafonia's Kache' (Do. 1838).

A. W. T.

GALLERANO, LEANDRO, a 16th-17th century Franciscan friar of Brescia who was organist at S. Francesco, Brescia, in 1620, and maestro di cappella at S. Antonio, Padua, from 1624. He probably died of the plague, as his successor was chosen Feb. 14, 1632, about the time of the epidemic. He composed several books of masses, psalms, motets and other church music published between 1620-28 (*Fctis*; *Q.-L.*).

GALLET, FRANÇOIS (b. Mons, Belgium, 1st half of 16th cent.), was musician at the College St. Amat, Douay, where he published in 1586 'Sacrae cantiones' in 5, 6 and more parts for instruments of all kinds and for voices; also a book of hymns, 4-6 v. (*Q.-L.*).

GALLI, CORNELIO, a native of Lucca, one of the gentlemen of the Chapel to Queen Catherine in the time of Charles II. Berencloew told Humfrey Wanley that he was a great master of the finest manner of singing, and was one of the first who introduced it into England. J. M.

GALLI, DOMENICO (b. Parma, 17th cent.; d. Modena?), a violoncello virtuoso who composed 'Trattenimento musicale sopra il violoncello a solo' (1691), containing twelve of the earliest violoncello sonatas. In E. v. d. Straeten's *The History of the Violoncello*, an illustration is given of the violoncello which, as well as a violin and a beautifully inlaid harp, he made and covered with most elaborate designs in open carving. He composed also masses and other church music.

E. v. d. s.

GALLI, FILIPPO (b. Rome, 1783; d. June 3, 1853), on his début, in the carnival of 1804, at Bologna, met with a brilliant success, and became one of the first of Italian tenors; but six

l'Isle, formerly a singer at the Paris Opéra under the name Marié. In 1859 she made her début at Strassburg, and next sang in Italian at Lisbon. On Nov. 27, 1855, she married a sculptor named Gally, who died soon after in 1861. In April 1862, on the production at Rouen in French of the 'Bohemian Girl,' she attracted the attention of the late Emile Perrin, and obtained from him an engagement at the Opéra-Comique, of which he was then director. Here she made her début, Aug. 12, in 'La serva padrona,' revived for the first time for over forty years. She made a great success in this and in a revival of Grisar's 'Les Amours du Diable' (1863), since which time she remained at that theatre until the end of 1885, with the exception of engagements in the provinces, in Italy, Belgium and elsewhere. As Mignon and Carmen, the most important parts created by her, she earned for herself world-wide celebrity. In 1886 she played with a French company for a few nights at Her Majesty's Theatre as Carmen, in which she made her début, Nov. 8, and as the Gipsy in 'Rigoletto.' On Dec. 11, 1890, she reappeared at the Opéra-Comique—then located in the building now called the Théâtre Sarah-Bernhardt—as Carmen, with Melba as Michaela, Jean de Reszke as Don José, and Lassalle as Escamillo, in a performance given to raise funds for a monument to Bizet.

A. C.

GALLO, GIOVANNI PIETRO (*b.* Bari, Naples); lived at Bari c. 1597. He composed a book of madrigals, 5 v. (1597) and a book of motets, 5-8 v. (1600); also some madrigals and motets in collective volumes.

GALLO, VINCENZO (*b.* Alcara, Sicily), a Franciscan monk, was (1589) maestro di cappella at Palermo Cathedral, where he still was in 1607. He composed masses, psalms, motets and madrigals (*Q.-L.*).

GALLOT, the name of three French lutenists.

(1) ANTOINE, called Gallot d'Angers (*d.* Vilna, Russia, 1647), was in the service of Pologne Vladislav IV., supposed author of a 'Ballet polonais.'

(2) GALLOT DE PARIS, brother of the preceding, has been identified with Jacques de Gallot, author of 'Pièces de luth,' dedicated to the vice-admiral d'Estrées (between 1670 and 1680 therefore), and of which one known example belonged to J. Ecorcheville ('*cat. de la vente*, No. 251). He was the author of 'La Lucesse,' 'L'Éternelle' and other pieces attributed to the following:

(3) GALLOT LE JEUNE (*d. circa* 1691), son of (1), is mentioned in 1680, 1683, 1687 and 1691. He probably died in this year. Eitner attributes to him a 'Tombeau de la princesse de Monaco.'

J. G. P.

¹ According to de La Laurencie.

GALLUS, JACOBUS, see HÄNDL, JACOB.

GALLUS, JOANNES, called in France Jehan le Coq and in the Netherlands Jan le Coick, a composer of the 16th century, who was maestro di cappella to the Duke of Ferrara in 1534 and 1541. It is impossible with our present information to say whether his name was really Le Coq or Gallus, for in the customs of the time the process of Latinising surnames and that of adopting sobriquets were equally common. Some compositions of his have been attributed to Jhan Gero, but he is not to be confused with that composer, or with the other (younger) composer called Gallus, whose real name was HÄNDL (*q.v.*). For works in the various collections, printed and in MS., see *Q.-L.*; the first book of madrigals by him and other authors was published at Venice in 1541, and the motets, called 'Symphonia quatuor modulata vocibus,' in 1543.

M.

GALLUS, JOSEPHUS, a 16th-century 'religionis somachaeus' of Milan, of the order of St. Maycul at Somasque, Upper Italy, who wrote 'Saeri operis musici alternis modulis concinendi' (lib. 1, 1598); a song 'Veni in hortum,' 5 v. (See *Q.-L.*)

GALOP, a very spirited quick round dance in 2-4 time, much exploited in English ball-rooms of the mid-Victorian era. Galops have one and sometimes two Trios, and are often written with an Introduction and Coda.

The dance is of German origin, and its old name was Hopser or Rutscher—describing the step. It appears to have received that of Galop on its introduction into France. It was first known in Paris in 1829. It is also introduced into the QUADRILLE (*q.v.*).

G.; addms. M. L. P.

GALUBET, the French name for the tabor pipe. (See FINGERING (Wind Instruments), PIPE and TABOR.)

GALPIN, REV. FRANCIS WILLIAM (*b.* Dorchester, Dec. 25, 1858), an authority on ancient musical instruments and an archaeologist.

He was educated at King's School, Sherborne, and Trinity College, Cambridge. He studied the organ with Sterndale Bennett and played the clarinet under Stanford in the C.U.M.S. Ordained to the curacy of Redenhall with Haleston (Norfolk) in 1883, he has been vicar of two benefices, Hatfield Regis (1891-1915), Witnam (1915-21), and Rector of Faulkbourne (1921). In 1917 he became honorary Canon of Chelmsford. He has made a very valuable collection of musical instruments (see COLLECTIONS) and was granted the honorary freedom of the Worshipful Company of Musicians in 1905. He was a valued contributor to the second edition of this Dictionary, and he has extended his contributions in the present one, which owes to him the selection of instruments illustrated by

plates. His published works which concern music include the following:

- Descriptive Catalogue of the European Musical Instruments in the Metropolitan Museum of New York.* 1902.
The Musical Instruments of the American Indians of the N.W. Coast. 1903.
Notes on a Roman Hydraulis. 1904.
The Evolution of the Sackbut. 1907.
Old English Instruments of Music. 1910.
Swinner's Music of the Bible (rev. ed.). 1913.

C.

GALUPPI, BALDASSARE (b. island of Burano, near Venice, Oct. 18, 1706; d. Jan. 3, 1785), composer. He received the surname of Il Buranello, by which he was frequently known, from the island where he was born. His first teacher was his father, a barber, who played the violin at the local theatre.

In 1722 he made his first appearance as a composer with the opera of 'La Fede nell' incostanza, ossia Gli amici rivali.' It was performed at Vicenza under the first title, and at Chioggia under the second, being hissed off the stage at one if not both places. This determined Galuppi to devote himself to the serious study of composition, and he entered the Conservatorio degli Incurabili at Venice, where he became a pupil of Lotti. In collaboration with his fellow-pupil, G. B. Pescetti, he brought out an opera, 'Gli odi delusi dal sangue' (libretto by A. M. Lucchini), at the Teatro S. Angelo at Venice in 1728, which was followed the next year by 'Dorinda,' of which the libretto was by Benedetto Pasqualigo (not Marcello, as erroneously stated by Allacci). We may conclude that these operas were successful, as Galuppi thenceforward continued to compose operas by himself, sometimes as many as five in a year, for Venetian theatres. 'Issipilo' (1738) and 'Adriano in Siria' (1740) were composed for Turin, and in 1741 he went to London, where he arranged the pasticcio, 'Alexander in Persia,' for the Haymarket. He also composed an original opera, 'Penelope,' which was not very successful. 'The genius of Galuppi,' says Burney,¹

'was not as yet matured; he now copied the hasty, light, and flimsy style which reigned in Italy at this time, and which Handel's solidity and science had taught the English to despise.'

The next year's opera, however, 'Scipione in Cartagine,' as well as 'Enrico' (1743) and 'Sirbace,' was more favourably received, and, though Galuppi himself returned to Venice after their production, his music enjoyed a long-continued popularity in England. Indeed Burney considered that he had more influence on English music than any other Italian composer.

In 1748 Galuppi became vice-maestro di cappella at St. Mark's, and in 1762 he became principal maestro. The year 1749 appears to have seen the beginning of his very successful career as a composer of comic operas, with 'L'Arcadia in Brenta' (libretto by Goldoni), produced at the Teatro S. Angelo. In 1750

he and Goldoni produced 'Arcifanfano re de' matti,' and in 1754 'Il filosofo di campagna,' the most popular of all his lighter works. It was performed in London (Haymarket) in 1761, and the following year in Dublin, under the title of 'The Guardian Trick'd.'

In 1766 he was invited to St. Petersburg by the Empress Catherine II., and made a very favourable impression with his 'Didone abbandonata' (Madrid, 1752; Venice, 1765). 'Il re pastore' (Parma, 1762) was given the next year, and in 1768 he composed 'Ifigonia in Tauride' for the Russian opera-house, after which he returned to Venice. He there resumed his position as director of the Conservatorio degli Incurabili, to which he had been appointed in 1762, and had made the institution the most celebrated of its kind when Burney visited him in 1770 (*Present State of Music*, i. 175). On the centenary of Galuppi's death, in 1885, a monument was erected to his memory at Burano. As inquiries are often made by members of Browning Societies and others as to the 'Toccata of Galuppi,' to which Browning referred in his poem of that name, it is perhaps well to state that no particular composition was taken as the basis of the poem.

Galuppi's principal claim to remembrance rests on his comic operas, in which he showed himself fully worthy of his more celebrated collaborator, Goldoni. His melody, though attractive, is not strikingly original; but he had a firmer grasp of harmony, rhythm and orchestration than most of his Italian contemporaries. He is also important for his contribution to the development of the concerted finale, being apparently the first composer to extend the final ensemble of Leo and Logroscino into a chain of five or six clearly defined movements, in the course of which the dramatic action can be said to progress. He did not, however, realise the value of gradually increasing the number of persons singing; and his finales compared with Mozart's show little feeling for the imposing effect of a well-managed musical climax, although they certainly are a great advance on anything that had been attempted before.

A list of Galuppi's extant works will be found in Q.-L.; for the operas the most complete bibliography is that of M. Alfred Wotquenne, *Baldassare Galuppi, étude bibliographique sur ses œuvres dramatiques* (Brussels, 1902). The library of the Brussels Conservatoire possesses several of his autograph scores. E. J. D.

GAMBA, an open slotted organ-stop, generally of 8-foot pitch, and of a stringy or reedy quality of tone. The bearded Gamba has a *frein*, bar, or roller placed in front of the mouth of the pipe to augment the amplitude of the

¹ *Hist. of Music*, iv. 447.

vibrations. Developments of this class of stop under the name of Viol d'Orchestre have resulted in such pipes possessing a very small scale, keen tone, and quick speech. T. E.

GAMBA, VIOLA DA. See VIOL, (1) BASS VIOL.

GAMBLE, JOHN (*d.* 1687), a violinist in the 17th century, was a pupil of Ambrose Beyland, one of the violins to Charles I. He afterwards performed at one of the theatres, and was cornet-player in the Chapel Royal. In 1656 he published 'Ayres and Dialogues to be sung to the Theorbo Lute or Bass Viol,' many of the words by Thomas Stanley, author of the *History of Philosophy*. In 1659 he published a second book entitled 'Ayres and Dialogues for One, Two and Three Voices.' At the Restoration he became 'musitian on the cornet' in the Chapel Royal. In 1662 he set the songs in 'Aqua Triumphalis,' a pageant by John Tatham. He lost all his property in the fire of London, and in 1674 his name appears as one of the musicians-in-ordinary.

W. H. H.; addns. from *D.N.B.*

GAMUT, the name of a complicated plan of the musical scale (from G to e^u), which was in use as long as the system of the hexachords was recognised; it is a contraction of 'gamma ut,' the Greek letter being used to denote the first note, or 'Ut' of the lowest hexachord, the lowest note of the bass stave. This was the starting-point of the first hexachord, and the use of the Gamut seems to have been as a kind of *memoria technica* in changing from one hexachord to another, according to the principles of Mutation. It may be remarked that a useful part of the Tonic Sol-fa system, by which, in modulating from the tonic to the dominant, for instance, the 'soh' of one bar becomes the 'do' of the next, is a survival of the principle for which the Gamut existed. The Gamut may, indeed, be regarded as the ancestor of the T.S.F. Modulator. (See HEXACHORD and TONIC SOL-FA).

The word 'Gamut' was sometimes loosely used for the whole range of a voice or instrument, in the modern sense of 'compass.' 'Gamut G' is the organ-builders' name for the note G of the bass clef; and in the old English church writers, 'Gamut,' 'A re,' 'E la mi' and 'F fa ut' are used to denote the keys of the compositions. Without some practical knowledge of the Gamut, the point of the scene in *The Taming of the Shrew* (ii. 1) between Bianca and Hortensio, must be in great measure lost. The words 'one cliff, two notes have I,' as will be seen at once in the annexed reproduction of the Gamut, refer to the fact that the note B was expressed by a natural and a flat, being in the

former case the third or 'mi' of the hexachord beginning on G, and in the latter the fourth, or 'fa,' of the hexachord beginning on F. M.

GANASSI, SYLVESTRO DI, of Fontego (his birthplace near Venice), musician of the 'Signoria,' Venice, until 1535. He wrote, printed and published 'La Fontegara,' a tutor for the flute (1535), and 'Regola Rubertina' (1542), a tutor for the viols. Description and reproduction of title-pages in E. v. d. Straeten's *The Revival of the Viols*. E. v. d. s.

GAND & BERNARDEL, see LUPOT.

GANDO, (1) NICOLAS (*b.* Geneva, early 18th cent.; *d.* Paris, 1767), type-founder, resided first in Berne and then in Paris, where he established a foundry for a new musical type. His son, (2) PIERRE FRANÇOIS (*b.* Geneva, 1733; *d.* Paris, 1800), was his assistant and successor. They published *Observations sur le traité historique et critique de M. Fournier*, etc. (Berne and Paris, 1766), with the view of showing that Ballard's process was an imitation of Breitkopf's. It contained, amongst others, specimens of six pieces of ancient music printed by Ballard, and a Psalm by Roussier in Gando's own characters, and printed by his process, the notes and the lines requiring a separate impression, and the effect resembling copper-plate. Fournier replied (see his *Manuel typographique*, pp. 289-306), criticising the Gandos and their type, which was, however, superior to his own, though inferior to those of Breitkopf in their own day, and still more to those of Duvergier and others since. M. C. C.

GANZ. A musical family of Mainz.

(1) ADOLF (*b.* Oct. 14, 1796; *d.* London, Jan. 11, 1870), a violinist, studied harmony under Hollbusch; conductor at Mainz (1819), Kapellmeister to the Grand Duke of Hesse Darmstadt (1825); composed a melodrama, overtures, marches, Lieder and choruses for men's voices. He came to London in 1840, and was conductor of the German Opera in 1840-42.

(2) His brother, MORITZ (*b.* Mainz, Sept. 13, 1806; *d.* Berlin, Jan. 22, 1868), was first violoncello under Adolph at Mainz, and (1826) in the royal band at Berlin, where he succeeded Dupont and Romberg. In 1833 he visited Paris and London, returning to the latter in 1837, when he and his brother Leopold played at the Philharmonic on May 1. In 1845 he led the violoncellos at the Beethoven Festival at Bonn. His tone was full and mellow, and his execution brilliant, though his style was of the old school. His compositions for his instrument are numerous, but few only have appeared in print.

(3) The third brother, LEOPOLD (*b.* Mainz, Nov. 28, 1810; *d.* Berlin, June 15, 1869), violinist, played much with Moritz in the style of the brothers Bohrer, whom they succeeded in the royal band at Berlin (1826). Leopold was well received at the Hague, Rotterdam and

Amsterdam, and in 1837 visited England with his brother. They published the duets in which their polished and brilliant execution had excited so much admiration. M. C. C.

(4) EDUARD, son of Adolf (b. Mainz, Apr. 29, 1827; d. Berlin, Nov. 26, 1869), came to London with his father in 1840, and while in England studied the pianoforte with Moscheles and Thalberg; he settled in Berlin and founded a music-school there in 1862.

(5) WILHELM (b. Mainz, Nov. 6, 1833; d. London, Sept. 12, 1914), paid his first visit to England in 1848, and occasionally assisted his father, who was chorus-master under Balfe at Her Majesty's Theatre: he thus enjoyed opportunities of hearing the finest singers of the day, notably Jenny Lind. Ganz returned with his father to Mainz after the London season, but settled finally in London in 1850. From about 1856, when he was engaged as accompanist for Jenny Lind's tour through England and Scotland, he was associated with the great *prime donne* in succession. For some years he was organist at the German Lutheran church in the Strand; and he played second violin in Dr. H. Wylde's New Philharmonic Society in 1852. In 1874 Ganz was conductor jointly with Wylde, and in 1879, on the latter's resignation, undertook the enterprise alone, carrying the concerts on at first under the old name, and subsequently, after 1880, as 'Mr. Ganz's Orchestral Concerts,' for three seasons, during which Berlioz's 'Symphonie Fantastique' and Liszt's 'Dante Symphony' were heard for the first time in London in their entirety. Among the artists who first appeared at these concerts were Mme. Essipoff, Mme. Sophie Menter, Saint-Saëns, Pachmann and others. Ganz was for many years a professor of singing at the Guildhall School of Music, and a Jubilee concert was held in his honour in 1898. He published his *Memories* in 1913.

GANZ, RUDOLPH (b. Zürich, Feb. 24, 1877), pianist, composer and conductor. His first appearance was in Berlin in 1899. From 1900-1905 he was the head of the pianoforte department of the Chicago Musical College. He made many tours in Europe and America. In 1921 he was appointed conductor of the Symphony Orchestra of St. Louis, Missouri. He has composed a symphony and numerous pieces for the pianoforte. R. A.

GARAT, PIERRE JEAN (b. Ustaritz, Apr. 25, 1764; d. Paris, Mar. 1, 1823), the most extraordinary French singer of his time. He studied under Franz Beck, composer and conductor at Bordeaux. He possessed a fine-toned expressive voice of unusual compass, including both baritone and tenor registers, an astonishing memory, and a prodigious power of imitation, and may fairly be said to have excelled in all styles; but his great predilection throughout his life was for Gluck's music. Having been the

favourite singer of Marie Antoinette, who twice paid his debts, he fled from Paris during the Terror, and with Rode took refuge at Hamburg, where the two gave very successful concerts. He visited London with Rode early in 1794, and after his return to France at the end of that year he appeared at the Concert Feydeau (1795) and the Concert de la rue Cléry, with such brilliant success that he was appointed professor of singing at the Conservatoire in 1799. Among his pupils were Roland, Nourrit, Desprésamons, Ponchard, Levasseur, Mmes. Barbier - Walbonne, Chevalier-Branchu, Duret, Boulanger, Rigaut and Mlle. Duchamp, whom he married when he was fifty-five. He retained his voice till he was fifty, and when that failed him tried to attract the public by eccentricities of dress and behaviour. He composed several romances. 'Bélisaire,' 'Le Ménestrel,' 'Autrefois,' 'Je t'aime tant,' etc., extremely popular in their day, but now so monotonous and uninteresting as to make it evident that the style in which Garat sang them alone ensured their success.

BIBL.—BERNARD MIALL, *Pierre Garat* (Fisher Unwin).

G. C.

GARAUDÉ, ALEXIS DE (b. Nancy, Mar. 21, 1779; d. Paris, Mar. 23, 1852), a famous singer at the French court from 1808; was professor of singing at the Paris Conservatoire, 1816; pensioned, 1841. He wrote several tutors, a book on harmony, etc., edited a musical periodical, 1810-11; composed quintets, quartets, sonatas, solos for various instruments and a large number of songs (*Fétis*; *Q.-L.*).

GARCIA, a Spanish family of musicians, who have been well characterised as 'representative artists, whose power, genius and originality have impressed a permanent trace on the record of the methods of vocal execution and ornament' (Chorley).

Various church musicians of the name were eminent at different times in Spain, notably Don Francisco Saverio (1731-1809), who was maestro de capilla at Saragossa, and wrote an oratorio 'Tobia' in 1752. He may have been related to the family of singers, the founder of which was (1) MANUEL DEL POPOLO VICENTE (b. Seville, Jan. 22, 1775; d. Paris, June 2, 1832). Beginning as a chorister in the Cathedral at the age of 6, at 17 he was already well known as composer, singer, actor and conductor. By 1805 he had established his reputation at home, and his pieces—chiefly short comic operas—were performed all over Spain. He made his début in Paris, Feb. 11, 1808, in Paër's 'Griselda,' singing in Italian for the first time. Within a month he had become the chief singer at that theatre. In 1809 he produced his 'Poeta calculista,' originally brought out at Madrid in 1805. In 1811 he set out for Italy. At Naples Murat appointed him (1812) first tenor in his chapel. There he met Anzani, one of the best tenors of the old Italian school, by

whose hints he profited largely. There also, still combining the rôles of singer and composer, he produced his 'Califfo di Bagdad,' which obtained an immense success. In 1815 Rossini wrote for him one of the principal rôles in 'Elisabetta,' and in 1816 that of Almaviva. About the end of 1816 he returned from Naples to England, and thence to Paris, where he revived his 'Califfo,' produced 'Le Prince d'occasion,' and sang in Catalani's troupe, where he made a great hit as Paolino in the 'Matrimonio segreto.' Annoyed by Catalani's management, he left Paris for London about the end of 1817. In the ensuing season he sang in the 'Barbieri' with Mme. Fodor, and in other operas, with much éclat. In 1819 he returned to Paris, and sang in the 'Barbieri,' not till then heard there. There he remained till 1823, performing in 'Otello,' 'Don Giovanni,' etc., and composing 'La Mort du Tasse' and 'Florestan' for the Opéra, besides 'Fazzoletto' at the Italiens, 'La Meunière' at the Gymnase, and three others which never reached the stage. In the spring of 1823 he reappeared in London, where he was still a most effective singer (Elfers). Here he founded his famous school of singing. He sang in London again in 1824 in 'Zelmira' and 'Ricciardo e Zoraida.' In the same year his 'Deux contrats' was given at the Opéra-Comique. In 1825 he was in London again, his salary having risen from £260 (1823) to £1250. He continued to gain still greater fame by teaching than by singing, and his fertility as a composer was shown by at least two Italian operas, 'Astuzia e prudenza' and 'Un avertimento.' The education of his illustrious daughter Marie, subsequently Mme. MALIBRAN (*q.v.*), was now completed, and under his care she made her début. He then realised the project he had long entertained of founding an opera at New York, and set out with that object from Liverpool, taking with him an Italian company, which included the young Crivelli as tenor, his own son Manuel, and Angrisani, De Rosich, Mme. Barbieri, Mme. Garcia and his daughter. At New York he produced no less than eleven new Italian operas in a single year. In 1827 he went to Mexico, where he brought out eight operas, all apparently new. After eighteen months' stay, he set out to return with the produce of his hard toil; but the party was stopped by brigands, and he was denuded of everything, including nearly £6000 in gold.

Garcia now returned to Paris, where he reappeared at the Italiens. He then devoted himself to teaching. Garcia was a truly extraordinary person. His energy, resource and accomplishments may be gathered from the foregoing brief narrative. His singing and acting were remarkable for *verve* and intelligence. He was a good musician, and wrote with facility and effect, as the list of his works sufficiently shows. Fétis enumerates no less than 71

Spanish, 19 Italian and 7 French operas. Words and music seem to have been alike easy to him. His most celebrated pupils were his daughters Marie (Mme. Malibran) and Pauline (Mme. Viardot), Mmes. Rimbault, Ruiz-Garcia, Mérieu-Lalande, Favelli, Comtesse Merlin; Adolphe Nourrit, Géraudy, and his son MANUEL (2).

(2) MANUEL (PATRICIO RODRIGUEZ) (*b.* Madrid, Mar. 17, 1805; *d.* London, July 1, 1906), the most famous singing teacher of his day, and the first to link the art with scientific investigation.

His education began early, and at 15 he received instruction in harmony from Fétis, and in singing from his father. In 1825 he accompanied his father to America. Once more in Paris (1829) he quitted the stage, and devoted himself to teaching. A little later he undertook a serious scientific inquiry into the conformation of the vocal organs, the limits of registers, and the mechanism of singing; of which the results were two—(1) his invention of the Laryngoscope, the value of which is now universally recognised by physicians and artists, and (2) his *Memoire sur la voix humaine*, presented to the French Institut in 1840, which may be said to be the foundation of all subsequent investigations into the voice. Appointed professor of singing at the Conservatoire in 1842, he published in 1847 his *Traité complet de l'art du chant*, which has been translated into Italian, German and English, and has gained a world-wide reputation. Among his pupils were Mmes. Jenny Lind, Catherine Hayes, Henriette Nissen, Mathilde Marchesi, MM. Battaille, Stockhausen, Santley, and his son Gustave (3). In 1848 Garcia came to London, where he was appointed a professor at the R.A.M., a post which he retained until 1895. He resigned his professorship at the Paris Conservatoire, Sept. 30, 1850. On Mar. 17, 1905, his 100th birthday was celebrated by a banquet, at which many eminent persons were present. His portrait, by J. S. Sargent, R.A., was presented to him earlier in the day. Among other distinctions, special orders were conferred upon him by the sovereigns of England, Germany and Spain. J. M., rev.

(3) GUSTAVE (*b.* Milan, Feb. 1, 1837; *d.* London, June 12, 1925), son of Manuel (2) and Eugénie (*née* Mayer) his wife, herself a distinguished teacher of singing, was intended by his father to be an engineer, but followed the family tradition, appeared first at His Majesty's Theatre, London, in 'Don Giovanni' and subsequently sang at La Scala, Milan. After several years of an operatic career in Italy he settled in London as a teacher, was appointed to the staff of the R.A.M. (1880-90), taught at the G.S.M. (1883-1910), and was a professor of the R.C.M. from 1883 until his death. His son

(4) ALBERT (*b.* London, Jan. 5, 1875), is a baritone singer and is also on the teaching staff

of the R.C.M. and G.S.M. (See also MALIBRAN and VIARDOT-GARCIA.) C.

BIBL.—M. STERLING MACKINLAY, *Garcia the Centenarian and his Times*. London, 1908.

GARCIN, JULES AUGUSTE (real name SALOMON) (b. Bourges, July 11, 1830; d. Paris, Oct. 10, 1896), violinist and conductor, came of a family of artists, his maternal grandfather, Joseph Garcin, being director of a travelling company which performed opéra-comique in the central and southern provinces of France for nearly twenty years with great success. At the age of 13 Garcin entered the Paris Conservatoire, where he studied the violin under Clavel and Alard; he gained the first prize in 1853, and in 1856 became a member of the Opéra orchestra, and after a competitive examination was appointed (1871) first solo violin and third conductor. In 1878 he was appointed second conductor at the concerts of the Universal Exhibition. From 1860 he was a member of the orchestra of the Société des Concerts du Conservatoire, first as solo violin, and then as second conductor in place of Altès, who had become first conductor at the Opéra at the end of 1879. At that time the first conductor of the Société des Concerts was Deldevez, who had replaced Hainl in 1872. In 1885, Deldevez having retired on account of health, Garcin was elected conductor of the Société des Concerts with a majority of 26 votes over Guiraud.

Garcin, who was a pupil of Bazin for harmony, and of Adam and Ambroise Thomas for composition, wrote a number of works for violin and orchestra or piano, the most prominent of which is a concerto played by himself at the Conservatoire, at the Concerts Populaires in 1868. He retired in 1892. A. J.

GARDANO, the name of a publishing firm founded by (1) ANTONIO (originally GARDANE), composer, printer and publisher of music in Venice from 1538–69. From and after 1557 his name is given as Gardano. After 1570 his sons (2) CIPRIANO and (3) ANNIBALE published a few works, and (4) an ANGELO GARDANO, whose relationship does not appear, many more. From 1570 the name of the firm was 'Li figliuoli di Antonio Gardano.' In 1575 Angelo signs under his name only. (5) ALESSANDRO GARDANO printed and published at Venice in 1580 but removed to Rome 1581, where he went into partnership with Francesco Coattino, returned to Venice in 1619, and was still there in 1623. The Venice house lasted till 1619. Their publications consist of the masses, psalms, motets, madrigals, canzoni and other compositions of Arcadelt, Jachet, Lasso, Rore, Nanini and other great Flemish and Italian writers, and fill many volumes. (See Eitner, *Bibliog. der Sammelwerke*, Q.-L., and Vogel, *Bibl. d. ged. Weltl. Vocalmusik Italiens*.)

G.; revd. B. v. d. S.

GARDEL, (1) CLAUDE (d. Paris, 1774), a French dancer; maître de ballet at the court of Stuttgart, Württemberg, then at that of the King of Poland at Nancy; the father of the two following dance designers (choreographers). His wife, Jeanne-Louise Dartenay, was still alive in 1776. (An actor of this name made his début without success at the Théâtre Française, May 4, 1712, went over to the Opéra-Comique in 1715 and then to the provinces.)

(2) MAXIMILIEN-LÉOPOLD-PHILIPPE - JOSEPH (b. Mannheim, Dec. 18, 1741; d. Paris, Mar. 11, 1787) (Gardel aîné), a French dancer, choreographer, son of the preceding. He made his début at the Opéra in 1755, and danced there in more than 60 works. When the theatre was burnt in 1761 he limited himself to his functions as maître de ballet. He succeeded Noverre in 1781. Between 1778 and 1782 Gardel composed several ballets alone, or with his brother, which he was reproached for having given to the opéra-comiques then in vogue: 'La Chercheuse d'esprit' (1776), 'Ninette à la cour' (1778), 'La Rosière' (1783), and especially 'Le Déserteur' (played 1788–1808; music by Miller). He also gave 'Mirza' (1781), 'Le Premier Navigateur,' by Grétry (1785), etc. Gardel continued the work of Noverre in perfecting the 'ballet d'action,' and reforming the dresses. He was also a musician, and played the harp at a Concert Spirituel, 1768.

There is a portrait of him playing the harp by N. F. Regnaut in the Louvre,

(3) PIERRE-GABRIEL (the younger) (b. Nancy, Feb. 4, 1758; d. Montmartre, Paris, Oct. 18, 1840), was also a dancer and choreographer. He appeared first at the Opéra in 1771; in 1775 he was at the head of the 'danseurs seuls et en double.' The King of England, having offered him a post as instructor to his children, the Opéra accorded Gardel a pension of 4800 livres in order to retain his services (Aug. 15, 1785). He collaborated with his brother, to whom he was superior, and succeeded him as maître de ballet (1787–1828). He ceased to dance in 1791 on account of an accident. From 1782–93 Gardel the younger took part in the management of the Opéra. He was director of the school of dancing and was a member of the advisory body of the theatre. His best-known ballets are: 'Rosino' and 'Les Sauvages' (with his brother, 1786); 'Le Coq du village' (after Favart, 1787); 'Le Pied de bœuf' (of which he composed the music, 1787); 'Télémaque' and 'Psyché' (1790). The music of these two ballets, which were a success, was by KRASINSKI (called Miller), see (4); 'Le Jugement de Paris' (1792; music by Haydn, Pleyel and Méhul); 'La Dansomanie' (1800; music by Méhul. Gardel played a violin piece in this); 'Paul et Virginie' (1806, Kreutzer), etc. During the Revolution Gardel dramatised 'La Marseillaise,'

'le Chant du départ,' and arranged a number of topical pieces, as he did under the Empire and the Restoration. The last works for which he arranged 'divertissements' were 'Le Siège de Corinthe' (1826, Rossini), 'Macbeth' (1827, Chélaré). Gardel the younger served as choreographer for 40 years.

He was the last to present the 'danse noble' and the 'ballet mythologique.' He carried out, after his brother's retirement, the reform of Noverre in giving to the 'ballet d'action' a correctness and elegance in which Noverre's works were lacking.

After the death of his first wife, Anne-Jacqueline Coulon, dancer, by whom he had two children, Pierre married (Dec. 24, 1795), the dancer Miller (see 4).

(4) MME. MARIE-ELIZABETH-ANNE HOUBERT, called Miller (b. Auxonne, Côte d'Or, Apr. 8, 1770; d. Paris, May 18, 1823), was a dancer described as 'la Vénus de Médicis de la danse.' She was the daughter of François-Xavier Houbert, musician of the regiment of artillery, and of Elizabeth Chemitre. Her mother having remarried the Polish musician Graschinski or Krasinski (called Miller), she made her appearance at the court performances at Fontainebleau ('Dardanus,' by Sacchini, Oct. 20, 1785), and at the Opéra (Jan. 13, 1786). She was as good a pantomimist as she was a dancer, and for 30 years she excelled in every genre and was universally admired. She retired in 1816 with a pension of 4000 francs.

J. G. P.

GARDEL-HERVÉ, see HERVÉ.

GARDEN, MARY (b. Aberdeen, Feb. 20, 1877), an operatic soprano singer. She was taken to America as a child; in 1895 she was taken to Paris for study with Trabadello and Fugère. She made her début as Louise in Charpentier's opera, at the Opéra-Comique at very short notice, with success that was not damped by her faulty French pronunciation. She sang in Paris and in London in important operatic productions, and appeared in New York for the first time in 1907 as Thais in Massenet's opera. She sang at the Manhattan Opera House till 1910, since when she has been a member of the Chicago Opera Company (for one season, 1921-22, its manager). She has sung in a very large number of operas and has 'created' the leading soprano parts in many; the most important perhaps being that of Mélisande in Debussy's 'Pelléas et Mélisande,' which has remained her most successful impersonation. Miss Garden's personality has counted for more in her performances than her vocal art, which is defective, or her histrionic skill, which is limited and vitiated by many mannerisms.

B. A.

GARDINER, HENRY BALFOUR (b. London, Nov. 7, 1877), composer, received his general education at Charterhouse and Oxford, but after leaving school and before going to the university he spent a year and a half at Frankfurt, where he studied composition under Professor Knorr. He returned there after leaving Oxford, and then went for a few months to Sondershausen, where he had the opportunity of hearing two of his earliest orchestral works performed, namely, an overture and a symphony. On coming back to England he was for a short time music master at Winchester College, but he gave up this in order to devote time to composition. Of his orchestral works the 'English Dance' and the symphony in D were first performed at Queen's Hall Promenade Concerts in 1904 and 1908 respectively, while on June 15 of the latter year Beecham brought forward his 'Fantasy.' Gardiner has also written a certain amount of chamber music, in particular a string quintet in C minor, and a string quartet in B flat (in one movement).

G. S. K. B.

In 1912 and 1913 Gardiner gave important series of orchestral concerts at Queen's Hall, with the object of bringing before the public new works by his contemporaries. His own compositions had only a modest place in these schemes. Since then he has frequently shown himself ready to devote his private means to the support of musical enterprises, either for the production of new works or for the furtherance of public taste. Most of his own larger works remain in MS. (see *B. M. S. Ann.*, 1920), but certain of his published works, particularly for voices, have had considerable vogue. His style is always vigorous and unmistakably English. 'News from Whydah' (Masefield), a short ballad for choir and orchestra (1912), shows it at its best. His partsongs have been much sung at competitive festivals. His 'Shepherd Fennel's Dance' for orchestra (Promenade Concerts, 1911), based on an episode in Thomas Hardy's *Wessex Tales*, has become exceedingly popular.

C.

GARDINER, WILLIAM (b. Leicester, Mar. 15, 1770; d. there, Nov. 16, 1853), attained some notoriety as writer on and editor of music.

He inherited a stocking manufactory at Leicester. His business occasionally required him to visit the Continent, and he availed himself of such opportunities to become acquainted with the works of the best foreign composers, particularly of the great German masters, so that for a long period he knew more about their productions, especially those of Beethoven, than the majority of English professors. (See Thayer, *Beethoven*, i. 441.) Both at home and abroad he sought and obtained the acquaintance of the best musicians of all ranks, both professors and amateurs. In his youth he composed some songs and duets, which were published as the productions of 'W. G. Leicester.'

He produced, under the title of 'Sacred Melodies' (6 vols.), a selection of pieces by the best masters, chiefly foreign, adapted to English words, which he hoped might be adopted in our churches to the exclusion of the clumsy verses of Sternhold and Hopkins, and Tate and Brady. In 1817 Gardiner edited and added notes to the Rev. C. Berry's translation of Beyle's *Life of Haydn* and R. Brewin's translation of Schlichtergroll's *Life of Mozart*, and other pieces. He next compiled an oratorio, entitled 'Judah' (1821), by adapting English words to music selected principally from the masses of Haydn, Mozart and Beethoven, and connected by compositions of his own. He wrote to Beethoven offering him 100 guineas for an overture to this work, but received no reply, owing, as he supposed, to the miscarriage of his letter. In 1832 he published:

'The Music of Nature; or, an attempt to prove that what is passionate and pleasing in the art of singing, speaking, and performing upon musical instruments is derived from the sounds of the animated world.'

The musical examples were published separately. In 1838 he published two volumes called *Music and Friends; or, Pleasant Recollections of a Dilettante*—the utility of which is much impaired by its frequent inaccuracy, —with a third volume in 1853. In 1840 he adapted Pope's *Universal Prayer* to music by Haydn, Mozart and Beethoven. *Sights in Italy, with some Account of the present State of Music and the Sister Arts in that Country*, appeared in 1847. Besides these works Gardiner composed a few anthems. W. H. H.

GARDONI, ITALO (*b.* Parma, late in 1821; *d.* Mar. 30, 1882), studied singing under De' Cesari. He made his début at Viadana in 1840 in 'Roberto Devereux.' In the same year he was engaged by Ronzani, with whom he went to Turin and Berlin, where he sang the rôle of Rodrigo, with Rubini as Otello. Gardoni sang during two seasons at Milan, and afterwards at Brescia. Thence he went to Vienna. In 1844–1845 he appeared at the Académie Royale, creating the tenor parts in 'Marie Stuart,' 'L'Âme en peine,' etc. In Paris Gardoni remained for three years. In 1847 he went to the Théâtre des Italiens, and in the same spring made his first appearance at Her Majesty's Theatre, and 'by his charm of person and of voice (somewhat slight though the latter has proved) did more to reconcile the public to the loss of Signor Mario than could have been expected.'¹ Here he created the tenor rôle in Verdi's 'Masnadieri.' Since then, with the exception of a few seasons spent at St. Petersburg, Madrid, Amsterdam and Rome, Gardoni came every spring to London, and returned to Paris (Italiens) for the winter.

Gardoni belonged to the *mezzo carattere* class of tenors. He was a member of the Société de Bienfaisance Italienne of Paris, and a chevalier

of the Corona d'Italia. He married a daughter of Tamburini, Aug. 14, 1847; and in 1874 retired from the stage. J. M.

GARLANDIA, JOHANNES DE. The works on music which appeared under this name were formerly ascribed to a Gerlandus who, owing to some confusion of dates, was said to have flourished in 1041, but who was afterwards identified with the mathematician Gerlandus, canon of the abbey of St. Paul at Besançon in the middle of the 12th century.

It appears, however, more probable that the writer on music, Johannes de Garlandia, was identical with the grammarian and poet of that name who flourished nearly a century later. Of the life of this latter we gather several particulars from his great work *De triumphis Ecclesiae* (finished in 1252), of which the British Museum possesses an almost contemporary copy (Claudius A. X.), which has been printed by Thomas Wright. Born in England² late in the 12th century, Johannes de Garlandia studied first at Oxford about 1206, and afterwards, about 1212, at Paris. Here he opened a school in the Clos de Garlande, since known as the Rue Gallande, from which he is supposed to have derived his name de Garlandia, or, as one early writer spells it, de Gallandia. It was probably about this time that he wrote his treatise on music. In 1218 we find him present at the siege of Toulouse, apparently himself taking part in the crusade against the Albigenses. It was to this place also that he was invited in 1229 to assist in the formation of the newly founded University; and here he remained till 1232, when he and his colleagues were forced to leave owing to the persecution to which they were subjected at the hands of the Dominicans and others. They escaped after many dangers to Paris, where John de Garlandia was still residing in 1245. Here no doubt were written most of his poems on historical and theological subjects, and his grammatical treatises. The titles of his musical works which have come down to us are two fragments, *De fistulis* and *De nobis*, printed by Gerbert from a MS. at Vienna;—*De musica mensurabili positio*, of which there are MSS. at Paris and Rome; in this work the author figures as a composer, giving, among many other examples of his own, one in double counterpoint;—a treatise, *De cantu plano*, to which he himself refers in the last-mentioned work; this may be the *Introductio musicæ plane et etiam mensurabilis* in the St. Dié MS.—Philip de Vitry refers to other works by de Garlandia, of whom he writes as 'quondam in studio Parisino expertissimum atque probatissimum.' The *Optima introductio in contrapunctum pro rudibus*, contained in MSS. at Pisa and Einsiedeln, should perhaps be assigned to a Johannes de Garlandia of a later date; or, if the work of the same man, must

¹ Chorley.

² Gratian Flood suggests Garlandstown, Co. Louth, Ireland.

have been written by him when at an advanced age. The same may be said of the extracts quoted by Handlo and Hanboys. Most of the above works are printed by de Coussemaker.

A John de Garlandia is mentioned by Roger Bacon as eminent at Paris apparently shortly before 1267.

A. H. H.

GARNIER, FRANÇOIS JOSEPH (*b.* Lauris, Vauluse, 1759; *d.* there, 1825), a famous oboist; was in 1778 second and in 1786 first oboe at the Paris Opéra; afterwards flautist. He retired 1814. He composed oboe concertos, duos, trios, solos for flute, oboe, bassoon, etc. (see *Fétis*), and an excellent tutor for oboe which has been published in German by P. Wiprecht.

E. v. d. s.

GARRETT, DR. GEORGE MURSELL (*b.* Winchester, June 8, 1834; *d.* Cambridge, Apr. 8, 1897), organist and composer. In 1844 he entered the choir of New College, Oxford, where he studied under Dr. S. Elvey until 1848. He then returned to Winchester and studied for six years with Dr. S. S. Wesley, to whom he acted as assistant, 1851-54, when he accepted the post of organist at the cathedral of Madras, but returned to England in 1857 on his appointment as organist at St. John's College, Cambridge. Garrett took the degree of Mus.B. in 1857, and that of Mus.D. in 1867. In May 1873 he succeeded J. L. Hopkins as organist to the University. In Nov. 1878, by grace of the senate, he received the degree of M.A. *propter merita*, a distinction which had never been previously conferred on a musician who did not fill a professorial chair. Dr. Garrett was also an examiner for the University and other bodies. His compositions include a sacred cantata, 'The Shunammite' (performed by the Cambridge University Musical Society in 1882 and at the Hereford Festival in the same year), church music, songs, partsongs, and a few pieces for the organ; but it is chiefly as a composer of Services that he won his wide reputation.

W. B. S.

GARTH, JOHN (*b.* Durham, 1722; *d.* London?, 1810), composed 6 concertos for violoncello with 4 vlns., alto and bass ripieno; 6 sonatas for harpsichord with accompaniment for 2 vlns. and v'cl. op. 2 (1768); 6 voluntaries for organ. He edited, together with Avison, 50 of Marcello's psalms.

E. v. d. s.

GARZON, DIEGO (16th cent.), a Spanish madrigalist, of whom nothing is known beyond the 6 lively 4-part compositions preserved in the Medinaceli Library, Madrid (MS. 13,230).

J. B. T.

GARZONI, TOMASO (*b.* Bagnacavallo, Romagna, Mar. 1549; *d.* there, June 8, 1583), wrote *La piazza universale di tutte le professioni del mondo* (Venice, 1587), which deals with music and musicians in chapters 2 and 42 and appeared in many editions and various

languages; four German editions, 1626-1719. (See *Q.-L.*)

GASCHET (GACHET), JOHN, originally a stationer in Hereford, who settled at York in or before the year 1516, living within the Minster Close. It may be claimed that he was the first English provincial music publisher, for he issued at least six musical service books according to the usage of the York Cathedral—a Missal, 1516, a Breviary, 1526, a Processional, 1530, and other works. These will be found fully described in Davies's *Memoirs of the York Press*, 1868. It has been suggested that Gaschet was also a printer, but this is rather doubtful. The Missal of 1516 was printed by one Peter Oliver, and it was afterwards reprinted on the Continent. After Gaschet's time there is no evidence that any one of the York presses printed music until the beginning of the 18th century. Psalm books from movable music type are found with York imprints bearing dates 1715-1720, etc.; general music came forty years after this latter date.

F. K.

GASCOGNE, MATHIEU, an early 16th-century French composer. Eitner gives a list of his masses, motets, chansons, etc., from various collective volumes, 1521-54, and MSS. (*Q.-L.*).

GASPARDINI, GASPARA, maestro di cappella at Verona Cathedral, c. 1683; composed 12 sonate a tre, 2 voci e violoncello, con il B. per l'organo op. 1, Bologna, 1683) and sonate a 3, do. do. op. 2 (Roger, Amsterdam).

GASPARD WEERBECK, see WEERBECKE.

GASPARINI, FRANCESCO (*b.* Camajore, near Lucca, Mar. 5, 1668; *d.* Mar. 22, 1727), composer of opera and church music, was a pupil first of Corelli and afterwards of Bernardo Pasquini. He was maestro di coro at the Ospedale di Pietà in Venice, and a member of the Accademia Filarmonica.

In 1725 he was elected maestro by the Chapter of St. John Lateran, but he was already in broken health at the time of his appointment, and retired upon half-pay in August of the following year. He retained his post nominally with Girolamo Chiti for a coadjutor, until his death. The celebrated Benedetto Marcello was his pupil for many years both at Venice and at Rome, and a correspondence between them, continued up to a few weeks before the death of Gasparini, testifies to the esteem in which the great scholar held his master. A professional conflict between Gasparini and A. Scarlatti, the origin of which was unknown to Baini, took the form of an exchange of cantatas, by no means a regrettable method of retort between rival and disputative artists.

Gasparini wrote equally well for the church and for the stage, and Clément gives a list of 32 operas. Several of them were favourites in London in the early part of the century. He visited London in 1702. On Dec. 26 of that year he played violin solos at Saggiotti's con

cert. He gave a concert on June 14, 1705, and left in August.¹ His oratorios were 'Mosè liberato dal Nilo' (Vienna, 1703), 'Nascita di Cristo' and 'Nozze di Tobia' (1724), 'Santa Maria egittiana' and 'L' Atalia.' He also composed several cantatas. But the work by which he is now best remembered is his treatise upon accompaniment entitled

¹ 'L' Armonico pratico al cembalo, ovvero regole, osservazioni ed avvertimenti per ben suonare il basso e accompagnare sopra il cembalo, spinetta ed organo, 1708.'

This work was republished as lately as 1802 at Venice, and has maintained its position in Italy even since the appearance of the clearer and better arranged treatise of Fenaroli. Cerù's mistake of ten years in the dates of appointment to the Lateran, and death (*Cenni storici dell' insegnamento della musica in Lucca*) was followed in various dictionaries, and in the appendix to the first edition of the present work. It has been fully disproved in an interesting article by Enrico Celani in the *R.M.I.* vol. xi. p. 228, entitled 'Il primo amore di Pietro Metastasio.' E. H. P., with addns.

GASPARINI, MICHELANGELO (b. Lucca; d. Venice c. 1732), a famous male contralto, said to have become a soprano in 1708; teacher of Faustina Hasse-Bordoni; composed 5 operas 1695-1721, an oratorio, and a number of arias (*Fétis*; *Q.-L.*).

GASPARINI, QUIRINO (b. Bergamasco; d. Turin, Oct. 11, 1778), maestro di cappella at the court at Turin, 1760-70; violoncello virtuoso and composer of a *Stabat Mater* and other church music, and trio sonatas; also a violin concerto in MS.² (*Q.-L.*).

GASPARO DE SALO, see SALO.

GASSIER. (1) ÉDOUARD (b. Ap. 30, 1820³; d. Havana, Dec. 18, 1872), was taught singing at the Conservatoire, Paris, and in 1844 gained the first prize for opera and opéra-comique, and the second prize for singing. On Apr. 22, 1845, he made a successful début at the Opéra-Comique in Paris as Fiesque on the production of Auber's 'Barcarolle.' He soon left that theatre for Italian opera, and played on the stages of Palermo, Milan, Vienna and Venice. In 1848 he married Josefa Fernandez (see below). From 1849-52 the Gassiers were engaged in Spain, and in 1854 at the Italiens, Paris, where Gassier made his début as Assur in 'Semiramide.' On Dec. 23 of this year he sang as Ferrando on the production in Paris of 'Trovatore.' In 1855 the Gassiers were engaged at Drury Lane in Italian opera under E. T. Smith, where Gassier made his début, Apr. 16, as the Count in 'Son-nambula,' and later played Figaro in 'Il Barbiere' and Malatesta in 'Don Pasquale,' his wife being the heroine on each occasion. In 1860 he was engaged alone by Smith at Her Majesty's; in 1861 with Mme. Gassier at the Lyceum under

Mapleson. From 1862-67 Gassier was engaged at Her Majesty's, and in 1868 at Drury Lane under Mapleson, and sang the usual baritone repertory; and in the operas new to England—in 1863 as Troilo in Schira's 'Nicolo de' Lapi,' and Mephistopheles in 'Faust'; in 1864 as Page in Nicolai's 'Merry Wives,' and Ambrose in Gounod's 'Mireille'; in 1866 Thoas in Gluck's 'Iphigénie en Tauride'; in 1867 Pirro in a revival of Verdi's 'Lombardi,' Fra Melitone in 'La forza del destino,' Figaro in the 'Nozze,' etc. In 1870 he sang under Wood at Drury Lane in two operas new to England—May 12 as Don Beltrano in Mozart's 'L' oca del Cairo,' and, July 5, Laertes in 'Mignon.' He was a very useful singer and actor, and withal, according to Santley, 'a very good comrade.'

His wife, (2) JOSEFA, née FERNANDEZ (b. Bilbao, 1821; d. Madrid, Nov. 8, 1866), was originally a chorus-singer, but later was taught singing by Pasini, a favourite tenor of the period. On Apr. 8, 1846, she made her début at Her Majesty's as Elvira in 'Ernani,' according to Chorley; but she was admittedly a failure. Later she sang in Spain, Milan and Genoa. In 1855 at Drury Lane she made a great temporary success as Amina, Lucia, Norina and Rosina in 'Il Barbiere.' In this opera she introduced with great success 'Ah che assorta,' called the Gassier vocal waltz, composed for her by the Genoese composer Venzano. At the end of the season, according to the *Musical World*, she was presented with the managerial testimonial of a magnificent piece of plate. In the autumn she sang at Jullien's Concerts, Covent Garden. In 1858 she sang again under Smith at the same theatre, and in 1861 with Mapleson at the Lyceum, with diminished favour. A. C.

GASSMANN, FLORIAN LEOPOLD (b. Brüx in Bohemia, May 4, 1729; d. Vienna, Jan. 22, 1774). In 1736 he ran away from his father, who wished to educate him as a merchant. By playing the harp he worked his way to Bologna, where he studied for two years under Padre Martini. He then entered the service of Count Leonardi Veneri at Venice, and his compositions were soon in general request. In 1762 he was invited to Vienna as a ballet-composer. In 1771 he had entered on his new office and suggested the formation of the 'Tonkünstler Societät' a Fund for the Widows and Orphans of Vienna musicians, a society which in 1862 was reorganised under the name of the 'Haydn.' See Pohl's *Denkschrift*, etc. (Vienna, 1871). On the death of Reutter, the Emperor Joseph II. appointed him in Mar. 1772 court Kapellmeister with a salary of 800 ducats. Gassmann died owing to a fall from his carriage. He composed 23 Italian operas, of which two were translated into German, 'L' Amor artigiana,' by Neefe and 'La contessina' by Hiller. The latter is published in *D.T.O.* vol. xxi. (See

¹ According to Gratian Flood. Dates given by Constant Pierre.

² Without Christian name, hence doubtful.

³ Poughn.

list in the *Q.-L.*) He also composed an oratorio, 'La Betulia liberata' (Vienna, 1771), and much church music, of which Mozart thought more than of his operas (Letter, Feb. 5, 1783). When at Leipzig, he said to Dolce, who could not quite join in his praises, 'Papa, if you only knew all we have of his in Vienna! As soon as I get back I shall study him in earnest, and hope to learn a great deal.' Gassmann cannot be said to have exercised any special influence on the development of musical form effected during his time by Emanuel Bach, Haydn and Mozart. His best pupil was Salieri, who educated Gassmann's daughters as opera-singers after their father's death. F. G.
